THE
AMERICAN
ANNUAL CYCLOPÆDIA
AND

REGISTER OF IMPORTANT EVENTS

OF THE YEAR

1863.

EMBRACING POLITICAL, CIVIL, MILITARY, AND SOCIAL AFFAIRS; PUBLIC DOCUMENTS; BIOGRAPHY, STATISTICS, COMMERCE, FINANCE, LITERATURE, SCIENCE, AGRICULTURE, AND MECHANICAL INDUSTRY.

VOLUME III.

NEW YORK:
D. APPLETON & COMPANY, 443 & 445 BROADWAY.
1865.

ENTERED, according to Act of Congress, in the year 1864, by

D. APPLETON & COMPANY,

In the Clerk's Office of the District Court of the United States for the Southern District
of New York.

PREFACE.

IN presenting to the public another volume of the *ANNUAL CYCLOPÆDIA*, containing the record of the most turbulent year which the country has witnessed, the publishers trust that it will be found truthful and impartial. No efforts have been spared to secure its completeness and accuracy, and to preserve it free from every mark of partisanship.

The year 1863 was a remarkable one. Principles adopted in the previous years had gone into effect, and now manifested their results. Many new and important questions thus came up, and were discussed in Congress, by the press, and before civil tribunals. In Europe, also, similar developments were manifested, and although the conflict of arms was not so extensive or violent as in this country, the agitation of men's minds was no less deep and earnest. In these pages the effort has been made to present the facts of this seething condition, so that the reader may see what steps have been taken in public and social affairs, and how far forward they lead toward any amelioration of mankind.

Among the numerous questions discussed were those relating to confiscation, emancipation, indemnity official and pecuniary, the relations of the insurrectionary States to the Union, personal liberty, martial law, prize, the liability of Great Britain for damages done by the *Alabama*, the reconstruction of the map of Europe, and the reorganization of Germany.

A detailed statement of the vast military and naval operations in this country is given, which presents the movements of the armies day by day, and step by step, with the objects of those movements, and their consequences; also the efforts of the Government to improve the condition of the freedmen who came within their control, and to organize the able-bodied as soldiers; also the plans and arrangements of its immense hospitals for the sick and wounded. The military operations are illustrated with complete topographical maps of the country.

The details of the internal affairs of the country embrace the organization of the armies, North and South; the number and condition of the troops; the important measures and debates in Congress; the acts of State Legislatures,

and resolutions of political organizations, and the results of elections; the finances of the Federal Government, and of that of the insurrectionary States, and the important public measures of the latter; the commerce of the country, and the regulations adopted for commercial intercourse with parts of the Southern States within the lines of the army; the correspondence with foreign States; the enrolment and draft, and the exchange of prisoners; the unusual popular disturbances, and all those important occurrences comprised in the history of the nation.

The interesting events relating to foreign nations in all parts of the world are presented, and more especially the conflict in Poland, the movements in Germany, the emancipation in Russia, the propositions of France, and her efforts to obtain a congress to settle the vexed complications of Europe.

The mechanical industry manifested in the construction of iron-clad ships has been severely tested during the year. These results, with the opinions of their commanders, are not overlooked. The improvements in heavy ordnance are also described.

The progress of science in its application to useful purposes has been brought up in some branches, and the views and discussions of scientific men in others, are presented.

The geographical explorations which have been actively pursued in all quarters, have resulted in some discoveries which have long been sought by brave and enterprising men.

The history of the financial operations of the Federal Government from the beginning of the civil war to the close of the year, are described. It embraces the condition of the treasury, the system of finance adopted by the Secretary, the measures recommended by him to Congress, the action of that body and the results, together with tables from the Department which have not before appeared in print.

A most thorough and complete classification of the books published during the year, shows that the record of literature is not less important than in any previous year.

The notice of the principal religious denominations of the country, states their branches, membership, views on civil affairs, and the spread of their distinctive opinions.

The number of distinguished men who closed their career during the year, has been unusually large. A brief tribute has been paid to their characters and services.

All important documents, messages, orders, and letters from official persons, are inserted entire.

THE ANNUAL CYCLOPÆDIA.

A

AFRICA. The most important of the countries of this continent which have native governments, are Egypt, Abyssinia, Liberia, Morocco, Tunis, Tripoli, and Madagascar. Egypt, under the enlightened rule of Said Pasha, who died on Jan. 18th, 1863, and his successor, the actual Pasha Ismail, has been, and is still, making great progress in civilization. Its population is rapidly increasing, and had, in 1859, risen to 5,125,000. The canal of Suez, which is rapidly approaching completion (*see* SUEZ, CANAL OF), will give to Egypt a large interest in the commerce of the world, and greatly elevate its position among civilized nations. Its principal city, Cairo, with 254,000 inhabitants, and Alexandria, with 150,000 inhabitants, will soon claim a place among the great and important emporiums of the world.

The Emperor of Abyssinia has been for some years engaged in war against the neighboring tribes, for the purpose of enlarging the boundaries of his empire. The details of these wars, which continued during the year 1863, are of little interest, although the public was shocked toward the close of the year by a report of unparalleled barbarities committed by him. On the other hand, the emperor is highly praised as friendly to civilization by some lay missionaries of the Missionary Society of Basle, Switzerland, who have been permitted to settle in Abyssinia and establish schools. The Republic of Liberia continues to advance in prosperity. On February 17th the ratifications of a treaty of commerce and navigation, concluded at London between Liberia and the United States of America, were exchanged. In the island of Madagascar a revolution broke out on May 12th, at the capital of Tanarivo. King Radama II. and his ministers were assassinated. The widow of the king was proclaimed queen under the name of Ra-

soaheri-Manjoka, and signed a constitution, drawn up by the anti-foreign party of the Hovas. The treaties concluded by King Radama with the European Powers were suspended, but assurance was given that religious liberty would be respected, and that the labors of the missionaries would not be interfered with.

Among the English possessions in Africa, the islands of Mauritius and Seychelles are rapidly increasing in population. The total population of Mauritius, according to the census of April, 1861, was 313,462, no less than 129,956 more than in 1851. The Indian-born population numbered 172,425, and the children of Indian parents were 20,029, so that the Indian element now numbers 192,604, or more than three fifths of the whole. In 1862 there were 9,893 additional immigrants landed in Mauritius, and 190 liberated Africans on the Seychelles. No one of the European Powers is making so great progress on the African continent as France. This is especially the case on the western coast. In Senegal and its dependencies she has already annexed a territory of 25,357,525 hectares with 252,000 inhabitants, while fully 1,000,000 of natives are exclusively trading with her. On Feb. 27th, 1863, the commander of the French fleet stationed upon the western coast accepted, in the name of his government, the protectorate of Porto Novo, the coast west of Lagos. In Algeria France now rules over an area of 39,000,000 hectares, and a population of 2,999,124. Of these 2,806,378 are natives, and 192,746 Europeans.

The number of Roman Catholics in Africa may be estimated at about 1,100,000, of whom about 10,000 live in the Cape Colony, 2,500 in Natal, 120,000 in Mauritius, 6,000 in the Seychelles, 10,000 in Senegambia, 120,000 in Reunion, 439,000 in the Portuguese and 12,000 in the Spanish possessions, 185,000 in Algeria,

27,000 in Egypt, 30,000 in Abyssinia, 10,000 in Tunis and Tripolis.

Protestantism prevails in Liberia, in the Cape Colony, and other English possessions. In Madagascar, where the missionaries have been able to gather again the dispersed native congregations, the number of Protestants is supposed to reach fully 10,000. Altogether the number of the population connected with or at least under the influence of Protestant denominations is estimated at about 730,000.

Of other Christian bodies, there are in Africa the Abyssinian Church with a population of 3,000,000; the Copts in Egypt, whose number is estimated by some at 150,000, by others at 250,000; Syrian Christians (in Egypt), 5,000; Greeks (in Egypt), 5,000; Armenians, 2,000.

The negro tribes in the interior of Africa have, since the beginning of the present century, adopted to a large extent the Mohammedan creed. More recently it has been reported that Islamism is making some inroads in regions which have been hitherto regarded as secured to Christianity. On the west coast of Africa it has proselyted many of the liberated Africans, and is now extending south-erly on the coast. In the Cape Colony the Mohammedan working people are accounted among the most orderly part of the population, and many of them find wives among the English girls, who do not scruple to adopt the religion of their husbands.

AGRICULTURE. The crops of the year 1863 were not generally equal to those of 1862. The wheat crop exceeded that of 1862, in the quantity produced, about one million of bushels; but this was owing to the considerably greater breadth sown, and not to the number of bushels grown to the acre. The quality of the grain was somewhat inferior. The amount of rye produced was nearly half a million of bushels less than in 1862, and of barley about a million bushels less; while the production of oats (though the grain itself was lighter) was about two and one third million bushels more. The great falling off, however, was in the fall crops—corn, buckwheat, and potatoes, and was due to two severe frosts: one occurring on the 28th, 29th, and 30th of August; the other on the 18th of September. These frosts were most severe in a tract extending from Lake Superior southward as far as Tennessee, and, perhaps, five hundred miles in width. In the northeast, the second frost did not appear till the 22d of September, and in New York not until the 24th, and was much less severe than in the Mississippi valley. The corn, at the time of the first frost, was not sufficiently forward to have formed much of its starch principle, and as the sap flowed but little after the first frost, and not at all after the second, it was prevented from any complete development, and dried up in a shrivelled condition. The falling off in the amount of the crop, notwithstanding the much greater breadth planted, was over 134 millions of bushels, about one fourth

of the crop of the previous year, and the quality of much of that gathered was very poor, possessing no fattening properties. As a result of this, the number of hogs fattened was very much smaller than the previous year, and the larger part of those slaughtered were not in such condition as to furnish the best grades of mess pork. The same frost materially diminished the potato crop, which, in consequence, was 13 millions of bushels less than the previous year, and the buckwheat crop, which fell off nearly three millions of bushels, or about one sixth of the crop.

The grain crops of England and France were much better than they had been for two years previous, and hence the export demand was not as heavy; but the large demand for the army and navy, and the short crop of corn, enhanced the price of all descriptions of bread stuff, and at the close of the year, they were from twenty to twenty-five per cent. higher than in 1862. Provisions of the higher grades had advanced, mainly from the falling off of the corn crop, about 30 per cent.; but the exports of these, owing in part, perhaps, to the higher rates of exchange, had increased during the year over any previous year. The accompanying tables will exhibit the estimated amount of the principal crops in each of the Northern States in 1862 and 1863, and the exports of agricultural produce.

The following crops and products are estimated in the aggregate by the Agricultural Department from the monthly returns of their correspondents, as follows, in 1862 and 1863:

Crop or Product.	1862.	1863.
Hay.....tons.....	21,500,000	20,000,000
Flax seed.....bushels...	825,684	1,155,953
Clover seed.....bushels...	1,034,790	806,448
Sorghum molasses...gallons...	10,203,728	6,970,882
Louisiana sugar....hogsheads.		50,000

Exports of Breadstuffs and Provisions in 1862 and 1863 from New York.

Breadstuffs and Provisions.	1862.	1863.
Flour.....barrels	2,989,619	2,434,736
Wheat.....bushels	24,890,341	14,867,056
Corn....."	11,531,819	7,526,149
Rye....."	1,099,656	416,369
Oats....."	172,922	125,806
Beef, from all ports.....tierces.	55,961	69,163
Do. ".....barrels.	44,250	52,498
Pork " ".....tierces.	3,822	2,189
Do. " ".....barrels.	243,854	252,536
Hams and bacon.....100 lbs.	1,659,976	2,028,620
Lard.....100 lbs.	1,459,040	1,325,315

The culture of the grape, both as a table fruit and for the purpose of producing wine, has received a new impulse the past year. The comparative merits of different varieties have been very thoroughly ascertained. For table purposes it seems to be settled that, in the northern tier of States, the Delaware, Concord, and Hartford Prolific are the most desirable, ripening earlier than others, and producing fruit of a good quality. For the region lying south of 40° N. latitude, the Catawba, Diana, Union Village, Isabella, and Allen's Hybrid are re-

AGRICULTURE.

*The returns of the Crops in these States showing very little variation in the two years, the returns of 1862, which were made with great care, have been adopted for 1863.

garded as best. The To Kalon, Creveling, Adirondac and Ionia, new varieties, have also a fair reputation. The Clinton, a small grape, but prolific and of fair quality, has some good fruits. Loomis's honey grape, a remarkably sweet, large, black fruit, has begun to attract attention. The establishment of vineyards for wine making is increasing with extraordinary rapidity. For some years past the vineyards on the Ohio, in the vicinity of Cincinnati, have furnished considerable quantities of wine of fair quality, though not well calculated to replace foreign wines. The production of this wine, which was made mostly from the Catawba grape, has been constantly increasing. Within the past year or two, large quantities of wine from California have been brought into the Eastern markets. This was at first produced from the Los Angeles and Savanna, both called the mission grape, varieties cultivated by the Jesuit Fathers at their missions on the coast; but as the wine from these grapes was somewhat objectionable on account of an earthiness of taste, the Catawba, Isabella, and many European varieties have been introduced, and are now used in the making of wines. The interest in the subject in California is so great, that an agent (Col. A. Haraszthy) was sent to Europe to investigate the methods of cultivating the grape for wine, and the process of wine making, and has published, during the last year, an elaborate and very interesting report, entitled "Grape Culture and Wine Making" (N. Y., Harper and Brothers). The California wines are gaining a good reputation. Recently, also, Missouri has become largely engaged in the production of native wines. The vine-growers in that State are for the most part, though not wholly, Germans, and the grapes most cultivated are Norton's Virginia, the Catawba, Concord, Herbemont, and Delaware. The cost of the investment for a first-class vineyard (aside from the value of land), including trenching, larger root planting, stakes, posts, &c., is about \$400 per acre, and there are no returns till the third year, when the crop should be sufficient to pay the expenses of that year's cultivation, and after the third year, the average annual value of the crop should not be less than \$500 per acre, and, in favorable years, will be nearly or quite double this.

Another region, in which the grape culture for wine has already attained a considerable prominence, is on the Lake shore and the islands of Lake Erie, where the soil is admirably adapted to its cultivation. A large proportion of the vine-growers are Canadians, and the grapes principally grown are the Delaware and Concord. At Croton Point, on the Hudson, and at Georgetown, D. C., are extensive vineyards, from which, of late years, wine of good quality has been made.

The scarcity of cotton led to the attempt to raise it in Southern Illinois, Indiana, and Missouri, as well as in Kentucky. The frosts, already noticed, affected this crop severely, and

the yield was not more than one half an average one. Lower down on the Mississippi, as well as on the coast of South Carolina and Florida, the abandoned plantations of persons who had joined their fortunes to the Confederates, were taken up, and cotton raised with considerable success. The desire to substitute some other textile material for cotton, led also to the greatly increased production of flax, and the introduction of machines for dressing it with greater facility and less labor, and for reducing it to a condition analogous to that of cotton. The Sanford and Mallory flax-dressing machine, invented the year before, but not introduced into market to any considerable extent till 1863, has already wrought a great revolution in the formerly difficult and laborious business of flax breaking, accomplishing as much in one day, with the aid of two boys, as could be done with far greater labor by four men in five days. The attempt to produce a flax cotton, suitable for use on cotton-spinning machinery, though greatly multiplied during the year, can hardly be regarded as successful on a large scale, probably from an erroneous view of the nature of the flax fibre.

The lack of cotton has stimulated the growth of wool, and the production of that staple has greatly increased, while its quality is somewhat improved. There are now nearly eight hundred woollen factories in the United States, employing 3,000 sets of cards. The heavier broadcloths, satinets, and cassimeres, and most varieties of woollen goods for female wear, shawls, blankets, under clothing, &c., are manufactured from American wool in American factories. The finest broadcloths are still imported, but the manufacture of woollen goods has received such an impulse from the great demand of the Government, that it cannot be long before the American goods will equal the foreign in the beauty and perfection of their manufacture. The great excellence attained in the breeding of sheep in this country received a striking illustration at the International Agricultural Fair, held at Hamburg, July 14th, 1863, where a flock of twelve merino sheep from the estate of George Campbell, Esq., of Vermont, took three of the highest prizes, viz.: the first prize for the buck of the best quality; the first prize for the buck yielding the greatest quantity of wool; and the second prize for the best ewe, considering both quantity and quality. These prizes were obtained in competition with 1,761 other sheep from all parts of Europe, sixty of them being from the flock of the Emperor of the French. At the close of the Exhibition, the twelve sheep were purchased by Count Sher Thoss for \$5,000. At the same fair, eleven other American inventors or manufacturers received gold, silver, or bronze medals for agricultural implements, including McCormick's and other mowers and reapers, ploughs, harrows, cultivators, seed sowers, fanning mills, root cutters, horse powers, &c.

The Agricultural Fairs, National, State, Coun-

ty, and Town, throughout the Northern States during the autumn of 1863, were largely attended, and gave, to some extent, an additional stimulus to the development of agriculture.

The grants of land, by the Government, under the Agricultural College Act of 1862, have been accepted by all the Northern States, and arrangements made by most of them either to organize Agricultural Colleges, or to add an Agricultural Department to colleges already established. In New Hampshire, Dartmouth College receives the endowment, and is to organize an Agricultural School in connection with the Chandler Scientific School; in Massachusetts there is a vigorous competition between the prominent towns of the commonwealth, for the location of the Agricultural College; Rhode Island bestows the lands upon Brown University, which is to have an Agricultural Department; Connecticut donates them to the Agricultural Department of Yale College, connected with the Sheffield Scientific School; New York divides hers between the Agricultural College at Ovid, New York, and the People's College, at Havana. Pennsylvania has handed over her share to her excellent Agricultural College in Central County, the most efficient institution of its class in the United States, and which, by this grant, will be placed in a condition of still greater efficiency. In most of the Western States, where Agricultural Colleges have been already chartered, the grant has been bestowed upon them, and will, in most instances, secure their speedy organization, or if already organized, aid in their rapid development.

Foreign agriculture offers but little of special interest at the present time. The crops of cereals in 1863, in Great Britain and on the continent, were generally good, and were for the most part successfully harvested. The price of wheat, in England, which, in September, 1860, had been \$1.62 per American bushel, in 1861, \$1.45, and, in 1862, \$1.40, was in September, 1863, \$1.16—a very marked reduction; and the potato crop was generally good in Great Britain, though almost a failure in Ireland. In France, the crop, though injured in some quarters by the drought, was on the whole a fair average. The practice of holding regional agricultural expositions in the different departments of France, annually, is coming rapidly into favor. For the most part these have been confined thus far to the exhibition

of horses, cattle and sheep, and agricultural implements, but in some, lately, fruits have been exhibited with advantage. A few particulars concerning the agricultural products of Sweden, a country which has furnished so large a body of farmers to the Northwestern States, may be of interest to the readers of the Cyclopædia. They were collected by the United States consul at Gottenburg.

The crop of 1863, which at one time promised to be unusually large, was damaged by rainy weather during harvest time, and thus reduced to an average amount, of which the figures in the table below may be taken as a fair statement.

About 1,500,000 Swedish acres, equal to 48,600,000 English acres, are devoted to growing grain, and 100,000 Swedish acres, or 3,200,000 English acres, to potatoes; yet the yield of potatoes is so large, that it stands in the ratio of 3 to 5. The potato can be raised in the short summer of these high latitudes, when no grain, save barley, can live, and thus becomes the "staff of life" to the Swedish peasants. Fine crops of potatoes, and occasionally of barley, are raised far within the arctic circle, and even above 70° north latitude, the highest cultivated land in the world.

The Alsike clover is the most productive clover in Sweden; cuts about five tons to the Swedish acre, can be made to yield two crops in the short Swedish summer, and has been introduced into Scotland to great advantage.

There is a kind of egg plant called "Gula Plummon," which is produced in the middle and southern districts of Sweden in considerable quantities. This plant is of a light straw color, firm, juicy, and of a peachy flavor. It is thought it would flourish in the northern counties of New England and New York.

This table is the average yearly product of Sweden, taking the figures for five years to 1861:

	Amount after deducting seed.	Seed.	Total.
Wheat, tunn*	509,148	66,829	576,077
Rye, tunn.....	3,763,766	563,891	4,327,657
Barley, tunn.....	2,668,419	474,722	3,143,141
Oats, tunn.....	4,677,204	979,124	5,656,329
Mixed Oats and Barley, tunn.	1,208,944	216,663	1,424,897
Peas and Beans, tunn.....	391,350		
Potatoes, tunn.....	7,985,607	1,271,143	9,258,752
Other edible roots, tunn.....	826,301		
Flax and Hemp, centner†.....	46,249		
Rape, tunn.....	14,537		

The following table shows the exports and imports of grain for seven years:

WHEAT.				RYE.		
Imports.		Exports.	Difference.	Imports.	Exports.	Difference.
1855.....	2,470	36,147	33,677	40,622	744,428	703,806
1856.....	99,844	30,663	69,176	497,886	294,431	203,455
1857.....	71,311	17,416	53,895	391,942	34,862	357,080
1858.....	37,765	39,769	2,004	53,079	139,192	36,113
1859.....	20,488	84,319	63,831	41,954	143,607	101,659

The table is made out in tunns—1 tunn = 4 bushels.

ALABAMA.—The details of the Census of 1860, additional to these published in previous volumes, have not yet been issued by the Government.

The changes which took place in the State of Alabama during 1863 present no new aspect. Immediately after the occupation of the peninsula, opposite Vicksburg, by General Grant's army, in January, measures were taken to cut off the communication between the inhabitants in the east and west sides of the Mississippi through Red River. From that stream the inhabitants on the east side of the Mississippi had access to vast supplies, particularly of salt, sugar, and molasses. A large portion of the Confederate army was supplied from the same source. This communication was destroyed by the gunboats of Admiral Porter, which were below the batteries at Vicksburg, and by vessels of Admiral Farragut's fleet at New Orleans. In April a scarcity of provisions prevailed in the southern part of the State, which created an advance in prices. This was attended with a depreciation of the currency, and food soon advanced almost beyond the reach of the poor. About the 15th of April a scene occurred in Mobile, which was thus described :

"A number of ladies, perhaps a dozen, composed of the wives and daughters of soldiers' families, who represented themselves and their families to have been deprived of anything to eat in the last few days, save a small portion of corn bread, were seen perambulating our streets until they came up to a provision store on Whitehall street. They all entered it, being preceded by a tall lady, on whose countenance rested care and determination. She asked the merchant the price of bacon. He replied, stating that it was \$1.10 per pound. She remonstrated with him as to the impossibility of females in their condition paying such prices for the necessities of life. He remaining inexorable in his demand, the tall lady proceeded to draw from her bosom a long navy repeater, and at the same time ordered the others in the

crowd to help themselves to what they liked, which they did accordingly, giving preference to the bacon, until they had taken about \$200 worth. They went out, and on being questioned by some gentlemen as to what they meant, they related their suffering condition.

"Seeing what was going on, and feeling a deep sympathy for these ladies, a number of gentlemen, of very moderate means, who themselves have families to support, set to work to raise a subscription in their behalf."

This was one of several instances of distress which occurred at Mobile. The famine existed chiefly in the families of absent soldiers.

The scarcity of provisions was such as to induce all the authorities to wisely prepare for the ensuing winter. The Confederate Congress urged the people to plant less cotton and more corn; and the Governors of the States repeated the request.

Governor Shorter issued an appeal to the planters of the State at this time, urging the importance of raising articles necessary to keep the people from starving. He said:—"Failing to accomplish our subjugation by the force of arms and the power of numbers, the enemy has called to his aid the terrible appliances of want and starvation, and is carrying out this savage and inhuman policy by the wholesale larceny of slaves, the seizure of provisions, and even the destruction of agricultural implements. Are you, the planters of Alabama, prepared to aid in this policy by pursuing a course which may tend to its accomplishment? Look around you this moment, when the crop upon which the poor must mainly depend is not yet planted, and behold the want and destitution which, notwithstanding the munificent provision made by public and private benevolence, are to be found at the hearthstones of many whose legitimate protectors have fallen in battle, or are now fighting in defence of your homes and property. Let us not deceive ourselves. The failure to raise the largest possible quantity of supplies in the present year may bring disaster

and ruin upon our cause. The soldier must be fed and his family provided for, and our home population, white and black, must be supported. The experience of the past and the necessities of the present give serious and solemn warning as to the future. Let not our armies, which have hitherto, by the blessing of God, proved invincible, be conquered or disbanded by the want of subsistence in their camps, or be demoralized by the presence of famine in their homes. These results can and will be prevented if the planting community realize their heavy responsibility, and discharge their full duty to the country. The Legislature of Georgia is called to reassemble to reconsider its late action upon this important subject; and the Confederate Congress, perceiving the danger, have given timely notice of its approach by an earnest appeal to the whole country. The indications of a continuance of the war are so unmistakable, and the necessity of providing the means indispensable to its prosecution so urgent, that I have thought it not improper to unite in the appeal to that class of our population through whose active energies and foresight alone these means can be supplied." An address was also made to the people by the Senators and Representatives of the State in Congress, urging them to plant corn and raise hogs and cattle. At this time bands of deserters from the Southern army and Union men were organized in the northern part of the State. In Wayne and the adjoining counties they were quite numerous.

After the losses at Gettysburg and the retreat of General Lee from Pennsylvania, extraordinary efforts were made to recruit the Southern armies. On the 20th of July, Governor Shorter issued a call for an extra session of the State Legislature to be convened Aug. 17th. The reason for this session was to provide for the better defence of the State.

In his message to the Legislature the Governor confined his remarks to the subject of military defence. He examined the question relative to the classes exempt under the State and Confederate enactments, and being without means of ascertaining the number of exemptions, he supposed there were several thousand. He recommended that all persons between the ages of sixteen and sixty, including those having substitutes, those of foreign birth domiciled within the State, and all who had evaded the full requirements of the Confederate Government, should be embraced in an amendment to the militia laws as liable to military duty; also that the officers of the State should be charged with the duty of arresting stragglers and deserters, and that the judicial officers should be held to a rigid enforcement of the penalties against their abettors. He concluded as follows:

Alabama has and will cheerfully respond to every demand upon her; so long as the unnatural foe perseveres in his unholy crusade. May the invaded people not give way to alarm and false security, but nerve themselves to an undying resistance to the despotism which has decreed the emancipation of our slaves, the

confiscation of our lands, and the subjugation of a free people. God in his providence will not permit such a calamity.

The Senate adopted the following resolution:

Resolved, That the people of Alabama and the State hereby pledge the entire resources of the State, to the last dollar and the last man, to a successful prosecution of the war now being waged by the North for the subjugation of the people of the Confederate States, and that we will never yield the contest until the achievement of the acknowledgment of our independence as a separate people.

A joint resolution relative to the employment of slaves was adopted as follows:

Resolved, That it is the duty of Congress to provide by law for the employment in the service of the Confederate States of America, in such situations and in such numbers as may be found absolutely necessary, of the able bodied slaves of the country, whether as pioneers, sappers and miners, cooks, nurses or teamsters.

On the 22d of August, Robert Jemison, jr., was elected to fill the unexpired term of William Yancey, deceased, in the Senate of the Confederate Congress. He was a member of the convention which passed the ordinance of Secession, and at that time a "coöperationist" (see ANNUAL CYCLOPEDIA, 1861. ALABAMA), but became "a firm and uncompromising supporter of the war." For many years he had been a member of the State Legislature from Tuscaloosa county.

At the election for State officers in August, 1863, Governor John G. Shorter and Thomas H. Watts were the candidates for the office of governor. The result in fifty-two counties was: Watts, 22,223 votes; Shorter, 6,342 votes. The former was elected by a large majority.

Governor Watts had been one of the electors named on the Bell and Everett ticket at the presidential election in 1860. Soon after his election it was stated that he was in favor of a reconstruction of the Union. A letter was addressed to him on this subject, to which he made the following reply:

CONFEDERATE STATES OF AMERICA, }
DEPARTMENT OF JUSTICE, RICHMOND, Sept. 12th. }
Hon. Ira Foster, Quartermaster-General of Georgia,
Atlanta, Georgia:

DEAR SIR: I have to-day received your letter of the 1st inst., forwarded to me from Montgomery, Alabama, and hasten to reply. You say that my name, since the Alabama election, has been freely used by many in connection with "*reconstruction*," meaning thereby that some people in Georgia suppose I am in favor of *re-union* with the Yankee Government of the North. I am surprised and mortified that any body in the South should so interpret the Alabama election. If those who claim my election as indicating any such feeling in Alabama had read my letter of the 21st March to Gen. Lawler, and my short address to the people of Alabama, dated 6th June last, they would never have entertained such false notions. It is due to the gallant people of my State to call attention to the resolutions of the recent called session of the Legislature, passed unanimously, pledging all the men and resources of the State to prosecute the war until the independence of the Confederate States is fully established. For myself, I will not forfeit my self-respect by arguing the question of "*reconstruction*." He who is now, deliberately or otherwise, in favor of "*reconstruction*" with

the States under Lincoln's dominion, is a traitor in his heart to the State of his residence and deserves a traitor's doom. If I had the power, I would build up a wall of fire between Yankeedom and the Confederate States, there to burn, for ages, as a monument of the folly, wickedness, and vandalism of the Puritanic race! No, sir! rather than reunite with such a people, I would see the Confederate States desolated with fire and sword. When the men of the South become such base cowards as to wish for such reunion, let us call on the women of the South to march to the battle field, and in the name of God and justice, bid them fight under the banner of Southern liberty! The call would not be made in vain. Let the patriotic sires, whose children have bared their breasts to Yankee bullets and welcomed glorious deaths in this struggle for self-government, rebuke the foul spirit which even whispers "reconstruction." Let the noble mothers, whose sons have made sacred with their blood so many fields consecrated to freedom, rebuke the fell heresy! Let our blood-stained banners, now unfurled "to the battle and the breeze," rebuke the cowardice and cupidity which suggest "reconstruction." The spirits of our heroic dead, the martyrs to our sacred cause, rebuke, a thousand times rebuke, "reconstruction"! We have little cause for despondency, none for despair! Let us now nerve ourselves afresh for the contest, and let us not forget that

"Freedom's battle, once begun,
Bequeathed from bleeding sire to son,
Though baffled oft, is ever won!"

If we are true to ourselves, true to the memories of the past, true to our homes and our firesides, and true to our God, we *can not*, we will not be conquered! In any and in every event, let us prefer death to a life of cowardly shame! Your obedient servant,

T. H. WATTS.

In October, Mobile was visited by the President of the Confederacy, Jefferson Davis. After a review of the local troops, he was called out by the people and made a brief speech, which was thus reported:

He congratulated the people upon the fact—which he assured them he felt to be the fact—that our cause is now in a better condition than it was a year ago. Having just come from the scene of the great battle of Chickamauga, it was impossible that he should not refer to that, and though it could not be expected that he should allude to contemplated movements, yet he was happy to say that the brave victors of that bloody field stood ready and anxious to strike the blow which should secure the complete fruits of their glorious victory. He could say more—that he believed they would strike the blow, and that Rosecrans' unwieldy legions would be destroyed, or driven for refuge to the Ohio. The same spirit animated our armies elsewhere, and all they needed was to be properly seconded by the people at home to send the hordes of Yankees back to their beloved Boston, or any other place from which their return might be more difficult.

The citizen soldiery, also, he believed, were emulous of the reputation of their brethren in camp. He had been much moved, as he rode along the lines, at seeing among them young boys, some very young, and men whose heads were silvered with the frosts of many winters.

He could remind all these, regulars and others, that they are not common soldiers. They present a spectacle which the world has never witnessed—the best population of the country poured into the army. Such men may be appealed to from other incentives than that of rigid military discipline. The time, the cause, all considerations, require efforts which may be demanded of an army of heroes, for such they are.

Besides these, there are some too old to bear arms, but they, too, can do something. Let them contribute their means to the support and relief of those who are

contributing their blood; and let those who are too poor for this contribute their influence. There is something that all can do. Self must be entirely forgotten; and let those who are deaf to any other appeal, remember that he who is hoarding up wealth, in such a time as this, is hoarding up infamy, the mark of which he and his posterity must bear who shall have grown rich by this war.

The number of troops contributed to the Confederacy by the State is at present unknown. The military operations of the year touched the northern part of the State; but no important actions took place.

The foreign commerce of the State was confined to the cargoes of two or three steamers which reached Mobile through the blockade, and the export of some cotton which escaped in small vessels.

AMERICA. The political subdivisions of America in 1863 were as follows:

I. AMERICAN STATES UNDER AMERICAN GOVERNMENTS.

	Census of	Population.
The United States of America.....	1860	31,445,080
Mexico.....	1862	*8,295,553
Guatemala.....		*850,000

British Possessions.....	4,422,261	Swedish.....	8,500
French.....	300,162	Spanish.....	2,032,062
Dutch.....	196,016		

The most important events in the history of the American continent, during the year 1863, are the continuance of the civil war in the United States, and the progress of the French invasion in Mexico. Both are fully treated elsewhere in these pages. At the conclusion of the year these wars were unended. In Central America the president of Guatemala, Gen. Carrera, declared on January 23d war against President Barrios of San Salvador. All the Central American States, with the exception of Costa Rica, were drawn into this war, which terminated with the victory of Gen. Carrera, and the expulsion of Gen. Barrios from the country. (*See CENTRAL AMERICA.*) In the latter part of the year a war broke out between the United States of Colombia and Ecuador. (*See COLOMBIA, UNITED STATES OF.*) In Venezuela, the Federalists, who had been at war with the Government, concluded a treaty of peace with the latter, at Coche, near Caraccas, upon the following conditions: an armistice;

*Estimated.

a convocation of four representatives of each province (two of each party), in the hands of whom the reins of government were to be placed, and who should elect a new president. The acting president, General Paez, was to remain, until the election, at the head of the civil administration, and General Falcon, the chief of the Federalists, was appointed commander-in-chief of all the troops. In consequence of this convention General Paez (chief of the Unitarian party) resigned the presidency. The representatives of the nation thus elected assembled on June 17th at Vittoria, and appointed General Juan E. Falcon (chief of the Federalist party) provisional president, and General Antonio Guzman Blanco provisional vice-president. General Leon de Febres Cordero, at the head of the garrison of Porto Cabello, protested against the transfer of the supreme power to the assembly of Vittoria, and organized another government at Porto Cabello. General Falcon, the provisional president, entered Caraccas on July 24th, and convoked a constituent assembly for December 10th, in order to establish a legal government. In Uruguay a civil war broke out in consequence of an invasion of the country by the former president, Flores, who was supposed to be encouraged by the Government of the Argentine Republic. The war had not ended at the close of the year. Between Chili and Bolivia a war threatened to break out in consequence of long pending difficulties concerning the regulation of the frontier. It was, however, averted by negotiations, and a peaceable solution of the dispute was expected. In December, 1863, a revolution broke out in the United States of Colombia against President Mosquera. In the State of Antioquia about four thousand men of the revolutionary party were under arms. The Government of the State raised a large militia force to suppress the revolution.

The encroachments of European powers upon the rights of American States, which were encouraged by the existence of civil war in the United States, became more conspicuous and numerous during the year 1863. France continued vigorously the war for the overthrow of the Mexican republic, and under the protection of French bayonets a small number of Mexican notables abolished the republican form of government, declared Mexico to be an empire, and elected Archduke Maximilian of Austria, the first emperor. (*See MEXICO.*) The natives of Santo Domingo, which republic was a few years ago treacherously sold by its last president, Santana, to Spain, rose again in insurrection for the recovery of their independence, and by the end of the year the Spaniards, notwithstanding their overwhelming numbers, had not succeeded in suppressing the insurrection. (*See SPAIN.*) The insolent conduct of England toward Brazil led to a diplomatic rupture between these two powers. (*See BRAZIL.*)

No one of the European Powers is more eager to extend her influence upon this continent

than France. Louis Napoleon, in 1862, in his celebrated letter to Marshal Forey, avowed his intention to gain a controlling influence over the Latin race. French agents are known to be active in a number of the South American republics to create and encourage a monarchical party. In some, these attempts have met with considerable success. In the republic of Ecuador, in particular, a number of the leading statesmen, including the president of the republic, were reported to be favorable to the establishment of a French protectorate. Some of the papers of this republic openly denounced the republican form of government, and recommended a return to monarchy, as the only salvation from general anarchy. General Pezet, who by the unexpected death of General San Roman, April 3d, was called to the presidency of Peru, the most populous of the South American republics, manifested likewise some sympathy with monarchical tendencies, by appointing avowed partisans of a monarchical party to important diplomatic positions.

These anti-republican schemes of European Powers awakened, in many of the States of South America a desire to form an American Continental Alliance between all the republics on the continent. Formal propositions to this effect were made, in 1862, by several of them to the Government of the United States, but they were declined by the latter, on the ground of their involving a deviation from its traditional policy of neutrality. Another proposition to the same effect was, after the fall of the city of Mexico, made to the republics of Central and South America, by President Juarez, of Mexico, but it likewise led to no result. The people of Santo Domingo addressed, in December, 1863, an appeal to the governments and people of Spanish America, to aid them in their unequal struggle against Spain. A great interest was particularly manifested in the idea of an American Continental Alliance in Chili and New Granada.

The year 1863 is also marked in the history of the American Continent by the great changes which took place with regard to slavery. By a proclamation of the President of the United States, of January 1st, 1863, slavery was declared abolished in the States of Virginia, North and South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, and Arkansas, with the exception of a few districts of Louisiana and Virginia, which were at the time of the issuing of the proclamation within the Federal lines. In an amnesty proclamation, issued on December 8th, the President proclaimed that in each of the above named States one tenth of the number of voters at the presidential election of 1860, who would take the oath to abide by and support the acts of Congress passed during the existing war, with reference to slaves and the presidential proclamations on the subject, should be authorized to reestablish a State government. The new State of West

Virginia, in April, adopted by 28,321 votes against 572 an amendment to its State constitution, abolishing slavery. The Legislature of the State of Missouri, on July 5th, passed an ordinance of prospective emancipation. The State of Maryland, at the State election in November, elected to the General Assembly forty-seven members pledged to emancipation against twenty-seven not pledged. On July 1st, the abolition of slavery was proclaimed in the Dutch possessions, in accordance with a law adopted by the Chambers of Holland in 1862. The number of slaves freed by this law amounted to about 11,300 in the Dutch West India islands, and 37,001 in Surinam. In December, 1863, a treaty was concluded between the United States and Holland Governments, by which it was arranged that the colonial authorities of Surinam should receive such of the emancipated American slaves as may be willing to work on their plantations.

ARCHÆOLOGY. (See ETHNOLOGY.)

ANGLICAN CHURCHES.—This is the collective name given to the Protestant Episcopal Church of the United States, the Established Church of England, the Episcopal Church of Scotland, and the branches of these bodies. The Churchman's Calendar, for 1864 (New York, 1864), gives the following synoptical view of these churches:

England.....	Archbishops, 2	Bishops, 26
Ireland.....	" 2	" 10
Scotland.....	"	" 8
America—United States.....	"	" 40
" British America.....	"	" 10
" West Indies.....	"	" 6
Asia.....	"	" 10
Africa.....	"	" 7
Oceanica.....	"	" 16
Bishops, demissionary.....	"	" 3
Total.....	"	136

Most of the bishops in Asia, Africa, and Oceanica have their sees in British territory, but some are missionary bishops for countries not under British rule. Thus the Protestant Episcopal Church of the United States sustains missionary bishops for Liberia and China, and the Church of England the Bishop of St. James at Jerusalem, the Bishops of Zambezi and Orange River in Africa, and the Bishop of Milanesia in Oceanica, also the Bishop of Honolulu, in the Sandwich Islands.

Only the Churches of England and Ireland have as yet archbishops; the British Colonies have, instead, metropolitans, who enjoy substantially the same prerogatives as the archbishops. Thus British America has a metropolitan at Montreal, India at Calcutta, Africa at Capetown, Australia at Sydney. The province of New Zealand has a metropolitan in the Bishop of New Zealand. There is a growing tendency in the Church, especially in the United States, to introduce the provincial or metropolitan system (the union of several Episcopal sees under a metropolitan) where it does not yet exist, or to promote its development where it already has a legal existence.

The Anglican Churches have had thus far an

independent national organization, only, 1st. In Great Britain and its dependencies; 2d. In the United States; 3d, in the Sandwich Islands. To these may be added, 4th, the Church of Liberia, which has made all the necessary preparations for an independent organization. This church has been hitherto under a missionary bishop, sent out by the Protestant Episcopal Church of the United States, and therefore in organic connection with the American Church. By the canons of the American Church, six presbyters canonically resident within certain prescribed limits can, with the laity, constitute a new diocese, and can frame canons, etc. The missionary bishop ceases, *ipso facto*, to have jurisdiction within the new diocese so formed. The convention of the new diocese can either elect a bishop, or ask, *pro tempore*, the missionary bishop to continue to officiate as their bishop. But they can, whenever they like, choose a bishop, and when one is so chosen, the missionary bishop ceases to have any connection with them. The convention *may* choose the missionary bishop as their diocesan, though he must still continue to act as missionary bishop over the country or district *not* included within the new diocese. The Liberians have now constituted themselves into a diocese. In April, 1862, Bishop Payne, the American missionary bishop in Liberia, called the clergy to meet at Cape Palmas for the purpose of organizing the church. His wish, however, to effect such an organization as would place the Liberian Church under the general convention of the United States of America, was deemed to be impracticable, and the result of the meeting was simply the formation of a General Missionary Convocation. An entirely independent church organization was effected in February, 1863, by a unanimous vote of the Liberian clergy and lay delegates assembled in general council at Monrovia. By this act the American missionary bishop ceased to have any jurisdiction within the newly formed diocese; but continued to be "Missionary Bishop to Cape Palmas (where he resides) and parts adjacent." The Liberian convention requested him "to continue his episcopal supervision of the church in Liberia, and to perform episcopal offices where they may be needed throughout the country." Bishop Payne consented to this request. The most important points of the new church constitution of Liberia are as follows: The constitution divides Liberia, *prospectively*, into four sees, as the republic has four counties. When four presbyters reside in a county, they can, *i. e.* a majority, organize a diocesan synod. But six resident presbyters in a diocese are requisite to elect a bishop. The clergy in one or more counties can unite and form a diocese. The committee of convocation adopted the American prayer book as a whole. At the annual meeting of the Board of Missions of the American Church, a special report on the new church organization in Liberia was submitted by Bishop Burgess. In this

report, which was unanimously adopted, the desire was expressed that the attempt to form an independent communion in Liberia should be postponed until a fuller opportunity was obtained for consultation. The report regretted that the steps for the formation of an independent church had been so hastily taken, and expressed the opinion that clergymen, forming such independent church, must necessarily cease to become missionaries of the Foreign Committee.

The foundation of the Protestant Episcopal Church in Hayti was laid in 1862 by Rev. J. S. Holly, a colored minister of the church in the United States. Mr. Holly established in 1863 a church at the capital, Port au Prince. In October, 1863, Bishop Lee, of Delaware, sailed for Hayti to survey the field with a view to the permanent establishment of a mission in con-

nection with the Protestant Episcopal Church of the United States.

The organization of an independent "Protestant Episcopal Church of the Confederate States" led to some important complications. The question arose, whether the parishes in the new State of West Virginia, being in connection with the Church of the United States, remained under the jurisdiction of the Bishop of Virginia at Richmond, who claimed to be no longer a bishop of the United States but of the Church of the Confederate States. The opinions of the church papers greatly differed on this subject, and some of them protested against the exercise by Bishop McIlvaine, of Ohio, of episcopal functions in West Virginia.

The Church Almanac, for 1864, contains the following table of church statistics of the Episcopal Church of the United States:

DIOCESES AND MISSIONS.	Clergy.	Parishes.	COMMUNICANTS.		SUNDAY SCHOOL.		Missionary and Charitable Contributions.
			Added.	Present Number.	Teachers.	Scholars.

The 28th annual meeting of the Board of Missions was held at Providence, Rhode Island, on October 7th, 8th, and 9th. The receipts of the Domestic Committee were reported to have been \$37,458.05, exceeding those of last year by \$2,134.14. The receipts of the Jersey Committee were \$54,260.07, an increase over the previous year of \$3,687.89. It was resolved to establish a mission at Santa Fé, New Mexico, on the associate or collegiate plan, with a view to the organization of schools of both sexes, and to the gradual development of itinerant work throughout that territory.

The fourth annual meeting of the American Church Missionary Society took place at Philadelphia, October 15th. This society employed 38 missionaries in 1863, 10 more than last year, and its receipts during the year amounted to \$19,189.41.

The 37th annual report of the Protestant Episcopal Church Union and Church Book Society, records an improvement in the financial condition of the society within the past year, amounting to \$10,000, exclusive of the amount received for the building fund, \$2,922. The Society for the Increase of the Ministry, which

was organized about six years ago, but has been active only four years, reported an increase in funds of \$9,800, the largest sum ever received by the society during a single year. The Evangelical Knowledge Society held its sixteenth annual meeting at Philadelphia, on October 14th. Its receipts during the past year were \$28,171; the property of the society amounts to \$52,860. The whole number of tracts issued by the society is now 541; the number of prayer books issued in four years, 105,982.

The Church of England continued during the year 1863 to be agitated by the excitement which the books of Bishop Colenso had produced. Although there was at first a general doubt how it ought to deal with him, there was also a general expression of opinion among the clergy that something should be done to vindicate the orthodoxy of the church. Several of the bishops denounced, in severe terms, as heterodox the views of Bishop Colenso, and declared that they would not allow him to officiate in their dioceses. On February 6th, a meeting of the bishops belonging to the Convocation of Canterbury took place, at which there was a unanimous condemnation of the book on the Pentateuch. On February 10th, the Convocation of Canterbury met and adopted a resolution, offered by Archdeacon Denison, to pray the Upper House to direct the appointment of a committee to examine the book. The Upper House complied with this request, although the resolution of the Lower House was opposed by the Bishop of London and St. David's. After a long deliberation as to the best course they could adopt, the bishops of England and Ireland agreed to address to Bishop Colenso a joint letter, in which they asked him to resign his see. Only three bishops, those of St. David's, Killaloe, and Limerick, refused to sign or endorse this letter. Bishop Colenso, in reply, assured his brother bishops that he was as fully convinced of the truth of his theological opinions as ever, and therefore refused to resign. The Lower House of the Convocation of York likewise passed strong resolutions of condemnation of the books of Colenso. In May, Archdeacon Denison, in the name of the committee charged with the examination of the books, made a report to the Convocation. The report was adopted, and a resolution was passed, requesting the Upper House to take such steps thereupon as they might deem expedient. The bishops agreed upon a judgment, and communicated it to the Lower House, that "the book of the Bishop of Natal involves errors of the gravest and most dangerous character, subversive of faith in the Bible as the Word of God." The Lower House unanimously accepted and concurred in the judgment. After this the excitement produced by the books began to subside. Toward the close of the year, the Bishop of Capetown, who is metropolitan of the African bishoprics of the Church of England, summoned Bishop Colenso before the tribunal of

the synod of African bishops. The synod was opened on October 17th, but Dr. Colenso refused to attend, and entered a protest against the jurisdiction of the tribunal.

Another great controversy of the church, relating to the work called "Essays and Reviews" (see *CYCLOPEDIA* for 1862, p. 719), was brought before the Queen's privy council, two of the essayists, Dr. Williams and Mr. Wilson, having appealed from the decision of the Court of Arches, which, in 1862, had suspended them for one year from their benefices. The arguments before the committee of the Privy Council were concluded on June 26th, but by the end of the year the decision of the council, which will be final, had not been announced. Against a third one of the essayists, Prof. Jowett, of Oxford, a suit was instituted before a university court, but it was soon abandoned.

An agitation of a very different kind sprung up in the Church of England, in consequence of an attempt to establish a kind of monastic order under the name of the Benedictine Brotherhood. So called sisterhoods, resembling in some points the monastic orders of the Roman Church, had been for many years in full operation in the church, and even received the warm approbation of the Convocation of Canterbury. The first attempt to reestablish a monastic community of men was made by Rev. Mr. Lyne, or, as he now calls himself, with his monastic name, "Brother Ignatius." He was born November 23d, 1837, in London, and ordained on December 23d, 1860, on which occasion he took solemn mental vows to lead the life of a monk. He formed a society of young men and boys living in the world, but bound by certain rules. It was called the "Society of the Love of Jesus," and numbered nearly forty. Miss Sellon, the superior of the English sisterhoods, perceiving the young deacon's aim, gave him a house in which to commence a resident brotherhood. After a severe and almost fatal sickness, he spent eight months upon the European continent. While abroad he sought every opportunity of ascertaining the working of the monastic system, and, to use his own words, he "found it a most complete and miraculous success." On his return to England, in July, 1862, he labored for some time in London; from thence he went to Claydon, because the rector of Claydon and some of the inhabitants of Ipswich begged him to locate his infant community in their neighborhood. The enterprise met with great opposition. The Bishop of Norwich, to whose diocese Claydon belongs, commenced proceedings against the rector of Claydon, for having allowed Brother Ignatius, contrary to the bishop's prohibition, to officiate in Claydon church. This case was to be tried before the Court of Arches. The Bishop of Exeter also prohibited the clergy of his diocese from permitting Brother Ignatius to officiate in any of their churches. Brother Ignatius, in a sermon, preached on December 20th, 1863, in London, stated that his community of "Benedictine

Brothers" now numbered twelve, and that they intended to build a house, consisting of a retreat for parish clergy, who may desire rest, the brothers undertaking to do their duty while they were recruiting their strength; a home for decayed old men, who have labored in the service of the church; and a college for instructing youth on the principles of the Church of England. They required from £30,000 to £40,000, of which they had received £10,000.

The movement for opening communication with the Russian Church continued both in the Protestant Episcopal Church of this country, and in the Episcopal churches of England and Scotland. (*See ANNUAL CYCLOPÆDIA* for 1862, p. 718.) The joint committee, appointed for this purpose by the General Convention of the Church of the United States, consisting of Bishops De Lancey, Williams, and Whitehouse, of the Rev. Drs. Mahan and Thrall, the Rev. J. F. Young, Mr. Samuel B. Ruggles, and Mr. S. Elliott, did not deem themselves authorized to make any proposition for joint action to the Convocations of the English Church, as they were only instructed by the General Convention to collect information, and consider the expediency of communication with the Russian Church; but, at a meeting held on April 16th, 1863, at New York, they unanimously passed a resolution that "the Secretary of the committee be requested to correspond with the Rev. George Williams, of King's College, Cambridge (the chief promoter of the movement in England), and to express to him and through him, at his discretion, to the Convocation of Canterbury, the gratification of this committee at the interest they have expressed in the object we have in view; with the assurance to Mr. Williams that, while the committee are not in a position formally to approach Convocation on the subject, they will be glad to give a full and respectful consideration to any action or communication on the part of the Convocation." In England, the Bishop of Oxford, on July 1st, 1863, presented to the Upper House of the Convocation of Canterbury, a petition resolved upon by the Lower House of the Convocation, in February, to the effect that the House of Bishops may use their endeavors to bring about such intercommunion. The Bishop of Oxford, after presenting the petition, moved that the President of the Convocation (the Archbishop of Canterbury) be requested to direct the Lower House to appoint a committee to communicate with the committee appointed by the General Convention of the Bishops and Clergy, of the United States of America as to intercommunion with the Russo-Greek Church, and to communicate the result to the Convocation at a future session. The motion was unanimously adopted, and pursuant to it, the Lower House appointed a committee, consisting of the Archdeacon of Berks (Bickersteth), the Archdeacon of Taunton (Denison), Dr. Leighton, Lord A. Compton, Sir G. Prevost,

Chancellor Massingberd, and the Rev. Messrs. Tendall, Seymour, and Randolph.

In Scotland, the synod of Moray and Ross passed resolutions in favor of intercommunion with the Russo-Greek Church, and also with the Church of Sweden. Similar resolutions had been passed by the synod of Aberdeen.

The movement met with a warm response on the part of the oriental churches. (*See GREEK CHURCH.*)

In the Established Church of Scotland (Presbyterian) an interesting movement sprung up in favor of a union with the Scottish Episcopal Church. (*See PRESBYTERIANS.*)

ANTHON, JOHN, LL.D., an American jurist, died in the city of New York, March 5th, 1863, in the 80th year of his age.

Mr. Anthon was the second son of George Christian Anthon, M.D., an eminent physician of the city of New York, and was born at Detroit in the year 1784. He received his diploma as Bachelor of Arts from Columbia College in the year 1801, graduating at the head of his class; and the honorary degree of LL.D. was conferred upon him in 1861 by the same institution. Immediately after graduating, Mr. Anthon commenced the study of the law, in the office of Mr. Hopkins, an eminent legal practitioner of that day, and, upon attaining his majority, was admitted to practice in the Supreme Court of this State.

During the war of 1812, Mr. Anthon commanded a company of militia, stationed near Fort Hamilton, at the Narrows, for the defence of the city of New York; and for a short time acted as regimental paymaster; he was also frequently employed, during the same period, as judge-advocate. With these exceptions he devoted himself with the utmost assiduity to the practice of his profession, and it has been said of him by one of his contemporaries that "he tried more causes than any man that ever lived." He declined several flattering offers of judicial position, and was never tempted to turn aside from the useful paths of professional life in search of political honors.

The Supreme Court of the City of New York owes its existence to the efforts of Mr. Anthon, who, at an early day, perceived the necessity for the establishment of a great mercantile tribunal, and successfully urged upon the Legislature the wants of the city of New York, in this respect. He was also one of the founders of the New York Law Institute, and held the office of president of that corporation at the time of his death. In his legal writings, and in his reported arguments, Mr. Anthon displayed great power of analysis, and was remarkable for the facility with which he grasped the true point involved in obscure and difficult questions, and the clearness and perspicuity with which he set forth his own conclusions.

Mr. Anthon was a regular attendant and communicant of the Protestant Episcopal Church, and a notable instance of the reception of the

truths of Christianity by a mind trained to the examination of evidence and the detection of error. His principal published works are "Analysis of Blackstone's Commentaries," "Nisi Prius Reports," "Anthon's Law Student," and several minor works on the practice of law.

ANTHROPOLOGY. (*See* ETHNOLOGY.)

ARKADELPHIA, the capital of Clark co., Arkansas, is situated on the right bank of the Washita river, seventy-five miles south-west of Little Rock. Selected on account of its remote position in the interior and south of the Arkansas river, it was made the principal depot of the enemy in the States of Arkansas, Missouri, and Louisiana. Military workshops were also established there; but on the approach of Gen. Steele they were removed to Marshall, Texas.

ARKANSAS. The military operations and their consequences comprise all that is really important in the history of this sparsely settled State, during 1863. The battles in the north-western part of the State, at the close of the previous year, resulted in causing the enemy to fall back upon the Arkansas river. Their forces were so reduced that only desultory operations took place, until the attack upon Helena, on the 4th of July, when the Confederate General Holmes, with about fifteen thousand men, was defeated by Gen. Prentiss. Vicksburg having now surrendered, Gen. Steele was detached from Gen. Grant's army and ordered to Helena. On the 31st of July, Gen. Steele reported to Gen. Hurlbut, commanding the sixteenth army corps, and was placed in command of all the troops at Helena, and the cavalry division under Brig. Gen. Davidson, then operating in Arkansas, making an aggregate of about twelve thousand men, for the purpose of making an expedition, the object of which was the possession of the State. Notwithstanding the reduction of his force by sickness and leaves of absence, and resignations by which only Gen. Davidson was left as a general officer, he completed his organization and pushed his entire force on to Clarendon, about forty miles from Helena, and began crossing the White river, on the 17th of August. Here Gen. Steele found that the number who were sick had increased to a thousand, and he ordered them to be sent to Duvall's Bluff, a very healthy location on the White river. On the 23d the rest of his command followed. From this point a successful advance was made, and after skirmishing with Marmaduke's cavalry all along the way, Gen. Steele's whole available force, on the 2d of September, was concentrated at Brownsville. After a two days' reconnoissance the army again reached the Arkansas river on the 7th. The 8th and 9th were occupied in a reconnoissance, and the 10th saw the two columns of the Union army, numbering not more than seven thousand men, marching nearly abreast on either side of the Arkansas toward the capital. The panic and

confusion which this sudden approach caused in Little Rock are indescribable. The streets were filled with women and children and knots of citizens, listening to the sound of cannon constantly growing nearer and nearer, and the shells from Gen. Steele's batteries, which had now been planted almost opposite the city, shrieking and howling over their heads and breaking in the woods beyond them. Officers of the enemy, thinking themselves secure, were eating their suppers in the houses. The rapid rush of flying horsemen, the clouds of dust, the glad hurrahs, and gleaming sabres of others dashing through the dusty streets in hot pursuit, were the first intimations of danger. Women and children ran in panic to their homes, the crowd of citizens quickly dispersed, and Confederate officers mounting their horses were captured while endeavoring to escape. A little later, windows were thrown up and handkerchiefs waved, and curious throngs gathered in the door yards, closely scrutinizing each squadron as it passed.

A squadron of cavalry dashed up to the United States Arsenal as soon as the forces entered the city, and arrived just in time to prevent its being blown up by the enemy. There was over a ton of powder in the magazine, and two or three thousand rounds of fixed ammunition in the various buildings. The public records of the city had been removed to Washington, and the machinery in the machine shops to Arkadelphia.

The mayor of the city at once sent the following communication to Gen. Davidson:

MAYOR'S OFFICE, LITTLE ROCK, Sept. 10th, 1863.

To the Officer Commanding Federal Army:

The army of Gen. Price has retreated and abandoned the defence of this city. We are now powerless and ask your mercy. The city is now occupied alone by women and children and non-combatants, with perhaps a few stragglers from the Confederate forces. May I ask of you protection for persons and property? I have been ill for some days, and am unable to visit you in person.

Very respectfully, C. P. BERTRAND, Mayor.

Gen. Davidson caused guards to be placed upon every street corner of the city, and, to the credit of his division, it is said that, although they beheld their comrades shot from their saddles from houses in the suburbs, and entered the city amid the gathering shades of night, which would have concealed all manner of crimes, not a single act of violence or injustice was done to the citizens of the place, or any article of private property disturbed.

Gen. Steele and staff crossed the Arkansas in a skiff, as the bridges were not passable, and entered Little Rock soon after Gen. Davidson. He immediately appointed Gen. Davidson military commander of the capital and vicinity. Upon assuming this command, he adopted several regulations, among which was one allowing the municipal authorities of the city to temporarily continue the exercise of their functions. Another invited citizens of the surrounding country to bring in their produce

for sale to the inhabitants and the troops. Another prohibited all officers and soldiers, other than those on provost guard duty, or belonging to the staffs or escorts of generals, from being in the city without a pass; officers and soldiers were expected to remain constantly with their commands unless absent on duty. Another regulation provided that no house should be occupied by any officer or soldier without the order of the general commanding the city.

Seven steamboats were successfully destroyed by the enemy. Four, one of which was a ferry-boat, were saved. One of the largest boats on the western waters was drawn up ashore, and was receiving a plating of railroad iron. It was also destroyed.

The capture of Little Rock was a fatal blow to the Confederate authority in the State. North of the Arkansas river, and west of the Cairo and Fulton railway of Missouri, the country had been desolated by the war, and subjugated by the Federal army so thoroughly, that it had long been abandoned by the forces of the enemy. The victories of Gen. Blunt in the Indian Territory, had more decisively caused the Arkansas river to become their defensive line. But with Little Rock as a base, the rebel Gen. Holmes had carried on a troublesome war by means of expeditions sent northeast to Jacksonport, east to Helena, southeast to Napoleon, west to the Indian Territory, and south into Louisiana. At the time Gen. Steele commenced his march toward Little Rock, Gen. Blunt marched south of the Arkansas river, through the Indian Territory, toward the Red river, and Gen. Stevenson advanced from Vicksburg along the line of the Shreveport railroad to Monroe, and thence up the Washita toward El Dorado, in Southern Arkansas. These combined operations alarmed Gen. Holmes, especially when Gen. Blunt captured Fort Smith, in Arkansas, Gen. Steele drove the army of Gen. Price across the Bayou Metoe, and Gen. Stevenson took possession of the southern border of the State. He, therefore, abandoned his position, and retreated southwest toward Texas.

In the western part of the State, Gen. Blunt issued an address to the people, in which he assured them that his occupation of the country would be permanent, that the whole of the Indian Territory and Western Arkansas was under the control of the United States forces, and that the rebel troops had been driven beyond the Red river, and that hundreds of refugees had arrived to enlist in his army. He closed thus:

Many applications have been made by citizens for safeguard. None will be issued. The best safeguard you can have is the American flag unfurled over your premises; and if you deport yourselves as good loyal citizens, your conduct must be your safeguard. If it be your desire to disenthral yourselves from the tyranny and oppression to which you have been subjected, organize a civil government under the authority of the United States. Every facility will be afforded you to accomplish that purpose. I leave the matter with you, trusting that wise counsels may prevail.

The inhabitants of the northern part of Arkansas were always warm friends to the Federal Union, and thus continued amid all the desolation. The great opposition made to the ordinance of secession (*see ANNUAL CYCLOPEDIA*, 1861, Arkansas), showed a majority of the people, under a fair test, as firmly opposed to it. Under the existing state of affairs, therefore, large numbers of men began to desert from the enemy, and movements commenced among the people in favor of the Union. These movements were begun by those sincerely attached to the Union, and were supported by others, who thought that the Confederate cause was lost. As usual, the fears of large numbers restrained their action. At Little Rock, such persons were afraid to risk the possibility of the return of the rebel forces, apprehending in such an event, injury to person and property in case they had been active in the cause of the Union. They pointed to the experience of Union men in the northern part of the State and in other localities. The cause, however, moved forward, and constantly gained vigor. A newspaper was established at Little Rock. Union meetings were held, and resolutions, pledging unconditional support to the Union, were adopted. Regiments of citizens were organized for the army, both white and colored. Citizens of distinction came forward to advocate the Union cause; among others, Brig.-Gen. E. W. Gantt, of the Confederate army, once held as a prisoner of war. He thus described the feeling of the people near the close of the year:

The people of Arkansas are ready to return to their allegiance to the Government, and to renew their devotion, which shall know hereafter neither change nor decay. The loyalty to Jeff. Davis in Arkansas does not extend practically beyond the shadow of his army, while the hatred of him is as widespread as it is intense. The Union sentiment is manifesting itself on all sides and by every indication—in Union meetings—in desertions from the Confederate army—in taking the oath of allegiance unsolicited—in organizing for home defence, and enlisting in the Federal army. Old flags that have been hid in the crevices of rocks, and been worshipped by our mountain people as holy relics, are flung to the breeze, and followed to the Union army with an enthusiasm that beggars all description. The little county of Perry, that votes only about six hundred, and which has been turned wrong side out in search of conscripts by Hindman and his fellow-murderers and oppressors, with their retinue of salaried gentlemen and negro boys, sent down a company of ninety-four men. Where they came from, and how they kept their old flag during these three years of terror, persecution and plunder, I can't tell. But they were the proudest looking set of men I ever saw, and full of fight.

In December, there were eight regiments of Arkansas citizens that had been partly or wholly formed for service in the Federal army, besides several thousand who had joined companies of other regiments. Under the amnesty proclamation of President Lincoln, issued December 8th (*see PUBLIC DOCUMENTS*), a pardon was issued to Gen. Gantt, and, at the beginning of 1864, preparations were made to reorganize the State Government. For this the President issued the following proclamation:

EXECUTIVE MANSION, WASHINGTON, Jan. 20th, 1864.

Maj.-Gen. Steele :

Sundry citizens of the State of Arkansas petitioned me that an election may be held in that State, in which to elect a Governor; that it be assumed at that election, and thenceforward, that the Constitution and laws of the State, as before the rebellion, are in full force, except that the Constitution is so modified as to declare that there shall be neither slavery nor involuntary servitude, except in the punishment of crimes, whereof the party shall have been duly convicted; that the General Assembly may make such provisions for their freed people as shall recognize and declare their permanent freedom, and provide for their education, and which may yet be construed as a temporary arrangement, suitable to their present condition as a laboring, landless, and homeless class; that said election shall be held on the 28th of March, 1864, at all the usual places of the said State, for all such voters as may attend for that purpose; that the voters attending at each place at eight o'clock in the morning of said day may choose Judges and Clerks of Election for that purpose; that all persons qualified by said Constitution and laws, and taking the oath prescribed in the President's Proclamation of December 8th, 1863, either before or at the election, and none others may be voters; that each set of judges and clerks may make returns directly to you, on or before the — day of — next; that in all other respects, said election may be conducted according to said modified Constitution and laws; that on the receipt of said returns, when 5,406 votes shall have been cast, you can receive said votes, and ascertain all who shall thereby appear to have been elected; that on the — day of — next, all persons so appearing to have been elected, who shall appear before you at Little Rock, and take the oath, to be by you severally administered, to support the Constitution of the United States and modified Constitution of the State of Arkansas, shall be declared by you qualified and empowered to immediately enter upon the duties of the offices to which they shall have been respectively elected.

You will please order an election to take place on the 28th of March, 1864, and returns to be made in fifteen days thereafter.

A. LINCOLN.

The subsequent proceedings will form a part of the record of 1864.

ARKANSAS POST is the capital of the county of Arkansas. It is situated on the left bank of the Arkansas river, about fifty miles from its mouth. It was settled by the French, in 1685. The surface of the country is generally level, and about one third of it is occupied by Grand Prairie, the largest in the State. The soil is adapted to the production of corn and cotton. Arkansas Post was captured by General McClernand's command, aided by a naval force, in January, 1863.

ARKANSAS RIVER. This river, next to the Missouri, is the largest tributary of the Mississippi. It rises in the Rocky Mountains, near the boundary between Utah and the Indian Territory, and pursues an easterly course for several hundred miles. About the 98th degree of W. longitude, it flows south-easterly to Fort Smith, on the western boundary of the State of Arkansas. Traversing that State, and dividing it into two nearly equal portions, it empties into the Mississippi, in latitude 33° 54' N.; longitude 91° 10' W. Its length exceeds two thousand miles; and it is navigable a distance of eight hundred miles during nine months of the year. Its width for 600 miles from its mouth is about half a mile.

The soil on its banks, in Arkansas, is generally very productive.

ARMY, CONFEDERATE.—The Acts of the Confederate Congress, passed in 1862, authorized the President to call into the military service all white residents of the Confederate States between eighteen and forty-five, except exempts, or such part of them as in his judgment might not be necessary for the public defence. Under this authority all those between the ages of eighteen and thirty-five, forming the first class, were called into the field in 1862. The enrolment of the second class, between thirty-five and forty-five, was also completed, and a portion of the troops called out; and at the close of 1862 the Confederate armies were larger than at any previous or subsequent period. This force was subsequently reduced by desertions during the winter, and by the withdrawal from service of many of the Maryland and Kentucky volunteers, whose terms had expired, and who were regarded as exempts. This force was considered to be sufficient to resist the advance of the Federal troops, until the march of General Grant to the rear of Vicksburg demonstrated its weakness. At this time the relative physical abilities of the two antagonists were distinctly shown, for while the North reënforced General Grant with ease to the extent he deemed necessary, the South were unable to reënforce General Johnston sufficiently to enable him to threaten Gen. Grant. The resources of the States west of the Mississippi were cut off from the Confederacy, and besides the forces of Generals Lee, Beauregard, and Bragg, and the detachments at important points, sufficient troops were not to be had to save Vicksburg. The defeat of General Lee at Gettysburg, and the falling back of General Bragg from Middle Tennessee, required the most active efforts to recruit the Confederate armies in order to maintain their positions. The first official act of the Government to obtain more soldiers consisted in the following proclamation of Mr. Davis:

Whereas, it is provided by an act of Congress, entitled "An act to provide for the public defence," approved on the 16th day of April, 1862, and by another act of Congress, approved on the 27th of September, 1862, entitled "An act to amend an act entitled an act to provide further for the public defence," approved 16th April, 1862, that the President be authorized to call out and place in the military service of the Confederate States, for three years, unless the war shall have been sooner ended, all white men who are residents of the Confederate States, between the ages of eighteen and forty-five years, at the time the call may be made, and who are not at such time legally exempted from military service, or such part thereof as in his judgment may be necessary for the public defence;

And *whereas*, in my judgment, the necessities of the public defence require that every man capable of bearing arms, between the ages aforesaid, should now be called out to do his duty in the defence of his country, and in driving back the invaders now within the limits of the confederacy;

Now, therefore, I, Jefferson Davis, President of the Confederate States of America, do, by virtue of the power vested in me as aforesaid, call out and place in the military service of the Confederate States all white

of duty, and summon those who have absented themselves without leave, who have remained absent beyond the period allowed by their furloughs, to repair without delay to their respective commands, and I do hereby declare that I grant a general pardon and amnesty to all officers and men within the Confederacy, now absent without leave, who shall, with the least possible delay, return to their proper posts of duty; but no excuse will be received for any delay beyond twenty days after the first publication of this proclamation in the State in which the absentee may be at the date of the publication. This amnesty and pardon shall extend to all who have been accused, or who have been convicted and are undergoing sentence for absence without leave or desertion, excepting only those who have been twice convicted of desertion.

Finally, I conjure my countrywomen—the wives, mothers, sisters, and daughters, of the Confederacy—to use their all-powerful influence in aid of this call, to add one crowning sacrifice to that which their patriotism has so freely and constantly afforded on their country's altar, and to take care that none who owe service in the field shall be sheltered at home from the disgrace of having deserted their duty to their families, to their country, and to their God,

Given under my hand, and the seal of the Confederate States, at Richmond, this 1st day of August, in the year of our Lord, one thousand eight hundred and sixty-three.

JEFFERSON DAVIS.

By the President:

J. P. BENJAMIN, Secretary of State.

No bounties appear to have been paid to volunteers, after the passage of the conscription act, in 1862. Nor were any efforts made to fill up the quotas of States by contributions to volunteers, as was done in the Northern States. The only inducement to volunteer was that such a person could choose the company and regiment in which he would serve, if the ranks were not full. Neither was there any organized Sanitary Commission, as in the Northern States, to cooperate with the Government, in the care of the sick and wounded soldiers, thus applying all private contributions to purposes for which they were given.

Of the numbers of the Confederate army during the year, nothing accurate is at present known. Estimated by its conduct in battle, its spirit, with one or two exceptions, has not flagged; and as much vigor in their cause was manifested, even to the close of the year, as was ever shown in the field by the soldiers heretofore. The most vigorous and untiring efforts were made after the very extreme proclamation, in July, to recruit the army, and with much success.

Under the depreciation of the currency, the pay of the soldiers sunk to an insignificant sum; and, to prevent local disturbances, measures were taken in the several States to provide for their destitute families.

At the session of Congress, at the close of the year, an act was introduced which declared every man between the ages of eighteen and fifty-five to be in the military service for the war. Thus every one between these ages was made subject at once to the articles of war, to military discipline, and military penalties; and, upon failure to report for duty at a military station, within a certain time, he

was liable to the penalty of death as a deserter. While the bill was under debate, the following remarks were made by some of the members on an amendment to exempt farmers and planters from the conscription:

Mr. Smith, of North Carolina, said: "We have at this time 400,000 men on our muster rolls. How many were actually in the field, he was unable to state; it was probable one half were not there, and it was well known that we were unable to feed the fractional part who were in the field. If, however, there were half—if 200,000 should require the possible seizure of one half of the provisions of the country—where, he would ask, were the means to feed the ten times that number who remained at home? Private appeals were daily coming to the members of Congress from soldiers in the army speaking of the suffering at home; how many of their families are wanting the necessities of life, when they are unable to send them any part of their scanty pay."

Mr. Chambers, of Virginia, said that manufactures were as necessary as agriculture, and there was as great deficiency in clothing to-day as there was in food. We could, he believed, feed double two hundred thousand men in the field; and if we could not, then the sooner we made terms with Abraham Lincoln, the better for us. We must have more than two hundred thousand men in the field next spring; we have now all the supplies we will have then, for the farmers' productions won't be available until next winter. Everybody admits and expects that next spring will be the worst and the heaviest and most decisive campaign that will occur, and yet there is a demand for more exemptions.

Mr. Goode, of Virginia, was able to state, upon the best authority, that in reply to inquiries propounded by Colonel Preston, Chief of the Conscript Bureau, all of the enrolling officers of the State, who were assembled here a few days ago, said that the State could not stand another draft.

Mr. Holcombe, of Virginia, said that by the bill, of which this was an amendment, the entire agricultural population would be put in the army, and that in a country whose agricultural population greatly outbalanced that of the cities and towns. We proposed to put in all of every age, when it was known that it was a precarious matter to supply, from week to week, the army in the field. We now had five hundred thousand men in the field to provide for; and the new law would add one hundred thousand more, and was it possible to escape starvation when there were none at home to provide for them? It was our policy to protract the war. Time and distance were our great allies. We must remember that, in reference to this State at least, our last crops were far below the average. Our space had been contracted, and all now must be devoted to the production of provisions for next year. Take away the men, and starvation at home and ruin in the army would be, in his opinion, the inevitable result."

For the supply of the army a commissary agent was appointed for each county, or one for two or three counties, who was charged with the duty of purchasing and impressing supplies in his territory for the use of the army. Such agent was usually a resident in the county for which he was appointed. The manner of conducting the impressment was prescribed by Congress. (See CONGRESS, CONFEDERATE.)

The report of the Secretary of War, made near the close of the year, alluded to desertion, straggling, and absenteeism, and said that the effective force of the army was but little over one half or two thirds of the men whose names

were on the muster rolls. He recommended the repeal of the substitute and exemptive provisions, and that all having substitutes be put back into the field, and stated that the privileges which Congress granted, to put in substitutes, could be regularly and constitutionally abrogated by the same power. He said that no compact was entered into between the Government and the person furnishing a substitute, as had been alleged, but only a privilege which Government accorded. Instead of complaining of such abrogation, the person ought to feel gratified at what had heretofore been allowed him. He recommended an abridgment of exemptions and the conscription of all, making details according to the wants of society at home.

The Secretary said that the three years' men, when their terms expire, could not be finally discharged, and should be retained, allowing them to choose the existing company, under its present organization, in the same arm of the service. He recommended the consolidation of such companies and regiments as were reduced below a certain complement.

The following is a list of the officers in the rebel service, who previously belonged to the regular army of the United States :

- Armstrong, Francis C., Captain, 2d Dragoons.
 Archer, James J., Captain, 9th Infantry.
 Armistead, L. A., Captain and brevet Major, 6th Infantry.
 Adams, John, Captain, 1st Dragoons.
 Armistead, F. S., First Lieutenant, 10th Infantry.
 Alexander, E. P., Second Lieutenant, Engineers.
 Anderson, Charles D., First Lieutenant, 4th Artillery.
 Anderson, R. H., Second Lieutenant, 9th Infantry.
 Anderson, R. H., Captain, 2d Dragoons.
 Alexander, J. B. S., Second Lieutenant, 9th Infantry.
 Anderson, S. S., Captain and brevet Major, 2d Artillery.
 Anderson, G. B., First Lieutenant, 2d Dragoons.
 Boggs, William R., First Lieutenant, Ordnance.
 Beall, William N. R., Captain, 1st Cavalry.
 Brown, John A., Captain, 4th Artillery.
 Brewer, R. H., First Lieutenant, 1st Dragoons.
 Baker, Lawrence S., First Lieutenant, Mounted Rifles.
 Barton, Seth M., Captain, 1st Infantry.
 Blake, E. D., Captain, 8th Infantry.
 Blair, William B., Captain, Commissary Department.
 Beckham, Robert F., brevet 2d Lieutenant, Engineers.
 Brewer, Charles, Assistant Surgeon, U. S. A.
 Beall, Lloyd J., Paymaster, U. S. A.
 Borland, Harold, brevet 2d Lieutenant, 5th Infantry.
 Bee, Barnard E., Captain, 10th Infantry.
 Bradfute, William R., Captain, 2d Cavalry.
 Burtwell, John R. B., Second Lieutenant, 1st Cavalry.
 Beauregard, P. G. T., Captain and brevet Major, Engineers.
 Claiborne, Thomas J., Captain, Mounted Rifles.
 Crittenden, George B., Lieutenant-Colonel, Mounted Rifles.
 Collins, Charles R., brevet Second Lieutenant, Topographical Engineers.
 Cooke, John R., First Lieutenant, 8th Infantry.
 Corley, James L., First Lieutenant, 6th Infantry.
 Chilton, Robert H., Paymaster, U. S. A.
 Cosby, George B., First Lieutenant, 2d Cavalry.
 Cabell, Wm. L., Captain and Assistant Quartermaster.
 Cooper, Samuel M., Second Lieutenant, 1st Artillery.
 Cooper, Samuel, Colonel and Adjutant-General.
 Carr, George W., First Lieutenant, 9th Infantry.
 Cole, Robert G., First Lieutenant, 8th Infantry.
 Dunovant, John, Captain, 10th Infantry.
 Davidson, Henry B., Captain, 1st Dragoons.
 Deshler, James, First Lieutenant, 10th Infantry.
 De Lagnel, Julius A., First Lieutenant, 2d Artillery.
 De Saussure, William D., Captain, First Cavalry.
 Deas, Geo., brevet Major and Assistant Adjutant-Gen'l.
 De Leon, David C., Surgeon, U. S. A.
 Elzey, Arnold, Captain, 2d Artillery.
 Ewell, Richard S., Captain, 1st Dragoons.
 Echols, William H., brevet Second Lieutenant, Topographical Engineers.
 Evans, Nathan G., Captain, 2d Cavalry.
 Field, Charles W., Captain, 2d Cavalry.
 Forney, John H., First Lieutenant, 10th Infantry.
 Ferguson, Sam'l W., Second Lieutenant, 1st Dragoons.
 Frazer, John W., Captain, 9th Infantry.
 Fauntleroy, Thomas T., Colonel, 1st Dragoons.
 Grayson, John B., Brevet Lieutenant-Colonel, Commissary Department.
 Gilmer, Jeremy F., Captain, Engineers.
 Guild, Lafayette, Assistant Surgeon, U. S. A.
 Gardner, William M., Captain, Second Infantry.
 Garnett, Richard B., Captain, 6th Infantry.
 Gatlin, Richard C., Major, 5th Infantry.
 Gardner, Franklin, Captain, 10th Infantry.
 Gorgas, Josiah, Captain, Ordnance Department.
 Gibbes, Wade H., brevet 2d Lieutenant, 2d Cavalry.
 Garnett, Robert S., Major, 9th Infantry.
 Gill, William G., First Lieutenant, 4th Artillery.
 Hill, James H., First Lieutenant, 10th Infantry.
 Hill, Ambrose P., First Lieutenant, 1st Artillery.
 Hill, Henry, Paymaster, U. S. A.
 Hoxton, Llewellyn, brevet Second Lieutenant, Ordnance Department.
 Holloway, Edmunds B., Captain, 8th Infantry.
 Huger, Benjamin, Major and brevet Colonel, Ordnance Department.
 Haskell, Alexander M., 2d Lieutenant, 1st Infantry.
 Huger, Frank, Second Lieutenant, 10th Infantry.
 Heth, Henry, Captain, 10th Infantry.
 Haden, John M., Assistant Surgeon, U. S. A.
 Hallonquist, James H., 2d Lieutenant, 4th Artillery.
 Hood, John B., First Lieutenant, 2d Cavalry.
 Holmes, Theophilus H., Major, 8th Infantry.
 Hill, Robert C., Second Lieutenant, 5th Infantry.
 Huse, Caleb, First Lieutenant, 1st Artillery.
 Hardee, William J., Lieutenant-Colonel, 1st Cavalry.
 Iverson, Alfred, Jr., First Lieutenant, 1st Cavalry.
 Ives, Joseph C., First Lieutenant, Topographical Engineers.
 Jackson, Wm. H., Second Lieutenant, Mounted Rifles.
 Jones, John M., Captain, 7th Infantry.
 Johnson, Edw., Captain and brevet Major, 6th Infantry.
 Jordan, Thomas, Captain and Assistant Quartermaster.
 Johnston, Albert S., Colonel and brevet Brigadier-General, Second Cavalry.
 Jackson, Andrew, Jr., Second Lieutenant, 1st Cavalry.
 Johnston, Joseph E., Quartermaster-General, U. S. A.
 Jones, Samuel, Captain, 1st Artillery.
 Jones, David R., brevet Captain and Assistant Adjutant-General.
 Jones, Thomas M., First Lieutenant, 8th Infantry.
 Jones, Walter, First Lieutenant, 1st Infantry.
 James, George S., First Lieutenant, 4th Artillery.
 Jackson, Andrew, First Lieutenant, 3d Infantry.
 Loring, William W., Colonel, Mounted Rifles.
 Lee, Fitzhugh, First Lieutenant, 2d Cavalry.
 Longstreet, James, Paymaster, U. S. A.
 Lee, Stephen D., First Lieutenant, 4th Artillery.
 Lay, George W., Captain and brevet Lieutenant-Colonel, 6th Infantry.
 Lockett, Sam'l H., brevet 2d Lieutenant, Engineers.
 Lomax, Lunsford L., First Lieutenant, 1st Cavalry.
 Long, Armistead L., First Lieutenant, 2d Artillery.
 Long, John O., First Lieutenant, 2d Infantry.
 Lee, George W. C., First Lieutenant, Engineers.
 Lee, William F., Second Lieutenant, 2d Infantry.
 Little, Henry, Captain, 7th Infantry.
 Lee, Robert E., Colonel, 1st Cavalry.
 Maury, Dabney H., Captain and Assistant Adjutant-General.
 Myers, Abraham C., Captain and brevet Lieutenant-Colonel, and Assistant Quartermaster.

Mackall, William W., brevet Major and Assistant Adjutant-General.
 Martin, James G., brevet Major and Assistant Quartermaster.
 McNeill, Henry C., Second Lieutenant, Mounted Rifles.
 Mercer, John T., Second Lieutenant, 1st Dragoons.
 McCown, John P., Captain, 4th Artillery.
 Meade, Richard K., Jr., Second Lieutenant, Engineers.
 Merchant, Anderson, First Lieutenant, 2d Artillery.
 McLean, Eugene E., Captain and Assistant Quartermaster.
 Marmaduke, John S., Second Lieutenant, 7th Infantry.
 Magruder, John B., Captain and brevet Lieutenant-Colonel, 1st Artillery.
 Mullins, John, First Lieutenant, 2d Dragoons.
 Minter, Joseph F., First Lieutenant, 2d Cavalry.
 Major, James P., Second Lieutenant, 2d Cavalry.
 McIntosh, James, Captain, 1st Cavalry.
 McLaws, Lafayette, Captain, 7th Infantry.
 Maclin, Sackfield, Paymaster, U. S. A.
 Moore, Samuel P., Surgeon, U. S. A.
 Montgomery, Alexander B., Second Lieutenant, 4th Artillery.
 Magruder, William J., Captain, 1st Cavalry.
 Northrop, Lucius B., Captain, 1st Dragoons.
 O'Bannon, Lawrence W., First Lieutenant, 3d Infantry.
 Pickett, George E., Captain, 9th Infantry.
 Pegram, John, First Lieutenant, 2d Dragoons.
 Pemberton, John C., Captain and brevet Major, 4th Artillery.
 Pender, William D., First Lieutenant, 1st Dragoons.
 Ramseur, David P., Assistant Surgeon, U. S. A.
 Robertson, Beverly H., Captain, 2d Dragoons.
 Rains, Gabriel J., Lieutenant-Colonel, 5th Infantry.
 Reynolds, Samuel H., First Lieutenant, 1st Infantry.
 Reynolds, Frank A., brevet 2d Lieutenant, 2d Dragoons.
 Riley, Edward B. D., Second Lieutenant, 4th Infantry.
 Ransom, Robert, Captain, 1st Cavalry.
 Rich, Lucius L., First Lieutenant, 5th Infantry.
 Rhett, Thomas G., Paymaster, U. S. A.
 Rice, Olin F., Second Lieutenant, 6th Infantry.
 Ruggles, Daniel, Captain and brevet Lieutenant-Colonel, 5th Infantry.
 Reynolds, Alex. W., Captain and Assist. Quartermaster.
 Stevenson, Carter L., Captain, 5th Infantry.
 Smith, Martin L., Captain, Topographical Engineers.
 Sibley, Henry H., Major, 1st Dragoons.
 Steele, William, Captain, 2d Dragoons.
 Stuart, James E. B., Captain, 1st Cavalry.
 Smith, Larkin, Captain and brevet Major, 8th Infantry.
 Steen, Alexander E., First Lieutenant, 3d Infantry.
 Saunders, John S., 2d Lieutenant, Ordnance Dep't.
 Stewart, George H., Captain, 1st Cavalry.
 Smith, E. Kirby, Major, 2d Cavalry.
 Smith, William D., Captain, 2d Dragoons.
 Slaughter, James E., First Lieutenant, 1st Artillery.
 Stith, Donald C., Captain, 5th Infantry.
 Taylor, John G., First Lieutenant, 8th Infantry.
 Tyler, Charles H., Captain, 2d Dragoons.
 Twiggs, David E., Brigadier-General and brevet Major-General, U. S. A.
 Van Dorn, Earl, Major, 2d Cavalry.
 Villepigue, John V., First Lieutenant, 2d Dragoons.
 Williams, William O., First Lieutenant, 2d Cavalry.
 Withers, John, Captain and Assist. Adjutant-General.
 Wayne, Henry C., Captain and brevet Major, Quartermaster's Department.
 Williams, Solomon, Second Lieutenant, 2d Dragoons.
 Walker, Henry H., First Lieutenant, 6th Infantry.
 Winder, John H., Major and brevet Lieutenant-Colonel, 3d Artillery.
 Washington, T. A., First Lieutenant, 1st Infantry.
 Winder, Charles S., Captain, 9th Infantry.
 Williams, Thomas G., First Lieutenant, 1st Infantry.
 White, Moses J., brevet Second Lieutenant, Ordnance.
 Whiting, William H. C., Captain, Engineers.
 Welcker, William T., First Lieutenant, Ordnance.
 Waddy, John R., First Lieutenant, 4th Artillery.
 Wilcox, Cadmus M., Captain, 7th Infantry.
 Walker, William T. H., Major and brevet Lieutenant-Colonel, 10th Infantry.

ARMY OF THE UNITED STATES. On January 1st, 1863, the army of the United States, comprising the regular troops, and the volunteers obtained under the various calls made by the President since the commencement of the war, numbered probably between 600,000 and 700,000 men. Of the whole number of men voluntarily raised to that date no precise statement can be afforded, the information furnished by some of the reports being so obscure that it is difficult to decide to which class of service (that of the individual States or of the General Government), the troops furnished belong; but the following table is believed to be as complete as it is possible to make it:

STATES.	3 months.	9 months.	3 years.	Total.
Maine.....	779	7,493	24,771	33,043
New Hampshire..	800	2,023	14,915	17,738
Vermont.....	782	4,777	18,447	19,006
Massachusetts....	8,733	16,896	50,406	71,038
Rhode Island.....	3,147	2,069	9,410	14,626
Connecticut.....	2,340	5,697	20,182	28,219
New York.....	15,922		176,783	192,705
New Jersey.....	3,105	10,714	16,395	30,214
Pennsylvania.....	20,979	15,100	164,257	194,558
Ohio.....	26,893		143,228	170,121
Indiana.....	4,698		93,840	104,316
Illinois.....	4,901		130,539	135,440
Michigan.....	780		44,890	45,670
Wisconsin.....	810	491	39,845	40,646
Minnesota.....	930	1,200	10,136	12,266
Iowa.....	959		47,855	48,314
Missouri.....			27,407	27,407
Kentucky.....		878	41,163	42,043
Delaware.....	No returns.			
Maryland.....				
Virginia.....				
Tennessee.....				
California.....				
	91,561	67,335	1,068,769	1,227,665

To these must be added 30,131 men enlisted in New York for two years in the spring of 1861; 2,589 twelve months' men enlisted in Pennsylvania, and the following raised for the defence of their respective States: Maine, 262; Pennsylvania, 3,191; Missouri, 10,540; and Kentucky, 1,860; making a grand total of 1,276,246. If to these again be added the regular army and the militia called out by the governors of the border States under apprehensions of invasion, but not mustered into the service of the United States, the number of men engaged from April, 1861, to January, 1863, will probably not vary much from a million and a half. The troops actually in service at the close of 1862, comprising 3 years', 2 years', 12 months', 9 months' men and regulars, represented organizations amounting originally to an aggregate of 1,200,000; but among these the casualties of the field, diseases of the camp, discharges for physical disability, and desertions, had made fearful inroads, some regiments having within a year of their enlistment been reduced to less than the strength of a couple of full companies. As an illustration at once of the bravery of the troops and of the rate at which the army is depleted, Gen. Meade stated in reply to an address of welcome from the mayor of Philadelphia, that from March,

1862, when the army of the Potomac left its lines in front of Washington, to the close of 1863, not less than a hundred thousand men in it had been killed and wounded. The causes and rate of the depletion in this and other military departments will be found treated under the heads of **HYGIENE OF THE ARMY** more fully.

In view of the serious loss of disciplined troops which would be caused by the return home of the 2 years', 12 months' and 9 months' regiments, comprising an aggregate of about 65,000 men, whose terms of enlistment would expire during the summer and autumn of 1863, the Government early in the year took measures to obtain the passage of an Enrolment and Conscription Act, authorizing the President to recruit the army, when necessary, by drafting from the able-bodied male citizens of the country between the ages of twenty and forty-five. The measure was unpopular in many parts of the country, though few, if any, among the party in favor of carrying on the war objected to it upon principle, as a final and peremptory means of providing men. They, however, preferred volunteering as more effective and more in accordance with republican institutions. In reply to these objections it was urged that volunteering under the last call had proceeded slowly, that the bounties demanded were excessive, and that the quota of many States, even under the inducement of heavy bounties, had not been filled. These reasons being deemed conclusive, the conscription act became a law on March 3d; in the succeeding May and June the enrolment was effected in most of the States, and early in the former month a draft of 300,000 men was ordered, the conscription commencing in the several districts into which the country was divided by the provost marshal-general and his assistants, as soon as the enrolment was completed and the quota in each assigned. For the operations of the conscription act, *see* **ENROLMENT**. On December 1st, 1863, the draft had resulted, in twelve States in which it was enforced, in adding about 50,000 men to the army, and in the accumulation of a fund of \$10,518,000, derived from commutations under what is known as the "Three Hundred Dollar clause" of the act, which was reserved for the procurement of recruits by bounties.

On June 15th, under apprehensions of an invasion of Pennsylvania and other Northern States, the President issued a proclamation, calling for 100,000 militia to be mustered into the United States service for six months unless sooner discharged, *viz.* : from Maryland, 10,000; from Pennsylvania, 50,000; from Ohio, 30,000; and from West Virginia, 10,000; and directing that these States should be respectively credited under the Enrolment Act for the militia service rendered under the proclamation. The governor of New-York also received a requisition for 20,000 men. The latter call was obeyed with commendable promptitude, and

very nearly to the extent required by the President; but from the States most immediately affected by the invasion of Gen. Lee, the number of men thus obtained was proportionately less. The speedy retirement of the Confederates after the battle of Gettysburg rendered the services of these troops useless, and by August 1st they were nearly all disbanded.

It having become apparent to the Government, during the progress of the draft, that the act of March 3d was insufficient to supply the army with recruits, the President issued a call on October 15th for 300,000 volunteers, to be enlisted by the governors of the different States "for the various companies and regiments in the field from their respective States." The volunteers thus enlisted were declared entitled to advance pay, premium, and bounty, as previously established by Government for enlisted troops; and, together with all other volunteers not previously credited, were to be credited on and deducted from the quotas established for the draft. Should any State fail to raise the quota assigned to it by the War Department under this call, then a draft for the deficiency was to be made on the State or its districts on January 5th, 1864. Nothing in the proclamation was to interfere with existing orders, or any subsequently to be issued, for the draft then in progress or where it had not commenced; and it was stated that in the assignment of quotas of States and districts due regard would be had for the men previously furnished, whether by volunteering or drafting.

This call differed in several particulars from any previously made, and indicated the adoption of a wiser policy in reference to reënforsing the army. In the first place the troops were ordered to be raised six months or more before the expiration of the terms of any of the three years' men, and not, as previously, when there was imperative need of their services, either to repel invasions, to save the menaced capital, or to fill the places of those whose term of enlistment was about to expire. They were to be incorporated into the various organizations in the field, and not formed into new regiments or companies. And lastly, the people were called upon to decide under which system, volunteering or the draft, they would replenish the wasted battalions of the army, thus relieving the Government from the odium which, in the opinion of many, its enforcement of the conscription had brought upon it.

But although the call was made several months in advance of the withdrawal of the enlisted men of 1861, it came none too soon for the needs of the country. Estimating the strength of the army at 650,000 men, on Jan. 1st, 1863, we have to deduct from that number 10,000 two years' and 55,000 to 60,000 nine months' men, whose terms expired previous to October; and if from the remainder we make a further deduction of 25 per cent. for losses of every description, which is the ascertained

ratio of depletion, there would be left but 450,000 effective men at the close of the year. To offset these losses there were 50,000 conscripts, and, as appears by the provost-marshal-general's report, 83,242 recruits obtained, previous to November, by volunteering, of whom all but about 15,000 were 3 years' men, a total of 133,242, which would bring the strength of the army, in October, up to about 580,000 men. The estimates of the War Department show that the paymaster-general of volunteers was called upon in November to pay 961 regiments of infantry, 159 of cavalry, 42 of artillery, 4 of engineers, and 174 artillery batteries, making a total of about 1,150 full regiments. The regular army to be added consists of 6 regiments of cavalry, 5 of artillery, and 19 of infantry, making an aggregate of 1,200 regiments. To this large number, the exigencies that follow victory and occupation, the nature and extent of the field of operations, and the formidable size of the enemy's army, imperatively demanded that considerable reinforcements should be added.

Within a few days after the last call, volunteering commenced in all the States with an activity which promises a substantial increase to the national forces. In addition to the bounties offered by Government, from its commutation fund and from other sources, viz., \$302 to new recruits, and \$402 to veteran volunteers, there were bounties provided by State, county, town, or other local authorities, nearly, if not fully, equal in amount, making the whole sum received by the recruit from \$600 to \$900. Under this stimulus a sufficient number of recruits had probably come in at the close of the year to restore the army to the effective strength possessed by it a twelvemonth previous.

Previous campaigns having shown the folly of recruiting the army by the addition of new regiments and companies, which require many months of experience in actual warfare to become effective, the Government, early in the year, began to devise means to retain in the field the veteran troops whose terms were about to expire, and to fill up the regiments in active service to the maximum strength. Many of the latter were reduced to mere skeleton commands; a brigade of four or five regiments being frequently inferior in numerical strength to a full regiment; and, in the opinion of experienced officers, an army made up of numerous small organizations of this nature was wanting in mobility and in other elements of power. Few of the regiments raised during the first two years of the war had received any considerable reinforcements, and though the men had become good soldiers, the gradual reduction (amounting in some cases to almost 90 per cent.) in their numbers had greatly weakened that *esprit du corps* which it is one of the chief objects of a general to promote. A regiment reduced to 150 or 200 men, with no hope of being reinforced, soon loses interest in its or-

ganization, and its members, if not demoralized or affected in their discipline, become at the best only machines. Influenced, doubtless, by these considerations, the Secretary of War announced, in his annual report, that "the prime importance of filling up the old regiments, and the superiority of such forces over new regiments, were points upon which all military experience and opinions agree," and, throughout the year, the policy of the Government in providing for an increase of the army, was in conformity with these views. An important exception was made in the case of negro regiments, of which mention will be made hereafter. In some of the States also nine months' men, and in New York two years' men, were formed into new regiments, which were considered, and were in fact, equivalent to veteran regiments.

As a means of inducing veterans, both out of and in the service, to reenlist, or to enter old regiments other than their own, a liberal system of bounties and furloughs was adopted, the details of which are given in the following order, issued by the War Department, on June 28th.

GENERAL ORDERS, No. 191.—*First*: In order to increase the armies now in the field, volunteer infantry, cavalry, and artillery may be enlisted at any time within ninety days from this date, in the respective States, under the regulations hereinafter mentioned. The volunteers so enlisted; and such of the three years' troops now in the field as may reenlist, in accordance with this order, will constitute a force to be designated "Veteran Volunteers."

The regulations for enlisting the force are as follows:

Second: The period of service for the enlistments and reenlistments above mentioned shall be for three years or during the war.

Third: All able-bodied men between the ages of 18 and 45 years, who have heretofore been enlisted and have served for not less than nine months, and can pass the examination required by the mustering regulations of the United States, may be enlisted under this order as veteran volunteers in accordance with the provisions hereinafter set forth.

Fourth: Every volunteer enlisted and mustered into the service as a veteran under this order, shall be entitled to receive from the United States one month's pay in advance, and a bounty and premium of \$402.

Fifth: If the Government shall not require these troops for the full period of three years, and they shall be mustered honorably out of the service before the expiration of their term of enlistment, they shall receive, upon being mustered out, the whole amount of bounty remaining unpaid, and the same as if the full term had been served. The legal heirs of volunteers who die in service shall be entitled to receive the whole bounty remaining unpaid at the time of the soldier's death.

Sixth: Veteran volunteers enlisted under this order will be permitted at their option to enter old regiments now in the field, but their service will continue for the full term of their own enlistment, notwithstanding the expiration of the term for which the regiment was originally enlisted. New organizations will be officered only by persons who have been in service, and have shown themselves properly qualified for command. As a badge of honorable distinction, service chevrons will be furnished by the War Department, to be worn by the veteran volunteers.

Seventh: Officers of regiments, whose terms have expired, will be authorized, on proper application and

approval of their respective governors, to raise companies and regiments, within the period of sixty days, and, if the company or regiment authorized to be raised shall be filled up and mustered into service within the said period of sixty days, the officers may be re-commissioned at the date of their original commission, and, for the time engaged in recruiting, they will be entitled to receive the pay belonging to their rank.

Eighth: Volunteers or militia now in service, whose term of service will expire within ninety days, and who shall then have been in service at least nine months, shall be entitled to the aforesaid bounty and premium of \$402, provided they reenlist before the expiration of their present term for three years, from date of reenlistment or for the war, and said bounty and premium shall be paid in the manner herein provided for other troops reëntering the service.

Ninth: After the expiration of ninety days from this date, volunteers serving in three years' organizations who may reenlist for three years from the date of such reenlistment or for the war, shall be entitled to the aforesaid bounty and premium of \$402, to be paid in the manner herein provided for other troops reëntering the service.

Tenth: Officers in service, whose regiments or companies may reenlist in accordance with the provisions of this order, before the expiration of their present term, shall have their commissions continued so as to preserve their date of rank as fixed by their original muster into the United States service.

Eleventh: As soon after the expiration of their original term of enlistment as the exigencies of the service will permit, a furlough of thirty days will be granted to men who may reenlist in accordance with the provisions of this order.

Twelfth: Volunteers enlisted under this order will be credited as three years' men in the quotas of their respective States. Instructions for the appointment of recruiting officers, and for enlisting veteran volunteers, will be immediately issued to the governors of States. By order of the Secretary of War.

E. D. TOWNSEND, Asst. Adjt.-Gen.

By an order issued Sept. 11th, section 9 of the above order was amended, so as to read as follows:

9.—After the expiration of ninety days from this date (June 25th) volunteers serving in three years' organizations, who may reenlist for three years or the war in the companies of regiments to which they now belong, and who may have, at the date of reenlistment, less than one year to serve, shall be entitled to the aforesaid bounty and premium of \$402 to be paid in the manner provided for other troops reëntering the service. The new term will commence from the time of reenlistment.

Another order, dated in December, extended the time for reenlisting veteran volunteers in the respective States under General Orders No. 191, current series, to Jan. 5th, 1864.

A further order from the War Department, dated Nov. 21st, provided that volunteers then in the service, reenlisting as veteran volunteers under General Orders, No. 191, should have a furlough of at least thirty days previous to the expiration of their original enlistment; and that when three fourths of a regiment or company should reenlist, the men so enlisted might go home in a body with their officers; the individuals of the regiments or companies not reenlisting to be assigned, during the absence of their comrades, to duty with other organizations. This modification of the original order, together with the liberal bounty offered to veteran volunteers, had the effect of inducing

large numbers to reenlist, and, subsequent to the middle of December, a steady stream of furloughed regiments poured northward, affording indications that the army, when reorganized in the spring of 1864, would contain a considerable nucleus of disciplined troops.

The men raised by drafting were distributed, from time to time, among the regiments or companies of their States, and those volunteering under the October call, it was understood, at the close of the year were to be similarly disposed of. Few of the latter class of recruits, however, had been forwarded to the seat of war at that date. The great body of them were in temporary State camps, and in many of the States the number of these was still considerable.

As an additional means of promoting the efficiency of the army, a plan of consolidation in depleted regiments was authorized by the two following sections of the Enrolment and Conscription Act:

SEC. 19.—*And be it further enacted*, That whenever a regiment of volunteers of the same arm from the same State is reduced to one half the maximum number prescribed by law, the President may direct the consolidation of the companies of such regiment; *Provided*, That no company so formed shall exceed the maximum number prescribed by law. When such consolidation is made, the regimental officers shall be reduced in proportion to the reduction of the numbers of companies.

SEC. 20.—*And be it further enacted*, That whenever a regiment is reduced below the minimum number allowed by law, no officer shall be appointed in such regiment beyond those necessary for the command of such reduced number.

In accordance with these provisions, some regiments which had dwindled to insignificant proportions were consolidated into five or a less number of companies, where the interests of the service seemed to demand it; but, in the majority of cases, they were allowed to remain as originally organized, for reasons deemed conclusive by those having discretion in the matter, and which can be best understood by reference to the following order providing for the mustering out of supernumerary officers in such consolidated regiments:

General Orders, No. 86.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, }
WASHINGTON, April 2d, 1863. }

1. Under the authority contained in sections nineteen and twenty of the act for enrolling and calling out the national forces, and for other purposes, approved March 3d, 1863, it is ordered that, for each and every regiment of the volunteer army now reduced, or that may be reduced hereafter, as set forth in said sections, consolidation shall be made in accordance with the following rules:

Infantry.

1. Each regiment will be consolidated into five or a less number of companies, and the colonel, major, and one assistant surgeon mustered out.

Cavalry.

2. Each regiment will be consolidated into six or a less number of companies, and the colonel, two majors, and one assistant surgeon mustered out.

Artillery.

3. Each regiment will be consolidated into six or a

less number of batteries, and the colonel, two majors, and one assistant surgeon mustered out.

4. The companies and batteries formed by consolidation will be of the maximum strength, and will be organized as now directed by law and regulations. The first letters of the alphabet will be used to designate the companies.

5. The company officers, commissioned and non-commissioned, rendered supernumerary, will be mustered out of service at the date of consolidation. All other officers and non-commissioned officers will be retained.

6. The officers to be retained will be selected by the division and corps commanders, under the instructions of the commanding general of the army or department, from among the most efficient officers of the respective regiments. After the consolidation, as herein directed, the reduced proportion of officers will be maintained, and no appointments to vacancies will be made except upon notification from the adjutant-general of the army. To this end commanders of armies and departments will report weekly to the adjutant-generals the vacancies to be filled. The said reports will be separate for each State, and must embrace the name, rank, and regiment of the party creating the vacancy, with date and cause thereof. If an order was issued in the case, its number, date, and source must be given. Commissaries and assistant commissaries of musters will closely observe this paragraph, and make no musters in except of the proportion herein fixed.

The difficulty attending the execution of this order, and the positive loss which the service would incur by the withdrawal of numerous competent officers, apart from the injustice to the officers themselves, were readily perceived; and soon after its promulgation the corps commanders of the army of the Potomac unanimously requested the commander-in-chief to take no action in the matter until the disastrous effect of such a step could be laid before the President. In accordance with these suggestions, the power has been but sparingly used, and only where the discharge of officers would prove a positive benefit to the regiment or the service. Recruiting was wisely substituted as a means of restoring efficiency; and old regiments, reduced by battle and hardships, but proud of their well earned fame, were allowed to retain their experienced and familiar leaders, whom, in many cases, they considered an indispensable part of their organization.

By official returns made in January, 1863, it was estimated that there were then absent from duty, 8,987 officers, and 280,073 non-commissioned officers and privates, of whom only a part were really disabled or sick, the rest being mainly deserters or stragglers who absented themselves in order to avoid duty. The Government itself was responsible in a measure for this state of things, from the readiness with which it had permitted furloughs to be granted, and from its neglect to punish abuses of the privilege. Many of the absentees were living openly at their homes, having far exceeded the reasonable time allowed for recovery from wounds or sickness, and among these a lax sentiment had grown up in regard to the obligations of a furlough, which they began finally to consider as equivalent to a discharge from the service. Many probably honestly believed that, having obtained a furlough, they

might overstay their time without incurring the reproach of desertion; and more still, seeing that no measures were taken to reclaim or punish deserters, openly defied the authority of the Government by resuming their ordinary occupations in time of peace. There was abundant evidence, also, that disaffected persons were systematically employed in promoting desertion, either by enticing men from their regiments, or persuading them to overstay their furloughs until they were afraid to return to the army, and become amenable to punishment.

The publication of these statistics naturally alarmed the country, and with a view of restoring to the service much of its proper material, and of discouraging the practice of desertion, a special clause was inserted in the Conscription Act, upon which the President framed the following proclamation:

EXECUTIVE MANSION, *March 10th*, 1863.

In pursuance of the twenty-sixth section of the act of Congress, entitled an act for enrolling and calling out the national forces, and for other purposes, approved on the third of March, in the year one thousand eight hundred and sixty-three, I, Abraham Lincoln, President and commander-in-chief of the army and navy of the United States, do hereby order and command that all soldiers enlisted or drafted into the service of the United States, now absent from their regiments without leave, shall forthwith return to their respective regiments, and I do hereby declare and proclaim that all soldiers now absent from their respective regiments without leave who shall on or before the 1st day of April, 1863, report themselves at any rendezvous designated by the General Orders of the War Department, No. 58, hereto annexed, may be restored to their respective regiments without punishment, except the forfeiture of pay and allowances during their absence, and all who do not return within the time above specified, shall be arrested as deserters, and punished as the law provides.

And whereas evil disposed and disloyal persons, at sundry places, have enticed and procured soldiers to desert and absent themselves from their regiments, thereby weakening the strength of the armies and prolonging the war, giving aid and comfort to the enemy, and cruelly exposing the gallant and faithful soldiers remaining in the ranks to increased hardships and dangers;

I do, therefore, call upon all patriotic and faithful citizens to oppose and resist the aforementioned dangerous and treasonable crimes, and aid in restoring to their regiments all soldiers absent without leave, and to assist in the execution of the act of Congress for "enrolling and calling out the national forces and for other purposes," and to support the proper authorities in the prosecution and punishment of offenders against said act, and aid in suppressing the insurrection and the rebellion.

In testimony whereof I have hereunto set my hand. Done at the city of Washington, this 10th day of March, in the year of our Lord one thousand eight hundred and sixty-three, and of the Independence of the United States eighty-seventh.

ABRAHAM LINCOLN.

By the President:

EDWIN M. STANTON, Secretary of War.

The proclamation had the effect of inducing many deserters to return voluntarily to their duty, and the enforcement of strict orders issued by the commanders of several departments caused the compulsory return of others. In a corresponding degree the temptation to

overstay furloughs or to desert was lessened, and the efficiency of the army thereby greatly promoted. As the example of officers abusing the privileges of their furloughs was naturally supposed to exert an injurious influence upon the rank and file of the army, the commander-in-chief, in accordance with a special privilege in the Conscription Act, instructed courts martial, in all parts of the country, that they had power to sentence officers who should absent themselves from their commands without leave, to be reduced to the ranks to serve three years or during the war; and, by a general order from the War Department, commanding officers were required to report in their monthly returns of deserters the names of men joined from desertion, as well as those who deserted during the month. So effective were these provisions, that at the close of the year the general-in-chief was enabled to report a considerable abatement in straggling and desertion, as well as in the overstaying of furloughs, although he was of the opinion that the punishment was not quite sufficiently prompt and certain to entirely prevent the evil. From the report of the provost marshal-general, to whom was intrusted the general direction of the subject, it appears that, between May 1st and November 1st, nearly twenty-two thousand deserters and absentees were arrested; and that, owing to the greater probability of arrest and to the punishments that had been inflicted, the number of deserters in September and October was only one half as great as in May and June.

Previous to 1863, the employment of colored soldiers in the United States service was confined to two or three localities. At Hilton Head, S. Carolina, Gen. Hunter had caused the able-bodied negroes from the neighboring plantations to be formed into regiments and drilled by competent officers; and Gen. Butler, finding in New Orleans a colored corps of the Louisiana State militia, raised under the certificate of a former governor of the State, placed it in the service of the Government, and encouraged the formation of similar organizations. These troops were originally intended chiefly for local service, or, if sent beyond the localities in which they were raised, were to be employed to garrison posts which the unacclimated Northern soldiers could not safely occupy during the unhealthy season. Public opinion had not yet decided that they could become an integral portion of the army and as such be available for every species of military service, notwithstanding that Congress, by two acts passed in July, 1862, had expressly authorized the employment of colored men as troops.

The first of these, known as the Confiscation Act, permitted the President to employ as many persons of African descent as he might deem necessary and proper for the suppression of the rebellion; and for that purpose to organize and use them in such manner as he might judge best for the public welfare. The

second act authorized him to receive into the service of the United States for any species of labor or military or naval service for which they might be found competent, persons of African descent, who should be enrolled and organized under such regulations, not inconsistent with the Constitution and the laws, as he might prescribe; and should receive \$10 per month and one ration per day, of which monthly pay \$3 dollars might be in clothing.

Both laws were made with reference to those persons who by force of arms or by provisions of statutes had been recently freed from bondage; and the important class of colored soldiers from the free States was probably not then in the contemplation of Congress. Many considerations were urged upon the President to induce him to exercise the power conferred upon him in a restricted sense only. The employment of negroes as laborers upon fortifications, teamsters, boatmen, and in similar capacities, was declared legitimate and sufficient for the present needs of the country; but, in the opinion of many, the arming of any considerable body of such persons was a measure fraught with ominous consequences. Whether or not these reasons were deemed conclusive, it is certain that, previous to 1863, the number of persons of African descent employed as soldiers was exceedingly limited. But with the commencement of the year, a vigorous movement was initiated in various parts of the country to organize colored regiments, and especially to bring to the aid of the Government the latent strength of the large negro population in the seceded States.

On January 12th, Mr. Stevens, of Pennsylvania, introduced into the House of Representatives a bill authorizing the President to raise, equip, and organize 150,000 colored troops, which, after being amended so as to provide for the enlistment of not over 300,000, was passed, February 2d, in the face of a determined opposition from members of the border States, and from some friends of the administration. A similar bill introduced by Mr. Sumner in the Senate, having been reported back from the Committee on Military Affairs, with a recommendation that it should not pass, on the ground that sufficient authority to raise such troops was conferred by the act of 1862, no further action was taken on either bill. The subject had, however, been by this time very generally discussed, both in and out of Congress, and in deference to the wishes of a large portion of the community, and of many prominent public men, including officers of experience, the President determined to exercise, to their fullest extent, the powers conferred upon him by the act of 1862. Congress having in the Conscription Act avoided making any distinction between white and colored citizens, and required them equally to be enrolled and drafted in the armies of the United States, the policy of the administration thenceforth became clearly defined, and "persons of African descent,"

as well in the free as in the slave States, were declared to be available as soldiers.

The initiative in raising colored regiments in the free States was taken by Governor Andrew of Massachusetts, acting in conformity with the following order from the Secretary of War:

WAR DEPARTMENT, WASHINGTON CITY, }
Jan. 20th, 1863. }

Ordered that GOVERNOR ANDREW, of Massachusetts, is authorized, until further orders, to raise such number of volunteer companies of artillery for duty in the forts of Massachusetts and elsewhere, and such corps of infantry for the volunteer military service as he may find convenient. Such volunteers to be enlisted for three years, unless sooner discharged, and may include persons of African descent, organized into separate corps. He will make the usual requisitions on the appropriate Staff Bureaus, and officers for the proper transportation, organization, supplies, subsistence, arms and equipments of such volunteers.

[Signed]

EDWIN M. STANTON,
Secretary of War.

Recruiting offices were immediately opened by the governor, and, as the colored population of Massachusetts was inconsiderable, agents were sent into neighboring States, where the scruples of the people or of the executive prevented the enlistment of troops of this class. In reply to enquiries, Governor Andrew announced that these regiments would be numbered, organized, considered, and treated in every respect precisely as other regiments previously sent into the field by Massachusetts; and, on the authority of the Secretary of War, he pledged the honor of the United States to them in the same degree and to the same rights with all other troops. Other free States subsequently sanctioned the enlistment of colored soldiers, including Rhode Island, Pennsylvania, New York, Ohio, and Kansas.

The Government having matured its plans with regard to the negro population whom the progress of the war had brought within the Union lines, Gen. Thomas, adjutant-general of the United States, was despatched in March to the Southwest, charged with the organization of colored troops, and the establishment of a labor system in the Mississippi valley. In the discharge of these duties he visited Memphis, Helena, and other points on both sides of the Mississippi as far south as Vicksburg, and while at Lake Providence, Louisiana, delivered, on April 8th, an address to the troops stationed there, the following extracts from which describe one important object of his visit, and unfold the policy of the Government at length:

I came from Washington clothed with the fullest power in this matter. With this power, I can act as if the President of the United States were himself present. I am directed to refer nothing to Washington, but to act promptly—what I have to do, to do at once—to strike down the unworthy and to elevate the deserving. * * * * * You know full well—for you have been over this country—that the rebels have sent into the field all their available fighting men—every man capable of bearing arms, and you know they have kept at home all their slaves for the raising of subsistence for their armies in the field. In this way they can bring to bear against us all the strength of their so-called Confederate States, while we at the

North can only send a portion of our fighting force, being compelled to leave behind another portion to cultivate our fields and supply the wants of an immense army. The administration has determined to take from the rebels this source of supply—to take their negroes and compel them to send back a portion of their whites to cultivate their deserted plantations; and very poor persons they would be to fill the place of the dark-hued laborer. They must do this or their armies will starve.

* * * * *

On the first day of January last the President issued his Proclamation declaring that from that day forward all the slaves in the States then in rebellion should be free. You know that vast numbers of these slaves are within your borders, inside of the lines of this army. They come into your camps and you cannot but receive them. The authorities in Washington are very much pained to hear, and I fear with truth in many cases, that some of these poor unfortunates have, on different occasions, been turned away from us, and their applications for admission within our lines have been refused by our officers and soldiers. This is not the way to use freedmen.

* * * * *

All of you will some day be on picket duty, and I charge you all if any of this unfortunate race come within your lines that you do not turn them away, but receive them kindly and cordially. They are to be encouraged to come to us. They are to be received with open arms; they are to be fed and clothed; they are to be armed.

This is the policy that has been fully determined upon. I am here to say that I am authorized to raise as many regiments of blacks as I can. I am authorized to give commissions, from the highest to the lowest, and I desire those persons who are earnest in this work to take hold of it. I desire only those whose hearts are in it, and to them alone will I give commissions. I don't care who they are or what their present rank may be. I do not hesitate to say that all proper persons will receive commissions.

While I am authorized thus, in the name of the Secretary of War, I have the fullest authority to dismiss from the army any man, be his rank what it may, whom I find maltreating the freedmen. This part of my duty I will most assuredly perform if any case comes before me. I would rather do that than give commissions, because such men are unworthy the name of soldiers.

* * * * *

I would like to raise on this river twenty regiments at least before I go back. I shall take all the women and children and all the men unfit for our military organizations, and place them on these plantations; then take these regiments and put them in the rear. They will guard the rear effectually. Knowing the country well, and familiar with all the roads and swamps, they will be able to track out the accursed guerillas and run them from the land. When I get regiments raised you may sweep out into the interior with impunity. Recollect, for every regiment of blacks I raise, I raise a regiment of whites to face the foe in the field. This, fellow-soldiers, is the determined policy of the administration. You all know full well when the President of the United States, though said to be slow in coming to a determination, when he once puts his foot down, it is there, and he is not going to take it up. He has put his foot down; I am here to assure you that my official influence shall be given that he shall not raise it.

Under the impulse given by this action of the Government, recruiting for colored regiments proceeded with considerable activity in Tennessee, Mississippi, Louisiana, and North and South Carolina, and before the close of the year was in progress in parts of Virginia and other districts in possession of the Federal arms, as also in Maryland and in the District of Columbia. Gen.

Banks, commanding the Department of the Gulf, was so well satisfied with the black troops, which he found in the service on his arrival in New Orleans, and was so confident in the ability and disposition of the negroes to become good soldiers, that he ordered a whole army corps to be raised, consisting of 18 regiments, of 500 men each, to be called the "Corps d'Afrique." His general order on the subject was in the following terms:

Corps D'Afrique.

HEADQUARTERS DEPARTMENT OF THE GULF, }
NINETEENTH ARMY CORPS, OPELOUSAS, }
May 1st, 1863. }

General Orders, No. 40.—The Major-General commanding the Department proposes the organization of a *Corps d'Armée* of colored troops, to be designated as the "Corps d'Afrique." It will consist ultimately of eighteen regiments, representing all arms—infantry, artillery, cavalry—making nine brigades of two regiments each, and three divisions of three brigades each, with appropriate corps of engineers, and flying hospitals for each division. Appropriate uniforms, and the gradation of pay to correspond with the value of the services, will be hereafter awarded.

In the field the efficiency of every corps depends upon the influence of its officers upon the troops engaged, and the practical limits of one direct command is generally estimated at 1,000 men. The most eminent military historians and commanders, among others Thiers and Chambray, express the opinion upon a full review of the elements of military power, that the valor of the soldier is rather acquired than natural. Nations, whose individual heroism is undisputed, have failed as soldiers in the field. The European and American continents exhibit instances of this character, and the military prowess of every nation may be estimated by the centuries it has devoted to military contest, or the traditional passion of its people for military glory. With a race unaccustomed to military service, much more depends on the immediate influence of officers upon individual members, than with those that have acquired more or less of warlike habits and spirit by centuries of contest. It is deemed best, therefore, in the organization of the Corps d'Afrique, to limit the regiments to the smallest number of men consistent with efficient service in the field, in order to secure the most thorough instruction and discipline, and the largest influence of the officers over the troops. At first they will be limited to five hundred men. The average of American regiments is less than that number.

The Commanding General desires to detail for temporary or permanent duty the best officers of the army for the organization, instruction, and discipline of this corps. With their aid he is confident that the corps will render important service to the Government. It is not established upon any dogma of equality or other theory, but as a practical and sensible matter of business. The Government makes use of mules, horses, uneducated and educated white men in the defence of its institutions. Why should not the negro contribute whatever is in his power for the cause in which he is as deeply interested as other men? We may properly demand from him whatever service he can render. The chief defect in organizations of this character has arisen from incorrect ideas of the officers in command. Their discipline has been lax, and in some cases the conduct of their regiments unsatisfactory and discreditable. Controversies unnecessary and injurious to the service have arisen between them and other troops. The organization proposed will reconcile and avoid many of these troubles.

Officers and soldiers will consider the exigencies of the service in this Department, and the absolute necessity of appropriating every element of power to the support of the Government. The prejudices or opinions of men are in nowise involved. The cooperation and active support of all officers and men, and the nomina-

tion of men from the ranks, and from the list of non-commissioned and commissioned officers, are respectfully solicited from the Generals commanding the respective divisions.

By command of Maj.-Gen. BANKS.
RICHARD B. IRWIN, A. A.-General.

With a view of systematizing the enlistment of colored troops, the following order, furnishing rules and regulations on the subject, was issued by the War Department after the return of Gen. Thomas to Washington:

General Orders, No. 143.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, }
WASHINGTON, May 22d, 1863. }

1. A bureau is established in the Adjutant-General's office for the record of all matters relating to the organization of colored troops. An officer will be assigned to the charge of the bureau, with such number of clerks as may be designated by the Adjutant-General.

2. Three or more field officers will be detailed as inspectors, to supervise the organization of colored troops, at such points as may be indicated by the War Department, in the Northern and Western States.

3. Boards will be convened at such posts as may be decided upon by the War Department, to examine applicants for commissions to command colored troops, who, on application to the Adjutant-General, may receive authority to present themselves to the board of examination.

4. No person shall be allowed to recruit for colored troops except specially authorized by the War Department, and no such authority will be given to persons who have not been examined and passed by a board; nor will such authority be given to any one person to raise more than one regiment.

5. The reports of the boards will specify the grade of commission for which each candidate is fit, and authority to recruit will be given in accordance. Commissions will be issued from the Adjutant-General's office when the prescribed number of men is ready for muster into the service.

6. Colored troops may be accepted by companies, to be afterward consolidated in battalions and regiments by the Adjutant-General. Regiments will be numbered *seriatim*, in the order in which they are raised, the numbers to be determined by the Adjutant-General. They will be designated "— Regiment of U. S. Colored Troops."

7. Recruiting stations and depots will be established by the Adjutant-General, as circumstances shall require, and officers will be detailed to muster in and inspect troops.

8. Non-commissioned officers of colored troops may be selected and appointed from the best men of their number, in the usual mode of appointing non-commissioned officers. Meritorious commissioned officers will be entitled to promotion to higher ranks, if they prove themselves equal to it.

9. All personal applications for appointments in the colored regiments, or for information concerning them, must be made to the Chief of the Bureau. All written communications should be addressed to the Chief of the Bureau, to the care of the Adjutant-General.

By order of the Secretary of War.

E. D. TOWNSEND, A. A.-General.

Early in August, Gen. Thomas again left Washington for the Southwest, under instructions from the War Department to continue, within the region previously visited by him, the "organization into the military service of the United States of all able-bodied male persons of African descent, who may come within our lines, or who may be brought in by our troops, or who may have already placed themselves under the protection of the Federal Gov-

ernment." An order issued by him at Vicksburg, on August 18th, developed the adoption of a new policy by the Government, the effect of which would be to very largely increase the number of colored troops in the service, and to make the negro, in a degree, work out his own emancipation. The practice of receiving all negroes who sought the protection of the Government, and allowing them to remain, in many instances, in a state of almost complete inactivity, was thenceforth to be abolished, experience having shown that it was "not only injustice to the service, but to the welfare of the negroes themselves, resulting in habits of idleness, sickness, and disease." Hence the following clause:

In future all able-bodied male negroes of the above class will at once be organized by such officers as may be detailed for that duty, into the military service of the United States, when they will be assigned to regiments composed of persons of African descent now in process of formation or to be formed hereafter.

Suitable provision was also made in other parts of the order for male negroes incapacitated by age or sickness, and for women and children. The enlistment of negroes in the rebel States, or of colored refugees from such States, was attended with little or no difficulty in respect to claims of service or labor from such persons. The owners were, for the most part, enemies, and after the Emancipation Proclamation of the President the question of property was considered definitively settled. When, however, the Government determined to make requisitions upon the colored population of the border slave States, or upon those portions of the seceded States expressly excepted from the operation of the Emancipation Proclamation, it became necessary to adopt some rule of compensation for slaveholders, whose rights might be affected. With this view an order was issued, on Oct. 3d, from the War Department, directing the establishment of recruiting stations in Maryland, Missouri, and Tennessee, and prescribing the method of enlistment. "All able-bodied free negroes, slaves of disloyal persons, and slaves of loyal persons, with the consent of their owners," were declared eligible for military service, and the State and county in which the enlistments were made were to be credited with the recruits thus obtained. Loyal slave owners offering slaves for enlistment were to receive \$300 for each recruit accepted, upon filing a deed of manumission for him, and making satisfactory proof of title. But if within thirty days from the date of opening enlistments, a sufficient number of recruits should not be obtained to meet the exigencies of the service, then enlistments might be made by slaves, without requiring the consent of their owners, the latter to receive the same compensation, and, upon the same terms, provided for owners offering their slaves for enlistment. Special boards were also appointed for each State to determine all claims of owners, and to further the objects of the order.

The number of colored soldiers obtained from the sources above described has been variously stated, but it appears by the report of the bureau of enlistments, created in May, that, by December, over 50,000 men had been organized and were in actual service. Notwithstanding the declarations of Governor Andrew and others, that they would be placed on an equal footing with white troops, in respect to bounty, pay, etc., they have been allowed no bounty from the General Government, and under the construction given by the War Department to the act of 1862, they can only receive the pay of \$10 per month while other soldiers are paid \$13 per month, with clothing and daily rations. As colored men are subject, like white men, to be drafted under the Conscription Act, and no discrimination in color is recognized by the President's call for volunteers in October, this distinction was strongly urged upon the Government as unjust, and the Secretary of War, in his annual report, recommended that their bounties and pay should be made the same as for other troops. "As soldiers of the Union," he added, "fighting under its banner, exposing their lives to uphold the Government, colored troops are entitled to enjoy its justice and beneficence."

The apprehensions entertained in some quarters that negroes would be found unfitted for military service have not been justified by events. Officers competent to judge have concurred in describing them as, for the most part, obedient, patient, orderly, and temperate; apt in learning drill; proud of their occupation, and when well led, gallant soldiers. The habit of implicit obedience acquired during their long subjection to the dominant race in the South has rendered them peculiarly amenable to discipline, and not a few officers who have had experience of colored regiments, have declared their preference to command that class of troops. Some cases of insubordination have, nevertheless, occurred; a notable one being that of the 4th regiment of the Corps d'Afrique garrisoning Fort Jackson, on the Mississippi. But these can be generally traced to the neglect or bad conduct of commanding officers. The Secretary of War cites instances of their efficiency as infantry, artillery, and cavalry soldiers, and the following extract from Gen. Banks's official report of the assault on the fortifications of Port Hudson, on May 27th, illustrates their bravery under trying circumstances:

On the extreme right of our line I posted the 1st and 3d regiments of negro troops. The 1st regiment of Louisiana engineers, composed exclusively of colored men, excepting the officers, was also engaged during the operations of the day. The position occupied by these troops was one of importance, and called for the utmost steadiness and bravery in those to whom it was confided.

It gives me pleasure to report that they answered every expectation. In many respects their conduct was heroic, no troops could be more determined or more daring. They made, during the day, three charges

upon the batteries of the enemy, suffering very heavy losses, and holding their position at nightfall with the other troops on the right of our lines. The highest commendation is bestowed upon them by all the officers in command on the right.

Whatever doubt may have existed heretofore as to the efficiency of organizations of this character, the history of this day proves conclusively to those who were in condition to observe the conduct of these regiments, that the Government will find in this class of troops efficient supporters and defenders. The severe test to which they were subjected, and the determined manner in which they encountered the enemy, leave upon my mind no doubt of their ultimate success. They require only good officers, commands of limited numbers, and careful discipline to make them excellent soldiers.

The following testimony to their general good conduct, both in and off the field, was contributed by Gen. Hunter, while commanding the Department of the South.

HEADQUARTERS DEPARTMENT OF THE SOUTH, HILTON }
HEAD, PORT ROYAL, S. C., May 4th, 1863. }

To his Excellency the Governor of Massachusetts:

I am happy to be able to announce to you my complete and eminent satisfaction with the results of the organization of negro regiments in this Department. In the field, so far as tried, they have proved brave, active, enduring, and energetic, frequently outrunning, by their zeal and familiarity with the Southern country, the restrictions deemed prudent by certain of their officers. They have never disgraced their uniform by pillage or cruelty, but have so conducted themselves, upon the whole, that even our enemies, though more anxious to find fault with these than with any other portion of our troops, have not yet been able to allege against them a single violation of any of the rules of civilized warfare.

These regiments are hardy, generous, temperate, patient, strictly obedient, possessing great natural aptitude for arms, and deeply imbued with that religious sentiment—call it fanaticism, such as like—which made the soldiers of Cromwell invincible. They believe that now is the time appointed by God for their deliverance; and under the heroic incitement of this faith, I believe them capable of showing a courage and persistency of purpose which must in the end extort both victory and admiration.

In this connection, I am also happy to announce to you that the prejudices of certain of our white soldiers and officers against these indispensable allies are rapidly softening or fading out; and that we have now opening before us in this Department, which was the first in the present war to inaugurate the experiment of employing colored troops, large opportunities of putting them to distinguished and profitable use.

The important subject of the treatment of colored soldiers whom the fortunes of war have thrown into the hands of the enemy, will be treated under the head of PRISONERS; also see FREEDMEN.

An important element of usefulness was introduced into the army during the year by the organization, under the direction of the provost-marshal-general, of the invalid corps. Its objects were: 1. To give honorable employment, with suitable compensation, in garrison, hospital, or provost duty, to that numerous class of deserving officers and men who, from wounds received in action, or disease contracted in service, were unfit for further duty in the field; and to bring back, for like purposes, those who had been previously discharged on similar grounds, and were still unfit for active duty and not liable to draft; and, 2. To in-

crease the strength of the armies in the field by relieving able-bodied soldiers now employed in the duties about to be assigned to this new organization. The corps, on November 1st, consisted of 491 commissioned officers, and 17,762 enlisted men, organized as infantry and comprising 203 companies, of which 160 had been formed into 16 regiments. Each regiment contains 6 companies of the 1st battalion, and 4 companies of the 2d battalion, the former only being armed with muskets, and assigned to garrison duty, while the latter are armed with swords and pistols, and are on duty as guards, cooks, nurses, etc. The report of the Secretary of War, presented a month later, estimated the whole number of men in the corps at 22,000. At the close of the year it was in the full performance of the duties for which it was organized, and had rendered efficient service in arresting deserters, beside releasing for active duty a corresponding number of able-bodied men. The officers were selected on the recommendation of the military superiors under whom they had experience in the field, and were assigned to duty without regard to the States from which they were appointed. A similar plan was adopted in assigning the men to companies.

In connection with this subject it may be stated that during the year two boards have been in session—one at Annapolis and the other at Cincinnati—before one of which all officers who have left their commands in consequence of ill health are ordered to appear as soon as they are able to travel. They undergo an examination by the board, and are recommended, according to their condition, for light duty, for further leave of absence, or for medical treatment in a general hospital of the city where the board is in session. But if found fit for duty, the president of the board orders them forthwith to their regiments. The reports of the board are a guide to the adjutant-general in making details for mustering, recruiting, or other light duty, and in recommendations for leave of absence or discharge where the nature of the disability requires. The reports of the boards, taken in connection with regimental reports of absent officers, and the surgeons' certificates from such officers, form a complete system of accountability for absence from duty.

During the 2d session of the 37th Congress, a bill was introduced for the organization of a special ambulance corps, the duties pertaining to which had previously been performed by officers and men detailed from other branches of the service, and not by men enlisted for the purpose. On Feb. 24th, the Senate Military Committee, to whom the matter had been referred, after consultation with army officers and medical directors from all parts of the country, with members of the sanitary commission, and with other competent persons, reported that it was inexpedient to make any change in the system then in operation, which

employed 4,000 ambulances, 10,000 horses, and 10,000 picked men, and had attained a state of great efficiency. In view of the speedy opening of the spring campaign, and the probability of battles being fought, the project to entirely reorganize this department, and to substitute raw recruits for the practised men then attached to it, was deemed too hazardous an experiment, and no further action was taken in the matter. The various corps at present in existence have been organized in compliance with general orders from generals commanding the several departments, and form essentially one system.

A signal corps was organized under an act of the 37th Congress, of which the average number of officers on duty has been about 200. The Secretary of War observes that the full capacity of this branch of the service has not been developed, and different opinions as to its value seem to be entertained by the commanding officers. In combined land and naval operations it has been considered useful, and commanding officers of Western armies have commended it with favor. The continuance of the corps was recommended by the War Department, with proper restrictions upon number of officers, and limiting them to their proper scope of duties.

During the year, 1,755 miles of land and submarine telegraph were constructed under the direction of the military telegraph corps, making the total number of miles of land and submarine military telegraph lines in operation during the year five thousand three hundred and twenty-six. At least 1,200,000 telegrams were sent and received over the military lines in operation during the fiscal year ending June 30th, 1863—being at the rate of about 3,000 per diem. These messages varied in length from ten to one thousand words and upward, and generally were of urgent or important character.

The number of Revolutionary soldiers borne upon the pension rolls had dwindled down to eighteen on the 30th of June, 1863, of whom only ten had made application for their stipends on the 4th of March. The number of widows of Revolutionary soldiers on the rolls at the same period, was 1,573. The whole number of army invalid pensioners on the rolls the 30th of June was 7,248, most of whom were pensioned on account of wounds received or disease contracted in the service during the present war. The widows, orphans, and dependent mothers of 3,573 deceased soldiers of the present war were inscribed upon the rolls during the fiscal year, making the whole number of this class on the rolls at the close of the year, 4,820. The number of army pensioners of all classes, on the rolls on the 30th June was 13,659, drawing pay to the amount of \$1,227,641 per annum.

The expenditures during the fiscal year ending June 30th, for arms and munitions of war, furnished by the Ordnance Department for sea coast and frontier fortifications, and for the

forces in the field, amounted to \$42,313,630. The cannon, small arms, accoutrements, and equipments for men and horses, and ammunition obtained during the same period by purchase and manufacture, were as follows:

1,577 field, siege, and sea-coast cannon, with carriages, caissons, and other implements.
 1,082,841 muskets and rifles for foot soldiers.
 282,389 carbines and pistols for mounted troops.
 1,251,995 cannon balls and shells.
 48,719,862 pounds of lead and lead bullets.
 1,435,046 cartridges for artillery.
 259,022,216 cartridges for small arms.
 347,273,400 percussion caps.
 3,925,369 friction primers.
 5,764,768 pounds of gunpowder.
 919,676 sets of accoutrements for men.
 94,639 sets of equipments for cavalry horses.
 3,281 sets of artillery harness, each set for two horses.

The quantities of the principal articles of ordnance materials in the control of the department at the beginning of the war, the quantities of those articles that have since been procured, and the quantities of those articles on hand on June 30th, 1863, are shown in the following table, viz.:

Articles.	On hand at beginning of the war.	Procured since the war began.
Siege and seacoast artillery....	1,052	1,064
Field artillery.....	231	2,784
Firearms for infantry.....	437,493	1,950,144
Firearms for cavalry.....	31,268	338,124
Sabres.....	16,933	837,555
Cannon balls and shells.....	363,591	2,552,744
Lead and lead bullets, in lbs....	1,301,776	71,776,774
Cartridges for artillery.....	28,247	2,238,746
Cartridges for small arms.....	8,292,300	522,204,816
Percussion caps.....	19,508,000	749,475,000
Friction primers.....	84,425	7,000,000
Gunpowder in lbs.....	1,110,584	13,424,363
Saltpetre, lbs.....	2,923,348	5,231,731
Accoutrements for infantry....	10,930	1,631,300
Accoutrements for cavalry.....	4,329	194,465
Equipments for cavalry horses.	574	266,581
Artillery harness (double).....	586	16,660

Articles.	Issued since the war began.	On hand for issue June 30, 1863.
Siege and seacoast artillery....	2,088	927

From a report furnished to Congress by the Secretary of War, it appears that at the close of the year the following general officers were without commands, equal to a brigade:

MAJOR-GENERALS.

George B. McClellan, relieved Nov. 7, 1862.

John C. Fremont, relieved Aug. 12, 1862.

David Hunter, relieved June 12, 1863; on a tour of inspection through the military district of Mississippi.

E. A. Hitchcock, commissioner for exchange of prisoners; has had no command.

Irvin McDowell, relieved Sept. 6, 1862; president of a Retiring Board since July 12, 1863.

W. S. Rosecrans, relieved Oct. 19, 1863; ordered to Department of Missouri.

D. C. Buell, relieved Oct. 30, 1862.

J. A. McClelland, relieved June 18, 1863.

Lewis Wallace, relieved Nov. 10, 1862; on court martial duty until Nov. 5, 1863.

George Cadwallader, relieved Aug. 16, 1862; commanding post at Philadelphia since July 18, 1863.

E. O. C. Ord, relieved Oct. 28, 1863, for sickness; has since joined his corps.

S. P. Heintzelman, relieved Oct. 13, 1863; president of General Court Martial in Washington.

E. D. Keyes, relieved July, 1863; member of Retiring Board at Wilmington, Del.

A. McDowell McCook, relieved Oct. 9, 1863.

T. L. Crittenden, relieved Oct. 7, 1863.

D. E. Sickles, relieved July 3, 1863; severely wounded.

R. H. Milroy, relieved June 20, 1863.

A. Doubleday, relieved July 1, 1863; wounded; on court martial duty.

R. J. Oglesby, relieved July 27, 1863.

G. L. Hartsuff, relieved Oct. 3, 1863; ordered before the Retiring Board.

BRIGADIER-GENERALS.

Andrew Porter, relieved July, 1862.

T. W. Sherman, relieved May 27, 1863; severely wounded.

W. R. Montgomery, relieved June, 1862; commanding post at Philadelphia until March 11, 1863.

J. B. Ricketts, relieved Nov. 1, 1862; on Military Board to try officers in Washington.

J. S. Wadsworth, relieved July 17, 1863; member of Court of Inquiry.

G. W. Morrell, relieved Feb. 1863; commanding depot for drafted men at Indianapolis.

J. J. Abercrombie, relieved Dec. 9, 1863.

L. P. Graham, relieved Aug. 19, 1862; president of board for examining sick officers at Annapolis.

W. A. Gorman, relieved June 27, 1863.

J. G. Barnard, has had no command; chief engineer of the defences of Washington.

J. P. Hatch, relieved Aug. 30, 1862; wounded at second battle of Bull Run; commanding cavalry depot at St. Louis.

A. Schoepf, relieved Oct. 15, 1862; commanding Fort Delaware.

G. W. Cullum, has had no command; chief of Gen. Halleck's staff.

G. B. Tower, relieved Aug. 31, 1862; severely wounded at the second battle of Bull Run.

L. G. Arnold, relieved May 23, 1863; sick, and ordered before the Retiring Board.

W. S. Ketchum, has had no command; on duty in the War Department.

D. Tyler, relieved June, 1863; commands the district of Delaware.

R. B. Mitchell, relieved Oct. 23, 1863; on General Court Martial at Washington.

E. R. S. Canby, relieved Sept. 10, 1863; on duty in the War Department.

C. Devens, Jr., relieved May 26, 1863, on account of sickness; commanding depot for drafted men in Boston harbor.

Max Weber, relieved Sept. 7, 1862; wounded; on General Court Martial at Washington.

Neal Dow, relieved May 27, 1863; wounded and a prisoner at Richmond, Va.

C. S. Greene, relieved Oct. 29, 1863; badly wounded; on General Court Martial at Washington.

John Gibbon, relieved July 3, 1863; wounded at Gettysburg; commanding depot for drafted men at Philadelphia.

Charles Griffin, relieved Oct. 23, 1863, on account of sickness; on General Court Martial at Washington.

Greene C. Smith, relieved Aug. 28, 1861; member of Congress.

B. S. Roberts, relieved Dec. 2, 1863.

F. C. Barlow, relieved July 4, 1863; wounded at Gettysburg.

Mason Brayman, relieved May 31, 1863; commanding Camp Dennison, Ohio.

N. J. Jackson, relieved April 17, 1863; commanding depot for drafted men at Riker's Island, N. Y. harbor.

F. B. Spinola, relieved July 23, 1863; wounded; on recruiting service at Brooklyn, N. Y.

Solomon Meredith, relieved Oct. 19, 1863; absent on sick certificate.

H. B. Carrington, has had no command; on duty with the governor of Indiana.

William Hays, relieved Sept. 16, 1863; Assistant Provost Marshal-General, Southern Division of New York.

A. K. Slemmer, has had no command; President of Board of Examination of sick officers at Cincinnati.

P. G. Pitcher, has had no command; assistant to Provost Marshal-General at Brattleboro', Vt.

S. A. Meredith, has had no command; agent for exchange of prisoners.

E. W. Heath, relieved March 26, 1863; commanding depot for drafted men at Concord, N. H.

W. W. Orme, relieved Aug. 31, 1863; commanding at Chicago, Ill.

J. T. Copeland, relieved July 14, 1863; commanding depot for drafted men at Pittsburg, Pa.

S. G. Chaplin, has had no command; commanding depot for drafted men at Grand Rapids, Michigan.

T. A. Rowley, relieved July 3, 1863; wounded at Gettysburg; commanding depot for drafted men at Portland, Me.

C. T. Campbell, relieved July 30, 1863; on General Court Martial at Milwaukee, Wisconsin.

H. E. Paine, relieved July 3, 1863; lost a leg at Port Hudson; on General Court Martial at Washington.

G. R. Paul, relieved July 3, 1863; severely wounded at Gettysburg, and nearly blind.

Robert Allen, has had no command; Chief Quartermaster, Department of the West.

D. H. Rucker, has had no command; Chief Depot Quartermaster at Washington.

At the close of the year the several army corps were commanded as follows:

1st. Gen. John Newton.	13th. Gen. E. O. C. Ord.
2d. Gen. W. S. Hancock.	14th. Gen. John M. Palmer.
3d. Gen. W. H. French.	15th. Gen. John A. Logan.
4th. Gen. Gordon Granger.	16th. Gen. S. A. Hurlbut.
5th. Gen. George Sykes.	17th. Gen. J. B. McPherson.
6th. Gen. John Sedgwick.	18th. Gen. B. F. Butler.
7th. Consolidated with others.	19th. Gen. W. B. Franklin.
8th. Gen. H. H. Lockwood.	20th. } Consolidated to form
9th. Gen. A. E. Burnside.	21st. } the 4th.
10th. Gen. Q. A. Gillmore.	22d. Gen. S. P. Heintzelman.
11th. Gen. O. O. Howard.	23d. Gen. G. L. Hartsuff.
12th. Gen. H. W. Slocum.	Cavalry Corps—Gen. George Stoneman.

The military geographical departments, after undergoing several changes in commanders, remained in charge of the following generals:

Department of the Tennessee—Maj.-Gen. W. T. Sherman.
 " of the Cumberland—Maj.-Gen. George H. Thomas.
 " of the Ohio—Maj.-Gen. J. T. Foster.
 " of the East—Maj.-Gen. John A. Dix.
 " of the Gulf—Maj.-Gen. N. P. Banks.
 " of North Carolina and Virginia—Maj.-Gen. B. F. Butler.
 " of the Northwest—Maj.-Gen. John Pope.
 " of Washington—Maj.-Gen. S. P. Heintzelman.
 " of the Monongahela—Maj.-Gen. W. T. H. Brooks.
 " of the Susquehanna—Maj.-Gen. D. N. Couch.
 " of Western Virginia—Brig.-Gen. B. F. Kelly.
 " of New Mexico—Brig.-Gen. J. H. Carleton.
 " of the Pacific—Brig.-Gen. George Wright.
 " of Kansas—Maj.-Gen. James G. Blunt.
 " of the Middle Department—Brig.-Gen. H. H. Lockwood.
 " of the South—Maj.-Gen. Q. A. Gillmore.
 " of Missouri—Maj.-Gen. John M. Schofield.

The three departments of the Tennessee, the Cumberland, and the Ohio, were, in October, formed into the military Division of the Mississippi, of which Maj.-Gen. U. S. Grant assumed the command on the 16th of that month.

ARMY OF THE UNITED STATES.

GENERAL OFFICERS OF THE REGULAR ARMY OF THE UNITED STATES.

*Officers not thus * designated are graduates of the Military Academy.*

CASUALTIES IN THE VOLUNTEER FORCE.

Major-General Edwin V. Sumner, at Syracuse, N. Y., March 21, 1863.

Major-General John F. Reynolds, killed on the first day of the battle of Gettysburg, July 1, 1863.

Major-General Hiram G. Berry, died of wounds received at the battle of Chancellorsville, May 3, 1863.

Major-General John Buford, Dec. 16, 1863.

Brigadier-General Edward N. Kirk, January, 1863, of wounds received at the battle of Murfreesboro'.

Brigadier-General James Cooper, at Camp Chase, Ohio, March 28, 1863.

Brigadier-General Joseph B. Plummer, at Corinth, Miss., May 4, 1863.

Brigadier-General Amiel W. Whipple, May 5, 1863, of wounds received at the battle of Chancellorsville.

Brigadier-General Edmund Kirby, at Washington, June 1, 1863, of wounds received at the battle of Chancellorsville.

Brigadier-General Stephen H. Weed, killed at the battle of Gettysburg, July 2, 1863.

Brigadier-General Samuel Kosciusko Zook, killed at the battle of Gettysburg, July 2, 1863.

Brigadier-General Elon J. Farnsworth, killed at the battle of Gettysburg, July 3, 1863.

Brigadier-General George C. Strong, July 30, 1863, of wounds received at the storming of Fort Wagner, Charleston harbor.

Brigadier-General Benjamin Welch, Jr., at Cincinnati, Aug. 14, 1863.

Brigadier-General William Haines Lytle, killed at the battle of Chickamauga, Sept. 20, 1863.

Brigadier-Gen'l Wm. P. Sanders, at Knoxville, Tenn., Nov. 25, 1863, of wounds received at Campbell's Station.

Brigadier-General Michael Corcoran, Dec. 22, 1863.

ARMY OPERATIONS. Near the close of the year 1862, the battles at Fredericksburg and Murfreesboro were fought. The latter was not ended until the 3d of January, 1863. The armies engaged in these conflicts then ceased active operations. No other important military movement of the Federal or Confederate forces was in progress at that time except that under General Grant against Vicksburg, and the concentration of a force under Gen. Banks at New Orleans. The campaign against Vicksburg really commenced about the 28th of November. At that time, the forces of Gen. Grant were at Lagrange, three miles east of Grand Junction, on the Cairo and New Orleans railroad, with garrisons at Columbus, Humboldt, Trenton, and Jackson, in Tennessee, and Bolivar and Corinth in Mississippi. These forces were designated as the Army of West Tennessee. The Confederate forces were at Coldwater and Holly Springs, about twenty miles distant.

The plan of Gen. Grant was—that Gen. Sherman should take command of the forces at Memphis in Tennessee, and Helena in Arkansas, and descend the river on transports with the gunboat fleet, and make an attack on Vicksburg by the 29th of December, and that Gen. McClernand should take the forces at Cairo and move down to Vicksburg, thus reinforcing Gen. Sherman soon after his attack on the town. Meanwhile Gen. Grant was to advance rapidly upon the Confederate troops in Mississippi north and east of Vicksburg, which formed the main body of their army, and keep them fully employed, and, if they retreated to Vicksburg, arrive there with them, ready to coöperate with Gen. Sherman.

Large reinforcements and supplies were received, and the advance of Gen. Hamilton's corps, on the 28th of November, began to move in the direction of Holly Springs, which was reached on the 29th. By the 1st of December, Gen. Grant's forces had arrived, and were chiefly encamped at Lumpkin's Mills, south of Holly Springs, and seven miles north of the Tallahatchie river. The Confederate force, now under the command of Gen. Pemberton, retired to that river, and finally fell back beyond Granada. Meanwhile Gen. Grant advanced to Oxford, and on the 20th of December an attack was suddenly made in his rear, by a Confederate force under Gen. Van Dorn, on the garrison under Col. Murphy at Holly Springs, which surrendered. The prisoners were paroled, and the supplies collected there for Gen. Grant's army were destroyed; also a large quantity of cotton which had been purchased of the people in the vicinity.

This surrender of Holly Springs is thus noted in the orders of Gen. Grant:

HEADQUARTERS THIRTEENTH ARMY CORPS, DEPARTMENT OF THE TENNESSEE, HOLLY SPRINGS, MISS.,
December 23d, 1862.

* * * * *

It is with pain and mortification that the General commanding reflects upon the disgraceful surrender of this place, with all the valuable stores it contained, on

the 20th inst., and that without any resistance, except by a few men, who form an honorable exception; and this, too, after warning had been given of the advance of the enemy northward the evening previous. With all the cotton, public stores, and substantial buildings about the depôt, it would have been perfectly practicable to have made in a few hours defences sufficient to resist, with a small garrison, all the cavalry force brought against them, until the reinforcements, which the commanding officer was notified were marching to his relief, could have reached him.

The conduct of officers and men in accepting paroles, under the circumstances, is highly reprehensible, and, to say the least, thoughtless. By the terms of the Dix Hill cartel, each party is bound to take care of their prisoners, and to send them to Vicksburg, Miss., or a point on James river, Va., for exchange or parole, unless some other point is mutually agreed upon by the generals commanding the opposing armies. By a refusal to be paroled, the enemy, from his inability to take care of the prisoners, would have been compelled either to have released them unconditionally, or to have abandoned all further aggressive movements for the time being, which would have made their recapture and the discomfiture of the enemy almost certain.

It is gratifying to notice, in contrast with this, the conduct of a portion of the command, conspicuous among whom was the Second Illinois cavalry, who gallantly and successfully resisted being taken prisoners. Their loss was heavy, but the enemy's was much greater. Such conduct as theirs will always insure success.

Had the commandant of the post exercised the usual and ordinary precautions for defence, the garrison was sufficiently strong to have repulsed the enemy, saved our stores from destruction and themselves from capture.

The General commanding is satisfied that a majority of the troops who accepted a parole did so thoughtlessly, and from want of knowledge of the cartel referred to, and that in future they will not be caught in the same way.

By order of Major-General U. S. GRANT.
JNO. A. RAWLINS, Assist. Adjutant-General.

The post was under the command of Col. Murphy, who was surprised and captured with all his force except a small body of cavalry. The enemy estimated the stores destroyed as follows: "1,809,000 fixed cartridges and other ordnance stores, valued at \$1,500,000, including 5,000 rifles and 2,000 revolvers; 100,000 suits of clothing and other quartermaster's stores, valued at \$500,000; 5,000 barrels of flour and other commissary stores, valued at \$500,000; \$1,000,000 worth of medical stores, for which invoices to that amount were exhibited, and 1,000 bales of cotton and \$600,000 worth of sutlers' stores."

On the same day an attack was made at Davis's Mills, a little further north, which was bravely repulsed. Near Jackson, Tennessee, an attack was made by a body of cavalry under Col. Forrest on the 19th. The telegraph wire was cut and the railroad destroyed. On the next day Humboldt was captured and an attack made on Trenton. Other stations on the railroad, as Dyer's, Rutherford, and Keaton, were taken on the same day. The purpose appeared to be to destroy every railroad bridge from Columbus to Corinth, and thus cut off the communications and supplies of Gen. Grant. The consequence of these movements was to make Gen. Grant fall back upon Holly Springs.

This left the Confederate Gen. Pemberton at liberty to concentrate his forces at Vicksburg to resist Gen. Sherman. Thus that part of the plan of the campaign against Vicksburg, which related to the movements of Gen. Grant by land, was unsuccessful. The approach of the wet season of the year, the destruction of the railroads, and the difficulty and delay in making a further advance, caused the forces of Gen. Grant soon to be withdrawn for the purpose of joining Gen. Sherman before Vicksburg.

Meanwhile Gen. William T. Sherman, who had been stationed at Memphis, embarked with one division on the 20th of December, and dropped down to Friar's Point, the place of

rendezvous. On the next day he was joined by Admiral Porter, in his flagship, with the gunboats Marmora, Capt. Getty, and Conestoga, Capt. Selfridge, to act as a convoy. The main body of the naval force was at the mouth of Yazoo river. On the same evening the troops at Helena, making another division, embarked in transports, and came to Friar's Point.

The arrangements were completed by the military and naval commanders during the next forenoon, the 22d, and the fleet got under way, and moved down just below the mouth of White river, where it came to, at sunset. On the next day it descended to Gaines's Landing, and at two P. M. came to anchor, to await the arrival of those transports in the rear, and also a division of troops from Memphis. Half of the town of Gaines's Landing was destroyed by fire while the army was there. Similar destruction had also been made at Friar's Point. These acts led to stringent measures on the part of Gen. Sherman.

On the night of the 24th and the morning of the 25th, the fleet arrived at the mouth of the Yazoo river. The fleet consisted of more than sixty transports, with a number of ironclad and other gunboats, and several mortar boats. The Yazoo is a deep, narrow, and sluggish stream, formed by the Tallahatchie and Yalobusha rivers, which unite in Carroll county, Mississippi. It runs through an alluvial plain of extreme fertility, about 290 miles, and empties into the Mississippi river twelve miles above Vicksburg.

By this time Gen. Grant's communications in his rear had been cut off, and he had been compelled to fall back. The confederate forces in his rear retired toward Vicksburg, where they had already begun to concentrate, both from the east and the west, although these facts were unknown to Gen. Sherman.

It was supposed by the Federal forces that they would now receive the coöperation of Gen. Banks and Admiral Farragut. The former had left New York, near the close of the year, with a considerable military force, for New Orleans, where the latter commanded the naval forces.

On the 26th, the expedition, under convoy of the gunboats, moved up the Yazoo, and the troops were landed at various points from the junction of Old River with the Yazoo to Johnson's Farm, a distance of about three miles, without opposition. The distance from Vicksburg was about eight miles. A strong position, known as Haines's Bluff, some distance above on the river, was held by the Confederate forces, and in the mean while attacked by the gunboats De Kalb, Cincinnati, Louisville, Benton, and Lexington. It was the plan of Gen. Sherman to attack Vicksburg in the rear. For this purpose he was engaged, on the 28th, in getting his forces into position.

The bluffs on which Vicksburg is built take their rise a little below the city, and extend in a direction north of northeast to the Yazoo

river, terminating in Haines's Bluff, a distance of twelve or fifteen miles. They were fortified throughout their entire length. These bluffs front the Mississippi and Yazoo rivers. The ascent is abrupt and precipitous, and the only approach to the city by land from up the river is by climbing their face. In the rear the ground is high and broken, and somewhat rolling. It falls off gradually to the Big Black river.

The line of the Yazoo here is nearly north-east. It is six miles distant from the bluffs at Old river, and passes along their face until, at Haines's Bluff, the river and the bluffs come together. This junction is nine miles from Vicksburg by the road along the foot of the bluffs, and twenty-three miles from the Mississippi by the course of the Yazoo river. On the triangular-shaped bottom land between the bluffs and the Yazoo down to the Old river, the troops were disembarked for the purpose of getting in the rear of Vicksburg and capturing it.

About one third of the distance down the Yazoo from Haines's Bluff, a bayou puts off from the river at nearly right angles, until it approaches the bluffs, when it turns and follows their base until it empties into the Mississippi. It is called the Chickasaw bayou. Between this bayou and the bluffs is a plain, upon which the timber had been felled to form an abatis. The banks of the bayou are quite steep, and about two hundred feet apart. At the base of the bluffs, through their whole length, rifle pits had been dug, in the rear of which, upon the face of the bluffs, single-gun batteries had been planted at short intervals from Vicksburg almost to Haines's Bluff. At various commanding points along the range, both on its face and upon the summit, field works were thrown up for the reception and protection of light artillery whenever it might be needed.

Parallel with, and about half a mile north of the Chickasaw bayou, is a deep slough, having no connection with the river. As it approaches the base of the bluffs, it makes a sharp turn and enters Chickasaw bayou near the point where the latter makes its angle as it strikes the bluffs. In the latter part of its extent it contains but little water; its bottom, however, is a quicksand, which does not afford good footing. The bottom land of the Yazoo is covered with a dense growth of cypress trees: much of it is quite clear and free from undergrowth, while in other parts it is quite thick.

The first troops landed, on the 26th, were a brigade, under Gen. Blair, of Gen. Steele's division, and a brigade from each of the divisions under Gens. M. L. Smith and Morgan. They were ordered to advance two miles into the country, and make a thorough reconnoissance in the direction of the bluffs. The brigade from Gen. Morgan's division found the rebels in force about two miles inland. The other brigades met with no opposition. No conflict took place.

The force of Gen. Sherman was organized in four divisions as follows: First division, three

brigades, under Brig.-Gen. George W. Morgan; second division, three brigades, under Brig.-Gen. Morgan L. Smith; third division, three brigades, under Brig.-Gen. A. J. Smith; fourth division, four brigades, under Brig.-Gen. Frederick Steele. The brigade commanders of this fourth division were Gens. Frank P. Blair, jr., John M. Thayer, C. E. Hovey, and Col. Hassendurpel.

Under the plan of attack, Gen. Steele was to hold the extreme left, Gen. Morgan the left centre, Gen. M. L. Smith the right centre, and Gen. A. J. Smith the extreme right. The division under Gen. Smith, however, not having arrived, Gen. Blair was placed on the right centre. All the divisions were to converge toward the point of attack on the bluffs. The remainder of the division of Gen. Steele was landed on the 27th above the Chickasaw bayou, to operate on that part of the line. The entire day was spent in getting the troops ashore. The bank of the river was overgrown with brush, and the ground was so soft that it was necessary to build roads for moving the wagons and artillery. At night the command had advanced only two miles from the shore.

On the same day, the 27th, the divisions on the centre, including Gen. Blair's brigade, advanced slowly toward the bluffs, in order to give time to Gen. Steele to come into position on the left. A battery of the enemy was found near the point designated for junction with Gen. Steele, not far from the angle of the bayou, and silenced. The night ensuing was cold and frosty, and the troops bivouacked without fires.

On the next day, the 28th, the enemy was driven across the Chickasaw, and night closed with the troops of Gen. Sherman in full possession south of the bayou, with one bridge thrown across, and with two bridges partly constructed. While reconnoitring the ground and directing the movement of some infantry, Gen. M. L. Smith was severely wounded in the hip, and the command of his division devolved upon Gen. David Stuart. Meanwhile, Gen. Steele had pushed forward his command. The slough on his right was deep and impassable, and on the left the ground had become swampy and full of small pools, so as to be also impassable. The only line of approach to the bluffs was along a narrow levee or causeway, which was exposed throughout to the enemy's artillery. Three attempts were made to approach the causeway, but the destruction of the troops was so manifest that they were withdrawn. Gen. Sherman, under this state of affairs, ordered Gen. Steele to return to the river, reëmbark and land on the lower side of the Chickasaw, thus holding still the extreme left, and advance upon its bank until he met Gen. Morgan. It was too late in the evening of the 28th when the troops were fairly on shore below the bayous to move farther. At this time the division of Gen. A. J. Smith came up and took its position on the right of the line. It had remained at Milliken's Bend as a support to a

force sent out under Col. Wright to cut the Shreveport railroad on the west side of the Mississippi opposite Vicksburg.

The situation of the forces at this time was as follows: Gen. Morgan was in position on the south side of the Chickasaw; near its angle, at the base of the bluffs, and on his immediate right, was Gen. Blair's brigade; Gen. M. L. Smith's division, under Gen. Stuart, was on the right centre, and Gen. A. J. Smith was moving up to the extreme right. Gen. Steele was coming up on the left to act as a reserve to Gen. Morgan.

At daylight on the 29th, the Confederate batteries began to fire upon Gen. Morgan's position, and continued it for an hour, although with little effect. With several cessations the cannonade was kept up during the forenoon. Occasionally engagements of infantry, as the opposing regiments came in reach of each other, took place. Several detachments were throwing bridges across the bayou, for the purpose of making an assault on the bluffs. The brigade of Gen. Blair had crossed the bayou before it turned along the bluffs, and was in position at the front of the hill, with a small abatis and a deep ditch between it and the point it designed to assail. On his right, at the point where the bayou makes its angle, was Gen. Morgan. Next to him was Gen. Stuart, and on the extreme right was Gen. A. J. Smith, preparing to throw a bridge across.

No order had been issued by Gen. Sherman appointing an hour for the assault. But by order of Gen. Morgan, Gen. Blair advanced, and Gen. Thayer, of Gen. Steele's brigade, came up for his support. The difficulties of crossing the ditch, and passing the abatis, were such, that the line of Gen. Blair was thrown into some disorder, which, however, it soon recovered, and moved forward upon the Confederate works. The first movement was over a sloping plateau, raked by a direct and enfilading fire from heavy artillery, and swept by a storm

of bullets from the rifle pits. Undauntedly the brigade passed on, and in a few moments drove the enemy from their first range of rifle pits, and took full possession of them. Halting for a moment, the brigade pushed forward and took possession of the second line of rifle pits about two hundred yards distant. The batteries were above this line, and their fire still continued. A prompt and powerful support was necessary to make the attempt to capture them.

Simultaneously with the advance of Gen. Blair, an order was given to Gen. Thayer, of Gen. Steele's division, to go forward with his brigade. He crossed the bayou by the same bridge as Gen. Blair, and, entered the abatis at the same point, and deflecting to the right, came out upon the sloping plateau, about two hundred yards to the right of Gen. Blair, and at the same time. As he reached the rifle pits, with a heavy loss, he perceived that only one regiment, the Fourth Iowa, Col. Williamson, had followed him. After his movement commenced, the second regiment of his brigade had been sent to the right of Gen. Morgan as a support. The other regiments had followed this one. Notice of this change of the march of the second regiment, although sent, had failed to reach Gen. Thayer. With little hope of success, he bravely pushed forward into the second line of rifle pits of the enemy on the right of Gen. Blair. Here, leaving the regiment to hold the position, he hurried back for reinforcements. Meanwhile, Gen. Blair, vainly waiting for support, descended in person to persuade the advance of more troops. He, and Gen. Thayer, both failed in their efforts, and were obliged to order their commands to retire.

While Gen. Blair was urging the advance of more troops, his brigade fought with desperation to win the way to the top of the crest. Some fifty yards above the second line of rifle pits was a cluster of small willows. Thither many of the enemy, driven from the rifle pits, had fled. They were promptly pursued by the Thirteenth Illinois, and driven out by a hand-to-hand contest. They were supported at once by the other regiments of the brigade, but the position was exposed to a hot fire of the enemy's batteries. Meantime, a Confederate infantry force was concentrated to attack them, and after a sharp struggle the latter were forced back to the second line of rifle pits, when Gen. Blair's order to retire was received. The division of Gen. Morgan was not brought over the bayou in time to engage in the assault. The division of Gen. Stuart encountered so much difficulty in constructing their bridges over the bayou, under a hot fire of the enemy, that only one regiment finally crossed over. The bridge was then commanded by a flanking fire of the enemy, which prevented others from crossing. The regiment which had crossed returned after dark. A notice of the intended movement on the left had not been given to the division commanders on the right of Gen. Morgan. The division of Gen. Smith was so near

to Vicksburg, and the strength of the enemy before him so great, that an assault would have been fruitless. Several sharp encounters, however, took place.

The real assault on the left was made by about three thousand men, and the loss was about eight hundred.

As soon as the assault on the left was concluded, Gen. Sherman determined to make another. A brigade, under the command of Gen. Hovey, was advanced to Gen. Blair's position at the mouth of the bayou, which was to assault the hill, supported by Gen. Morgan and the brigades of Gens. Blair and Thayer. The attack, however, was not made during the remainder of the day; and the next morning developed two new batteries of the enemy in position, and a portion of a new line of rifle pits. Firing was, however, kept up by both sides during that day; and on Wednesday, the 31st, a flag of truce was sent in by Gen. Sherman, and the dead were buried.

Afterward, on the 31st, arrangements were made to attack Haines's Bluff, which was supposed to be defended by a small force. The design, as formed between Admiral Porter and Gen. Sherman, was for a combined naval and land assault on the extreme Confederate right, with a view of getting a position on the bluffs, in the expectation that by so doing they would secure the key to the Confederate position, and compel the enemy to withdraw from the entire range of bluffs and form a new line at Vicksburg. It was planned to land the division of Gen. Steele out of range of the guns of the bluffs, and that they should immediately storm and carry the position. At the same time, the gunboats were to make an attack. The troops were made ready to embark at 2 o'clock A. M. of the next day, but a dense fog having settled on the river prevented their departure. The purpose evidently having become known to the enemy, it was finally given up.

The unexpected strength of the position of the enemy being manifest, and the failure of the forces under Gen. Grant to attack in the rear while Gen. Sherman made the attack in front, entirely disconcerted the original plan upon which the movement of Gen. Sherman was made. The loss of his communications by Gen. Grant, and the necessity for him to fall back, prevented this simultaneous attack on the front and rear of Vicksburg, and probably its capture at this time. It was supposed that the first assault under Gen. Sherman might have been successful if properly supported, so far as related to gaining the crest of the bluffs, although it was not thought that his force could have held it. Gen. Sherman, therefore, resolved to withdraw, and on Thursday night and Friday morning, January 2d, the troops were embarked and moved down to the mouth of the Yazoo river. The entire loss suffered in this expedition was 191 killed, 982 wounded, and 756 missing. Among the former was Lieut. Erwin, in command of a gunboat. Gen.

McClelland, who had been ordered to proceed from Cairo, was at the mouth of the Yazoo on the arrival of Gen. Sherman. The former officer then took the command, and ordered the forces to Milliken's Bend, about twelve miles up the river.

On the 4th of January, Gen. Sherman issued the following order :

HEADQUARTERS RIGHT WING ARMY OF TENNESSEE, }
STEAMER FOREST QUEEN, MILLIKEN'S BEND, }
January 4th, 1863. }

Pursuant to the terms of General Order No. 1, made this day by General McClelland, the title of our army ceases to exist, and constitutes in the future the Army of the Mississippi, composed of two "army corps;" one to be commanded by General G. W. Morgan, and the other by myself. In relinquishing the command of the Army of the Tennessee, and restricting my authority to my own corps, I desire to express to all commanders, to soldiers and officers recently operating before Vicksburg, my hearty thanks for the zeal, alacrity, and courage manifested by them on all occasions. We failed in accomplishing one great purpose of our movement—the capture of Vicksburg; but we were part of a whole. Ours was but part of a combined movement in which others were to assist. We were on time; unforeseen contingencies must have delayed the others. We have destroyed the Shreveport road, we have attacked the defences of Vicksburg, and pushed the attack as far as prudence would justify, and having found it too strong for our single column, we have drawn off in good order and good spirits, ready for any new move. A new commander is now here to lead you. He is chosen by the President of the United States, who is charged by the Constitution to maintain and defend it, and he has the undoubted right to select his own agents. I know that all good officers and soldiers will give him the same hearty support and cheerful obedience they have hitherto given me. There are honors enough in reserve for all, and work enough too. Let each do his appropriate part, and our nation must in the end emerge from the dire conflict purified and ennobled by the fires which now test its strength and purity. All officers of the general staff not attached to my person will hereafter report in person and by letter to Major-General McClelland, commanding the Army of the Mississippi, on board the steamer Tigress at our rendezvous at Haines's Landing and at Montgomery Point. By order of

Major-General W. T. SHERMAN.

J. H. HAMMOND, Assistant Adjutant-General.

Subsequently, on the 8th, Gen. Pemberton, who had fallen back from before Gen. Grant, and had taken command at Vicksburg, issued the following address to his troops :

HEADQUARTERS DEPARTMENT OF MISSISSIPPI AND }
LOUISIANA, VICKSBURG, January 8th. }

The Lieut.-General commanding this department of the army desires to express to its troops his high appreciation of their gallant demeanor in the defence of this important position. All praise is due them, not alone for so bravely repulsing the renewed assaults of an enemy vastly superior in numbers, but especially for the cheerful and patient endurance with which they have submitted to the hardships and exposures incident to ten successive days and nights of watchfulness in trenches, rendered imperatively necessary by the close proximity of the opposing armies, while all have performed their duties with benefit to their country and honor to themselves. Still, as must ever be the case in war, fortune has favored unequally those who by her favor held the posts of honor, and by their own resolute courage availed themselves of their opportunity; to them special thanks are due. It will be a proud and agreeable duty of the Lieutenant-General

commanding to claim for them from their country the distinction and honor they so justly deserve.

(Signed)

J. C. PEMBERTON,

Lieutenant-General Commanding.

At the time of the arrival of Gen. McClelland, a plan had been agreed upon between Gen. Sherman and Rear-Admiral Porter to attack Arkansas Post. The reasons for making this attack were that there was time to do it while Gen. Grant was moving his army to Memphis; the blow would be entirely unexpected by the enemy; the Federal forces were amply sufficient to make a victory certain, which would be valuable in restoring the spirit of the troops disheartened by their recent failure, which was not understood in its true light. On the other hand, the Confederate force up the Arkansas river had shown considerable activity by sallies in which they had captured two steamers bearing supplies to the army below.

Gen. McClelland approving of the enterprise, the forces moved up the Mississippi to Montgomery Point, opposite the mouth of White river.

White river, one of the principal streams in Arkansas, rises a few miles east of Fayetteville, and flows in a northeasterly direction into Missouri about one hundred miles. It then returns into Arkansas, and pursues a southeasterly course, and enters the Mississippi about fifteen miles above the mouth of the Arkansas. It is navigable by steamboats three hundred and fifty miles.

On Friday, Jan. 9th, the ironclads Louisville, De Kalb, and Cincinnati, with all the light-draft gunboats, moved up the White river, followed by the fleet of transports. After ascending the White river about fifteen miles, the fleet passed through a cut-off to the left, eight miles in length, into the Arkansas river. Thus the White river empties by one channel into the Mississippi, and by another into the Arkansas, when it has a higher stage of water than the Arkansas. When the Arkansas is higher than the White river, one of the Arkansas currents comes through the cut-off and out by the White river into the Mississippi.

It was about 11 o'clock A. M. when the fleet passed into the Arkansas. This is, next to the Missouri, the longest affluent of the Mississippi river. It rises near the Rocky mountains, and flows through nearly the centre of the State of Arkansas, exceeding two thousand miles in length, and navigable, during nine months of the year, about eight hundred miles from its mouth.

About half past four in the afternoon, the fleet moved to the shore, and preparations were made to land three miles below the fort. The artillery and wagons were brought on shore during the evening and night, and in the morning the troops were landed and marshalled in the fields bordering on the north bank. The attack, however, was begun by the gunboats.

The Arkansas river, in its descent toward the Mississippi, makes here a sharp elbow by flowing north, then turning abruptly to the east, and after a short distance turning again as abruptly to the south. On the left bank, at the point where the river turns to the east, the fort of Arkansas Post was located. Its guns commanded the river as it stretched to the east, and even after the turn to the south.

The advance of the troops was along the outside bank of this curve of the river, and it was expected the attack on the fort would be made during the day, but at sundown they were not in position. The division of Gen. Stuart, by order of Gen. Sherman, had moved along the bank, passing two rows of rifle pits which had been abandoned, and reached the point for an attack, but the corps of Gen. Morgan had not then deployed on the left. Orders were then issued by Gen. McClelland for the troops to get into position during the night, so as to make an attack in the morning. The force of Gen. Sherman worked its way through the forest and marsh round to the right, so as to invest the fort, while a brigade was thrown across the river to prevent the arrival down of reinforcements to the rebels.

The fort, which was called "Fort Hindman," was a regular square bastioned work, one hundred yards each exterior side, with a deep ditch about fifteen feet wide, and a parapet eighteen feet high. It was armed with twelve guns, two of which were eight inch and one nine inch. The number of troops which it contained was about five thousand, under the command of Brig.-Gen. Churchill.

During the evening of the 10th, the fort was bombarded by the ironclads Cincinnati, Lieut.-Commander Geo. L. Bache; De Kalb, Lieut.-Com. John H. Walker, Louisville, Lieut.-Com. R. L. Owen, all under the orders of Rear-Admiral Porter. The bombardment continued over a half hour, and the firing was active on both sides. The distance of the boats from the fort was about four hundred yards.

About noon on the 11th, the fleet was notified, by order of Gen. McClelland, that the army was ready, and a joint attack was made. The gunboats took a position within about three hundred yards of the fort and opened fire. The fort had opened upon them as soon as they came in sight. At the same time a battery of Gen. Sherman's began to fire, and the troops were advanced to attack. It was not long before the heavy guns of the fort were silenced by the gunboats, but the action on the part of the military grew more severe until four o'clock, when the enemy were so far overcome as to raise the white flag. A rush was immediately made, both by the land troops and naval force, to occupy the works, and the surrender was made complete. The loss of Gen. McClelland was about six hundred, of whom one hundred and twenty were killed. The Confederate loss was less, owing to the shelter of their troops. About sixty-five were

killed and eighty-three wounded. The ironclads were struck by many balls. A shot passed through a porthole of the De Kalb and exploded, killing two and wounding fifteen. Two shells entered portholes of the Louisville and exploded, killing one and wounding ten, two mortally. The other boats which were engaged escaped without serious injury. Seven thousand prisoners, eight thousand stand of arms, twenty cannon, and a large amount of ordnance and commissary stores were captured.

On the 15th, an expedition in light-draft steamers, under the command of Gen. Gorman and Lieut.-Com. J. G. Walker, proceeded up the White river and captured the towns of Des Arc and Duval's Bluff. The former is situated in Prairie county, Arkansas, and was once a thriving commercial town. It is situated on the White river, and is about fifty miles north east of Little Rock, the capital of the State. Duval's Bluff, a little below Des Arc on the White river, was the station of a Confederate camp, and an earthwork fort. It is an elevated position. The expedition returned to Napoleon on the 19th. Some prisoners and a few guns were captured by the expedition. St. Charles, a village on the Arkansas river, a short distance above Arkansas Post, was also captured by a force sent by Gen. McClernand.

The next two days after the engagement at Fort Hindman were devoted to the care of the wounded and the burial of the dead. On Thursday, the 15th, the corps of Gen. Sherman, which had embarked during the previous night, proceeded down the Arkansas river to Napoleon, at its mouth. The rifle pits were levelled, the fort completely blown up and destroyed, and a hundred wagons which had been captured were burned. On the 18th, Gen. McClernand embarked with the remainder of the troops and arrived at Napoleon.

Meanwhile Gen. Grant, leaving Memphis in a swift steamer, met Admiral Porter at the cut-off up the White river, on the 18th, and thence proceeded to Napoleon, where future movements were arranged in consultations with Gens. McClernand, Sherman, and others. On the same day he returned to Memphis.

Orders were immediately issued by Gen. McClernand to move down the river, and at eight o'clock on the next morning, the 19th, the signal for departure was given. Shortly afterward all the transports were on the way. A severe storm prevailed, and the fleet came to at the foot of Ozark Island until it had partially subsided. It then moved to Chicot's Bend, where the principal portion were moored for the night. On the next day, the fleet moved down to Milesia, and by two o'clock of the following day, the 21st, it arrived at Young's Point, its place of destination. A small force was immediately landed, to reconnoitre the country.

Young's Point is on the western side of the

Mississippi river, about nine miles above Vicksburg, and nearly opposite the mouth of the Yazoo river.

On the 22d, the troops were landed and posted a little farther down the river, so as to defend the line of a canal which had been commenced a year previous, across the peninsula formed by a curve of the river, first to the north and then to the south. The purpose of this canal had been to afford a passage for the transports up or down the river, beyond the reach of the batteries at Vicksburg. A little below the extreme point of the peninsula, and on the opposite side of the Mississippi, is Vicksburg.

Meantime the army of Gen. Grant was moved to Memphis, thence to be transported to Young's Point. On the 20th, Gen. McArthur left Memphis, on fourteen transports, with his corps. He had been preceded by other bodies of troops, making at that time one hundred and twenty-five transports with troops and stores which had left. The forces of Gen. Grant consisted of the veteran soldiers of the West. The naval force was also greatly increased by the addition of several ironclads, as the Chillicothe, Indianola, Lafayette, Eastport, and a number of other gunboats.

On the 2d of February, Gen. Grant arrived at Young's Point and assumed the command. The divisions of the Army of Tennessee had also reached there, excepting the one commanded by Gen. Logan, and excepting the troops occupying the posts in Tennessee.

The attack on Vicksburg, from up the river, had demonstrated the strength of its defensive works on the north, and convinced Gen. Grant that they were too strong to be carried without a very heavy loss. The first step for him to accomplish, therefore, was the transportation of his army below the city, in order to make an attack from the south. The passage by the river was too hazardous to be attempted. The formidable batteries on the river front at Vicksburg were capable of destroying all the transports. Work was therefore recommenced on the canal across the peninsula, on the western side of the river, which had been located by Brig.-Gen. Williams at the first attempt to capture the city. This canal had been improperly located, its upper terminus being in an eddy, and the lower terminus being exposed to the enemy's guns; nevertheless it was thought that it would be completed sooner than a new one could be constructed. While this work was in progress, the river continued to rise rapidly, and great labor was required to keep the water out of the canal, and also out of the camps of the laborers and soldiers. In addition, the rain was incessant, and the magnitude of the work was, from these causes, greatly increased. The earth taken out of the excavation was placed on the west side, and thus formed an embankment or levee, which it was supposed would prevent the water from flooding the country on that

side, and the ground on which nearly all of the army was encamped. As the canal cut the peninsula at right angles, the troops were encamped west of it and behind this embankment. On the 8th of March, when the enterprise promised success within a short time, the dam across the mouth of the canal gave way, owing to a rapid rise of the river and the great pressure of the water. When it broke there was a difference of eight feet between the bottom of the canal and the surface of the water in the river. The violence of the torrent as it rushed through swept away all the implements of labor, and the canal was full in a few minutes. The embankment had not been completed, and the water soon began to pour over. A spectator thus describes the scene: "Some regiments that were in exposed positions had to gather up tents and camp equipage in hot haste and confusion and run for the levee. Several companies on the lower side of the peninsula were cut off and had to be ferried to the main body of the army. The embankment of the Vicksburg and Shreveport railroad, which cut the peninsula longitudinally, prevented the water from flooding the northwest quarter. But that was considered insecure; the troops were all ordered to move their quarters to the levee."

Some delay was caused by the efforts to repair the damages, but it soon became manifest that, with the existing high stage of the water, some other plan would have to be adopted to get below Vicksburg with the transports.

At the commencement of the work on the canal, Gen. Grant, having more troops than could be employed at Young's Point to advantage, caused a channel to be cut from the Mississippi into Lake Providence on the west side of the Mississippi, and another into Coldwater river by the way of the Yazoo Pass, on the east side of the Mississippi. From the former of these routes no great expectations were entertained by Gen. Grant. He thought possible, however, that a route might be opened there through which transports might pass into the Mississippi, and enable him to coöperate with Gen. Banks below. By the Yazoo Pass he expected to get into the Yazoo by way of the Coldwater and Tallahatchie rivers, with some light gunboats and a few troops, and destroy some Confederate transports in that stream and some gunboats on the stocks. With such views the work on these channels was commenced.

While these operations were pushed forward, other measures for the annoyance of the enemy were also taken. A steamer called the "City of Vicksburg" was daily noticed lying under the batteries of the city, and it was known that farther down the river there was a number of transports rendering great service to the Confederate authorities by bringing supplies to their troops at Vicksburg and at Port Hudson, another strong position below. A movement was planned to destroy these means of transportation. Orders were therefore given to

Col. Charles E. Ellet to prepare the ram steamer *Queen of the West* for running down below the batteries. This steamer was a wooden freight vessel, strengthened so as to carry a prow of iron. To protect her machinery from injury by the shot and shells of the batteries at Vicksburg, three hundred bales of cotton were placed about it, and her steering wheel was removed and placed behind the bulwarks of her bow. Her armament consisted of a large 30-pounder rifled Parrott gun on her main deck as a bow gun, one 20-pounder, and three 12-pounder brass howitzers on her gun deck. Besides these she had fifty or sixty rifles, carbines, cutlasses, pistols, &c. Her crew consisted of a first, second, and third master, two pilots, three engineers, blacksmiths, carpenters, and deck hands; also a squad of twenty-six soldiers. It was planned that she should start before daybreak on the morning of the 2d of February. At the appointed time the steamer was under way, but her steering apparatus in its new position controlled her movements so poorly that it was necessary to replace it in its original position. This was important, as the destruction of the City of Vicksburg would depend in part upon the accuracy of the blow of the *Queen of the West*. The detention which ensued prevented her from passing round the point of the peninsula into view from the Confederate batteries until sunrise, when she was instantly greeted by a shell that passed between her smoke chimneys and struck the water about three hundred yards behind her. After the sound of the first shot broke the stillness of the morning, the Confederate artillerists sprang to their pieces, and a hundred guns were fired with a wonderful celerity. Only three or four shots had struck her before she reached the front of the city. The first object now to be accomplished was the destruction of the steamer *City of Vicksburg*, which was made fast to the bank about the centre of the bend of the river, where the current ran very rapidly. To strike an unerring blow it was necessary for the *Queen of the West* to round to amid the storm of balls and shells, and move directly across the river against her victim. As she approached the steamboat and the city, the enemy, thinking that she had been disabled, and that her commander had concluded to surrender, raised enthusiastic cheers, which ceased as the ram struck the steamer. The wide guards of the Vicksburg, overlapping the deck of the *Queen*, even to the barricade of cotton bales, received the force of the blow and prevented the prow of the ram from reaching her hull. At the same time the current caught the stern of the *Queen* and swung her round side by side with the Vicksburg. This action of the current had been anticipated by Col. Ellet, and the starboard bow gun had been loaded with incendiary shells. It was now fired into the Vicksburg. At the same time the shells from the batteries had set on fire the cotton on the

Queen, and it was evident that to repeat the blow would involve the loss of the steamer. The effort was then made to turn her head out toward the stream, which, owing to the action of the wind and current, was, after some delay, accomplished. She then proceeded down the stream with all hands at work to extinguish the fire. Meantime the discharge from the batteries became quick and incessant, and she now received most of the dozen shots which hit her from the artillery and the sharpshooters on the shore. No material injury, however, was done, and she anchored below the outlet of the canal until one o'clock P. M., when she proceeded down the river.

On this expedition, down the river, her officers captured, below Natchez, and burned three small steamers, the Moro, Berwick Bay, and A. W. Baker; one of them was laden with pork, and another with molasses and sugar. She ran fifteen miles up the Red river, and returned on the fifth for a supply of coal. During the night a flatboat loaded with coal was cast loose in the stream, and passing the batteries safely, floated down to the steamer.

On the night of the 10th of February, this steamer started on another expedition down the Mississippi. The first object of the expedition was to capture Confederate steamers. It was also proposed to run up the Big Black river, which empties into the Mississippi at Grand Gulf, to visit the Atchafalaya, and perhaps the Red river, and, if practicable, to pass the batteries at Port Hudson, and effect a junction with the fleet below under Com. Farragut. A tender was provided for the Queen of the West in the steamer De Soto, a small ferry boat once running between De Soto, the termination of the Vicksburg, Shreveport and Texas railroad, across to Vicksburg. The batteries at Warrenton, eight miles below, were passed without molestation. At Taylor's Point, above Natchez, at the plantation once owned the late President Taylor, a short stop was made. It was found to be occupied by friendly owners. Natchez was next passed, and on Wednesday evening the steamer reached the mouth of Old river, into which Red river runs. This was the channel of the Mississippi before the cut-off was formed. The Red river extends from the northern side of Old river, first northwesterly, and then nearly west, across the State of Louisiana, into Texas. At high water it is navigable to Paris, nine hundred and sixty miles from New Orleans.

Passing the night at anchor at the mouth of Old river, on the next morning, the 12th, leaving the De Soto as a guard near the mouth of Old river, the Queen of the West entered the Atchafalaya, which flows north and empties into Red river just above its junction with Old river. A train of eleven army wagons was captured about five miles up the river, and at Semmes's port, ten miles farther up, seventy five barrels of beef and a mail with despatches was taken, but a Confederate steamer at that

place had escaped. Returning down the river near dark, the steamer was fired on at the point where the wagons had been captured, and the first master mortally wounded. A landing was not made, but the steamer returned to the anchorage of the previous night. On the next morning Col. Ellet, having been informed of the parties who fired on the boat, returned and destroyed the dwellings, mills, and negro quarters on six sugar plantations above the mouth of the Atchafalaya. During the afternoon the steamers entered the Red river, and moved up as far as the mouth of Black river, at dark, where they anchored for the night. The Black river, formed by the junction of the Washita and Tensas rivers, flows south and empties into the Red river, a short distance above the mouth of the Atchafalaya. At daylight on the next morning they were under way up the river. About ten o'clock, the Era, No. 5, a steamer of one hundred tons, was discovered approaching. At the same time she discovered the Queen, and attempted to turn for the purpose of escaping, when a shot from the former demolished her wheelhouse, and her officers surrendered. Fourteen Texan soldiers and a number of citizens were found on board. The former were paroled and the latter dismissed, except a quartermaster, having \$28,000 in Confederate funds, and two lieutenants. The boat was loaded with 4,500 bushels of corn in the ear, destined for the Confederate forces at Little Rock. Nothing further of importance was discovered during the passage of the next twenty miles up the river. In fact the stream is so crooked in some parts, that a distance of two miles across the land would strike a point to reach which a steamer would be obliged to go twenty miles. Thus information was easily sent of the approach of hostile vessels. Some twenty miles farther up was located Fort Taylor, a post which was supposed to be manned by about one hundred and fifty men, with two or three guns. It was situated on the south bank of the river, just above a bend which its guns commanded, that was made by an abrupt turn of the river to the north. From the point opposite this bend a long bar projected, on which the water is shallow, and it is necessary to "hug" the south shore to avoid being driven on the bar by a strong eddy.

The Era had been left with the three prisoners under a guard about twenty miles below. It was about nightfall as the Queen approached the bend of the river, with the De Soto a considerable distance astern. The pilot of the captured Era had been forced to assist at the wheel, owing to the intricacies of the channel. Upon turning the point, the Queen struck upon the bar and became fast aground in a position in which none of her guns were effective. The guns of the fort immediately opened upon her with fearful accuracy and rapidity. The shot and shell struck all about her. The lever of the engine was shot away, the escape pipe

broken, and the immediate roar of steam that enveloped the vessel showed that her steam chest had been penetrated. Every thought of saving the steamer was given up, and the exertions of all were made to save themselves. Many threw bales of cotton overboard and floated on them down to the De Soto a mile below, among whom was Col. Ellet. The fort seeing there was no reply to their guns, and conceiving from the rush of steam that something had happened, slackened their fire and sent boats to reconnoitre. By this force the remainder of the crew were captured, and the boat made a prize.

Meanwhile the De Soto approached as near the point as was safe, and picked up those who were floating, and sent a boat for the crew, which was almost captured by the enemy, who had already reached the Queen. Finding that soldiers were collecting on the shore, the De Soto was turned and slowly floated down the stream. Three miles below she ran aground and unshipped her rudder, and for the next fifteen miles and during three hours she was unmanageable, and moved with the current. As she reached the Era at eleven o'clock, a second rudder was unshipped, and she became unmanageable again, when Col. Ellet ordered her to be blown up.

It was about twelve o'clock at night before the Era was under way. It was known to Col. Ellet that the swift gunboat Webb was at Alexandria, about sixty miles up the river, and he was confident that pursuit would be made after him by her. All hands were set to work to throw overboard the corn with which the Era was laden, and amid fog, thunder, lightning and rain, she worried her way out of the Red river into the Mississippi by morning. All that day, which was Sunday, with no fuel but some of the corn with which she had been laden, and cypress found on the banks too wet to make steam enough to give her headway, the fleeing steamer attempted to get up the river. She had made scarcely forty miles in twenty-four hours. At Union Point she was run aground and detained three hours in getting off. After passing Ellis's Cliffs, the black chimney of a passing steamer was discovered over the fog which enveloped her hull. The black smoke from her chimney showed that she burned coal, and that it was a Federal steamer. It was the Indianola, and all fear of the Webb was over. Scarcely was the Era well alongside of the Indianola and the fog had lifted a little, when the Webb hove in sight. A brief pursuit of her was made by the two boats, without success. The Era was then furnished with supplies, and sent up to Admiral Porter.

The Indianola, which came so fortunately to the rescue of Col. Ellet, was one of the finest of the ironclad gunboats of the squadron: she was new, and was 174 feet long, 50 feet beam, 10 feet from the top of her deck to the bottom of her keel, or 8 feet 4 inches in the clear. Her sides (of wood) for five feet down were thirty-

two inches thick, having bevelled sticks laid outside the hull (proper), and all of oak. Outside of this was three-inch thick plate iron. Her clamps and keelsons were as heavy as the largest ships. Her deck was eight inches solid, with one-inch iron plate, all well bolted. Her casemate stood at an incline of $26\frac{1}{2}$ degrees, and was covered with three-inch iron, as were also her ports. She had a heavy grating on top of the casemate that no shell could penetrate, and every scuttle and hatch was equally well covered. She was ironed all round, except some temporary rooms on deck, and, besides the amount of wood and iron already stated, had coal bunkers seven feet thick alongside of her boilers, the entire machinery being in the hold. She had seven engines—two for working her side wheels, two for her propellers, two for her capstans, and one for supplying water and working the bilge and fire pumps. She had five large five-flued boilers, and made abundance of steam. Her forward casemate had two 11-inch Dahlgren guns, and her after casemate two 9-inch. Her forward casemate was pierced for two guns in front, one on each side, and two aft, so that she could fire two guns forward, one on each side, and four at an angle sideways and astern. She had also hose for throwing scalding water from the boilers, that would reach from stem to stern, and there was communication from the casemates to all parts of the vessel without the least exposure. The pilot house was also thoroughly ironclad, and instant communication could be had with the gunners and engineers, enabling the pilot to place the vessel in just such position as might be required for effective action. She left her anchorage at the mouth of the Yazoo, about ten o'clock on the night of February 13th, to run below the batteries at Vicksburg. The night was hazy and cloudy, and thus exceedingly dark. After passing entirely through the fleet, and reaching the vicinity of the upper end of the canal, she shut off steam entirely, and suffered the current to bear her along. Its rate was about four miles an hour. In perfect obscurity she rounded the point, and drifted fairly beneath the formidable batteries. The tide bore her down directly toward the levee of the city. Lights were everywhere numerous, and the voices of citizens and soldiers sounded as if they were close alongside. Still the black and noiseless mass drifted along, almost rubbing the bank, yet undiscovered. The whole levee was patrolled by sentinels, and at one spot a camp fire was dimly burning. As the drifting vessel approached this point, a soldier stooping down gathered some faggots and threw them into the fire. A bright blaze flashed up for a moment, exposing everything within its sphere. The Indianola was seen by a soldier, who discharged his musket at her. At that discharge the soldiers everywhere along the bluff sprang to arms. A battery near the centre of the city fired a gun, rockets were sent off, soldiers on the bank discharged their mus-

kets into the darkness, and indications of excitement were manifest everywhere. The boat had been discovered running the blockade, but no one knew where she was. Five minutes passed after the first gun was fired, and another had not followed. At last it became necessary to start the wheels in order to get steerage way on the steamer. The noise of the steam drew forth a second and third gun, and a discharge of musketry, and again all was still. The boat drifted on a few moments in silence, when the steam was again let on, and she dashed down the river, regardless of any noise that might be made. Battery after battery now opened upon her until twenty shots were fired, and she had passed uninjured beyond their reach. The steamer was under the command of Lieut.-Com. Brown, and continued on down the river, until she met the *Era* as above stated. After pursuing the *Webb*, in vain, as far as the mouth of Red river, the *Indianola* proceeded up that stream in search of Confederate transports, and kept up a watch off the mouth of the Atchafalaya river. Here her commander learned that the *Queen of the West* had been repaired and might soon be down. As the narrowness of the Red river made it difficult to manœuvre a long boat like the *Indianola*, while the *Queen* was much shorter, Commander Brown determined to return to the mouth of the Big Black river, and attempt to pass up that stream, and reach if possible the bridge of the Vicksburg and Jackson railroad. This had been one of the objects for which the steamers had run the blockade. The Big Black river empties into the Mississippi at Grand Gulf, forty miles below Vicksburg. It rises in the northern part of the State of Mississippi, and flows south-westerly, passing about fifteen miles east of Vicksburg.

On Tuesday morning, Feb. 24th, the *Indianola* reached the mouth of the Big Black, and in the afternoon made preparations to move up the river, when two steamers were descried approaching. These proved to be the Confederate gunboat *Webb* and the *Queen of the West*. The *Webb* was a powerful boat and one of the swiftest on the river. They immediately attacked the *Indianola*, and, chiefly by striking her with their rams, so shattered her as to endanger her sinking, when she was surrendered and immediately run ashore.

A few days afterward a flatboat was fitted up by Admiral Porter to appear like a gunboat, and set adrift in the river without a pilot or crew. As it passed the batteries at Vicksburg, it was supposed to be a formidable ram, and they fired fiercely. It escaped uninjured however, and floated on down the river. Information of its approach was sent to the *Queen of the West*, lying under the batteries at Warrenton, eight miles below Vicksburg, and she immediately fled down stream. The *Indianola* was undergoing repairs near where she was taken, and the authorities at Vicksburg, thinking that she would be recaptured by the ram,

issued an order to burn her up. This order was sent down by a courier to the officer in charge of the boat. A few hours later, and another order was sent down countermanding the first, it having been ascertained that the monstrous craft was nothing else than a coal-boat. But before it reached the *Indianola* she had been blown to atoms: not even a gun was saved.

Meanwhile, the work of cutting channels from the Mississippi to Providence Lake, on the west side, and to Moon Lake, on the east side, was progressing rapidly.

Lake Providence is a few miles south of the boundary line between Arkansas and Louisiana. It is situated in Carroll parish, Louisiana, about one mile west of the Mississippi river, and about seventy-five miles above Vicksburg. It is about six miles in length. Two streams flow out of the lake to the south, Moon bayou and Tensas river. The former, after running about a hundred miles, unites with the latter. The two continue south, and unite with the Washita, and are called after the junction Black river, which empties into the Red river, as is stated on a preceding page. By cutting a channel from the Mississippi to Lake Providence, Gen. Grant thought a communication might be had through that lake down the Tensas and Black into the Red river, and thence through the Atchafalaya, with Gen. Banks at New Orleans. This route avoided the batteries at Vicksburg and Port Hudson. The canal to the lake was finished so as to let in the water on the 16th of March. The flood was so great as to inundate a large district of country, some of which was fine land for growing cotton. Some boats passed into Lake Providence, but the uncertainty of the channel of the Tensas river, and the interest which was now excited by the Yazoo Pass expedition, together with the unimportant results to be anticipated by removing a large force to the Red river or below, caused a diversion from this route to others presenting more certain prospects of success against Vicksburg.

Eight miles below Helena, in Arkansas, and on the opposite side of the river, is a little lake, known as Moon Lake. The passage from the Mississippi across the lake to the mouth of the Yazoo Pass is about eight miles; thence through the Pass proper to the Coldwater river, twelve miles. The Coldwater, a narrow stream, runs south, empties into the Tallahatchie, which continues to flow south, and unites with the Yallobusha, forming the Yazoo river, which empties into the Mississippi, a few miles above Vicksburg. By opening a wider channel from the Mississippi into Moon Lake, it was the opinion that the inner streams would be rendered more easily navigable, in consequence of an increase of water, so that some smaller gunboats and a few troops could destroy the enemy's transports in the Yazoo, and their gunboats which were building. In ordinary stages of water, steamboats could ascend the

Yazoo and Tallahatchie to the mouth of the Coldwater. The region of country through which these streams flow, especially the Yazoo, is very fertile, producing a large quantity of cotton, and furnishing considerable supplies to the rebel army at Vicksburg.

The expedition consisted of two of the largest and heaviest ironclad gunboats, one ram, six light-draft gunboats, three barges laden with coal, three steam tenders, and fifteen or eighteen transports. The passage from the Mississippi to the mouth of the Pass, after the im-

crooked passage it was necessary to resist the force of the current by the back revolution of the wheels of the boats, and by lines fastened from tree to tree as they moved along. Three days were thus passed in making a distance of about twelve miles, and reaching the Coldwater. Smokestacks were swept away, and much of the light upper works of several of the boats. The principal difficulty in the Pass arose from the activity of the enemy, who would close one end while the Federal force was opening the other. In this manner time was gained to prepare to resist the progress of the expedition by fortifying at the mouth of the Tallahatchie.

On the 2d of April the expedition proceeded down the Coldwater. This stream was a little wider than the Pass, so that the branches of the trees seldom met over head, but its current was more sluggish, and its channel equally tortuous. Two mortar boats now joined the expedition, adding their force to the heavy guns on the other boats. As it advanced it was further reënforced, until it consisted of eighteen transports, five small gunboats, and two of a large size, the Chillicothe and the De Kalb. The advance consisted of one division of Gen. McClernand's corps, which had been stationed at Helena, under command of Brig.-Gen. L. F. Ross, and the 12th and 17th Missouri regiments from Gen. Sherman's corps, as sharpshooters, on the gunboats. The mouth of the Coldwater was reached with only some damage to the light work, wheels, and rudders of the transports.

Proceeding down the Tallahatchie, the expedition arrived within ten miles of Greenwood on the 11th. Greenwood is a small village on the Yazoo river, just below the junction of the Tallahatchie with the Yallobusha, forming the Yazoo. Just below the position of the Federal transports, the Tallahatchie turns to the eastward, bending in the form of a horseshoe, and resumes its southerly course at a point nearly south of that where the transports were. The base of the peninsula formed by this bend, being the narrowest part, and nearly a mile across, was occupied by a Confederate fortification. It consisted of a single line of breastworks facing westerly, and composed of cotton bales and earth, and flanked on the right by a battery of three heavy guns fronting the river. Other field pieces were in position on the works. On the right flank of the line, a defence or raft of logs had been constructed, to serve as a blockade of the river. Directly in front of the breastworks was a deep slough, extending across the peninsula, and admirably serving the purpose of a ditch. The slough was close to the base of the works at the upper end, but gradually receded from them at the lower, where it was several hundred yards distant. Beyond the slough there was an almost impenetrable canebrake, backed by an extensive forest. Below this fortification on the river, and in the arc of the bend, the Yallobusha flows in from the northeast, and forms its junction with the Tal-

provement made upon it, was not attended with much difficulty. On the morning of the 25th of March it entered the mouth of the Pass. The tortuous stream was a hundred feet wide, and in some parts less. On its banks were cypress, sycamore, and gigantic cottonwood trees, whose branches formed a perfect arch over the stream. At the upper end the current rushed with great rapidity through the channel, and lower down were strips of bottom land, which were overflowed, and gave to it greater width, and, consequently, less rapidity. In the narrow and

lahatchie. The village of Greenwood is upon the Yazoo, four miles below. The object of the fortification at this location was not only to stop the fleet from passing below, but also to prevent its passing up the Yallobusha river, on which a number of the enemy's steamers had sought refuge, and on the bank of which also was the important town of Granada.

The Confederate force was estimated above five thousand men, under the command of Gen. Tilghman, who surrendered Fort Henry, in Kentucky. On the morning of the 11th a reconnaissance was made by the gunboat Chillicothe, Lieut.-Commander Foster. The boat approached within a short distance of the fortification, and fired several shots, and was hit four times in return by heavy shot from rifle pieces. At the same time detachments from the Forty-sixth and Forty-seventh Indiana regiments were sent out to feel the Confederate position on the land side. A considerable body of the enemy's skirmishers were encountered, who were driven across the slough and into the works, when the detachments were withdrawn. In the afternoon the Chillicothe was ordered to engage the fortification. After she had fired seven rounds, a 64-pound shell from the enemy passed through a half-open port, striking upon the muzzle of a gun, in which a shell had just been placed preparatory to cutting the fuse. Both shells exploded at once, by which three men were killed and eleven wounded. At this time orders were received to withdraw from the engagement. During the ensuing night a force was sent to throw up a battery facing the enemy's works, west of the slough, and in the edge of the timber. A single 30-pound Parrott gun was mounted, and the work concealed by brush from the view of the enemy. Subsequently another gun was mounted. No attack was made on the 12th, in consequence of the absence of the mortar boats. After some delay, on the 13th, the engagement was commenced about half past ten A. M. by the land batteries. The gunboats Chillicothe and De Kalb soon after approached and opened their fire. It now appeared that the fortification mounted a rifled 64-Parrott and three 24-Dahlgrens, and a small field battery. These guns were protected by a parapet composed of seven tiers of cotton bales, covered on the outside with eight feet of earth. The contest was bravely maintained for some time, when the fire of the enemy was suspended, but no disposition to surrender was shown. The gunboats and battery kept up the fire, but without any success in reducing the works. The Chillicothe was struck thirty-four times, but not severely injured. The DeKalb suffered more, in consequence of some shot penetrating her casemates, by which one man was killed and five wounded.

The impracticable nature of the approach to the fort by foot soldiers on the west, in consequence of the overflow or slough, rendered it necessary that the gunboats should silence the guns of the enemy, and enable the transports

to run down and land troops immediately on the fort itself. But all attempts to silence the fort by the gunboats proved unsuccessful, and the guns of the battery were withdrawn, and the expedition put on the defensive. After a few days it began to retire.

Meantime, Gen. Grant had been led to believe, as the navigation proved better than was expected, that it was possible to make this the route for obtaining a foothold on high land above Haines's Bluff, and had sent forward a division of Gen. McPherson's corps, commanded by Brig.-Gen. J. F. Quimby, and had ordered some small-class steamers for transporting the army. The seventeenth corps, under Gen. McPherson, was also directed to be in readiness to move, and one division from the thirteenth and fifteenth corps each, was collected near the Pass. But it soon became evident that a sufficient number of boats of the right class, could not be obtained for the transportation of more than one division. On the 23d of March, therefore, orders were given to withdraw all the forces operating in that direction, for the purpose of concentrating at Milliken's Bend.

At this time another expedition had started under Admiral Porter, for the purpose of reaching the Yazoo below Fort Pemberton and Greenwood, and above Haines's Bluff. Such a movement, if successful, would leave Greenwood and Fort Pemberton to the rear of the Federal forces, and necessarily cause it to be abandoned. At the same time, about thirty Confederate steamers could be captured or destroyed. The route to be pursued by this expedition was up the Yazoo river to Cypress bayou, which enters that river at a point opposite the landing place of Gen. Sherman's troops when attacking the bluffs in the rear of Vicksburg, thence into Steele's bayou, and along that watercourse, and through Cypress Lake, to Little Black Fork, thence into Deer creek. Following this stream for some distance, the route branches off along Rolling Fork into the Big Sunflower river, which empties into the Yazoo above Haines's Bluff.

The expedition under Admiral Porter, consisted of the gunboats Pittsburg, Louisville, Mound City, Cincinnati, and Carondelet, with a number of small transports. Gen. Grant stated that the principal obstacles appeared to be the overhanging trees, and he sent forward a pioneer corps for their removal. Soon after, Admiral Porter sent back for a cooperating military force, and Gen. Sherman was promptly sent with one division of his corps. The number of steamers suitable for the navigation of these bayous being limited, most of the force was sent up the Mississippi to Eagle Bend, a point where the river runs within one mile of Steele's bayou, thus avoiding an important part of the difficult navigation. The cause of the failure of this expedition is thus explained by Gen. Grant:

"The expedition failed, probably, more from

want of knowledge as to what would be required to open this route, than from any impracticability in the navigation of the streams and bayous through which it was proposed to pass: the want of this knowledge led the expedition on until difficulties were encountered, and then it would become necessary to send back to Young's Point for the means of removing them. This gave the enemy time to move forces to effectually checkmate further progress, and the expedition was withdrawn when within a few hundred yards of free and open navigation to the Yazoo."

In addition to these several routes, another was prospected by Capt. F. E. Prime, as Chief Engineer, and Col. G. G. Pride, through the bayous, which run from near Milliken's Bend and New Carthage on the south, through Roundaway bayou into the Tensas river. This route was found to be practicable, and work was commenced on it. With the aid of three dredge boats, it proceeded rapidly, and one small steamer and a number of barges were taken through the channel thus opened. About the middle of April, however, the river commenced falling so rapidly as to ren-

der it impracticable to open this water communication between Milliken's Bend and New Carthage. At the same time the roads between them became dry and passable, and thus made the water communication unnecessary.

About this time, Admiral Farragut had sent to Admiral Porter for the assistance of ironclads and rams, to operate against a fleet of small, but dangerous boats, cruising in the Red river. The large vessel of Admiral Farragut, the Hartford, near Warrenton, might be useless against two or three small rams. The rams Switzerland, under Col. Chas. R. Ellet, and Lancaster, under Lieut.-Col. John A. Ellet, were ordered to go down the river. Every precaution was taken to make the run of the batteries as quietly as possible, but it was about daylight on the 25th of March when they turned the point and came in sight of Vicksburg. They were discovered by the enemy, and the Lancaster was sunk before she had reached halfway. All of her crew escaped but one man, who was drowned. The Switzerland was badly cut up, but arrived below.

The object of Gen. Grant now was to find a route by which he could place his army with its supplies below Vicksburg, so as to approach it in the rear, where alone it was supposed to be weak and assailable, with the hope of success. As soon, therefore, as he had directed a water communication to be opened from a point on the Mississippi, near Milliken's Bend, to New Carthage, he determined to occupy the latter place. It was the first point below Vicksburg that could be reached by land at the stage of water existing at that time, and the occupancy of which, while it secured a point on the Mississippi river, would also protect the main line of communication by water. Major-Gen. McClernand, therefore, with the thirteenth army corps, was, on the 29th of March, ordered to move to New Carthage. The fifteenth and sixteenth corps were to follow, moving no faster than supplies and ammunition could be transported to them. The movement was necessarily slow, in consequence of the bad state of the roads. As the advance reached Smith's Plantation, two miles from New Carthage, it was found that the levee of Bayou Vidal was broken in several places; and in consequence of the overflow of water, New Carthage was made an island. All the boats in the different bayous in the vicinity were collected, and others were built, but the transportation of the army was exceedingly tedious. Another route was therefore found, by making a further march of twelve miles around Bayou Vidal, to a point called Perkins's Plantation. The whole distance to be marched from Milliken's Bend to reach water communication below was thirty-five miles. Over this distance it was necessary to transport by wagons, with bad roads, the supplies of ordnance stores and provisions with which to

commence the campaign on the opposite side of the river.

At the same time that the occupation of New Carthage was ordered, preparations were made for running transports and a gunboat fleet below the batteries of Vicksburg. The gunboats selected were the Benton, Capt. Greer; Lafayette, Capt. Henry Walke; Price, Capt. Woodworth; Louisville, Capt. Owens; Carondelet, Capt. McLeod Murphy; Pittsburg, Capt. Wm. Hoel; Tusculumbia, Capt. Shirk, and Mound City. All of these boats except the Price were ironclad. Each had taken, for additional protection, baled cotton, hay, railroad iron, timber, chains, or whatever else might be suitable. The transports which were selected were the Forest Queen, Capt. Dan. Conway; Henry Clay; and Silver Wave, Capt. McMillan. These boats took a quantity of supplies for the army, and bales of cotton and hay were placed around the most important parts of their machinery. The night of the 16th of April was fixed for the expedition to start. Everything was in readiness before dark. The plan decided upon was that the ironclads should pass down in single file, with intervals between the boats of a few hundred yards, and that when in front of the batteries they should engage them with their broadside guns, and, under cover of the smoke, the transports should endeavor to pass unseen. A spectator of the exciting scene has thus described it:

"Lights twinkled busily from the Vicksburg hillsides until about 10 o'clock, when they disappeared, and about the same moment song and laughter on our side were hushed, as a shapeless mass of what looked like a great fragment of darkness was discerned floating noiselessly down the river. It was the Benton. It passed and disappeared in the night, and was succeeded by another bank of darkness, the Lafayette, with the Price lashed to her starboard side. And thus they continued, as if huge shadows detached themselves from the darkness above, floated across the vision, and disappeared in the darkness below. Ten of these noiseless shapes revealed themselves and disappeared.

"Three quarters of an hour passed. People heard nothing save their own suppressed breathings; saw nothing save a long low bank of darkness, which, like a black fog, walled the view below, and joined the sky and river in the direction of Vicksburg. And all watched this gathering of darkness, for in it were thunders and lightnings and volcanoes, which at any instant might light up the night with fierce irruptions.

"So long a time passed without anything occurring that people began to believe the enemy had determined, for some malevolent purpose, to allow the fleet to pass below without obstruction. However, this supposition was hardly broached ere it was contradicted most emphatically. At just a quarter before eleven,

two bright sharp lines of flame flashed through the darkness, at the extreme right of the Vicksburg batteries; and, in an instant, the whole length of the bluffs was ablaze with fire. The fleet, which had rounded the Point, and now lay squarely before the city, at once responded by opening their ports, and pouring their full broadside of twenty-five heavy guns, charged with grape and shrapnel, directly against the city.

"A great cloud of smoke rolled heavily over the gunboats, and in this the three transports entered and made their 'best time' down the river. The Forest Queen, which was in the advance, received a shot in the hull and another through the steam drum, which disabled her instantly. The Henry Clay, that came next, was stopped, to prevent her running into the other, and at the same moment was struck by a shell that set her cotton on fire. The crew, demoralized by the stoppage and terrified by the fire, ran aimlessly around for a few moments, then launched the yawl, sprang into it, and pulled for the shore. The pilot, finding that no engineers obeyed the bells, stayed a short time until the fire began to seethe around him, when he seized a plank, jumped overboard, and was picked up by a gunboat. The Clay, in the mean time, became a great blazing mass, that floated down the river until it disappeared below Warrenton. Had she been manned by men of nerve, the fire would have been extinguished and the boat carried through safely. The fact of her floating so far shows that her hull was uninjured.

"The Forest Queen was taken in tow by a gunboat, and towed below without further damage. The Silver Wave did not receive a scratch.

"The Vicksburg batteries were passed in about an hour and a quarter. Upon reaching Warrenton batteries, the gunboats took the initiative by pouring in their broadsides on the instant they reached position; and so continuous and terrific was their fire that the enemy scarcely attempted a response."

No one on board either of the transports was injured, and Gen. Grant immediately ordered six more to be prepared in like manner for running the batteries. Accordingly the Tigress, Anglo-Saxon, Cheeseman, Empire City, Horizon, and Moderator left Milliken's Bend on the night of the 22d of April, and five of them got by, but in a somewhat damaged condition. The Tigress received a shot in her hull below the water line, and sunk on the Louisiana shore, after passing the last of the batteries. In tow of these transports, twelve barges loaded with forage were sent, one half of which got through in a condition to be used. The transports injured in running the blockade were repaired by order of Admiral Porter, and in a very short time five of them were in running order, and the remainder in a condition to be used as barges in the movement of troops.

As the number of transports below Vicks-

burg was limited, Gen. Grant found it necessary to extend his line of movement by land to Hard Times in Louisiana. By the circuitous route it was necessary to take, the distance was increased to seventy miles from Milliken's Bend.

On the 29th of April, the thirteenth corps of the army had reached the Mississippi, and the seventeenth was well on the way. Gen. Grant then embarked so much of the thirteenth as could be got on board the transports and barges, and moved to the front of Grand Gulf. This was a strong position on the east bank of the Mississippi, below the mouth of the Big Black river. The plan was that the gunboats under Admiral Porter's command should silence the fortifications, and under cover of the gunboats the troops should land and carry the place by storm.

At eight o'clock in the morning the attack was commenced by the gunboats, and continued fiercely for more than five hours. The following is the despatch of Admiral Porter respecting the attack:

FLAG SHIP BENTON, BELOW GRAND GULF, MISS., }
April 29th, 1862. }

Hon. Gideon Welles, Secretary of the Navy :

I have the honor to inform you that, by an arrangement with General Grant, I attacked the batteries at Grand Gulf this morning, which were very formidable. After a fight of five hours and thirty minutes, we silenced the lower batteries, but failed to silence the upper one, which was high, strongly built, had guns of very heavy caliber, and the vessels were unmanageable in the heavy current. It fired but feebly toward the last, and the vessels all laid by and enfiladed it, while I went up a short distance to communicate with General Grant, who concluded to land the troops and march over to a point two miles below Grand Gulf. I sent the Lafayette back to engage the upper battery, which she did, and drove the persons out of it, as it did not respond after a few fires. At 6 P. M. we attacked the batteries again, and, under cover of the fire, all the transports passed by in good condition. The Benton, Tuscumbia, and Pittsburg were much cut up, having twenty-four killed and fifty-six wounded; but they are all ready for service.

We land the army in the morning on the other side, and march on Vicksburg. DAVID D. PORTER,
Acting Rear-Admiral.

Gen. Grant, who was a spectator of the scene, says: "Many times it seemed to me that the gunboats were within pistol shot of the enemy's batteries. It soon became evident that the guns of the enemy were too elevated and their fortifications too strong to be taken from the water side. The whole range of hills on that side were known to be lined with rifle pits. Besides, the field artillery could be moved to any position where it might be useful in case of an attempt at landing." He therefore determined to run the enemy's batteries again, and to turn his position by effecting a landing at Rodney, or at Bruinsburg, between Grand Gulf and Rodney. Rodney is a small village on the east bank of the Mississippi, some miles below Grand Gulf. Bruinsburg is a small place between the two others. A reconnoissance was made to a point opposite Bruinsburg, and information was obtained from a negro that

there was a good road from that place to Port Gibson. Gen. Grant determined to make the landing on the east side of the Mississippi, at Bruinsburg. Accordingly the troops were immediately ordered to land at Hard Times, and march across to the point below Grand Gulf, and at dark the gunboats again engaged the batteries, and all the transports were run by. They received but two or three shots during the passage, and these caused no injury.

At daylight on the morning of the 30th, the work of ferrying the troops across the Mississippi was commenced both by the gunboats and the transports. The thirteenth corps, as soon as landed and supplied with three days' rations, was started on the road to Port Gibson. The seventeenth corps followed as rapidly as it could be taken across the river. Port Gibson was a flourishing village on Bayou Pierre, 28 miles from its mouth, and about 65 miles southwest from Jackson, the capital of Mississippi. It was connected with Grand Gulf by a railroad.

About two o'clock on the next morning, May 1st, the advance of the enemy was met eight miles from Bruinsburg, on the road to Port Gibson. They were forced to fall back, but as it was dark, were not pursued far until daylight. Then Gen. McClernand with his corps pressed forward within four miles of Port Gibson. Here the road divided in opposite directions. Both branches, however, led to Port Gibson. The enemy took a position on each branch, and thus divided the pursuing force. The nature of the ground was such that a very small force could easily retard the progress of a much larger one for several hours. The roads run on narrow, elevated ridges, with deep and impenetrable ravines on each side. The corps of Gen. McClernand was so divided that on the right were the divisions of Gens. Hovey, Carr, and Smith, and on the left the division of Gen. Osterhaus. The three former succeeded in driving the enemy from position to position steadily back toward Port Gibson. On the left, Gen. Osterhaus was unable to move the enemy until he was reinforced by a brigade of Gen. Logan's division, which was the advance of Gen. McPherson's corps. Another brigade of the same division was sent to Gen. McClernand on the right, and the enemy were so badly repulsed there as to be able to make no further stand south of Bayou Pierre. Late in the afternoon, Gen. Osterhaus was successful in repulsing the enemy, whom he pursued toward Port Gibson, but night closing in and the enemy making the appearance of another stand, the troops slept upon their arms until daylight. On the morning of the 2d, it was found that the enemy had retreated across Bayou Pierre, on the Grand Gulf road, and a brigade of Gen. Logan's division was sent to divert his attention whilst a floating bridge was thrown across the Bayou at Port Gibson. This bridge was completed, and Gen. McPherson's corps passed over and marched eight

miles to the north bank of Bayou Pierre, built a bridge over that stream, and the advance commenced passing over it at five o'clock on the following morning. On the 3d, the enemy were pursued to Hawkinson's Ferry, with slight skirmishing all day, during which quite a number of prisoners, mostly stragglers, were taken. The following despatch from Gen. Grant was sent to Washington:

GRAND GULF, May 7th.

To Major-General Halleck, General-in-Chief:

We landed at Bruinsburg, April 30, moved immediately on Port Gibson, met the enemy, 11,000 strong, four miles south of Port Gibson, at 2 o'clock A. M., on the 1st instant, and engaged him all day, entirely routing him, with the loss of many killed and about 500 prisoners, besides the wounded. The enemy retreated toward Vicksburg, destroying the bridges over the two forks of the Bayou Pierre. These were rebuilt, and the pursuit was continued until the present time. Besides the heavy artillery at this place, four field pieces were captured, and some stores, and the enemy was driven to destroy many more. The country is the most broken and difficult to operate in I ever saw. Our victory has been most complete, and the enemy is thoroughly demoralized.

Very respectfully, U. S. GRANT,
Major-General Commanding.

These movements of Gen. Grant had caused the evacuation of Grand Gulf, and Admiral Porter, upon making a movement to attack that position on the 3d, found that it had been abandoned. He then sent the following despatch to the Navy Department:

FLAG SHIP BENTON, GRAND GULF, MISS., }
May 3d, 1863. }

To the Hon. Gideon Welles, Sec'y of the Navy:

SIR: I have the honor to report that I got under way this morning with the Lafayette, Carondelet, Mound City, and Pittsburg, and proceeded up to the forts at Grand Gulf, for the purpose of attacking them again if they had not been abandoned.

The enemy had left before we got up, blowing up their ammunition, spiking their large guns and burying or taking away their lighter ones. The armament consisted of thirteen guns in all. The works are of the most extensive kind, and would seem to defy the efforts of a much heavier fleet than the one which silenced them.

The forts were literally torn to pieces by the accuracy of our fire. Col. Wade, the commandant of the batteries, was killed; also his chief of staff. Eleven men were killed that we know of, and our informant says many were wounded, and that no one was permitted to go inside the forts after the action, except those belonging there.

We had a hard fight for these forts, and it is with great pleasure that I report that the navy holds the door to Vicksburg. Grand Gulf is the strongest place on the Mississippi. Had the enemy succeeded in finishing the fortifications, no fleet could have taken them.

I have been all over the works, and find them as follows: One fort, on a point of rocks 75 feet high, calculated for six or seven guns, mounting two 7-inch rifled and one 8-inch, and one Parrott gun on wheels, which was carried off. On the left of this work is a triangular work, calculated to mount one heavy gun.

These works are connected with another fort by a covered way and double rifle pits extending a quarter of a mile, constructed with much labor, and showing great skill on the part of the constructor. The third fort commands the river in all directions. It mounted one splendid Blakely 100-pounder, one 8-inch and two

30-pounders. The latter were lying burst or broken on the ground.

The gunboats had so covered up everything that it was impossible at first to see what was there, with the exception of the guns that were dismounted or broken. Every gun that fell into our hands is in good condition, and we found a large quantity of ammunition. These are by far the most extensively built works, with the exception of those at Vicksburg, that I have seen yet, and I am happy to say that we hold them.

I am dismounting the guns, and getting on board the ammunition.

Since making the above examination, new forts have been passed nearly finished. They had no guns mounted, but were complete of the kind as regards position, and had heavy field pieces in them.

(Signed) DAVID D. PORTER,

Acting Rear-Admiral, Com'g Mississippi Squadron.

Gen. Grant now made the necessary arrangements for changing his base of supplies from Bruinsburg to Grand Gulf. From Milliken's Bend to New Carthage a water communication had been opened by the Roundaway bayou, and troops occupied positions along the route from Milliken's Bend to Dallas and thence to New Carthage. A strong body also occupied Richmond, situated in the angle formed by the junction of the Brashy with Roundaway bayou.

When the army moved from Milliken's Bend, the fifteenth corps, under Maj.-Gen. W. T. Sherman, remained to be the last to follow. Gen. Sherman had also been ordered to make a demonstration on Haines's Bluff, in order to prevent heavy reinforcements leaving Vicksburg to assist the Confederate forces at Grand Gulf. Gen. Sherman moved upon Haines's Bluff, landing his forces on the south bank of the Yazoo, and the attack was made chiefly by the gunboats, on the 6th of May. The ironclads De Kalb and Choctaw, with other gunboats, engaged the batteries for six hours, during which the Choctaw was struck fifty-four times. The enemy displayed a strong force, and anticipated a battle. On the 7th the expedition returned, and the military part prepared to join Gen. Grant. It was entirely successful in preventing reinforcements to the enemy at Port Gibson.

It had been the purpose of Gen. Grant, up to the time of crossing the Mississippi, to collect all his forces at Grand Gulf, and to get on hand a good supply of provisions and ordnance stores, before moving against Vicksburg from the south. He had also determined, in the mean while, to detach an army corps to coöperate with Gen. Banks on Port Hudson, and effect a junction of forces. But this plan was given up by him in consequence of learning that Gen. Banks could not return to Baton Rouge from his position west of the Mississippi before the 10th of May; and that by the reduction of Port Hudson he could not join Gen. Grant with more than 12,000 men. The delay also for the arrival of Gen. Banks at Baton Rouge, and then for the reduction of Port Hudson, would be so great that the addition of 12,000 men to his forces would not make him relatively so strong for the attack upon

Vicksburg, as if it was at that time promptly made. Another reason for a change of his first plan, and in favor of a prompt movement on Vicksburg, was the information that troops were expected at Jackson from the Southern cities under command of Gen. Beauregard.

Meanwhile the army was lying at Hawkinson's Ferry, waiting for wagons, supplies, and the arrival of Gen. Sherman's corps. Hawkinson's was the lowest of three ferries over the Big Black below the railroad. Hall's and Baldwin's were the names of the others. It was on a new military road from Grand Gulf to Vicksburg.

In order to facilitate Gen. Grant's operations by destroying the enemy's lines of communication and preventing the early concentration of reinforcements, a cavalry raid of unusual boldness was made in the rear of Vicksburg. Col. Benj. H. Grierson, commanding the first cavalry brigade, had proposed a descent into the State of Mississippi, without meeting the approval of the commanding general until the 1st of April, when he was instructed to prepare for an expedition. The force was stationed at Lagrange about fifty miles east of Memphis, and four miles west of the junction of the Mississippi and Charleston railroad. On the 17th, Col. Grierson was ordered to move his force, consisting of the 6th Illinois cavalry, Col. Loomis, 7th Illinois, Col. Edward Prince, and 2d Iowa, Col. Edward Hatch, out on the road to Ripley. Feints had previously been made from Lagrange, Memphis, and Corinth, in order to divert the attention of the enemy from the real movement. Early on the next day, the 18th, the force proceeded to Ripley: from that village, the 2d Iowa, advancing on the left flank of the column, took a southeasterly direction, and crossed the Tallahatchie about five miles northeast of New Albany. Meanwhile the main body proceeded directly south and crossed the river two miles east of New Albany. At the same time a battalion of the 7th Illinois marched on the right flank and crossed the river at New Albany. Skirmishing was kept up throughout the day by all the forces with detached bodies of the enemy, who were on both sides of the river, but unable to impede the progress of Col. Grierson. At night the 6th and 7th encamped about four miles south of New Albany, and the 2d Iowa about four miles east of that place. About midnight an attack was made upon this regiment, which was promptly repulsed. On the morning of the 19th a detachment was ordered by Col. Grierson to proceed eastward, another to move back to New Albany, and a third to march northwest toward King's Bridge, where a Confederate force under Maj. Chalmers was reported to be encamped. These movements were designed to lead the enemy to believe that the object of the expedition was to break up the different military organizations in that part of the country. This was successful. About nine o'clock the main body resumed its

march in a southerly direction, with the 2d Iowa on its left flank. The various detachments which had been sent out soon joined the main column, and the whole force proceeded to Pontotoc. A small Confederate force was here encountered, and pursued through the town by the advance, and their entire camp equipage was captured, and also four hundred bushels of salt, which were destroyed at night. Col. Grierson encamped six miles south of Pontotoc, on the road leading to Houston.

Early the next morning, Major Lall, of the 2d Iowa, with about one hundred and seventy-five of the least effective portion of the command, one piece of artillery, and all the prisoners, moved northward, on the return to Lagrange. The object of Col. Grierson, in ordering this movement, was to relieve his command of incumbrances, and to lead the enemy to believe that the expedition had retraced its steps. The march southward was then resumed, and the force encamped that night about ten miles beyond the town of Houston.

On the next day, the 21st, Col. Hatch, of the 2d Iowa, was ordered to move his command toward Columbus, and destroy as much of the Mobile and Ohio railroad as possible, to attack Columbus if the opposing force was not too strong, and march thence to Lagrange, taking such route as he might consider to be the most suitable. In this movement, Col. Hatch was quite successful. It entirely misled Gen. Chalmers, who was in pursuit of Col. Grierson, and gave the latter a start of two or three days. The main body now continued its march to Starkville, and captured a mail, which was destroyed. At Dismal Swamp, four miles from Starkville, a halt was ordered, and a part of the command continued on five miles farther to one of the principal tanneries in the State, which was destroyed, with a large stock of boots, shoes, saddles, and leather.

On the 22d, the command again united and marched twenty-seven miles, nearly to Louisville, Mississippi. The deep streams and marshes made the route very difficult and perilous. On the next morning the command reached Philadelphia; here a mail was captured and destroyed. About daylight, on the next morning, Newton was reached, where two trains of cars, loaded with all kinds of quartermaster and commissary stores, ammunition, and shells, were captured, and their contents destroyed. One bridge was destroyed about half a mile east of the place, and three heavy trestlework bridges ten miles farther up the railroad. On the 25th, Col. Grierson reached Nichols's Plantation, seven miles west of Montrose. A more southerly route was now pursued. At Raleigh a halt was ordered for the night, and a scout sent to cut the telegraph wires on the railroad between Lake Station and Jackson. On arriving within seven miles of the railroad, a regiment of Confederate cavalry was met, which had

left Brandon in search of Col. Grierson. They were on the direct road to his camp, and only fourteen miles distant. The scout succeeded in misleading the enemy, and returned safely to camp. Col. Grierson immediately moved his command over Leaf river, and destroyed the bridge, thereby preventing the possibility of a surprise in the rear. The command then moved on to Westville, and crossed the Pearl river at a point ten miles distant from the latter place. Two battalions, which had been sent out in advance, under Col. Prince, moved rapidly to the railroad station at Hazelhurst, and captured forty cars, loaded with shell ammunition, quartermaster's and commissary stores.

When south of Starkville, Capt. Forbes, of Co. B, 7th Illinois, was ordered to march to Macon. As he approached within a short distance of that place, he found it occupied by a considerable force of the enemy. He then moved to Newton, and thence to Enterprise, one hundred miles east of the main body of Col. Grierson's force. Here he sent a flag of truce to Col. Goodwin, commanding the Confederate force in the place, and demanded his surrender. Col. Goodwin requested one hour in which to determine his reply. But Capt. Forbes, finding the enemy to be stronger than he had supposed, and having accomplished his object in diverting their attention, before the expiration of the hour commenced a rapid movement to join Col. Grierson, then more than a day's march distant. Taking a westward course, he soon struck the route of the main body at Pearl river, and effected a junction. Near Gallatin a 32-pound Parrott gun, destined for Port Gibson, was captured and spiked. Five miles east of Gallatin, a detachment was sent to the railroad at Bahala, which destroyed the track, several cars, water tanks, and a considerable amount of other property, and cut the telegraph wires. On the morning of the 28th, Brookhaven was entered by the advance so suddenly that two hundred of the enemy were surprised and made prisoners. A large number of muskets and five hundred tents, at a camp of instruction, were destroyed. The main body, after leaving Gallatin, encountered a cavalry force under Col. Garland, when a skirmish ensued, in which several of the enemy were killed and others taken prisoners. A feint, for the purpose of deceiving the enemy, was made toward Port Gibson, and another toward Natchez, when the main body marched to Brookhaven.

On the 30th, Col. Grierson moved in a southerly direction, and destroyed all the bridges between Brookhaven and Bogue Chitto Station. At the latter place fifteen cars, partly loaded with army stores, were destroyed, together with the depot and other railroad buildings. The force then marched to Summit, where twenty-five freight cars were destroyed. Thence Col. Grierson moved from the railroad to a point between Magnolia and Liberty, for the purpose of reaching the Clinton road. Finding a regiment of the enemy's cavalry at Wall's

bridge, on the Tickfaw, a dash was made upon them, in which eight or ten were killed, several wounded, and the rest put to flight. The loss of Col. Grierson was one killed and five wounded. Moving then east of the Tickfaw a short distance, the march was continued directly southward. At Edwards's bridge another regiment of the enemy's cavalry was posted, purposely to dispute the passage. A battalion was sent to engage them, while the main body moved on in the direction of Greensburg. Only a few brief skirmishes took place with this regiment.

The march thus far had proved a constant surprise to the inhabitants, and as it was supposed that Col. Grierson would return to Lagrange,

arrangements had been made to cut off his retreat. It was apparent now that his intention was not to return, but to march through the State. Preparations were therefore made at Osyka to stop his progress. It was well known that to advance any farther south it would be necessary for him to cross several bridges. Hence a regiment of Confederate cavalry was so posted as to flank his force, while a body of infantry was thrown in his front, to hold him in check until the cavalry could make an attack upon his flank and rear. Col. Grierson, understanding his danger, at once ordered a charge upon the infantry, and, with one dash, broke through their lines, and soon left them far in the rear. Fortunately he met with no loss, and continued his march south to Greensburg, thence direct to Clinton. About ten miles above that town he crossed the Amite river. On the Big Sandy creek a camp of partisan rangers was found, which he attacked, and destroyed one hundred and fifty tents, with the camp equipage and private baggage. Several horses were also captured. He then marched on the Greenville Spring road toward Baton Rouge. About ten miles from the latter place he suddenly came upon a force of cavalry, under Col. Stewart, and captured the entire body. About four o'clock in the afternoon of the 1st of May he entered the city of Baton Rouge, Louisiana. In seventeen days the troops had marched over eight hundred miles through the heart of the State of Mississippi. A large number of the enemy were killed and wounded, and it was estimated that over four millions of property were destroyed. On two important railroads communications were cut off with strong positions of the enemy. Over a thousand prisoners and more than twelve hundred horses were captured, and great excitement was created throughout the State.

Meantime, as the army of Gen. Grant lay at Hawkinson's Ferry, waiting for supplies and the arrival of Gen. Sherman's corps, demonstrations were made to induce the enemy to think that route and the one by Hall's Ferry, next above on the Big Black river, were objects of much solicitude to Gen. Grant. Reconnoissances were made on the west side of the Big Black river, extending within six miles of Warrenton.

On the 7th of May an advance was ordered. Gen. McPherson's corps were required to keep the road nearest Black river to Rocky Springs. Gen. McClelland's corps moved on the ridge road running from Willow Springs, and Gen. Sherman followed, with his corps divided on the two roads. All the ferries were closely guarded until the troops were well advanced. It was the intention of Gen. Grant here to hug the Big Black river as closely as possible with Gen. McClelland's and Gen. Sherman's corps, and thus get them to the Jackson and Vicksburg railroad, at some point between Edwards's Station and Bolton. Gen. McPherson was ordered to move by way of Utica to Raymond, and from thence into Jackson, destroying the

railroads, telegraph, public stores, &c., and then push west to rejoin the main force. Gen. Sherman moved forward on the Edwards's Station road, crossing Fourteen Mile creek at Dillon's Plantation. Gen. McClelland moved across the same creek farther west, sending one division of his corps by the Baldwin's Ferry road as far as the river. At the crossing of Fourteen Mile creek, both Gens. McClelland and Sherman had considerable skirmishing with the enemy to get possession of the crossing. On the evening of that day, May 11th, Gen. Grant sent the following despatch to Maj.-Gen. Halleck, at Washington :

My force will be this evening as far advanced along Fourteen Mile creek, the left near Black river, and extending in a line nearly east and west, as they can get without bringing on a general engagement. I shall communicate with Grand Gulf no more, except it becomes necessary to send a train with a heavy escort. You may not hear from me again for several weeks.

That night Gen. McClelland's corps was near Black river. Gen. Sherman, in the centre of the line, was at and beyond Auburn ; and Gen. McPherson, about eight miles to the right, with his corps, had advanced a few miles north of Utica. Corn, salt meat, and live stock were found abundant.

On the next morning, Tuesday, May 12th, Gen. McClelland's advance drove in the enemy's pickets, and brisk skirmishing ensued for an hour or two, with little loss on either side. By noon the enemy had disappeared from his front. Gen. Sherman early set a division in motion, which came upon the enemy at the crossing of Fourteen Mile creek. The cavalry advance was fired upon from the thick woods that skirt the stream, and was unable, owing to the nature of the ground, to make a charge or clear the enemy from their position. A battery was brought forward, supported by two regiments, and skirmishers thrown out, who drove the enemy slowly until a brigade was thrown upon their right and left flanks, when they withdrew toward Raymond. The principal resistance to the line of march was, however, in front of Gen. McPherson. At ten o'clock his advance, under Gen. Logan, came upon a Confederate force, estimated at ten thousand, but which proved to be two brigades under Gens. Gregg and Walker, posted on Fondreue's creek, about two miles south of Raymond. Brisk skirmishing began at once, which soon brought on a general engagement. The enemy was almost wholly concealed at first by the woods bordering the stream, behind which their forces were posted. Their artillery was on an eminence, which commanded the Federal approach. The battle continued for three hours, when the enemy, after heavy loss in killed, wounded, and missing, withdrew in two columns, the principal one taking the road to Jackson. Gen. McPherson immediately occupied Raymond.

Gen. Grant was at this time with Gen. Sherman's corps, and had ordered that corps and also Gen. McClelland's to move toward the rail-

road from Vicksburg to Jackson by parallel roads, the latter in the direction of Edwards's Station, and the former to a point on the railroad between Edwards's Station and Bolton. But he afterward ordered these two corps to march to Raymond, in consequence of being informed that the enemy had retreated to Jackson after the defeat near Raymond, and also that reinforcements were daily arriving at Jackson, and that Gen. Joseph E. Johnston was hourly expected there to take the command in person. He says: "I therefore determined to make sure of that place, and leave no enemy in my rear."

On the next day, the 13th, Gen. McPherson moved to Clinton, and destroyed the railroads and telegraph, and captured some important despatches from Gen. Pemberton to Gen. Gregg, who had command on the previous day in the battle of Raymond. Gen. Sherman moved to a parallel position on the Mississippi Springs and Jackson road, and Gen. McClellan moved to a point near Raymond.

On the 14th, Gen. McPherson and Gen. Sherman each advanced from his respective position toward Jackson. The rain had fallen in torrents during the night before, and it continued to fall until about noon, thus making the roads at first slippery, and then miry. Nevertheless, the troops marched in excellent order and spirits about fourteen miles, when they came upon the enemy. The main body of their force in Jackson had marched out on the Clinton road, and encountered Gen. McPherson about two and a half miles from the city. A small force of artillery and infantry also took a strong position in front of Gen. Sherman, about the same distance out from Jackson.

On the march of Gen. McPherson from Clinton toward Jackson, Gen. Crocker's division held the advance. All was quiet until he reached a hill overlooking a broad open field, through the centre of which, and over the crest of the hill beyond, the road to Jackson passed. On the left of this latter hill the enemy had posted his artillery, and along the crest his line of battle. As the Federal force came within range, the artillery of the enemy opened fire. The battery of the First Missouri was moved to the left of a cotton gin in the open field, and returned the fire for nearly an hour, when the guns of the enemy were withdrawn. Meantime, Gen. Crocker had thrown out two brigades to the right and left of his battery, supported by another brigade at a proper distance, and had also pushed forward a strong line of skirmishers, and posted them in a ravine in front, which protected them from the fire of the enemy. After a little delay they were again advanced out of cover, and a desultory fire ensued between the opposite lines of skirmishers, in which the enemy, owing to the nature of the ground, had the advantage. At length Gen. Crocker, seeing the necessity of driving the rebels from the crest of the hill, ordered a charge along the line, the execution of which has been thus

described: "With colors flying, and with a step as measured and unbroken as if on dress parade, the movement was executed. Slowly they advanced, crossed the narrow ravine, and, with fixed bayonets, reached the crest of the hill in easy range of the rebel line. Here they received a tremendous volley, which caused painful gaps in their ranks. They held their fire until they were within a distance of thirty paces, when they delivered the returning volley with fearful effect, and, without waiting to reload their muskets, with a terrific yell, they rushed upon the staggered foe. Over the fences, through the brushwood, into the inclosure, they worked their way, slaughtering on the right and left without mercy. The enemy, astonished at their impetuosity, wavered and fell back, rallied again, and finally broke in wild confusion." They finally retreated north, but without further damage.

When Gen. Sherman encountered the enemy, he soon discovered the weakness of the latter by sending a reconnoitering party to his right, which had the effect of causing them to retreat from that part of their line. A few of the artillerists, however, remained in their places, firing upon Gen. Sherman's troops until the last moment, evidently having been instructed to do so with the expectation of being captured in the end.

At this time Gen. McClellan occupied Clinton with one division, Mississippi Springs with another, Raymond with a third, and his fourth division and Gen. Blair's division of Gen. Sherman's corps were with a wagon train, still in the rear near Auburn. At the same time Gen. McArthur, with one brigade of his division of Gen. McPherson's corps, was moving toward Raymond on the Utica road. It was not the intention of Gen. Grant to move these forces any nearer Jackson, but to have them in a position where they could be in supporting distance if the resistance at Jackson should prove more obstinate than there seemed any reason to expect.

On the retreat of the enemy, Gen. McPherson followed directly into the city of Jackson. A fine battery of six pieces was found, and around the Deaf and Dumb Institute, which was used as a hospital, tents enough were seized to encamp an entire division. The commissary and quartermaster's stores were in flames. The Governor and State Treasurer had withdrawn, taking the State funds and papers. All citizens officially connected with State or Confederate Governments had also left. Many soldiers remained, besides a large number in the hospital.

At night, Gen. Grant, who with Gen. Sherman's corps had arrived at Jackson, was informed that Gen. Johnston, as soon as he had satisfied himself that Jackson was to be attacked, had ordered Gen. Pemberton peremptorily to march out from Vicksburg and attack the Federal rear. Availing himself of this information, he immediately issued orders to

Gen. McClernand, and to Gen. Blair of Sherman's corps, to face their troops toward Bolton, with a view to reaching Edwards's Station by marching on different roads, which converged near Bolton. Gen. McPherson was ordered to retrace his steps on the Clinton road, early on the morning of the 15th. Gen. Sherman was left in Jackson to destroy the railroads, bridges, factories, workshops, arsenals, and everything valuable for the support of the enemy. On the afternoon of the 15th, Gen. Grant proceeded as far west as Clinton, through which place Gen. McPherson's corps had passed to within supporting distance of Gen. Hovey's division of Gen. McClernand's corps, which had moved that day on the same road to within one and a half mile of Bolton. The country from Jackson to Bolton is rugged and broken, with a succession of hills and valleys, precipitous steeps and deep ravines, over and through which the road passes. Gen. Grant, on reaching Clinton, about five o'clock P. M., ordered Gen. McClernand to move his command early the next morning toward Edwards's Station, marching so as to feel the enemy, if he encountered him, but not to bring on a general engagement unless he was confident he was able to defeat him. Gen. Blair was also ordered to move with Gen. McClernand.

Early the next morning, two persons employed on the Jackson and Vicksburg railroad, who had passed through the army of Gen. Pemberton on the night before, were brought to the headquarters of Gen. Grant. They stated that the force of Gen. Pemberton consisted of about eighty regiments, with ten batteries of artillery, and that the whole force was estimated at near twenty-five thousand men. They also described the positions taken by the enemy, and his intention to attack the Federal rear. Gen. Grant had determined to leave one division of Gen. Sherman's corps one day longer in Jackson, but after this information he resolved to bring his entire command up at once, and accordingly sent orders to him to move with all possible speed until he came up with the main force at Bolton. A despatch was sent to Gen. Blair at the same time, to push forward his division in the direction of Edwards's Station with all possible despatch. Gen. McClernand was also ordered to establish communication between Gen. Blair and Gen. Osterhaus of his corps, and to keep it up, moving the former to the support of the latter. Gen. McPherson was also ordered forward at 5.45 A. M., to join Gen. McClernand. The information received was communicated to Gen. McClernand, with instructions as to the disposition of his forces.

Early on the morning of the 16th, Gen. Grant left Clinton for the advance, and on arriving at the point where the road from Raymond to Bolton crosses the Jackson and Vicksburg railroad, he found Gen. McPherson's advance and his pioneer corps engaged in

rebuilding a bridge on the latter road, that had been destroyed by the cavalry of Gen. Osterhaus's division, which had gone into Bolton the night before. On reaching the front, Gen. Grant found Gen. Hovey's division of the thirteenth corps at a halt, with his skirmishers and the enemy's pickets near each other. Gen. Hovey was bringing his troops into line, ready for battle, and could have brought on an engagement at any moment. The enemy had taken up a very strong position on a narrow ridge. His left rested on a height where the road made a sharp turn to the left, as it approached Vicksburg. The top of the ridge and the precipitous hillside to the left of the road were covered by a dense forest and undergrowth. To the right of the road the woods extended a short distance down the hill, and then were cultivated fields on a gentle slope spreading into an extensive valley. Gen. Hovey's division was disposed for the attack on the road and into the wooded ravine and hillside, while Gen. McPherson's force, excepting Gen. Ransom's brigade, which arrived after the battle, were thrown to the right of the road, which was properly the enemy's rear. Still Gen. Grant would not allow an attack to be commenced by his troops until he could hear from Gen. McClernand, who was advancing with four divisions, two of which were on a road intersecting the Jackson road about one mile from the position occupied by the above-mentioned troops, and about the centre of the enemy's line; the other two divisions were on a road still farther north, and nearly the same distance off. Learning that Gen. McClernand was distant two and a half miles, Gen. Grant sent orders to him to push forward with all rapidity. Meanwhile the continued firing between Gen. Hovey's skirmishers and the enemy grew into a battle by eleven o'clock. At first this division bore the brunt of the conflict, but finding the enemy too strong for them, one brigade and then another of Gen. Crocker's division of Gen. McPherson's corps was ordered to reinforce them. Meanwhile Gen. Logan's division of McPherson's corps was working upon the enemy's left and rear, which weakened exceedingly their attack in front. Here their force outnumbered the Federal force. Gen. McClernand was, however, expected momentarily upon the field. But he did not arrive until the enemy had been driven from the field after a terrible contest of hours, in which he met with a heavy loss in killed, wounded, prisoners, and artillery. It appeared afterward that the road to Vicksburg, after following the ridge in a southerly direction about one mile, intersecting one of the roads to Raymond, turned almost to the west, down the hill and across the valley in which Gen. Logan was operating on the rear of the enemy. One brigade of his division had, unconscious of this fact, penetrated nearly to this road, and compelled the enemy to retreat to avoid capture. As it was, much of his artillery and Gen. Lor-

ing's division of his army were cut off, besides the prisoners captured.

On the request of Gen. Hovey for more reinforcements, just before the rout of the enemy commenced, Gen. Grant ordered Gen. McPherson to move what troops he could by a left flank to the enemy's front. Proceeding to the front, and expecting every moment to see the enemy, Gen. Grant found, on reaching what had been his line, that he was retreating. Upon arriving at the Raymond road, Gen. Grant perceived a column of troops on the left and on the next ridge, which proved to be Gen. Carr's division of Gen. McClelland's corps. To the left, Gen. Osterhaus's division of the same corps soon after appeared with his skirmishers well advanced. Gen. Carr was ordered to pursue the enemy with all speed to Black river, and to cross it if he could, and Gen. Osterhaus was ordered to follow. The pursuit continued until after dark, and a train of cars loaded with commissary and ordnance stores and other property was captured. Gen. Grant states that "the delay in the advance of the troops immediately with Gen. McClelland was caused, no doubt, by the enemy presenting a front of artillery and infantry, where it was impossible, from the nature of the ground and the density of the forest, to discover his numbers. As it was, the battle of Champion's Hill, or Baker's Creek, was fought mainly by Gen. Hovey's division of McClelland's corps, and Gens. Logan's and Quimby's divisions (the latter commanded by Brigadier-General M. M. Crocker) of McPherson's corps."

Orders were now sent back to Gen. Sherman to turn his corps toward Bridgeport, and Gen. Blair was expected to join him at that place. Bridgeport was on the Black river, and some miles north of the railroad. By crossing the river at that point, Gen. Sherman would be on the flank of the enemy, if they made a stand at the railroad crossing of the river.

At daylight on the next morning, the 17th, the pursuit was renewed, with the corps of Gen. McClelland in the advance. The enemy was found strongly posted on both sides of the Black river, at a point where the bluffs on the west side extended to the water's edge, but the east side was an open cultivated bottom of nearly one mile in width, and surrounded by a bayou of stagnant water from two to three feet in depth and from ten to twenty feet in width, extending from the river above the railroad to the river below. Along the inside line of this bayou the enemy had constructed rifle-pits, with the bayou serving as a ditch on the outside and immediately in front of them. The division of Gen. Carr occupied the right in investing this position, and the brigade of Gen. Lawler occupied the right of the division. After a few hours' skirmishing, Gen. Lawler discovered that by moving a portion of his brigade under cover of the river bank, he could get a position from which the enemy could be successfully assaulted. He accord-

ingly ordered a charge. Notwithstanding the level ground over which a portion of his troops had to pass without cover, and the great obstacle of the ditch in front of the enemy's works, the charge was gallantly and successfully made, and in a few minutes the entire garrison with seventeen pieces of artillery were the trophies of this brilliant movement. The enemy on the west bank of the river immediately set fire to the railroad bridge and retreated, thereby cutting off all chance of escape for any portion of his forces remaining on the east bank.

By this time, Gen. Sherman had reached Bridgeport on the Black river above. The only pontoon train was with him. By the morning of the 18th, he had crossed the river and was ready to march on Vicksburg. Gens. McClelland and McPherson caused floating bridges to be constructed during the night, and were ready to cross their troops by eight o'clock on the next morning.

Early that morning, Gen. Sherman commenced his march by the Bridgeport and Vicksburg road, and, when within three and a half miles of Vicksburg, he turned to the right to get possession of Walnut Hills and the Yazoo river. This was successfully accomplished before night. Gen. McPherson crossed the Black river above the road to Jackson, and came into the same road with Gen. Sherman, but in his rear. His advance arrived after nightfall at the point where Gen. Sherman turned to the right. Gen. McClelland moved by the Jackson and Vicksburg road to Mount Albans, in the rear of Vicksburg, and there turned to the left to get into the Baldwin's Ferry road. By this disposition the three army corps covered all the ground their strength would admit of, and by the morning of the 19th the investment of Vicksburg was made as complete as could be by the forces under the command of Gen. Grant.

In the march from Bruinsburg to Vicksburg, only five days' rations were issued, and three of these were taken in haversacks at the start, and soon exhausted. It was a period of twenty days before supplies could be obtained from Government stores, during which all other subsistence was obtained from the country through which the army passed. It was abundantly supplied with corn, bacon, beef, and mutton. The march was commenced without wagons except such as could be picked up. Communications were at once opened with the fleet above Vicksburg, and Gen. Grant's base for supplies was changed from Grand Gulf to the Yazoo. The movements by which this was effected are thus described in a despatch from Rear-Admiral Porter to the Secretary of the Navy:

FLAG SHIP BLACK HAWK, }
HAINES'S BLUFF, YAZOO RIVER, May 20th. }

To Hon. Gideon Welles, Secretary of the Navy:

On the morning of the 16th I came over to the Yazoo to be ready to cooperate with Gen. Grant, leaving two of the ironclads at Red River, one at Grand Gulf, one at Carthage, three at Warrenton, and two in the Yazoo, which left me a small force. Still I disposed of them

to the best advantage. On the 18th, at meridian, firing was heard in the rear of Vicksburg, which assured me that Gen. Grant was approaching the city. The cannonading was kept up furiously for some time, when, by the aid of glasses, I discovered a company of artillery advancing, taking position, and driving the rebels before them. I immediately saw that Gen. Sherman's division had come on to the left of Snyder's Bluff, and that the rebels at that place had been cut off from joining the forces in the city.

I despatched the DeKalb, Lieut.-Commander Walker, the Choctaw, Lieut.-Commander Ramsay, the Romeo, and Forest Rose, all under command of Lieut.-Commander Breese, up the Yazoo, to open communication in that way with Gens. Grant and Sherman. This I succeeded in doing, and in three hours received letters from Gens. Grant, Sherman, and Steele, informing me of this vast success, and asking me to send up provisions, which was at once done. In the mean time, Lieutenant-Commander Walker in the DeKalb pushed on to Haines's Bluff, which the enemy had commenced evacuating the day before, and a party remained behind in the hopes of destroying or taking away a large amount of ammunition on hand. When they saw the gunboats they ran out and left everything in good order, guns, forts, tents, and equipage of all kinds, which fell into our hands.

As soon as the capture of Haines's Bluff and the fourteen forts was reported to me, I shoved up the gunboats from below to fire on the hill batteries, which fire was kept up for two or three hours. At midnight they moved up to the town and opened on it for about an hour, and continued at intervals during the night to annoy the garrison. On the 19th I placed six mortars in position, with orders to fire night and day as rapidly as they could.

The works at Haines's Bluff are very formidable. There are fourteen of the heaviest kind of mounted eight and ten inch and seven and a half inch rifle guns, with ammunition enough to last a long siege. As the gun carriages might again fall into the hands of the enemy, I had them burned, blew up the magazine, and destroyed the works generally. I also burned up the encampments, which were permanently and remarkably well constructed, looking as though the rebels intended to stay some time. Their works and encampments covered many acres of ground, and the fortifications and rifle pits proper of Haines's Bluff extend about a mile and a quarter. Such a network of forts I never saw.

As soon as I got through with the destruction of the magazines and other works, I started Lieut.-Com. Walker up the Yazoo river with sufficient force to destroy all the enemy's property in that direction, with orders to return with all despatch, and only to proceed as far as Yazoo City, where the rebels have a navy yard and storehouses.

In the mean time Gen. Grant has closely invested Vicksburg, and has possession of the best commanding points. In a very short time a general assault will take place, when I hope to announce that Vicksburg has fallen after a series of the most brilliant successes that ever attended an army.

There has never been a case during the war where the rebels have been so successfully beaten at all points, and the patience and endurance shown by our army and navy for so many months is about being rewarded. It is a mere question of a few hours, and then, with the exception of Port Hudson, which will follow Vicksburg, the Mississippi will be open its entire length.

(Signed)

D. D. PORTER,

Com'g Mississippi Squadron.

The result of the expedition to Yazoo City is thus described in the report of Lieut. Walker, addressed to Rear-Admiral Porter:

U. S. STEAMER BARON DE KALB,
MOUTH YAZOO RIVER, May 23d. }

SIR: I have the honor to report that in obedience to your order I started from Snyder's Bluff on the 20th,

with the DeKalb, Choctaw, Forest Rose, Linden, and Petrel, on an expedition to Yazoo City. Arriving at Haines's Bluff, I landed a force and spiked an 8-inch gun on the fort there, and burned the carriage. I also burned some forty tents left standing, and a steam saw-mill.

Arriving at Yazoo City at 1 p. m., 20th, I was met by a committee of citizens, who informed me that the place had been evacuated by the military authorities, and asking protection. The navy yard and vessels had been fired by the enemy. I sent a working party to insure the destruction of everything valuable to the rebels. The vessels burned were the Mobile, a screw vessel, ready for plating; the Republic, which was being fitted out for a ram; and a vessel on the stocks—a monster, 310 feet long, 75 feet beam. The navy yard contained five saw and planing mills, an extensive machine shop, carpenter and blacksmith shops, and all necessary fixtures for a large building and repairing yard, which, with a very large quantity of lumber, were burned. I also burned a large sawmill above the town. Most of the public stores had been removed; such as I found in town were taken on board the vessels or destroyed. Enclosed I send a list of articles removed or destroyed by Acting Volunteer Lieut. Brown, the officer detailed for that purpose. In the hospital I found and paroled 1,500 prisoners, a list of whom I enclose.

Returning, I left Yazoo City this morning, arriving here at 4 p. m. At Liverpool Landing, in a sharp bend in the river, we were attacked by some field guns, and about 200 riflemen concealed in the bushes, and for a few minutes the firing was very sharp. The enemy retreated as soon as the vessels got into position to use their guns with effect. The Petrel, Linden, and Choctaw were struck with shot, but received no particular injury. Sergt. Stockinger, of this vessel, was killed by a rifle shot. The Linden had five wounded, the Petrel two, and the Choctaw one. Most of the wounds are slight.

After the storming of their position on the Big Black river, the Confederate force fell back to Vicksburg, which they reached about eight o'clock on Sunday night, the 17th. Their army was immediately reorganized, and placed as follows: Gen. Smith's division on the extreme left, Major-Gen. Forney in the centre, and Major-Gen. Stephenson on the right. Brig.-Gen. Bowen's division of Missourians held the reserve.

It has been stated that by the morning of Tuesday, the 19th, Vicksburg was invested by the Federal army. During that day there was a continued skirmishing, and Gen. Grant was not without hope of carrying the works. He found his forces insufficient to entirely invest the works. There was therefore danger that the two bodies of the enemy, under Gens. Johnston and Pemberton, might yet effect a junction, as it was known that the former was receiving large reinforcements from Gen. Bragg's army in Middle and Eastern Tennessee. He therefore ordered a general assault to be made at two o'clock in the afternoon. This was made by the fifteenth army corps, which arrived in time before the works on the previous day to get a good position. The thirteenth and seventeenth corps succeeded in gaining an advanced position covered from the fire of the enemy. A Confederate report of the action of Tuesday is as follows: "On Tuesday morning, before daylight, they opened fire from their batteries, our guns responding immediately and

with fine effect, compelling the enemy to shift their batteries several times. At the same time the enemy endeavored to throw forward a body of sharpshooters, but were prevented by the fire of our men from so doing. The artillery duel and sharpshooting continued for about three hours, when Gen. Pemberton rode up and ordered our men to cease firing, as he desired no artillery duels. In obedience to the order, our men ceased firing, and the result was that next morning, the enemy, emboldened by our silence, approached one hundred yards nearer than they were the day before, without any opposition. On Tuesday the enemy made their first assault on the line of works held by Brig.-Gen. Shoup's brigade of Louisianians. They marched up in one solid column, our men withholding their fire until the enemy had approached within thirty yards of the lines, when they opened a terrific volley of musketry. The enemy wavered a moment, and then marched forward. They were again met by another volley, when they broke and fled under cover of the hills. This was the only attempt made on that day to force our lines, and the attempt was evidently made more with the intention of 'feeling' our lines than with any serious idea of storming them."

By the 21st, the arrangements of Gen. Grant for drawing supplies of every description were completed, and he determined to make another effort to carry Vicksburg by assault. His rea-

sons for this are thus stated: "I believed an assault from the position gained by this time could be made successfully. It was known that Johnston was at Canton with the force taken by him from Jackson, reinforced by other troops from the east, and that more were daily reaching him. With the force I had, a short time must have enabled him to attack me in the rear, and possibly to succeed in raising the siege. Possession of Vicksburg at that time would have enabled me to turn upon Johnston and drive him from the State, and possess myself of all the railroads and practical military highways, thus effectually securing to ourselves all territory west of the Tombigbee, and this before the season was too far advanced for campaigning in this latitude. It would have saved Government sending large reinforcements much needed elsewhere; and, finally, the troops themselves were impatient to possess Vicksburg, and would not have worked in the trenches with the same zeal, believing it unnecessary, that they did after their failure to carry the enemy's works."

Accordingly, orders were issued on the 21st for a general assault on the whole line, to commence at 10 A. M. on the next day. This assault is thus described by Gen. Grant: "All the corps commanders set their time by mine, that there should be no difference between them in the movement of assault. Promptly at the hour designated, the three army corps then

in front of the enemy's works commenced the assault. I had taken a commanding position near McPherson's front, and from which I could see all the advancing columns from his corps, and a part of each of Sherman's and McClelland's. A portion of the commands of each succeeded in planting their flags on the outer slopes of the enemy's bastions, and maintained them there until night. Each corps had many more men than could possibly be used in the assault, over such ground as intervened between them and the enemy. More men could only avail in case of breaking through the enemy's line or in repelling a sortie. The assault was gallant in the extreme on the part of all the troops, but the enemy's position was too strong, both naturally and artificially, to be taken in that way. At every point assaulted, and at all of them at the same time, the enemy was able to show all the force his works could cover. The assault failed, I regret to say, with much loss on our side in killed and wounded; but without weakening the confidence of the troops in their ability to ultimately succeed.

"No troops succeeded in entering any of the enemy's works, with the exception of Sergeant Griffith, of the Twenty-first regiment Iowa volunteers, and some eleven privates of the same regiment. Of these none returned except the sergeant and possibly one man. The work entered by him, from its position, could give us no practical advantage, unless others to the right and left of it were carried and held at the same time. The assault proved the quality of the soldiers of this army. Without entire success, and with a heavy loss, there was no murmuring or complaining, no falling back, or other evidence of demoralization."

A Confederate report thus describes the manner in which the assault was met by them: "The days intervening from the 19th to the 22d were spent in one continued bombarding and sharpshooting during the day; in the night they generally ceased firing. On the morning of the 22d, the enemy opened a terrific fire with their Parrott guns, and continued it till about eleven o'clock, when the bombardment ceased, and heavy columns of the enemy could be seen forming in line of battle. Our forces were all ready for them, and eager for their advance. At about a quarter to twelve, the column of the Federal army advanced all along the lines in splendid order, and with a loud cheer dashed up to the works. They were gallantly responded to by our brave boys, and the first charge repulsed. On the extreme right of our lines, the nature of the ground prevented the enemy from making any heavy attack, but on the right of the centre, the centre, and the left of the centre, the assault was desperately made and gallantly met. But once did our lines break, and that was in Lee's brigade. The enemy gained a temporary footing on the rifle pits, but Lee quickly rallied his men, and, after a desperate hand-to-hand fight, drove them out and reoccupied the lines. The engagement

at this point and at the right of the line, held by Brig.-Gen. L. Herbert, was of a terrible nature, the Federals having thrown their best troops on these works. Five times did they charge, and each time were repulsed. The last charge on the right of Brig.-Gen. Herbert's lines was made by an Irish regiment (the Seventeenth Wisconsin), carrying the green flag of Erin. They came at a double quick up the hill, each man in the front rank furnished with ladders to reach the works. Three times they essayed to plant their ladders, but were prevented by the obstinate resistance offered by the consolidated Twenty-first and Twenty-third Louisiana regiments. At the third charge they came within ten yards of the line, but two volleys of buckshot from the shotguns of our forces compelled them to make a precipitate retreat from the front of our works. At about 2 o'clock they made their last charge, and were again repulsed, when they retired, and did not attempt any further demonstration that day. The loss of the enemy on that day is estimated by competent parties at not less than from 8,000 to 10,000, while our loss was between 800 and 1,000 in killed and wounded."

The following despatch of Rear-Admiral Porter to the Secretary of the Navy, describes the part taken in this conflict by the naval force:

MISSISSIPPI SQUADRON, FLAG SHIP BLACK HAWK, }
March 23d, 1863. }

SIR: On the evening of the 21st I received a communication from Gen. Grant, informing me that he intended to attack the whole of the rebel works at 10 A. M. the next day, and asking me to shell the batteries from 9.30 until 10.30, to annoy the garrisons. I kept six mortars playing rapidly on the works and town all night, and sent the Benton, Mound City, and Carondelet up to shell the water batteries and other places where troops might be resting during the night.

At seven o'clock in the morning, the Mound City proceeded across the river, and made an attack on the hill batteries opposite the canal. At eight o'clock I joined her in company with the Benton, Tuscumbia, and Carondelet. All these vessels opened on the hill batteries and finally silenced them, though the main work on the battery containing the heavy rifled gun was done by the Mound City, Lieut.-Commanding Byron Wilson. I then pushed the Benton, Mound City, and Carondelet up to the water batteries, leaving the Tuscumbia, which is still out of repair, to keep the hill batteries from firing on our vessels after they had passed by. The three gunboats passed up slowly, owing to the strong current, the Mound City leading, the Benton following, and the Carondelet astern. The water batteries opened furiously, supported by a hill battery on the starboard beam of the vessels. The vessels advanced to within 440 yards (by our marks), and returned the fire for two hours without cessation, the enemy's fire being very accurate and incessant.

Finding that the hill batteries behind us were silenced, I ordered up the Tuscumbia to within 200 yards of the batteries, but her turret was soon made untenable. Not standing the enemy's shot, I made her drop down. I had been engaged with the forts an hour longer than Gen. Grant asked. The vessels had all received severe shots under water, which we could not stop up while in motion, and not knowing what might have delayed the movement of the army, I ordered the vessels to drop out of fire, which they did in a cool, handsome manner. This was the hottest fire the gunboats have ever been under, but owing to

the water batteries being more on a level with them than usual, the gunboats threw in their shells so fast that the aim of the enemy was not very good. The enemy hit our vessels a number of times, but, fighting bow on, they did but little damage. Not a man was killed, and only a few wounded. I had only ammunition enough for a few minutes longer, and set all hands to work to fill up from our depot below.

After dropping back I found that the enemy had taken possession again of one of the lower hill batteries, and was endeavoring to remount his guns, and had mounted a 12-pounder field piece to fire at General McArthur's troops, which had landed a short time before at Warrenton. I sent the Mound City and the Carondelet to drive him off, which they did in a few moments.

I beg leave to enclose a letter from Gen. McArthur, explaining why he did not, to use his own expression, take advantage of the result gained by the gunboats.

I have since learned through General Grant, that the army did assault at the right time vigorously. In the noise and smoke we could not hear or see it. The gunboats were, therefore, still fighting when the assault had proved unsuccessful. The army had terrible work before them, and are fighting as well as soldiers ever fought before, but the works are stronger than any of us dreamed of. Gen. Grant and his soldiers are confident that the brave and energetic generals in the army will soon overcome all obstacles and carry the works.

(Signed)

DAVID D. PORTER,

Acting Rear-Admiral, Com. Miss. Squadron.

Hon. G. WELLES, Secretary of the Navy.

Gen. Grant now determined upon a regular siege of Vicksburg, and immediately began to mine the lines. The orders given to the enemy, by Gen. Pemberton, forbade the waste of ammunition, and thus Gen. Grant was able to commence throwing up works and erecting forts within a short distance of the opposing line of breastworks. The firing upon the town was made only during the day, until the 26th of May, after which it was continued day and night. The mortars on the peninsula opposite Vicksburg opened fire on the 25th, and continued it until the surrender. It was estimated at Vicksburg that as many as 6,000 mortar shells were thrown into the town every twenty-four hours, and on the line in the rear of the city, as many as 4,000 in the same time. Of the women and children remaining in the city, three were killed and twelve wounded during the siege. During about five days after the siege commenced, the troops in the city were allowed full rations. At the expiration of that time, they were gradually reduced to the following amount: four ounces of flour, four ounces of bacon, one and a half ounce of rice, two ounces of peas, not eatable, and three ounces of sugar, making a total of fourteen and a half ounces of food daily. The extent of the works, and the limited number of the Confederate troops, required every man to defend their lines, and no time was allowed to rest. Whole companies laid back of their breastworks for three weeks without leaving the line for a moment. The sharpshooters of Gen. Grant's army were regarded by the enemy as splendid shots, and after the first few days of the siege it was dangerous for any one

of the enemy to look over their breastworks. In one instance, a hat placed on a stick, and held above a port for two minutes, was pierced by fifteen balls. The sharpshooters of the enemy were no less expert. The garrison was buoyed up with the hope of relief by an attack upon the rear of Gen. Grant's army by Gen. Johnston, who was gathering troops in Mississippi.

Meantime every effort was made to strengthen the force under the command of Gen. Grant. He had already ordered a division under Gen. Lanman and four regiments at Memphis to join him. He now brought forward the divisions of Gens. Smith and Kimball, of the sixteenth army corps, and placed them under the command of Maj.-Gen. C. C. Washburn. On the 11th of June, Maj.-Gen. F. J. Herron's division, from the department of Missouri, arrived, and on the 14th, two divisions of the ninth army corps, Maj.-Gen. J. G. Parke commanding, reached Vicksburg. These two divisions were a part of the forces of Gen. Burnside, commanding in the Department of Ohio. This increase of the forces of Gen. Grant enabled him to make the investment of Vicksburg more complete, and at the same time left him a large reserve with which to watch the movements of Gen. Johnston.

These reinforcements were arranged by placing Gen. Herron's division on the extreme left, south of the city. Gen. Lanman's division was placed between Gens. Herron and McClernand. Gen. Smith's and Gen. Kimball's divisions and the force under Gen. Parke were sent to Haines's Bluff. This place was now fortified on the land side, and every preparation made to resist a heavy force. About the 25th of June, Gen. Johnston crossed the Big Black river with a portion of his force, and everything indicated that he would make an attack. The position of Gen. Grant before Vicksburg having been made as strong against a sortie of the enemy as their works were against an assault, he placed Gen. Sherman in command of all the troops designated to look after Gen. Johnston. The force so designated, in addition to that at Haines's Bluff, was one division from the thirteenth, fifteenth, and seventeenth army corps each, and Gen. Lanman's division. As Gen. Johnston did not make the attack at the time it was expected, Gen. Grant determined to attack him as soon as Vicksburg was taken. He accordingly notified Gen. Sherman that another assault on Vicksburg would be made at daylight on the 6th of July, and ordered him to have up supplies of all descriptions, and to be ready to move upon the receipt of further orders, if the assault should prove successful. Gen. Sherman made his preparations immediately, and was ready to move earlier than the time appointed.

On the 6th of June an attack was made on Milliken's Bend, in which the enemy were repulsed. The Union loss was 101 killed, 285 wounded, and 266 missing. Gen. Halleck, in his report, says: "It is represented that the

colored troops, in this desperate engagement, fought with great bravery, and that the rebels treated this class of prisoners of war, as well as their officers, with great barbarity. It has not been possible, however, to ascertain the correctness of the representations in regard to the treatment of these prisoners." A number of skirmishes also took place along the Tensas from Lake Providence to Richmond. The great object of the enemy in these movements was ultimately to approach Vicksburg from the west. All this time the works of the siege were pushed forward. But from the 22d of May to the 25th of June, no attempt upon the city of any serious nature was made, with the exception of the attack of the gun-boat Cincinnati, for the purpose of silencing one of the land batteries. The report of this attack was thus made by the officer in charge:

MISSISSIPPI SQUADRON, FLAG SHIP BLACK HAWK, }
ABOVE VICKSBURG, May 27th, 1863. }

To Rear-Admiral D. D. Porter :

SIR: In obedience to your order, the Cincinnati got under way this morning at seven o'clock, and steamed slowly down until a little abreast of where the mortars lie. When we rounded to, the enemy fired several shots from a gun called "Whistling Dick," but soon gave it up. At half past eight, with a full head of steam, we stood for the position assigned us. The enemy fired rapidly and from all their batteries. When abreast of our pontoon, and rounding to, a ball entered the magazine, and she commenced sinking rapidly. Shortly after the starboard tiller was carried away. Before and after this the enemy fired with great accuracy, hitting us nearly every time. We were especially annoyed by plunging shots from the hills, and 8-inch rifled and 10-inch smooth-bore shots did us much damage. The shots went entirely through our protection—hay and wood. And now, finding that the vessel would sink, I ran her up stream as near the right-hand shore as our damaged steering apparatus would permit. About ten minutes before she sank we ran close in, got out one plank, and put the wounded ashore. We also got a hawser out to make fast to a tree to hold her until she sank. Unfortunately, the men ashore left the hawser without making it fast. The enemy were still firing, and the boat commenced drifting out. I sang out to the men to swim ashore, thinking we were in deeper water (as was reported) than we really were. I suppose about fifteen were drowned and twenty-five killed and wounded, and one probably taken prisoner. This will sum up our whole loss. The boat sank in about three fathoms of water; she lies level and can easily be raised, but lies within range of the enemy's batteries. The vessel went down with her colors nailed to her mast, or rather to the stump of one, all three having been shot away. Our fire, until the magazine was drowned, was good, and I am satisfied did damage. We only fired at a two-gun water battery.

Very respectfully, &c,

GEO. M. BACHE, Lieut. Commanding.

The progress of the mining operations was such, that on the 25th of June a fort, on the immediate right of the Jackson road, was blown up. It was occupied by the Third Louisiana regiment. Its destruction had been anticipated by the enemy, and most of the force was previously withdrawn to an inner line of intrenchments, so that only a few men were wounded by the explosion. As soon as it had been destroyed, a strong column advanced to storm the line, which was met by a force of the enemy, consisting of the Sixth Missouri, and a bloody

contest ensued, in which the loss was severe on both sides. The Federal force then retired.

On the 29th of June, the same portion of the enemy's line was again blown up, but no attempt to charge was made. All attempts to countermine, on the part of the enemy, were signally unsuccessful, owing to the position of Gen. Grant's works. The state of affairs within the city at this time is thus described by a Confederate officer: "About the thirty-fifth day provisions began to get very scarce, and the advent of Gen. Johnston's relieving force was anxiously and momentarily looked for. Mule meat was the common fare of all alike, and even dogs became in request for the table. Bean meal was made into bread, and corn meal into coffee, and in these straits the garrison patiently dragged on the weary length of one day after another, under a scorching sun, the stench from the unburied corpses all around alone causing the strongest minded, firmest nerved to grow impatient for the day of deliverance. The enemy pushed their works: they blew up several forts, and with them the garrison, and attempted to charge; but the meagre and famished yet steadfast garrison still defiantly held the key of the Mississippi. But everything must have an end. Gen. Pemberton learned from Gen. Johnston that he could not afford him relief, and as the garrison was too famished and reduced to cut its way out, he determined to capitulate."

On the 3d of July, about half past seven in the morning, a flag of truce was seen on the crest of a hill above the camp of Gen. Burbridge. An officer was sent to escort the bearers of it, two Confederate officers, blindfold, to the tent of Gen. A. J. Smith, whose front they entered. These officers were Major-Gen. Bowen and Col. Montgomery, of Virginia. They were the bearers of the following despatch from Lieut.-Gen. Pemberton to Gen. Grant:

HEADQUARTERS, VICKSBURG, July 3d, 1863.

Maj.-Gen. U. S. Grant, commanding U. S. Forces :

GENERAL: I have the honor to propose to you an armistice for blank hours, with a view of arranging terms for the capitulation of Vicksburg. To this end, if agreeable to you, I will appoint three commissioners to meet a like number to be named by yourself, at such place and hour to-day as you may find convenient. I make this proposition to save the further effusion of blood, which must otherwise be shed to a frightful extent, feeling myself fully able to maintain my position a yet indefinite period. This communication will be handed you, under a flag of truce, by Major-Gen. James Bowen.

Very respectfully, your obedient servant,

JOHN C. PEMBERTON.

To this despatch Gen. Grant replied as follows:

HEADQUARTERS DEPARTMENT OF TENNESSEE, IN THE }
FIELD NEAR VICKSBURG, July 3d, 1863. }

Lieut.-Gen. J. C. Pemberton, commanding Confederate Forces, &c. :

GENERAL: Your note of this date, just received, proposes an armistice for several hours, for the purpose of arranging terms of capitulation, through commissioners to be appointed, &c. The effusion of blood you propose stopping by this course can be ended at any time you may choose, by an unconditional surrender of the city and garrison. Men who have shown so much en-

duration and courage as those now in Vicksburg will always challenge the respect of an adversary, and I can assure you will be treated with all the respect due them as prisoners of war. I do not favor the proposition of appointing commissioners to arrange terms of capitulation, because I have no other terms than those indicated above.

I am, General, very respectfully, your obedient servant,
U. S. GRANT, Major-General.

Gen. Bowen, the bearer of Gen. Pemberton's letter, expressed to Gen. Smith a strong desire to converse with Gen. Grant, and accordingly Gen. Grant, while declining this, requested Gen. Smith to say if Gen. Pemberton desired to see him, an interview would be granted between the lines, in McPherson's front, at any hour in the afternoon which Gen. Pemberton might appoint. A message was soon sent back to Gen. Smith, appointing three o'clock as the hour. At that time Gen. Grant, with his staff and Gens. McPherson, Ord, A. J. Smith, and Logan, was at the place, which was a fruit orchard midway between the front of the two contending forces. Gen. Pemberton soon came, attended by Gen. Bowen and Col. Montgomery. As the two commanders drew near each other, both, as though involuntarily, paused. The slight embarrassment was brought to a close by Col. Montgomery, who stepped forward and formally introduced them. They shook each other by the hand, and, after a few words, Gen. Grant proposed a private conversation, which was accepted, and the two generals stepped aside. The conference closed by Gen. Grant saying that he would send his proposition in writing. After an interview with his officers at his headquarters, Gen. Grant sent the following letter, by Gen. Logan and Col. Wilson, to Gen. Pemberton:

HEADQUARTERS DEPARTMENT OF THE TENNESSEE, }
NEAR VICKSBURG, July 3d, 1863. }

Lieut.-Gen. J. C. Pemberton, commanding Confederate Forces, Vicksburg, Miss. :

GENERAL: In conformity with agreement of this afternoon, I will submit the following proposition for the surrender of the city of Vicksburg, public stores, &c. On your accepting the terms proposed, I will march in one division as a guard, and take possession at eight A. M. to-morrow. As soon as paroles can be made out, and signed by officers and men, you will be allowed to march out of our lines—the officers taking with them their regimental clothing, and staff, field, and cavalry officers one horse each. The rank and file will be allowed all their clothing, but no other property. If these conditions are accepted, any amount of rations you may deem necessary can be taken from the stores you now have, and also the necessary cooking utensils for preparing them. Thirty wagons also, counting two two-horse or mule teams as one, will be allowed you to transport such articles as cannot be carried along. The same conditions will be allowed to all sick and wounded officers and privates as fast as they become able to travel. The paroles for these latter must be signed, however, whilst officers are present authorized to sign the roll of prisoners.

I am, General, very respectfully,
Your obedient servant,
U. S. GRANT, Major-General.

About the dawn of day, on the morning of July 4th, the following reply was received from Gen. Pemberton:

HEADQUARTERS, VICKSBURG, July 3d, 1863.

Major-Gen. U. S. Grant, commanding United States Forces, etc.

GENERAL: I have the honor to acknowledge the receipt of your communication of this date, proposing terms for the surrender of this garrison and post. In the main, your terms are accepted; but in justice both to the honor and spirit of my troops, manifested in the defence of Vicksburg, I have the honor to submit the following amendments, which, if acceded to by you, will perfect the agreement between us: At ten o'clock to-morrow, I propose to evacuate the works in and around Vicksburg, and to surrender the city and garrison under my command by marching out with my colors and arms, and stacking them in front of my present lines, after which you will take possession. Officers to retain their side arms and personal property, and the rights and property of citizens to be respected. I am, General, yours, very respectfully,

J. C. PEMBERTON, Lieutenant-General.

To this letter Gen. Grant immediately replied as follows:

HEADQUARTERS DEPARTMENT OF THE TENNESSEE, }
BEFORE VICKSBURG, July 4th, 1863. }

Lieut.-Gen. J. C. Pemberton, commanding Forces in Vicksburg :

GENERAL: I have the honor to acknowledge your communication of 3d July. The amendments proposed by you cannot be acceded to in full. It will be necessary to furnish every officer and man with a parole, signed by himself, which, with the completion of the rolls of prisoners, will necessarily take some time. Again, I can make no stipulation in regard to the treatment of citizens and their private property. While I do not propose to cause any of them any undue annoyance or loss, I cannot consent to leave myself under restraint by stipulations. The property which officers can be allowed to take with them will be as stated in proposition of last evening; that is, officers will be allowed their private baggage and side arms, and mounted officers one horse each. If you mean by your proposition for each brigade to march to the front of the lines now occupied by it, and stack their arms at ten o'clock A. M., and then return to the inside and remain as prisoners until properly paroled, I will make no objections to it. Should no modification be made of your acceptance of my terms by nine o'clock A. M., I shall regard them as having been rejected, and act accordingly. Should these terms be accepted, white flags will be displayed along your lines, to prevent such of my troops as may not have been notified from firing upon your men.

I am, General, very respectfully, your obedient servant,
U. S. GRANT,

Major-General U. S. Army.

To this letter the following answer was received:

HEADQUARTERS VICKSBURG, July 4th, 1863.

Major-Gen. U. S. Grant, commanding U. S. Forces, &c. :

GENERAL: I have the honor to acknowledge the receipt of your communication of this date, and in reply to say that the terms proposed by you are accepted.

Very respectfully, your obedient servant,
J. C. PEMBERTON, Lieutenant-General.

Of the terms of the surrender, Gen. Grant thus speaks in his report: "These terms I regarded more favorable to the Government than an unconditional surrender. It saved us the transportation of them North, which at that time would have been very difficult, owing to the limited amount of river transportation on hand, and the expense of subsisting them. It left our army free to operate against Johnston, who was threatening us from the direction of Jack-

son; and our river transportation to be used for the movement of troops to any point the exigency of the service might require."

At ten o'clock on the 4th, the Confederate forces marched out and stacked arms in front of their works, while Gen. Pemberton appeared for a moment with his staff upon the parapet of the central front. The city was immediately after occupied by the divisions of Gens. Logan, J. E. Smith, and Herron.

The part taken by the naval force in these operations is thus summarily described by Rear-Admiral Porter, in a despatch to the Secretary of the Navy, as follows:

U. S. MISSISSIPPI SQUADRON,
FLAG SHIP BLACK HAWK, *July 4th, 1863.* }

SIR: I have the honor to inform you that Vicksburg has surrendered at last to the United States forces, after a desperate but vain resistance. That she has not done so sooner has not been for want of ability on the part of our military commanders, but from the magnitude of the defences, which were intended to repulse any force the Government could possibly send there. What bearing this will have on the rebellion remains yet to be seen, but the magnitude of the success must go far toward crushing out this revolution, and establishing once more the commerce of the States bordering on this river. History has seldom had an opportunity of recording so desperate a defence on one side, with so much courage, ability, perseverance and endurance on the other; and if ever an army was entitled to the gratitude of a nation, it is the Army of the Tennessee and its gallant leaders.

The navy has necessarily performed a less conspicuous part in the capture of Vicksburg than the army; still it has been employed in a manner highly creditable to all concerned. The gunboats have been constantly below Vicksburg in shelling the works, and with success coöperating heartily with the left wing of the army. The mortar boats have been at work for forty-two days without intermission, throwing shells into all parts of the city, even reaching the works in the rear of Vicksburg and in front of our troops, a distance of three miles. Three heavy guns placed on scows, a nine-inch, ten-inch, and a one-hundred-pounder rifle were placed in position a mile from the town, and commanded all the important water batteries. They have kept up an accurate and incessant fire for fourteen days, doing all the damage that could be done by guns under such circumstances. Five eight-inch, two nine-inch, two forty-two-pounder rifles, four thirty-two-pounder shell guns have been landed, at the request of the different generals commanding corps, from the gunboats, and mounted in the rear of Vicksburg; and whenever I could spare the officers and men from our small complement, they were sent to manage the guns, with what ability I leave the general commanding the forces to say.

In the mean time, I stationed the smaller class of gunboats to keep the banks of the Mississippi clear of guerillas, who were assembling in force, and with a large number of cannon, to block up the river and cut off the transports bringing down supplies, reinforcements, and ammunition for the army. Though the rebels on several occasions built batteries, and with a large force attempted to sink or capture the transports, they never succeeded, but were defeated by the gunboats with severe loss on all occasions. Without a watchful care over the Mississippi, the operations of the army would have been much interfered with; and I can say honestly that officers never did their duty better than those who have patrolled the river from Cairo to Vicksburg. One steamer only was badly disabled since our operations commenced, and six or seven men killed and wounded.

While the army have had a troublesome enemy in front and behind them, the gunboats, marine brigade,

under Gen. Ellet, and a small force under Gens. Dennis and Mower, have kept at bay a large force of rebels, over twelve thousand strong, accompanied by a large quantity of artillery. Though offered battle several times and engaged, they invariably fled, and satisfied themselves by assailing half-disciplined and unarmed blacks. The capture of Vicksburg leaves a large army and naval force free to act all along the river, and I hope soon to add to my department the vessels which have been temporarily lost to the service, viz., the *Indianola* and *Cincinnati*. The effect of this blow will be felt far up the tributaries of the Mississippi. The timid and doubtful will take heart, and the wicked will, I hope, cease to trouble us, for fear of the punishment which will sooner or later overtake them.

There has been a large expenditure of ammunition during the siege. The mortars have fired seven thousand mortar shells, and the gunboats four thousand five hundred. Four thousand five hundred have been fired from the naval guns on shore, and we have supplied six thousand to the different army corps.

DAVID D. PORTER,
A. R.-Admiral, comm'g Mississippi Squadron.
Hon. GIDEON WELLES, Sec'y of the Navy.

The result of his operations is thus summed up by Gen. Grant: "The result of this campaign has been the defeat of the enemy in five battles outside of Vicksburg; the occupation of Jackson, the capital of the State of Mississippi, and the capture of Vicksburg and its garrison and munitions of war; a loss to the enemy of thirty-seven thousand (37,000) prisoners, among whom were fifteen general officers; at least ten thousand killed and wounded, and among the killed, Generals Tracy, Tilghman, and Green; and hundreds, and perhaps thousands, of stragglers, who can never be collected and reorganized. Arms and munitions of war for an army of sixty thousand men have fallen into our hands, besides a large amount of other public property, consisting of railroads, locomotives, cars, steamboats, cotton, &c., and much was destroyed to prevent our capturing it.

"Our loss in the series of battles may be summed up as follows:

	Killed.	Wounded.	Missing.
Port Gibson.....	130	718	—
Fourteen Mile Creek (skirmish).....	4	24	5
Raymond.....	69	341	32
Jackson.....	40	240	6
Champion's Hill.....	426	1,842	189
Big Black railroad bridge.....	29	242	2
Vicksburg.....	545	3,688	303

"Of the wounded, many were but slightly wounded, and continued on duty; many more required but a few days or weeks for their recovery. Not more than one-half of the wounded were permanently disabled."

On Saturday, the 11th of July, the force of Gen. Pemberton, having been paroled, marched from Vicksburg, and arrived at the Big Black river at night. Thence they were distributed to different parts of the South.

On the 13th of July, the President addressed the following letter to Gen. Grant:

EXECUTIVE MANSION, WASHINGTON, *July 13th, 1863.*

MY DEAR GENERAL: I do not remember that you and I ever met personally. I write this now as a

grateful acknowledgment for the almost inestimable service you have done the country. I wish to say a word further. When you first reached the vicinity of Vicksburg, I thought you should do what you finally did—march the troops across the neck, run the batteries with the transports, and thus go below; and I never had any faith, except a general hope that you knew better than I, that the Yazoo Pass expedition and the like could succeed. When you got below and took Port Gibson, Grand Gulf, and vicinity, I thought you should go down the river and join Gen. Banks, and when you turned northward, east of the Big Black, I feared it was a mistake. I now wish to make the personal acknowledgment that you were right and I was wrong.

Yours, very truly, A. LINCOLN.

Major-General GRANT.

Major-Gen. Halleck, the General-in-Chief, in his annual report, thus speaks of Gen. Grant's operations: "When we consider the character of the country in which this army operated, the formidable obstacles to be overcome, the number of forces and the strength of the enemy's works, we cannot fail to admire the courage and endurance of the troops, and the skill and daring of their commander. No more brilliant exploit can be found in military history. It has been alleged, and the allegation has been widely circulated by the press, that Gen. Grant, in the conduct of his campaign, positively disobeyed the instructions of his superiors. It is hardly necessary to remark, that Gen. Grant never disobeyed an order or instruction, but always carried out to the best of his ability, every wish or suggestion made to him by the Government. Moreover, he has never complained that the Government did not furnish him all the means and assistance in its power, to facilitate the execution of any plan he saw fit to adopt."

After the capture of Vicksburg, Gen. Grant reported that his troops were so much fatigued and worn out with forced marches and the labors of the siege, as to absolutely require several weeks of repose, before undertaking another campaign. Nevertheless, as the exigencies of the service seemed to require it, he sent out those who were least fatigued, on several important expeditions, while the others remained at Vicksburg, to put that place in a better defensive condition for a small garrison.

Immediately upon the surrender of the city, Gen. Sherman, with his force increased by the remainder of both the thirteenth and fifteenth corps, moved in pursuit of Gen. Johnston. When Gen. Grant moved his army from Jackson to Vicksburg, Gen. Johnston moved north to Canton. It now became the object of Gen. Johnston to collect a force to attack the rear of Gen. Grant. His energies were thus devoted during the whole siege of Vicksburg. Yet the country had been so exhausted of men to fill the army in Virginia, a force could not be obtained sufficient to rescue Vicksburg. With the troops which he had collected, he now approached the rear of the Federal army. The country for fifty miles around Vicksburg had—by orders of Gen. Grant on the 26th of May—been laid waste by Gen. Blair, who drove

off the white inhabitants and burned the grist mills, cotton gins, and granaries, and destroyed the crops.

The result of the expedition of Gen. Sherman is thus stated in the despatches of Gen. Grant:

VICKSBURG, July 15th.

To Major-Gen. Halleck, General-in-Chief:

General Sherman has Jackson invested from Pearl river on the north to the river on the south. This has cut off many hundred cars from the Confederacy. Sherman says he has force enough, and feels no apprehension about the results.

Finding that Yazoo City was being fortified, I sent Gen. Herron there with his division. He captured several hundred prisoners, five pieces of heavy artillery, and all the public stores fell into our hands. The enemy burned three steamboats on the approach of the gunboats. The De Kalb was blown up and sunk in fifteen feet of water, by the explosion of a shell.

Finding that the enemy was crossing cattle for the rebel army at Natchez, and were said to have several thousand there, I have sent troops and steamboats to collect them, and destroy all their boats and means for making more.

(Signed)

U. S. GRANT, Major-General.

VICKSBURG, July 15th.

To Major-Gen. H. W. Halleck, General-in-Chief:

Joe Johnston evacuated Jackson the night of the 16th instant. He is now in full retreat east. Sherman says most of his army must perish from heat, lack of water, and general discouragement.

The army paroled here have, to a great extent, deserted, and are scattered over the country in every direction.

General Ransom was sent to Natchez to stop the crossing of cattle for the eastern army. On arrival, he found large numbers had been driven out of the city to be pastured. Also, that munitions of war had recently been crossed over to wait for Kirby Smith. He mounted about 200 of his men and sent them in both directions. They captured a number of prisoners, 5,000 head of Texas cattle, 2,000 head of which were sent to Gen. Banks, the balance have been and will be brought here. In Louisiana they captured more prisoners, and a number of teams loaded with ammunition. Over 2,000,000 rounds of ammunition were brought back to Natchez with the teams captured; and 268,000 rounds, besides artillery ammunition, were destroyed. (Signed) U. S. GRANT,

Major-Gen. Commanding.

The destruction of property at Jackson was most complete. On the south the railroad was injured as far as Brookhaven, a distance of fifty miles. On the north it was torn up at intervals for twenty miles. At Jackson extensive machine shops, five locomotives, and a large number of cars were destroyed by fire. The road east was torn up at intervals to Brandon, fifteen miles. The bridges at Jackson, some of which were costly, were also destroyed. This destruction secured Gen. Grant in the undisturbed possession of the western part of the State. The city was formerly one of the most prosperous in the Southern States. It was thus described at the time of its capture: "As the seat of government, it has the capitol buildings, the penitentiary, the governor's house, the asylum for the deaf and dumb and the insane; and in addition a fine court house, two excellent hotels, large blocks of stores, a cotton factory, a couple of foundries, grist mills, and a large number of splendid

residences. The site of the city, upon the right bank of the Pearl river—a stream of rare beauty—is very fine. The business portion is divided into small lots, and the buildings, generally of brick, are placed in compact blocks. The portion for residences, however, is in marked contrast with the other. Here the lots contain from one acre to five, and in the suburbs over ten acres, according to the ability or taste of the owners. These grounds are laid off in excellent taste. Neatly trimmed hedges line the gravelled walks. The luxuriant shrubbery and gorgeous flowers of the genial South greet the eye in endless profusion and variety. Beautiful arbors, in some cool, shady spot, invite the stranger. And trees, loaded with ripened figs and peaches, and all that is delicious, bend to the hand that will pluck their treasures. In the midst, as far as possible removed from the dust and din of the street, and embowered in magnificent liveoaks and grand old cedars, stand the mansions. They are as different as the varied tastes and conditions of their respective owners, but they all bear an air of comfort and luxury, which proclaims the cultivated tastes and generous fortunes of their occupants. The buildings are not only models of architectural taste, but they are furnished with unusual richness, amounting in many cases to extravagance. This was the Jackson of the past. The Jackson of to-day is quite another place, for the fortunes of war have borne heavily upon it. The penitentiary, one of her fine hotels, her cotton factory, founderies, a whole block of stores, several warehouses, and the railroad bridge and depot buildings were destroyed while the Federal troops occupied the city in May. The reoccupation and evacuation by the Confederate armies cost her another large block of stores and the other hotel. The present occupation by the Federal army has well-nigh served to blot the place from existence. The first few hours were devoted by our soldiers to ransacking the town, and appropriating whatever of value or otherwise pleased their fancy, or to the destruction of such articles as they were unable to appreciate or remove. Pianos and articles of furniture were demolished, libraries were torn to pieces and trampled in the dust, pictures thrust through with bayonets, windows broken and doors torn from their hinges. Finally, after every other excess had been committed in the destruction of property, the torch was applied. From that hour to the present, there has scarcely been a moment when the citizens could not walk the streets by the light of blazing buildings. The entire business portion of the city is in ruins, with the exception of a few old frame buildings, which the citizens must have long regarded as an injury to the place. One residence after another has been burned, until none of the really fine ones remain, save those occupied as quarters by some of our general officers. The State house and court house

and insane asylum are preserved and under guard. It is not improbable, however, that they, together with all the remaining residences worth anything, will be fired by our rear guard when we leave the city to-night. Of the Jackson of a few days ago, not above one fourth of the houses remain, and they are nearly all the residences of the poorer classes."

Another circumstance attended the return of the force of Gen. Sherman to Vicksburg, which is so peculiar to army movements into the Southern States, that a mention of it should not be omitted.

The return of the army from Jackson was the occasion of a remarkable exodus of negroes. There were few able-bodied young men among them, for it is the policy of the masters to move that class farther south, and leave only the old and helpless behind them. But all the old men and women and the young children in the whole region of country around Jackson—those who have been a burden upon their masters, and will necessarily be dependent on our charity—accompanied the army on its return, in large numbers. Every species of vehicle, and an untold number of broken-down horses and mules, were pressed into the service by the contrabands *en route* for Vicksburg. Their effects consisted of a wonderful quantity of old clothing and bedding, and dilapidated furniture, which they seemed to regard as of inestimable value. The transportation, however, was not sufficient for all, and hundreds, carrying as many as possible of the movable articles, trudged along on foot. All seemed animated by a fear that our rear guard would overtake, pass, and leave them behind, and such a straining of energies, hurrying and bustling, were never before known among the whole black creation. The soldiers were particularly struck with the ludicrous appearance presented by the darkies, and the tedium and fatigue of the march were often relieved by good jokes cracked at their expense, which served to convulse the whole brigade with laughter.

"The minds of all of them are filled with the most extravagant ideas of the North. It is to them a country of ease and plenty and happiness, and say and do what you will, as soon as the military blockade is made less stringent, they will go North, if they accomplish the distance on foot. They don't feel safe here, not even those whose owners are dead."

A military and naval force was sent to Yazoo City, on the 13th. It took three hundred prisoners, captured one steamer and burned five, took six cannon, two hundred and fifty small arms, and eight hundred horses and mules. No loss on our side was reported. Small expeditions were also sent against Canton, Pontotoc, Granada, and Natchez, Mississippi. At Granada, a large amount of railroad rolling stock was destroyed. The other expeditions were also successful, meeting with very little opposition. As soon as his army was

supplied and rested, Gen. Grant sent a force under Gen. Steele to Helena, to coöperate with Gen. Schofield's troops against Little Rock, and another, under Gens. Ord and Herron, to New Orleans, to reënforce Gen. Banks for such ulterior operations as he might deem proper to undertake. Some expeditions were also sent to the Red river, and to Harrisonburg and Monroe, on the Washita, to break up and destroy guerilla bands.

After Gen. Grant left Vicksburg to assume the general command east of the Mississippi, Gen. McPherson moved with a part of his force to Canton, Mississippi, scattering the enemy's cavalry, and destroying his materials and roads in the centre of that State.

The reader's attention has thus far been occupied with the military operations before Vicksburg, which, however, were only the prominent features of a great campaign extending from Washington to New Orleans. The movements of General Banks, particularly against Port Hudson, which fell with the fall of Vicksburg, and the advance of General Lee upon Washington, one object of which was to make a diversion in favor of Vicksburg, or rather to take advantage of the concentration of so large a force at such a distance, were incidents of the same campaign, the conclusion of which cannot be justly weighed and estimated until the objects and results of these movements are considered.

In November, 1862, General Banks sailed for New Orleans, where he arrived on the 14th of December. Some time previous he had been engaged in preparing a military force to be under his command. The fleet, which sailed at the same time, consisted of twenty-six steam vessels and twenty-five sailing vessels, and the military force about ten thousand men. Some disasters happened to a few of the vessels, which led to an investigation by a committee of Congress. They reported that "economy and safety would have dictated the employment of a larger proportion of sail vessels, but they supposed these considerations were made subordinate to the necessity for despatch. The sail vessels were generally of the first class; the steam transports were of three classes—the sea steamers, the steam tugs, and the inland transports. The former were well adapted to the service; the latter were not." Immediately upon his arrival, General Banks took the position of General Butler as commander of the Department of the Gulf, and the latter reported at Washington. The leading objects of General Banks's expedition were to strengthen the military in Louisiana, and to coöperate in opening the Mississippi—two points on the banks of which were known to be strongly fortified—Port Hudson and Vicksburg. It was anticipated that these works might be reduced in a short time, and that the strength of General Banks might be sufficient for a movement on Texas. But it was soon perceived, after his arrival in New Orleans, that military affairs

were in such an uncertain condition that the moment for immediate activity could not be determined. Meanwhile General Banks devoted his attention to the arrangement of affairs at New Orleans. Nothing of importance occurred, unless it was a small affair on the Teche river, in which Commander Buchanan, of the gunboat Calhoun, was killed, early in January. In March, General Banks had concentrated his force at Baton Rouge, numbering nearly twenty-five thousand men. On the 13th a military movement on Port Hudson was ostensibly commenced, to divert the attention of the enemy, while the vessels ran above the batteries. The naval force was under the command of Admiral Farragut. Its result was to transfer a portion of the fleet above Port Hudson, where it could coöperate with the force above, and also cut off supplies to the enemy from Red river. Maj.-Gen. Halleck, in his annual report, says: "Had our land forces invested Port Hudson, at this time, it would have been easily reduced, as its garrison was weak. This would have opened communication by the Mississippi river with Gen. Grant at Vicksburg. But the strength of the place was not then known."

The naval force consisted of the frigates Hartford, Mississippi, Richmond, and Monongahela, and the gunboats Albatross, Genesee, Kineo, Essex, and Sachem, and six mortar schooners. They reached Profit's Island, five miles below Port Hudson, early the next morning. At one p. m., the mortars and the gunboats Sachem and Essex, being in position, opened fire on the batteries at Port Hudson. The line of the batteries commenced below the town and extended on the face of the bluff, midway between the crest and the river bank, about three and a half miles. At nine and a half o'clock that night the signal to advance was made. The Hartford, Capt. Palmer, with Admiral Farragut on board, with the gunboat Albatross, Lieut.-Com. Hart, lashed to her side, took the lead. The Richmond, Capt. Alden, the gunboat Genesee, Commander McComb, the Monongahela, Capt. McKinsty, the Kineo, Lieut.-Com. Waters, and the Mississippi, Capt. Melancthon Smith, followed in the order named. The mortars meanwhile kept up their fire. Soon after, rockets were sent up by the enemy to give warning of the approach of the fleet. As the vessels approached the batteries opened fire, which was replied to. At the same time fires were kindled by the enemy on the opposite bank of the river, which revealed the position of the vessels. The Hartford and Albatross were successful in running above the batteries, but the smoke from their fire obscured the river before the other vessels. The Richmond received a shot through her steam drum, and was compelled to drop down out of fire and anchor. Three of her crew were killed and seven wounded. The Monongahela, after her captain was seriously injured, also dropped down the river and anchored.

The Kineo received a shot through her rudder post, and her propeller was made foul by a hawser, which rendered her unmanageable, and she floated down and anchored. After the guns of the batteries were got into range the fire was so accurate and constant as to threaten the destruction of every gunboat in the fleet. The Mississippi grounded under the guns of a battery astern, another on the bow, and others opposite to her. The enemy, upon discovering her position, concentrated their nearest guns upon her. She continued her fire for some time after getting aground. Capt. Smith, finding it to be impossible to get her off, determined to abandon her. He then ordered the engines to be destroyed, the guns to be spiked, and the vessel to be set on fire. The officers and crew were then hurried off to the shore opposite the batteries. Some of the crew are supposed to have jumped overboard, a few were taken prisoners, and the rest proceeded down the shore and were taken off by the other vessels. Of two hundred and thirty-three officers and men, twenty-nine were missing. The vessel, after becoming lighter by burning her top, drifted off, and, floating down the stream, finally blew up. Her armament consisted of nineteen eight-inch, one ten-inch, one twenty-pound Parrott, and two small howitzers in the tops.

Meanwhile, at three o'clock on Friday afternoon, Gen. Grover's division marched out of Baton Rouge, followed in the evening by Gen. Emery's division, and on the next morning by that of Gen. Augur. The army reached Springfield road crossing without a skirmish. The headquarters of Gen. Banks were established here, which was about seven miles from Port Hudson. During Saturday the entire body of cavalry and some infantry regiments were sent out on the Bayou Sara road toward Port Hudson, and down the Ross and Springfield Landing roads to reconnoitre. One or two sharp skirmishes took place with a force of Confederate cavalry and infantry sent out from Port Hudson and deployed as skirmishers in the woods. Toward evening the enemy retired within their intrenchments. Two Federal officers were wounded. On Sunday morning orders were issued to return to Baton Rouge, which was accomplished by evening. On the next day, an attempt to open communication with Admiral Farragut by sending a small force across the point of land opposite Port Hudson—the fourth effort to cross the point—was successful, but Admiral Farragut had moved up the river. The difficulties were caused by a flood. The rebels had cut the levee above.

The attention of Gen. Banks was now turned to that part of the State west of New Orleans and bordering on the Teche river. Opposite New Orleans, on the other side of the Mississippi river, commences the New Orleans and Opelousas railroad, which runs westwardly a distance of eighty miles to Brashear. This

place is situated on the Atchafalaya river where it flows out of Lake Chetimacha into the Gulf of Mexico. Nearly opposite, on the western side of the river, is Berwick City, situated at the junction of the Teche river, or bayou, with the Atchafalaya. The Teche river commences in St. Landry parish, a few miles from Opelousas, and flows southeast in a very tortuous course for two hundred miles. During high water it is navigable nearly its whole length. On the banks of this river flourish the finest sugar-cane plantations in the State. The chief towns on the river are Franklin, Martinsville, and Opelousas.

A considerable force of the enemy was at this time stationed within supporting distance on the Teche. It had been kept there to repel a threatened invasion up that stream by the Federal force under Gen. Weitzel. The planters, supposing the Confederate force sufficient for their protection, had put in their crops as usual. When Gen. Weitzel made the first attempt to advance up the river, with the intention of establishing his headquarters at Franklin, the river was obstructed a few miles above its mouth. To prevent these obstructions from being removed, the enemy had thrown up earthworks, extending from the bank of the river back to an impassable swamp, and planted a battery. Here Gen. Moulton, with fifteen hundred men, aided by the gunboat Cotton, made such a stubborn resistance, that Gen. Weitzel was obliged to fall back. The enemy, supposing his object had been to capture the gunboat, removed her stores and ammunition immediately afterward, and burned her; thus showing that they apprehended a defeat on another attack. Subsequently the water washed a channel round the obstructions, and the passage up ceased to be disputed at that point. But much more formidable works were constructed a few miles above Pattersonville, and earthworks thrown up on the opposite side of the river, to prevent a flank movement by land or water. The distance at this point from the river back to the swamp was about three fourths of a mile. A small force could thus hold at bay here one greatly superior in numbers. Several thousand troops of the enemy were posted here, and those below were expected to fall back as the Federal force advanced.

It was to this region, comprising the parishes or counties of Terrebonne, Lafourche, Assumption, St. Mary, and St. Martin, that Gen. Banks now transferred his army from Baton Rouge. His object was the reclamation of this rich country, which had furnished inestimable supplies to the enemy, and which sustained a dense slave population. Having concentrated his forces at Brashear, Gen. Weitzel's brigade was crossed over to Berwick on the 10th of April. The landing was not disputed, but a reconnoissance discovered a force of the enemy, which retired. On the next day, Saturday, the infantry advanced a short distance. On Sunday, the di-

vision of Gen. Emory crossed, and the combined force made an advance, which the enemy opposed, but not obstinately. In this order the Federal column advanced, feeling its way, while the enemy, whose forces were commanded by Gen. Taylor, slowly retired upon their fortified position a few miles above Pattersonville. On the 13th there was considerable fighting, mostly with the artillery, in which the *Diana*, a Federal gunboat, captured about four weeks previous, bore a conspicuous part. On the morning of Saturday, the 12th, the division of Gen. Grover left Brashear on the gunboats *Clifton*, *Estrella*, *Arizona*, and *Calhoun*, and transports, and proceeded up the *Atchafalaya*, into *Lake Chetimacha*. The object was to get into the rear of the enemy, and if possible cut off his retreat if he evacuated his position, or to attack him in rear at the time of the attack in front. Some difficulties delayed the expedition, but it effected a landing early the next morning, about three miles west of Franklin, near a spot called *Irish Bend*. At this time the gunboat *Queen of the West*, which had been captured previously by the enemy, was blown up and destroyed on the lake. Skirmishing immediately ensued with a small force of the enemy, that fell back as Gen. Grover advanced. His position was about eleven miles distant from Gen. Banks. At *Irish Bend* the enemy seemed to be determined to make a stand, and a sharp struggle followed, in which they were forced to retire to the woods and canes. On this retreat they destroyed the gunboat *Diana* and the transports *Gossamer*, *Newsboy*, and *Era No. 2*, at Franklin. This success of Gen. Grover was followed by the evacuation of the works before Gen. Banks. Early on Tuesday morning, the cavalry and artillery, followed by Gen. Weitzel's brigade, with Col. Ingraham's force of Gen. Emory's division as a support, followed the enemy. So rapid was the pursuit that the enemy was unable to remove the transports at *New Iberia*, and five, with all the commissary stores and ammunition with which they were loaded, were destroyed at that place, together with an incomplete iron-clad gunboat. On Thursday, the army reached *New Iberia*. A foundry for the manufacture of cannon and other munitions of war was immediately taken possession of, as a similar one had been seized two days before at Franklin. Two regiments were also sent to destroy the tools and machinery at the celebrated salt mine of the town. Thus far about fifteen hundred prisoners had been captured, and more than five hundred horses, mules, and beef cattle taken from the plantations. The Federal loss was small. The entire force of the enemy was about ten thousand men.

On the next day, the 17th, the army moved forward, but Gen. Grover, who had marched from *New Iberia* by a shorter road, and thus gained the advance, met the enemy at *Bayou Vermilion*. Their force consisted of a considerable number of cavalry, one thousand in-

fantry, and six pieces of artillery, massed in a strong position on the opposite bank. They were immediately attacked and driven from their position, but not until they had succeeded in destroying by fire the bridge across the river. The night of the 17th and the next day was passed in rebuilding the bridge. On the 19th, the march was resumed, and continued to the vicinity of *Grand Coteau*; and on the next day the main force of Gen. Banks occupied *Ope-lousas*. At the same time, the cavalry, supported by a regiment of infantry and a section of artillery, were thrown forward six miles to *Washington*, on the *Courtableau*. On the 21st, no movement was made, but on the next day, *Brig.-Gen. Dwight*, of Gen. Grover's division, with detachments of artillery and cavalry, was pushed forward through *Washington* toward *Alexandria*. He found the bridges over the *Cocodrie* and *Bœuf* destroyed, and during the evening and night replaced them by a single bridge at the junction of the bayous. A steamer had just been burned by the enemy, but the principal portion of her cargo, which had been transferred to a flat, was captured. Orders were also found there from Gen. Moore to Gen. Taylor, in command of the Confederate force, directing him to retreat slowly to *Alexandria*, and, if pressed, to retire to *Texas*.

Another expedition, under *Lieut.-Col. Blanchard*, was sent out by way of *Barre's Landing*, to examine the *Bayou Courtableau* in the direction of *Bute-a-la-Rose*, but he found the roads impassable four miles beyond *Barre's Landing*. The steamer *Ellen* was captured by him, which proved a timely assistance. Previously *Bute-a-la-Rose* had been taken by orders of Gen. Banks, with its garrison of sixty men, two heavy guns, and a large quantity of ammunition. The result of the expedition thus far is thus stated by Gen. Banks: "We have destroyed the enemy's army and navy, and made their reorganization impossible by destroying or removing the material. We hold the key of the position. Among the evidences of our victory are two thousand prisoners, two transports, and twenty guns taken, and three gunboats and eight transports destroyed."

On the 6th of May, *Admiral Porter* appeared before *Alexandria* with a fleet of gunboats, and took possession of the town without opposition. On that evening the cavalry of Gen. Dwight dashed into the place, and the next morning the advance of Gen. Banks arrived. *Alexandria* is the capital of *Rapides parish* in *Louisiana*. It is situated on the *Red river*, about one hundred and fifty miles from its mouth, and in the centre of a rich cotton-growing region.

The country thus occupied by Gen. Banks was the most fertile portion of the State of *Louisiana*. His movements had been so rapid that the enemy had been allowed no opportunity to make a stand against him after their defeat near *Franklin*. The capture of *Alexandria* and the attack on *Fort de Russe* below, was reported by *Admiral Porter*, with his movements, thus:

MISSISSIPPI SQUADRON, FLAG SHIP GENERAL PRICE, }
 GRAND GULF, MISS., May 13th. }

To Secretary Welles :

SIR : I had the honor to inform you from Alexandria of the capture of that place, and the forts defending the approaches to the city, by the naval force under my command. Twenty-four hours after we arrived the advance guard of United States troops came into the city. Gen. Banks arriving soon after, I turned the place over to his keeping. The water beginning to fall, I deemed it prudent to return with the largest vessels to the mouth of the Red river. I dropped down to Fort de Russe in the Benton, and undertook to destroy these works. I only succeeded, however, in destroying the three heavy casemates commanding the channel and a small water battery for two guns. About 600 yards below it I destroyed by bursting one heavy thirty-two pounder and some gun carriages left in their hurry by the enemy.

The main fort, on a hill some 900 yards from the water, I was unable to attend to. It is quite an extensive work, new and incomplete, but built with much labor and pains. It will take two or three vessels to pull it to pieces. I have not the powder to spare to blow it up. The vessels will be ordered to work on it occasionally, and it will be soon destroyed. In this last-mentioned fort was mounted the 11-inch gun, which I am led to believe lies in the middle of the river, near the fort, the rebels throwing it overboard in their panic at the approach of our gunboats. The raft which closed the entrance I have blown up, sawed in two, and presented to the poor of the neighborhood. I sent Commander Woodworth in the Price, with the Switzerland, Pittsburg, and Arizona, up Black river to make a reconnoissance, and he destroyed a large amount of stores, valued at \$300,000, consisting of salt, sugar, rum, molasses, tobacco, and bacon.

(Signed)

DAVID D. PORTER,
 Acting Rear-Admiral,
 Commanding Mississippi Squadron.

While at Opelousas, Gen. Banks issued the following order :

HEADQUARTERS DEPARTMENT OF THE GULF,
 19TH ARMY CORPS, OPELOUSAS, May 1st, 1863. }

The Major-General commanding the Department proposes the organization of a corps d'armée of colored troops, to be designated as the "Corps d'Afrique." It will consist ultimately of eighteen regiments, representing all arms—infantry, artillery, cavalry—making nine brigades, of two regiments each, and three divisions of three brigades each, with appropriate corps of engineers, and flying hospitals for each division. Appropriate uniforms, and the graduation of pay to correspond with the value of services, will be hereafter awarded.

In the field, the efficiency of each corps depends upon the influence of its officers upon the troops engaged, and the practical limits of one direct command is generally estimated at 1,000 men. The most eminent military historians and commanders, among others, Thiers and Chambray, express the opinion, upon a full review of the elements of military power, that the valor of the soldier is rather acquired than natural. Nations whose individual heroism is undisputed, have failed as soldiers in the field. The European and American continents exhibit instances of this character, and the military prowess of every nation may be estimated by the centuries it has devoted to military contest, or the traditional passion of its people for military glory. With a race unaccustomed to military service, much more depends on the immediate influence of officers upon individual members, than with those that have acquired more or less of warlike habits and spirit by centuries of contest. It is deemed best, therefore, in the organization of the Corps d'Afrique, to limit the regiment to the smallest number of men consistent with efficient service in the field, in order to secure the most thorough instruction and discipline, and the largest influence of the officers over the troops. At first they will be limited to five hundred men. The

average of American regiments is less than that number.

The Commanding General desires to detail, for temporary or permanent duty, the best officers of the army, for the organization, instruction, and discipline of this corps. With their aid he is confident that the corps will render important service to the Government. It is not established upon any dogma of equality, or other theory, but as a practical and sensible matter of business. The Government makes use of mules, horses, uneducated and educated white men, in the defence of its institutions. Why should not the negro contribute whatever is in his power for the cause in which he is as deeply interested as other men? We may properly demand from him whatever service he can render. The chief defect in organizations of this character has arisen from incorrect ideas of the officers in command. Their discipline has been lax, and, in some cases, the conduct of their regiments unsatisfactory and discreditable. Controversies unnecessary and injurious to the service have arisen between them and other troops. The organization proposed will reconcile and avoid many of these troubles.

Officers and soldiers will consider the exigencies of the service in this department, and the absolute necessity of appropriating every element of power to the support of the Government. The prejudices or opinions of men are in no wise involved. The coöperation and active support of all officers and men, and the nomination of fit men from the ranks, and from the lists of non-commissioned and commissioned officers, are respectfully solicited from the Generals commanding the respective divisions.

By command of Major-Gen. BANKS.

RICHARD B. IRWIN, A. A. G.

The subsequent movements of Gen. Banks in this part of the State met with no serious opposition from the enemy. After the investment of Vicksburg, his forces were concentrated at Simmesport for an advance against Port Hudson. Meanwhile the division of Gen. Sherman, which had been quartered at New Orleans, was not inactive. A brigade was sent out under Gen. Nickerson, for the purpose of attacking any forces that the enemy might have in the neighborhood of Lake Pontchartrain. The first Texas cavalry, under Col. Davis, pushed as far as Tickfaw Station on the railroad, and captured a large amount of cotton, lumber, corn, and bacon. A lieutenant and eight men were made prisoners, among whom were fourteen Choctaw Indians. In this neighborhood a large tannery was also destroyed, and a large car shop, the Tangipaha bridge, and other valuable property. On the lake, four schooners, with cargoes of contraband goods, were burned.

The division of Gen. Augur had returned to Baton Rouge, from which a force was sent out that penetrated to a point on the railroad between Clinton and Port Hudson. A body of the enemy were encountered and routed. Of this body five were killed, several wounded, and twenty-five prisoners taken with their horses and accoutrements. About the same time Col. Grierson captured near Port Hudson three hundred head of cattle. The squadron, meanwhile, was anchored at the head of Profit's Island, not attempting any hostile demonstrations, except the mortar vessels, which at night threw a few shells into Port Hudson.

About the middle of May all the available force near the river was concentrated at Baton

Rouge, to assist in the attack on Port Hudson. Thence Gens. Augur and Sherman moved to the south and east of that position, to coöperate with Gen. Banks. From Simmesport Gen. Banks moved his army to invest Port Hudson. A portion of his infantry was transported in steamers, and the residue with the artillery and cavalry and wagon train moved down on the west bank of the river, and thence across to Bayou Sara, which is five miles above Port Hudson, on the east bank of the Mississippi river. It was on the 21st of May that Gen. Banks landed, and on the next day a junction was effected with the advance of Maj.-Gen. Augur and Brig.-Gen. Sherman. His line occupied the Bayou Sara road. On this road Gen. Augur had an encounter with a force of the enemy, which resulted in their repulse with heavy loss. On the 25th, the enemy was compelled to abandon his first line of works. On the next day Gen. Weitzel's brigade, which had covered the rear in the march from Alexandria, arrived, and on the morning of the 27th a general assault was made on the fortifications.

Port Hudson, or Hickey's Landing, as it was called some years ago, is situated on a bend in the Mississippi river, about twenty-two miles above Baton Rouge, and one hundred and forty-seven above New Orleans. Approaching Port Hudson by water from below, the first batteries were situated on a bluff about forty

feet above high water mark. Thence three series of batteries extended along the river above Port Hudson to a point on Thompson's creek, making a continuous line about three and a half miles in extent. Above Thompson's creek is an impassable marsh, forming a natural defence. From the lower battery began a line of land fortifications, of semi-circular form, about ten miles in extent, with Thompson's creek for its natural terminus above. The guns were of heavy caliber; in addition to which there were light batteries, that might be easily taken to any part of the line. The position was under the command of Col. Frank Gardner.

The fire of the artillery of Gen. Banks opened about six o'clock on the morning of the 27th, and continued with animation during the day. At ten o'clock, Gen. Weitzel's brigade, with the division of Gen. Grover—reduced to about two brigades—and the division of Gen. Emory, temporarily reduced by detachments to about a brigade, under command of Col. Paine, with two regiments of colored troops, made an assault upon the right of the enemy's works, crossing Sandy creek, and driving them through the woods into their fortifications. The fight lasted on this line until four o'clock, and was very severely contested. On the left, the infantry did not come up until later in the day; but at two o'clock an assault was commenced on the works on the centre

and left of centre, by the divisions under Maj.-Gen. Augur and Brig.-Gen. Sherman. The enemy was driven into his works, and the Federal troops moved up to the fortifications, holding the opposite sides of the parapet with the enemy. On the right, the troops continued to hold their position; but on the left, after dark, the main body, being exposed to a flank fire, withdrew to a belt of woods. The skirmishers remained close upon the fortifications. On the extreme right, the first and third regiments of negro troops were posted. Of their behavior in action, Gen. Banks thus reports: "The position occupied by these troops was one of importance, and called for the utmost steadiness and bravery in those to whom it was confided. It gives me pleasure to report that they answered every expectation. In many respects their conduct was heroic. No troops could be more determined or more daring. They made during the day three charges upon the batteries of the enemy, suffering very heavy losses, and holding their position at nightfall with the other troops on the right of our line. The highest commendation is bestowed upon them by all the officers in command on the right. Whatever doubt may have existed heretofore as to the efficiency of organizations of this character, the history of this day proves conclusively to those who were in condition to observe the conduct of these regiments, that the Government will find in this class of troops effective supporters and defenders. The severe test to which they were subjected, and the determined manner in which they encountered the enemy, leaves upon my mind no doubt of their ultimate success. They require only good officers, commands of limited numbers, and careful discipline, to make them excellent soldiers." The entire loss in killed, wounded, and missing, since landing at Bayou Sara to this time, was nearly a thousand, including some of the ablest officers of the corps, among whom was Gen. Sherman.

A bombardment of the position had been made by the fleet under Admiral Farragut, for a week previous to this assault. Reconnoissances had discovered that the defences were very strong, consisting of several lines of intrenchments and rifle pits, with abatis of heavy trees felled in every direction. The upper batteries on the river were attacked by the Hartford and Albatross, which had run the blockade, and the lower by the Monongahela, Richmond, Genesee, and Essex.

On the 14th of June, after a bombardment of several days, another assault on Port Hudson was made. The position of Gen. Banks's forces at this time was somewhat changed, forming only a right and left without a centre, and, joined together, making a right angle. The division of Gen. Grover, on the upper side of Port Hudson, extended a distance of nearly four miles from the river toward the interior, within supporting distance of Gen. Augur's division. This was on the west side of the

enemy's fortifications, and extended a distance of three miles to the river, and within hailing of the fleet. At this time, looking from the extreme northeasterly range of the enemy's rifle pits toward the river, on the upper side of Port Hudson, a long line of earthworks could be seen, glistening with bayonets, and protected by a deep ditch nearly twelve feet in width. Within short range, enfilading breastworks commanded every approach to the position of the enemy. The defences of the enemy formed nearly a right angle, both lines of which extended to the river, and enclosed a sharp bend. The point of attack was the extreme northeasterly angle of the enemy's position. For some days previous, several pieces of their artillery had been dismounted by the Federal fire and abandoned, while those in position were rendered useless by the fire of the sharpshooters. Two regiments were detailed as sharpshooters, who were to creep up and lie on the exterior slope of the enemy's breastworks, while another regiment—each soldier having a hand grenade besides his musket—followed. These grenades were to be thrown over into the enemy's position. Another regiment followed with bags filled with cotton, which were to be used to fill up the ditch in front of the breastworks. After these regiments came the others of Gen. Weitzel's brigade. Following these as a support were the brigades of Col. Kimball and Col. Morgan. These forces under Gen. Weitzel were designed for the attack on the right. In conjunction, on the left, moved the old division of Gen. Emory under Gen. Paine, forming a separate column. Both divisions were under the command of Gen. Grover, who planned the attack. It was expected that Gen. Weitzel's command would make a lodgment inside of the enemy's works, and thus prepare the way for Gen. Paine's division. The advance was made about daylight, through a covered way, to within three hundred yards of the enemy's position; then the field consisted of deep gullies covered by brush and creeping vines. The fire of the enemy was incessant, but a part of the skirmishers succeeded in reaching the ditch, where they were immediately repulsed by an enfilading fire. But little was therefore accomplished with the hand grenades, as they were at once caught up by the enemy, and hurled back. Meanwhile the assaulting column moved forward as rapidly as possible, and made a series of desperate assaults on the works, but the enemy were fully prepared, and lined every part of their fortifications with heavy bodies of infantry.

It was a part of the general plan of attack that a feint should be made on the extreme left by Gens. Augur and Dwight. This assault was made, and the fighting was extremely desperate on the part of the forces under Gen. Dwight. At length all the assaulting columns were compelled to fall back under the deadly fire of the enemy, and the fighting finally ceased about 11 o'clock in the morning. The loss of Gen.

Banks was nearly 700 in killed and wounded. Meantime the first parallel encircling the outer line of the enemy was pushed forward, and the skirmishers were posted in rifle pits so near that skirmishes were of constant occurrence at night. A small force of the enemy's cavalry hovered in the rear of Gen. Banks's army, without making any serious demonstrations.

The withdrawal of Gen. Banks's force from the west side of the Mississippi was followed by great activity on the part of the enemy, for the purpose of recovering the places held by a small body of Federal troops, and to cause a diversion from Port Hudson. Opelousas was reoccupied by a considerable Confederate force; the west bank of the Mississippi was lined with squads of the rebels, who fired upon every boat which passed. A raid was made upon Plaquemine by a body of Texans, who burned two steamers lying there. They were driven out by Lieut. Weaver, commanding the gunboat Winona. On the 17th of June, an attack was made on the Federal pickets at La Fourche, which was repulsed. On the next day it was repeated with the same result. On the 23d, Brashear City was captured by a confederate force under Gens. Green and Morton. A camp of slaves, or contrabands, as they were called, was attacked by the enemy, and large numbers killed. Immense quantities of ammunition, several pieces of artillery, three hundred thousand dollars' worth of sutler's goods, sugar, flour, pork, beef, and medical stores, of vast amount, were also captured. On the 28th, an attack was made on Donaldsonville, and the storming party succeeded in getting into the fort. But the gunboats opened a flanking fire above and below the fort, and drove back the supporting party, so that the enemy broke and fled. Of those who had entered the fort, one hundred and twenty were captured and nearly one hundred killed.

Other movements on the part of the enemy were made at this time, which indicated great activity, and enabled them to destroy much Federal property. No embarrassment however was caused to the position of Gen. Banks. The enemy, in short, recovered the La Fourche, Teche, Attakapas, and Opelousas country, and captured Brashear, with fifteen hundred prisoners, a large number of slaves, and nearly all the confiscated cotton.

After these two attempts to reduce Port Hudson by a land assault, on the 27th of May and 14th of June, the purpose to make another was given up by Gen. Banks, until he had fully invested the place by a series of irresistible approaches. He was thus engaged in pushing forward his works when Vicksburg was surrendered. Information of this surrender was sent to Gen. Banks, and it was made the occasion for firing salutes and a general excitement in his camp, which attracted the attention of the enemy, to whom the surrender was communicated. Gen. Gardner, upon receiving the infor-

mation, sent by flag of truce, about midnight of the 7th, the following note to Gen. Banks:

HEADQUARTERS, PORT HUDSON, LA., *July 7th, 1863.*

To Maj.-Gen. Banks, commanding United States Forces near Port Hudson:

GENERAL: Having received information from your troops that Vicksburg has been surrendered, I make this communication to request you to give me the official assurance whether this is true or not, and if true, I ask for a cessation of hostilities, with a view to the consideration of terms for surrendering this position.

I am, General, very respectfully,

Your obedient servant,

FRANK GARDNER, Major-General.

To which Gen. Banks thus replied:

HEADQUARTERS DEPARTMENT OF THE GULF, }
BEFORE PORT HUDSON, *July 8th, 1863.* }

To Maj.-Gen. Frank Gardner, commanding C. S. Forces, Port Hudson:

GENERAL: In reply to your communication, dated the 7th instant, by flag of truce, received a few moments since, I have the honor to inform you that I received, yesterday morning, July 7th, at 10.45, by the gunboat General Price, an official despatch from Major-Gen. Ulysses S. Grant, United States Army, whereof the following is a true extract:

"HEADQUARTERS DEPARTMENT OF THE TENNESSEE, }
NEAR VICKSBURG, *July 4th, 1863.* }

"Maj.-Gen. N. P. Banks, commanding Department of the Gulf:

"GENERAL: The garrison of Vicksburg surrendered this morning. The number of prisoners, as given by the officer, is 27,000, field artillery 128 pieces, and a large number of siege guns, probably not less than eighty.

Your obedient servant,

"U. S. GRANT, Major-General."

I regret to say, that under present circumstances, I cannot, consistently with my duty, consent to a cessation of hostilities for the purpose you indicate.

Very respectfully, your obedient servant,

N. P. BANKS.

The following further correspondence then took place:

PORT HUDSON, *July 8th, 1863.*

GENERAL: I have the honor to acknowledge the receipt of your communication of this date, giving a copy of an official communication from Major-Gen. U. S. Grant, United States Army, announcing the surrender of Vicksburg.

Having defended this position as long as I deem my duty requires, I am willing to surrender to you, and will appoint a commission of three officers to meet a similar commission appointed by yourself, at nine o'clock this morning, for the purpose of agreeing upon and drawing up the terms of the surrender, and for that purpose I ask for a cessation of hostilities.

Will you please designate a point outside of my breastworks, where the meeting shall be held for this purpose?

I am, very respectfully, your obedient servant,

FRANK GARDNER, Commanding C. S. Forces.

HEADQUARTERS U. S. FORCES, BEFORE }
PORT HUDSON, *July 8th, 1863.* }

To Maj.-Gen. Frank Gardner, commanding Confederate States Forces, Port Hudson:

GENERAL: I have the honor to acknowledge the receipt of your communication of this date, stating that you are willing to surrender the garrison under your command to the forces under my command, and that you will appoint a commission of three officers to meet a similar commission appointed by me, at nine o'clock this morning, for the purpose of agreeing upon and drawing up the terms of the surrender.

In reply, I have the honor to state that I have designated Brig.-Gen. Charles P. Stone, Col. Henry W. Birge, and Lieut.-Col. Richard B. Irwin, as the officers to meet the commission appointed by you.

They will meet your officers at the hour designated, at a point where the flag of truce was received this morning. I will direct that active hostilities shall entirely cease on my part until further notice, for the purpose stated.

Very respectfully, your most obedient servant,
N. P. BANKS, Maj.-Gen. Commanding.

The following are the articles of capitulation mutually agreed upon and adopted:

ART. 1. Maj.-Gen. Frank Gardner surrenders to the United States forces under Maj.-Gen. Banks, the place of Port Hudson and its dependencies, with its garrison armaments, munitions, public funds, and materials of war, in the condition, as nearly as may be, in which they were at the hour of cessation of hostilities, namely, 6 o'clock A. M., July 8th, 1863.

ART. 2. The surrender stipulated in article one is qualified by no condition, save that the officers and enlisted men comprising the garrison shall receive the treatment due to prisoners of war, according to the usages of civilized warfare.

ART. 3. All private property of officers and enlisted men shall be respected, and left to their respective owners.

ART. 4. The position of Port Hudson shall be occupied to-morrow, at 7 o'clock A. M., by the forces of the United States, and its garrison received as prisoners of war by such general officers of the United States service as may be designated by Maj.-Gen. Banks, with the ordinary formalities of rendition. The Confederate troops will be drawn up in line, officers in their positions, the right of the line resting on the edge of the prairie south of the railroad depot; the left extending in the direction of the village of Port Hudson. The arms and colors will be piled conveniently, and will be received by the officers of the United States.

ART. 5. The sick and wounded of the garrison will be cared for by the authorities of the United States, assisted, if desired by either party, by the medical officers of the garrison.

CHAS. P. STONE, Brig.-Gen.

W. N. MILES, Col., commanding the
Right Wing of the Army.

WM. DWIGHT, Brig. Gen.

G. W. STEEDMAN, Col., commanding
Left Wing of the Army.

MARSHALL S. SMITH, Lieut.-Col.,
Chief Artillery.

HENRY W. BIRGE, Col., commanding
5th Brigade, Grover's Division.

Approved,
N. P. BANKS, Maj.-Gen.

Approved,
FRANK GARDNER, Maj.-Gen.

The formal surrender was made on the 9th of July. Gen. Andrews, Chief of Staff of Gen. Banks, with Col. Birge leading his column, followed by two picked regiments from each division, with Holcombe's and Rowle's batteries of light artillery, and the gunners of the naval battery, entered the fortifications. The enemy were drawn up in line, with their officers in front of them, on one side of the road, with their backs to the river. The Federal troops were drawn up in two lines on the opposite side of the road, with their officers in front. Gen. Gardner then advanced, and offered to surrender his sword with Port Hudson. In appreciation of his bravery, he was desired to retain it. He then said: "General, I will now formally surrender my command to you, and for that purpose will give the order to ground arms." The order was given, and the arms grounded. The sur-

render comprised, besides the position, more than 6,233 prisoners, 51 pieces of artillery, two steamers, 4,400 lbs. of cannon powder, 5,000 small arms, and 150,000 rounds of ammunition. The loss of Gen. Banks from the 23d to the 30th of May was about one thousand. The village of Port Hudson consisted of a few houses and a small church, which had been nearly destroyed by the cannonade. The wounded and sick of the garrison suffered the most from want of medical stores. The provisions of the garrison were nearly exhausted.

The surrender of Port Hudson enabled Gen. Banks to turn his attention to other points, which had been temporarily and necessarily neglected. His further movements are stated in subsequent pages.

The opposing armies in Virginia remained quiet, with the exception of one fearful struggle, until Vicksburg was hard pressed by Gen. Grant, and the prospect of its relief by Gen. Johnston became very doubtful, when Gen. Lee commenced an advance upon Washington, not only with the hope of producing some diversion in favor of Vicksburg, but especially to make a decisive test of an invasion of the Northern States, and at least secure forage and munitions of war.

After the battle of Fredericksburg, on the 13th of December, 1862, the Army of the Potomac, under Maj.-Gen. Burnside, remained inactive for some weeks. Its position was at Falmouth, opposite Fredericksburg. Indications of some movement, however, were manifest about the 16th of January. The roads were dry and hard, and on the night of the 16th, the pontoons were brought up from Belle Plain to Falmouth, and with the utmost secrecy taken near the river some distance above. An order to march had been twice issued and countermanded. On the 17th it was issued again, requiring each soldier to have three days' rations and sixty rounds of cartridges. The army at this time was as strong in numbers and material as it had ever been. It was supposed that the forces of Gen. Lee had been somewhat reduced by the withdrawal of small bodies to reinforce other points. His army was composed of eight divisions, commanded by Gens. A. P. and D. H. Hill, Early, Hood, Walker, Ransom, McLaws, and Anderson. Each division consisted of four to five brigades, and each brigade had from five to seven regiments. It was the intention of Gen. Burnside to move his army a few miles farther up the Rappahannock, and cross at the fords and make an attack upon the flank of Gen. Lee. On the next day the order was postponed. The enemy in the mean time were on the alert, and expecting an attack at any time. On Tuesday, the 20th, Gens. Hooker and Franklin moved in heavy order, with tents, &c., toward Hartwood Church, which is directly north of the United States ford of the Rappahannock, which is twelve miles above Fredericksburg. Gen. Sigel moved in the afternoon in the same

direction. The movement of Gen. Hooker was made by a road three miles north of the river, and concealed from the view of the enemy's pickets on the south bank. That night, at ten o'clock, a storm from the northeast commenced with high wind and torrents of rain. The march began the next morning at daylight, but the roads had become almost impassable. In every gully, batteries, caissons, supply wagons, ambulances, and pontoons were mired. All day there was a constant and exhausting struggle of men, horses, and mules with the mud. On Wednesday night the wearied troops lay down in their blankets. The storm still continued. During the next day an effort was made to concentrate on the high table land near Banks's Ford. It now became too manifest that it would be impossible to get the army through the freshly cut roads to the river, so that the fords could be reached. On Friday the storm abated, but further progress was necessarily suspended, and on the next day the movement was abandoned, and the army returned to its former quarters.

On Monday, the 26th, Gen. Burnside issued the following address, surrendering the command of the army to Gen. Hooker :

HEADQUARTERS ARMY OF THE POTOMAC, }
CAMP NEAR FALMOUTH, *January 26th, 1863.* }

By direction of the President of the United States, the Commanding General this day transfers the command of this army to Major-Gen. Joseph Hooker.

The short time that he has directed your movements has not been fruitful of victory or any considerable advancement of our lines, but it has again demonstrated an amount of courage, patience, and endurance that under more favorable circumstances would have accomplished great results.

Continue to exercise these virtues. Be true in your devotion to your country and the principles you have sworn to maintain. Give to the brave and skilful general who has long been identified with your organization, and who is now to command you, your full and cordial support and coöperation, and you will deserve success.

In taking an affectionate leave of the entire army, from which he separates with so much regret, he may be pardoned if he bids an especial farewell to his long-tried associates of the ninth corps. His prayers are that God may be with you, and grant you continued success until the rebellion is crushed.

By command of Major-Gen. BURNSIDE.
LEWIS RICHMOND, A. A. G.

At his own request, Gen. Burnside was relieved of his command, and the President immediately conferred it upon Gen. Hooker. The views under which this command had been accepted by Gen. Burnside were thus stated by him in his testimony before a committee appointed by Congress to investigate the conduct of the war :

On the 7th or 8th of November, I received an order from the President of the United States, directing me to take command of the Army of the Potomac, and also a copy of an order relieving Gen. McClellan from that command. This order was conveyed to me by Gen. Buckingham, who was attached to the War Department. After getting over my surprise, the shock, &c., I told Gen. Buckingham that it was a matter that required very serious thought; that I did not want the command; that it had been offered to me twice before,

and I did not feel that I could take it; I counselled with two of my staff officers in regard to it, for, I should think, an hour and a half. They urged upon me that I had no right, as a soldier, to disobey the order, and that I had already expressed to the Government my unwillingness to take the command; I told them what my views were with reference to my ability to exercise such a command, which views were those I had unreservedly expressed, that I was not competent to command such a large army as this; I had said the same over and over again to the President and Secretary of War; and also that if matters could be satisfactorily arranged with Gen. McClellan, I thought he could command the Army of the Potomac better than any other general in it.

On the same day when Gen. Burnside retired, Gen. Hooker, on assuming the command, issued the following address to the army :

HEADQUARTERS, CAMP NEAR FALMOUTH, }
January 26th, 1863. }

By direction of the President of the United States the undersigned assumes command of the Army of the Potomac.

He enters upon the discharge of the duties imposed by the trust with a just appreciation of their responsibility. Since the formation of this army he has been identified with its history; he has shared with you its glories and reverses, with no other desire than that these relations might remain unchanged until its destiny should be accomplished.

In the record of your achievements there is much to be proud of, and, with the blessing of God, we will contribute something to the renown of our arms and the success of our cause. To secure these ends your commander will require the cheerful and zealous coöperation of every officer and soldier in the army. In equipment, intelligence, and valor the enemy is our inferior. Let us never hesitate to give him battle whenever we can find him.

The undersigned only gives expression to the feelings of this army when he conveys to our late commander, Maj.-Gen. Burnside, the most cordial good wishes for his future.

My staff will be announced as soon as organized.

JOSEPH HOOKER,
Maj.-Gen. Commanding Army of the Potomac.

Gens. Sumner and Franklin were at the same time relieved of the command of the right and left divisions of the army. The following is the official order of the President under which these changes were made :

HEADQUARTERS OF THE ARMY, }
WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, }
WASHINGTON, *January 28th, 1863.* }

I. The President of the United States has directed :
First. That Maj.-Gen. A. E. Burnside, at his own request, be relieved from the command of the Army of the Potomac.

Second. That Maj.-Gen. E. V. Sumner, at his own request, be relieved from duty in the Army of the Potomac.

Third. That Maj.-Gen. W. B. Franklin be relieved from duty in the Army of the Potomac.

Fourth. That Maj.-Gen. J. Hooker be assigned to the command of the Army of the Potomac.

The officers relieved as above will report in person to the Adjutant-General of the Army.

By order of the Secretary of War,
E. D. TOWNSEND,
Assistant Adjutant-General.

On the 26th of January, the Senate of the U. S. Congress adopted the following resolution :

Resolved, That the Committee on the Conduct of the War be instructed to inquire whether Maj.-Gen. A. E. Burnside has, since the battle of Fredericksburg, formed any plans for the movement of the Army of the

Potomac, or any portion of the same; and if so, whether any subordinate generals of said army have written to or visited Washington to oppose or interfere with the execution of such movements, and whether such proposed movements have been arrested or interfered with, and, if so, by what authority.

The report of the committee, which was published in April, 1863, thus states the proceedings under the resolution:

Under that resolution, your committee proceeded to take the testimony of Maj.-Gens. A. E. Burnside and John G. Parke, and Brig.-Gens. John Newton, John Cochrane, and Wm. W. Averill. That testimony brings to light the following facts:

Shortly after the battle of Fredericksburg, Gen. Burnside devised a plan for attacking the enemy in his front. The main army was to cross at a place some six or seven miles below Fredericksburg. The positions for the artillery to protect the crossings were all selected; the roads were all surveyed, and the corduroy was cut for preparing the roads. At the same time a feint of crossing was to be made some distance above Falmouth, which feint could be turned into a positive attack should the enemy discover the movement below; otherwise the main attack was to be made below.

In connection with this movement of the main army, a cavalry expedition was organized, consisting of twenty-five hundred of the best cavalry in the Army of the Potomac, one thousand of whom were picked men. The plan of that expedition was as follows: Accompanied by a brigade of infantry detailed to protect the crossing of the Rappahannock, it was to proceed to Kelly's Ford; there the thousand picked men were to cross, and to proceed to the Rapidan, and cross that river at Racoon Ford; then to go onward and cross the Virginia Central railroad at Louisa Court House; the James river at Goochland or Carter's, blowing up the locks of the James River canal at the place of crossing; cross the Richmond and Lynchburg railroad at a point south of there, blowing up the iron bridge at the place of crossing; cross the Richmond, Petersburg, and Weldon railroad where it crosses the Nottoway river, destroying the railroad bridge there; and then proceed on by Gen. Pryor's command, and effect a junction with Gen. Peck at Suffolk, where steamers were to be in waiting to take them to Aquia creek. To distract the attention of the enemy, and to deceive them in regard to which body of cavalry was the attacking column, at the time the thousand picked men crossed the Rappahannock a portion of the remaining fifteen hundred was to proceed toward Warrenton; another portion toward Culpepper Court House; and the remainder were to accompany the thousand picked men as far as Racoon Ford, and then return. While this cavalry expedition was in progress, the general movement was to be made across the river.

On the 26th of December an order was issued for the entire command to prepare three days' cooked rations; to have their wagons filled with ten days' small rations, if possible; to have from ten to twelve days' supply of beef cattle with them; to take forage for their teams and their artillery and cavalry horses, and the requisite amount of ammunition—in fact, to be in a condition to move at twelve hours' notice.

Shortly after that order was issued, Gen. John Newton and Gen. John Cochrane—the one commanding a division and the other a brigade in the left grand division, under Gen. William B. Franklin—came up to Washington on leave of absence. Previous to obtaining leave of absence from Gen. Franklin, they informed him and Gen. William F. Smith that when they came to Washington they should take the opportunity to represent to some one in authority here the dispirited condition of the army, and the danger there was of attempting any movement against the enemy at that time.

When they reached Washington, Gen. Cochrane, as he states, endeavored to find certain members of Con-

gress, to whom to make the desired communication. Failing to find them, he determined to seek an interview with the President for the purpose of making the communication directly to him. On proceeding to the President's House, he there met Secretary Seward, to whom he explained the object of his being there, and the general purport of his proposed communication to the President, and requested him to procure an interview for them, which Mr. Seward promised to do, and which he did do.

That day the interview took place, and Gen. Newton opened the subject to the President. At first the President, as Gen. Newton expresses it, "very naturally conceived that they had come there for the purpose of injuring Gen. Burnside, and suggesting some other person to fill his place." Gen. Newton states that, while he firmly believed that the principal cause of the dispirited condition of the army was the want of confidence in the military capacity of Gen. Burnside, he deemed it improper to say so to the President "right square out," and therefore endeavored to convey the same idea indirectly. When asked if he considered it any less improper to do such a thing indirectly than it was to do it directly, he qualified his previous assertion by saying that his object was to inform the President of what he considered to be the condition of the army, in the hope that the President would make inquiry and learn the true reason for himself. Upon perceiving this impression upon the mind of the President, Gens. Newton and Cochrane state that they hastened to assure the President that he was entirely mistaken, and so far succeeded that at the close of the interview the President said to them he was glad they had called upon him, and that he hoped that good would result from the interview.

To return to General Burnside. The cavalry expedition had started; the brigade of infantry detailed to accompany it had crossed the Rappahannock at Richard's Ford, and returned by way of Ellis's Ford, leaving the way clear for the cavalry to cross at Kelly's Ford. The day they had arranged to make the crossing, General Burnside received from the President the following telegram: "I have good reason for saying that you must not make a general movement without letting me know of it."

Gen. Burnside states that he could not imagine, at the time, what reason the President could have for sending him such a telegram. None of the officers of his command, except one or two of his staff, who had remained in camp, had been told anything of his plan beyond the simple fact that a movement was to be made. He could only suppose that the despatch related in some way to important military movements in other parts of the country, in which it was necessary to have coöperation.

Upon the receipt of that telegram steps were immediately taken to halt the cavalry expedition where it then was (at Kelly's Ford) until further orders. A portion of it was shortly afterward sent off to intercept Stuart, who had just made a raid to Dumfries and the neighborhood of Fairfax Court House, which it failed to do.

Gen. Burnside came to Washington to ascertain from the President the true state of the case. He was informed by the President that some general officers from the Army of the Potomac, whose names he declined to give, had called upon him and represented that Gen. Burnside contemplated soon making a movement, and that the army was so dispirited and demoralized that any attempt to make a movement at that time must result in disaster; that no prominent officers in the Army of the Potomac were in favor of any movement at that time.

Gen. Burnside informed the President that none of his officers had been informed what his plan was, and then proceeded to explain it in detail to the President. He urged upon the President to grant him permission to carry it out, but the President declined to do so at that time. Gen. Halleck and Secretary Stanton were sent for, and then learned, for the first time, of the President's action in stopping the movement, although

Gen. Halleck was previously aware that a movement was contemplated by Gen. Burnside. Gen. Halleck, with Gen. Burnside, held that the officers who had made those representations to the President should be at once dismissed the service.

Gen. Burnside remained here at that time for two days, but no conclusion was reached upon the subject. When he returned to his camp he learned that many of the details of the general movement, and the details of the cavalry expedition, had become known to the rebel sympathizers in Washington, thereby rendering that plan impracticable. When asked to whom he had communicated his plans, he stated that he had told no one in Washington except the President, Secretary Stanton, and Gen. Halleck; and in his camp none knew of it except one or two of his staff officers, who had remained in camp all the time. He professed himself unable to tell how his plans had become known to the enemy.

A correspondence then took place between the President, Gen. Halleck, and Gen. Burnside. Gen. Burnside desired distinct authority from Gen. Halleck, or some one authorized to give it, to make a movement across the river. While urging the importance and necessity of such a movement, he candidly admitted that there was hardly a general officer in his command who approved of it. While willing to take upon himself all the responsibility of the movement, and promising to keep in view the President's caution concerning running any risk of destroying the Army of the Potomac, he desired to have at least Gen. Halleck's sanction or permission to make the movement. Gen. Halleck replied that while he had always favored a forward movement, he could not take the responsibility of giving any directions as to how and when it should be made.

Gen. Burnside then determined to make a movement without any further correspondence on the subject. He was unable to devise any as promising as the one just thwarted by this interference of his subordinate officers, which interference gave the enemy the time, if not the means, to ascertain what he had proposed to do. He, however, devised a plan of movement, and proceeded to put it in execution. As is well known, it was rendered abortive in consequence of the severe storm which took place shortly after the movement began.

Gen. Burnside states that, besides the inclemency of the weather, there was another powerful reason for abandoning the movement, viz., the almost universal feeling among his general officers against him. Some of those officers freely gave vent to their feelings in the presence of their inferiors. In consequence of this, and also what had taken place during the battle of Fredericksburg, &c., Gen. Burnside directed an order to be issued, which he styled General Order No. 8. That order dismissed some officers from the service, subject to the approval of the President, relieved others from duty with the Army of the Potomac, and also pronounced sentence of death upon some deserters who had been tried and convicted.

Gen. Burnside states that he had become satisfied that it was absolutely necessary that some such examples should be made, in order to enable him to maintain the proper authority over the army under his command. The order was duly signed and issued, and only waited publication. Two or three of his most trusted staff officers represented to Gen. Burnside that should he then publish that order, he would force upon the President the necessity of at once sanctioning it, or, by refusing his approval, assume an attitude of hostility to Gen. Burnside. The publication of the order was accordingly delayed for the time.

Gen. Burnside came to Washington and laid the order before the President, with the distinct assurance that in no other way could he exercise a proper command over the Army of the Potomac; and he asked the President to sanction the order, or accept his resignation as major-general. The President acknowledged that Gen. Burnside was right, but declined to decide without consulting with some of his advisers.

To this Gen. Burnside replied, that if the President took time for consultation he would not be allowed to publish that order, and therefore asked to have his resignation accepted at once. This the President declined to do.

Gen. Burnside returned to his camp, and came again to Washington that night at the request of the President, and the next morning called upon the President for his decision. He was informed that the President declined to approve his order No. 8, but had concluded to relieve him from his command of the Army of the Potomac, and to appoint Gen. Hooker in his place. Thereupon Gen. Burnside again insisted that his resignation be accepted. This the President declined to do; and, after some urging, Gen. Burnside consented to take a leave of absence for thirty days, with the understanding that, at the end of that time, he should be assigned to duty, as he deemed it improper to hold a commission as major-general and receive his pay without rendering service therefor. Gen. Burnside objected to the wording of the order which relieved him from his command, and which stated that it was at his own request, as being unjust to him and unfounded in fact; but upon the representation that any other order would do injury to the cause, he consented to let it remain as it then read.

The foregoing statements of the facts proved, together with the testimony herewith submitted, so fully and directly meet the requirements of the resolution, referred to them, that your committee deem any comment by them to be entirely unnecessary.

Subsequently a letter appeared from Gen. Cochrane, of which the following is an extract:

I have no copy of my evidence, nor have I seen Gen. Newton's. But I remember to have stated explicitly that I knew nothing of Gen. Burnside's plan; that I knew only of the dispirited condition of the troops, and the sense of apprehension which depressed them, and that I recognized it as a duty to communicate this knowledge to those whose duty it was to apply it. This much I testified that I had said to the President; and I then further said to the committee that had I been the depository of the commanding general's plans, and the possessor of facts which would necessarily have baffled those plans, and have involved the army in irretrievable ruin, I would have considered it no less than treason not to have disclosed the facts—that I was impressed that another defeat, then and there, would have been fatal to our cause; and that it was upon my deepest loyalty that I had spoken—that the geese had doubtless disturbed the sleeping Roman sentinel, when their alarm saved the capital from the Gauls; but that I had never heard that the geese had been punished for disturbing the sentinel, though I had heard that they had been honored for saving the state.

The following has appeared as so much of the order No. 8 as relates to the dismissal and relief of certain officers:

General Order No. 8.

HEADQUARTERS ARMY OF THE POTOMAC, Jan. 23d, 1863.

* * * * *

First. Gen. Joseph E. Hooker, Major-General of Volunteers and Brigadier-General of the United States Army, having been guilty of unjust and unnecessary criticisms of the actions of his superior officers, and of the authorities, and having, by the general tone of his conversation, endeavored to create distrust in the minds of officers who have associated with him, and having, by omissions and otherwise, made reports and statements which were calculated to create incorrect impressions, and of habitually speaking in disparaging terms of other officers, is hereby dismissed the service of the United States, as a man unfit to hold an important commission during a crisis like the present, when so much patience, charity, confidence, consideration, and patriotism are due from every soldier in the field. The

order is issued subject to the approval of the President of the United States.

Second. Brig.-Gen. W. T. H. Brooks, commanding First Division, Sixth Army Corps, for complaining of the policy of the Government, and for using language tending to demoralize his command, is, subject to the approval of the President of the United States, dismissed from the military service of the United States.

Third. Brig.-Gen. John Newton, commanding Third Division, Sixth Army Corps, and Brig.-Gen. John Cochrane, commanding First Brigade, Third Division, Sixth Army Corps, for going to the President of the United States with criticisms upon the plans of their commanding officer, are, subject to the approval of the President, dismissed from the military service of the United States.

Fourth. It being evident that the following named officers can be of no further service to this army, they are hereby relieved from duty, and will report in person without delay to the Adjutant-General of the United States Army:

Maj.-Gen. W. B. Franklin, commanding Left Grand Division.

Maj.-Gen. W. F. Smith, commanding Sixth Army Corps.

Brig.-Gen. Sam. D. Sturgis, commanding Second Division, Ninth Army Corps.

Brig.-Gen. Edward Ferrero, commanding Second Brigade, Second Division, Ninth Army Corps.

Brig.-Gen. John Cochrane, commanding First Brigade, Third Division, Sixth Army Corps.

Lieut.-Col. J. H. Taylor, Acting Adjutant-General Right Grand Division.

By command of Maj.-Gen. A. E. BURNSIDE.
LEWIS RICHMOND, Assistant Adjutant-General.

The testimony of Gen. Burnside, in relation to this order, from which the committee condensed their abstract, was as follows:

I went to my adjutant-general's office, and issued an order, which I termed General Order No. 8. That order dismissed some officers from service, subject to the approval of the President, and relieved others from duty with the Army of the Potomac. I also had three sentences of death upon privates for desertion, which I had reviewed and approved, subject, of course, to the approval of the President, as I had no right to do any of these things without that approval. I had sent my own body guard over into Maryland, and had succeeded in capturing a large number of deserters. I had organized a court-martial, the one which is now in session down there trying some two hundred and fifty deserters.

I told my adjutant-general to issue that order (No. 8) at once. One of my advisers—only two persons knew of this—one of them, who is a very cool, sensible man, and a firm friend, told me that, in his opinion, the order was a just one, and ought to be issued; but he said that he knew my views with reference to endeavoring to make myself useful to the Government of the United States instead of placing myself in opposition to it; that all of these things had to be approved by the President of the United States, at any rate, before they could be put in force; that he did not think I intended to place the President in a position where he either had to assume the responsibility of becoming my enemy before the public, at any rate, thereby enabling a certain portion of my friends to make a martyr of me to some extent, or he had to take the responsibility of carrying out the order, which would be against the views of a great many of the most influential men in the country, particularly that portion of the order in reference to the officers I proposed to have dismissed the service. I told the staff officer that I had no desire to place myself in opposition to the President of the United States in any way; that I thought his (my staff officer's) view of the matter was the correct one; but that I had indicated in that order the only way in which I could command the Army of

the Potomac. I accordingly took this order, already signed and issued in due form, with the exception of being made public, to the President of the United States, and handed him the order, together with my resignation of my commission as a major-general. I told him that he knew my views upon the subject; that I had never sought any command, more particularly that of the Army of the Potomac; that my wish was to go into civil life, after it was determined that I could no longer be of any use in the army; that I desired no public position of any kind whatever. At the same time I said that I desired not to place myself in opposition to him in any way, or to do anything to weaken the Government. I said he could now say to me, "You may take the responsibility of issuing this order, and I will approve it;" and I would take that responsibility, if he would say that it would be sustained after it was issued, because he would have to approve of it, for I had no right to dismiss a man or condemn a man to death without his approval. In case that order (No. 8) could not be approved by him, there was my resignation, which he could accept, and that would end the matter forever, so far as I was concerned; that nothing more would be said in reference to it. I told him he could be sure that my wish was to have that done which was best for the public service, and that was the only way in which I could command the Army of the Potomac. The President replied to me, "I think you are right. * * * [The suppressions here, in the body of Gen. Burnside's report of the President's answer, are made by the committee.] But I must consult with some of my advisers about this." I said to him, "If you consult with anybody you will not do it, in my opinion." He said, "I cannot help that; I must consult with them." I replied that he was the judge, and I would not question his right to do what he pleased.

The President asked me to remain all that day. I replied that I could not remain away from my command; that he knew my views, and I was fixed and determined in them. He then asked me to come up that night again. I returned to my command, and came up again that night, and got here at six o'clock in the morning. I went to the President's, but did not see him. I went again after breakfast, and the President told me that he had concluded to relieve me from the command of the Army of the Potomac, and place Gen. Hooker in command. I told him that I was willing to accept that, as the best solution of the problem; and that neither he nor Gen. Hooker would be a happier man than I would be if Gen. Hooker gained a victory there. The President also said that he intended to relieve Gen. Sumner and Gen. Franklin. I said that I thought it would be wise to do so, if he made the change he proposed to make. Gen. Sumner was a much older officer than Gen. Hooker, and ought not to be asked to serve under him.

On the 26th of April Gen. Burnside assumed the command of the Department of the Ohio. An invasion of Kentucky was at that time threatened by the Confederate forces.

The inclemency of the season was such that no movements could now be attempted by the Army of the Potomac or its adversary on the opposite side of the Rappahannock at Fredericksburg. Some raids by the enemy and some movements of cavalry were the only operations.

On the 12th of March a bold and successful raid was made by the enemy as far within the Federal lines as Fairfax Court House in Virginia. Brig.-Gen. Stoughton was taken from his bed and carried off, and a detachment from his brigade, with guards, horses, &c., captured.

On the 17th of March a sharp conflict took place between a body of cavalry, under Gen. Averill, and a similar force of the enemy near

Kelly's Ford. About forty of Gen. Averill's force were disabled, and about eighty of the enemy made prisoners.

On the 13th of April, an expedition of cavalry, infantry, and artillery, under Major-Gen. Stoneman, proceeded in detachments to Warrenton, Bealton, Rappahannock bridge, and Liberty. Small bodies of Partisan Rangers were met with, but no opposition was encountered. Thence he moved to the fords of the Rapidan and took possession of them. These operations were made in advance of a general movement of the army across the Rappahannock to attack Gen. Lee. The stormy weather which ensued delayed this movement until the 27th of April.

The army of Gen. Lee, in its encampments near Fredericksburg, held a line running from northwest to southeast; its right wing was extended as far down as Port Royal on the Rappahannock, and its left wing rested above Fredericksburg on the same river. In this position it had only two main lines of retreat, one toward Richmond by railroad, and the other toward Gordonsville. The strength of this army was about seventy thousand men.

The army of Gen. Hooker consisted of seven corps, and numbered about one hundred and twenty thousand men. Under his plan of attack three corps were massed below Fredericksburg, to cross there and make a feint attack on the enemy, when two of the corps were to

return immediately after crossing and join the other four corps, meanwhile crossing at several fords ten and twenty miles above Fredericksburg. The object of Gen. Hooker by moving down on the left of the enemy, was to force him to fight outside of his intrenchments, or to fall back on Richmond.

Falmouth, the position occupied by Gen. Hooker's army, is nearly opposite Fredericksburg, on the north bank of the Rappahannock. About twelve miles above, the Rapidan, a small river, unites with a stream heretofore called the North Fork, to form the Rappahannock. Lately, however, the North Fork has been called Rappahannock, and the Rapidan has been spoken of as a tributary. The United States Ford is about one mile below the mouth of the Rapidan. Banks's Ford is about midway between the United States Ford and Falmouth. Kelly's Ford, where the four corps crossed the North Fork, or the Rappahannock as it is now called, is about twenty miles above Falmouth. Germania Ford, where the same force crossed the Rapidan, is about twelve miles south of Kelly's Ford, at a place called Germania Mills. The troops crossed here by wading. The water was up to the armpits, and with a rapid current. The bottom of the river was rocky.

On Monday morning, April 27th, the eleventh corps, under Maj.-Gen. Howard, the twelfth, under Maj.-Gen. Slocum, and the fifth,

under Maj.-Gen. Meade, marched westward on the several roads leading to Kelly's Ford, which the advance under Gen. Howard reached on Tuesday forenoon. A brigade of this corps had been guarding the ford since the movement of cavalry under Gen. Stoneman. The pontoon boats had been moved into a creek behind the bluff at the Ford. About two hundred and fifty men of the 73d Pennsylvania and 154th New York immediately crossed in boats and occupied the bank of the river. Skirmishers were deployed to the right and left, but no enemy, excepting a few pickets who retired, was to be found. The remainder of the two regiments crossed in boats whilst the bridge was building. That evening the eleventh corps crossed, and the twelfth bivouacked on the shore.

Early on Wednesday morning, the twelfth corps crossed over, followed by Gen. Stoneman's cavalry force and the fifth corps. The wagon trains were sent back from Kelly's Ford and parked near Banks's Ford. The advance moved directly to Germania Ford on the Rapidan. The fifth corps, under Gen. Meade, crossed the Rapidan in the afternoon, a little lower down. On the next morning, Thursday, an advance was made to Chancellorsville, at the junction of the Orange Court House road with a road to Culpepper, between five and ten miles distant from the ford. The three corps were massed at this place at night, and Gen. Hooker arrived and made it his headquarters. On Wednesday, the second corps, under Gen. Couch, took a position at Banks's Ford, five miles above Fredericksburg. Some skirmishing had occurred with small bodies of the enemy, which retired. The cavalry force of Gen. Stoneman was sent to cut the communication of Gen. Lee's army by railroad with Richmond.

Meanwhile the remaining three corps of the army had been put in motion. The first corps, under Maj.-Gen. Reynolds, the third, under Maj.-Gen. Sickles, and the sixth, under Maj.-Gen. Sedgwick, moved from their camps on Monday night and took a position two miles below Fredericksburg. Early on the next morning, one division of the sixth corps crossed two miles below Fredericksburg, and one division of the first corps about one mile farther down. Some skirmishing took place, and the enemy held their position; at the same time bridges were thrown over and demonstrations made as if the intention was to cross a large force over. On the next day, Wednesday, the third corps, under Gen. Sickles, was detached and ordered to cross at United States Ford and join Gen. Hooker at Chancellorsville. On the next day Gen. Hooker issued the following order:

General Order No. 47.

HEADQUARTERS ARMY OF THE POTOMAC, }
CAMP NEAR FALMOUTH, VA., April 30th, 1863. }

It is with heartfelt satisfaction that the Commanding General announces to the army that the operations of the last three days have determined that our enemy must either ingloriously fly or come out from behind his defences and give us battle on our own ground, where certain destruction awaits him. The operations of the

fifth, eleventh, and twelfth corps have been a succession of splendid achievements.

By command of Major-Gen. HOOKER.
S. WILLIAMS, Ass't Adj't-Gen.

Such was the position of Gen. Hooker's forces on Friday morning. About noon, the fifth and twelfth corps, under Gens. Meade and Slocum, were advanced by separate roads toward Fredericksburg. The former moved to the left and the latter to the right. The advance of Gen. Meade's corps was led by the second division under Gen. Sykes. In about an hour it encountered the enemy, and heavy firing ensued, which continued for three fourths of an hour, gradually extending toward the right wing. Orders were then sent by Gen. Hooker, whose headquarters were in the large house known as Chancellorsville, for the two columns to fall slowly back. This order was systematically obeyed, and everything became quiet until about four o'clock, when the enemy appeared in line of battle, in an open field fronting a dense wood, on the right of Gen. Hooker, and about a mile from Chancellorsville. A vigorous fire of artillery was opened on both sides, which continued until night, when the enemy retired. This movement was regarded as indicating a disposition on the part of Gen. Lee to feel the Federal lines and ascertain the strength of their position and force. Meanwhile Gen. Hooker had caused intrenchments to be thrown up by his army. On the next day, Saturday, the first corps, under Gen. Reynolds, was ordered to join Gen. Hooker at Chancellorsville. It arrived in the afternoon at United States Ford, and was ordered into position on the right.

During Friday night the enemy were observed cutting a road past the Federal picket line on the right, and wagons were seen passing up the road on Saturday. As no attack was made during the forenoon, it was determined to ascertain the nature of the movement on the right, by a reconnoissance in force under Gen. Sickles. The divisions of Gens. Birney and Whipple, with Gen. Barlow's brigade from Gen. Howard's corps, were pushed to the front. This force soon became more or less engaged, especially with the artillery and the sharpshooters as skirmishers. Prisoners who were taken reported that the wagon train which had been seen was composed mainly of ordnance wagons and ambulances, following a column of troops under the command of Gen. Jackson. It was perceived at once that the object of Gen. Jackson was to make a sudden and fierce attack upon the extreme right. To defeat this object Gen. Sickles was ordered to push forward, and Gen. Birney advanced with great vigor, cutting in twain a column of the enemy still moving up the road. Gen. Williams's division of Gen. Slocum's corps, which had been ordered to coöperate, then commenced a flank movement on the enemy's right, which promised great success. It was supposed that in consequence of this movement, Gen. Jackson would endeavor to retreat to escape a capture,

or, if he made an attack on the right, that the eleventh corps would be sufficient to resist him. On the contrary, about five o'clock, a terrific volley of musketry on the extreme right announced that he had commenced his operations. The division of Gen. Schurz, which he first assailed, almost instantly gave way. Thousands threw down their arms and streamed down the road toward headquarters. The enemy pressed his advantage. The division of Gen. Devens, infected by the demoralization in front, soon followed the fugitives. Gen. Howard, the commander of the corps, with all his vigor and resolution could not stem the retreating torrent. The brigades of Cols. Bush, Beck, and McLean maintained themselves as long as possible, but finally gave way in good order before superior numbers.

Gen. Hooker now sent to the aid of Gen. Howard the second division of the third corps, under Maj.-Gen. Berry. Their batteries, under Capt. Best, were moved on a ridge running across the road, and after a short but sanguinary contest, the advance of the enemy was checked. This disaster compelled the recall of Gens. Sickles and Slocum. Gen. Williams's division found a portion of their works filled with the enemy, and Gen. Sickles could not communicate with the rest of the army by the way he had advanced, and only at great risk by any other route. This was the state of affairs at dark. A bright moon soon appeared, and a night attack was ordered to restore the communications. Gen. Wood's brigade of Gen. Birney's division made the attack at eleven o'clock, aided by the guns massed on the ridge in front of the enemy. This attack was successful and restored the communications. The enemy fell back nearly half a mile. The effect of the enemy's movement was to compel Gen. Hooker to contract his lines and assume the defensive, protected by breastworks and intrenchments.

During the night, the first corps, under Maj.-Gen. Reynolds, and the fifth corps, under Maj.-Gen. Meade, were transferred to Gen. Hooker's right, and set to work vigorously to intrench themselves. The position of the latter corps on the left was taken by the eleventh corps, which was reorganized during the night, and then assigned to a point where but little fighting was anticipated, and where they were protected by the work made on the previous day by the fifth corps. At the same time the force of Gen. Lee opposite the Federal right was strongly reënforced.

At 5 o'clock on Sunday morning, the enemy could be seen up the plank road about a mile and a half from the Chancellor House, which was still retained as the headquarters of Gen. Hooker. The Federal line was formed with the division of Gen. Berry on the right, that of Gen. Birney next on the left, and Gens. Whipple and Williams supporting. By half past five, Gen. Berry became engaged, and a terrible conflict ensued. The infantry of the en-

emy were advanced in overwhelming numbers for the purpose of crushing the Federal line, but the forces of Gens. Sickles and Slocum held them in check. The struggle became desperate, hand to hand, and the carnage great. It continued until 8.45 A. M., without the slightest intermission, when there was a temporary suspension on the Federal side, occasioned by getting out of ammunition. The position was, however, held by the bayonet for nearly an hour, until a supply was received, and an order was given to fall back to the vicinity of the Chancellor House. The contest now raged in this vicinity. Gen. Hooker's headquarters were withdrawn at ten o'clock. The house was burned by a shell of the enemy. The engagement continued until 11.30 A. M., when the musketry fire ceased. Gen. Hooker, acting on the defensive, had been compelled to contract his lines still further, and would perhaps have recrossed the Rappahannock that day except for the advantages expected to be gained by the movement of Gen. Sedgwick below Fredericksburg, and that of the cavalry force under Gen. Stoneman.

Several attempts were made by the enemy during the afternoon to force the lines of Gen. Hooker, but without success.

The following despatch, relative to the operations of Saturday and Sunday, was sent to Richmond by Gen. Lee:

MILFORD, May 3d, 1863.

To President Davis :

Yesterday Gen. Jackson penetrated to the rear of the enemy. We drove him from all his positions from the Wilderness to within one mile of Chancellorsville. He was engaged at the same time in front by two of Longstreet's divisions. Many prisoners were taken, and the enemy's loss in killed and wounded is large. This morning the battle was renewed. He was dislodged from all his positions around Chancellorsville, and driven back toward the Rappahannock, over which he is now retreating. We have again to thank Almighty God for a great victory. I regret to state that Gen. Paxton was killed, Gen. Jackson severely and Gens. Heth and A. P. Hill slightly wounded.

R. E. LEE, General Commanding.

On Saturday, May 2d, Gen. Sedgwick was ordered to cross the Rappahannock, move upon Fredericksburg, and march out on the plank road toward Chancellorsville, until he connected with the right under Gen. Hooker, and to destroy any force he might meet on the road. By twelve o'clock that night, the three divisions composing the sixth corps were all across, and waiting orders. The main force of the enemy had been concentrated on their own left to resist Gen. Hooker. The first division, under Gen. Brooks, was left to guard the crossing and occupy the enemy in front. At four o'clock A. M., on Sunday, the head of the corps was in motion toward Fredericksburg. At the edge of the town it was halted, the batteries brought into position, and the first line of the enemy's intrenchments in the rear carried with considerable loss. At noon the division of Gen. Howe was scattered over the heights, looking out for and pursuing the enemy, when orders were re-

ceived to move on and join the other divisions, which had gone through the city. The height and the city were thus abandoned, to be occupied soon after by the enemy. About five o'clock, the advance was overtaken a few miles out of Fredericksburg, engaged in a brisk fight with the enemy. The division of Gen. Howe was deployed to the left of the road over a broken country, with the left wing to the rear, so as to confront the enemy reoccupying the heights and massing in the rear. In this position Gen. Sedgwick's force remained in line of battle during the night, distant about six or seven miles from Gen. Hooker. By morning of the 4th, the enemy appeared in strong force in front and on the hills to his left. About 4 P. M. they moved up to attack, and Gen. Sedgwick's artillery opened fire on every quarter, but could not check their slow and steady advance, before which he gradually fell back toward Banks's Ford. The engagement was hot, and lasted until 9 P. M., with a loss to Gen. Sedgwick of nearly four thousand. That Monday night he recrossed the Rappahannock. The crossing was effected in good order, with the camp equipage, mule trains, etc., except a few of the latter, which were taken when the enemy first appeared in rear at Fredericksburg. All the work on the left was performed by this corps of Gen. Sedgwick. It built three bridges, constantly skirmished with the enemy, stormed the heights of Fredericksburg, and advanced to support the right, when it was flanked by a heavy force of the enemy and forced to retreat across the river.

The movements of the enemy in this affair were thus reported by Gen. Lee:

To His Excellency President Davis:

At the close of the battle of Chancellorsville on Sunday, the enemy was reported advancing from Fredericksburg on our rear. Gen. McLaws was sent to arrest his progress, and repulsed him handsomely.

That afternoon, learning that his forces consisted of two corps, under Gen. Sedgwick, I determined to attack him, and marched back yesterday with Gen. Anderson, and united with McLaws early in the afternoon, and succeeded, by the blessing of Heaven, in driving Sedgwick over the river.

We have reoccupied Fredericksburg, and no enemy remains south of the Rappahannock or in the vicinity.

R. E. LEE, General Commanding.

While these operations were going on under Gen. Sedgwick, the enemy made no serious attack upon Gen. Hooker. On Monday, at daylight, they placed guns on the heights, which commanded the ground north of United States Ford, and began shelling the trains of Gen. Hooker. These guns were soon silenced by the twelfth corps, which relieved the eleventh, and now occupied the extreme left. During the day, the enemy continued to feel the lines of Gen. Hooker from the extreme left to right, making vigorous feints, driving in pickets, picking off artillery horses and officers on horseback. It was in one of these forays that Gen. Whipple was mortally wounded in the spine, while standing against a tree in his own camp, supposing himself to be in perfect security. Gen.

Hooker continued during the day to strengthen his position with a second line of rifle pits. During Monday night slight skirmishing continued along the lines, with frequent volleys of musketry from some portion of the rifle pits. Batteries of flying artillery were used to shell the camps, which changed position as often as guns were brought to bear upon them. Thus the Federal troops were harassed and exhausted during the night.

Early on Tuesday all the pioneers and men, with extra tools, were employed on the roads leading from the army back to United States Ford. Old roads were repaired and new ones cut through the woods. The trains and artillery commenced moving toward the river early in the evening. The rain then was falling rapidly, and the night became quite dark. The crossing commenced at ten o'clock, and at three o'clock on Wednesday morning all the wagons and mule trains and artillery had passed the bridges, and the passage of the infantry commenced. The second corps, under Gen. Couch, led the advance. The fifth corps, under Gen. Meade, formed the rear guard, with Gen. Sykes's division of regulars to cover the retreat. The passage of the river was effected without any disturbance from the enemy. The dead on the battle field of Tuesday were left unburied, and many of the wounded remained behind. The rapid rise of the river prevented the immediate advance of Gen. Lee.

The movements of the cavalry force, under Gen. Stoneman, do not appear to have produced any advantage in favor of Gen. Hooker. As has been stated, the storms which ensued prevented active movements by Gen. Stoneman until the 29th of April. On that day he crossed at Kelly's Ford. The division of Gen. Averill moved to the Orange and Alexandria railroad, and encountered two regiments of the enemy, who retired toward Gordonsville. Thence he proceeded to Culpepper, and dispersed a force of the rebels there, capturing their rear guard, and seizing a large amount of flour, salt, and bacon. The enemy were pursued by way of Cedar mountain toward the Rapidan. Here he received a despatch from Gen. Stoneman, desiring him to push the enemy as vigorously as possible, and keep him occupied. On the 1st, scouting parties were sent up and down on both sides of the Rapidan. On the 2d, orders were received by him to join Gen. Hooker at United States Ford at once.

Gen. Stoneman, after crossing at Kelly's Ford, moved the main body of his command across Fleshman's creek, and encamped for the night in an open field. On the next day, the 3d, Gen. Buford crossed the Rapidan, two miles below Racoon Ford, and drove a body of infantry from the ford, where Gen. Gregg crossed later in the day. A lieutenant and thirteen privates of an artillery company were captured here. At night the whole force bivouacked one mile from the river. On the next day the march was commenced, and at Orange Spring a

force of the enemy, approaching by railroad, barely escaped capture. That night the command encamped at Greenwood, one mile from Louisa Court House, through which the Virginia Central railroad passes, connecting Gordonsville with Richmond. On the next day, the 2d of May, a squadron of the 10th New York, under Col. Irwin, was sent five miles above the town, and another of the same regiment, under Major Avery, was sent the same distance below, to destroy the track of the road, while Col. Kilpatrick took possession of the town. The track was torn up for some distance, the telegraph cut, and some commissary stores seized. In the afternoon the command moved to Thompson's Four Corners. From this place, as headquarters, several expeditions were sent out. On the next morning Col. Wyndham proceeded to Columbia, on the James river, where the Lynchburg and Richmond canal crosses the river. An unsuccessful attempt was made to destroy the aqueduct. Five locks were injured, three canal boats, loaded with commissary stores, and five bridges, were burned, and the canal lock cut in several places. A large quantity of commissary stores and medicines in the town were also destroyed. Another detachment, under Capt. Drummond, of the 5th cavalry, destroyed the bridge over the James river at Centreville. Other small parties were sent out in different directions, and some skirmishing took place with small parties of the enemy. At the same time a force, consisting of the 10th New York and 1st Maine, with two pieces of artillery, was sent out under Gen. Gregg, to destroy the railroad bridge at Ashland, while Col. Kilpatrick, with the Harris Light, and 12th Illinois, Lieut.-Col. Davis, were to go between Ashland and Richmond, destroying the railroad, bridges, &c. Gen. Gregg destroyed the bridge across the South Anna on the road from Columbia to Spottsylvania; thence he moved east, and destroyed the road to Beaver Dam Station. He then turned north to the Richmond and Gordonsville turnpike, sending out a detachment to burn the Ground Squirrel bridge. That night he bivouacked eight miles from Ashland. A detachment sent out to burn the bridge at Ashland found it too strongly defended. Some portions of the railroad track, however, were destroyed. Leaving Col. Kilpatrick and Lieut.-Col. Davis, Gen. Gregg returned on the next day to Gen. Stoneman. On the night of the 4th, Gen. Gregg moved near Yanceyville, and was followed the next day by Gen. Stoneman and Gen. Buford's command. On the 5th, the retrograde movement commenced, and crossing Racoon Ford, on the Rapidan, the command arrived at Kelly's Ford, on the North Fork. Meantime, the advance of Col. Kilpatrick was made, and thus subsequently reported by him:

By directions from Maj.-Gen. Stoneman, I left Louisa Court House on the morning of the 3d instant, with one regiment (the Harris Light Cavalry) of my brigade; reached Hungary, on the Fredericksburg railroad,

at daylight on the 4th; destroyed the depot and telegraph wires and railroad for several miles; passed over to Brook turnpike, drove in the rebel pickets; down the pike, across the brook, charged a battery, and forced it to retire within two miles of the city of Richmond; captured Lieut. Brown, aide-de-camp to Gen. Winder, and eleven men within the fortifications; passed down to the left of the Meadow bridge on the Chickahominy, which I burned; ran a train of cars into the river; retired to Hanovertown on the peninsula; crossed and destroyed the ferry boat just in time to check the advance of a pursuing cavalry force; burned a train of thirty wagons loaded with bacon; captured thirteen prisoners, and encamped for the night five miles from the river.

I resumed my march at 1 A. M. of the 5th; surprised a force of three hundred cavalry at Aylett's; captured two officers and thirty-three men; burned fifty-six wagons, the depot, containing upward of twenty thousand bushels of corn and wheat, quantities of clothing and commissary stores, and safely crossed the Mattaponi, and destroyed the ferry again just in time to escape the advance of the rebel cavalry pursuit. Late in the evening I destroyed a third wagon train and depot a few miles above and west of the Tappahannock on the Rappahannock, and from that point made a forced march of twenty miles, being closely pursued by a superior force of cavalry, supposed to be a portion of Stuart's, from the fact that we captured prisoners from the 8th, 1st, and 10th Virginia cavalry. At sundown discovered a force of cavalry drawn up in line of battle about King and Queen Court House. Their strength was unknown, but I at once advanced to the attack, only to discover, however, that they were friends—a portion of the 10th Illinois cavalry, who had become separated from the command of Lieut.-Col. Davis, of the same regiment.

At 10 A. M., on the 7th, I found safety and rest under our own brave old flag within our lines at Gloucester Point. This raid and march around the entire rebel army—a march of nearly two hundred miles—has been made in less than five days, with a loss of one officer and thirty-seven men, having captured and paroled upward of three hundred men.

At the same time, Lieut.-Col. Davis, of the 12th Illinois, was ordered to penetrate to the Fredericksburg railroad, and, if possible, to the Virginia Central, and destroy communications. If he crossed the Virginia Central he was to make for Williamsburg on the peninsula. Leaving the main body on the South Anna, on Sunday, May 3d, he passed down the bank of that river, burning a bridge, and, dispersing a mounted party of the enemy, struck the railroad at Ashland. Here he cut the telegraph, tore up some rails, and burned the trestlework bridge south of the town. At the same time a train of cars, filled with sick and wounded, arrived, and was captured. The prisoners were paroled, and the locomotives disabled. Twenty wagons, with horses, were destroyed, and several horses taken. Leaving at 6 P. M., a train of eighteen wagons was met and destroyed, and Hanover Station reached at 8 P. M. Here thirty prisoners were captured, and the railroad line broken. The depot, storehouses, and stables, filled with government property, were destroyed, also a culvert and trestlework south of the station. Among the property destroyed were more than one hundred wagons, a thousand sacks of flour and corn, and a large quantity of clothing and horse equipments. The command then moved down within seven miles of Richmond, and bivouacked

ed until eight o'clock the next morning. It then marched for Williamsburg, but at Tunstall's Station, near White House, encountered a train of cars, filled with infantry and a battery of three guns. This force formed in rifle pits, so that Col. Davis, by a charge, could not penetrate their line: he therefore determined to cross the Pamunkey and Mattaponi, and proceed to Gloucester Point. He thus reports the result of his movements :

Our total loss in the expedition has been two commissioned officers and thirty-three enlisted men; we brought with us one hundred mules and seventy-five horses, captured from the enemy. We captured, in the course of our march, a much larger number, which we could not bring in. The amount of property destroyed is estimated at over one million of dollars.

Respectfully submitted,

H. DAVIS, Lieut.-Colonel Commanding.

The army of Gen. Hooker, after recrossing, as before stated, moved immediately to its original camp opposite Fredericksburg.

On the 6th, Gen. Hooker issued the following address to his army:

General Orders No. 49.

HEADQUARTERS ARMY OF THE POTOMAC, }
May 6th, 1863.

The Major-General Commanding tenders to this army his congratulations on its achievements of the last seven days. If it has not accomplished all that was expected, the reasons are well known to the army. It is sufficient to say, they were of a character not to be foreseen or prevented by human sagacity or resource.

In withdrawing from the south bank of the Rappahannock before delivering a general battle to our adversaries, the army has given renewed evidence of its confidence in itself, and its fidelity to the principles it represents. On fighting at a disadvantage, we would have been recreant to our trust, to ourselves, our cause, and our country. Profoundly loyal and conscious of its strength, the Army of the Potomac will give or decline battle whenever its interest or honor may demand. It will also be the guardian of its own history and its own arm. By your celerity and secrecy of movement, our advance and passage of the rivers was undisputed, and on our withdrawal not a rebel ventured to follow.

The events of last week may swell with pride the heart of every officer and soldier of this army. We have added new lustre to its former renown. We have made long marches, crossed rivers, surprised the enemy in his intrenchments, and, wherever we have fought, have inflicted heavier blows than we have received. We have taken from the enemy five thousand prisoners; fifteen colors; captured and brought off seven pieces of artillery; placed *hors du combat* eighteen thousand of his chosen troops; destroyed his depots filled with vast amounts of stores; deranged his communications; captured prisoners within the fortifications of his capital, and filled his country with fear and consternation. We have no other regret than that caused by the loss of our brave companions, and in this we are consoled by the conviction that they have fallen in the holiest cause ever submitted to the arbitrament of battle.

By command of Major-General HOOKER.

S. WILLIAMS, Assistant Adjutant-General.

On the 7th, Gen. Lee issued the following address to his army:

General Orders No. 59.

HEADQUARTERS ARMY NORTHERN VIRGINIA, }
May 7th, 1863.

With heartfelt gratification, the General Commanding expresses to the army his sense of the heroic con-

duct displayed by officers and men, during the arduous operations in which they have just been engaged.

Under trying vicissitudes of heat and storm, you attacked the enemy, strongly intrenched in the depths of a tangled wilderness, and again on the hills of Fredericksburg, fifteen miles distant, and, by the valor that has triumphed on so many fields, forced him once more to seek safety beyond the Rappahannock. While this glorious victory entitles you to the praise and gratitude of the nation, we are especially called upon to return our grateful thanks to the only Giver of victory, for the signal deliverance He has wrought.

It is, therefore, earnestly recommended that the troops unite on Sunday next in ascribing to the Lord of Hosts the glory due His name.

Let us not forget, in our rejoicings, the brave soldiers who have fallen in defence of their country; and, while we mourn their loss, let us resolve to emulate their noble example. The army and the country alike lament the absence for a time of one to whose bravery, energy, and skill they are so much indebted for success.

The following letter from the President of the Confederate States, is communicated to the army as an expression of his appreciation of its success:

I have received your despatch, and reverently unite with you in giving praise to God for the success with which he has crowned our arms.

In the name of the people, I offer my cordial thanks to yourself and the troops under your command, for this addition to the unprecedented series of great victories which your army has achieved.

The universal rejoicing produced by this happy result will be mingled with a general regret for the good and the brave who are numbered among the killed and wounded.

R. E. LEE, General.

On the 8th, the following despatch was sent by the Secretary of War to the Governors of the Northern States:

WASHINGTON, May 8th, 1863.

The President and General-in-Chief have just returned from the Army of the Potomac. The principal operations of Gen. Hooker failed, but there has been no serious disaster to the organization and efficiency of the army. It is now occupying its former position on the Rappahannock, having recrossed the river without any loss in the movement. Not more than one third of Gen. Hooker's force was engaged. Gen. Stoneman's operations have been a brilliant success. Part of his force advanced to within two miles of Richmond, and the enemy's communications have been cut in every direction. The Army of the Potomac will speedily resume offensive operations.

(Signed) E. M. STANTON, Secretary of War.

On the same day, the President issued the following proclamation, preliminary to executing the law for obtaining soldiers by enrolment and draft. It would appear that the events on the Rappahannock had hastened the decision to put the law for this object in operation, and the proclamation notified all foreigners who had merely declared an intention to become citizens of the United States, that after sixty-five days they would be liable to draft, if found in the country.

By the President of the United States of America:

PROCLAMATION.

Whereas, the Congress of the United States, at its last session, enacted a law, entitled an act for the enrolling and calling out the national forces, and for other purposes, which was approved on the 3d day of March last; and whereas, it is recited in said act that there now exists in the West and South an insurrection against the authority thereof, and it is under the Constitution of the United States the duty of the Government to suppress insurrection and rebellion, to

guarantee to each State a republican form of government, and to preserve public tranquillity; and whereas, for these high purposes, a military force is indispensable, to raise and support which all persons ought willingly to contribute; and whereas, no service can be more praiseworthy and honorable than that which is rendered for the maintenance of the Constitution and Union, and consequent preservation of free government; and whereas, for the reasons thus recited, it was enacted by said statute that all able-bodied male citizens of the United States, and persons of foreign birth who shall have declared on oath their intention to become citizens under and in pursuance of the laws thereof, between the ages of 20 and 45 years, with certain exceptions not necessary to be here mentioned, are declared to constitute the national forces, and shall be liable to perform military duty in the service of the United States, when called on by the President for that purpose; and whereas, it is claimed, by and in behalf of persons of foreign birth within the ages specified in said act, who have heretofore declared on oath their intention to become citizens under and in pursuance of the laws of the United States, and who have not exercised the right of suffrage or any other political franchise under the laws of the United States or of any of the States thereof, are not absolutely concluded by their aforesaid declaration of intention from renouncing their purpose to become citizens; and that on the contrary such persons under treaties or the law of nations retain a right to renounce that purpose and to forego privilege of citizenship and residence within the United States under obligations imposed by the aforesaid act of Congress:

Now, therefore, to avoid all misapprehensions concerning liability of persons concerned to perform the service required by such enactment, and to give it full effect, I do hereby order and proclaim that no plea of alienage will be received or allowed to exempt from obligations imposed by the aforesaid act of Congress any person of foreign birth who shall have declared, on oath, his intention to become a citizen of the United States, under the laws thereof, and who shall be found within the United States at any time during the continuance of the present insurrection and rebellion at or after the expiration of the period of sixty-five days from date of this proclamation; nor shall any such plea of alienage be allowed in favor of any such person who has so as aforesaid declared his intention to become a citizen of the United States, and shall have exercised at any time the right of suffrage or any other political franchise within the United States under laws of any of the several States. In witness whereof I have hereunto set my seal and caused the seal of the United States to be affixed. Done at the City of Washington, this 8th day of May, in the year of our Lord 1863, and of the independence of the United States the 87th.

(Signed) ABRAHAM LINCOLN, President.

W. H. SEWARD, Secretary of State.

Previously, while the movements of Gen. Hooker were in progress, the following military orders were issued. The object appears to have been to prevent the transmission of premature and unreliable reports to Halifax, Nova Scotia, and by steamer to Europe:

WASHINGTON, MAY 1st, 1863.

To Major-Gen. Wool, commanding at New York.

By virtue of the act of Congress authorizing the President to take possession of railroad and telegraph lines, &c., passed February 4th, 1862, the President directs that you take immediate military possession of the telegraph lines lately established between Philadelphia and Boston, called the Independent Telegraph Company, and forbid the transmission of any intelligence relating to the movements of the Army of the Potomac or any military forces of the United States. In case this order is violated, arrest and imprison the perpetrators in Fort Delaware, reporting to this De-

partment. If the management of the line will stipulate to transmit no military intelligence without the sanction of the War Department, they need not be interfered with so long as the engagement is fulfilled. This order will be executed so as not to interfere with the ordinary business of the Telegraph Company.

By order of the President:

E. M. STANTON, Secretary of War.

Captain Rowello, aide-de-camp, will proceed by the first conveyance to Boston and execute the above order, viz.: Take military possession of the Independent Telegraph Company's lines, and forbid any transmission of information relating to the movements of the Army of the Potomac or any military forces of the United States. If the principal or owner of the line will stipulate not to violate the condition imposed, without the sanction of the War Department, he will not be interfered with. If, however, he violates the stipulations, he will be severely dealt with.

JOHN E. WOOL, Major-General.

To E. F. Leighton, Manager Boston Office, Independent Telegraph: Do not fail to send us the news just the same as heretofore; that is, everything that is made public in Boston or New York. No military dictator can prevent a legitimate use of our facilities for the transmission to any station of intelligence already made public.

J. W. STOVER,

Manager of Boston and Portland District.

The official statement of the killed and wounded of Gen. Hooker's army was as follows:

Officers killed.....	154
Enlisted men killed.....	1,358
Officers wounded.....	624
Enlisted men wounded.....	8,894

Total.....11,030

Some of the wounded remained on the field of battle at least ten days, as appears by the following, which was made public:

HEADQUARTERS ARMY OF THE POTOMAC, }
Tuesday, May 12th, 1863. }

Dr. Luckley, medical director in charge of our wounded on the field, reports that they are all comfortable, and are about twelve hundred in number. An ambulance train has been sent for them. They are expected to return to camp by to-night.

A flag of truce from Gen. Lee stated that he had exhausted his medicines and hospital stores, and fresh supplies were sent over for the wounded of Gen. Hooker's army. The number of prisoners taken was estimated by the enemy at eight thousand. It was an overestimate.

Gen. Halleck, in his annual report, thus speaks of the losses and of these operations:

For want of official data I am unable to give any detailed account of these operations, or of our losses. It is also proper to remark in this place that from the time he was placed in the command of the Army of the Potomac till he reached Fairfax Station, on the 16th of June, a few days before he was relieved from the command, General Hooker reported directly to the President, and received instructions directly from him. I received no official information of his plans, or of their execution.

The loss of the enemy in numbers was less than that of Gen. Hooker, but far greater in the importance of the officers. Among their wounded was Gen. Jackson, who subsequently died. Upon hearing that he was wounded, Gen. Lee addressed to him the following letter:

CHANCELLORSVILLE, *May 4th.*

To Lieutenant-Gen. T. J. Jackson :

GENERAL : I have just received your note, informing me that you are wounded. I cannot express my regret at the occurrence.

Could I have directed events, I should have chosen for the good of the country to have been disabled in your stead. I congratulate you upon the victory which is due to your skill and energy.

Most truly yours,

R. E. LEE, General.

Gen. Jackson had gone some distance in front of his line of skirmishers, on Saturday evening, May 2d, and was returning about eight o'clock, attended by his staff and part of his couriers. The cavalcade, in the darkness of the night, was supposed to be a body of Federal cavalry, and fired upon by a regiment of his own corps. He was struck by three balls, one through the left arm, two inches below the shoulder joint, shattering the bone and severing the chief artery; another ball passed through the same arm between the elbow and wrist, making its exit through the palm of the hand; a third ball entered the palm of the right hand, about the middle, passed through and broke two bones. He suffered for a week, during which his wounds improved, but sunk under an attack of pneumonia. The following order was issued by Gen. Lee:

General Order No. 61.

HEADQUARTERS ARMY OF NORTHERN VIRGINIA, }
May 11th, 1863. }

With deep grief the Commanding General announces to the army the death of Lieut.-Gen. T. J. Jackson, who expired on the 10th instant, at 3.15 P. M.

The daring, skill, and energy of this great and good soldier, by the decree of an all-wise Providence are now lost to us; but while we mourn his death, we feel that his spirit still lives, and will inspire the whole army with his indomitable courage and unshaken confidence in God as our hope and strength.

Let his name be a watchword to his corps, who have followed him to victory on so many fields. Let officers and soldiers emulate his invincible determination in defence of our beloved country.

R. E. LEE, General.

The armies confronting each other at Fredericksburg, now remained inactive for some time. A movement of a small force of Confederate cavalry near the Baltimore and Ohio railroad, during the last week in April, was made, by which some injury was done to that road, and an alarm created on its borders. On the 1st of June, the Federal force at West Point, on the York river, under Brig.-Gen. Gordon, was withdrawn, and a cavalry dash from Gloucester was made by Col. Kilpatrick through the adjacent counties, for the purpose of joining his force with that of Gen. Stoneman. At this time, also, some cavalry movements took place along the Rapidan, and such changes were observed in the appearance of the enemy's camp at Fredericksburg as created an impression that some of his force might have been withdrawn. This induced Gen. Hooker to make a reconnoissance in force on the 5th of June. The division of Gen. Howe, of the sixth corps, was sent across the river below Fredericksburg. Some skirmishing ensued, and the enemy developed so

much strength as to create the impression that the mass of his forces had not been removed.

On Tuesday, the 9th of June, two brigades of Gen. Pleasanton's cavalry, under command of Gen. Buford, made a reconnoissance to Culpepper. The force was supported by two batteries of artillery, and two regiments of infantry, as a reserve. On Monday night, the force bivouacked near Beverly ford, on the Rappahannock. Beyond the ford was a semi-circular belt of woods, with a range of rifle pits near the edge; and a line of pickets guarded the fords on the southern bank of the river. The cavalry crossed at 4 A. M., the 10th New York in advance, and drove the pickets back to the rifle pits, and then charged upon the pits. The combat was severe, but the enemy were driven from their pits and the woods. Falling back upon their artillery, they maintained their position until twelve o'clock, when Gen. Buford's artillery reached the ground, and the action was renewed. Gen. Pleasanton took command of the Union force before it was over. Gen. Stuart also arrived on the Confederate side. The Federal loss was about three hundred and sixty. Among the killed was Col. B. F. Davis, who led the cavalry force from Harper's Ferry at the time of its surrender in 1862. The enemy's loss was somewhat larger. The number of the enemy taken prisoners was about two hundred. In reply to a communication from Gen. Pleasanton, relating to the men left in the hands of Gen. Stuart, the latter subsequently stated that the dead had been decently buried, the wounded humanely attended by his surgeons, and the prisoners sent to Richmond; but that no parties would be permitted to visit the field by flag of truce, for the purpose of procuring the remains of friends, and that all future communications must be sent by the flag-of-truce boat to City-Point, Va.

Positive information was obtained by this reconnoissance that the Confederate forces were preparing for a movement, either against Washington or into the State of Maryland. An apprehension of an aggressive blow from the enemy now existed. Where, or in what manner the attempt would be made to strike the blow, no one could foretell. A threat had been made to invade Maryland and Pennsylvania with a considerable force, in retaliation for the raids made by Col. Grierson in Mississippi and Cols. Kilpatrick and Davis in Virginia. The cavalry force of Gen. Pleasanton, on its return, brought information that the enemy had been moving in strong force westward, through the town of Sperryville, toward Luray, in the Shenandoah valley; that the column so moving was three hours and a half in passing the town, and was composed of infantry and artillery. The movement of Gen. Pleasanton also developed that the enemy were massing their cavalry on the Upper Rappahannock for some purpose. On the 11th of June, a force, consisting of two hundred and fifty of the enemy's cavalry, crossed the Potomac at Edwards's Ferry, and

attacked the company of the 6th Michigan on picket at Seneca. This company gradually fell back toward Poolesville. The enemy burnt their camp and recrossed the river, where they remained for some time, assuming a threatening appearance.

On the 8th of June, the Richmond (Va.) press spoke of a movement of Gen. Lee, in these words: "It is too generally known to raise any question of prudence in speaking of it, that Gen. Lee has put his army in motion. His designs are known only to himself, and those with whom it was his duty to confer. A few days will disclose them to the public, who are willing to wait patiently, in full confidence that the result will vindicate the wisdom of what he undertakes. A forward movement on his part has been for some time anticipated by the enemy, and is regarded with very perceptible uneasiness."

The facts were as follows: The position occupied by Gen. Hooker, opposite Fredericksburg, being one in which he could not be attacked to advantage, Gen. Lee determined to draw him from it. The execution of this purpose by him embraced the relief of the Shenandoah valley from the Federal troops that had occupied the lower part of it during the winter and spring, and, if practicable, the transfer of the scene of hostilities north of the Potomac. It was thought that the corresponding movements on the part of Gen. Hooker, to which those contemplated by Gen. Lee would probably give rise, might offer a fair opportunity to strike a blow at the army under Gen. Hooker, and that in any event that army would be compelled to leave Virginia, and possibly to draw to its support troops designed to operate against other parts of the Confederacy. In this way it was supposed that the Federal plan of campaign for the summer would be broken up, and a part of the season of active operations be consumed in the formation of new combinations and the preparations that they would require. Other valuable results, it was hoped by Gen. Lee, would be attained by military success.

The movement of Gen. Lee began on the 3d of June. Gen. McLaws's division of Gen. Longstreet's corps left Fredericksburg for Culpepper Court House; and Gen. Hood's division, which was encamped on the Rapidan, marched to the same place. They were followed, on the 4th and 5th, by Gen. Ewell's corps, leaving that of Gen. A. P. Hill to occupy the Confederate lines at Fredericksburg. The forces of Gens. Longstreet and Ewell reached Culpepper on the 8th, at which point the Confederate cavalry under Gen. Stuart was concentrated. Gen. Jenkins, with his cavalry brigade, had been ordered to advance toward Winchester, to coöperate with the infantry in the proposed expedition in the lower part of the Shenandoah valley, and at the same time Gen. Imboden was directed with his command to make a demonstration in the di-

rection of Romney, in order to cover the movement against Winchester, and prevent the Federal troops at that place from being reënforced by the troops on the line of the Baltimore and Ohio railroad. Both of these officers were in position when Gen. Ewell left Culpepper Court House, on the 16th of June.

On the 9th of June, the War Department issued a general order (No. 172) establishing two new military departments, as follows:

1. The Department of the Monongahela, embracing that portion of the State of Pennsylvania west of Johnstown and the Laurel Hill range of mountains, and the counties of Hancock, Brooke, and Ohio, in the State of Virginia, and the counties of Columbia, Jefferson, and Belmont, in the State of Ohio. The command of this department is assigned to Major-Gen. William T. H. Brooks, with his headquarters at Pittsburgh.

2. The Department of the Susquehanna, embracing that portion of the State of Pennsylvania east of Johnstown and the Laurel Hill range of mountains. The command of this department is assigned to Major-Gen. Couch, with his headquarters at Chambersburg.

The following is the list of the military geographical departments and their commanders at this time:

Department of the Tennessee—Maj.-Gen. U. S. Grant.
 Department of the Cumberland—Maj.-Gen. W. S. Rosecrans.
 Department of the Ohio—Maj.-Gen. A. E. Burnside.
 Department of New England—Maj.-Gen. John A. Dix.
 Department of the Gulf—Maj.-Gen. N. P. Banks.
 Department of North Carolina and Department of Virginia—Maj.-Gen. J. G. Foster.
 Department of the Northwest—Maj.-Gen. John Pope.
 Department of Washington—Maj.-Gen. S. P. Heintzelman.
 Department of the Monongahela—Maj.-Gen. W. T. H. Brooks.
 Department of the Susquehanna—Maj.-Gen. Darius N. Couch.
 Department of Western Virginia—Brig.-Gen. B. F. Kelly.
 Department of New Mexico—Brig.-Gen. James H. Carlton.
 Department of the Pacific—Brig.-Gen. G. Wright.
 Department of Key West—Brig.-Gen. J. M. Brannan.
 Department of Kansas—Maj.-Gen. James G. Blunt.
 Middle Department—Maj.-Gen. Robert C. Schenck.
 Department of the South—Brig.-Gen. Q. A. Gillmore.
 Department of Missouri—Maj.-Gen. John M. Schofield.

On the 12th of June, the Governor of Pennsylvania issued the following proclamation:

In the name and by the authority of the Commonwealth of Pennsylvania, by Andrew G. Curtin, Governor of the said Commonwealth:

A PROCLAMATION.

Information has been obtained by the War Department that a large rebel force, composed of cavalry, artillery, and mounted infantry, has been prepared for the purpose of making a raid into Pennsylvania. The President has therefore erected two new departments, one in Eastern Pennsylvania, to be commanded by Major-General Couch, and the other in Western Pennsylvania, to be commanded by Major-General Brooks. I earnestly invite the attention of the people of Pennsylvania to the general orders issued by these officers on assuming the command of their respective departments.

The importance of immediately raising a sufficient force for the defence of the State cannot be overrated. The corps now proposed to be established will give

permanent security to our borders. I know too well the gallantry and patriotism of the freemen of this Commonwealth to think it necessary to do more than commend this measure to the people, and earnestly urge them to respond to the call of the General Government and promptly fill the ranks of this corps, the duties of which will be mainly the defence of our own homes, firesides, and property from devastation.

ANDREW G. CURTIN.

On the same day, Gen. Couch assumed the command of the Department of the Susquehanna, with his headquarters at Harrisburg, Penn. In consultation with Governor Curtin, they were of the opinion that the danger of an invasion of the State of Pennsylvania was certain. The Federal Government was therefore requested by the Governor to suspend all recruiting for the regular or volunteer service within the State, so that the citizens could be available in its defence. The request was granted. At the same time Gen. Couch issued the following order, calling for volunteers:

DEPARTMENT OF THE SUSQUEHANNA, }
CHAMBERSBURG, June 12th, 1863. }

The undersigned assumes command of this department. In view of the danger of the invasion now threatening the State of Pennsylvania by the enemies of the Government, a new military department has been made by direction of the War Department, embracing all the territory of Pennsylvania east of Johnstown and Laurel Hill range of mountains; headquarters at Chambersburg.

To prevent serious raids by the enemy, it is deemed necessary to call upon the citizens of Pennsylvania to furnish promptly all the men necessary to organize an army corps of volunteer infantry, artillery, and cavalry, to be designated the "Army Corps of the Susquehanna." They will all be enrolled and organized in accordance with the regulations of the United States service, for the protection and defence of the public and private property within the department, and will be mustered into the service of the United States to serve during the pleasure of the President or the continuance of the war. The company and field officers of the departmental corps will be provisionally commissioned by the President upon the recommendation of the General Commanding. They will be armed, uniformed, and equipped, and, while in active service, subsisted and supplied as active troops of the United States. When not required for active service to defend the department, they will be returned to their homes subject to the call of the Commanding General.

Cavalry volunteers may furnish their own horses, to be turned over to the United States at their appraised value, or allowance will be made for the time of actual service, at the rate authorized by law. All able-bodied volunteers between the ages of eighteen and sixty will be enrolled and received into this corps.

The volunteers for the State defence will receive no bounty, but will be paid the same as like service in the army of the United States, for the time they may be in actual service, as soon as Congress may make an appropriation for that purpose.

If volunteers belonging to this army corps desire, they can be transferred to the volunteer service for three years or during the war, when they will be entitled to all the bounties and privileges granted by the acts of Congress.

The General Commanding, in accordance with the foregoing general authority, calls upon all citizens within his department to come forward promptly to perfect the company organizations under United States regulations, to wit: one captain, one first lieutenant, one second lieutenant, sixty-four privates as the minimum and eighty-two as the maximum standard of each company.

The General Commanding specially desires that citizens of this district recently in the army should volunteer for duty in this army corps; thereby, from their experience, adding greatly to the efficiency of the force for immediate defensive operations; each company organization to be perfected as soon as possible, and report the name of the officers in command, the number of men, and the place of its headquarters, in order that they may be promptly furnished with transportation to the general rendezvous, which will be at Harrisburg. Any person who will furnish forty or more men who will be enrolled, if otherwise unobjectionable, will be entitled to a captaincy.

Any person who will bring twenty-five or more men, under the above conditions, will be entitled to a first lieutenantcy, and every person who will bring fifteen or more men, under the same conditions, to a second lieutenantcy. On their arrival at the place of rendezvous they will be formed into regiments. So far as practicable, and as may be found consistent with the interests of the public service, companies from the same locality will be put together in the regimental organizations.

For the present all communications will be addressed to Harrisburg. The chiefs of the respective organizations will report accordingly.

DARIUS N. COUCH, Major-Gen'l Commanding.

At the same time Gen. Brooks assumed command of the Department of Monongahela, with his headquarters at Pittsburg, and proceeded to prepare to resist any attempt at an invasion.

Meantime, the force which Gen. Hooker had sent across the Rappahannock on a reconnaissance had intrenched its position and remained on the plain below Fredericksburg, and two bridges were constructed over the river. The enemy fortified themselves strongly, and waited for any demonstration. There were evidently about ten thousand men in their first line of defences, and others were visible upon the ridges and in the woods, within supporting distance. New earthworks appeared every morning on the heights; picket firing was constant, and occasionally their artillery opened fire. It was known that troops had been hurrying up for some time from Southeastern Virginia and North Carolina, and that the army of Gen. Lee had been reorganized and made to consist of three large corps, under Gens. Longstreet, Ewell, and A. P. Hill. Although the force displayed in Fredericksburg was large, yet Gen. Lee was supposed to be at Culpepper on the 12th, with the corps of Gens. Longstreet and Ewell, for the purpose of attacking the right of Gen. Hooker, and preparations were made to resist him. On the 13th it was manifest that the movements of Gen. Lee in the direction of Culpepper, had been made on a larger and more extensive scale than was at first supposed, and embraced nearly the whole of his army, leaving near Fredericksburg not more than ten thousand men. Such a movement removed every doubt of his intention to assume the offensive.

There existed at this time many considerations to encourage Gen. Lee in this movement. The army of Gen. Hooker had been reduced, not only by the losses in the battle of Chancellorsville, but by the departure of nearly twenty thousand men, who had enlisted, some

for two years, and some for nine months, and whose term of service had now expired. No aid to him could be expected from the West. The Confederate authorities had declared that Gen. Johnston should be strengthened sufficiently to attack Gen. Grant in the rear and raise the siege of Vicksburg. This declaration, on their part, had caused the Federal Government to make every exertion to defeat it. All the troops which could be spared in the West were sent to Gen. Grant. The force of Gen. Burnside, in the Department of Ohio, was included. This not only compelled the latter to remain inactive, but actually exposed Ohio and Western Virginia. The entire levy of nine-months' men would go home in June, and the Federal Government had made no call for others in their place, and had not in reality succeeded in obtaining by enlistment any number of troops except the free and slave blacks it had been successful in organizing. There were also reasons why the army of Gen. Lee should take the field. It was now well known to the Confederate Government that it would be unable to reinforce Gen. Johnston, so that the siege of Vicksburg could be raised; a counteracting effort was therefore necessary in some quarter. The supplies which might be obtained by an invasion of the North were also greatly needed.

It was the purpose of Gen. Lee, if possible, to strike a most decisive blow. For this object an army of nearly one hundred thousand men had been collected in the field. It was first contemplated by Gen. Lee to enter Pennsylvania, and keep the army of Gen. Hooker fully occupied. Meantime, a body of chosen troops were to be detached from the forces of Gen. Beauregard, at Charleston, and Gen. Bragg, in Tennessee, and concentrate at Culpepper, for the purpose of making an attack on Washington. It was thought that the Federal Government, thus divided between a fear of leaving Pennsylvania defenceless, and the necessity of protecting the seat of government, would be obliged to fail signally in one quarter or the other. Either Washington would fall, or the chief towns of Pennsylvania and all the rich regions surrounding them would come into the possession of Gen. Lee's army.

Gen. Hooker penetrated the object of Gen. Lee in concentrating upon the Upper Rappahannock before it was too late. As early as the 12th of June he began to send his sick and wounded to Washington, and to remove his stores. A most formidable invasion by Gen. Lee was soon developed.

On Friday, the 12th of June, it was ascertained at Winchester that a large body of the enemy were moving up the Shenandoah valley. On Saturday an attack was made by the advance of the enemy, under Gen. Rhodes, upon Berryville, which was held by Gen. McReynolds as an outpost of Winchester. The force of Gen. McReynolds was about three thousand men, and the position was midway between Winchester and Snicker's Gap, through which the enemy

advanced. The attack was repelled with vigor and firmness for some time, when, in consequence of overwhelming numbers, a retreat upon Winchester was commenced. The 6th Maryland, Col. Horne, with Capt. Alexander's 1st Maryland battery covered the retreat, and maintained their ground until, the enemy closing around them, they were compelled to abandon their guns. A large part of the regiment were made prisoners, but were not disarmed, and, in the confusion which ensued during the darkness of the evening, withdrew unobserved, being familiar with the roads, and escaped.

On the same day, early in the morning, the pickets of Maj.-Gen. Milroy, at Winchester, were driven in by the advance of Gen. Ewell, with the divisions of Gens. Early and Johnson. A detachment was sent out to feel their strength, and an artillery fire was kept up for some time. Gen. Milroy, then in command at Winchester, had a force of seven thousand men, with three batteries of field artillery, and six siege pieces, in a fort. As the forces of the enemy increased during the day, the advanced regiments of Gen. Milroy were compelled to fall back to the cover of the town. Some guns, posted in the outskirts, prevented the enemy from crossing Mill creek that day; but all the country southward from the creek was free to them. During the morning of Sunday, and, in fact, all day, skirmishing took place between the 18th Connecticut and 87th Pennsylvania regiments and the skirmishers of the enemy's force, who were posted in the woods, a mile east of Winchester, on the Berryville road, and extending across to the Front Royal road on the southeast. The Federal troops kept close in upon the town, while the enemy came up to the eastern side of the public cemetery, across which the principal firing took place. About half past four P. M. the skirmishers of the enemy charged up the Berryville and Front Royal roads to the edge of the town, but by a well-directed fire were repulsed in confusion. A charge was now ordered by Gen. Milroy to be made by these two regiments, but the enemy were found to be so well supported in the distant woods that the regiments were compelled to get back as soon as they could.

About five o'clock P. M. the enemy appeared in strong force, with two eight-gun batteries, directly west of the main fort north of the Romney road, which runs directly west from the town, and about fifteen hundred yards from the outworks. These were held by the 110th Ohio, and company L, 5th regiment artillery. After getting his batteries into position and opening fire, Gen. Ewell massed his infantry, and charged across the fields to the very muzzles of the Federal guns, although the latter were fired vigorously. Without a pause, the enemy crossed the ditch, came over the breastworks, and planted their colors on the embankment. The Ohio regiment was driven from the works at the point of the bayonet. Some escaped back

to the main fort, and the remainder were captured or killed.

Gen. Milroy, finding that the enemy were on the east, south, and west of him, and were moving toward the Martinsburg road, which runs north from the town, ordered all the troops and artillery from the south and east into the line of earthworks encircling the main works, when the contest between the Federal artillery and that of the enemy continued until night. At that time the second brigade, under Col. Ely, occupied the town and the space to the main fort on the northwest; the first brigade, under Gen. Elliott, occupied the main fort, and the third, under Col. McReynolds, was posted in the Star fort, north of the main fort. Soon after dark the enemy charged across the ravine between their new position and the main fort, but met such a fire as quickly repulsed them. Quiet then prevailed.

At one o'clock, on Monday morning, Gen. Milroy called a council of brigade commanders, and it was decided to abandon the position, and retreat to Harper's Ferry. The troops were then quickly put in motion, taking nothing except what they had upon their persons. They marched on the road to Martinsburg about four miles, when they encountered a strong force of the enemy, upon whom an advance was made and repulsed. The 18th Connecticut and 5th Maryland regiments, being on the left of the line, were captured almost entire. Of the remainder, about 1,600 reached Maryland Heights; about 400 Hancock and Cumberland, and about 1,700 Bloody Run. Three full batteries of field artillery, and all the siege guns in the Star fort and the main fort, were taken by the enemy; also the quartermaster's and commissary's stores, the ammunition of all kinds, 6,000 muskets, 200 wagons with horses and mules, and all the private baggage of officers and men. The dead and wounded were left on the field and along the roadside as they fell. On Tuesday a large train of wagons, which had left Gen. Milroy early on Sunday, arrived at Harrisburg. It had not been molested.

Maj.-Gen. Milroy had previously rendered himself very obnoxious to the enemy, in consequence of rigorous measures adopted by him in Western Virginia. Their hatred to him was so bitter that a reward of ten thousand dollars was offered for his head.

Subsequently a court of inquiry was ordered, preliminary to a court martial, upon the conduct of Gen. Milroy at Winchester. The report of the Judge Advocate-General, with the evidence elicited, was laid before the President, who rendered the following decision:

In June last a division was substantially lost at and near Winchester, Va. At the time it was under Gen. Milroy, as immediate commander in the field, Gen. Schenck, as department commander at Baltimore, and Gen. Halleck, as commander-in-chief at Washington. Gen. Milroy, as immediate commander, was put under arrest, and subsequently a court of inquiry examined chiefly with reference to disobedience of orders, and reported the evidence.

The foregoing is a synoptical statement of the evidence, together with the Judge Advocate-General's conclusions. The disaster, when it came, was a surprise to all. It was well known to Gen. Schenck and Gen. Milroy for some time before that Gen. Halleck thought that the division was in general danger of a surprise at Winchester; that it was of no service there commensurate with the risk it incurred, and that it ought to be withdrawn. But, although he more than once advised its withdrawal, he never positively ordered it.

Gen. Schenck, on the contrary, believed the service of the force at Winchester was worth the hazard, and so did not positively order its withdrawal until it was so late that the enemy cut the wire and prevented the order reaching Gen. Milroy. Gen. Milroy seems to have concurred with Gen. Schenck in the opinion that the forces should be kept at Winchester, at least until the approach of danger; but he disobeyed no order upon the subject.

Some question can be made whether some of Gen. Halleck's despatches to Gen. Schenck should not have been construed to be orders to withdraw the force and obeyed accordingly; but no such question can be made against Gen. Milroy. In fact, the last order he received was to be prepared to withdraw, but not actually to withdraw till further order—which further order never reached him.

Serious blame is not necessarily due to every serious disaster, and I cannot say that in this case either of these officers is deserving of serious blame. No court martial is deemed necessary or proper in the case.

A. LINCOLN.

Maj.-Gen. Halleck, in his annual report, dated Nov. 15th, says:

Winchester and Martinsburg were at this time occupied by us simply as outposts. Neither place was susceptible of a good defence. Directions were therefore given on the 11th of June to withdraw those garrisons to Harper's Ferry; but these orders were not obeyed, and on the 13th Winchester was attacked and its armament and a part of the garrison captured.

On Sunday, the 14th, about 4 P. M., Gen. Rhodes, who had been instructed, after dislodging the force at Berryville, to cut off the communications between Winchester and the Potomac, appeared before Martinsburg, north of Winchester, and demanded its surrender of Gen. Tyler, who was in command. This was refused, and an attack was made, which Gen. Tyler resisted until dark. He then prepared to evacuate the position. This movement being discovered by the enemy, the attack was renewed, and a bloody contest followed, which was kept up until he reached the Potomac river. He then crossed at Shepherdstown, and subsequently moved to Harper's Ferry with his forces.

The following is Gen. Lee's report of the taking of Martinsburg:

CULPEPPER COURT HOUSE, June 18th, 1863.

Gen. S. Cooper, Adjutant and Inspector-General:

GENERAL: On the afternoon of the 14th, Gen. Rhodes took possession of Martinsburg, capturing several pieces of artillery, more than two hundred prisoners, and a supply of ammunition and grain.

Our loss was one killed and two wounded.

R. E. LEE, General.

Gen. Lee subsequently reported that more than four thousand prisoners, twenty-nine pieces of artillery, two hundred and seventy wagons and ambulances, with four hundred horses, were captured in these operations, besides a large amount of military stores.

On Monday morning a body of the enemy's cavalry, under Col. Jenkins, estimated at two thousand in number, crossed the Potomac at Williamsport, north of Martinsburg, without opposition, and immediately moved northward through Hagerstown to Greencastle, Pennsylvania, and thence to Chambersburg, where they arrived on Tuesday night. There was no Federal force at either of these places to oppose them. The only hostile acts of this force were the seizure of horses, cattle, and forage; goods were purchased at stores and paid for in Confederate scrip. On Tuesday afternoon a small force of Confederate infantry crossed the Potomac at Williamsport, for the purpose of guarding the passage until the return of the cavalry expedition.

The Baltimore and Ohio railroad managers, on seeing the approaching danger, had removed from their road all cars and engines for the space of one hundred miles, between Harper's Ferry and Cumberland.

The rest of the force which advanced up the Shenandoah valley was massed in the vicinity of Harper's Ferry, apparently threatening an attack upon that place, although it remained quiet. A band of guerrillas, under Col. Moseby, numbering about one hundred and fifty, on Saturday entered Loudon county, Va., and spread themselves about from Halltown to Waterford in small squads. On Sunday and Monday they were slightly reënforced. On Wednesday this force crossed the Potomac, and captured a small squad of home guards stationed there. They afterward intercepted a train of twenty-two freight cars, most of which were empty, that were returning to Baltimore from Harper's Ferry. The cars were burned, and the locomotives badly injured. The enemy then returned to the Virginia side of the river, but maintained their pickets along the banks. The force at Chambersburg, taking all the negroes with them, returned on Wednesday night to Hagerstown. The bridge at Scotland, five miles east of Chambersburg, was burned by them. From Hagerstown a detachment was sent to McConnellsburg, where it arrived on Friday morning, the 19th. The town was completely surprised, and large numbers of horses and cattle were captured. Many of the horses were returned upon the intercession of the owners. Goods were obtained from the stores in large quantities. The enemy then retired, but on the next day, a small body of them were captured in the neighborhood by a regiment of New York cavalry.

McConnellsburg is the capital of Fulton county, Pennsylvania. It is situated on the turnpike from Philadelphia to Pittsburg, and is seventy miles west of southwest from Harrisburg. The population is about eight hundred.

A small force appeared at Hancock, Md., on the 18th, and burned the canal boats there, but were driven off by a cavalry force from the command of Col. Gallagher, attached to the corps of Gen. Kelly. Cumberland, further

west on the Potomac, was occupied by about nine hundred cavalry under Col. Imboden, on the 17th. No damage, however, was done. All the bridges on the Baltimore and Ohio railroad, from Harper's Ferry to Cumberland, a distance of one hundred miles, were destroyed. West of Cumberland the road was torn up at Brady's Station, which was east of New Creek, where the Federal forces were stationed. Meantime small bands of cavalry were sent out from Hagerstown and Frederick, to seize horses and cattle, large numbers of which were captured and driven across the Potomac to the Confederate army. These operations produced an unparalleled excitement in Washington and throughout the Northern States. They were regarded as indicating the approach of Gen. Lee with an immense army. It was known that he had commenced a movement, and that the Army of the Potomac was also in motion, but all information of the position of each army was carefully withheld from the knowledge of the public. Under this uncertainty, all measures taken by the Government for defence, which became known, tended to increase the excitement. Vast efforts were made with the utmost promptness and vigor, to prepare to resist successfully the invasion.

Upon the first complete news of the attack upon Winchester, the President issued the following proclamation:

Whereas, the armed insurrectionary combinations now existing in several of the States are threatening to make inroads into the States of Maryland, West Virginia, Pennsylvania, and Ohio, requiring immediately an additional military force for the service of the United States:

Now, therefore, I, Abraham Lincoln, President of the United States, and Commander-in-Chief of the Army and Navy thereof, and of the militia of the several States when called into actual service, do hereby call into the service of the United States one hundred thousand militia from the States following, namely:

From the State of Maryland ten thousand.

From the State of Pennsylvania fifty thousand.

From the State of Ohio thirty thousand.

From the State of West Virginia ten thousand.

To be mustered into the service of the United States forthwith, and to serve for the period of six months from the date of such muster into said service, unless sooner discharged; to be mustered in as infantry, artillery, and cavalry, in proportions which will be made known through the War Department, which department will also designate the several places of rendezvous.

These militia are to be organized according to the rules and regulations of the volunteer service, and such orders as may hereafter be issued.

The States aforesaid will be respectively credited under the enrolment act for the militia service rendered under this proclamation.

In testimony whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this 15th day of June, in the year of our Lord 1863, and of the independence of the United States the eighty-seventh.

By the President: ABRAHAM LINCOLN.

WM. H. SEWARD, Secretary of State.

On the same day, a telegraphic despatch was sent to Governor Seymour of New York, calling for twenty thousand militia immedi-

ately. On the same day the Governor replied, and ordered the troops out, as appears by the following sub-orders:

HEADQUARTERS FIRST BRIGADE N. Y. S. N. G., }
NEW YORK, June 15th, 1863. }

By order of the Commander-in-Chief of the State of New York, the several regiments of this brigade will hold themselves in readiness to depart for Philadelphia at once, on short notice. By order of

Brigadier-General C. B. SPICER.

R. H. HOADLEY, Brigade Major and Inspector.

WILLIAM D. DIMOCK, Aide-de-Camp.

Order No. 3.

HEADQUARTERS, 543 BROADWAY, }
NEW YORK, June 15th, 1863. }

Commandants of regiments of the Third Brigade N. Y. N. G., are hereby directed to report to General Wm. Hall, at his quarters, at six o'clock on Tuesday morning, by order of the Commander-in-Chief, Horatio Seymour, to be ready to go to Philadelphia at once, on short service.

The brigade drill for the 17th inst. is hereby countermanded. By order, General WM. HALL.

J. K. SMITH, Quartermaster.

The response of the Governor of New York was thus approved by the authorities at Washington:

WASHINGTON, June 15th, 1863.

GOVERNOR SEYMOUR: The President directs me to return his thanks, with those of the Department, for your prompt response. A strong movement of your city regiments to Philadelphia would be a very encouraging movement, and do great good in giving strength to that State.

EDWIN M. STANTON, Secretary of War.

The Governor of Pennsylvania, on the same day, issued the following proclamation:

The State of Pennsylvania is again threatened with invasion, and an army of rebels is approaching our borders. The President of the United States has issued his proclamation, calling upon the State for fifty thousand men. I now appeal to all the citizens of Pennsylvania, who love liberty and are mindful of the history and traditions of their Revolutionary fathers, and who feel that it is a sacred duty to guard and maintain the free institutions of our country, who hate treason and its abettors, and who are willing to defend their homes and firesides, and do invoke them to rise in their might and rush to the rescue in this hour of imminent peril. The issue is one of preservation or destruction. It involves considerations paramount to all matters of mere expediency, and all questions of local interest. All ties—social and political—all ties of a personal and partisan character, sink by comparison into insignificance. It is now to be determined by deeds, and not by words alone, who are for us and who are against us. That it is the purpose of the enemy to invade our borders with all the strength he can command, is now apparent. Our only defence rests upon the determined action of the citizens of our free commonwealth.

I therefore call upon the people of Pennsylvania, capable of bearing arms, to enroll themselves in military organizations, and to encourage all others to give aid and assistance to the efforts which will be put forth for the protection of the State and the salvation of our common country.

ANDREW J. CURTIN, Governor.

At the same time, he sent a message to the Governor of New Jersey, requesting the aid of troops from that State. The Secretary of War also sent a request to the Governor for troops. The Governor of New Jersey immediately issued the following call for men:

EXECUTIVE CHAMBER, TRENTON, N. J., June 16, 1863.

JERSEYMEN: The State of Pennsylvania is invaded. A hostile army is now occupying and despoiling the towns of our sister State. She appeals to New Jersey, through her Governor, to aid in driving back the invading army. Let us respond to this call upon our patriotic State with unprecedented zeal.

I therefore call upon the citizens of this State to meet and organize into companies, and report to the Adjutant-General of the State as soon as possible, to be organized into regiments as the militia of New Jersey, and press forward to the assistance of Pennsylvania in this emergency. The organization of these troops will be given in general orders as soon as practicable.

JOEL PARKER.

S. M. DICKINSON, Private Secretary.

On the 16th, the Governor of Maryland issued the following proclamation:

Whereas, the President of the United States, by his proclamation of the 15th instant, calling into the service of the Government the militia of several of the States now threatened with invasion by the insurgents in arms against the Union, has designated ten thousand men as the quota of Maryland, required for the special purpose of protecting her own soil, it becomes us to respond with the least possible delay earnestly and effectually to the call thus made upon us. The entire want of any efficient organization of the militia of the State makes it necessary to provide the required force either by volunteers or by draft. The term of their service will be six months, and the State will be credited under the recent enrolment act with the number thus furnished.

Whether we look to the purpose for which this force is required, to the success or efficiency of its operations, or to the probable movements of other States embraced in the same appeal, every consideration connected with the subject demands that the call should be met by an offer of volunteers. When our own territory is threatened by an invader, let it never be said that we lacked the spirit to meet the emergency or looked to others to provide for our defence.

Whilst, therefore, measures will immediately be taken to provide by draft from the recent enrolment whatever of the force now called for is not promptly furnished by volunteers, I would earnestly appeal to the patriotism and pride of every Marylander so to respond to the call now made upon them as to leave no necessity to raise a single company by any compulsory process.

The ten thousand men required of us will be organized into eight regiments of infantry, one regiment of cavalry, and two batteries of artillery, and though required to be of the maximum standard, they will be mustered into the service of the United States, armed and equipped, whenever they can muster the minimum number required in each.

The volunteer militia organizations now existing in the city of Baltimore and other parts of the State, are earnestly invited to call their members together and make their respective commands a nucleus for the formation of a complete regiment.

Whenever a battalion or company, or a majority of their respective members, shall make such offer of their services, they will report to Major Wharton, No. 65 Fayette street, who will designate a place of regimental rendezvous, and an effort will be made to obtain from the War Department permission to muster in the several companies, as soon as formed, without waiting for the complete regimental organization.

In witness whereof I have hereunto set my hand and affixed the great seal of the State, this 16th day of June, 1863.

A. W. BRADFORD.

WM. B. HILL, Secretary of State.

The Governor of West Virginia issued the following order to commanding officers:

The commandants of regiments and companies of Virginia militia will immediately call their companies

and regiments together, to be held in readiness to go to the field at an hour's warning, and will provide such means as shall be effectual in giving immediate notice to all. Arms and equipments will be furnished at the several places of rendezvous.

The enemies of our liberty and prosperity are again threatening our peaceful homes.

Citizen soldiers, stand by your firesides and defend them against the common foes of a free government.

Make every available spot a rifle pit from which to slay the enemy.

You know the roads and the passes. Show yourselves to be worthy of your sires, who gave you the inestimable blessings of freedom and independence.

F. H. PIERPOINT, Governor.

The Governor of Ohio made the following appeal to the citizens of the State:

STATE OF OHIO, EXECUTIVE DEPARTMENT, }
COLUMBUS, O., June 15th, 1863. }

TO THE PEOPLE OF OHIO.

Lee's rebel army is advancing in force upon Pennsylvania, Western Virginia, and the eastern portion of our own State. To meet this horde of rebels, the President of the United States has, by proclamation, called out one hundred thousand militia for the period of six months, unless sooner discharged. Of this force, thirty thousand are called from Ohio; and now, gallant men of Ohio, will you promptly respond to this necessary call, without hesitancy? I have assured the President that you would do so. Remember that our own sacred homes are threatened with pillage and destruction, and our wives and daughters with insult. To the rescue then at once, and thus save all that is dear to men. As we have but few, if any, regularly organized companies of volunteer militia, I can but invite and implore you to duty. The few companies which have been recently organized are requested to repair at once, with their entire force, to the camps hereinafter indicated. All others will go forward in squads and be organized into companies after their arrival in camp, for which purpose efficient officers will be designated. Railroad transportation has been duly provided, and every provision necessary for the comfort of the men after their arrival in camp. A reasonable allowance will be made to each volunteer for his subsistence when *en route* to the camp. The pay and allowance for clothing will be the same as that of the volunteer service. Should more respond than the Government requires, the surplus men will be returned to their homes free of all expense to themselves, with the regular pay for the period necessarily absent.

The military committees of the several counties are especially requested to exert themselves in securing a prompt response to this call. The troops will all be organized into regiments and well armed before being ordered into service.

And now, fellow citizens of the State, in the name and behalf of the best Government on earth, let me implore you to lay aside all other duties and obligations, and come forward promptly and cheerfully for the preservation of all that is dear to us. You will thus secure the gratitude of your children's children, and the smiles and blessings of Heaven.

DAVID TOD, Governor.

The utmost activity now prevailed to hasten forward troops to the centre of Pennsylvania. In New York, the Major-General of the First Division of State militia issued the following order:

HEADQUARTERS FIRST DIVISION N. Y. S. M., }
NEW YORK, June 16th, 1863. }

The regiments of this division are directed to proceed forthwith to Harrisburg, in Pennsylvania, to assist in repelling the invasion of that State.

The United States Quartermaster and Commissary will furnish transportation and subsistence upon the requisition of regimental quartermasters, countersigned by the colonels.

The term of service will not exceed thirty days.

Commandants of brigades and regiments will report to the Major-General the numbers ready for transportation, and will receive directions as to the route and time of embarkation.

Each man will provide himself with two days' cooked provisions.

By order of Major-Gen. CHAS. W. SANFORD.
J. H. WILCOX, Division Inspector.

This division consisted of four brigades. The first brigade, under Gen. C. B. Spicer, was composed of the 1st, 2d, 3d, 71st, and 73d regiments. The second brigade, under Gen. Chas. Yates, was composed of the 4th, 5th, 6th, and 12th regiments. The third brigade, under Gen. Hall, was composed of the 7th, 8th, 37th, and 55th regiments. The fourth brigade, under Gen. Ewen, was composed of the 11th, 22d, and 69th regiments.

On that day there went forward the 7th regiment, 650 men. On the 18th, the 8th, 371 men; 11th, 762 men; 23d, 626 men, and 71st, 737 men. On the 19th, the 5th, 828 men; 12th, 684 men; 22d, 568 men; 37th, 693 men; 65th, 555 men, and 74th, 504 men. On the 20th, the 4th, 560 men; 13th, 496 men; 28th, 484 men; 56th, 476 men. On the 22d, the 6th, 656 men; 52d, 351 men; 69th, 600 men. On the 23d, the 67th, 400 men. On the 24th, the 55th, 350 men; 68th, 400 men. On the 26th, the 47th, 400 men. On the 27th, the 21st, 600 men. On July 3d, the 17th, 400 men; 18th, 400 men; 84th, 480 men. The total number sent between the 15th of June and the 3d of July was 13,971 men. During the same time scattered detachments of volunteers in the State to the number of 1,827 men were organized and equipped and ordered to Harrisburg.

On the 19th of June the following despatch was sent to the Adjutant-General of the State:

WAR DEPARTMENT, WASHINGTON CITY, }
June 19th, 1863. }

To Adjutant-General Sprague:

The President directs me to return his thanks to His Excellency Gov. Seymour, and his staff, for their energetic and prompt action. Whether any further force is likely to be required will be communicated to you to-morrow, by which time it is expected the movements of the enemy will be more fully developed.

(Signed) EDWIN M. STANTON,
Secretary of War.

Again, on the 27th, the following despatch was sent to the governor of the State by the Secretary of War:

WAR DEPARTMENT, WASHINGTON CITY, June 27, 1863.

DEAR SIR: I cannot forbear expressing to you the deep obligation I feel for the prompt and cordial support you have given the Government in the present emergency. The energy and patriotism you have exhibited I may be permitted personally and officially to acknowledge, without arrogating any personal claims on my part, to such service, or any service whatever.

I shall be happy always to be esteemed your friend,
EDWIN M. STANTON.

His Excellency HORATIO SEYMOUR.

The Governor of New Jersey, in answer to the request of the Governor of Pennsylvania, for the further services of the nine months'

men, then returning from the war, immediately tendered the services of the 22d regiment, which had not been disbanded. It left for Harrisburg on the 17th. Other regiments of nine months' volunteers, then returned, tendered their services. By the 20th more than two thousand men had gone forward. Some single companies proceeded to Harrisburg. The entire State sent forward several thousand men. On the 22d the Governor ordered the troops to return home, as the emergency had apparently passed.

In Pennsylvania, the first efforts of the Governor were directed to obtain troops from Washington. These failed entirely. On the 16th he issued the following appeal to the people of Philadelphia:

To the People of Philadelphia:

For nearly a week past it has been publicly known that the rebels in force were about to enter Pennsylvania. On the 12th instant, an urgent call was made on the people to raise Department Army Corps for the defence of the State. Yesterday, under the proclamation of the President, the militia was called out. To-day a new and pressing exhortation has been given to furnish men, but Philadelphia has not responded.

Meanwhile the enemy is six miles this side of Chambersburg and advancing rapidly.

Our capital is threatened, and we may be disgraced by its fall, while the men who should be driving these outlaws from our soil are grumbling about the possible term of service for six months. It was never intended to keep them beyond the continuance of the emergency.

You all know this by what happened when the militia was called out last autumn. You then trusted your Government, and were not deceived. Trust to it again now. I will accept men without reference to the six months. If you do not wish to bear the ignominy of shirking from the defence of your State, come forward at once. Close your places of business and apply your hearts to the work. Come in such organizations as you can form. Gen. Couch has appointed Lieut.-Col. Ruff to superintend your organization. Report to him immediately. (Signed) A. G. CURTIN,
Governor.

At the same time the Governor gave notice that he would receive men without the requirement of six months' service, and arrangements were made with the railroads to furnish transportation to Harrisburg upon application of the officers of militia companies. On the 16th, Lancaster sent five hundred men to Harrisburg, and Reading a regiment. The militia at Harrisburg were reorganized and armed. On the 17th thousands of men reached Harrisburg from different parts of the State. The following list of some of the organizations shows that the interior of the State was aroused to action:

One hundred and twenty-seventh regiment (Col. Jennings), Harrisburg, 1,000 men.

First Pennsylvania Militia (Col. R. A. Lamberton), Harrisburg, 1,000.

Capt. William H. Connechan, Bradford, 105 men.

Capt. J. M. Gregory, Lehigh, 70 men.

Capt. J. H. Holion, Lehigh, 70 men.

Capt. J. M. Broomall, Delaware, 71 men.

Capt. G. T. Waters, Northampton, 53 men.

Capt. William R. Ash, Chester, 100 men.

Capt. J. G. Eicholtz, Chester, 53 men.

Capt. J. B. Davis, Northumberland, 50 men.

Capt. John McClay, Northumberland, 71 men.

Capt. William Stoel, Chester, 50 men.

Capt. W. McVeigh, Chester, 60 men.

Capt. W. M. Hinkson, Chester, 45 men.

Capt. W. C. Dickey, Chester, 48 men.

Capt. E. F. James, Chester, 63 men.

Capt. George B. Thomas, Chester, 57 men.

Capt. Charles Roberts, Chester, 40 men.

Capt. R. D. Townsend, Chester, 16 men.

Capt. A. Ricketts, Luzerne, 56 men.

Capt. R. F. Clark, Columbia, 90 men.

Capt. J. B. Grantiers, Bradford, 71 men.

Capt. J. D. Jenkins, Chester, 82 men.

Capt. James Dickson, Luzerne, 40 men.

Capt. H. Bloss, Northampton, 35 men.

Capt. J. F. Ramsey, Montour, 70 men.

Capt. D. A. Smith, Schuylkill, 105 men.

Capt. T. J. Sleppy, Columbia, 31 men.

Capt. Wm. B. Mann, Philadelphia, 100 men.

Spencer Miller's battery.

By the 20th about twenty-five thousand citizens of Pennsylvania had taken the field. The imperfection of the militia law of the State was such that no regimental or brigade organizations were in existence. A few days later, as the army of Gen. Lee entered the State, and the serious character of the invasion became apparent, the Governor issued the following address:

Pennsylvanians! In the name and by the authority of the Commonwealth of Pennsylvania, Andrew G. Curtin, Governor of the said Commonwealth:

A PROCLAMATION.

The enemy is advancing in force into Pennsylvania. He has a strong column within twenty-three miles of Harrisburg, and other columns are moving by Fulton and Adams counties, and it can no longer be doubted that a formidable invasion of our State is in actual progress.

The calls already made for volunteer militia in the exigency, have not been met as fully as the crisis requires.

I therefore now issue this my proclamation, calling for sixty thousand men, to come promptly forward to defend the State. They will be mustered into the service of the State for a period of ninety days, but will be required to serve only so much of the period of muster as the safety of our people and the honor of our State may require. They will rendezvous at points to be designated in the general order to be issued this day by the Adjutant-General of Pennsylvania, which order will also set forth the details of the arrangements for organization, clothing, subsistence, equipments, and supplies.

I will not insult you by inflammatory appeals. A people who want the heart to defend their soil, their families, and their firesides, are not worthy to be counted men. Heed not the counsels of evil-disposed persons, if such there be in your midst. Show yourselves what you are—a free, loyal, spirited, brave, vigorous race. Do not undergo the disgrace of leaving your defence mainly to the citizens of other States. In defending the soil of Pennsylvania we are contributing to the support of our National Government and vindicating our fidelity to the national cause. Pennsylvania has always, heretofore, responded promptly to all the calls made by the Federal Government, and I appeal to you, now, not to be unmindful that the foe that strikes at our State, strikes through our desolation at the life of the republic.

Our people are plundered and driven from their homes solely because of their loyalty and fidelity to our free institutions.

People of Pennsylvania, I owe to you all my faculties, my labors, my life. You owe to your country your prompt and zealous services and efforts. The time has now come when we must all stand or fall together in the defence of our State, and in the support of our Gov-

ernment. Let us so discharge our duty that posterity shall not blush for us.

Come heartily and cheerfully to the rescue of our noble commonwealth. Maintain now your honor and freedom.

Given under my hand and the great seal of the State, at Harrisburg, this the 26th day of June, in the year of our Lord one thousand eight hundred and sixty-three, and of the Commonwealth the eighty-seventh.

By the Governor, A. G. CURTIN.

ELI SLIFER, Secretary of the Commonwealth.

In Maryland, on the 16th, various uniformed organizations of Baltimore tendered their services to the Governor for six months. Vigorous efforts were made to enlist recruits under the call of the President, with small success. The troops, however, which could be raised were retained for the defence of Baltimore.

From Delaware, two regiments, the 5th and 6th, numbering 1,919 men, raised for State defence, were sent into Maryland, and placed as guards of the railroads.

From West Virginia no troops came forward at this time.

Offers of troops for the emergency were made by the Governors of several States to the President. But their distance from the scene of operations, or the impression that the force at hand was sufficient, prevented the acceptance of them.

The call of the President for one hundred thousand men served to authorize the reception of troops for the emergency, which could be put into the field at once, but there was not sufficient time to create new organizations, or to fill up regiments partly organized.

Meantime the construction of defensive works was immediately commenced at Harrisburg, which was supposed to be the first point of attack. The records of the State and the specie in the banks were removed to places of security.

The scenes in that capital, on the 16th, were thus described by a spectator :

The morning broke upon a populace all astir, who had been called out of bed by the "beat of the alarming drum," the blast of the bugle, and the clanging of bells. The streets were lively with men, who were either returning from a night's work on the fortifications, or going over to relieve those who were toiling there. As the sun rose higher the excitement gathered head. All along the streets were omnibuses, wagons, and wheelbarrows, taking in trunks and valuables, and rushing them down to the depot, to be shipped out of rebel range. The stores, the female seminaries, and almost every private residence, were busy all of the forenoon in swelling the mountain of freight that lay at the depot. Every horse was impressed into service, and every porter groaned beneath his weight of responsibilities.

The scene at noon at the depots was indescribable, if not disgraceful. A sweltering mass of humanity thronged the platform, all furious to escape from the doomed city.

At the bridge and across the river the scene was equally exciting. All through the day a steady stream of people on foot and in wagons, young and old, black and white, was pouring across it from the Cumberland valley, bearing with them their household gods and all manner of goods and stock. Endless trains, laden with flour, grain, and merchandise, hourly emerged from the valley, and thundered across the bridge and through the city. Miles of retreating baggage wagons, filled with calves and sheep tied together, and great old-fash-

ioned furnace wagons, loaded with tons of trunks and boxes, defiled in continuous procession down the pike and across the river, raising a dust that marked the outline of the road as far as the eye could see.

The proceedings at Pittsburg, for the defence of that city, were thus described on Friday, the 19th :

Work on the city defences is still progressing vigorously, and some of the more important works are now ready to receive the guns. The number of men employed on the fortifications yesterday was four thousand six hundred and five. The works are on Herron's Hill, on Harrison's Hill, on Mount Washington, on Squirrel Hill, and on Negley's Hill. There are upward of five thousand men in the trenches to-day, and with such a large working force it cannot take many days to finish the works now in hand. Gen. Bernard, with a competent staff of engineers, was engaged in laying out new works yesterday on the outer side of the Alleghany, so as to render the city secure against an advance from that direction. Works have also been laid out near Turtle creek and other important points.

The activity in Baltimore to prepare for defence is thus reported :

The work of erecting barricades progressed rapidly on Friday and Saturday, and on Sunday morning the entire circle of the city was completed and ready for military occupation at any moment that the scouts should announce the approach of the enemy. The erection of lines of intrenchments and fortifications on all the approaches to the city have also progressed rapidly. On Saturday about one thousand colored men were gathered by the police from different sections of the city, causing much excitement among that portion of our population as they were marched out to the different locations for the defensive works. At night another force was secured to relieve those who had been at work throughout the day, and another relief gang was provided on Sunday morning and evening, so that rapid progress has been made, and the works are now ready for immediate use.

Meanwhile the movements of Gen. Lee upon the headwaters of the Rappahannock had been made in such force as to lay Gen. Hooker under the necessity of hastily breaking up his camp at Falmouth, and taking new positions to meet this demonstration. On Saturday, the 13th, his army began to move from Falmouth, and during Sunday the stores were removed from Aquia Creek to Alexandria by twenty-six steamers, employed for that purpose. The storehouses and railroad buildings were not destroyed at that time, as the gunboats commanded the place. On the 21st, a small party of the enemy burned the quartermaster's buildings and the wharf. The buildings and wharf known as Urba Switch were not burned.

On Sunday morning the force on the Fredericksburg side recrossed, and on that day the last of Gen. Hooker's army left Falmouth. The corps of Gens. Longstreet and Ewell, of the Confederate army, passed through Culpepper just one week previous, and the latter marched into the Shenandoah valley against Winchester, &c.

The march of Gen. Hooker's army was rapid, and at times disorderly. Bridges broke down beneath the teams; droves of horses became frightened, and rushed through the column like a tornado; and the men, choked with dust, straggled into the fields in search of water and

rest under the inviting shadows of the trees. On Sunday night the troops encamped at Dumfries, which is about midway between Fal-mouth and Fairfax. The design of Gen. Lee in massing his troops at Culpepper, to fall upon the right of Gen. Hooker, and intercept his communications by land with Washington, was thus defeated. A few guns were heard in the direction of Thoroughfare Gap; but with this exception everything seemed quiet along the lines. On Monday the army advanced to the neighborhood of the Bull Run battle field. The third corps reached Manassas Junction in the morning; the first and eleventh arrived at Centreville; and the second, fifth, sixth, and twelfth corps came up at night. Thus the whole country south of the Occoquan was left to the enemy. During the march, the cavalry acted on the flanks, and rendered great service in making reconnoissances. Gen. Gregg and his division operated in the neighborhood of Warrenton and White Sulphur Springs. Gen. Duffie's division, previously Gen. Averill's, moved to the base of the Blue Ridge, near Ashby's Gap. Gen. Buford, with the regulars, occupied Thoroughfare Gap, preventing an approach of the enemy through that passage. Col. Tyler, temporarily in command of Gen. Wyndham's brigade, guarded the Orange and Alexandria railroad. The defence of Washington had been the object of Gen. Hooker's movements thus far, and he occupied the position which he considered to be best to defeat any designs of the enemy upon that city. It remained therefore for Gen. Lee to attack Gen. Hooker in the old intrenchments before Washington or to move into Maryland.

On Wednesday, the 18th, a detachment of cavalry, consisting of the 2d and 4th New York, 6th Ohio, 1st Massachusetts, under command of Col. Kilpatrick, and the 1st Maine of Gen. Gregg's brigade, encountered a body of Confederate cavalry, under Col. Rousseau. Col. Kilpatrick was leading the advance of the Federal cavalry, moving from Fairfax Court House to Aldie. The enemy's force, consisting of cavalry and mounted infantry, coming from the direction of Snicker's Gap, reached Aldie two hours in advance of the Federal force, and, learning of the approach of the latter, posted themselves in commanding positions. Col. Kilpatrick charged upon them and drove them through the town, beyond which a stand was made, at a point where a Confederate battery of four guns was posted in the road to Ashby's Gap. The enemy occupied the wooded hills and stone walls toward Snicker's Gap. Here a desperate contest ensued for three hours, during which repeated charges were made on each side. The arrival of the 1st Maine, Col. C. S. Douty, gave such strength to Col. Kilpatrick as caused the enemy to retire. During the retreat toward Ashby's Gap, they were attacked near Middleburg by the 1st Rhode Island, Col. Duffie, which had come up through Thoroughfare

Gap. The loss was severe on both sides. Several prisoners were taken by Col. Kilpatrick. This force defeated was the advance of a larger force of Gen. Stuart, who was moving to the right and rear of Gen. Hooker.

On Saturday, the 21st, another cavalry contest took place, which was thus reported by Gen. Pleasanton, who commanded the Federal force:

HEADQUARTERS CAVALRY CORPS, }
CAMP NEAR UPPERVILLE, 5.30 P. M., June 21st. }

Brig.-Gen. S. Williams:

GENERAL: I moved with my command this morning to Middleburg, and attacked the cavalry force of the rebels under Stuart, and steadily drove him all day, inflicting a heavy loss at every step.

I drove him through Upperville into Ashby's Gap. We took two pieces of artillery, one being a Blakely gun, and three caissons, besides blowing up one; also, upward of sixty prisoners, and more are coming in; a lieutenant-colonel, major, and five other officers; besides a wounded colonel, and a large number of wounded rebels left in the town of Upperville. They left their dead and wounded upon the field; of the former I saw upward of twenty. We also took a large number of carbines, pistols, and sabres. In fact it was the most disastrous day to the rebel cavalry. Our loss has been very small both in men and horses. I never saw the troops behave better or under more difficult circumstances. Very heavy charges were made, and the sabre used freely, but always with great advantage to us.

A. PLEASANTON, Brig.-Gen.

On Monday, June 15th, the day on which Gen. Hooker's army reached the neighborhood of Bull Run, Gen. Milroy retreated from Winchester and Gen. Tyler from Martinsburg, as above stated. It would have been dangerous for Gen. Lee to have attacked Gen. Hooker in the advantageous position which he now held. Gen. Lee reports as follows:

The whole army of Gen. Hooker withdrew from the line of the Rappahannock, pursuing the roads near the Potomac, and no favorable opportunity was offered for attack. It seemed to be the purpose of Gen. Hooker to take a position which would enable him to cover the approaches to Washington City. With a view to draw him farther from his base, and at the same time to cover the march of A. P. Hill, who, in accordance with instructions, left Fredericksburg for the valley as soon as the enemy withdrew from his front, Longstreet moved from Culpepper Court House on the 15th, and, advancing along the east side of the Blue Ridge, occupied Ashby's and Snicker's Gaps. His force had been augmented while at Culpepper by Gen. Pickett, with three brigades of his division.

The cavalry, under Gen. Stuart, was thrown out in front of Longstreet to watch the enemy, now reported to be moving into Loudon. On the 19th his cavalry encountered two brigades of ours, under Gen. Stuart, near Aldie, and was driven back with loss. The next day the engagement was renewed, the Federal cavalry being strongly supported by infantry, and Gen. Stuart was in turn compelled to retire.

The enemy advanced as far as Upperville, and then fell back.

The attention of Gen. Hooker was so occupied by the attempts to seize Thoroughfare Gap, Aldie, and portions of the Orange and Alexandria railroad, as to make it appear to be the intention of Gen. Lee to move upon the Federal army from these points. So skillfully was this done that the impression prevailed in the North that the blow would be struck at Gen. Hooker's army in its position,

and that the emergency in Pennsylvania had passed away. Thus, on this ground, the Governor of New Jersey considered it safe to recall the troops from Pennsylvania. Meanwhile, Gen. Lee was gathering the fruits of the surrender of Winchester, and preparing to move his army across the Potomac. The demonstrations of Gen. Ewell in Pennsylvania having failed to cause the army of Gen. Hooker to leave Virginia, and as it did not seem disposed to advance on Gen. Longstreet, the latter was withdrawn to the west side of the Shenandoah. At the same time the progress of Gen. Ewell rendered it necessary that Gen. Lee should be within supporting distance. As soon therefore as the fords of the Potomac between Harper's Ferry and Williamsport were well seized by his advance, his main body began to move. This was as early as Sunday, the 21st—the day of Gen. Pleasanton's cavalry skirmish. On that day, Gen. Lee issued the following order to his army:

HEADQUARTERS ARMY NORTHERN VIRGINIA, }
June 21st, 1863. }

While in the enemy's country, the following regulations for procuring supplies will be strictly observed, and any violation of them promptly and rigorously punished:

I. No private property shall be injured or destroyed by any person belonging to or connected with the army, or taken, except by the officers hereinafter designated.

II. The chiefs of the commissary, quartermaster, ordnance, and medical departments of the army will make requisitions upon the local authorities or inhabitants for the necessary supplies for their respective departments, designating the places and times of delivery. All persons complying with such requisitions will be paid the market price for the articles furnished, if they so desire, and the officer making such payment shall take duplicate receipts for the same, specifying the name of the person paid, and the quantity, kind, and price of the property, one of which receipts shall be at once forwarded to the chief of the department to which such officer is attached.

III. Should the authorities or inhabitants neglect or refuse to comply with such requisitions, the supplies required shall be taken from the nearest inhabitants so refusing, by the order and under the direction of the respective chiefs of the departments named.

IV. When any command is detached from the main body, the chiefs of the several departments of such command will procure supplies for the same, and such other stores as they may be ordered to provide, in the manner and subject to the provisions herein prescribed, reporting their action to the heads of their respective departments, to which they will forward duplicates of all vouchers given or received.

V. All persons who shall decline to receive payment for property furnished on requisitions, and all from whom it shall be necessary to take stores or supplies, shall be furnished by the officer receiving or taking the same with a receipt specifying the kind and quantity of the property received or taken, as the case may be, the name of the person from whom it was received or taken, the command for the use of which it was received or taken, and the market price. A duplicate of said receipt shall be at once forwarded to the chief of the department to which the officer by whom it is executed is attached.

VI. If any person shall remove or conceal property necessary for the use of the army, or attempt to do so, the officers hereinbefore mentioned will cause such property, and all other property belonging to such person, that may be required by the army, to be seized,

and the officer seizing the same will forthwith report to the chief of his department the kind, quantity, and market price of the property so seized, and the name of the owner.

By command of Gen. R. E. LEE.
R. H. CHILTON, A. A. and F. G.,
Lieut.-Gen. R. S. EWELL, Com'g 2d Army Corps.

The following correspondence, which was intercepted by Gen. Hooker, shows the general plans of Gen. Lee at this time:

ADJUTANT-GENERAL'S OFFICE, RICHMOND, }
June 28th, 1863. }

Gen. R. E. Lee, commanding Army Northern Virginia,
Winchester, Va.:

GENERAL: While with the President last evening, I received your letter of the 23d instant. After reading it to the President, he was embarrassed to understand that part of it which refers to the plan of assembling an army at Culpepper Court House, under Gen. Beauregard. This is the first intimation that he has had that such a plan was ever in contemplation, and, taking all things into consideration, he cannot see how it can by any possibility be carried into effect.

You will doubtless learn, before this reaches you, that the enemy has again assembled in force on the peninsula, estimated between 20,000 and 30,000 men, from 6,000 to 10,000 of whom are reported to be in the vicinity of White House, and the remainder at Yorktown. It is impossible to say whether the estimated number is correct, as the several accounts vary and are not deemed altogether trustworthy; but the estimate, making due allowance for errors, is quite near enough to satisfy the most incredulous that he is in this vicinity in sufficient force, in cavalry, artillery, and infantry, to do much harm, whether his purpose be to make a demonstration on Richmond, or to confine himself to raids in breaking your communications and devastating the country. His efforts in the last case may prove more successful than in the first, if we may judge by what took place at Hanover only two days ago, when about 1,000 or 1,200 of his cavalry suddenly appeared there, and did some execution in breaking the railroad and burning a bridge, some buildings, public stores, &c. It is important that this raid took place only about two days after Gen. Corse's brigade had left there for Gordonsville. Had it remained at Hanover Junction, it is reasonable to suppose that most of the enemy's cavalry would have been either destroyed or captured, and the property saved from injury. Every effort is being made here to be prepared for the enemy at all points, but we must look chiefly to the protection of the capital. In doing this we may be obliged to hazard some other points. You can easily estimate our strength, and I suggest for your consideration whether, in this state of things, you might not be able to spare a portion of your force to protect your line of communication against attempted raids by the enemy.

Very respectfully, your obedient servant,
S. COOPER, Adjutant-General.

LETTER FROM JEFF. DAVIS.

RICHMOND, June 28th, 1863.

GENERAL: Yours of the 23d I received this evening, I hasten to reply to the point presented in relation to the forces on the coasts of South Carolina and Georgia. The hopes indulged as to our operations at the time which would intervene between the discharge of the enemy's trained troops and the substitution of them by others have been disappointed by the very error against which it was sought by warning to guard. Grant reached the river, got reinforcements, made intrenchments, and Gen. Johnston continues to call for reinforcements, though his first requisition was more than filled by withdrawing troops from Gens. Beauregard and Bragg. Gen. Bragg is threatened with attack, has fallen back to his intrenched position at Tullahoma, and called on Buckner for aid.

Gen. Beauregard says that no troops have been with-

drawn by the enemy from his front since those returned to Newbern, and that his whole force is necessary to cover his line. This being in answer to a proposition to follow a movement of the enemy, said to be to the west, with all his disposable force, pointing him at the same time to the vital importance of holding the Mississippi, and communicating the fear that Vicksburg would fall unless Johnston was strongly and promptly reënforced. D. H. Hill has a small force, part of which has been brought here. Clingman's brigade is near Wilmington, Colquith's at Kingston, Martin's nominal, on the railroad at Weldon, and C. Cook's, Ransom's, and Jenkins's have been brought here; the two last temporarily from the defence of Petersburg and the country thereabout.

Wise's brigade is, as you left it, engaged in the defence of Richmond, and serving in the country to the east of the city. The enemy have been reported in large force at the White House, with indications of an advance on Richmond. We are organizing companies for home duties, and the spirit of resistance is increasing. Corse's brigade, in accordance with your orders, has been left at Hanover Junction. All the artillery, I am informed, was taken away, and the single regiment of infantry, which constituted the guard for the bridges, proved unequal to the duty, as you have no doubt learned. Reënforcements were ordered to go up, but some delay occurred, and they arrived too late to save the bridge or the brave guard which had unsuccessfully defended it. The Yankees, reported to be three regiments of cavalry, returned from the Central road in the direction of Hanover (old town), and nothing has been heard of them since.

It was stated that Gen. H. F. Lee was captured at the house of Mr. Wickham, but I trust it will prove to be one of the many startling rumors which the news-mongers invent. The advance of your army increases our want of cavalry on the north and east of the city, but except one regiment from North Carolina, I do not know of any which we can expect soon to be available to us. In yours of the 20th you say: "If any of the brigades I have left behind for the protection of Richmond can, in your opinion, be spared, I should like them to be sent to me." It has been an effort with me to answer the clamor to have troops stopped or recalled to protect the city and the railroad communications with your army. Corse's brigade has gone, and Wise's is the only other left by you. Cook's was in North Carolina, and Davis's brigade was sent to complete Heth's division in the place of Cook's; and Ransom's and Jenkins's constitute the defences of the south side as far as Weldon, and are relied on for service elsewhere from Wilmington to Richmond.

Gen. Ely is positive that the enemy intend to attack here, and his scouts bring intelligence, which, if I believed it, would render me more anxious for the city than at any former time. I do not believe that the Yankees have such force as is stated, but they have enough to render it necessary to keep some troops within reach, and some at Petersburg, at least until Suffolk is truly evacuated. Do not understand me as balancing accounts in the matter of brigades. I only repeat that I have not any to send you, and enough to form an army to threaten, if not capture Washington, as soon as it is uncovered by Hooker's army. My purpose was to show you that the force here and in North Carolina is very small, and I may add that the brigades are claimed as properly of their command. Our information as to the enemy's intentions may be more full and trustworthy hereafter. It is now materially greater than when you were here.

Very respectfully and truly yours,

JEFF. DAVIS.

The advance of the Confederate army, which crossed the Potomac, was the corps of Gen. Ewell. It passed from Williamsport to Hagerstown, which was still held by Col. Jenkins, and at noon, on the 22d, entered Greencastle, Penn., which is on the railroad from Hagerstown

to Chambersburg. The distances on this line are as follows: from Hagerstown to Morgantown, 4 miles; to the State line, 5 miles; to Greencastle, 11 miles; to Marion, 16 miles; to Chambersburg, 22 miles. On the 23d, Chambersburg was reoccupied by the Confederate force under Gen. Ewell. Gen. Knipe, who was in command there, as the outpost of the Federal forces under Gen. Couch collected in the valley, fell back in the direction of Carlisle to the main body. On the 24th, Gen. Ewell issued the following order:

General Order.

HEADQUARTERS SECOND CORPS, ARMY OF NORTHERN VIRGINIA, CHAMBERSBURG, June 24th, 1863. }

First. The sale of intoxicating liquors to this command, without written permission from a major-general, is strictly prohibited.

Second. Persons having liquor in their possession, are required to report the fact to the provost-marshal, or the nearest general officer, stating the amount and kind, that a guard may be placed over it, and the men prevented from getting it.

Third. Any violation of part one of these orders, or failure to comply with part second, will be punished by the immediate confiscation of all liquors in the possession of the offending parties, besides rendering their other property liable to seizure.

Fourth. Citizens of the country through which the army may pass, who are not in the military service, are admonished to abstain from all acts of hostility, upon the penalty of being dealt with in a summary manner. A ready acquiescence to the demands of the military authorities will serve to lessen the rigors of war. By command of Lieut.-Gen. R. J. EWELL.

A. S. PENDLETON, Assistant Adjutant-General.

In order to retain the Federal army on the east side of the mountains after it should enter Maryland, and thus leave open the Confederate communications with the Potomac through Hagerstown and Williamsport, Gen. Lee ordered Gen. Ewell to send a division eastward from Chambersburg to cross the South mountains.

On the 24th, a detachment from Gen. Ewell's force advanced within twelve miles of Carlisle, on the railroad from Chambersburg to Harrisburg. The distances on that line were as follows: from Chambersburg to Scotland, 5 miles; to Shippensburg, 11 miles; to Oakville, 18 miles; to Carlisle, 34 miles; to Mechanicsburg, 44 miles; to Harrisburg, 52 miles. On the 24th, Gen. Lee crossed the Potomac into Maryland, in the vicinity of Shepherdstown. At the same time, the main body of his army crossed at the fords at Shepherdstown and Williamsport. The movement continued up the Cumberland valley, on the west side of the Catoclin mountains. The advance was made in two divisions, one by way of the Harrisburg and Chambersburg railroad toward Harrisburg, and the other from Gettysburg eastward to the Northern Central railroad from Baltimore to Harrisburg, and thence to York and Lancaster, in Pennsylvania.

On Saturday, the 27th, Carlisle, on one line of advance, was occupied at noon, and the advance continued to Kingston, 13 miles from Harrisburg. On the other line of advance,

Gettysburg was occupied by a force from Hagerstown on the 26th; and at noon on the 27th, the same force had reached the Northern Central railroad, at a point between York and Hanover Junction. This was about fifty miles north of Baltimore, and thirty miles south of Harrisburg. The same evening, York was occupied without resistance, and several bridges on the Northern Central railroad were destroyed. On the 28th, this advance continued to the Susquehanna, opposite Columbia. The bridge across the river here consisted of twenty-eight spans, and was a mile and a quarter in length. It was burned by the order of the officer in command of the Federal force at Columbia—Col. Frick. The Confederate cavalry and artillery were close upon the structure when it was fired. On the same day, the advance from Carlisle approached within four miles of Harrisburg, where some skirmishing took place.

On the previous day, Gen. Lee, at Chambersburg, issued the following order to his army:

General Order No. 27.

HEADQUARTERS ARMY OF NORTHERN VIRGINIA, }
CHAMBERSBURG, PA., June 27th, 1863. }

The Commanding General has observed, with marked satisfaction, the conduct of the troops on the march, and confidently anticipates results commensurate with the high spirit they have manifested. No troops could have displayed greater fortitude, or better performed the arduous marches of the past ten days. Their conduct in other respects has, with few exceptions, been in keeping with their character as soldiers, and entitles them to approbation and praise.

There have, however, been instances of forgetfulness, on the part of some, that they have in keeping the yet unsullied reputation of the army, and that the duties exacted of us by civilization and Christianity are not less obligatory in the country of the enemy than in our own.

The Commanding General considers that no greater disgrace could befall the army, and through it our whole people, than the perpetration of the barbarous outrages upon the innocent and defenceless, and the wanton destruction of private property, that have marked the course of the enemy in our own country. Such proceedings not only disgrace the perpetrators and all connected with them, but are subversive of the discipline and efficiency of the army, and destructive of the ends of our present movement. It must be remembered that we make war only upon armed men, and that we cannot take vengeance for the wrongs our people have suffered, without lowering ourselves in the eyes of all whose abhorrence has been excited by the atrocities of our enemy, and offending against Him to whom vengeance belongeth, without whose favor and support our efforts must all prove in vain.

The Commanding General therefore earnestly exhorts the troops to abstain with most scrupulous care from unnecessary or wanton injury to private property; and he enjoins upon all officers to arrest and bring to summary punishment all who shall in any way offend against the orders on this subject.

R. E. LEE, General.

On the 28th, the Confederate force at York made a demand on the authorities for \$100,000 in United States Treasury notes, 200 barrels of flour, 40,000 pounds of fresh beef, 30,000 bushels of corn, 1,000 pairs of shoes, socks, &c. On that day also, the enemy captured a train of one hundred and seventy-eight wagons and

one thousand mules, between Rockville and Tenallytown, a few miles from Georgetown, D. C. Also a number of Federal officers, on the way to join their commands, were captured near Rockville, by a body of Confederate cavalry which had crossed the Potomac near Seneca, in the rear of Gen. Hooker's army; and at Edwards's Ferry, fifteen barges loaded with government stores were captured and burned by a body of Confederate cavalry. On the same day, this force of cavalry appeared at numerous points in Montgomery county, and seized horses. Some came as near to Washington as Silver Spring, on the Seventh-street road. No individuals were seized, but passes were given to them to go through their lines. These were portions of cavalry under Gen. Stuart. On the advance of Gen. Lee, Gen. Stuart was left to guard the passes of the mountains, and to observe the movements of the Federal army, with instructions to harass and impede as much as possible any attempt by it to cross the Potomac. With this view he followed its movements, and advanced as far east as Fairfax Court House. He then crossed the river at Seneca, and marched through Westminster to Carlisle. At this time the army of Gen. Lee was situated as follows: the main body, embracing the corps of Gens. Longstreet and Hill, were at and near Chambersburg, where Gen. Lee also was. The divisions of Gens. Rhodes and Johnson, of Gen. Ewell's corps, were in the vicinity of Carlisle and Harrisburg. The division of Gen. Early, of the same corps, was at York, where it was joined on the 27th by the brigade of Gen. Gordon. The cavalry under Col. White, had advanced to the Susquehanna.

But the extreme point of the Confederate advance had been reached. On the 28th, orders were issued for both lines of advance of Gen. Ewell's corps to fall back on Gettysburg, to which point Gens. Longstreet and Hill were moving by the Chambersburg turnpike. The reason of this was the approach of the Army of the Potomac. Gen. Lee had made preparations to march upon Harrisburg, but on the night of the 27th information was received by him that the Federal army had crossed the Potomac, and was advancing northward, and that the head of the column had reached South mountain. As his communications with the Potomac were thus menaced, he resolved to prevent the further progress of the Federal army in that direction by concentrating his forces on the east side of the mountain.

On the 22d, the army of Gen. Hooker occupied the line of the Potomac on the Virginia side of the river, up to and beyond Leesburg. At the same time it held all the gaps of the Bull Run range. By Saturday, the 27th, they had advanced, and lay at and in the vicinity of Frederick, Maryland. On that day, an order was issued by the War Department to Gen. Hooker, to transfer the command of the army to Maj.-Gen. Meade, who commanded the fifth

corps, and to report himself at Baltimore. On the next day, Gen. Hooker issued the following order:

HEADQUARTERS ARMY OF THE POTOMAC, }
FREDERICK, MD., *June 28th, 1863.* }

In conformity with the orders of the War Department, dated June 27th, 1863, I relinquish the command of the Army of the Potomac. It is transferred to Maj.-Gen. George G. Meade, a brave and accomplished officer, who has nobly earned the confidence and esteem of the army on many a well-fought field. Impressed with the belief that my usefulness as the commander of the Army of the Potomac is impaired, I part from it, yet not without the deepest emotion. The sorrow of parting with the comrades of so many battles is relieved by the conviction that the courage and devotion of this army will never cease nor fail; that it will yield to my successor, as it has to me, a willing and hearty support. With the earnest prayer that the triumph of its arms may bring successes worthy of it and the nation, I bid it farewell.

JOSEPH HOOKER, Maj.-Gen.

This order was followed by the subjoined address from Gen. Meade:

HEADQUARTERS ARMY OF THE POTOMAC, }
June 28th, 1863. }

By direction of the President of the United States I hereby assume command of the Army of the Potomac. As a soldier, in obeying this order, an order totally unexpected and unsolicited, I have no promises or pledges to make. The country looks to this army to relieve it from the devastation and disgrace of a hostile invasion. Whatever fatigues and sacrifices we may be called upon to undergo, let us have in view constantly the magnitude of the interests involved, and let each man determine to do his duty, leaving to an all-controlling Providence the decision of the contest. It is with just diffidence that I relieve, in the command of this army, an eminent and accomplished soldier, whose name must ever appear conspicuous in the history of its achievements; but I rely upon the hearty support of my companions in arms to assist me in the discharge of the duties of the important trust which has been confided to me.

GEORGE G. MEADE, Maj.-Gen. Commanding.

This change was so entirely unexpected, both by the public generally and the army, that nothing could exceed the surprise which it occasioned. The reasons for the change have not yet been made known, except that Gen. Hooker was relieved at his own request. The impression upon the army was thus described:

The report of the change soon extended to the several corps, and their commanders hastened to bid farewell to the General. By three o'clock a large number of officers had assembled, and soon after Gen. Hooker appeared in the avenue before his tent. Some time was spent in social intercourse, and to the last all formalities were dispensed with. The parting was painful to every one, particularly to those who had become endeared to the General by old associations. Gen. Hooker was deeply grieved. He had been identified with the Army of the Potomac, he said, since its organization, and had hoped to continue with it to the end. It was the best army of the country, worthy of the confidence of the nation, and could not fail of success in the approaching struggle. He spoke of his successor as a glorious soldier, and urged all to give him their earnest support.

Gen. Meade was totally surprised by the order appointing him commander of the Army of the Potomac, and deeply felt the weight of responsibility resting upon him. His appointment gives universal satisfaction, and all express a determination to extend their heartiest coöperation.

An order for the movement of the army was

issued on the same day by Gen. Meade. The sixth and eleventh corps, which were at Middletown, in the valley between the Catoctin and the Blue Ridge, were moved east to Frederick, and then directly up the Monocacy valley, on the west side of the stream, through Mechanicsburg and Emmitsburg, toward Gettysburg. The second and fifth corps crossed the Monocacy to the east, three miles above Frederick, and moved northeast through Union to Frizelburg, which is near the State line. The third and twelfth corps took the Middleburg road. The sixth corps crossed the Monocacy, east of Frederick, and moved to Westminster. These routes took the army into such a position that it could cover Baltimore, or cross the Susquehanna below Harrisburg, or prevent any movement of the Confederates toward Washington. On Tuesday forenoon, the first and eleventh corps were at Emmitsburg; the second and fifth at Frizelburg; the third and twelfth at Taneytown, and the sixth at Westminster. The Federal force at Harper's Ferry at this time was supposed to be about eleven thousand. It was incorrectly represented to Gen. Meade to be destitute of provisions, and that he must immediately supply it, or order the abandonment of the place. Accordingly, a few hours after he assumed the command, he assented to an order drawn up by an officer of Gen. Hooker's staff, directing Gen. French to send seven thousand men of the garrison to Frederick, and with the remainder, estimated at four thousand, to remove and escort the public property to Washington. This order was unknown in Washington till too late to be countermanded. It was not entirely executed when Gen. Meade ordered the reoccupation of that point.

At this time, Gen. Lee's forces had withdrawn from York and Carlisle, and from Chambersburg, and were concentrating on Gettysburg. The corps of Gens. Longstreet and Hill, forming the main army, were moving eastward, while Gen. Meade was moving northward. This movement would bring Gen. Lee on the flank of Gen. Meade's army. On Tuesday morning, Gen. Meade changed the line of march of all his corps, except the first and eleventh, toward Gettysburg. The first and eleventh were then moving in that direction. At the same time, Gen. Meade issued the following address to his army:

HEADQUARTERS ARMY OF THE POTOMAC, }
June 30th, 1863. }

The Commanding General requests that previous to the engagement soon expected with the enemy, corps and all other commanding officers address their troops, explaining to them the immense issues involved in the struggle. The enemy is now on our soil. The whole country looks anxiously to this army to deliver it from the presence of the foe. Our failure to do so will leave us no such welcome as the swelling of millions of hearts with pride and joy at our success would give to every soldier of the army. Homes, firesides, and domestic altars are involved. The army has fought well heretofore. It is believed that it will fight more desperately and bravely than ever, if it is addressed in fitting terms.

Corps and other commanders are authorized to order the instant death of any soldier who fails to do his duty at this hour.

By command of Major-Gen. MEADE.
S. WILLIAMS, Assistant Adjutant-Gen.

Gettysburg, whither both armies were moving, was not only the capital of the county in which it is located, but a central point to which many roads converged. The road from Westminster, by which the sixth corps was advancing, comes in on the southeast; that from Taneytown, by which the third and twelfth were advancing, comes in on the south, which was the route also of the second and fifth; that from Emmitsburg, by which the first and eleventh corps were advancing, comes in on the southwest; that from Chambersburg, by which the Confederate corps of Gens. Longstreet and Hill were advancing, comes in on the northwest; and those from Harrisburg and York, by which the corps of Gen. Ewell was advancing, come in on the northeast.

On Wednesday morning, Maj.-Gen. Reynolds, in command of the first corps, advanced on the Emmitsburg road from Marsh creek to Gettysburg, where he arrived about ten o'clock, and marched directly through the town. A body of the enemy, being the advance of Gen. Heth's division of Gen. Hill's corps, was discovered to be posted on the road that came in from Chambersburg on the northwest. They were driven back by Gen. Buford's cavalry. The division, coming up, drove back the caval-

ry. At this time the first corps appeared. The first division, under Gen. Wadsworth, was in the advance. The division of Gen. Doubleday followed and formed on the left, and that of Gen. Robinson on the right. The position occupied was a ridge northwest of the town, which sloped to the west, into a little open valley of ploughed fields and meadows. Beyond the valley is a ridge of higher land thickly wooded. The valley runs in a southwesterly direction. Across this valley the line of Gen. Reynolds advanced somewhat hastily, almost before it was well formed, and soon encountered a heavy force of the enemy's infantry, by which it was driven, but fell back in good order. The impetuosity of the enemy caused them to press the right centre too rashly, and, by a movement of the left centre upon the flank of the foe, a large number were taken prisoners. The advance of the enemy was broken soon after, and Gen. Reynolds prepared to go forward. His line advanced as before, and drove the enemy from the valley and over the ridge at the farther side, with a heavy loss by the severe fire of the foe. His line of skirmishers was now thrown out some distance from the hill, and Gen. Reynolds, upon going out to it to reconnoitre, was killed by a shot from the enemy.

The eleventh corps now arrived, and Gen. Howard assumed the command of the whole field, while Gen. Schurz took command of the eleventh corps. Gen. Doubleday now commanded the first corps.

It being reported that the enemy were now massing a force north of the town to attack the rear of the first corps, the first and third divisions of the eleventh corps were ordered across the rear of the first corps to take up a position on the right, and Gen. Steinwehr was stationed as a reserve on Cemetery Hill, immediately south of the town. This force of the enemy was the advance of Gens. Rhodes and Early's divisions falling back from the Susquehanna. At this time, about half past two p. m., the enemy advanced in force against the first corps, which slowly fell back to its original position, northwest of the town. Here it was somewhat reinforced and prepared to make a stand. The force of the enemy advanced across the open space in line of battle, while their batteries shelled the position of the first corps to cover the advance. At short range it met a fire so sharp and well served as to cause it to reel and fall back. The line was again formed and reinforced, and once more advanced, but with no better success. By this time the divisions of Rhodes and Early had come up from the east, and Pender's division of Gen. Hill's moved up on the right to the support of Gen. Heth. Another charge was now made by the whole force of the enemy. Their superior numbers enabled them to threaten both flanks of the Union force. The main effort was directed against the left, and, notwithstanding a brave resistance, such advantages were gained that the first corps was ordered back to the town. By this movement the left of the eleventh was uncovered, and a heavy advance completely on its right flank compelled it to retire. The enemy advanced and took possession of the town, while the two corps fell back and occupied the western slope of the hill south of the town, held by Gen. Steinwehr.

Gen. Lee says: "The attack was not pressed that afternoon, the enemy's force being unknown, and it being considered advisable to await the arrival of the rest of our troops. It had not been intended to fight a general battle at such a distance from our base, unless attacked by the enemy; but finding ourselves unexpectedly confronted by the Federal army, it became a matter of difficulty to withdraw through the mountains with our large trains. At the same time the country was unfavorable for collecting supplies while in the presence of the enemy's main body, as he was enabled to restrain our foraging parties by occupying the passes of the mountains with regular and local troops. A battle thus became, in a measure, unavoidable. Encouraged by the successful issue of the engagement of the first day, and in view of the valuable results that would ensue from the defeat of the army of Gen. Meade, it was thought advisable to renew the attack."

At dusk the third and twelfth corps arrived and took positions, the former on the ridge extending south and to the left of Cemetery Hill, and the latter on the same ridge as it curved to the right of the hill. At 11 p. m., Gen. Meade

arrived and examined the position. He then posted the several corps in the following order: the twelfth, under Gen. Slocum, on the right; the eleventh, Gen. Howard, next; the first, Gen. Doubleday, the second, Gen. Hancock, the third, Gen. Sickles, in the centre; the fifth, Gen. Sykes, arrived the next morning, and was placed on the extreme left. The line stretched in a semicircle, having its convex centre toward Gettysburg, with the extreme toward the southwest and south. The heights on which the troops were posted sloped gently down from their front.

On the part of the enemy, Gen. Anderson's division of Gen. Hill's corps, and Gen. McLaws's division of Gen. Longstreet's corps arrived late in the evening within a mile or two of the town, and bivouacked for the night. Early on the next morning, Gen. Hood's division of Longstreet's corps arrived, and their line of battle was soon after formed.

The key of Gen. Meade's position was Cemetery Hill, a little distance south of the town, and on the northern slope of which the town itself is situated. It was so called because the burial place of the town was there. Its summit was east of the road which runs south to Taneytown. The ridge passed to the west of this road and ran south along its west side, and was occupied by the second, third, fifth, and sixth corps respectively, in line of battle. On the continuation of the ridge to the east and southeast was a part of the eleventh and the twelfth corps. On this part of the line the ridge was rocky and thickly wooded, and some defenses were thrown up on Thursday morning by Gens. Geary and Williams. The ridge from Cemetery Hill directly south was open and clear, and the troops there faced to the west. The left flank of Gen. Meade rested upon a sharp, rugged, and almost perpendicular peak, covered with original forest growth. At the foot of the ridge on the west was a narrow valley between one and two miles in width, on the western side of which is another ridge, somewhat lower and running nearly parallel, and mostly covered with heavy timber. The line of battle of the enemy was formed on the slope of this ridge, with Gen. Ewell's corps on the left. Beginning at the town, Gen. Early's division was at the extreme right, then Gen. Rhodes's; on the right of his division was the left of Gen. Hill's corps, commencing with Gen. Heth's division, then Gens. Pender and Anderson's divisions. On the right of Gen. Anderson's division was the left of Gen. Longstreet's corps, Gen. McLaws's division being next to Gen. Anderson's, and Gen. Hood's on the extreme right of their line and opposite the extreme left of Gen. Meade. Neither the division of Gen. Ewell's corps nor that of Gen. Pickett of Longstreet's corps had at this time arrived. Gen. Pickett had been left at Chambersburg to protect the Confederate rear and escort their reserve train. Gen. Johnson had been operating near Harrisburg.

On the ridge occupied by Gen. Meade, a hundred guns were in position facing the enemy. The reserve artillery was in the rear, about equidistant from the extreme points of the line. The Union cavalry was east of the creek on the road to Baltimore. The artillery of the enemy in position was nearly one hundred and fifty guns.

During Thursday forenoon some skirmishing took place, but no movement of importance was made. On the Confederate side, about the middle of the afternoon, Gen. Lee issued orders for the commanders to prepare for a general attack upon the Federal centre and left. The movement was to be commenced by Gen. Longstreet and followed up on his left in quick succession by the respective divisions of Gen. Hill's corps. The movements in consequence of these orders were in progress when sharpshooters were sent out by Gen. Sickles, being one regiment, under command of Col. Berdan. They advanced in the woods about a mile beyond the Emmitsburg turnpike, reconnoitering, and reported that the enemy were moving large masses to turn the Union left. On this report Gen. Sickles moved up to a ridge in front, which he deemed a more commanding position to repel the attack. On this ridge, which he considered as commanding to a great extent the position he previously occupied, he formed his line. His right rested in the peach orchard, which is in the angle formed by the Emmitsburg road and a cross road running about southeast and connecting the

Emmitsburg road with the road to Taneytown. The rest of the line extended in a southerly direction, with the left resting on the Round Top Hill. He had hardly got into position when the enemy made their anticipated attack. After resisting it about two hours, and the fifth corps failing to come to his support as promptly as was expected, he fell back to his original position upon the crest of the hill, where a most desperate assault was made by the troops of Gen. Longstreet. The line was strengthened by Gen. Meade, by ordering up the fifth corps to the position it afterward occupied on the left of the third. Two divisions were also sent from the twelfth corps, as no attack was threatened on the right. This formidable opposition and the precipitate and rugged character of the slope effectually repulsed all the efforts of Gen. Longstreet, with great loss, however, on both sides. According to the order of Gen. Lee, the advance was to commence from the right and be taken up along the whole line. With the advance of Gen. Longstreet a part of the division of Gen. Anderson moved upon the centre of Gen. Meade. As Gen. Sickles fell back, the second corps, under Gen. Hancock, came to his aid on his right, assisted by a portion of the first corps. These troops encountered a part of McLaws's and Anderson's divisions. The battle grew fearful. The enemy pressed forward unrestrained. Gen. Sickles was wounded in the

leg, and the command of his corps devolved on Maj.-Gen. Birney. Gen. Hancock was wounded in the thigh, and Gen. Gibbons in the shoulder. The first and second wavered. The enemy pressed up to the very guns of the batteries, which were exposed to capture. The sixth corps, under Gen. Sedgwick, although weary with a march that day, hurried with shouts to the support, and the enemy staggered and drifted slowly back. A strong force was now pushed on their left flank, which pressed well to their rear along the Emmitsburg road, and the Confederates retired. At this time Gen. Ewell got his forces forward and made a desperate dash on the twelfth corps, under Gen. Slocum, on the extreme right, which had been weakened to support the centre and left. For fifteen minutes the attack was furious, but the sixth corps came to its support followed by the first corps, and the struggle continued with some advantages to the enemy until 9 o'clock, when he retired, having lost the day in every quarter. It was stated that the divisions of Gens. Pender and Heth, of Gen. Hill's corps, remained inactive.

Gen. Lee thus reports the operations of the day:

In front of Gen. Longstreet, the enemy held a position from which, if he could be driven, it was thought that our army could be used to advantage in assailing the more elevated ground beyond, and thus enable us to reach the crest of the ridge. That officer was directed to endeavor to carry this position, while Gen. Ewell attacked directly the high ground on the enemy's right, which had already been partially fortified. Gen. Hill was instructed to threaten the centre of the Federal line, in order to prevent reinforcements being sent to either wing, and to avail himself of any opportunity that might present itself to attack.

After a severe struggle, Longstreet succeeded in getting possession of and holding the desired ground. Ewell also carried some of the strong positions which he assailed, and the result was such as to lead to the belief that he would ultimately be able to dislodge the enemy. The battle ceased at dark.

During the night, Gen. Meade sent the following despatch to Washington:

The enemy attacked me about four p. m. this day, and, after one of the severest contests of the war, he was repulsed at all points. We have suffered considerably in killed and wounded. Among the former are Brig.-Gens. Paul and Zook, and among the wounded, Gens. Sickles, Barlow, Graham, and Warren slightly. We have taken a large number of prisoners.

On the next morning, the following further despatch was sent:

The action commenced again at early daylight upon various parts of the line. The enemy thus far have made no impression upon my position. All accounts agree in placing the whole (rebel) army here. Prisoners report Longstreet's and A. P. Hill's forces much injured yesterday, and many general officers killed. Gen. Barksdale's (of Mississippi) dead body is within our lines. We have thus far about sixteen hundred prisoners.

The action thus commenced was chiefly an artillery fire directed upon the line of Gen. Meade, which slackened after a few hours. On the right of Gen. Meade, the contest was close and more severe. It commenced at daylight, by an attempt on the part of the twelfth corps,

under Gen. Slocum, to drive Gen. Ewell farther back. This attack met with a prompt response from Gen. Ewell. The fiercest assaults were made upon the positions of Gens. Geary and Berry, which fell back a short distance until supported by Gen. Sykes's division of the fifth corps and Gen. Humphrey's of the third. The struggle was now evenly contested for some time, when a further reënforcement arrived and took such a position as to enfilade the enemy, causing his force to retire, and at 11 o'clock A. M. a general quiet prevailed.

The movements of the enemy thus far had been made rather to cover up his designs than as serious efforts against Gen. Meade. The battle of the previous day had demonstrated that the issue of the struggle turned on the occupation of Cemetery Hill. To get possession of this spot was therefore the object of the enemy. Early in the morning, preparations had been made by Gen. Lee for a general attack upon Gen. Meade's whole line, while a large force was concentrated against his centre for the purpose of taking the ground it occupied. Gen. Longstreet massed fifty-five guns of long range upon the crest of a slight eminence, just in front of the extreme right of Gen. Hill's corps, and a little to the left of the heights upon which they were to open fire. At the same time, Gen. Hill massed some sixty guns along the hill, still farther to his left and in front of the same heights. The position of these guns was near the Bonaughton road, near the York road, near the Harrisburg road, and along the Seminary ridge to a point beyond Round Top. The artillery on Cemetery Hill was thus subject to more than a half circle of cross fires. At 1 o'clock the signal gun was fired, and the cannonading commenced. The fire of the enemy was thus concentrated on the position held by the eleventh and second corps. It drew a most terrific response from the Federal batteries. It is thus described by a spectator in the Union army:

"The storm broke upon us so suddenly that soldiers and officers—who leaped, as it began, from their tents, or from lazy siestas on the grass—were stricken in their rising with mortal wounds, and died, some with cigars between their teeth, some with pieces of food in their fingers, and one at least—a pale young German, from Pennsylvania—with a miniature of his sister in his hands. Horses fell, shrieking such awful cries as Cooper told of, and writhing themselves about in hopeless agony. The boards of fences, scattered by explosion, flew in splinters through the air. The earth, torn up in clouds, blinded the eyes of hurrying men; and through the branches of the trees and among the gravestones of the cemetery a shower of destruction crashed ceaselessly. As, with hundreds of others, I groped through this tempest of death for the shelter of the bluff, an old man, a private in a company belonging to the 24th Michigan, was struck, scarcely ten feet away, by a cannon ball, which tore through

him, extorting such a low, intense cry of mortal pain as I pray God I may never again hear. The hill, which seemed alone devoted to this rain of death, was clear in nearly all its unsheltered places within five minutes after the fire began."

A spectator in the Confederate army has thus described this artillery contest: "I have never yet heard such tremendous artillery firing. The enemy must have had over one hundred guns, which, in addition to our one hundred and fifteen, made the air hideous with most discordant noise. The very earth shook beneath our feet, and the hills and rocks seemed to reel like a drunken man. For one hour and a half this most terrific fire was continued, during which time the shrieking of shell, the crash of fallen timbers, the fragments of rocks flying through the air, shattered from the cliffs by solid shot, the heavy mutterings from the valley between the opposing armies, the splash of bursting shrapnel, and the fierce neighing of wounded artillery horses, made a picture terribly grand and sublime, but which my pen utterly fails to describe. After the firing had continued for little more than an hour, the enemy's guns began to slacken, and finally all were silenced save some six or eight, which were in a clump of woods a little to the left of the stone fence." After the firing had continued about three hours, Gen. Howard, of the second corps, slackened his fire to allow his guns to cool: it was supposed by the enemy that they were silenced, and that the time had now come to make an irresistible attack. Their storming party was now moved up. The division of Gen. Pickett, which had arrived since the previous day, led the advance, supported on the right by Gen. Wilcox's brigade of Gen. Anderson's division, and on the left by Gen. Heth's division, commanded by Gen. Pettigrew. The troops of Gen. Pickett's division advanced in splendid order. On his left, the command of Gen. Pettigrew emerged from the woods, and swept down the slope of the hill to the valley beneath, and some two or three hundred yards in the rear of Gen. Pickett. As it entered the conflict, the line wavered, being raw soldiers, and wanting the firmness of nerve and steadiness of tread of the advance. As the advance came under the fire of the first and second corps, the enemy ceased firing from their batteries. Their ammunition was exhausted. The advance of Gen. Pickett, composed chiefly of Virginians, pressed forward. A terrible fire of grape, shell, and canister from forty guns is opened upon them. They waver not, but cross the Emmitsburg road, and approach the masses of infantry. Gen. Gibbon, in command now of the second corps, walks composedly along the ranks, saying: "Hold your fire, boys—they are not near enough yet." They come still nearer—then, with bayonets at the charge, sweep up to the rifle pits. A line of fire flashes from the second corps, and hundreds go down, but they do

not falter. They charge over the pits. Gen. Gibbon orders his men to fall back to the rear of the batteries. It is done without confusion, to allow the artillery to use grape. Still on they press, up to the muzzles of the guns. Meanwhile, the hot fire has thrown the division of Gen. Pettigrew into the utmost confusion. Their line is broken; they are scattered over the plain, and flying panic stricken to the rear. Gen. Pettigrew was wounded, but still retained command, and vainly strove to rally his men. The moving mass rushes to the rear, and Gen. Pickett was left to contend alone. Strong flanking bodies were moved round to gain his rear. His officers were falling on every side, and he gave the order to fall back. In doing this they were pressed with great vigor, and a large number were made prisoners. Their retreat was finally covered by a brigade under Gen. Wright, which was moved forward by Gen. Lee for that purpose. While this assault was made, the extreme right and left were threatened by Gens. Ewell and Longstreet. Nothing further transpired during the evening and night.

The following despatch was, soon after the conflict, sent by Gen. Meade to Gen. Halleck:

HEADQUARTERS ARMY OF THE POTOMAC, }
NEAR GETTYSBURG, July 3d—8.30 P. M. }

To Major-General Halleck, General-in-Chief:

The enemy opened at one o'clock p. m., from about one hundred and fifty guns. They concentrated upon my left centre, continuing without intermission for about three hours, at the expiration of which time he assaulted my left centre twice, being, upon both occasions, handsomely repulsed with severe loss to them, leaving in our hands nearly three thousand prisoners. Among the prisoners are Maj.-Gen. Armistead, and many colonels and officers of lesser note. The enemy left many dead upon the field, and a large number of wounded in our hands. The loss upon our side has been considerable. Maj.-Gen. Hancock and Brig.-Gen. Gibbon were wounded.

After the repelling of the assault, indications leading to the belief that the enemy might be withdrawing, an armed reconnoissance was pushed forward from the left, and the enemy found to be in force. At the present hour all is quiet.

The New York cavalry have been engaged all day on both flanks of the enemy, harassing and vigorously attacking him with great success, notwithstanding they encountered superior numbers, both of cavalry and artillery. The army is in fine spirits.

(Signed)

GEORGE G. MEADE,
Major-General Commanding.

On the next day, Gen. Meade issued the following address to his army:

General Order No. 68.

HEADQUARTERS ARMY OF THE POTOMAC, }
NEAR GETTYSBURG, July 4th. }

The Commanding General, in behalf of the country, thanks the Army of the Potomac for the glorious result of the recent operations. Our enemy, superior in numbers and flushed with the pride of a successful invasion, attempted to overcome or destroy this army. Utterly baffled and defeated, he has now withdrawn from the contest.

The privations and fatigues the army has endured, and the heroic courage and gallantry it has displayed, will be matters of history to be ever remembered.

Our task is not yet accomplished, and the Commanding General looks to the army for greater efforts, to

drive from our soil every vestige of the presence of the invader.

It is right and proper that we should, on suitable occasions, return our grateful thanks to the Almighty Disposer of events that, in the goodness of His providence, He has thought fit to give victory to the cause of the just.

By command of Major-General MEADE.
S. WILLIAMS, A. A. General.

On the same day, President Lincoln issued the following announcement:

WASHINGTON, D. C., *July 4th*, 1863—10 A. M.

The President of the United States announces to the country, that the news from the Army of the Potomac, up to 10 o'clock P. M., of the 3d, is such as to cover the army with the highest honor—to promise great success to the cause of the Union—and to claim the condolence of all for the many gallant fallen; and that for this he especially desires that on this day, "He whose will, not ours, should ever be done," be everywhere remembered and revered with the profoundest gratitude.

(Signed)

ABRAHAM LINCOLN.

On Saturday, the 4th, Gen. Ewell's division was withdrawn from its position in the town and the hills southeast of it, and placed behind the defences on the Seminary ridge, and both armies were engaged, with strong working parties, in burying their dead and taking care of the wounded. The morning was hazy, and from noon until night the rain fell in torrents. During the whole day the enemy sent forward such of their wounded as could bear removal, toward Hagerstown. Late in the afternoon their artillery and wagon trains also commenced moving in the same direction. At dark their whole army was put in motion, taking the road to Fairfield, and crossing South Mountain at Waterloo Gap. The position of Gen. Meade's army was now looked upon by the enemy as almost impregnable. The fighting for three days had nearly exhausted the ammunition of the Confederate army.

On Monday, the 6th, Gen. Lee reached Hagerstown, and took position with his army. On Tuesday the advance of Gen. Meade reached Funktown, six miles south of Hagerstown.

Meanwhile, Gen. Couch, who was in command of this department, had proceeded to organize the raw troops which had been called out, as they came in. His nucleus for this provisional army was the troops from New York. The first division organized was put under the command of Gen. W. F. Smith, and placed opposite Harrisburg, to resist an attack. Upon the retreat of the enemy from the neighborhood of that place, Gen. Smith immediately followed them with about six thousand men, a small number of cavalry, and two batteries of artillery. He advanced to Carlisle, where he was met by W. H. F. Lee, who expected to find Gen. Ewell there, and attacked with artillery. Gen. Smith was so strongly posted, that Lee soon retired and Gen. Smith followed. Meantime, Gen. Couch organized another division, and placed it under the command of Maj.-Gen. Dana. Before this was on its way, Gen. Couch moved his headquarters to Chambersburg, to

superintend the entire movement. Gen. Smith, with his troops shoeless and living upon the country, joined the Army of the Potomac; and Gen. Dana pushed forward, and had reached Greencastle when Gen. Lee crossed the Potomac. Other reinforcements were sent to Gen. Meade. The entire Federal loss at Gettysburg was 2,834 killed, 13,790 wounded, and 6,643 missing. That of the enemy was larger: 4,500 of his dead were buried by the Union soldiers, 26,500 wounded fell into their hands, and 13,621 prisoners were taken; also three guns, forty-one standards, and 24,978 small arms.

Meanwhile, Gen. Lee's forces fell back toward the river at Williamsport. On the 11th, Gen. Lee issued the following address to his troops:

General Order No. 16.

HEADQUARTERS ARMY OF NORTHERN VIRGINIA, }
July 11th, 1863. }

After the long and trying marches, endured with the fortitude that has ever characterized the soldiers of the Army of Northern Virginia, you have penetrated to the country of our enemies, and recalled to the defences of their own soil, those who are engaged in the invasion of ours. You have fought a fierce and sanguinary battle, which, if not attended with the success that has hitherto crowned your efforts, was marked by the same heroic spirit that has commanded the respect of your enemies, the gratitude of your country, and the admiration of mankind.

Once more you are called upon to meet the enemy, from whom you have torn so many field names that will never die. Once more the eyes of your countrymen are turned upon you, and again do wives and sisters, fathers and mothers, and helpless children lean for defence on your strong arms and brave hearts. Let every soldier remember, that on his courage and fidelity depends all that makes life worth having—the freedom of his country, the honor of his people, and the security of his home. Let each heart grow strong in the remembrance of our glorious past, and in the thought of the inestimable blessings for which we contend; and, invoking the assistance of that higher Power, which has so signally blessed our former efforts, let us go forth in confidence to secure the peace and safety of our country. Soldiers, your old enemy is before you. Win from him honor worthy of your right cause, worthy of your comrades dead on so many illustrious fields.

R. E. LEE, General Commanding.

The pursuit by Gen. Meade is thus stated in his report: "The 5th and 6th of July were employed in succoring the wounded and burying the dead. Major-Gen. Sedgwick, commanding the sixth corps, having pushed the pursuit of the enemy as far as the Fairfield pass and the mountains, and reporting that the pass was very strong—one in which a small force of the enemy could hold in check and delay for a considerable time any pursuing force—I determined to follow the enemy by a flank movement, and accordingly, leaving McIntosh's brigade of cavalry and Neil's brigade of infantry to continue harassing the enemy, I put the army in motion for Middletown, and orders were immediately sent to Major-Gen. French, at Frederick, to reoccupy Harper's Ferry, and send a force to occupy Turner's Pass, in South Mountain. I subsequently ascertained that Major-Gen. French had not only anticipated

these orders in part, but had pushed a cavalry force to Williamsport and Falling Waters, where they destroyed the enemy's pontoon bridge, and captured its guard. Buford was at the same time sent to Williamsport and Hagerstown. The duty above assigned to the cavalry was most successfully accomplished, the enemy being greatly harassed, his trains destroyed, and many captures of guns and prisoners made.

"After halting a day at Middletown to procure necessary supplies and bring up trains, the army moved through South Mountain, and by the 12th of July was in front of the enemy, who occupied a strong position on the heights near the marsh which runs in advance of Williamsport. In taking this position, several skirmishes and affairs had been had with the enemy, principally by the cavalry and the eleventh and sixth corps. The 13th was occupied in reconnoissances of the enemy's position and preparations for an attack. But on advancing on the morning of the 14th, it was ascertained that he had retired the night previous by the bridge at Falling Waters and ford at Williamsport. The cavalry in pursuit overtook the rear guard at Falling Waters, capturing two guns and numerous prisoners. Previous to the retreat of the enemy, Gregg's division of cavalry was crossed at Harper's Ferry, and, coming up with the rear of the enemy at Charlestown and Sheperdstown, had a spirited contest, in which the enemy was driven to Martinsburg and Winchester, and pursued and harassed in his retreat.

"The pursuit was resumed by a flank movement of the army, crossing the Potomac at Berlin and moving down the Loudon Valley. The cavalry were immediately pushed into several passes of the Blue Ridge, and having learned from servants of the withdrawal of the Confederate army from the lower valley of the Shenandoah, the army (the third corps, Maj.-Gen. French, being in advance) was moved into Manassas Gap, in the hope of being able to intercept a portion of the enemy in possession of the Gap, which was disputed so successfully as to enable the rear guard to withdraw by the way of Strasburg. The Confederate army retiring to the Rapidan, a position was taken with this army on the line of the Rappahannock, and the campaign terminated about the close of July."

On the 14th, Gen. Meade sent the following despatches to Washington:

HEADQUARTERS ARMY OF THE POTOMAC, }
July 14th—3 P. M. }

H. W. Halleck, General-in-Chief:

My cavalry now occupy Falling Waters, having overtaken and captured a brigade of infantry, 1,500 strong, two guns, two caissons, two battle-flags, and a large number of small arms. The enemy are all across the Potomac. GEO. G. MEADE, Major-General.

HEADQUARTERS ARMY OF THE POTOMAC, }
July 14th—8.30 P. M. }

Major-Gen. Halleck, General-in-Chief:

My cavalry have captured five hundred prisoners, in addition to those previously reported. Gen. Pettigrew, of the Confederate army, was killed this morn-

ing in the attack on the enemy's rear-guard. His body is in our hands. G. G. MEADE, Major-General.

The first of these despatches was subsequently denied by Gen. Lee, as follows:

HEADQUARTERS ARMY NORTHERN VIRGINIA, }
July 21st 1863. }

Gen. S. Cooper, Adj't and Inspector-General C. S. A.:

GENERAL: I have seen in the Northern papers what purports to be an official despatch from Gen. Meade, stating that he had captured a brigade of infantry, two pieces of artillery, two caissons, and a large number of small arms, as this army retired to the south bank of the Potomac on the 13th and 14th instant. This despatch has been copied into the Richmond papers; and as its official character may cause it to be believed, I desire to state that it is incorrect. The enemy did not capture any organized body of men on that occasion, but only stragglers and such as were left asleep on the road, exhausted by the fatigue and exposure of one of the most inclement nights I have ever known at this season of the year. It rained without cessation, rendering the road by which our troops marched toward the bridge at Falling Waters very difficult to pass, and causing so much delay that the last of the troops did not cross the river at the bridge until 1 A. M. on the morning of the 14th.

While the column was thus detained on the road, a number of men, worn down with fatigue, laid down in barns and by the roadside, and though officers were sent back to arouse them as the troops moved on, the darkness and rain prevented them from finding all, and many were in this way left behind. Two guns were left on the road; the horses that drew them became exhausted, and the officers went back to procure others. When they returned, the rear of the column had passed the guns so far that it was deemed unsafe to send back for them, and they were thus lost. No arms, cannon, or prisoners were taken by the enemy in battle, but only such as were left behind, as I have described, under the circumstances. The number of stragglers thus lost I am unable to state with accuracy, but it is greatly exaggerated in the despatch referred to.

I am, with great respect, your obedient servant,
R. E. LEE, General.

This despatch of Gen. Lee was subsequently contradicted by Gen. Meade in the following statement, which is important, as containing the details of some of the operations to harass the retreat of the Confederate army across the river:

HEADQUARTERS ARMY OF THE POTOMAC, }
August 9th, 1863. }

Major-Gen. Halleck, General-in-Chief:

My attention has been called to what purports to be an official despatch of Gen. R. E. Lee, commanding the rebel army, to Gen. S. Cooper, Adjutant and Inspector-General, denying the accuracy of my telegram to you, of July 14th, announcing the result of the cavalry affair at Falling Waters.

I have delayed taking any notice of Lee's report until the return of Brig.-Gen. Kilpatrick, absent on leave, who commanded the cavalry on the occasion referred to, and on whose report from the field my telegram was based. I now enclose the official report of Brig.-Gen. Kilpatrick, made after his attention had been called to Lee's report. You will see that he reiterates and confirms all that my despatch averred, and proves most conclusively that Gen. Lee has been deceived by his subordinates, or he would never in the face of the facts now alleged have made the assertion his report claims.

It appears that I was in error in stating that the body of Gen. Pettigrew was left in our hands, although I did not communicate that fact until an officer from the field reported to me he had seen the body. It is now ascertained from the Richmond papers that Gen. Pettigrew, though mortally wounded in the affair,

was taken to Winchester, where he subsequently died. The three battle flags captured on this occasion and sent to Washington, belonged to the 40th, 47th, and 55th Virginia regiments of infantry.

Gen. Lee will surely acknowledge these were not left in the hands of stragglers asleep in barns.

(Signed)

GEO. G. MEADE,

Major-General Commanding.

HEADQUARTERS THIRD DIVISION CAVALRY CORPS, }
WARRENTON JUNCTION, VA., August 7th. }

To Colonel A. J. Alexander, Chief of Staff of Cavalry Corps :

COLONEL : In compliance with a letter just received from the headquarters of the cavalry corps of the Army of the Potomac, directing me to give the facts connected with the fight at Falling Waters, I have the honor to state that, at 3 A. M. of the 14th ult., I learned that the enemy's pickets were retiring in my front. Having been previously ordered to attack at 7 A. M., I was ready to move at once.

At daylight I had reached the crest of hills occupied by the enemy an hour before, and, a few minutes before 6, Gen. Costar drove the rear guard of the enemy into the river at Williamsport. Learning from citizens that a portion of the enemy had retreated in the direction of Falling Waters, I at once moved rapidly for that point, and came up with this rear guard of the enemy at 7.30 A. M., at a point two miles distant from Falling Waters. We pressed on, driving them before us, capturing many prisoners and one gun. When within a mile and a half of Falling Waters, the enemy was found in large force, drawn up in line of battle on the crest of a hill, commanding the road on which I was advancing. His left was protected by earthworks, and his right extended to the woods on our left.

The enemy was, when first seen, in two lines of battle, with arms stacked, within less than 1,000 yards of the large force. A second piece of artillery, with its support, consisting of infantry, was captured while attempting to get into position. The gun was taken to the rear. A portion of the 6th Michigan cavalry, seeing only that portion of the enemy behind the earthworks, charged. This charge was led by Major Webber, and was the most gallant ever made. At a trot he passed up the hill, received the fire from the whole line, and the next moment rode through and over the earthworks, and passed to the right, sabring the rebels along the entire line, and returned with a loss of thirty killed, wounded, and missing, including the gallant Major Webber, killed.

I directed Gen. Costar to send forward one regiment as skirmishers. They were repulsed before support could be sent them, and driven back, closely followed by the rebels, until checked by the 1st Michigan and a squadron of the 8th New York. The 2d brigade having come up, it was quickly thrown into position, and, after a fight of two hours and thirty minutes, routed the enemy at all points and drove him toward the river.

When within a short distance of the bridge, Gen. Buford's command came up and took the advance. We lost twenty-nine killed, thirty-six wounded, and forty missing. We found upon the field 125 dead rebels, and brought away upward of fifty wounded. A large number of the enemy's wounded were left upon the field in charge of their own surgeons. We captured two guns, three battle flags, and upward of fifteen hundred prisoners.

To Gen. Costar and his brigade, Lieut. Pennington and his battery, and one squadron of the 8th New York cavalry of Gen. Buford's command, all praise is due. Very respectfully, your ob't servant,

J. KILPATRICK, Brigadier-General.

On the 7th of July, despatches were received at Washington announcing the surrender of Vicksburg, and, on the 14th, further despatches announcing the surrender of Port Hudson. The news of the surrender of Vicks-

burg was welcomed with salutes of artillery in a large number of the principal cities in the Northern States.

On the 15th, the President issued the following proclamation :

By the President of the United States of America :

A PROCLAMATION.

It has pleased Almighty God to hearken to the supplications and prayers of an afflicted people, and to vouchsafe to the army and the navy of the United States, victories on the land and on the sea so signal and so effective, as to furnish reasonable ground for augmented confidence that the Union of these States will be maintained, their Constitution preserved, and their peace and prosperity permanently restored. But these victories have been accorded not without sacrifices of life, limb, health, and liberty, incurred by brave, loyal, and patriotic citizens. Domestic affliction, in every part of the country, follows in the train of these fearful bereavements. It is meet and right to recognize and confess the presence of the Almighty Father, and the power of His Hand, equally in these triumphs and in these sorrows.

Now, therefore, be it known that I do set apart Thursday, the 6th day of August next, to be observed as a day for National Thanksgiving, Praise, and Prayer, and I invite the people of the United States to assemble on that occasion in their customary places of worship, and, in the forms approved by their own consciences, render the homage due to the Divine Majesty for the wonderful things He has done in the nation's behalf, and invoke the influence of His Holy Spirit to subdue the anger which has produced and so long sustained a needless and cruel rebellion, to change the hearts of the insurgents, to guide the counsels of the Government with wisdom adequate to so great a national emergency, and to visit with tender care and consolation throughout the length and breadth of our land all those who, through the vicissitudes of marches, voyages, battles, and sieges, have been brought to suffer in mind, body, or estate, and finally to lead the whole nation—through the paths of repentance and submission to the Divine Will—back to the perfect enjoyment of union and fraternal peace.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington, this fifteenth day of July, in the year of our Lord one thousand eight hundred and sixty-three, and of the Independence of the United States of America the eighty-eighth.

By the President : ABRAHAM LINCOLN.
WILLIAM H. SEWARD, Secretary of State.

The movements of Gen. Meade in pursuit of Gen. Lee were in detail as follows :

On the 18th, his headquarters were moved across the Potomac; on the 19th, they were at Lovettsville; on the 20th and 21st, at Union; on the 22d, at Upperville; on the 23d, at Markham Station; on the 24th, at Salem; and on the 25th, at Warrenton, with the army occupying the same line which it did two months previous. Active operations now closed, and on the 30th, Gen. Meade issued the following proclamation to the inhabitants :

HEADQUARTERS ARMY OF THE POTOMAC, }
July 30th, 1863. }

The numerous depredations committed by citizens, or rebel soldiers in disguise, harbored or concealed by citizens, along the Orange and Alexandria railroad, within our lines, call for prompt and exemplary punishment.

Under the instruction of the Government, therefore, every citizen against whom there is sufficient evidence of his having engaged in these practices, will be ar-

rested and confined for punishment or sent beyond the lines. The people within ten miles of the railroad are notified that they will be held responsible in their persons and property for any injury done to the trains, road, depot, or stations, by citizens, guerillas, or persons in disguise; and in case of such injury they will be impressed as laborers to repair all damages. If these measures should not stop such depredations, it will become the unpleasant duty of the undersigned, in the execution of his instructions, to direct that the entire inhabitants of the district of country along the railroad be put across the lines, and their property taken for Government purposes.

GEORGE G. MEADE, Maj.-Gen. Commanding.

Some movements were made during the advance of Gen. Lee into Pennsylvania, which were important, being intended to serve as diversions. One made by a portion of the forces under Gen. Dix, from Fortress Monroe, up the peninsula toward Richmond, is mentioned in the correspondence between Mr. Davis and Gen. Lee, on a preceding page. The effect of this movement is there stated. Gen. Getty, of the seventh corps, was sent by Gen. Dix to the White House, at the junction of the Pamunkey with the York river. In this position he threatened both Richmond and the communications of Gen. Lee. From the White House a force was sent out to occupy Tunstall's Station, on the railroad to Richmond. Lanesville, on the other side of the Pamunkey, was also occupied, and an advance was made to Hanover, by which several prisoners were captured, among whom was Brig.-Gen. H. F. Lee, a son of Gen. R. E. Lee.

The advance of Gen. Rosecrans against the army of Gen. Bragg commenced at this time. It is hereafter stated. On the Confederate side a "raid" was made by the Partisan Ranger, John Morgan, into the States of Kentucky, Indiana, and Ohio, in which he designed to sweep everything before him, attracting the public attention entirely to himself, and breaking all the railroad communications by which reënforcements for the defence of Louisville, Kentucky, could be sent. Immediately upon this, Gen. Buckner, from Tennessee, was to dash into Kentucky with the force under his command, which was very considerable, capture Louisville, and then, in coöperation with Gen. Morgan, make an attack upon Cincinnati. By the advance of Gen. Rosecrans sooner than was expected, Gen. Buckner could not be spared for this movement.

Gen. Morgan, with about four thousand men, was in Tennessee at this time, south of the Cumberland river, and making a feint upon Tompkinsville, just over the line in Kentucky. Tompkinsville is the capital of Monroe county, 140 miles south of south-west of Frankfort, the capital of the State, and 10 miles from the Cumberland river. A small Union force was stationed at Columbia, the capital of Adair county, Kentucky, an important position to defend the State from a threatening enemy on the south bank of the Cumberland. On the 20th of June, Brig.-Gen. Hobson was ordered by Gen. Judah to move to Tompkinsville, then

apparently threatened by Gen. Morgan. This opened the gate for Gen. Morgan, who immediately crossed the Cumberland at Burksville, the capital of Cumberland county. Thus having the start, Gen. Morgan moved rapidly on to Columbia, where a brave defence was made by Capt. Carter, with one hundred and fifty men of Col. Wolford's Kentucky regiment, who were, however, forced to retire with the loss of their leader. Thence Gen. Morgan attacked, on July 4th, Col. Moore, posted with a few hundred men at Green river bridge, who made a firm resistance. He next marched, on the 5th, to Lebanon, and demanded the surrender of the place by Col. Hanson, who, with his regiment, the 20th Kentucky, was stationed there. This was refused, and an attack was immediately made and bravely resisted for seven hours, when the enemy began to set fire to the town, and Col. Hanson surrendered to save its entire destruction. Lebanon is the capital of Marion county. It is 60 miles south by west of Frankfort. All the northern portion of the town, with the county clerk's office and the records, was burned. The soldiers who surrendered were marched in front to Springfield, and compelled to keep pace with the cavalry. The distance was ten miles, and passed in an hour and a half. The Union loss was five killed and several wounded; the Confederate loss was six killed and ten wounded. From Springfield, Gen. Morgan moved to Shepherdsville; thence to Bardstown, on the 6th.

On Tuesday, the 7th, the advance of his force reached Brandenburg on the Ohio river, forty miles below Louisville. During the day, the steamer McCombs, bound up the river, stopped, as usual, at Brandenburg, to take on passengers and freight. As soon as she touched the shore she was boarded by a number of the enemy and seized. Everything was taken that would serve the purpose of the captors, and the boat was run out into the river and anchored. Some time afterward, the steamer Alice Dean approached, when signals of distress were raised on the McCombs, and the Dean was induced to come alongside without a suspicion of the actual circumstances. She was then boarded and seized. On the next day, Wednesday, the force of Gen. Morgan, consisting of eleven regiments and over four thousand men, with ten pieces of artillery, including two howitzers, were taken across the river in these boats. The Dean was then burned, and also the wharf at Brandenburg, but the McCombs was given up.

In the mean time, Gen. Hobson, after some delay, commenced the pursuit. He started on the 4th, but being encumbered by a wagon train, and the roads being bad, he advanced only ten miles in five hours. On the next morning, the infantry, wagons, and artillery were left behind, and the pursuit made with cavalry. From 4 P. M. to 11 P. M. a halt was made. The march was then continued during the remainder of the night, and, on the next morning, Brig.-Gen. Shackelford was met with cavalry

and artillery. Proceeding to Lebanon, Col. Wolford and his brigade there joined. Orders were also received by Gen. Hobson from Gen. Burnside, in command of the department, directing him to assume full command, and to pursue until the enemy was captured. The command then marched toward Bardstown, until 1 A. M. After two hours' rest the pursuit was resumed. At night, a halt was made until rations could be obtained by the Louisville and Nashville railroad. The pursuit was renewed early on Tuesday, the 7th, and by night the force was within nine miles of Brandenburg. Gen. Hobson, wishing to coöperate with the gunboats and make a night attack, proceeded with a small escort to Rock Haven. Here he found that the gunboats had gone up the river. It was 1 A. M. before he returned. The men being so overcome with fatigue and want of sleep that it was almost impossible to arouse them, he reluctantly concluded to wait until day-break. Pushing on at that time, he reached the river as the last boat with the enemy had crossed.

During the night the enemy marched toward Corydon, in Indiana, which they reached early the next forenoon. Some opposition was made to their progress by the inhabitants. Great excitement, however, prevailed in the State. A proclamation was issued by Gov. Morton, ordering all the able-bodied citizens in

the southern counties of the State under arms. From Corydon, Gen. Morgan moved by the way of Greenville and Palmyra to Salem. At Palmyra a force of three hundred and fifty Home Guards had concentrated, having fallen back from near Corydon to that place. Considering their inability to retard the progress of the enemy, they also fell back to Salem. So sudden, however, was the entrance of the enemy into Salem, that these Guards were all made prisoners and subsequently paroled. At Salem, the depot of the Louisville and Chicago railroad was burned. Orders were also issued by Gen. Morgan to burn all the mills and factories in the town, but upon the payment of one thousand dollars for each mill and factory, they were spared. The railroad track was torn up, the water tank near the town burned, and one passenger and three freight cars. Three bridges between Salem and Farrabee's Station were also destroyed. Good horses were taken wherever found, and the whole command was remounted. From Salem the enemy moved to Canton, in Washington county, four and a half miles distant. Here over one hundred horses were taken, and, joining his left column with the right, which entered the town by way of Harristown, Gen. Morgan moved in the direction of Vienna, in Scott county, on the line of the Jeffersonville railroad. About 11

P. M. on Friday night the advance reached Vienna, and at 2 o'clock on the next morning the rear guard arrived. Here a railroad bridge was burned, and the depot and station house. Private property for the first time was here respected. At Vienna, the force of the enemy was divided into two columns, one of which marched north and the other started in the direction of Madison. The advance of the column marching north, appeared before Old Vernon, in Jennings county, on Saturday, at 6 P. M., the 11th of July. The place was held by a force under Gen. Love or Col. Barkham. A surrender was demanded by Gen. Morgan and refused. A half hour was then given for the removal of women and children. At the expiration of that time the Union force moved out to meet the enemy, and found that they had retired. Pursuit was made and a number captured. From Vernon they moved southward and tore up the track of the Madison and Indianapolis railroad, and cut the telegraph wires. They also destroyed a portion of the Ohio and Mississippi railroad west of Vernon. Thence the enemy moved eastward, and reached Versailles at 1 P. M. on Sunday. A party of sixty-three advanced to Osgood, and burned the bridge on the Ohio and Mississippi railroad. The enemy now moved in several parties. A large body encamped ten miles northwest of Aurora, on Sunday night, and proceeded thence to Harrison. Another portion crossed the Indianapolis and Cincinnati railroad, between Sunman and Van Wedden's stations, and passed on to Harrison on Monday. A large force crossed the same road at Harman's, and proceeded to the Ohio State line. At Van Wedden's the water tank and part of the track were destroyed. Horses were taken in all places, and those broken down left behind. During Monday, the 13th, the enemy continued moving eastward. In the evening, one division crossed the Coleraine turnpike just beyond the ten-mile post from Cincinnati, and thence advanced through Glendale and Springdale. A detachment went by the way of Camp Monroe, where the Government had been keeping large numbers of horses and mules for the use of the army. These had been removed only a few hours previous. A halt of a few hours was made near Glendale, and the march was then continued through Sharon and Reading to Montgomery. The inhabitants everywhere were required to furnish provisions. From Montgomery the enemy crossed to Miamiville.

A body also crossed the Little Miami railroad at Dangerous Crossing, between Miamiville and Branch Hill. At this spot they placed some ties and rails across the track near a declivity, and as the train from Morrow came down, about a quarter past 7 A. M., the locomotive was thrown from the track, the fireman killed, and the engineer badly bruised. In a few minutes the enemy came out of the woods and fields, and made prisoners of about two hundred recruits who were on the train. While

the cars were burning they were paroled. Some skirmishing took place during the day. Arrangements were now made by means of gunboats to cut off the retreat of the enemy across the river, if they should attempt it. Forces were also gathering to stop the progress of Gen. Morgan, and his movements became more rapid. On Tuesday afternoon, the 14th, he reached Williamsburg, east of Batavia, in Clermont county, and near the line of Brown county. On Wednesday, he passed through Brown county, and, on Thursday morning at 9 A. M., through the town of Sardinia, sixteen miles southwest of Hillsboro, the capital of Highland county. At noon he was at Winchester, southeast of Hillsboro, and forced the citizens to prepare a dinner for his men. Afterward he moved to Piketown, which surrendered without opposition. Very little depredation was done except taking horses and provisions. Burning the bridge over the Scioto, he next moved toward Jackson, where he arrived in the evening, and remained until joined by his whole force. Thence he started for the Ohio river near Pomeroy.

In the mean time, Gen. Hobson, who arrived at the Ohio river in pursuit as the last of the enemy's force had crossed, sent the steamer McCombs to Louisville, to obtain other boats to aid in crossing. By night, quite a fleet had arrived, and the force was taken over before morning. Pursuit was immediately commenced on Wednesday. The command was fed by the inhabitants of the towns, but as Gen. Morgan had swept the horses from both sides of the road, and left only those which were broken down, the advantage was greatly in his favor. The men whose horses failed, pressed forward on foot until they could obtain others. Day after day passed, but still the enemy kept about the same distance ahead. For nearly twenty days and a distance of nearly seven hundred miles, this pursuit continued day and night, before the foe was reached. The local force of Indiana which was sent against Gen. Morgan, came no farther than the borders of the State. The first attempt to check his advance was made when he reached Piketon. A considerable force was at this time at Chillicothe, north of the latter place, and Col. Runkle, in command, planned to move over the Marietta railroad to Hampden, and then to Jackson, in advance of Gen. Morgan.

It was now manifest that the enemy aimed to reach the Ohio river at Gallipolis or Pomeroy. The inhabitants commenced cutting trees, which fell across the roads and delayed his progress. The militia in the adjoining counties rushed to arms. At the same time, the forces of Gen. Morgan had been constantly diminishing, by the exhaustion of some and the capture of others, until scarcely a fourth remained. These were harassed now at every step. Notwithstanding several skirmishes, they reached the river, and attempted to cross at Buffington island, near Pomeroy, but were driven back by

the gunboats. Gen. Hobson had thus overtaken him, and a large portion of the force was captured, on the 21st, near Kyger's creek. Gen. Morgan and about five hundred, however, escaped, and were not captured until the 26th, about three miles south of New Lisbon, near Wellsville, where he hoped to cross the river. Gen. Shackelford immediately sent to Gen. Burnside's headquarters the following despatch:

HEADQUARTERS IN THE FIELD, }
Three miles south of New Lisbon, Ohio, July 26th, 1863. }
To Col. Lewis Richmond, A. A. G.:

By the blessing of Almighty God I have succeeded in capturing Gen. John H. Morgan, Col. Chike, and the remainder of the command, amounting to about four hundred prisoners. I will start with Morgan and staff on the first train for Cincinnati, and await the General's order for transportation for the remainder.

J. M. SHACKELFORD, Col. Commanding.

Before proceeding to state the important movements of the army under Gen. Rosecrans which took place at this time, it may be proper to notice its situation subsequent to the battle of Stone river in the beginning of the year. The operations of the army of the Cumberland, under Maj.-Gen. Rosecrans, during 1862, closed with the battle of Stone river, near Murfreesboro. This battle took place on the last days of 1862 and the first of 1863. (*See ANNUAL CYCLOPEDIA, 1862, ARMY OPERATIONS.*) On the 5th of January, the headquarters of the army were established at Murfreesboro. The army occupied a position in front of the town, and a series of extensive earthworks, completely encircling it, were constructed for the purpose of making it a depot of supplies and the base of future operations. The railroad track and the bridges in the rear toward Nashville were also repaired. On the 9th of January, the army was divided into three corps, designated the fourteenth, twentieth, and twenty-first, and commanded respectively by Gens. Thomas, McCook, and Crittenden. Active operations were, however, suspended, owing to the rains of the season. Large supplies were collected in consequence of the rise of the Cumberland river at Nashville and Murfreesboro. But the enemy was not idle. His cavalry overran the country, and men and wagons belonging to Gen. Rosecrans were often captured by him. The object was to cut off the communications of the army of the Cumberland and its supplies. Thus also many of the steamers on the Cumberland river were captured and burned.

On the 31st, Brig.-Gen. Jeff. C. Davis, with a division of infantry and two brigades of cavalry, under Col. Minty, moved from camp on an expedition in the direction of Rover and Franklin. The force was absent thirteen days, and during that time some portion of it visited Middletown, Unionville, Versailles, Peytonville, Franklin, Hillsboro, Kinderhook, and Triune. The cavalry captured one hundred and forty-one prisoners, including two colonels, one major, four captains, and several lieutenants, with one man severely injured, and one dangerously wounded.

On the 3d of February, an attack was made on Fort Donelson, in another part of this department. On the 2d, the Confederate Col. Forrest, with nine hundred men, had taken a position at Palmyra, for the purpose of interrupting the navigation of the Cumberland. On the next day he advanced upon the fort both from above and below. The garrison consisted of nine companies of the 83d Illinois, a battalion of the 5th Iowa cavalry, Flood's battery, and some wounded men, under command of Col. A. C. Harding. The battery consisted of four rifled guns, and in addition there was a pivot of thirty-two pounder rifled, mounted on the northwest corner of the fort. At half past one in the afternoon a flag of truce was sent in by Col. Forrest, demanding a surrender of the fort and garrison. This was promptly refused, and preparations for defence were made. The attack was immediately commenced, and kept up, with numerous charges, which were gallantly repulsed, until eight o'clock in the evening, when another demand for a surrender was made. It was again promptly refused, and the enemy retired in confusion. The Federal loss was thirteen killed, fifty-one wounded, and twenty taken prisoners, without including a captain and twenty-six men who were captured on the same day while on a scout; also one gun, twenty-five mules, and forty-two horses. The Confederate loss was estimated at two hundred and fifty killed, six hundred wounded, and one hundred and five prisoners.

A period of inactivity now ensued, which was suddenly broken by the defeat and capture of a Federal brigade at Spring Hill on the 5th of March. On the preceding day an expedition, under the command of Col. John Colburn, consisting of part of the 33d and 85th Indiana, 22d Wisconsin, and 19th Michigan, numbering fifteen hundred and eighty-nine men, together with the 124th Ohio, and six hundred cavalry, and one battery of six small guns, was ordered to proceed from Franklin to Spring Hill, ten miles south, on the Columbia turnpike. Soon after commencing the march, the enemy were encountered, and, after a sharp skirmish, repulsed. Moving forward about two miles, they were again encountered, but, owing to the late hour, the command encamped. Starting again on the next morning, the 124th Ohio being in the rear of the wagon train, the enemy was again met, after an advance of two miles, and sharp skirmishing was kept up for some distance. The enemy was then found in full force under Gen. Van Dorn and Col. Forrest. A severe struggle ensued, which was protracted until Col. Forrest had taken a position in the rear, when Col. Colburn, finding his ammunition failing, and his retreat cut off, surrendered. Thirteen hundred and six men were made prisoners. The cavalry were not engaged, and, with the artillery, escaped. The Confederate force consisted of cavalry and mounted infantry, composing six brigades, under the command of Maj.-Gen. Van Dorn. The whole force of Gen. Van Dorn had

been at Spring Hill for three days, preparing to make an attack on Franklin.

Meanwhile a successful expedition was made by Gen. Sheridan, with his division, and Col. Minty, with a force of eight hundred cavalry. Several sharp skirmishes took place, and a portion of the force which captured Col. Colburn was overtaken at Thompson Station and driven from the field, and the force of Gen. Van Dorn was followed to Duck river, when the expedition returned to Franklin.

On the 18th of March, an expedition, consisting of the 105th Ohio, 80th and 123d Illinois, and an Indiana battery, and one company of 1st Middle Tennessee cavalry, numbering about fourteen hundred men, under the command of Col. A. S. Hall, left Murfreesboro and moved in the direction of Liberty. That night Gainesville was occupied, and on the next morning an advance was made, when a slight skirmish ensued. The enemy slowly retired on the turnpike down Smith's Fork, followed by Col. Hall, until they were found drawn up in line across the road. Finding, upon a reconnoissance, that he was greatly outnumbered, Col. Hall fell back toward Murfreesboro, with the object of drawing the enemy after him. That night he encamped at Auburn, seven miles from Liberty, and on the next morning, the 20th, took up a position at Milton, twelve miles northeast of Murfreesboro. Here he was attacked by the Confederate force under Gen. John Morgan, who, after a fight of three and a half hours, withdrew from the field. Four captains, two lieutenants, and fifty-seven men were left on the field as dead or mortally wounded. Their total loss was estimated at nearly four hundred. Ten prisoners, eight horses, and fifty-three stands of arms were captured. The loss of Col. Hall was six killed, forty-two wounded, and seven missing. The force of the enemy was about two thousand.

A large number of expeditions, similar to those above stated, were sent out at different times; often with much success. About the 10th of April another attack was made on Maj.-Gen. Gordon Granger, at Franklin, by the Confederate force, under Maj.-Gen. Van Dorn. The force of Gen. Granger consisted of the divisions of Brig.-Gens. Baird and Gilbert, sixteen hundred men and sixteen guns, and Brig.-Gen. Smith's cavalry brigade of eleven hundred and twenty-eight men; also a cavalry force of sixteen hundred men and two guns, under Col. Stanley. The only artificial defence was an uncompleted fort, which mounted two siege guns and two three-inch rifled guns. Its elevation was about forty feet above the surrounding country, and it commanded most of the approaches to Franklin, north of the Harpeth, and all from the south except a small portion of the surface covered by a few blocks of houses. Gen. Granger's camp was on the north side of the river, about two thirds of a mile distant from the town. Gen. Baird was ordered to hold in check any force attempting to cross the fords below

the town, and Gen. Gilbert was placed in a position to meet any attack in front, or to reinforce either flank. Gen. Stanley was stationed out four miles on the road to Murfreesboro, and Gen. Smith's cavalry were held in reserve to reinforce Gen. Stanley. This force, however, was sent under a misapprehension to Brentwood. An attack was made by Gen. Van Dorn upon Gen. Granger's front, which was repelled and afterward turned upon Gen. Stanley, who was driven back by overpowering numbers before reinforcements could reach him. After this the enemy withdrew. The force of the enemy was estimated at nine thousand cavalry and two regiments of infantry, and his loss at about three hundred. The loss of Gen. Granger was thirty-seven killed, wounded, and missing.

On the 20th of April, a force, consisting of Maj.-Gen. Reynolds's division, Col. Wilder's mounted brigade, and seventeen hundred cavalry, under Col. Minty, left Murfreesboro to capture or disperse any Confederate force at McMinnsville. At night the cavalry encamped between Readyville and Woodbury. Early the next morning the force moved on, and, approaching the town, the pickets of the enemy were discovered. Forming a line, they opened fire, and were charged upon and driven through the town. The entire force thus dispersed consisted of seven hundred men. The wagon train had left the town for Chattanooga about an hour before the arrival of the Federal force, but, by hard pressing, three wagons were captured, and eight or nine men. Other movements were made by this force, which resulted in the capture of one hundred and thirty prisoners, the destruction of a trestlework below Morrison's, the burning of the railroad buildings, one locomotive, and two cars, at that place, the burning of the railroad bridge across Hickory creek, and the capture there of a large amount of bacon and other commissary stores. A large amount of property and stores, including a cotton factory and other Government buildings, was destroyed at McMinnsville, and a large number of horses and mules brought in. No casualties occurred to the Federal force.

On the 29th of April, a force of five hundred men, under Col. Watkins, captured a camp of the enemy, taking one hundred and thirty-eight prisoners.

About the same time an expedition was fitted out for Northern Georgia, consisting of the 51st Indiana, 80th Illinois, and portions of two Ohio regiments, under command of Col. A. D. Streight. The force numbered about eighteen hundred men, and the instructions given to Col. Streight were as follows:

HEADQUARTERS, DEPOT OF THE CUMBERLAND, }
MURFREESBORO, April 8th, 1863. }

Colonel A. D. Streight, 51st Indiana Volunteers :

By special field order, No. 94, paragraph 8, you have been assigned to the command of an Independent Provisional Brigade, for temporary purposes. After fitting out your command with equipments and supplies, as you have already been directed in the ver-

bal instructions of the General commanding this department, you will then proceed by a route of which you will be advised by telegraph, to some good steamboat landing on the Tennessee river, not far above Fort Henry, where you will embark your command, and proceed up the river. At Hamburg you will communicate with Brig.-Gen. Dodge, who will probably have a messenger there, awaiting your arrival. If it should then appear unsafe to move farther up the river, you will debark at Hamburg, and, without delay, join the force of Gen. Dodge, which will then be *en route* for Iuka, Mississippi. If, however, it should be deemed safe, you will land at Eastport, and form a junction with Gen. Dodge. From that point you will then march in conjunction with him to menace Tusculumbia; but you will not wait to join in the attack, unless it should be necessary for the safety of Gen. Dodge's command or your own, or unless some considerable advantage can be gained over the enemy without interfering with the general object of your expedition. After having marched long enough with Gen. Dodge to create a general impression that you are a part of his expedition, you will push to the southward and reach Russellville or Moulton. From there your route will be governed by circumstances; but you will with all reasonable despatch push on to Western Georgia, and cut the railroads which supply the rebel army by way of Chattanooga. To accomplish this is the chief object of your expedition; and you must not allow collateral or incidental schemes, even though promising great results, to delay you so as to endanger your return. Your quartermaster has been furnished with funds sufficient for the necessary expenses of your command; you will draw your supplies and keep your command well mounted from the country through which you pass. For all property taken for the legitimate use of your command, you will make cash payments in full to men of undoubted loyalty, give the usual conditional receipts to men whose loyalty is doubtful; but to rebels, nothing. You are particularly commanded to restrain your command from pillage and marauding; you will destroy all depots of supplies for the rebel army, all manufactories of guns, ammunition, equipments, and clothing for their use, which you can without delaying you so as to endanger your return. That you may not be trammelled with minute instructions, nothing further will be ordered than this general outline of policy and operation. In intrusting this highly important and somewhat perilous expedition to your charge, the General commanding places great reliance on your prudence, energy, and valor, and the well-attested bravery and endurance of the officers and men in your command. Whenever it is possible and reasonably safe, send us word of your progress. You may return by way of Northern Alabama or Northern Georgia. Should you be surrounded by rebel forces, and your retreat cut off, defend yourself as long as possible, and make the surrender of your command cost the enemy as many times your number as possible. A copy of the general order from the War Department, in regard to paroling prisoners, together with the necessary blanks, are herewith furnished you; you are authorized to enlist all able-bodied men who desire to join the "Army of the Union." You must return as soon as the main objects of your expedition are accomplished.

Very respectfully, your obedient servant.

J. A. GARFIELD,

Brigadier-General and Chief of Staff.

The following additional instructions were sent by telegraph to Col. Streight:

April 9th, 1863.

The written instructions you have received, are designed to cover the cases you allude to. It is not necessary that a manufactory be directly in the employ of the rebels, to come under the rule there laid down. If it produces any considerable quantity of supplies, which are likely to reach the rebel army, it is to be destroyed. Of course, small mills, that can only supply the necessities of life to the inhabitants,

should not be injured. Any considerable amount of supplies likely to reach the rebel army, are to be destroyed. If you dress your soldiers in the costume of the enemy, they will be liable to be treated as spies: you should not do this without the consent of the men, after they have been fully advised of the consequences.

J. A. GARFIELD,

Brigadier-General and Chief of Staff.

Under these instructions, Col. Streight embarked on steamers at Nashville, with his command, and landed near Fort Donelson on the Cumberland river. He then proceeded across the country to the Tennessee river, while the steamers descended to the Ohio and came up the Tennessee to meet him. Thence he proceeded to Eastport, and formed a junction with Gen. Dodge's force then marching upon Tusculumbia, and defeated the Confederate troops stationed there, with considerable loss to them. Thence he moved to Northern Georgia, aiming to reach the important points of Rome and Atlanta. Meanwhile Gen. Dodge, with his force, turned southward, to make a sweeping raid in Northern Alabama, and return to his headquarters at Corinth.

No sooner had Col. Streight commenced his march than information of his movements was received by Gen. Forrest and Col. Roddy, who, with a cavalry force, happened to be within striking distance. By a rapid movement they came upon the rear of Col. Streight, and commenced a running fight, which continued for four days, during which there were two severe battles and several spirited skirmishes. The Federal troops thus marched over a hundred miles toward the heart of the State, destroying bridges, and large supplies of corn collected for the Confederate army, a large foundry for the manufacture of cannon and shot, and seizing all the animals needed. Strict discipline was also maintained, and the inhabitants were not needlessly harassed. The Confederate force finally increased to overwhelming numbers, and Col. Streight, having expended his ammunition, and his men becoming exhausted, was compelled to surrender at a point fifteen miles from Rome, in Georgia. His men, numbering thirteen hundred, were paroled and sent to Virginia, and exchanged about two months afterward. But his officers were retained and imprisoned, on the demand of the Governor of Georgia, by whom they were claimed as having incurred the penalty fixed by a statute of the State for inciting slaves to rebellion. It was charged, at the time of the surrender, that negroes were found in Col. Streight's command, who were uniformed and bearing arms. This was denied by the privates, who asserted that only five or six negroes were with the command, and they had started with it from Nashville. This imprisonment of Col. Streight caused the Federal Government to suspend the exchange of Confederate officers, and subsequently to imprison Gen. John Morgan and his officers in the penitentiary of Ohio. Col. Streight was then released from imprisonment as a felon, and, subsequently, Gen. Morgan escaped.

At this time, the authorities at Washington were led to believe that large detachments were going from Gen. Bragg's army to reënforce Gen. Johnston in Mississippi. Gen. Rosecrans was therefore urged to take advantage of this opportunity to drive Gen. Bragg back into Georgia, and thus secure East Tennessee from the possession of the enemy. Gen. Burnside was also ordered to coöperate with him. The following correspondence occurred between Gens. Halleck and Rosecrans:

MURFREESBORO, TENN., June 11th, 1863.

Your despatch of to-day is received. You remember that I gave you, as a necessary condition of success, an adequate cavalry force. Since that time I have not lost a moment in mounting our dismounted cavalry as fast as we could get horses. Not more than three hundred remain to be mounted. The 5th Iowa, ordered up from Donelson, arrived to-day. The 1st Wisconsin will be here by Saturday. My preliminary infantry movements have nearly all been completed, and I am preparing to strike a blow that will tell. But to show you how differently things are viewed here, I called on my corps and division commanders and generals of cavalry, for answers in writing to the questions:

First—From your best information, do you think the enemy materially weakened in our front? Second—Do you think this army can advance at this time with reasonable prospect of fighting a great and successful battle? Third—Do you think an advance advisable at this time? To the first, eleven answered no; six, yes, to the extent of ten thousand. To the second, four, yes, with doubts; thirteen, no. To the third, not one yes; seventeen, no.

Not one thinks an advance advisable until Vicksburg's fate is determined. Admitting these officers to have a reasonable share of military sagacity, courage, and patriotism, you perceive that there are graver and stronger reasons than probably appear at Washington, for the attitude of this army. I therefore counsel caution and patience at headquarters. Better wait a little to get all we can ready to insure the best result. If, by so doing, we, perforce of Providence, observe a great military maxim—not to risk two great and decisive battles at the same time—we might have cause to be thankful for it. At all events you see that, to expect success, I must have such thorough grounds that when I say "Forward," my word will inspire conviction and confidence where both are now wanting. I should like to have your suggestion.

W. S. ROSECRANS, Major-General.

To Maj.-Gen. H. W. HALLECK, General-in-Chief.

WASHINGTON, June 12th, 1863.

GENERAL: Your telegram of yesterday is just received. I do not understand your application of the military maxim not to fight two great battles at the same time. It will apply to a single army, but not to two armies acting independently of each other. Johnston and Bragg are acting on interior lines between you and Grant, and it is for their interest, not ours, that they should fight at different times, so as to use the same force against both of you. It is for our interest to fight them, if possible, while divided. If you are not strong enough to fight Bragg with a part of his force absent, you will not be able to fight him after the affair at Vicksburg is over, and his troops return to your front.

There is another military maxim, that "councils of war never fight." If you say that you are not prepared to fight Bragg, I shall not order you to do so, for the responsibility of fighting or refusing to fight at a particular time or place, must rest upon the general in immediate command. It cannot be shared by a council of war, nor will the authorities here make you fight against your will. You ask me to counsel them to caution and patience. I have done so very often,

but after five or six months of inactivity, with your force all the time diminishing and no hope of any immediate increase, you must not be surprised that their patience is pretty well exhausted. If you do not deem it prudent to risk a general battle with Bragg, why can you not harass him, or make such demonstrations as to prevent his sending more reënforcements to Johnston? I do not write this in a spirit of fault finding, but to assure you that the prolonged inactivity of so large an army in the field is causing much complaint and dissatisfaction, not only in Washington, but throughout the country.

Very respectfully, your obedient servant,

H. W. HALLECK, General-in-Chief.
Maj.-Gen. ROSECRANS, Murfreesboro, Tenn.

HEADQUARTERS DEPARTMENT OF THE CUMBERLAND, }
MURFREESBORO, June 21st, 1863. }

GENERAL: In your favor of the 12th inst., you say you do not see how the maxim of not fighting two great battles at the same time, applies to the case of this army and to Grant's. Looking at the matter practically, we and our opposing forces are so widely separated, that for Bragg to materially aid Johnston, he must abandon our front substantially, and then we can move to our ultimate work with more rapidity, and less waste of material on natural obstacles. If Grant is defeated, both forces will come here, and then we ought to be near our base. The same maxim that forbids, as you take it, a single army fighting two great battles at the same time—by the way, a very awkward thing to do—would forbid this nation's engaging all its forces in the great West at the same time, so as to leave it without a single reserve to stem the current of possible disaster. This is, I think, sustained by high military and political considerations. We ought to fight here, if we have a strong prospect of winning a decisive battle over the opposing force, and upon this ground I shall act. I shall be careful not to risk our last reserve without strong grounds to expect success.

W. S. ROSECRANS, Major-General.

Maj.-Gen. H. W. HALLECK, General-in-Chief.

On the 24th of June, Gen. Rosecrans commenced a series of movements for the purpose of bringing on a conflict between his forces and those under the command of Gen. Bragg, or to cause the latter to retire. His plan was to create the impression of a main advance from Murfreesboro upon Gen. Bragg's centre and left, by feint movements and demonstrations with the smaller portion of the army in the direction of Shelbyville, while the decisive blow should be struck by marching rapidly with the main body upon Gen. Bragg's right, and, after turning or defeating it, to move upon Tullahoma, by way of Manchester. Thus he would seize the enemy's base and lines of communication from that point.

The twentieth corps, under Gen. McCook, was selected to make the advance on the right. About 7 o'clock on the morning of the 24th, the division of Gen. Sheridan advanced on the Shelbyville road, preceded by five companies of the 30th Indiana mounted infantry, under Lieut.-Col. Jones. As it came in sight of the enemy's outposts, it halted and bivouacked on each side of the road in the wood. The divisions of Gens. Johnson and Davis advanced six miles on the same road, and then turned to the left on the road to Liberty Gap.

The morning was stormy, but, before day-break, the mounted infantry, under Col. Wilder, marched along the road leading to Manchester,

followed by Gen. Reynolds with the remainder of his division. After some hours, Gens. Negley and Rousseau followed in the same direction. The instructions to Col. Wilder were to advance within a few miles of Hoover's Gap, and there halt until the infantry came up, and then to carry the works. Learning, however, that the works commanding the Gap were not occupied, he moved forward and took possession of them, before the enemy were sufficiently aware of his approach to make any serious resistance. At the same time he pushed forward to the other extremity of the Gap, and took up a position commanding the road and the enemy's camp. In this movement he captured a train of nine wagons and a drove of beef cattle. The enemy immediately prepared for an attack, and came on in such overwhelming numbers that they would have been successful, had not reinforcements arrived to the aid of Col. Wilder. The fighting continued for two hours, during which the loss of the command was sixty-three killed and wounded. The loss of the enemy was represented by prisoners as exceeding five hundred.

Meanwhile, the portion of the corps of Gen. McCook which took the road to Liberty Gap, encountered a force of the enemy near the entrance of the Gap. Gen. Willich, whose brigade led the column, was ordered by Gen. Johnson to drive the enemy. This was done so promptly that their tents, baggage, and supplies were captured. Col. Baldwin was then sent forward to clear the upper end of the Gap, where the enemy were soon found, in a force consisting of a brigade of infantry and a battery of artillery. After a sharp and short combat they were driven out, and their position occupied. On the next day, Gen. Johnson held the position which his command had won, in order to continue the delusion of the enemy as to the real designs of Gen. Rosecrans. Skirmishing was kept up by the enemy along the front, and, between three and four o'clock in the afternoon, a formal attack in line of battle was made. A sharp struggle ensued, but after two hours the enemy abandoned the contest. The occupation of these gaps gave to Gen. Rosecrans the command of the position, and as soon as he advanced through them to Manchester and Winchester, he flanked Gen. Bragg at Tullahoma, and obliged him to retreat. This was commenced at once; and on the first of July, Gen. Rosecrans, learning of the retreat of Gen. Bragg, rapidly advanced his forces. Gen. Thomas moved on the Manchester road, and Gen. McCook on the one from Tullahoma. Gen. Thomas moved rapidly, in order to strike the enemy, who were moving directly east to the military road, five miles east of the railroad, and parallel with it. The enemy however, reached the crossing of Elk river before he was overtaken by the advance of Gen. Thomas. The division of Gen. Negley encountered the rear of Gen. Hardee at a point

four miles north of Elk river. The resistance made here by Gen. Wheeler was so stubborn, that Gen. Negley was delayed until the trains of the enemy had crossed the river. During the night, their reserve of artillery, consisting of twenty-six pieces, crossed the river at Estelle Springs, and reached Tin Mountain. After crossing, the rear of the enemy burned the bridges, and took up positions in works hastily thrown up on the opposite side, in order to delay the crossing of Gen. Thomas as long as possible, and to enable their infantry and trains to get into the mountains. At the same time heavy rains commenced, and the river rose very high. Gen. Crittenden took possession of the road from Decherd through Tracy City to Chattanooga, and thus forced Gen. Bragg to take the roads across the mountains. On the 2d, Gen. McCook moved so as to flank the road to Winchester and the mountains. At the same time, Gens. Rosecrans and Brannan moved to the upper crossing of Rock creek, to strike the rear of the enemy, who were to be detained by Gen. Negley. But Gen. Negley, mistaking the firing of a cavalry brigade on the right flank of the enemy for that of Gen. Rosecrans, opened with two batteries, and caused them to retreat precipitately to the mountains. On the morning of July 4th, the whole Federal force advanced to the foot of the mountains at Cowan, and found the enemy in full retreat upon Chattanooga. At the same time, Shelbyville was occupied by Gens. Stanley and Granger, and the former pushed on as far as Huntsville in Alabama.

This retreat of Gen. Bragg from Tennessee had a demoralizing effect upon his forces, and discouraged the friends of the Confederacy in Tennessee. The result of these operations of Gen. Rosecrans thus far was to recover Middle Tennessee, and to preserve Kentucky from an invasion. His losses in these operations were 85 killed, 462 wounded, and 13 missing. The loss of the enemy in killed and wounded is unknown, but 1,634 were made prisoners, and six pieces of artillery, many small arms, much camp equipage, and large quantities of commissary and quartermaster's stores were taken.

Gen. Bragg, having returned to Chattanooga on the south side of the Tennessee river, now fortified his position, and threw up defensive works at the crossing of the river and as far up as Blythe's Ferry.

The first object of Gen. Rosecrans was to repair the railroad from Nashville to Stevenson in Alabama. At Stevenson the Nashville railroad unites with the Memphis and Charleston road. Stevenson is thirty-seven miles west of Chattanooga, on the line of the latter road. Having completed his preparations, Gen. Rosecrans commenced his movement on Chattanooga and its covering mountain ridges on the southeast, on the 16th of August. On that day, Gen. Thomas moved from Decherd, with the division of Gen. Payne in advance. This divis-

ion had been stationed at the University on the Cumberland mountains. The corps moved over the mountains on a line nearly parallel with the Nashville railroad to Stevenson: it crossed the Tennessee river at or near Bridgeport, Alabama, by a pontoon bridge. On the 16th, Gen. Johnson's division of Gen. McCook's corps left Tullahoma, and passed through Winchester on the forenoon of the 17th. Gen. Davis's division followed in the afternoon. Gen. Sheridan's division moved from Cowan on the same day, and joined the rest of the corps at Salem, ten miles from Winchester, on the Huntsville road. There the corps moved in column, accompanied by its artillery and baggage, crossing the mountains, and striking the Tennessee river at Bellefonte, Alabama, twelve miles east of Stevenson. Gen. Crittenden's corps moved eastward to feel the strength of the enemy, and to cross north of Chattanooga. The front of the entire movement extended from the head of Sequatchie valley in East Tennessee to Athens in Alabama, thus threatening the line of the Tennessee river from Whitesburg to Blythe's Ferry, a distance of one hundred and fifty miles.

On the 26th, a part of Gen. Davis's division crossed at Caperton's Ferry, about six miles below Bridgeport. The remainder of the division followed in a few days, and also Gen. Johnson's division of the same corps; on the 2d of September, Gen. Sheridan, of the same corps, crossed at Bridgeport, followed by the infantry and artillery of Gen. Brannan's division. Gen. Negley, of Gen. Thomas's corps, crossed at the same time at Caperton's Ferry. By the 8th of September, Gen. Thomas had moved on Trenton in Georgia, having seized Frick's and Stevens's Gaps on the Lookout mountain. Gen. McCook had advanced to Valley Head and taken Winston's Gap, while Gen. Crittenden had crossed to Wauhatchie, communicating on the right with Gen. Thomas, and threatening Chattanooga by the pass over the point of Lookout mountain. The first mountain barrier south of the Tennessee being thus successfully passed, Gen. Rosecrans decided to threaten the enemy's communication with his right, while the centre and left seized the gaps and the commanding points of the mountains in front. On the 9th, Gen. Crittenden made a reconnoissance which developed the fact that the enemy had evacuated Chattanooga on the day and night previous. The corps of Gen. Crittenden therefore took immediate possession of Chattanooga, which had been the object of the campaign, while Gen. Rosecrans, with the remainder of the army, pressed forward through the difficult passes of the Lookout mountain, apparently directing his march upon Lafayette and Rome.

At the same time when Gen. Rosecrans commenced his forward movement on the 16th of August, Gen. Burnside left Camp Nelson in Kentucky for East Tennessee. Gen. Burnside assumed command of the Department of Ohio

in March. On the 30th of that month, Gen. Gillmore engaged and defeated a large force of the enemy under Gen. Pegram, near Somerset, Kentucky. The other operations which had taken place consisted of an attempted raid in Harrison county, Indiana, from which the enemy were driven back with a loss of fifty-three made prisoners; a movement under Col. Saunders, with two pieces of artillery, the first Tennessee cavalry and some detachments from Gen. Carter's command, by which the railroad near Knoxville and the bridges at State creek, Strawberry Plains, and Mossy creek were destroyed, and ten pieces of artillery, one thousand stand of arms, and five hundred prisoners were captured, with a loss of one killed, two wounded, and a few missing; also the raid of Gen. Morgan into Kentucky, Indiana, and Ohio, which is stated on a previous page. The departure of the ninth army corps to reinforce Gen. Grant, delayed somewhat Gen. Burnside's preparations for an active campaign in East Tennessee. The necessity, however, of his coöperating with the movements of Gen. Rosecrans, compelled him to take the field without awaiting the return of this corps.

At this time Gen. Buckner was in command of the Confederate forces in East Tennessee, with his headquarters at Knoxville. His force numbered about twenty thousand men, who were not supplied in the best manner with ordnance. This force was sufficient to have retarded the progress of Gen. Burnside through either the Cumberland, Big Creek, or Wheeler's Gap in the mountains; but he avoided that route. Concentrating his forces at Crab Orchard, on the southerly edge of Lincoln county, Kentucky, Gen. Burnside prepared for the movement over the mountains. The infantry were mounted, the cavalry and artillery were furnished with picked horses, and the division was attended with large droves of packed mules, loaded with commissary stores, in order that its movements might not be impeded by the slow progress of wagon trains. On the afternoon of August 21st the march commenced, with Gen. S. P. Carter in the advance. After an advance of thirteen miles, a halt was made at Mt. Vernon, the capital of Rockcastle county, Ky. On the 23d the march commenced at 4 A. M., and was continued over some of the wildest and most mountainous parts of Kentucky, twenty-six miles, to London. On the next morning the army was in motion toward Williamsburg, the capital of Whitley county, Ky., twenty-nine miles distant. On the 25th there were heavy rains, and no movement was made. On the 26th the movement continued to the place where the roads from Somerset and Williamsburg meet, about four miles beyond the State line, in Scott county, Tennessee. Here the army rested during the 27th and 28th, and was joined by Maj.-Gen. Hartsuff. On the 29th the movement was continued, with the mounted brigade of Gen. Shackelford in the advance. At midnight the banks of the New river were

reached, and the next day the army encamped at Montgomery, in Morgan county, Tennessee, having made, during the two days, a march of forty miles. The movement continued on the 31st, and, on the 1st of September, Gen. Burnside, with an escort, proceeded to Kingston, while the army took a shorter road to Loudon bridge, leaving Kingston to its right. At Loudon, the East Tennessee and Georgia railroad crossed the Holston river over a fine bridge more than two thousand feet in length. To save or to destroy this bridge, as the situation should demand, was undoubtedly one of the objects of the forced march. The distance from Knoxville is thirty-nine miles. The artillery came into position, on the 2d, within easy range of this bridge, just in time to see the rear of the enemy pass over and apply the torch to the structure. It was entirely consumed. By the fire of the artillery several of the enemy were killed and wounded. The march then continued to Leoni Station, twenty-two miles from Knoxville. On the next day it was resumed to Knoxville, which had been occupied on the 1st by the advance. As Gen. Burnside approached Knoxville the inhabitants turned out to welcome him. His reception is thus described by a spectator: "As we neared Knoxville, the evidences of the intense devotion to the Union dwelling in the hearts of the people became more and more apparent. Along the entire route, especially the last ten or fifteen miles, the whole population seemed gathered on the roadside to give welcome to the Yankees. On the appearance of Gen. Burnside on the outskirts of the town, the news of his arrival spread, and everybody, rich and poor, the lame and the halt, rushed out to greet him. It was no vulgar curiosity to see a man famous in the world's history—it was the greeting of an oppressed people to their deliverer. Uncovered, and at a slow pace, the general rode through the streets to his headquarters. His progress was constantly impeded by the rushing of men to his horse's side to seize him by the hand and say, 'God bless you.' On arrival at headquarters, a large crowd assembled in the yard, and were clamorous for speeches. Brig.-Gen. S. P. Carter, a native of East Tennessee, came forward, and in a few words congratulated them on their deliverance. In response to repeated calls, Gen. Burnside then appeared and said, that although his profession was arms, and not speaking, yet he would take the occasion to say that, from the moment he took command of the Department of Ohio, it had been his fervent wish to lead an army into East Tennessee, to their deliverance; and he took great pleasure in saying that he had come with means sufficient, with their assistance, to hold the country permanently and securely.

"On the conclusion of the speaking the garrison flag of the United States was flung from the portico, and the crowd rushed up and seized it in their hands, many of them pressing it to their lips. While this was passing at head-

quarters, the troops had been waylaid all over the city, and carried off by violence to be feasted, without money and without price, on the best which the land afforded. Not officers merely; their bounteous hospitality knew no difference in rank among their deliverers."

At Knoxville, three locomotives and a large number of cars and railroad machine shops were taken possession of. A large train was also captured twelve miles northwest on the road to Virginia. On the 4th a movement was made upon Cumberland Gap. At Tazewell a slight skirmish took place with a small force of the enemy under Col. Carter. At daylight on the morning of the 7th, the Gap was invested, and its surrender demanded by Gen. Shackelford. Gen. Frazier, commanding the enemy's force, refused, and stated that he was prepared to hold out. It appeared that the enemy had a large quantity of grain in the gap, with a mill, which they used to grind it. During the ensuing night an expedition was sent out by Gen. Shackelford, which succeeded in destroying the mill. The enemy still refused to surrender, but on the arrival of Gen. Burnside, on the 9th, terms were agreed upon, and a surrender made unconditionally. The officers, however, were allowed to retain their side arms. About forty wagons, two hundred mules, four thousand pounds of bacon, two thousand bushels of wheat, a large quantity of other stores, and ten pieces of artillery, were surrendered. The number of prisoners was about two thousand. The march of Gen. Shackelford to the Gap, a distance of fifty-two miles, was made in sixty hours.

Meantime a column of cavalry ascended the valley to Bristol, driving the enemy across the Virginia line, and destroyed the railroad bridges over the Holston and Watauga rivers, so as to prevent their return into East Tennessee. The main body of Gen. Burnside's army was now ordered by the general-in-chief to concentrate on the Tennessee river, from Loudon west, so as to connect with Gen. Rosecrans's army, which reached Chattanooga on the 9th of September.

At this time the authorities at Washington were led to believe that Gen. Lee was receiving reinforcements from Gen. Bragg. The slight resistance made by the enemy in East Tennessee, and his abandonment without defence of such an important position as Chattanooga, rendered plausible the reports of spies and deserters from Gen. Lee's army, that reinforcements were arriving there. Fearing, therefore, that Gen. Rosecrans's army might be drawn too far into the mountains of Georgia, where it could not be supplied, and might be attacked before reinforcements could reach it from Gen. Burnside, Gen. Halleck sent the following despatch to Gen. Rosecrans:

HEADQUARTERS OF THE ARMY, WASHINGTON, D. C., }
September 11th, 1863. }

Maj.-Gen. Rosecrans, Chattanooga:

Gen. Burnside telegraphs from Cumberland Gap that he holds all East Tennessee above Loudon, and also the gaps of the North Carolina mountains. A cavalry

force is moving toward Athens to connect with you. After holding the mountain passes, on the west of Dalton, or some other point on the railroad, to prevent the return of Bragg's army, it will be decided whether your army shall move farther south into Georgia and Alabama.

It is reported here by deserters that a part of Bragg's army is reënforcing Lee. It is important that the truth of this should be ascertained as early as possible.

H. W. HALLECK, General-in-Chief.

On the same day the following despatch was sent to Gen. Burnside :

HEADQUARTERS OF THE ARMY, WASHINGTON, D. C., }
September 11th, 1863. }

Maj.-Gen. Burnside, Cumberland Gap :

I congratulate you on your success. Hold the gap of the North Carolina mountains, the line of the Holston river, or some point, if there be one, to prevent access from Virginia, and connect with Gen. Rosecrans, at least with your cavalry. Gen. Rosecrans will occupy Dalton, or some point on the railroad, to close all access from Atlanta, and also the mountain passes in the west. This being done, it will be determined whether the movable force shall advance into Georgia and Alabama or into the valley of Virginia and North Carolina.

H. W. HALLECK, General-in-Chief.

On the next day, Gen. Rosecrans replied that he was sufficiently strong for the enemy then in his front, and that there were indications that the enemy intended to turn his flanks, and cut off his communications ; he therefore decided that Gen. Burnside should move down his infantry toward Chattanooga, on his left, and that Gen. Grant should cover the Tennessee river toward Whitesburg to prevent any raid on Nashville. He was of the opinion that no troops had been sent from Gen. Bragg's army ; but that Gen. Bragg was receiving reënforcements from Gen. Loring in Mississippi.

On the 13th, Gen. Foster, in command at Fortress Monroe, sent a despatch to Washington, stating that trains of cars had been heard running all the time, day and night, for the previous thirty-six hours, on the Petersburg and Richmond railroad, evidently indicating a movement of troops in some direction. On the morning of the 14th, he further stated that Gen. Longstreet's corps was reported to be going south, through North Carolina.

At this time Gen. Meade had been directed to ascertain—by giving battle, if necessary—whether any of Gen. Lee's troops had left. On the 14th he reported to Gen. Halleck as follows : "My judgment, formed on a variety of meagre and conflicting testimony, is, that Gen. Lee's army has been reduced by Gen. Longstreet's corps, and perhaps by some regiments from Gens. Ewell and Hill."

Upon receiving the despatches of the 13th, Gen. Halleck sent the following telegrams to Gens. Burnside, Rosecrans, Hurlbut, Grant, and Sherman :

HEADQUARTERS OF THE ARMY, WASHINGTON, D. C., }
September 13th, 1863. }

Maj.-Gen. Burnside, Knoxville :

It is important that all the available forces of your command be pushed forward into East Tennessee. All your scattered forces should be concentrated there. So long as we hold Tennessee, Kentucky is perfectly safe. Move down your infantry as rapidly as possible toward

Chattanooga, to connect with Rosecrans. Bragg may merely hold the passes of the mountains to cover Atlanta, and move his main army through Northern Alabama, to reach the Tennessee river and turn Rosecrans's right, and cut off his supplies. In this case he will turn Chattanooga over to you, and move to intercept Bragg.

H. W. HALLECK, General-in-Chief.

HEADQUARTERS OF THE ARMY, WASHINGTON, D. C., }
September 13th, 1863. }

Maj.-Gen. Rosecrans, Chattanooga :

There is no intention of sending Gen. Burnside into North Carolina. He is ordered to move down and connect with you. Should the enemy attempt to turn your right flank through Alabama, Chattanooga should be turned over to Burnside, and your army, or such part of it as may not be required there, should move to prevent Bragg from reëntering Middle Tennessee. Hurlbut will aid you all he can, but most of Grant's available force is west of the Mississippi.

H. W. HALLECK, General-in-Chief.

HEADQUARTERS OF THE ARMY, WASHINGTON, D. C., }
September 13th, 1863. }

Maj.-Gen. Hurlbut, Memphis :

I think, from all accounts, that Steele is sufficiently strong. All your available force should be sent to Corinth and Tuscumbia, to operate against Bragg. Should he attempt to turn Rosecrans's right and recross the river into Tennessee, send to Gen. Sherman, at Vicksburg, for reënforcements for this purpose. Gen. Grant, it is understood, is sick in New Orleans.

H. W. HALLECK, General-in-Chief.

HEADQUARTERS OF THE ARMY, WASHINGTON, D. C., }
September 13th, 1863. }

Maj.-Gen. Grant or Maj.-Gen. Sherman, Vicksburg :

It is quite possible that Bragg and Johnston will move through Northern Alabama to the Tennessee river, to turn Gen. Rosecrans's right and cut off his communications. All of Gen. Grant's available forces should be sent to Memphis, thence to Corinth and Tuscumbia, to coöperate with Rosecrans, should the rebels attempt that movement.

H. W. HALLECK, General-in-Chief.

On the 14th, the following telegrams were sent to Gens. Foster, Burnside, and Hurlbut :

HEADQUARTERS OF THE ARMY, WASHINGTON, D. C., }
September 14th, 1863. }

Maj.-Gen. Foster, Fortress Monroe :

Information received here indicates that part of Lee's forces have gone to Petersburg. There are various suppositions for this. Some think it is intended to put down Union feeling in North Carolina, others to make an attempt to capture Norfolk ; others again to threaten Norfolk, so as to compel us to land reënforcements there from the Army of the Potomac, and then to move rapidly against Meade. Such was the plan last spring, when Longstreet invested Suffolk. It will be well to strengthen Norfolk as much as possible, and to closely watch the enemy's movements. I think he will soon strike a blow somewhere.

H. W. HALLECK, General-in-Chief.

HEADQUARTERS OF THE ARMY, WASHINGTON, D. C., }
September 14th, 1863. }

Maj.-Gen. Hurlbut, Memphis :

There are good reasons why troops should be sent to assist Gen. Rosecrans's right with all possible despatch. Communicate with Sherman to assist you, and hurry forward reënforcements as previously directed.

H. W. HALLECK, General-in-Chief.

HEADQUARTERS OF THE ARMY, WASHINGTON, D. C., }
September 14th, 1863. }

Maj.-Gen. Burnside, Knoxville :

There are several reasons why you should reënforce Rosecrans with all possible despatch. It is believed that the enemy will concentrate to give him battle. You must be there to help him.

H. W. HALLECK, General-in-Chief.

At the same time, Gen. Schofield, in command of the Department of Missouri, and Gen. Pope, in command of the Northwest Department, were ordered to send forward to the Tennessee line every available man in their departments; and the commanding officers in Indiana, Ohio, and Kentucky, were ordered to make every possible exertion to secure Gen. Rosecrans's line of communications. Gen. Meade was also urged to attack Gen. Lee's army while in its present reduced condition, or, at least, to prevent him from sending off any more detachments. More troops were not sent into East Tennessee or Georgia, on account of the impossibility of supplying them in a country which the enemy had nearly exhausted. Gen. Burnside's army was on short rations, and that of the Cumberland inadequately supplied.

On the 14th of September, the army of Gen. Rosecrans was occupying the passes of Lookout mountain, with the enemy concentrating his forces near Lafayette, to dispute his further advance. The threatened movements of Gen. Bragg to the right and left proved to be merely cavalry raids to cut Gen. Rosecrans's lines of supplies, and threaten his communication with Gen. Burnside. His main army was only awaiting the arrival of Gen. Longstreet's corps to give battle in the mountains of Georgia. It had already been reënforced by troops from Gen. Johnston in Mississippi, and by the prisoners captured at Vicksburg and Port Hudson, and released on parole, who had been declared by the Confederate authorities to be exchanged.

The line of Gen. Rosecrans's army extended at this time from Gordon's Mills to Alpines, a distance of some forty miles. By the 17th, they were brought within supporting distance, and on the morning of the 18th a concentration was begun toward Crawfish Springs.

The advance of Gen. Rosecrans's army can be traced in a few words. The Tennessee river, west of Chattanooga, in its general direction runs southwest. Skirting it is the Racoon range of mountains. Sand mountain, where the army passed over, is a part of this range. After marching over a plateau of twelve or fifteen miles in width, Sand mountain is descended, and the Lookout valley is gained. This valley is about two miles wide, and runs southwest. It is bounded on the east by the Lookout mountains, running parallel with the Racoon range. The right wing, under Gen. McCook, and the centre, under Gen. Thomas, had been in this valley two or three days when Chattanooga was evacuated. Early on Wednesday, the 9th, both corps were in motion to pass the Lookout range. They had only two passes by which to cross—one eight miles south of Trenton, and the other at Valley Head, more than twenty miles south of Trenton. At Valley Head the rugged mountain melts away into a wild scattering of hills, near which the road is abruptly turned through winding valleys, with a steep and stubborn spur before the summit is gained. After reaching the summit, a plateau gently

rolling, about twelve miles in width, is found. There are groves and fields, and smooth-flowing streams, where the imagination pictured crags and cascades. At Valley Head, Gen. McCook's corps passed over Lookout mountain, and reached Alpines, in the valley, called Broomtown valley, on the 10th. Gen. Thomas took the middle gap, and passed through without opposition. At the same time Gen. Crittenden moved south of Chattanooga toward Gordon's Mills, a distance of twelve miles. Bounding Broomtown valley, on the east, is another parallel ridge, known as Taylor's ridge. It is not a formidable barrier, and is crossed by a number of good roads toward Lafayette, where Gen. Bragg was. The first opposition to the present advance of the army took place at Alpines, on Wednesday, the 9th, when a cavalry division had a brisk fight with the enemy, which continued two hours, with the loss of four killed and twelve wounded. The enemy retired, leaving a few dead. When Gen. Thomas passed through the central gap, he found himself in McLemore's Cove or valley, a strip of country enclosed between Lookout mountain and Pigeon mountain, a spur of Lookout, striking northeast from it, and gradually melting away as it approaches the Chickamauga river. To reach the same valley in which Gen. McCook's corps was, Gen. Thomas was compelled to pass through one of the gaps of Pigeon mountain. He therefore, on the 12th, ordered Gen. Negley to feel his way through the central pass. In obeying the order he was suddenly attacked by the divisions of Gens. Witters and Stuart, of Gen. Bragg's army, upon his front and flanks, with such energy as compelled his hasty retreat, with a loss of some forty killed and wounded. The advance of Gen. Rosecrans's army thus far in pursuit of the enemy, had been made under the impression that, as Chattanooga had fallen without resistance, Gen. Bragg was weak, and the Confederate Government unable to reënforce him; there would, therefore, be no fight north of the Coosa river. This sudden show of strength against Gen. Negley, therefore, created alarm. The question now was, whether this demonstration of the enemy indicated a purpose of giving battle, or whether it was a movement to secure a safe retreat. Gen. Rosecrans decided it to be the former. The next day, Gen. McCook was moving back over the Lookout mountain, with orders to close on the centre, and Gen. Crittenden, at Gordon's Mills, put in a good defensive position.

Lafayette, the capital of Walker county, thirty-two miles from Chattanooga, and eighteen from Dalton, was supposed to be the place where the enemy were concentrating. In their front was the Pigeon mountain. This range was the highest at the southern extremity, where it is separated from the Lookout mountain by Doherty Gap, a long and heavy pass. Two miles north is a less elevated gap, called Rape; seven miles farther north is Blue Bird,

a rugged pass; three miles farther is Dug Gap, affording a good passage for an army. This was easily defended, and held by Gen. Bragg. Two and a half miles farther is Catlet's, through which runs a mountain stream and a good road; this was also held by Gen. Bragg. Two miles farther is Worthing, a rough road over the mountain, and impassable for artillery. Wicker is a good wagon road, where the mountain has diminished to a hill; a mile and a half beyond, an undulating country commences. The country lying between Pigeon and Lookout mountains is called McLemore's Cove, as above stated, about twenty miles long and eight broad. West of Pigeon mountain is Chickamauga valley, which separates it from Missionary ridge, a mere range of hills, and west of which is another valley separating the latter from Lookout mountain. This last range runs up within two miles of Chattanooga, and terminates abruptly at the Tennessee river, with a bluff two thousand feet high.

At the time of the repulse of Gen. Negley was the most favorable moment for Gen. Bragg to attack Gen. Rosecrans. The corps of Gen. McCook was separated from Gen. Thomas by a march of nearly three days. Gen. Crittenden could not reinforce Gen. Thomas without exposing Chattanooga, and Gen. Thomas could not move to Gen. Crittenden's position without exposing Gen. McCook. Slow as Gen. Bragg was in collecting his forces and advancing, the great battle which followed was begun before Gen. Rosecrans had recovered from the results of the position of his forces. Gen. McCook joined Gen. Thomas on the 17th, with his weary troops, and as heavy clouds of dust were discovered on Pigeon mountain by the signal officers, his corps and the right of the centre were formed into line of battle, which was maintained all the afternoon in McLemore's Cove. As the morning of the 18th broke, gray and chilly, the troops were ordered on the march. Gen. Thomas's corps pressed on toward Gordon's Mills, and Gen. McCook's moved up directly in his rear. At Gordon's Mills, Gen. Ward was stationed with two brigades. During the forenoon of this day, Gen. Granger, situated on the left of Gen. Ward, made a reconnoissance across the Chickamauga at Reid's bridge, with two brigades, and ascertained beyond a doubt that Gen. Longstreet's corps had joined Gen. Bragg. Cols. Minty and Wilder were sent with their commands, the former to watch Ringgold road crossing, and the latter to resist any advance from Napier Gap. Early in the afternoon the enemy made an attack from the two roads. Heavy cannonading ensued, but Cols. Minty and Wilder held their ground gallantly until a body of the enemy's infantry, having crossed at one of the several fords in the river, was fast gaining their rear, when they were compelled to retire. This proved to be the extreme left of the enemy.

Toward evening, Gen. McCook's corps pitched their tents at Lee's Mills, in McLemore's

Cove; but hardly was this done before an order from Gen. Rosecrans directed them to move northward to Pond Spring, seventeen miles south of Chattanooga. Wearied as were the men, they marched silently and without straggling. All night there was a constant rumbling of wagons, and a ceaseless tread of troops. Gen. Crittenden being ahead of Gen. Thomas, had thrown Gen. Van Cleve's division on the left of Gen. Wood at Gordon's Mills, and Gen. Palmer's on his right, Gen. Thomas pushed still farther to the left. Gen. Johnson's two brigades were given to Gen. Thomas, and posted on Gen. Van Cleve's left, while Gen. Negley, who was already in position at Owen's Gap, a short distance south of Crawfish Spring, thirteen miles from Chattanooga, was ordered to remain there, and temporarily attached to Gen. McCook's corps.

The operations of the Confederate army up to this time had been as follows: In consequence of the flank movement of Gen. Rosecrans on the right of Gen. Bragg, in the month of June, the latter retreated from Shelbyville and Tullahoma toward Chattanooga, which was occupied in the first week of July. The brigade of Gen. Anderson, of Gen. Polk's corps, was ordered to Bridgeport for purposes of observation. The remainder of the corps of Gen. Polk was retained in and around Chattanooga; and Gen. Hardee's corps was distributed along the line of the railroad to Knoxville, with Tyner's Station, nine miles from Chattanooga, as the centre. The headquarters of Gen. Bragg were at Chattanooga. On the 21st of August the corps of Gen. Crittenden succeeded in reaching the town with artillery, from the heights overlooking the Tennessee river and the town. This bombardment was regarded by the enemy as announcing that Gen. Rosecrans's plans were completed and about to be executed. The effect was to cause the removal of Gen. Bragg's headquarters beyond the range of fire, and the removal of stores to points of convenience on the railroad in the rear, and the withdrawal of Gen. Anderson from Bridgeport. In consequence of the advance of Gen. Burnside into East Tennessee, the Confederate Gen. Buckner was now ordered to evacuate Knoxville and occupy Loudon; and in consequence of a demonstration reported to have been made by Gen. Rosecrans at Blythe's Ferry, on the Tennessee river, opposite the mouth of the Hiawassee, he was further ordered to fall back from Loudon to Charleston, and, soon after, to the vicinity of Chattanooga. On the 1st of September, Gen. Bragg was informed of the crossing of Gen. Rosecrans at Caperton's Ferry for three days, and that he was moving across Sand mountain, in the direction of Wills's valley and Trenton. This report was regarded by him as incredible, but soon after confirmed by the occupation of Trenton by Federal cavalry and by its advance up the Wills's valley railroad in the direction of Chattanooga as far as Wauhatchee, within seven miles, as a covering

force to the advance of the infantry column at Trenton.

The following topographical view will assist in the comprehension of the subsequent movements: Chattanooga is situated on the Tennessee river, at the mouth of the Chattanooga valley—a valley following the course of the Chattanooga creek, and formed by Lookout mountain and Missionary ridge. East of Missionary ridge, and running parallel with it, is another valley—Chickamauga valley—following the course of Chickamauga creek, which, like the Chattanooga creek, discharges its waters into the Tennessee river—the first above, and the last below the town of Chattanooga, and has with it a common source in McLemore's Cove, the common head of both valleys, and formed by Lookout mountain on the west and Pigeon mountain to the east. Wills's valley is a narrow valley, lying to the west of Chattanooga, formed by Lookout mountain and Sand mountain, and traversed by a railroad, which takes its name from the valley, and which, branching from the Nashville and Chattanooga railroad, where the latter crosses the valley, has its present terminus at Trenton, and future at Tuscaloosa, Alabama. The distance of Bridgeport from Chattanooga is twenty-eight miles, of Caperton's Ferry about forty, and of Trenton something over twenty. Ringgold is eighteen miles from Chattanooga, on the Georgia State road, and Dalton some forty, at the point where the Georgia State road connects with the East Tennessee railroad. Rome is sixty-five miles southwest of Chattanooga, on the Coosa river, at the point of confluence of the Etowah and Oostenaula. The wagon road from Chattanooga to Rome, known as the Lafayette road, crosses Missionary ridge into Chickamauga valley at Rossville, and, proceeding in a southwesterly direction, crosses Chickamauga creek, eleven miles from Chattanooga, at Lee's and Gordon's Mills, and, passing to the east of Pigeon mountain, goes through Lafayette, distant some twenty-two miles from Chattanooga, and Summerville, within twenty-five miles of Rome. From Caperton's Ferry there is a road leading over Sand mountain into Wills's valley at Trenton, and from Trenton to Lafayette and Dalton, over Lookout mountain, through Cooper's and Stevens's Gap into McLemore's Cove, and over Pigeon mountain by Plug Gap. The road from Trenton, following Wills's valley, exposed, by easy communications, Rome, and, through it, Western Georgia and Eastern Alabama, with easy access to the important central positions, Atlanta and Selma.

Gen. Bragg, believing that a flanking movement was the object of Gen. Rosecrans by his advance on the left, ordered Lieut.-Gen. Hill, on Monday, September 7th, to move with his corps toward Lafayette, Gen. Polk to Lee's and Gordon's Mills, and Maj.-Gen. Buckner, with the Army of East Tennessee, and Maj.-Gen. Walker, with his division from the Army of Mississippi, to concentrate at Lafayette, and

Brig.-Gen. Pegram to cover the railroad with his cavalry. These dispositions having been made of the Confederate forces, Maj.-Gen. Crittenden, commanding the left wing of the Federal army, which had not moved with the right and centre, but had been left in the Sequatchie valley, crossed the Tennessee river at the mouth of Battle creek, and moved upon Chattanooga. Maj.-Gen. McCook, commanding the right wing, was thrown forward to threaten Rome, and the corps of Maj.-Gen. Thomas was put in motion over Lookout mountain, in the direction of Lafayette.

A charge of incapacity was subsequently made against Gen. Bragg, because he did not at this time fall upon Gen. Thomas with such a force as would have crushed him; then turned down Chattanooga valley, throwing himself between the town and Gen. Crittenden, and crushed him; then passed back between Lookout mountain and the Tennessee river into Wills's valley, and cut off Gen. McCook's retreat to Bridgeport; thence moved along the Cumberland into the rear of Gen. Burnside, and defeated him. But Gen. Bragg now threw a force forward into McLemore's Cove, which resisted the advance of Gen. Thomas, as above stated. It was on such a limited scale as only to check this advance, and was thence withdrawn to Lafayette. Within thirty-six hours after this force retired, Gen. Rosecrans had recalled Gen. McCook, and concentrated him with Gen. Thomas in McLemore's Cove. Meantime, Gen. Crittenden, after occupying Chattanooga, did not stop to fortify it, but moved on toward Ringgold to cut off Gen. Buckner, who was understood to be moving to the support of Gen. Bragg. On reaching the point on the Georgia railroad at which Gen. Buckner crossed, and discovering that he was too late, he turned toward Lafayette to follow him. Moving up the Chickamauga, on the east side, he was confronted by a force of Confederate cavalry under Gens. Pegram and Armstrong, which retired before him until supported by a large body of infantry, when Gen. Crittenden, declining a battle, fell back on the Chickamauga, and crossed at Gordon's Mills. This brought the whole of Gen. Rosecrans's force on the west side of the Chickamauga within easy supporting distance.

Gen. Bragg now moved his army by divisions, and crossed the Chickamauga at several fords and bridges north of Gordon's Mills, up to which he ordered the Virginia troops, which had crossed many miles below, and near to which he attempted to concentrate. At this time the right of Gen. Rosecrans really rested on Gordon's Mills. Gen. Thomas had moved on until his left division, under Gen. Brannan, covered the Rossville road. Gen. Baird was on Gen. Brannan's right, then followed successively Gens. Johnson's, Reynolds's, Palmer's, and Van Cleve's divisions. Gen. Wood covered Gordon's Mills ford. Gen. Negley, four miles farther south, held Owen's Gap. Gens. Davis

and Sheridan were on the march south of Gen. Negley. Gen. Wilder, with four regiments and a light battery, was posted at the right, near Gordon's Mills. Gen. Gordon Granger's forces were held in reserve some distance back on the Rossville road. Such was the position on Saturday, the 19th. The battle which now ensued opened about ten o'clock. The first attack of the enemy was upon the left wing of Gen. Rosecrans, which the enemy endeavored to turn, so as to occupy the road to Chattanooga. But all their efforts for this object failed. The centre was next assailed and temporarily driven back, but, being promptly reinforced, maintained its ground. As night approached, the battle ceased and the combatants rested on their arms. Gen. Bragg now issued an order dividing the forces of his army into two corps or wings. The right was placed under the command of Lieut.-Gen. Polk, and the left under Lieut.-Gen. Longstreet. The former was composed of Lieut.-Gen. Hill's corps of two divisions, under Maj.-Gen. Cleburn and Maj.-Gen. Breckinridge; with the division of Maj.-Gen. Cheatham, of Lieut.-Gen. Polk's corps, and the division of Maj.-Gen. W. H. T. Walker. The left was composed of the divisions of Maj.-Gen. Stewart, and Brig.-Gens. Preston Johnston, of Maj.-Gen. Buckner's corps; with Maj.-Gen. Hindman's, of Lieut.-Gen. Polk's corps, and Gens. Benning's and Lane's and Robertson's brigades of Maj.-Gen. Hood's division, and Gens. Kershaw's and Humphrey's, of Maj.-Gen. McLaws's division. The front line of the right wing consisted of three divisions, Breckinridge's, Cleburn's, and Cheatham's, which were posted from right to left in the order named. Maj.-Gen. Walker was in reserve. The line of the left wing was composed of Stewart's, Hood's, Hindman's, and Preston's divisions, from right to left, in the order named.

Toward morning of the next day the army of Gen. Rosecrans changed its position slightly to the rear, and contracted the extended lines of the previous day. Trains were moving northward on all the roads in the rear of Chattanooga, and the wounded were taken from the hospitals, which had become exposed by the concentration of the forces to the left. Gen. Thomas still held the left, with the divisions of Gens. Palmer and Johnson attached to his corps and thrown in the centre. Gen. Brannan was retired slightly, with his regiments arrayed in echelon. Gen. Van Cleve was held in reserve on the west side of the first road in the rear of the line. Gens. Wood, Davis, and Sheridan followed next, the latter being on the extreme left. Gen. Lytle occupied an isolated position at Gordon's Mills.

Orders were given by Gen. Bragg to Lieut.-Gen. Polk to commence the attack at daylight on the next morning. These orders were immediately issued by him; but prior to giving the order to move forward to the attack in the morning, Gen. Polk discovered that, owing to a want of precaution, a portion of the left wing,

amounting to a whole division, had been formed in front of his line, and that if the order to make the attack at daylight was obeyed, this division must inevitably be slaughtered. The battle was finally opened about half past nine A. M., by a forward movement of Gen. Breckinridge, accompanied by Gen. Cleburn, against the left and centre of Gen. Rosecrans. Division after division was pushed forward to assist the attacking masses of the enemy, but without success. The ground was held by Gen. Thomas for more than two hours. Meantime, as Gen. Reynolds was sorely pressed, Gen. Wood was ordered, as he supposed, to march instantly by the left flank, pass Gen. Brannan, and go to the relief of Gen. Reynolds, and that Gens. Davis and Sheridan were to shift over to the left, and close up the line. Gen. Rosecrans reports that the order was to close up on Gen. Reynolds. Gen. Wood says that Gen. Brannan was in line between his and Gen. Reynolds's division.

A gap was thus formed in the line of battle, of which the enemy took advantage, and, striking Gen. Davis in his flank and rear, threw his whole division into confusion. Passing through this break in Gen. Rosecrans's line, the enemy cut off his right and centre, and attacked Gen. Sheridan's division, which was advancing to the support of the left. After a brave but fruitless effort against this torrent of the enemy, he was compelled to give way, but afterward rallied a considerable portion of his force, and by a circuitous route joined Gen. Thomas, who had now to breast the tide of battle against the whole army of the enemy. The right and part of the centre had been completely broken, and fled in confusion from the field, carrying with them to Chattanooga their commanders, Gens. McCook and Crittenden, and also Gen. Rosecrans, who was on that part of the line. Gen. Garfield, his chief of staff, however, made his way to the left and joined Gen. Thomas, who still retained his position. His ranks had now assumed a crescent form, with his flanks supported by the lower spurs of the mountain, and here, "like a lion at bay, he repulsed the terrible assaults of the enemy."

About half past three P. M., the enemy discovered a gap in the hills, in the rear of the right flank of Gen. Thomas, and Gen. Longstreet commenced pressing his columns through the passage. At this time, Maj.-Gen. Granger, who had been posted with his reserves to cover the left and rear, arrived on the field. He instantly attacked the forces of Gen. Longstreet, with Gen. Steadman's brigade of cavalry. The conflict at this point is thus described by Gen. Halleck: "In the words of Gen. Rosecrans's report, 'swift was the charge, and terrible the conflict; but the enemy was broken.' A thousand of our brave men killed and wounded paid for its possession; but we held the gap. Two divisions of Longstreet's corps confronted the position. Determined to take it, they suc-

cessively came to the assault. A battery of six guns placed in the gorge poured death and slaughter into them. They charged within a few yards of the pieces, but our grape and canister, and the leaden hail of musketry, delivered in sparing but terrible volleys, from cartridges taken in many instances from the boxes of their fallen companions, was too much even for Longstreet's men. About sunset they made their last charge, when our men, being out of ammunition, moved on them with the bayonet, and they gave way, to return no more. In the mean time the enemy made repeated attempts to carry Gen. Thomas's position on the left and front, but were as often thrown back with great loss. At nightfall the enemy fell back beyond the range of our artillery, leaving Gen. Thomas victorious on his hard-fought field."

During the night, Gen. Thomas fell back to Rossville, leaving the dead and most of the wounded in the hands of the enemy. Gen. Sheridan, who had been cut off by the advance of the enemy, as he was upon the extreme right, gathered his brigades and struck across Missionary ridge, directly to the west. The enemy were in possession of the country north of him. As he reached the top of the ridge, he caused the "assembly" to be blown, and picked up all the stragglers from the other divisions that he could find. He had lost three pieces of artillery, but in his progress met a whole battery which had been abandoned, and took it in charge. Passing the enemy's flank, and regaining the road on the ridge, he turned east through Rossville, and, without halting, reinforced Gen. Thomas at midnight. The position near Rossville was held during Monday without serious molestation from the enemy, and in the night the entire force was withdrawn to Chattanooga.

On Monday, Gen. Bragg first sent out detachments to the battle field to gather the arms and banners. The former were sent to the rear, and the latter to Richmond. The prisoners were then counted and sent to the rear. The troops were then ordered under arms, and marched down the Chattanooga road until they came near to Rossville, when they filed to the right and moved down the Chickamauga valley, to be in good position to move upon Gen. Burnside or to flank Gen. Rosecrans. On Wednesday, Gen. Bragg moved again up to and over Missionary ridge.

The loss of Gen. Rosecrans in these battles was 1,644 killed, 9,262 wounded, and 4,945 missing, which, with a cavalry loss of 1,000, makes 16,851. In material, his loss was 36 guns, 20 caissons, 8,450 small arms, and 5,834 infantry accoutrements. He captured 2,003 prisoners. The loss of the enemy in killed, wounded, and missing was reported at 18,000.

After Gen. Rosecrans's retreat to Chattanooga, he withdrew his forces from the passes of Lookout mountain, which covered his line of supplies from Bridgeport. These were immediately occupied by the enemy, who also

sent a cavalry force across the Tennessee above Chattanooga, which destroyed a large wagon train in the Sequatchie valley, captured McMinnsville and other points on the railroad, and thus almost completely cut off the supplies of Gen. Rosecrans's army.

The line of the railroad at this time was well defended. The enemy's cavalry were attacked by Col. McCook, at Anderson's cross roads, on the 2d of October; by Gen. Mitchell, at Shelbyville, on the 6th, and by Gen. Crook, at Farmington, on the 8th, and were mostly captured or destroyed.

On the 2d of October, Gen. Rosecrans issued the following order:

Orders No. 3.

HEADQUARTERS DEPARTMENT OF THE CUMBERLAND, }
CHATTANOOGA, October 2d, 1863. }

Army of the Cumberland: You have made a grand and successful campaign; you have driven the rebels from Middle Tennessee. You crossed a great mountain range, placed yourselves on the banks of a broad river, crossed it in the face of a powerful, opposing army, and crossed two other great mountain ranges at the only practicable passes, some forty miles between extremes. You concentrated in the face of superior numbers; fought the combined armies of Bragg, which you drove from Shelbyville to Tullahoma, of Johnston's army from Mississippi, and the tried veterans of Longstreet's corps, and for two days held them at bay, giving them blow for blow, with heavy interest. When the day closed, you held the field, from which you withdrew, in the face of overpowering numbers, to occupy the point for which you set out—Chattanooga.

You have accomplished the great work of the campaign; you hold the key of East Tennessee, of Northern Georgia, and of the enemy's mines of coal and nitre. Let these achievements console you for the regret you experience that arrivals of fresh hostile troops forbade your remaining on the field to renew the battle; for the right of burying your gallant dead, and caring for your brave companions who lay wounded on the field. The losses you have sustained, though heavy, are slight, considering the odds against you, and the stake you have won.

You hold in your hands the substantial fruits of a victory, and deserve and will receive the honors and plaudits of a grateful nation, which asks nothing of even those who have been fighting us, but obedience to the Constitution and laws established for our own common benefit.

The General Commanding earnestly begs every officer and soldier of this army to unite with him in thanking Almighty God for His favors to us. He presents his hearty thanks and congratulations to all the officers and soldiers of this command, for their energy, patience, and perseverance, and the undaunted courage displayed by those who fought with such unflinching resolution.

Neither the history of this war, nor probably the annals of any battle, furnish a loftier example of obstinate bravery and enduring resistance to superior numbers—when troops, having exhausted their ammunition, resorted to the bayonet, many times, to hold their positions, against such odds—as did our left and centre, comprising troops from all the corps, on the afternoon of the 20th of September, at the battle of Chickamauga.

(Signed)

W. S. ROSECRANS,
Major-General Commanding.

When it was known at Washington that Gen. Longstreet's corps had probably gone to the aid of Gen. Bragg, the authorities ordered to Tennessee the forces of Gen. Grant at Vicks-

burg, and also appointed him to the command of the forces in the field in Tennessee. Before information was received in reply from Gen. Grant, who was at New Orleans, Gen. Hooker was on the 23d of September sent to Tennessee, in command of the eleventh and twelfth corps of the Army of the Potomac, which were detached for that object. They were assigned to protect Gen. Rosecrans's line of communication from Bridgeport to Nashville.

On the 18th of October, Gen. Grant, having arrived at Louisville, Ky., assumed command of the Departments of Tennessee, Cumberland and Ohio, by order of the President. Major-Gen. G. H. Thomas was placed in the immediate command of the Department of the Cumberland, and Maj.-Gen. W. T. Sherman in that of the Department of Tennessee. Gen. Rosecrans was relieved. Gens. McCook and Crittenden were ordered to Cincinnati, and their corps consolidated into one.

At this time the army was at Chattanooga, which is situated in a bend of the Tennessee river. The flanks rested on its banks—the right at Chattanooga creek, near the base of Lookout mountain, and the left at Citico creek. The picket lines followed these two creeks for a distance, and then passed across the low grounds between, which lie also between the foot of Missionary ridge and the high grounds about the town upon which the defensive works were constructed. These works were connected by a strong line of rifle pits. Behind this line and around the town the greater portion of the army was bivouacked, for very little camp equipage was to be had. This was the only point held by a Federal force south of the river, while the north side was occupied entire, with troops stationed to guard the points above. The base of the army at Chattanooga was at Stevenson and Bridgeport, and was supplied from depots at Louisville and Nashville by a single track of railroad. The south side of the river from Lookout mountain to Bridgeport was in possession of the enemy, and the river road on the north side was rendered impassable by their sharpshooters stationed on the opposite bank. It was thus necessary to bring all supplies to the army over a distance of fifty or sixty miles, taking the road from Bridgeport up the Sequatchie valley, over the mountains into the Anderson road, thence to Chattanooga. The Tennessee was crossed by pontoon bridges, constructed from such materials as the forest and the town could afford. The storms rendered the roads nearly impassable, and the army was in danger of starvation.

Gen. Hooker had arrived at Bridgeport with the eleventh and a portion of the twelfth corps, and Gen. Sherman was on the route from Memphis. The first movement was to open the river, and secure a shorter land communication with the base. For this purpose the boats for a new pontoon bridge were filled with armed men at Chattanooga, and floated down in the

night past Lookout Point, to a place known as Brown's Ferry, where they landed on the south side of the river and took possession of two hills, after only a slight skirmish with the picket at the point of landing, and a feeble resistance from a brigade of infantry and regiment of cavalry stationed in the valley beyond the hills. The boats then crossed the river, and brought over more troops to hold possession, by whom a bridge was immediately constructed, about nine hundred feet in length, in five hours. The distance between this bridge and the one at Chattanooga was one and a half mile by land, and about eight miles by water. On the next day, Gen. Hooker crossed the river at Bridgeport, and moved up, uniting with the force at Brown's Ferry. This opened the river, the road to Kelly's Ferry, and the direct road to Bridgeport, as well as the river road on the north side around the bend. This successful movement is thus explained by a spectator in the camp of the enemy:

The enemy were several miles distant, and the smoke of their bivouac fires resting above the tree tops indicated a halt. Subsequently the column resumed its motion, and during the afternoon the long, dark, thread-like line of troops became visible, slowly wending their way in the direction of Chattanooga. On Lookout Peak, gazing down upon the singular spectacle—a *coup d'œil* which embraced in curious contrast the beauties of nature, and the achievements of art, the blessings of peace and the horrors of war—were Gens. Bragg, Longstreet, and others, to whom this bold venture of the enemy opened at once new vistas of thought and action. Infantry, artillery, and cavalry, all glided silently by, like a procession of *fantocini* in a panorama, until, among all the "sundown's sumptuous pictures" which glowed around us, there was not one like that of the great, fresh, bustling camp, suddenly grown into view, with its thousand twinkling lights, its groups of men and animals, and its lines of white-topped wagons, now strung like a necklace of pearls around the bosom of the hills. The Federals had succeeded in effecting a junction with the army of Chattanooga.

The question which naturally arises is, why did not Gen. Bragg throw his army in front of the advancing columns and check the movement? The answer is in the shape of one of those stolid facts which even strategy cannot always stir. On Monday night, Gen. Thomas—or perhaps Grant, for he is now in Chattanooga—crossed a force of six thousand men, first over the Tennessee at the edge of the town, then over the neck of land known as the Moccasin, and finally over the river again at Brown's Ferry, in rear of Chattanooga, where, after a brief skirmish with one of our regiments, they took possession of the hills and commenced the work of fortification. Simultaneously with this movement, a column at Bridgeport, consisting of the eleventh corps, Gen. Howard, and twelfth corps, Gen. Slocum, the whole under command of Gen. Joe Hooker, started up the valley.

Under these circumstances, an interposition of our forces across the valley would in the first place have required the transfer of a considerable portion of our army from the east to the west side of Lookout mountain, thereby weakening our line in front of Chattanooga, while the enemy reserved his strength; secondly, it would have necessitated a fight on both our front and rear, with the flanks of the Federals protected by the mountains; and, finally, had we been successful, a victory would only have demoralized two corps of the Yankee army, without at all influencing the direct issue involved in the present investment of Chattanooga.

Gen. Longstreet, however, who from the peak had

carefully watched the march of the eleventh corps, determined to make an attack for another purpose—namely, to capture, if possible, a large park of wagons and its escort, numbering, as was supposed, from fifteen hundred to two thousand men, who still remained in the rear.

The attack thus proposed was made during the night, and the result was that, at five o'clock the next morning, the enemy had abandoned the entire country west of Lookout creek. These operations saved the army from starvation, for the situation of affairs was such that Chattanooga must be held at all hazards.

A steamboat had been built and another had been captured. The latter was now loaded with two hundred thousand rations. It ran the blockade of Lookout mountain, and arrived safely at Brown's Ferry. The point of Lookout mountain between Chattanooga and Lookout creek was still held by pickets and an infantry force of the enemy, while their batteries on the top commanded some distance each way. The steamboat passed to the pontoon bridge ground until the battle of Missionary ridge, thus covering the line of communication; and then in connection with the other boat ran regularly to Kelly's Ferry from Bridgeport, reducing the wagon transportation to ten miles over good roads. An interior line of defence, sufficient to hold Chattanooga with a small force, was now constructed, and the plans were matured for accomplishing the main object of the campaign, which was the clearing of East Tennessee of the enemy.

When Gen. Sherman reached the vicinity of Bridgeport with his corps, Gen. Longstreet had been detached with his command from the army of Gen. Bragg, and sent on an expedition against Knoxville. This weakened Gen. Bragg and exposed Gen. Burnside to danger. The plan therefore adopted by Gen. Grant was to attack Gen. Bragg, and to follow it by a movement in the rear of Gen. Longstreet. The forces of Gen. Bragg held Missionary ridge, the Chattanooga valley, and Lookout mountain, with their left resting on the latter, and their right on the ridge near the tunnel of the Knoxville and Chattanooga railroad. Their pickets occupied the south bank of the Tennessee river for miles above, and their supplies were brought by the railroad from Atlanta and Dalton. The mass of Gen. Bragg's force was in the Chattanooga valley, between Lookout mountain and Missionary ridge, and on that slope of Lookout, thus being very nearly on his centre. The ridge was heavily posted with artillery. The plan adopted by Gen. Grant for the attack, and the manner in which it was executed, were thus described by a spectator: "A division of Gen. Sherman's troops were to be sent to Trenton, threatening the enemy's left flank. Under cover of this movement, Gen. Sherman's main body was to march up by Gen. Hooker's lines, crossing the Brown's Ferry bridge mostly at night, thence into a concealed camp on the north side of the river, opposite South Chickamauga creek. One division was directed to

encamp on the North Chickamauga; about 120 pontoons were to be taken under cover of hills and woods, and launched into the North Chickamauga; these were to be filled with men, to be floated out into the Tennessee and down it, until opposite the South Chickamauga (about three miles below), to effect a landing on that bank, and throw up works; the remainder of the command were to be taken across in the same boats, or a portion of them; the Tennessee and South Chickamauga were to be bridged, and then the artillery crossed and moved at once to seize a foothold on the ridge, taking up a line facing the enemy's right flank near the tunnel. Gen. Howard's corps of Gen. Hooker's command was to cross into the town by the two bridges, and fill the gap between Gen. Sherman's proposed position and the main body of Gen. Thomas's army. Gen. Hooker, with the remainder of his force and the division sent to Trenton, which should return, were to carry the point of Lookout, and then threaten the enemy's left, which would thus be thrown back, being forced to evacuate the mountain and take position on the ridge; and then the Federal troops, being on both flanks, and upon one flank threatening the enemy's communications, were to advance the whole line or turn the other flank, as the chances might dictate. Then a part of the force was to follow as far as possible, while Gen. Sherman destroyed the railroad from Cleveland to Dalton, and then pushed on to relieve Knoxville, and capture, disperse, or drive off Gen. Longstreet from before it.

"Gen. Smith, chief engineer, took personal charge of the preliminaries necessary for the move on the left flank. The pontoons were put in the Chickamauga; the men encamped; the bridge trains ready to debouch at the proper point; and so completely was every thing arranged that no confusion whatever occurred. Artillery was posted on the side of the river to cross fire in front of the point of landing, and force the same, if necessary.

"On Monday, November 24th, an armed reconnaissance was made by Gen. Thomas on his left, which developed the enemy's lines and gave to Gen. Thomas a line of battle in advance of his picket lines, at the same time allowing the eleventh corps (Howard's) to come into the position assigned it. At midnight the men entered the pontoons, floated down, and effected a landing. At daylight the pontoniers were at work, and at noon the Tennessee river was bridged by a pontoon bridge 1,400 feet long, and the rest of Gen. Sherman's troops crossed with his artillery. He then pushed out to the ridge and took up his position, and Gen. Howard communicated with him, his force having marched to its place. Gen. Hooker's forces formed a line of battle running up and down the side of the mountain and sweeping around the point, and, at night of the same day (the 24th), held what he had gained and

communicated with Gen. Thomas's right. That night the enemy evacuated Lookout Mountain top, and fell back from his front to the ridge. Thus, on Tuesday night, Gen. Bragg was threatened on both flanks, and with a heavy line of battle in his front. It was difficult for him to determine what the Federal move would be. His railroad must be held at all hazards from Gen. Sherman. The amount of Gen. Hooker's force he could distinctly see. He reënforced his right very heavily, leaving enough to hold his left and front, as he supposed. On the 25th, Wednesday, Gen. Sherman commenced to move. Two hills were taken. From the third he was several times repulsed, and he moved around more force, as if to get in rear of Gen. Bragg's line, and the latter then commenced massing against him. The critical moment had now arrived. Gen. Hooker moved his columns along the Rossville road toward Gen. Bragg's left, and this drew still more force from the latter's centre.

"General Grant now ordered Gen. Thomas to advance and take the rifle-pits at the base of the mountain. The Army of the Cumberland, remembering Chickamauga and impatient by reason of remaining spectators of the operations of Gens. Sherman and Hooker for two days, went forward with a will; drove the enemy in disorder from his lower works; and went on, heedless of the heavy artillery and musketry hurled against them from the crest of the ridge. Half-way up they seemed to falter, but it was only for breath. Without returning a shot they kept on, crowned the ridge, captured thirty-five out of the forty-four pieces of artillery on the hill, turned some of them against the masses in Gen. Sherman's front, and the routed line fell back, while the rest of Gen. Bragg's army, including Bragg and Hardee, fled, routed and broken, toward Ringgold. Thousands of prisoners and small arms and quantities of munitions of war were taken. Gen. Hooker took up the pursuit, and that night Mission Ridge blazed resplendent with Union camp-fires. The next day Gen. Hooker pushed the enemy to Ringgold, where he made a show of stubborn resistance, but was forced to retire. Gens. Sherman and Howard pushed for the railroad, which they smashed completely. About sixty pieces of artillery and a thousand prisoners were captured." When the attack was planned, orders were sent to Gen. Burnside to lure Gen. Longstreet as far away as possible, and fall back to a position where he could stand a siege and subsist from the country. Some skirmishes with the enemy still in East Tennessee, had previously taken place. On the 21st of September, one occurred between Col. Foster and a body of the enemy near Bristol, and on the 10th and 11th of October a sharp engagement took place at Blue Springs. The enemy was defeated with a heavy loss in killed and wounded, and one hundred and fifty prisoners. The Federal loss was about one hundred. Subsequently Gen. S.

Jones, who had held a threatening position with a small force of the enemy near the Virginia line, moved down on the north side of the Holston river to Rogersville, with some three thousand five hundred cavalry, and surprised the garrison at that place, and captured four pieces of artillery, thirty-six wagons, and six hundred and fifty men.

Previous to the advance of Gen. Longstreet into East Tennessee, Gen. Burnside had occupied Philadelphia, and other points on the south side of the Holston river with small garrisons. Some of these forces were surprised and six or seven guns captured, with forty wagons, and between six and seven hundred prisoners. The remainder retreated to Loudon. Upon receiving the orders from Gen. Grant, Gen. Burnside moved from Knoxville toward Loudon, to meet Gen. Longstreet. The latter placed his main force on the north side of the river Holston, but sent his cavalry up the south side, expecting that it would slip into Knoxville during Gen. Burnside's absence, and thus compel him to make a flank retreat. But the cavalry of Gen. Burnside was also on the south side of the Holston with a small force of infantry, and they fell back into the works, thus covering the town on that side. Gen. Burnside also fell back to Campbell's Station, and made a stand. A contest ensued for several hours in which Gen. Longstreet was repulsed. Gen. Burnside then withdrew to the neighborhood of Knoxville, and fortified his position. Gen. Longstreet then came up and commenced a siege. Knoxville was surrounded by Gen. Longstreet on the 17th and 18th of November. A constant fire was kept up on the line of Gen. Burnside until the evening of the 28th, when an attack was proposed on a small fort mounting six guns, on a hill near the town, and commanding the approaches to it on that side of the river. The fort was occupied by the 29th Massachusetts, the 79th New York and two companies of the 2d, and one of the 20th Michigan. On its front and flanks was once a thick field of pines, which had been cut down with the tops falling in all directions, making an almost impassable mass of brush and timber. A space around the fort was cleared. The ditch in front was about ten feet deep, and parapet nearly twenty feet high. The assault was made near daylight, on the 29th, by the Confederate brigades of Gens. Bryan and Humphrey, with a party from Wolford's. The enemy advanced in three lines and made the attack fiercely, but all attempts to scale the sides of the fort failed, and they were finally repulsed with a loss of two hundred killed and wounded, and several hundred made prisoners. Meantime the force of Gen. Burnside was closely pressed, and provisions became so scarce, that his troops were put on half rations of bread.

After the battle of Chattanooga, the pursuit of the enemy was discontinued through want of strong animals to draw the artillery

and supply trains; but Gen. Sherman being reinforced by the eleventh corps, and a part of the fourth, commenced his march for Knoxville. Five miles above Loudon at Davis's Ford, the eleventh corps crossed the Little Tennessee, and at Morgantown seven miles further up, the fourth and his own corps crossed. The eleventh moved on the next day to Louisville, a distance of thirty-one miles. The other troops moved to Marysville. All were on the south side of the Holston. On the night of December 3d, the cavalry of Gen. Sherman reached Knoxville. This movement turned the flank of Gen. Longstreet, and he raised the siege and retreated toward Rutledge on that night. On the next day, the fourth arrived at Knoxville, and in conjunction with Gen. Burnside's forces immediately commenced a pursuit. Gen. Longstreet fell back into the border of Virginia, and took a strong position. Gen. Burnside was subsequently relieved from the command of the Department of the Ohio at his own urgent request, and Gen. Foster assigned to its command.

It was during this siege that Gen. Averill advanced from Western Virginia, and cut the communications of Gen. Longstreet, as hereafter stated.

The other military operations of the year 1863, were, with the exception of the attack on Charleston, of a less conspicuous and important character. Some of them, however, were designed to be made in coöperation with the principal movements above stated.

Upon the departure of Gen. Longstreet's corps to reënforce Gen. Bragg, the remainder of Gen. Lee's army near Orange Court House, in Virginia, assumed a threatening attitude against Gen. Meade, and manœuvred to turn his left flank while at Culpepper Court House. At this time Gen. Hooker had left with nearly two corps to reënforce Gen. Rosecrans in Tennessee. The forward movement on the part of the Confederate army commenced on Thursday, October 8th, when Gens. Anderson and Heth moved their divisions from the vicinity of Peyton's Ford and Rapidan Bridge, up to and beyond Orange Court House. On Friday morning Gen. Wilcox's brigade moved from Barnett's Ford, and forming the rear of Lieut.-Gen. A. P. Hill's column, the troops proceeded to Madison Court House. At the same time, the corps of General Ewell followed, consisting of the divisions of Gens. Rhodes, Johnson, and Early. Meanwhile a show of force was still kept up in front of Gen. Meade on the Rapidan, by burning heavy camp fires, and maintaining the regular picket force in front. In the afternoon Gen. Stuart's cavalry began to advance, keeping on the right of the infantry, and rested at night near Madison Court House. On Saturday, the 10th, the infantry crossed the Robinson river near Criglersville, and soon after a skirmish took place between Gen. Stuart and a body of New York infantry, in which many of the latter were made prisoners.

Gen. Meade was now aware of the object of the enemy, and by Saturday night his whole force had left Culpepper and was falling back. His march was along the line of the railroad running from Alexandria. The enemy were encountered at times, and occasionally skirmishing ensued; but a general engagement was avoided.

On the 11th the main body of Gen. Lee's army reached Culpepper, and were compelled to halt during the day to furnish provision to the troops. On his advance Gen. Lee had left Gen. Fitz Lee with his division of cavalry and a detachment of infantry to hold his lines south of the Rapidan. This force was attacked by Gen. Buford on Saturday, and a sharp skirmish ensued; but the enemy being reënforced by Gen. Stuart's troops, Gen. Buford fell back across the Rappahannock.

On the 12th Gen. Lee advanced in two columns, with the design of reaching the Orange and Alexandria railroad north of the river, and intercepting the retreat of Gen. Meade. A cavalry skirmish occurred at Jeffersonston, but the Rappahannock at Warrenton Springs was reached that afternoon, when the passage was disputed by Federal cavalry and artillery. Upon the advance of a Confederate force these troops fell back.

On Tuesday morning, the 13th, the march was resumed, and the two columns reunited at Warrenton in the afternoon, and halted. On the next morning the advance of Gen. Lee was continued, a portion of his army moving by way of New Baltimore toward Bristoe's Station, and the rest, accompanied by the main body of the cavalry, proceeding to the same point by Auburn and Greenwich. Near the former place a skirmish took place between Gen. Ewell's advance and a body of Gen. Meade's troops. The retreat of Gen. Meade was conducted by direct parallel roads, while the enemy in their advance were compelled to march by difficult and circuitous routes. They were thus unable to intercept the retreat. The rear guard of Gen. Meade consisted of the second corps, under Gen. Warren. It had reached Bristoe's Station, and about noon on the 14th it was suddenly attacked by Gen. Hill, who, with two brigades of the enemy, had arrived in advance. Gen. Warren immediately arranged his corps for action, and a sharp struggle ensued, which lasted for some hours, when the enemy were repulsed with a loss of five guns and a large number killed, wounded, and four hundred and fifty made prisoners. The Federal loss was fifty-one killed, and three hundred and fifty-nine wounded. After remaining in possession of the field during the night, the second corps fell back across Broad Run. Gen. Meade then fortified his position beyond Bull Run, extending his line toward the Little River turnpike. The enemy now ceased to advance further. Gen. Meade held a strong position, and if it could have been turned by

the enemy he could readily have retired to the intrenchments around Washington and Alexandria. After destroying the railroad from Cub Run southwardly to the Rappahannock, the enemy retreated on the 18th to the line of that river, leaving their cavalry in front of Gen. Meade.

During the next day the cavalry of Gen. Meade advanced, before whom Gen. Stuart retired, until an attack was made on their flank, near Buckland, by Gen. Fitz Lee, who had moved from Auburn. A severe action ensued, and the enemy advanced nearly to Haymarket and Gainesville, where the infantry were encountered, and the former retired.

When the advance of Gen. Lee from the Rapidan commenced, orders were sent to Gen. Imboden to advance down the Shenandoah valley and guard the gaps of the mountains on the Confederate left. Having performed this duty he marched on the 18th upon Charlestown, and, surrounding the place, captured nearly all of the force stationed there, with their stores and transportation. Upon an advance of the force at Harper's Ferry, Gen. Imboden retired with his booty.

Gen. Halleck states the loss in the cavalry corps during these operations to have been 74 by casualties and 885 missing. Gen. Lee states that in the course of these operations 2,436 prisoners were captured, of which 436 were taken by Gen. Imboden. The loss of the enemy is not stated.

On the 7th of November Gens. Sedgwick and French attacked the enemy at Rappahannock Station and Kelly's Ford, and captured several redoubts, four guns, eight battle flags, and about two thousand prisoners. The Federal loss in killed and wounded was three hundred and seventy.

About the 20th of November an advance was made by Gen. Meade from the position held at that time, under the impression that Gen. Lee was either retreating south from the Rapidan, or was preparing for a movement in some other quarter. The intention was to ascertain the position of Gen. Lee's forces, and to bring on a contest with them. Upon this advance the enemy fell back and took up a strong position behind Mine Run, southwest of Chancellorsville. The strength of the position, and the risks attending an assault, were such that the army of Gen. Meade withdrew from the front of the enemy, and resumed its previous camps around Brandy Station, on the Orange and Alexandria railroad.

In West Virginia the force was too small during the year to attempt any important campaign by itself; but it acted mainly on the defensive, in repelling raids of the enemy and breaking up bands of guerillas.

When Gen. Lee's army retreated across the Potomac in July last, Brig.-Gen. Kelly concentrated all his available force on the enemy's flank, near Clear Springs, ready to coöperate

in the proposed attack by Gen. Meade. They also rendered valuable services in the pursuit after Gen. Lee had effected his passage of the river.

On the 24th of July Col. Toland attacked the enemy at Wytheville, on the East Tennessee and Virginia railroad, capturing two pieces of artillery, 700 muskets, and 125 prisoners. Our loss was 17 killed and 61 wounded. The enemy's killed and wounded were reported to be 75.

In August Gen. Averill attacked a force of the enemy under Gen. Sam. Jones, at Rocky Gap, in Greenbrier county, capturing one gun, 150 prisoners, and killing and wounding some 200. The Federal loss in killed, wounded, and missing, was 130.

On the 11th of September Gen. Imboden attacked a small force of Federal troops at Moorefield, wounding 15 and capturing about 150.

On the 5th of November Gen. Averill attacked and defeated the enemy near Lewisburg, capturing three pieces of artillery, 100 prisoners, and a large number of small arms, wagons, and camp equipage. The enemy's loss in killed and wounded was estimated at 300.

In December, Gen. Averill, with the 2d, 3d, and 8th Virginia mounted infantry, 14th Pennsylvania, Dobson's battalion of cavalry, and Ewing's battery, advanced into Southwestern Virginia, and, on the 16th, destroyed the Virginia and Tennessee railroad at Salem. At the same place three depots were destroyed, containing 2,000 barrels of flour, 10,000 bushels of wheat, 100,000 bushels of shelled corn, 50,000 bushels of oats, 2,000 barrels of meat, several cords of leather, 1,000 sacks of salt, 31 boxes of clothing, 20 bales of cotton, a large amount of harness, shoes, and saddles, equipments, tools, oil, tar, and various other stores, and 100 wagons. The telegraph wire was cut, coiled, and burned for a half mile. The water station, turn-table, and three cars were burned, the track torn up, and the rails heated and destroyed as much as possible, in six hours. Five bridges and several culverts were destroyed over an extent of fifteen miles. A large quantity of bridge timber and repairing materials were also destroyed. On returning, Gen. Averill found six separate commands under Gens. Early, Jones, Fitz Lee, Imboden, Jackson, and Echols, arranged in a line extending from Staunton to Newport, on all the available roads, to intercept him. Having captured a despatch of the enemy, by which their positions were made known, Gen. Averill marched from the front of Jones to that of Jackson during the night, crossed the river and pressed in the latter's outposts, and passed him. In the meantime, forces were concentrating upon Gen. Averill at a place called Calaghan's, over every available road but one, which was deemed impracticable. Over this one he crossed the top of the Alleghanies with his command, and arrived at Beverly on the 21st, with a loss of six drowned, four wounded, and ninety missing,

and having captured about two hundred prisoners and one hundred and fifty horses.

In North Carolina, during the year 1863, no important operations were carried on against the enemy in consequence of the weakness of the Federal force. It acted chiefly on the defensive, and held the important positions which had been previously captured.

In March the Confederate general, Pettigru, with a large force of infantry and artillery, made an unsuccessful demonstration on Newbern. The loss of Gen. Foster, in command of the Federal forces, was two killed and four wounded. In April, Gen. Hill laid siege to Washington, on the Tar river. The town had only a small garrison and was slightly fortified. Gen. Foster, who was there at the time, caused the works to be so strengthened, that they were held until reinforcements arrived from Newbern to raise the siege.

In May an expedition was sent against a camp of the enemy at Gum Swamp, which captured one hundred and sixty-five prisoners and military stores. In July another expedition was sent against Rocky Mount on the Tar river, which destroyed the bridge at that place, and a large amount of property belonging to the enemy. No further operations of importance took place in North Carolina during the year. The Department of North Carolina was united with that of Virginia, under the command of Gen. Dix, until the latter was transferred to the command of the Department of the East, when Gen. Foster assumed the command. The latter was subsequently transferred to the Department of the Ohio, and Gen. B. F. Butler appointed to the command of the Department of Virginia and North Carolina.

After abandoning the siege of Washington in April, Gen. Hill marched toward Nansemond to reinforce Gen. Longstreet, who was investing Suffolk, in Southeastern Virginia. Upon failing in his direct assault upon the place, Gen. Longstreet began to establish batteries for its reduction. The defence of the place was conducted by Gen. Peck, under the command of Gen. Dix, who made every preparation of which it was capable, and retarded the construction of the enemy's works until the attempt was finally abandoned. The Federal loss during these operations was forty-four killed, two hundred and one wounded, and fourteen missing. They captured four hundred prisoners.

About the 20th of June, while Gen. Lee was advancing into Pennsylvania, all the available forces under the command of Gen. Dix, being about eighteen thousand men, were moved up the York river and landed at the Whitehouse, for the purpose of threatening Richmond, of destroying the railroad bridges over the South and North Anna rivers, which were on Gen. Lee's line of communication, and doing as much damage as possible to the enemy, besides occupying the attention of a large body of his force. One of the bridges over the South Anna was

destroyed by an expedition under Col. Spear, and the quartermaster's depot at Hanover Station. On his return he brought back thirty-five army wagons, seven hundred horses and mules, and Gen. Fitzhugh Lee, the son of Gen. R. E. Lee, as a prisoner. The other bridge over the South Anna was not destroyed, but the railroad track between it and Richmond was torn up for a considerable distance, and the bridge at Ashland Station, on the same road, eleven miles out of Richmond, was completely demolished and burned, as also the depot. After remaining at the Whitehouse three days, Gen. Dix received orders to return with his forces for the purpose of reinforcing Gen. Meade. At that time he had completely cut off Gen. Lee's communications with Richmond by way of the two railroads crossing the South Anna river, and had control of the whole country from the Pamunkey to the Rappahannock.

The small force in the Department of the South caused a suspension of active operations until March, 1863. An attack upon Fort Sumter and Charleston had long been contemplated by the Navy Department, and it was represented that the operation of the ironclads would be greatly aided by a land force prepared to assist the attack, and to occupy any work reduced by the navy.

Gen. Foster was, therefore, sent with a considerable force and a large siege equipage to assist the naval attack. But not proving acceptable to Gen. Hunter, then in command, he returned to North Carolina, leaving his troops and siege equipage. The naval attack on the fort was made upon April 7th (*see* NAVAL OPERATIONS), but was rather unsuccessful, and nothing apparently remained to be done by the land forces. It was now represented by the Navy Department that a second attack upon Fort Sumter and Charleston was preparing, and that its success required the military occupation of Morris Island, and the establishment of land batteries on that island to assist in the reduction of the fort. As this was a task requiring engineering skill, it was assigned to Gen. Q. A. Gillmore, who took the command of the department. On the night of the 3d of July he commenced his advance upon Charleston by the movement of troops to Folly Island. There they remained as secret as possible, and erected batteries to cover those of the enemy on the south ends of Morris Island. On the 10th the entire force which was required having arrived, the batteries opened upon the enemy, and when their guns were silenced a charge was made by the infantry, who had crossed to the island in boats, and the works captured. A despatch from Gen. Gillmore thus reports his movements:

HEADQUARTERS DEPARTMENT OF THE SOUTH, }
IN THE FIELD, MORRIS ISLAND, S. C., July 12th, 1863. }

Major-General H. W. Halleck, General-in-Chief:

SIR: I have the honor to report that at five o'clock on the morning of the 10th instant I made an attack upon the enemy's fortified position on the south end of Morris Island, and, after an engagement of three

hours and a quarter, captured all his strongholds upon that part of the island, and pushed forward my infantry to within six hundred yards of Fort Wagner.

We now hold all the island except about one mile on the north end, which includes Fort Wagner and a battery on Cummings' Point, mounting at the present time fourteen or fifteen heavy guns in the aggregate.

The assaulting column was gallantly led by Brig.-Gen. Strong. It landed in small boats under cover of my batteries on Folly Island and four monitors led by Rear-Admiral Dahlgren, which entered the main channel abreast of Morris Island soon after our batteries opened. The monitors continued their fire during the day mostly on Fort Wagner.

On the morning of the 11th instant, at daybreak, an effort was made to carry Fort Wagner by assault. The parapet was gained, but the supports recoiled under the fire to which they were exposed and could not be got up. Our loss in both actions will not vary much from one hundred and fifty in killed, wounded, and prisoners. We have taken eleven pieces of heavy ordnance and a large quantity of camp equipage.

The enemy's loss in killed, wounded, and missing, will not fall short of two hundred.

Q. A. GILLMORE, Brig.-Gen. Commanding.

The portion of Morris Island not yet taken by Gen. Gillmore was well fortified. Fort Wagner was a strong work, constructed of immense timbers and rafters covered over with earth and sand some twenty feet thick. Its distance from Fort Sumter in an air line was about a mile and a half, and four and a half miles from Charleston. On the part of the island called Cummings' Point was Battery Gregg, about three-fourths of a mile from Fort

Sumter. Morris Island is about five miles long and some three or four miles wide. Along the sea coast is an irregular ridge made of sand heaps, which is about half a mile wide, the rest of the island is low, level, marshy land, much of which is flooded at high tide. The Confederate forces on the island were under the command of Brig.-Gen. Harrison, of Georgia; Fort Sumter, which stands within the entrance, and nearly in the centre of the harbor, was under the command of Col. Rhett. The walls were protected by tiers of sand bags in the inside, some twenty feet thick, thus making an obstruction of brick and sand some twenty-six feet. Fort Moultrie is nearly opposite Sumter, on the north side of the harbor, and distant about one and one-fourth miles. Up the harbor on the southern side is Fort Johnson, one and one-fourth miles distant. About a mile beyond, in the middle of the harbor, on the "middle ground," is Fort Ripley. Castle Pinckney is in the same line, and on the north side of the harbor at the mouth of the Cooper river. There were, in addition, numerous batteries at various points on all the islands and the front of the city, and also works facing the land attack on James Island. The whole number of guns in position and afloat for the defence of Charleston, was estimated at three hundred and seventy-six.

The naval force under Admiral Dupont, com-

posing the South Atlantic blockading squadron, consisted of sixty-one vessels of all classes, mounting three hundred and ninety-six guns. But iron clads, carrying in all about thirty-four guns, were expected to take the active part in the operations in the harbor.

After the failure of the assault upon Fort Wagner, Gen. Gillmore set to work to bring his heavy guns into position, not only for an attack upon Wagner, but upon all the works of the enemy, and also to throw shells into Charleston. The form of the contest now consisted in pushing forward the siege works and annoying the enemy as much as possible with sharpshooters and shells. The enemy acted in the same manner. Fort Johnson night and day threw shells, which burst above the workmen in the trenches. Wagner was kept quiet by the ship *Ironsides* and the monitors, while these in turn were attacked by the guns of Gregg and Sumter.

On the 18th of July, about twelve heavy guns were in position, besides eight or ten mortars, within eight hundred yards of Fort Wagner, and Gen. Gillmore determined on making another attack. It was commenced at noon by Gen. Gillmore's batteries and the frigate *Ironsides*; five monitors, two mortar schooners, and three wooden gunboats soon joined in. The enemy replied briskly from Fort Wagner, Battery Bee, beyond Cummings's Point, and the guns on the southwestern face of Fort Sumter. Their fire was chiefly directed against the vessels, occasionally a shell was thrown at the batteries. Soon after four o'clock the fire of Fort Wagner ceased. It was known that one gun had been dismounted and another was supposed to have exploded. Under the impression that the works were evacuated, another attempt to occupy them was determined upon. For this purpose two brigades consisting of the 7th Connecticut regiment, the 3d New Hampshire, the 9th Maine, the 76th Pennsylvania, and the 48th New York, under Brig.-Gen. Strong, and the 7th New Hampshire, 6th Connecticut, 62d Ohio, 100th New York, and 54th Massachusetts (colored), under Col. Putnam, were ordered forward from behind the sand hills. The brigades were formed in line on the beach, with the regiments disposed in columns, the colored regiment being in advance. This movement was observed at Fort Sumter, and a fire was opened on the troops but without effect. At dark the order was given for both brigades to advance, Gen. Strong's leading and Col. Putnam's within supporting distance. The troops went forward at quick time and in silence, until the 54th Massachusetts, led by Col. Shaw, was within two hundred yards of the work, when the men gave a fierce yell and rushed up the glacis, closely followed by the other regiments of the brigade.

The enemy, hitherto silent, opened upon them furiously with grape, canister, and a continuous fusillade of small arms. The negroes, however, plunged on, and many of them cross-

ed the ditch, although it contained four feet of water, gaining the parapet. They were dislodged, however, in a few minutes with hand grenades, and retired, leaving more than one-half of their number, including their colonel, dead upon the field. The 6th Connecticut regiment, under Lieut.-Com. Rodman, was next in support of the 54th, and they also suffered terribly, being compelled to retire after a stubborn contest. The 9th Maine, which was next in line, was broken up by the passage of the remnant of the repulsed colored regiment through its lines, and retired in confusion, excepting three companies which stood their ground.

It now devolved upon the 3d New Hampshire regiment to push forward, and, led by Gen. Strong and Col. Jackson in person, they dashed up against the fort. Three companies gained the ditch, and wading through the water, found shelter against the embankment. Here was the critical point of the assault, and the second brigade, which should have been up and ready to support their comrades of the first, were unaccountably delayed. Gen. Strong then gave the order to fall back and lie down on the glacis, which was obeyed, without confusion.

While waiting here, exposed to the heavy fire, Gen. Strong was wounded. Finding that the supports did not come, Gen. Strong gave the order for his brigade to retire, and the men left the field in perfect order.

Soon afterward the other brigades came on, and made up for their tardiness by their valor. Rushing impetuously up the glacis, undeterred by the fury of the enemy, whose fire was not intermitted, several of the regiments succeeded in crossing the ditch, scaling the parapet, and descending into the fort. Here a hand-to-hand conflict ensued. The troops fought with desperation, and were able to drive the enemy from one side of the work to seek shelter between the traverses, while they held possession for something more than an hour. This piece of gallantry was unfortunately of no advantage. The enemy rallied, and, having received reinforcements, made a charge upon them and expelled them from their position by the force of numbers. One of the regiments engaged in this brilliant dash was the 48th New York, Col. Barton, and it came out almost decimated. The 48th was among the first to enter the fort, and was fired upon by a regiment that gained the parapet some minutes later, under the supposition that it was the enemy. About midnight the order was given to retire, and the troops fell back to the rifle pits outside of their own works. The loss in killed, wounded, and missing, was fifteen hundred and thirty.

Gen. Gillmore now made his preparations to bombard both Wagner and Sumter, and the city of Charleston.

Meantime a correspondence took place between the opposing commanding officers.

Under date of Headquarters Department of South Carolina, Georgia, and Florida, Charleston, S. C., July 4th, 1863, Gen. Beauregard says that it is his duty, in

the interests of humanity, to address Gen. Gillmore, with a view of effecting some understanding as to the future conduct of the war in this quarter. And then, after alluding to the expedition set on foot by his predecessor, Maj.-Gen. Hunter, to the Combahee river, which seized and carried away negro slaves off plantations on its banks, ravaged the plantations, &c., he says he does not propose to enter upon a discussion touching that species of pillaging, but desires to acquaint Gen. Gillmore formally that more than one plantation was pillaged, buildings burned, and crops destroyed—acts which were not rendered necessary by any military exigency.

Then he takes up the question of the employment of negroes, and quotes Napoleon, to show the "atrocious consequences which ever resulted in the employment of a merciless, servile race as soldiers;" that Napoleon refused to employ the serfs in his campaign against Russia, because he dreaded the results of a civil or intestine war. He characterizes all who call to their aid such material, in the language of the publicists, as barbarians, &c. In conclusion, he asks whether the acts which resulted in the burning of the villages of Darien, Ga., and Bluffton, and the ravages on the Combahee, are regarded by Gen. Gillmore as legitimate measures of war, which he will feel authorized to resort to hereafter.

Gen. Gillmore addresses Gen. Beauregard from Morris Island, under date of July 18th. He states that, while he and his Government will scrupulously endeavor to conduct the war upon principles established by usage among civilized nations, he shall expect from the commanding general opposed to him full compliance with the same rules, in their unrestricted application to all the forces under his command.

Gen. Beauregard, under the date of July 22d, 1863, says he is at a loss to perceive the necessity for the remark that Gen. Gillmore will expect from him "full compliance with the same rules established by usages of civilized nations, &c., in their unrestricted application to all his forces," inasmuch as he is wholly unaware that any departure from the same has ever been alleged on his part, or by any of his troops, from the established laws and usages between civilized peoples; and then he calls for more specific charges.

In reply to Gen. Beauregard's despatch of the 22d ultimo, Gen. Gillmore, on the 5th of August, after noticing the remark of Gen. Beauregard that he was at a loss to perceive the necessity for his statement that he (Gen. G.) should expect a full compliance on his (Gen. B.'s) part with the same rules, &c., in their unrestricted application to all the forces under his command, states that he considered his remarks as pertinent and proper at the time. Events, he adds, since transpired, show them to have been eminently so. In proof he quotes the circumstances of agreement for mutual paroling and returning to their respective commands the wounded prisoners in our hands. "You declined," Gen. Gillmore goes on to say, "to return the wounded officers and men belonging to my colored regiments, and your subordinate in charge of the exchange asserted that the question had been left for after consideration." He could but regard this transaction as a palpable breach of faith on Gen. Beauregard's part, and a flagrant violation of Gen. B.'s pledges as an officer.

The first works erected by Gen. Gillmore after taking possession of Morris Island, were the construction of parallels. These extended from the beach on the right to the marsh on the left. The first was distant from Fort Wagner one thousand two hundred yards. The second, and principal one, was so constructed that its left was six hundred and seven yards from Wagner, and its right seven hundred and fifty yards. The third was four hundred and twenty-five yards from Wagner. The parallels were built in an oblong direction with the length of

the island, having the highest points resting on the marsh. The rifle pits forming the foundation of the first parallel were thrown up shortly after the troops gained possession of the lower part of the island. These pits were thrown up in a single night, and used first in the attack on Fort Wagner, on July 18th. The interstices were subsequently filled, and the first parallel constructed. It was two hundred and twenty-five yards. The length of the second parallel was three hundred and twenty-five yards. The siege guns used for the offensive were mounted in the rear of this parallel. Its distance from Fort Sumter was three thousand three hundred and fifty yards. The third parallel was one hundred yards in length. On the left of the parallels earthworks were constructed, containing guns of heavy caliber. Their mean distance from Fort Sumter was four thousand one hundred yards. Still farther to the left, on the marsh, another earthwork was constructed facing Fort Sumter. On this was mounted a gun called "Swamp Angel." The "Marsh" is a vast growth of cane, bordering on Light House Inlet and Morris Island, directly facing James Island, which runs parallel with Morris Island. It is about a mile wide, and borders the island nearly its whole length. At low tide it is dry, but at high water there is about four feet of water over its whole extent. Scows were procured and loaded with bags of sand, and at every tide floated into the marsh, and piled on the selected spot. They sank down in their watery bed and rapidly disappeared, but the process was still continued with each renewing tide, until an immense bank, towering six feet above the tops of the canes, was visible. Strong traverses were erected, and after due time given for it to settle, the gun was placed on one of the scows, and floated through the canes at high tide to the site of the battery, where it was moored and soon mounted, the work having all been done at night, it being in full view of Fort Johnson and James Island batteries.

On the night of August 13th, the Federal works were advanced within four hundred and twenty yards of Wagner, without any suspicion of the enemy. Soon after daylight, a fire was opened from Wagner, Gregg, and Sumter, which continued for two hours, and answered with great vigor from the Federal batteries. On the 15th all the forts of the enemy from Johnson Island, on the left, to Fort Wagner, on the right, opened fire, and continued it at intervals of fifteen minutes. For the first time fire was opened upon Fort Sumter by the Federal batteries. A 200-pounder Parrott was brought to bear on the fort, for the purpose of testing the powder to be used in these guns. Seven shots were fired, a distance of two and five-eighth miles, the first three fell short, but of the remaining four, two went directly through the gorge wall, a short distance above the sally port, and two struck the parapet, and sent an immense amount of brick and mortar

into the ditch and into the fort. The solid shot, which went through, made holes from four to five feet in diameter.

On the morning of August 17th, Gen. Gillmore, having completed his batteries, which numbered about sixty pieces, and obtained the range, his guns opened fire upon Fort Sumter. The fleet consisting of the frigate Ironsides and the Monitors, aided by some wooden gunboats, made an attack, at the same time, upon Forts Gregg and Wagner. The latter was completely silenced, and the former nearly so. The Monitors Passaic and Patapsco then moved nearer to Fort Sumter, and opened fire on it. In the afternoon the fleet retired, except so much as was required to prevent remounting the guns in Fort Wagner. The fire from the batteries upon Fort Sumter continued through the day and night.

The bombardment of Fort Sumter had now been regularly commenced by Gen. Gillmore. The following is the daily report by the enemy of its effect:

CHARLESTON, Thursday, August 20th.

The firing of the Parrott guns upon Fort Sumter to-day was exceedingly heavy, but not so accurate as heretofore. About noon the flag was shot away, but soon replaced. No casualties are reported. Col. Alfred Rhett is commanding, and the garrison is stout-hearted.

The battery of Parrott guns is distant from Sumter two five-eighths miles. The missiles used are 200-pound bolts, eight inches in diameter, two feet long, with flat heads of chilled iron. Shells of the same dimensions are also used.

Up to Wednesday night, the third day of the attack, 1,972 of these missiles struck Sumter, and including to-day 2,500 have struck. The damage is of course considerable, and for the last two days all the guns on the south face of the fort have been disabled.

Yesterday, about four o'clock, the iron-clads formed in line of battle to renew the attack on Sumter, but the fort opened at long range from the east face, and they retired without attacking. To-day the Ironsides and two Monitors kept up a fire on Wagner at intervals, and the Yankee sappers have begun to make approaches on that battery from the nearest work. A shot from Wagner disabled one of the Parrott guns, and the James Island batteries, under Lieut. Col. Yates, exploded two of the enemy's ammunition chests.

CHARLESTON, Friday, August 21st.

The fire of the enemy's land batteries has been heavier than ever to-day. A new battery of Parrott guns opened on Sumter this morning, and the fires have been concentrated upon the east battery and its guns. The south wall of the fort is now a pile of rubbish. On the north the wall is also crumbling into a heap of ruins. The flag has been shot away twice to-day, and six times during the attack. The flag-staff is shot off, and the flag flies from the ruins of the south wall.

Just before sunset Sumter fired several shots at the Ironsides, which was engaging Battery Wagner.

A Monitor this morning fired at Sumter while making a reconnoissance, but was not replied to. There is no report of casualties.

The sappers are making a regular approach on Battery Wagner.

CHARLESTON, Saturday, August 22d.

From 5 o'clock A. M. until 7 o'clock P. M. yesterday, the enemy's fire on Fort Sumter was very heavy. Nine hundred and twenty-three shots were fired, and seven hundred and four struck the fort, either outside or inside. The eastern face of the fort was badly battered.

Some guns on the east end and the northeast face were disabled. The flag was shot down four times. Five privates and two negroes were wounded.

The enemy's fire on Wagner caused five casualties, including Capt. Robert Pringle, killed.

At 11 o'clock last night a communication from the enemy, unsigned, was sent to Gen. Beauregard, demanding the surrender of Sumter and the Morris Island batteries, with a notification that the city would be shelled in four hours if the demand was not complied with. Gen. Beauregard was on a reconnoissance, and Gen. Jordan returned it for the signature of the writer.

About two o'clock this morning the enemy began throwing shells into the city from a battery on the marsh between Morris and James Islands, and distant five miles from the city. Twelve 8-inch Parrott shells fell in the city, but caused no casualties. The transaction is regarded as an outrage on civilized warfare. The shelling had a good effect in hastening the exodus of non-combatants.

At daylight this morning the enemy opened fire vigorously on Sumter. The Ironsides has since opened. Sumter is replying. Wagner is firing briskly on the enemy's advanced works, 450 yards from our battery.

CHARLESTON, August 22d.

The fire of the enemy's land batteries has been kept up on Fort Sumter, and more guns disabled. There was only one casualty.

There was also a heavy fire on Battery Wagner from the fleet and land, also on Battery Gregg. The casualties at Wagner were one officer and four privates.

Gen. Gillmore's demand for the surrender of Fort Sumter and Morris Island, with a threat to shell Charleston in four hours from the delivery of the paper at Wagner, was signed and returned at seven o'clock this morning.

Gen. Beauregard, in his reply, charges inhumanity and violation of the laws of war, and affirms that if the offence be repeated he will employ stringent measures of retaliation.

Up to this time the threat to shell the city has not been executed.

CHARLESTON, Sunday, August 23d.

To-day the land batteries opened from south to north, and the Monitors from east to west, coming close up. The fire was very damaging. The east wall was cracked and breached, and the shot swept through the fort. A shell burst, wounding Lieut. Boylston, Col. Rhett, and three other officers.

The fort is now in ruins. Col. Rhett is ordered to hold this outpost even as a forlorn hope, until relieved or taken. Col. Gaillard was killed.

Gen. Gillmore sent a communication at 11 o'clock, giving notice that at 11 o'clock to-morrow he would open fire on Charleston.

CHARLESTON, Monday, August 24th.

The enemy's fire on Sumter slackened to-day. The fleet has not participated. At 12 o'clock last night the enemy's guns opened fire on the city, firing fifteen 8-inch Parrott shells. No casualties resulted. Non-combatants are leaving the city in continuous streams.

On the 24th of August, Gen. Gillmore sent the following despatches to Washington:

HEADQUARTERS DEPARTMENT OF THE SOUTH, }
MORRIS ISLAND, S. C., August 24th, 1863. }

To Maj.-Gen. H. W. Halleck, General-in-Chief:

SIR: I have the honor to report the practical demolition of Fort Sumter as the result of our seven days' bombardment of the work, including two days of which a powerful northeasterly storm most seriously diminished the accuracy of our fire.

Fort Sumter is to-day a shapeless and harmless mass of ruins. My chief of artillery, Col. J. W. Turner, reports its destruction so far complete, that it is no longer of any "avail in the defence of Charleston."

He also says that "by a longer fire it could be made more completely a ruin and a mass of broken masonry, but could scarcely be made more powerless for the defence of the harbor."

My breaching batteries were located at distances ranging between 3,320 and 4,240 yards from the works, and now remain as efficient as ever. I deem it unnecessary, at present, to continue the fire upon the ruins of Fort Sumter.

I have also, under a heavy fire from James Island, established batteries on my left, within effective range of the heart of Charleston city, and have opened with them, after giving Gen. Beauregard due notice of my intention to do so.

My notification to Gen. Beauregard, his reply thereto, with the threat of retaliation, and my rejoinder, have been transmitted to the army headquarters.

The projectiles from my batteries entered the city, and Gen. Beauregard himself designates them as the "most destructive missiles ever used in war."

The report of my chief of artillery, and an accurate sketch of the ruins of Fort Sumter, taken at 12 m. yesterday, six hours before we ceased firing, are herewith transmitted.

Very respectfully, your obedient servant,

Q. A. GILLMORE,

Brigadier-General Commanding.

OFFICE OF CHIEF OF ARTILLERY, DEPARTMENT OF
THE SOUTH, MORRIS ISLAND, S. C.,
August 23d, 1863.

*Brig.-Gen. Q. A. Gillmore, Commanding Department
of the South, Morris Island, S. C.:*

GENERAL: I have the honor to report the effect that our breaching batteries have had upon Fort Sumter, and the condition of that work to-night, at the close of the seven days' bombardment.

The gorge wall of the fort is almost a complete mass of ruins. For the distance of several casemates about midway of this face the ramparts are removed nearly, and in places quite to the arches, and but for the sand bags, with which the casemates were filled, and which have served to sustain the broken arches and masses of masonry, it would have long since been entirely cut away, and with it the arches to the floor of the second tier of casemates. The debris on this point now forms a ramp reaching as high as the floor of the casemates.

The parapet wall of the two northeasterly faces is completely carried away, a small portion only being left in the angle made with the gorge wall, and the ramparts of these faces are also a total ruin. Quite one half of our projectiles seem to have struck the parade and parapet of these two faces, and judging from the effect they have had upon the gorge wall within our observation, the destruction of masonry on these two sides must be very great, and I am of opinion that nearly every arch in these fronts must be broken in. But one gun remains in position on these two fronts. This is in the angle of the gorge, and I think unserviceable.

The ruin extends around, taking in the northeasterly face as far as can be seen. A portion of this face adjoining the angle it makes with the southeasterly face is concealed, but from the great number of missiles which have struck in this angle during the last two days, it cannot be otherwise than greatly damaged, and I do not think any guns can be left on this face in a serviceable condition.

The ramparts on this angle, as well as in the southeasterly face, must be ploughed up and greatly shattered; the parapet on this latter face being torn off in many places, as we can see, and I hardly think the platforms of the three remaining guns on this face could have escaped.

With the assistance of a powerful glass, I cannot determine that more than one of these guns can be used. The carriages of the others are evidently more or less shattered, and such is the ruin of the parapet and parade in the immediate vicinity of this gun that it probably could not be served for any length of time.

In fine, the destruction of the fort is so far complete that it is to-day of no avail in the defence of the harbor of Charleston; by a longer fire it can be made more completely a ruin and a mass of broken masonry, but could scarcely be more powerless for the defence of the harbor.

I therefore respectfully submit my opinion that a continuance of our fire is no longer necessary, as giving us no ends adequate for the consumption of our resources.

Very respectfully, your obedient servant,

JOHN W. TURNER,

Colonel and Chief of Artillery.

The correspondence mentioned in the preceding despatch commenced on the 21st. On that day Gen. Gillmore addressed the following note to Gen. Beauregard:

HEADQUARTERS DEPARTMENT OF THE SOUTH, }
MORRIS ISLAND, S. C., August 21st, 1863. }

*To Gen. G. T. Beauregard, Commanding Confederate
Forces, Charleston, S. C.:*

GENERAL: I have the honor to demand of you the immediate evacuation of Morris Island and Fort Sumter by the Confederate forces. The present condition of Fort Sumter, and the rapid and progressive destruc-

tion which it is undergoing from my batteries, seem to render its complete demolition within a few hours a matter of certainty. All my heaviest guns have not yet opened.

Should you refuse compliance with this demand, or should I receive no reply thereto within four hours after it is delivered into the hands of your subordinate at Fort Wagner for transmission, I shall open fire on the city of Charleston from batteries already established within easy and effective range of the heart of the city.

I am, General, very respectfully, your obedient servant,
Q. A. GILLMORE, Brig.-Gen. Commanding.

To this note Gen. Beauregard replied as follows :

HEADQUARTERS DEPARTMENT OF SOUTH CAROLINA,
GEORGIA, AND FLORIDA, CHARLESTON, S. C.,
August 22d, 1863. }

SIR: Last night, at fifteen minutes before eleven o'clock, during my absence on a reconnoissance of my fortifications, a communication was received at these headquarters, dated "Headquarters Department of the South, Morris Island, S. C., August 21st, 1863," demanding "the immediate evacuation of Morris Island and Fort Sumter by the Confederate forces," on the alleged grounds "that the present condition of Fort Sumter, and the rapid and progressive destruction which it is undergoing from my batteries, seem to render its complete demolition within a few hours a matter of certainty;" and that if this demand were "not complied with or no reply thereto received within four hours after it is delivered into the hands of your (my) subordinate commander at Fort Wagner for transmission," a fire would be opened "on the city of Charleston from batteries already established within easy and effective range of the heart of the city." This communication to my address was without signature, and was of course returned.

About half past one o'clock one of your batteries did actually open fire, and threw a number of heavy shells into the city, the inhabitants of which, of course, were asleep and unwarned.

About nine o'clock this morning the communication alluded to above was returned to these headquarters, bearing your recognized official signature, and it can now be noticed as your deliberate official act.

Among nations, not barbarous, the usages of war prescribe that when a city is about to be attacked timely notice shall be given by the attacking commander, in order that non-combatants may have an opportunity for withdrawing beyond its limits. Generally the time allowed is from one to three days; that is, time for the withdrawal in good faith of at least the women and children. You, sir, give only four hours, knowing that your notice, under existing circumstances, could not reach me in less than two hours, and that not less than the same time would be required for an answer to be conveyed from this city to Battery Wagner. With this knowledge, you threaten to open fire on the city, not to oblige its surrender, but to force me to evacuate these works, which you, assisted by a great naval force, have been attacking in vain for more than forty days.

Batteries Wagner and Gregg and Fort Sumter are nearly due north from your batteries on Morris Island, and in distance therefrom varying from half a mile to two and a quarter miles. The city, on the other hand, is to the northwest, and quite five miles distant from the battery opened against it this morning.

It would appear, sir, that, despairing of reducing these works, you now resort to the novel measure of turning your guns against the old men, the women, and children, and the hospitals of a sleeping city, an act of inexcusable barbarity from your own confessed point of sight, inasmuch as you allege that the complete demolition of Fort Sumter within a few hours by your guns seems to you "a matter of certainty."

Your omission to attach your signature to such a grave paper must show the recklessness of the course upon which you have adventured; while the facts that you knowingly fixed a limit for receiving an answer to your demand, which made it almost beyond the possibility of receiving any reply within that time, and that you actually did open fire and throw a number of the most destructive missiles ever used in war into the midst of a city taken unawares, and filled with sleeping women and children, will give you a "bad eminence" in history, even in the history of this war.

I am only surprised, sir, at the limits you have set to your demands. If, in order to attain the abandonment of Morris Island and Fort Sumter, you feel authorized to fire on this city, why did you not also include the works on Sullivan's and James's Island—

nay, even the city of Charleston in the same demand?

Since you have felt warranted in inaugurating this method of reducing batteries in your immediate front, which were found otherwise impregnable, and a mode of warfare which I confidently declare to be atrocious and unworthy of any soldier, I now solemnly warn you that if you fire again on the city from your Morris Island batteries without giving a somewhat more reasonable time to remove non-combatants, I shall feel impelled to employ such stringent means of retaliation as may be available during the continuance of this attack.

Finally, I reply, that neither the works on Morris Island nor Fort Sumter will be evacuated on the demand you have been pleased to make. Already, however, I am taking measures to remove all non-combatants, who are now fully aware of and alive to what they may expect at your hands.

Respectfully, your obedient servant,

G. T. BEAUREGARD, Gen. Com'g.

To this letter Gen. Gillmore made the following response :

DEPARTMENT OF THE SOUTH, HEADQUARTERS IN
THE FIELD, MORRIS ISLAND, S. C.,
August 22d, 9 P. M.

G. T. Beauregard, Commanding Confederate State
Forces, Charleston, S. C. :

SIR: I have the honor to acknowledge the receipt of your communication of this date, complaining that one of my batteries has opened upon the city of Charleston, and thrown a number of heavy rifle shells into that city, the inhabitants of which, of course, were asleep and unwarned.

My letter to you demanding the surrender of Fort Sumter and Morris Island, and threatening, in default thereof, to open fire upon Charleston, was delivered near Fort Wagner at 11.15 o'clock P. M. on the 21st instant, and should have arrived at your headquarters in time to have permitted your answer to reach me within the limit assigned, namely, four hours.

The fact that you were absent from your headquarters at the time of its arrival may be regarded as an unfortunate circumstance for the city of Charleston, but it is one for which I clearly am not responsible. This letter bore date at my headquarters, and was officially delivered by an officer of my staff. The inadvertent omission of my signature doubtless affords ground for special pleading, but it is not the argument of a commander solicitous only for the safety of sleeping women and children and unarmed men.

Your threats of retaliation for acts of mine, which you do not allege to be in violation of civilized warfare, except as regards the length of time allowed as notice of my intentions, are passed by without comment. I will, however, call your attention to the well established principle, that the commander of a place attacked, but not invested, having its avenues of escape open and practicable, has no right to expect any notice of an intended bombardment other than that which is given by the threatening attitude of his adversary. Even had this letter not been written, the city of Charleston has had, according to your own computation, forty days' notice of her danger. During that time my attack upon her defences has steadily progressed. The ultimate object of that attack has at no time been doubtful.

If, under the circumstances, the life of a single non-combatant is exposed to peril by the bombardment of the city, the responsibility rests with those who have first failed to apprise the non-combatants, or secure the safety of the city, after having held control of all its approaches for a period of nearly two years and a half, in the presence of a threatening force, and who afterward refused to accept the terms upon which the bombardment might have been postponed. From various sources, official and otherwise, I am led to believe that most of the women and children of Charleston were long since removed from the city. But, upon your assurance that the city is still full of them, I shall sus-

pend the bombardment until 11 o'clock P. M. to-morrow, thus giving you two days from the time you acknowledged to have received my communication of the 21st instant.

Very respectfully, your obedient servant,

Q. A. GILLMORE,
Brigadier-General Commanding.

The effect of the shells first fired at Charleston is thus described by a citizen: "Between one and two o'clock, Saturday morning, the enemy commenced firing on the city, arousing the people from their slumbers. Twelve 8-inch shells fell into the city, thirteen in all having been fired. Fortunately no person was injured. Several shells flew in the direction of St. Michael's steeple, and fell either in the vacant lots in the burnt district on King street, or more generally struck in Queen and Rutledge, where an 8-inch shell tore up the plank-road, and dug a large hole in the ground. Another shot entered the warehouse of G. W. Williams and Co., at the corner of Hayne and Church streets, entered the roof, and exploded in the upper story, making a large opening in the brick wall of the Medical Purveyor's storehouse next door, and scattering things in great confusion. Some loose straw or packing was set on fire by the explosion, which caused the alarm bell to ring, and brought out the firemen. It was extinguished with little effort before it had made any progress. Four shells fell in this locality. One large piece was picked up and exhibited at the guard-house, where it was the subject of much curiosity. There was a good deal of excitement and some surprise expressed at the enemy being able to reach the city from his present position. The battery is located in the marsh between Morris and Black Islands, distant fully five miles from Charleston."

On Wednesday, August 26th, Gen. Gillmore, having completed a fourth parallel and sap, which extended very close to Fort Wagner, determined to possess a ridge of sand which interposed, and was necessary to the success of his operations. It was constantly occupied by a strong body of the enemy's pickets, and at night by a force protected by rifle pits. A bombardment of the position was made just before dark, after which it was carried by the 24th Massachusetts. One company of North Carolina troops was captured. On the 7th of September, Morris Island was evacuated by the enemy, which is thus reported by Gen. Gillmore:

DEPARTMENT OF THE SOUTH, HEADQUARTERS IN }
THE FIELD, September 7th, 1863. }

Maj.-Gen. H. W. Halleck, General-in-Chief:

GENERAL: I have the honor to report that Fort Wagner and Battery Gregg are ours. Last night our sappers mined the counter-scarp of Fort Wagner on its sea point, unmasking all its guns, and an order was issued to carry the place by assault at 9 o'clock this morning, that being the hour of low tide.

About 10 o'clock last night the enemy commenced evacuating the island, and all but seventy-five of them made their escape from Cummings's Point in small boats.

Captured despatches show that Fort Wagner was commanded by Col. Keitt, of South Carolina, and gar-

risoned by 1,400 effective men, and Battery Gregg by between 100 and 200 men.

Fort Wagner is a work of the most formidable kind. Its bomb-proof shelter, capable of containing 1,800 men, remains intact after the most terrific bombardment to which any work was ever subjected.

We have captured nineteen pieces of artillery and a large supply of excellent ammunition.

The city and harbor of Charleston are now completely covered by my guns.

I have the honor to be, General, very respectfully,
your obedient servant,
Q. A. GILLMORE,
Brigadier-General Commanding.

On the night of the 7th, an assault was made by an expedition on Fort Sumter. The flotilla consisted of between twenty-five and thirty boats, manned by over one hundred sailors, under Lieutenant Commandant Williams, and a hundred marines, under Capt. McCawley. The entire force was commanded by Commander Stephens, of the Patapsco. The boats were towed within a short distance of the fort, when they advanced. Three boats, under Commander Williams, Lieut. Remey, and Ensign Porter, landed, and the parties attempted to run up the ruins to the parapet, when they were fired upon by musketry, and hand grenades were thrown down upon them. The slope was so sharp that they were unable to reach the parapet. The signal was given from the fort, and in an instant all of the batteries of the enemy opened on the fort and shelled it terribly. Three boats were smashed, and all who landed were either killed or captured. Lieut. Bradford, of the marines, was mortally wounded and captured. Among others captured were Commander Williams, Lieut. Remey, Lieut. Preston, Lieut. Bower, Lieut. Bunce, Dr. Wheeler, and Ensign Porter. Forty or fifty sailors and marines were killed and wounded. The entire list of casualties was about eighty. The remainder of the command retired safe.

The captured forts on Morris Island were enlarged and new batteries erected by Gen. Gillmore, which effectually commanded Fort Sumter, and could aid any naval attack on Charleston. But little further progress, however, was made in the siege during the remainder of the year. The forts of the enemy were occasionally bombarded severely, and the shelling of Charleston at intervals, during day and night, was continued. The portion of the city within the reach of the shells was greatly injured, and entirely abandoned by its inhabitants. An attempt was made by the enemy to blow up the frigate Ironsides, with a torpedo, on the night of October 5th. It failed of success, and did no serious damage to the vessels.

Some further operations took place in the Department of the Gulf during the year. After the capture of Vicksburg, Gen. Banks was reinforced by Gen. Grant, and an expedition was fitted out under Gen. Franklin to occupy the mouth of the Sabine river, in Texas. It consisted of a force of four thousand men, and the naval steamers Clifton, Sachem, Arizona, and Granite City. The squadron was under the command of Lieut. Crocker. The defences at

the pass were supposed to consist of two 32-pounders, *en barbette*, and a battery of field pieces, and two boats used on the bay, which had been converted into rams. The plan was that the squadron should make the attack alone, assisted by about one hundred and eighty sharpshooters divided among the four vessels, and, having driven the enemy from his defences and destroyed or driven off the rams, the transports were then to advance and land their troops.

Sabine Pass is the name of the outlet from Sabine Lake into the Gulf of Mexico. Sabine Lake is an expansion of the Sabine river about five miles from its entrance into the Gulf of Mexico, at the southwest extremity of Louisiana. Its length is 18 miles and its breadth 9 miles. Sabine river rises in Hunt county, Texas, and flows in a direction east of southeast until it strikes the eastern boundary of the State. From this point it pursues a southerly course, forming the boundary between Texas and Louisiana. It is very shallow at its mouth. The whole length of the river is estimated at 500 miles.

Early on the morning of Sept. 8th, the Clifton stood in the bay and opened on the fort, to which no reply was made. At 9 A. M. the Sachem, Arizona, and Granite City, followed by the transports, stood over the bar, and, with much difficulty, owing to the low water, reached an anchorage about two miles from the fort at 11 A. M. About the middle of the afternoon the Sachem, followed by the Arizona, advanced up the eastern channel to draw the fire of the forts while the Clifton advanced up the western channel. The Granite City remained to cover the landing of a division of troops under Gen. Weitzel. No reply was made to the fire of the gunboats until they were abreast of the forts, when eight guns opened fire upon them. Three of these were rifled. Almost at the same moment the Clifton and Sachem were struck in their boilers and both vessels enveloped in steam. The Arizona, not having room to pass the Sachem, then backed down the channel until she grounded by the stern, when the ebb-tide caught her bows and swung her across the channel. White flags were raised on the Clifton and Sachem, and within twenty minutes they were taken in tow by the enemy. The naval force of the expedition being thus disabled, the transports moved out of the bay. The Arizona was got afloat during the night and followed. The expedition then returned to Brashear City. The officers and crews of the Clifton and Sachem and about ninety sharpshooters who were on board were captured, and the loss in killed and wounded was about thirty. After remaining at Brashear City some time, the military force moved to Franklin and Vermillionville.

On the 27th of October an expedition under Gen. Banks put to sea from New Orleans. It consisted of about twenty vessels accompanied by the gunboats Owasco, Virginia, and Monon-

gahela, and was destined to the mouth of the Rio Grande river, which is the boundary line between Texas and Mexico. During the first three days out the weather was pleasant. On the fourth a "norther" prevailed, and one light draft steamer and two schooners were lost, but no lives. On the 31st the expedition anchored off the mouth of the river and on the next day a force was landed on Brazos Island. By the 4th the troops were all landed, and on the next day, Gen. Banks, preceded by a small body of infantry and artillery, entered Brownsville on the Rio Grande river. A small body of the enemy under Gen. Bee attempted to destroy the public property, and retired on the approach of the Federal force. Subsequently Corpus Christi and the coast of Texas to within one hundred miles of Galveston were occupied. Gen. Banks successfully prosecuted the campaign thus begun in Texas, the extent and results of which more properly belong to the records of 1864.

In Missouri and the Department of the Frontier, those portions of the Confederate army of the Trans-Mississippi Department, which was under command of Gens. Hindman, Sterling Price, and Marmaduke, maintained a restless activity.

Early in January, 1863, a force of five or six thousand men, under Gen. Marmaduke's command, comprising a portion of the troops which had been so signally defeated at Crawford's Prairie (see ANNUAL CYCLOPÆDIA, 1862, p. 60) a month before, proceeded down the Arkansas river to Spadry's Bluff, near Clarksville, Ark., and thence marched rapidly north toward Springfield, Mo., with the intention of seizing and destroying the large amount of Federal commissary and quartermaster stores accumulated there for the supply of the Army of the Frontier. The design of Gen. Marmaduke in proceeding so far eastward before making a movement northward into Missouri was to avoid all chance of collision or interference with his plans by Gens. Blunt and Herron. He hoped to reach Springfield and accomplish his purpose before they could obtain intelligence of his approach, and this once accomplished, those Federal generals and their army, deprived of all supplies, would, almost of necessity, be compelled either to surrender to Gen. Hindman or fly from North-western Arkansas. The scheme was well planned and circumstances indicated that it would be successful. Springfield had some defensive works, but they were not completed, and the Federal troops which were necessary to its adequate defence, were scattered widely over the entire region of South-western Missouri, two or three companies in a place. When, on the afternoon of the 7th of January, it was ascertained that the Confederate force had burned Lawrence Mills, and were then marching on Ozark, and would certainly appear before Springfield the next day, Brig.-Gens. Brown and Holland, who were in command there, the one of the Missouri State

militia and the other of the enrolled Missouri militia, exerted themselves to the utmost to call together a force adequate to the defence of the town, but their most strenuous efforts only sufficed to bring together about 1,100 men, of whom 400 were either convalescents in the hospitals or those who had just been discharged from those institutions, and the remainder were in about equal numbers Missouri State militia and enrolled Missouri militia, almost wholly raw troops. The commissary and quartermaster's stores were sent north toward Bolivar, only enough being reserved to maintain the siege, which were placed in one of the forts. The Confederate force (or rather about one-half of it, not far from three thousand men) appeared before the city about one p. m. on the 8th, and commenced firing with solid shot at once, without giving any notice for the removal of non-combatants. The fighting which followed was irregular, and occasionally the Confederates gained some advantages; but the courage of the new Federal troops seemed to increase under fire, and late in the afternoon they commenced driving the enemy from one position after another, till at night the battle ended, having continued five hours, when the Confederates retreated, carrying with them a part of their wounded. The Federal loss was 14 killed, 145 wounded and 5 missing. The Confederates lost 41 killed, and over 160 wounded, of whom 80 were left in the town as prisoners. The next day the garrison of the town were ready to renew the battle, but found that the Confederates had escaped, and they were too feeble to make a vigorous pursuit.

Before proceeding from Ozark to Springfield, Gen. Marmaduke had detached Gen. Porter with nearly 3,000 men to follow the road south of the Ozark mountains to Hartsville, and having made what captures he could there, to rejoin the main force again at or near Marshfield, having in view, probably, the extension of his expedition either to Lebanon or Bolivar. On the 9th, Gen. Porter occupied Hartsville, but evacuated it that night, and moved toward Marshfield. Gen. Fitz Henry Warren, in command of that Federal military district, sent from Houston on the 9th of January Col. Merrill, with 850 men, to Springfield to reinforce the Federal garrison there. They reached Hartsville on Saturday, the 10th, and learned that Gen. Porter had been there the day previous. Leaving Hartsville at 3 p. m. they marched to Wood's Forks, on the road toward Springfield, by nightfall, and encamped in line of battle. The next morning (Jan. 11th), at daybreak, they encountered Gen. Marmaduke's forces marching from Springfield, and though the Federal position was an unfavorable one, Col. Merrill fought till 9 o'clock a. m., when the Confederates withdrew in a southerly direction. Sending out a pursuing force of cavalry, and himself returning toward Hartsville, Col. Merrill soon found that the Confederates were also

marching toward Hartsville, and, as it afterward appeared, had formed a junction with Gen. Porter's command. Col. Merrill immediately ordered a forced march, and arrived in Hartsville in time to take a strong position, and awaited their attack. Firing commenced on both sides at a little after 11 a. m., and the battle raged till half-past 4 p. m., the Confederates charging repeatedly upon the Federal position, but being met at short musket range by so terrible a fire that they were compelled to fall back each time. At length, finding themselves unable to make any impression on the Federal garrison, the Confederates retreated, going at first toward Houston, but early the next morning they turned their faces southward, and moved rapidly toward the Arkansas line, near the north fork of White river. Their losses had been very heavy; Brig.-Gen. Emmet McDonald, and acting Brig.-Gen. Porter, two colonels, a major, a captain, and two lieutenants being among the killed, and several other officers severely wounded. Their entire loss was over 300 killed and wounded, and 29 prisoners. The Federal loss was 7 killed, 64 wounded, and 7 missing.

A portion of Gen. Marmaduke's force made their way to Van Buren Creek, and 300 of them were taken prisoners, on the Julia Roan, on the 28th of January. The greater part, however, descended the White river, and, with Marmaduke himself, camped at Batesville, Ark., from which town they were driven, after a sharp fight, by the Federal Col. Waring, on the 4th of February, a considerable number of the Confederates being killed and wounded, and a colonel and a number of privates being captured.

Gen. Marmaduke now repaired to the headquarters of the Confederate army corps in Arkansas, at Little Rock, and the next two months were spent by the generals of that corps mainly in enlarging and disciplining their force. The guerilla bands in Arkansas and Missouri made frequent dashes into the towns, and occasionally stopped steamers on the Missouri river, and plundered, captured, and murdered Federal citizens and soldiers, as in the case of the Sam Gaty, on the 28th of March, but these were only the acts of the irregular and bushwhacking troops in Missouri, and they generally met with swift retribution from the militia scouts and cavalry parties who patrolled all sections of that State. There was no considerable movement of Confederate troops till the latter part of April.

On the 17th of April, the Confederate general, Cabell, left Ozark, Arkansas, with two thousand men, two pieces of artillery, and three days' rations, to attack Fayetteville, Arkansas, which had been so many times a battle ground, and was then garrisoned by two regiments of Federal troops (the 1st Arkansas infantry and the 1st Arkansas cavalry), under the command of Col. M. La Rue Harrison. The attack was made on the 18th about sunrise, and

after nearly six hours' severe fighting the Confederates were thoroughly defeated and in full retreat for Ozark. Gen. Marmaduke and his superior officer, Maj.-Gen. Sterling Price, having at last collected a sufficiency of troops, mostly Texans, and a large portion of them cavalry, to render an expedition into Missouri probably successful, sought and obtained permission to attempt the capture and destruction of Cape Girardeau, at that time the depot of supplies for a portion of Gen. Grant's army. The Confederate force, which consisted of Price's (1st) army corps of the trans-Mississippi Department, numbering somewhat more than ten thousand men, under the command of Gen. Marmaduke, left Little Rock, Arkansas, about the middle of April, and on the 20th had crossed the State line, and following the course of the St. Francis river, reached Fredericktown, Mo., about the 22d. From this point they marched upon Cape Girardeau, and came before the town on the 25th. The garrison there was under the command of Gen. John McNeil, and consisted of one thousand seven hundred men, mostly militia. Gen. McNeil had reached Cape Girardeau on the night of the 23d, and had taken immediate measures for the removal of the Government stores into Illinois, and had sent to St. Louis for reinforcements. Confident of success, the Confederates, though repulsed in their first attack, demanded on Saturday night (25th) the surrender of the town, the demand being made by acting Brig.-Gen. Carter, whose brigade was in the advance. Gen. McNeil replied at once, declining to surrender, as he believed himself capable of maintaining its possession. Fighting was not resumed till 10 A. M. of the 26th, when Gen. Marmaduke again demanded a surrender, threatening to storm the town in case of refusal. Gen. McNeil again refused, and after nearly five hours' fighting, in which the Federal artillery, which was admirably served, caused great havoc among the Confederate troops, Gen. Marmaduke retreated southward. He was pursued closely by Gen. Vandever and Gen. McNeil, and harassed severely, but succeeded in escaping into Arkansas, on the 2d of May. His loss in the battle of Cape Girardeau was sixty killed and about three hundred wounded. In his retreat he also lost a considerable number of killed and wounded, and many prisoners.

On the 6th of May a Federal force of about one thousand cavalry, and about the same number of infantry, under command of Col. (acting brigadier-general) Powell Clayton, left Helena, Arkansas, on an expedition to the region of Arkansas, lying between the White and St. Francis rivers, to break up a band of guerrillas, and destroy Confederate stores accumulated there. The infantry went only as far as Snitzn's and then returned to Mariana. The cavalry proceeded to the vicinity of Taylor's Creek, a large detachment, however, going to Mount Vernon, and at these points, on the 11th of May, the two small bodies of cavalry, one

numbering two hundred and thirty men, and the other seven hundred and twenty-five, had each a severe fight with separate brigades of Marmaduke's division, and both repulsed them with heavy loss to the Confederates.

On the 20th of May, the Federal forces, about one thousand two hundred in number, under the command of Col. William A. Phillips, near Fort Gibson, Indian Territory, were attacked by the Confederates, under Col. (acting brigadier-general) Coffey, commanding a force of five regiments. After a desultory fight, in which, through the cowardice of the Creek regiment, the Federal troops lost a part of their cattle, Col. Phillips succeeded in driving the Confederate troops over the mountain, and finally, in complete disorder, across the Arkansas river. The loss on the Federal side was about twenty-six in killed, wounded, and missing; that of the Confederates considerably larger. There were repeated skirmishes in this and other portions of the department, but no severe fighting in the Indian Territory, till July 15th, when Maj.-Gen. Blunt crossed the Arkansas river near Henry Springs, in that territory, and on the 16th attacked a superior force of Confederates under Gen. Cooper, which he completely routed, they leaving their dead and wounded on the field. The Federal loss was seventeen killed and sixty wounded, while that of the Confederates was one hundred and fifty killed (buried on the field by the Federal troops), four hundred wounded, seventy-seven prisoners, and one piece of artillery and one hundred stand of arms captured. After several subsequent skirmishes with the Confederates, Gen. Blunt descended the Arkansas river, and on the 1st of September occupied Fort Smith, Arkansas. The army of the frontier having been greatly depleted to furnish reinforcements to Gen. Grant, while he was engaged in the siege of Vicksburg, the Confederate generals in the Trans-Mississippi Department took advantage of the fact to make an attack on Helena, Arkansas, where the Federal general, Prentiss, was in command, with a force of about four thousand troops. Here again Gen. Sterling Price and Gen. Marmaduke found scope for action. The Confederate attack was made on the 4th of July, with a force of about fifteen thousand men. It was commenced about daylight, and, at first, they were successful in capturing a small fort forming a part of the outworks, but the gunboat Tyler, coming up opportunely, and opening upon them with its heavy guns, they were compelled to abandon it with severe loss. Determined not to relinquish their purpose, the Confederates fought desperately, charging repeatedly, and with large masses, upon the defences of the town, attacking now the north, and now the south side, but everywhere they met with the same terrible resistance from the Federal fire at short range, and from the large missiles from the gunboat; and at length, utterly foiled at every point, having lost over one thousand in

killed and wounded, and more than one thousand one hundred prisoners, the Confederates fell back, and though remaining for a day or two in the vicinity, in hope of an opportunity to renew the attack, finding the Federal garrison reënforced, retreated to the interior of Arkansas.

After the surrender of Vicksburg, the Federal Gen. Steele was sent to Helena, with a considerable force, and instructed to form a junction with Gen. Davidson, who was moving south from Missouri, by way of Crowley's Ridge, west of the St. Francis, and with the combined force drive the Confederates south of the Arkansas river. Having effected this junction and established his depot and hospitals at Duvall's Bluff, on the White river, Gen. Steele, on the 1st of August, advanced against the Confederate army, which fell back toward Little Rock. After several successful skirmishes, he reached the Arkansas river, and threw part of his force upon the south side, to threaten the Confederate communications with Arkadelphia, their depot of supplies, and flank their position at Little Rock. Gen. Marmaduke was sent out with a cavalry force to beat the Federals back, but was completely routed. Seeing what must be the inevitable result of this movement of Gen. Steele, the Confederate Gen. Holmes destroyed what property he could, and after a slight resistance retreated with his army in great disorder, pursued by the Federal cavalry, and on the 10th of September Gen. Steele, with the Federal army, entered the capital of Arkansas. His entire losses in killed, wounded, and missing, in this whole movement, did not exceed 100. He captured 1,000 prisoners, and such public property as the Confederates had not time to destroy. The Federal cavalry continued to press the retreating Confederates southward; but a small force, which had eluded pursuit, and moved eastward, attacked the Federal garrison at Pine Bluff, on the Arkansas, south of Little Rock, hoping to recapture it and thus cripple the Federals, and break their communications. The attempt, which was made on the 28th of October, was repulsed with decided loss on the part of the Confederates, and the same day the Federal cavalry occupied Arkadelphia, and the Confederates retreated toward the Red river. This completely restored Arkansas to the Federal authority, except a small district in the extreme southwest, and the region of Northwest Arkansas, over which the guerilla and other irregular troops of the Confederates continued to roam, in their plundering excursions into Missouri, Kansas, and the Indian Territory. Some of these were conducted on a large scale, and were accompanied by acts of most atrocious inhumanity. On the 20th of August, one of the guerilla leaders, who had assumed the name of Quantrell, or Quantrile, with a force of 800, entered the city of Lawrence, Kansas; murdered in cold blood 125 of its citizens, and burned the greater part of the

city, destroying property to the value of over \$2,000,000. He was pursued as soon as troops could be raised, and forty or fifty of his men killed. The Confederate Gen. Cabell, collecting together as many of the guerillas and Indians as possible, and some of the routed troops, driven from Little Rock and its vicinity, started with a force variously estimated at from 4,000 to 10,000, in the latter part of September, from the Choctaw settlements of the Indian Territory, crossed the Arkansas river east of Fort Smith, and on the 1st of October, a detachment of his troops, under Gen. Shelby, joined Coffey at Crooked Prairie, Mo., intending to make a raid into South-western Missouri. This combined force, numbering 2,000 or 2,500 men, penetrated as far as the Missouri river, at Booneville, but were pursued by the Missouri militia, and finally brought to a stand, about eight miles southwest of Arrow Rock, on the evening of the 12th of October. Gen. E. B. Brown, who commanded the Federal troops, fought them till dark that evening, and, during the night, having detached a small force to attack them in rear, renewed the battle the next morning at eight A. M. After a sharp contest they fled, completely routed and broken up, with a loss of several hundred in killed, wounded, and prisoners. They were pursued to the Arkansas line, and prisoners gleaned all the way. Gen. Marmaduke, who seems to have been with Gen. Cabell, attempted to advance from Fayetteville, Ark., to reënforce them, but found them so thoroughly disorganized that the case was hopeless.

Early in October, a desperate effort was made to capture and murder Gen. Blunt and his staff, who was at this time marching toward Fort Scott, Kansas. Three hundred Confederate soldiers in Union uniform, approached him as he with his escort was in advance of his wagons. The escort, consisting of a hundred men, broke when the Confederates commenced firing on them, and seventy-eight of the hundred, including Major Curtis, a son of Gen. Curtis, were captured, and murdered after their capture. Gen. Blunt succeeded in rallying fifteen of the escort, and with these he advanced on his assailants, who retreated, till he found an opportunity of moving south, and joining the remainder of his command. These men, who thus murdered their prisoners, were under the command of Quantrell. The Confederates supposed that Gen. Blunt had been killed, and greatly rejoiced over his death. On the 20th of October, Gen. Blunt was relieved from the command of the Army of the Frontier, and Gen. McNeil appointed his successor.

With these last convulsive throes, the active existence of the Confederate authority in Arkansas died out. On the 12th of November, a meeting was held at Little Rock, to consult on measures for the restoration of the State to the Union, and was succeeded by others in different parts of the State.

The Department of the Northwest was not

without its disturbances, though the wholesale massacres of the previous year were, happily, not repeated. During the spring and early summer, there were occasional outrages on the part of the Sioux of Minnesota and Dakota, who penetrated the lines, although a guard of 2,000 men were stationed along the frontier, and murdered about 30 persons. About a dozen of these assassins were captured or killed. Early in June General Sibley started with a force of between two and three thousand men for Devil's Lake, in Dakota Territory, 500 miles from St. Paul's, and sent General Sully, about the same time, with a large body of cavalry, up the Missouri, to coöperate with him in cutting off the retreat of the savages. On the 3d of July, Little Crow, the principal chief of the Sioux, who had been actively engaged during the winter and spring in endeavoring to raise the Sioux and Yanktonais to make another attack upon the settlers in Minnesota, and had endeavored to obtain guns and ammunition from British America, was killed by Mr. Sampson, about six miles north of Hutchinson, Minnesota. He was not fully identified till some time after. The cavalry force under General Sully failed to connect with General Sibley, and that general encountered the Indians, near Missouri Conteau, on the 25th of July, and engagements followed between that date and the 29th, at Big Mound, Dead Buffalo Lake, Stony Lake, and on the banks of the Missouri. In these engagements between 60 and 70 of the Indians were killed and as many more wounded. The loss of General Sibley's troops was five killed and 4 wounded. On the 3d of September, General Sully encountered and defeated a body of Indians at Whitestone Hall, about 130 miles above the Little Cheyenne. A part of these Indians had previously been engaged against Gen. Sibley. A large number of them were killed and wounded, and 156 taken prisoners. Gen. Sully's loss was 20 killed and 38 wounded. The Indians fled across the Missouri, and most of them, it is believed, took refuge in Idaho Territory, where they were, late in the year, guilty of some outrages.

In January, 1863, roving bands of Indians committed some thefts, robberies, and murders in the western part of what is now called Idaho Territory, in the vicinity of Bear river. Acting Brig. General Connor, in command in that region, marched with a force of 275 men to Bear river, a distance of 140 miles, through deep snows, in which 76 of his men were disabled by frozen feet, and, with 200 men, attacked the Indian stronghold, in which 300 warriors were assembled, and after a hard-fought battle of four hours, destroyed the entire band, leaving 224 dead upon the field. His own loss was 14 killed and 49 wounded. Since that time the Indians in that quarter have been quiet.

At the close of 1863 the Federal armies had made large progress. The State of Missouri was placed beyond the danger of an invasion.

The military power of the enemy in Arkansas was broken, and the greatest portion of the State made subject to the army of the Union. The occupation of the mouth of the Rio Grande, in Western Texas, has destroyed one outlet from the Confederacy to foreign countries, and the commerce which thereby existed. The capture of Vicksburg and Port Hudson removed from the banks of the Mississippi every military station of the enemy, by which the navigation of that river could be closed. It broke up the facilities for communication between the States east and west of that river, and, with the occupation of the eastern part of Tennessee, gave to the Federal arms the entire control of that State. It brought under the same control a part of the States of Mississippi and Louisiana on the shores of the river. In the East there was no material change in the position of military affairs. No operations of any magnitude had taken place in the Departments of Virginia and North Carolina. And with the exception of the siege of Charleston, the same is true of the Department of the South, embracing the States of South Carolina, Georgia, and Florida. The territory thus lost by the enemy embraced some of the most important districts for producing grain and cattle in the Southern States. It also contained some valuable deposits of nitre, used for the manufacture of gunpowder. The Secretary of War, in his annual report, in December, said: "The success of our arms during the last year has enabled the Department to make a reduction of over two hundred millions of dollars in the war estimates for the ensuing fiscal year."

ASIA. Asia has, at present, only three great countries, which are purely Asiatic: China, Japan, and Persia. Each of these is now in constant intercourse with the countries of Europe and America. China and Japan, in particular, are undergoing a transformation which bids fair to become one of the prominent events in the history of the nineteenth century. (*See CHINA and JAPAN.*)

Persia has an area of about 546,000 English square miles, with a population of nearly ten millions. Its intercourse with the countries of Europe has, of late, become more frequent, and the Government has adopted in the administration of affairs some of the forms of European countries. A Persian newspaper has been established in the capital. A telegraph line has been completed between Teheran, Tabreez, and Reshd, and encouraged by its success, the Government has ordered the construction of a new line, to connect the Persian capital with Bagdad, and thus with Europe. The Persian army, in June, 1862, consisted of 95,000 infantry, 500 regular cavalry, 29,030 irregular cavalry, 5,000 artillery, and 380 "Zambareks" (to serve artillery drawn by camels). In 1863 the Persian Government sent 20,000 men to the frontier of Afghanistan, because the ruler of that country, the celebrated Dost Mohammed, had attacked Herat, a principality,

the autonomy of which had been guaranteed by both England and Persia. Dost Mohammed captured Herat on May 26th, but died three days later, May 29th. The governor of Herat, Ahmed Khan, took refuge in the Persian camp at Khourivan. It was expected that this would lead to a war between the Persians and Affghans, but up to the end of the year no hostile movements had taken place. The Affghans were masters of the whole province of Herat, and were even preparing to invade Khorassan.

The Sultan of Bokhara, a country in Central Asia, which has long been celebrated for the hostility of its rulers to all foreigners, imprisoned four Italians who had entered the country for the purpose of making investigations into its silk cultivation. The fact having come to the knowledge of the Russian Government, the emperor at once instructed the governor-general of East Siberia to use all means within his power to obtain the release of the travellers.

The British rule in India was, during the year, again threatened with new danger. Another insurrection broke out among the warlike tribes of the mountains of the north-western provinces, and for some time appeared to assume alarming proportions; at the close of the year, however, the Government felt confident that it would soon be suppressed. England now rules in India over a native population of, at least, 137,000,000 inhabitants, of whom only about 4,000,000, including the native Christians, the Parsees, the so-called East Indians (of mixed European and Indian descent), are supposed to be friendly to the preservation of British rule. There is, however, no doubt that India is making more rapid progress in civilization, in education, and material prosperity, than any other part of Asia. (See INDIA.)

France is making extraordinary efforts to extend her territory in Asia. A new insurrection broke out against her rule in Cochin China, but it was soon suppressed. Admiral La Grandière, who is at the head of the French administration in Cochin China, visited the king of Cambodia, the declared enemy of the Emperor Tu-Duc, of Anam, and the result was most satisfactory. The French obtained by treaty the rights of commerce with that vast country; they were authorized to work all the immense forests gratuitously, if for the service of the French Government, and on payment of a small royalty for private commerce. A French resident agent was to be established at Hondon, and that post was confided to a surgeon in the navy well acquainted with the habits of the people, and who will exercise a twofold influence by his diplomatic relations, and by the practice of his surgical skill. The admiral visited in detail the copper mines of Mouorre, which in extent are far beyond any of the kind to be met with in Europe.

A thin letter to the *Paris Moniteur de l'Armée*, dated A letter from Cochin China, September 6th, 1863, Saigoon, by the treaty concluded between stated that.

the king of Cambodia and the French admiral, the whole kingdom had been placed under the French protectorate, and that the main stipulations were: 1. Cambodia recognizes the supremacy of France, entering into the same relation to France in which it formerly stood to the emperor of Anam. It is admitted by the official French paper, that the king of Siam also claims the rights of a protectorate over Cambodia; but it is said to result from indisputable documents that his claims are not so old as those of the king of Huc (Cochin China), into whose place France has now stepped. 2. France obtains the right to establish a settlement in Cambodia, on the banks of the river Mei Kong (also called Cambodia), at Nam-Van. This is a point of the greatest strategic importance, and will make the French masters of the largest and most important river in Farther India. The treaty also contains liberal stipulations in favor of the Roman Catholic religion. English papers in India express the opinion, that in less than a quarter of a century the English and French frontiers will meet somewhere between Burmah and Siam.

The war of the Circassians against Russia continued with various vicissitudes throughout the year. (See RUSSIA.) The Russians are constantly extending their territory in Central Asia. It is particularly reported that they have retaken the fortress of Pishpek, on the river Tohu, one of the strongest places in the Sultanate of Khokan, the capture of which seems to augur unfavorably for the independence of the martial Turcomans. The place had been captured by the Russians once before, about three years ago, but subsequently was retaken by the Khokandese.

As to the religious denomination of the Asiatics, the number of Christians may be estimated at about 15,000,000. Of these about 7,000,000 are Roman Catholics, who are quite numerous in the Spanish possessions (5,000,000), India (1,000,000), Farther India (520,000), and China, 337,000. The progress of the French in Farther India, and the influence of the same power in China promise to the Roman Catholic Church a considerable increase of numbers. Protestant Christianity is strongest in India and Farther India, in both of which countries there are many indications of its rapid progress.

ASTRONOMICAL PHENOMENA AND PROGRESS. The year 1863 has been marked by no small degree of activity and success on the part of those engaged in prosecuting this department of science. In the main, the questions that have been most prominent are the same with those named in our record of the preceding year; a larger share of attention, however, having been given to the new form of investigation of the heavenly bodies, by means of observations upon the spectra afforded upon prismatic decomposition of their light, which will be noticed more fully on a future occasion.

In a communication to the ninth volume (new series) of the "Scientific American," Mr. H. P. Tuttle briefly names some of the most remarkable evidences of the progress of astronomy—a progress, he thinks, behind that of few, if any, of the other sciences—since the beginning of the current century. To the six planets only that were known at the end of the year 1800, we are now able to add 80 others which have been since discovered—79 of them directly by aid of the telescope, and one (Neptune) by its use guided by mathematical deductions from observed phenomena of other planetary bodies. In case of Saturn a new ring and a new satellite have been disclosed. Up to 1812, but one comet (Halley's) was certainly known to return: before the close of 1858, there had been added to the list of periodical comets 9 whose periods vary from $3\frac{1}{2}$ to 70 years, and about 20 with periods ranging from 100 to 10,000 years; while nearly 100 are now known whose orbits are of sensibly parabolic form.

Again, while Sir Wm. Herschel was the first to detect the existence of multiple stars—usually binary, or as these are commonly called, "double"—more than 100 instances of such pairs or sets of stars, the members of each of which have a mutual revolution about their common centre of gravity, are now known. In case of some of these double, or generally speaking, "multiple suns," one complete revolution of the sort here referred to, and part of a second, have been already noted. In theoretical astronomy, Dr. Hansen's new tables of the moon, and Leverrier's new tables of the sun, Mercury, and Venus, now enable the astronomer to calculate with an accuracy far exceeding that before attainable the celestial phenomena which were taking place twenty centuries ago. Of course, a chief and indeed indispensable means to all these important results, has been the single device of the telescope.

Asteroids.—In the preceding volume was given a list of the minor planets from (51) to (76) inclusive—the period of their discovery extending from the year 1857 to Oct. 1862; and also certain particulars of interest connected with the discovery of some of these. Astronomers appear as yet to allow asteroid (75) to retain its place, subject to the result of future observations. The record for 1862 is, then, to be completed by the discovery, Nov. 12th of that year, of asteroid (77) by Dr. C. H. F. Peters, of Hamilton College Observatory. This planet, however, which was at the time near to Feronia, and corresponded in brightness with a star of the 11-12th magnitude, very soon eluded observation, and may even require discovery *de novo*. No name appears to have been assigned to it. Asteroid (78) was found by Dr. Luther, of Bilk, March 15th, 1863. It appears as a star of the 10th magnitude, and was named by its discoverer Diana. On the night of Sept. 14th, of the same year, Prof. J. C.

Watson, of the observatory at Ann Arbor, Michigan, discovered asteroid (79). This planet which shows about the 10th magnitude, was independently discovered by M. Tempel, at Marseilles, Oct. 3d and 4th; and later elsewhere. Prof. Watson has chosen for it the name of Eurynome. The supposed asteroid (80) announced by M. Schmidt, of Athens, proves to be an instance of erroneous observation—the before known planet, Hygeia, having in fact been rediscovered.

Thus, the record of these discoveries, from Oct. 1862 to Oct. 1863, is as follows:

1862, (77)..... by Dr. Peters.
1863, (78) Diana,..... " Dr. Luther.
" (79) Eurynome,..... " Prof. Watson.

Comets.—Comet III, 1862, announced in the preceding volume as discovered by Dr. Bruhns, was first detected about three days earlier (Nov. 28th), by Professor Respighi, of Bologna. The discovery of Comet I, 1863, is mentioned in the account of last year. Comet II, 1863, was found, April 12th, by M. Klinkerfues, in right ascension 309° , declination 3° south. On the 19th of May, it was 10° distant from the north pole, and appeared as a round nebosity, $5'$ to $6'$ in diameter. Comet III, 1863—by Respighi, April 13th, near β Pegasi. Its nucleus then had the brightness of a star of the 6th magnitude; April 25th, the tail had a length of 2° . Comet IV, 1863, was found, Oct. 9th, by M. Bäcker, of Nauen. Like the other comets of the year thus far named, it was telescopic merely. It attained its greatest brilliancy, Dec. 8th; perihelion Dec. 27th. Comet V, 1863—by M. Tempel, Marseilles, Nov. 4th; this was visible to the naked eye, its nucleus nearly stellar. Comet VI, 1863, was observed by M. Schmidt, at Athens, in the month of December.

In a supplementary page inserted in the "Amer. Jour. of Science," January, 1864, appeared a note from Prof. Watson, of the observatory at Ann Arbor, in relation to the (supposed) discovery of a new comet by him, on the evening of January 9th, 1864. The comet was then quite large and bright, with a nucleus strongly condensed at the centre, and a tail $1\frac{1}{2}^\circ$ in length. From observations continued to the 12th, Prof. W. inferred a resemblance, in the elements of the orbit to that of the comet of 1810; and he remarks that subsequent observations must determine whether the comet had returned in the interval. In a later communication ("N. Y. Evening Post," Feb. 1st), he states that the comet would be very near the earth about the date just given, and suggests an attempt to determine by it the solar parallax. It does not yet appear that these anticipations have all been well grounded.

In the "Evening Post" of February 6th, appeared a letter from Messrs. Silliman and Dana, inclosing a communication of Mr. D. M. Covey, of Southville, N. Y., dated December 26th, 1863, and addressed through the "Herald of Progress" to Prof. D. Trowbridge, in which

Mr Covey gives an account of a comet first seen by him, November 21st, preceding, in declination, nearly 15° N., and right ascension 200° . On that date, it had the size of a star of the third magnitude; its course was afterward found to be northeastwardly, from Arcturus toward Vega in the Harp; its brilliancy was diminishing, and it soon became invisible to the naked eye. Messrs. Silliman and Dana say there is hardly a doubt that this was the comet described by Prof. Watson, and detected (it now seems), a few days previously (Dec. 28th, 1863,) by Respighi, of the University of Bologna. The most remarkable circumstance in the case is, that a comet visible to the naked eye should be present in the heavens a full month before its discovery was made at any observatory; but it was visible at about five o'clock A. M., an hour when most astronomers have concluded their labors.

Spectra of Fixed Stars, Etc.—The results thus far arrived at in the way of determining the character of the spectra of different fixed stars, and others of the heavenly bodies, and hence, by inference, their physical and chemical constitution, are as yet to some extent at variance. This, indeed, was to be expected in the outset of observations of so extreme delicacy, conducted by different persons, with different forms of apparatus, and under differing conditions of the terrestrial atmosphere. Prof. Donati finds, in the case of nearly all the stars which have been examined both by M. Fraunhofer and himself, different systems of fixed lines from those originally laid down by the latter; and some differences, again, exist between the systems given by either of these and the spectra of the same stars as noted by M. Secchi in Italy, by Mr. Rutherford in New York, and by Dr. W. A. Miller and Mr. Wm. Huggins in England.

Fraunhofer had not condensed upon his prism the light of the star to be examined, but placing the prism and a cylindrical lens before the objective of a small (observing) telescope, he directly viewed the spectrum afforded by analysis of the light, of such intensity as it naturally fell upon the apparatus. The cylindrical lens was to supply the place of the fine slit between knife-edges first employed for the solar spectrum by Wollaston; such a lens acting to elongate the image of the star in one direction only, or to a line, and giving to the spectrum the desired breadth without increasing its length.

Mr. Rutherford ("American Journal of Science," Jan. and May, 1863) states that throughout the course of his observations he received the light through a slit on its way to the prism; but that, finding that the necessity of throwing the star slightly out of focus occasioned a considerable loss of light upon the jaws of the slit, he was later led to add to the arrangement the use of the cylindrical lens—introduced between the objective of the condensing telescope and the prism—and with the effect of largely increasing the light, and, of course, the

distinctness of view of the parts of the spectrum obtained. The lens is useful only in the analysis of merely luminous points, as the stars may be assumed to be, and not in case of the planets, sun or moon. Excepting the addition now named, the spectroscope was simply that of Bunsen and Kirchhoff, "consisting of a condensing telescope with adjustable slit, a scale telescope with photographed scale of equal parts showing bright lines upon a dark ground, a flint-glass prism of 60° , and an observing telescope with Huyghenian eye-piece, magnifying about five times." If the telescopes be not perfectly achromatic, some change of focus will be required in order favorably to observe the different regions or colored spaces—the ultra-red rays requiring a slight, and the violet and indigo a considerable, change of focus from that answering for the intervening portion of the spectrum. For exact comparison of different observations, the place of the sodium-line D was, in each instance, brought to coincide with the division of the scale marked 30.

With the apparatus so adjusted, the locations of the seven principal lines of the spectrum of sunlight, as determined by Mr. Rutherford, are as follows (the letters reading of course, from red to violet): B 33.1, C 32.3, D 30, E 27, 26.5, F 24.4, G 19.3, H 14.5. 13.9. By means of a plate (highly valuable for reference) he gives a comparative view of the spectra of the sun, moon, Jupiter, Mars, and 17 of the brighter among the fixed stars. In the lunar spectrum he finds the principal solar lines, B, C, D, E, and F, and he supposes that G may yet be detected. The lunar lines just named are very strong and well defined; and other marked features are beyond F, a broad faint band at 21.05, a broad line at 19.9, and a broad dark line at 18.09.

Most noticeable in the spectrum of Jupiter are the distinct line D, and two broad bands respectively at 32.1 and 31.12; in that of Mars D is wanting, though there is a well-defined line near its place, at 30.25, other strong lines at 27.1 and 26.55, and a broad band at 24.4.

Without attempting to fix upon any final principle of classification for the stars he has examined, Mr. Rutherford for the present divides their spectra into three groups: "first, those having many lines and bands, and most nearly resembling the sun—viz., Capella, β Geminorum, α Orionis, Aldebaran, γ Leonis, Arcturus, and β Pegasi. These are all reddish or golden stars. The second group, of which Sirius is the type, present spectra wholly unlike that of the sun, and are white stars. The third group, comprising α Virginis, Rigel, etc., are also white stars, but show no lines; perhaps they contain no mineral [query—metallic?] substance, or are incandescent without flame." Taking Capella and Sirius as good examples of the first two classes of stars just named, their spectra are thus described: Capella—a line respectively at 30.22, 27.73, 27.38, 26.75 and 24.78; Sirius—a broad black line, or band,

respectively at 32.4, 24.8, 19.9, 16.8; the limit at 14.5. In the spectrum of this last star no fine lines have been found; the lines observed are all broad and black, with margins well defined, being in fact so many complete interruptions of the colored field. The spectrum of α Orionis is marked by three broad bands, that of Aldebaran by four, and that of β Pegasi by eight, these in all cases lying mainly within the less refrangible half-length of the entire field; and all these, as well as the bands in the light of Jupiter, are supposed by Mr. Rutherford to be absorption bands due to the atmosphere of the respective bodies, but which may yet possibly be resolved into lines.

In conclusion he alludes to the evidence now possessed to the effect that the stars differ in their constituent materials, and asks "What then becomes of that homogeneity of original diffuse matter which is almost a logical necessity of the nebular hypothesis?"

In his second article he mentions having added a prism by means of which the spectrum from a spirit lamp is constantly present in the field of view. He finds this a most useful check, and by means of the comparison so afforded he has proved the presence in the spectrum of Arcturus of the lines D, E, b, and G, and has become almost certain that each line furnished by its light has its counterpart in the solar spectrum.

M. Secchi, of Rome, has used a Janssen's spectrometer of direct vision, and he is astonished at the magnificence of the results—probably favored by an unusually pure atmosphere—which he thus obtains. He has published the determinations only of five stars. He finds in α Orionis a line at F, and four between F and G, where one only is given in the Greenwich observations. The spectrum of Aldebaran is of greater extent, and 16 bands of various breadths were noticed in it. He finds a spectrum of Rigel, as well as of Sirius, both white stars; these are longer than the spectra of red stars, and in the former also the prominent lines appear chiefly in the blue and violet spaces at one extreme, and the red at the other. The band F, which so far would appear to be as prominent in the light of all the stars as it is in that of the sun, Secchi thinks, may be due to absorption by our atmosphere.

Mr. Huggins and Dr. Miller have examined a series of from 30 to 40 stars, and obtained microscopic photographs of Sirius and Capella. The former takes the solar line D as the starting point for his measures, having the solar and a stellar spectrum in the field at the same time. And since he finds that, generally, length of spectrum corresponds with heat of flame, he hopes that by means of these observations we shall yet determine not only the chemical constitution, but also the comparative heat of the sun of our system, and certain of those other suns which we name the fixed stars.

The Sun and Stars Photometrically compared.
—Mr. Alvan Clark, of Cambridgeport, Mass.,

gives "Amer. Journal of Science," July, 1863) an account of certain experiments intended to determine on a new principle the relative intensity of the light of the sun and fixed stars; and approximately, therefore, the relative distances of those bodies.

Suppose a lens of known focal distance, say one foot, is placed between the eye and a star of the first magnitude, and that the lens is then made to recede from the eye in the line of the star until the effect is to diminish the latter to a point of light barely visible—in other words, to reduce it to a star of the sixth magnitude—at that moment when the lens (if convex) is 11 feet from the eye: at this distance of the lens the star has undergone a reduction of ten diameters; and accordingly, on the supposition that there is no absorbing or extinguishing medium in space, it follows that such star would itself be visible, though then barely so, if it were removed to ten times its distance in space from the observer. Hence, the distance to which different ones of the self-luminous celestial bodies must be removed to bring them respectively to the point of bare visibility—to a *minimum visibile*—becomes a direct means of comparing the intensity of their light; and, so far as we can assume their actual sizes and brilliancies identical, a means of determining indirectly their distances.

In the use for this purpose of a convex lens, the measure is commenced at the focal point: and the number of times the diameter is reduced is equal to the number of focal distances the lens is removed *less one* (e. g., 11 focal distances, less 1, give a reduction of ten times in diameter, and in brightness); but with a concave lens, the measure is the actual distance from the lens itself. For these observations Mr. Clark has an underground, dark chamber, 230 feet long, accessible at one end from his workshop, and communicating with the surface at the other end by a vertical opening, one foot square. A common plane silvered-glass mirror, set at a suitable inclination over the orifice, reflects the rays of the sun or star down the vertical opening in the ground upon a prism so placed as to throw the light, by total reflection, in the line of the axis of the horizontal chamber; and no light can enter the latter save through this lens. To the side of the prism facing the chamber is cemented with Canada balsam (so perfectly as to render the two optically one medium) the flat side of a plano-convex lens, say of 1-20th of an inch focus. Then an observer in the cellar 230 feet distant sees through this lens the sun reduced 55,200 times; and its light varies little from that of Sirius. To multiply the reducing effect, a second lens of known focal distance, say 6 inches, is mounted on a little car, which, by cords and a pulley, can be sent to any required distance on a track toward, and in the line of, the fixed lens.

At noon, March 19th, with a perfectly clear sky, Mr. Clark found the sun barely visible

through the two lenses when the movable one was 12 feet from the eye, and when being 218 feet from the fixed lens, the reduction given by the latter alone was 52,320 diameters, and the multiplying effect of the second lens = $12 \times 2 - 1 = 23$ times, the total reduction being thus 1,203,360 times. By observations expressly devised for such purpose, he concludes that the proportion of the light of the sun or a star that will be lost in these experiments by the extinguishing action of the mirror, prism, and lenses, will be in effect almost exactly compensated by the additional light also reflected by the mirror from a small region of sky just about the sun or star. Proceeding upon this admission, the following are the results at which, in his earlier observations, Mr. Clark arrived;

The sun is visible when reduced.....	1,200,000 times.
The full moon.....	3,000 "
Sirius.....	20 "
Procyon.....	12 "
Pollux.....	11 "
Castor.....	10.8 "

The following comparisons will show the relation in which these results stand to the measures of the sun's light previously given by Dr. Wollaston, and by Mr. Bond, of Harvard College Observatory. To reduce our sun to the brightness of the star α Lyræ, the distance of the former must be increased, according to

Wollaston, nearly.....	425,000 times.
Bond, ".....	155,000 "
Clark.....	102,000 "

And the light received from these luminaries differs, according to

Wollaston, as.....	180,000,000,000 to 1
Bond, ".....	24,000,000,000 "
Clark, ".....	10,400,000,000 "

Mr. Clark's method, it will be seen, does not depend upon comparisons with artificial lights, but makes a simple reduction of the luminary observed to a *minimum visibile*, under the most favorable conditions of observation, the standard in all cases.

In his later experiments, he prepared a close covering for the opening to the dark chamber, with a circular perforation, subtending at the prism an angle of $32''$, and substituted a lens of one-eighth-inch focal distance. Then, by use of two additional lenses, adjustable by sliding, and placed in a telescope tube properly darkened within, he found that it required on some occasions a reducing power of nearly 1,600,000 to send the sun completely out of sight.

Mr. Clark shows that these observations have an important bearing on the question of the existence of an extinguishing medium in space. The more powerful telescopes reveal, in proportion to their power, a far less number of stars than are visible to the unassisted eye; in other words, the appearance is as if the remoter fields of space were more and more thinly tenanted with stars, in comparison with the number within the sphere of direct vision. This fact has been made an argument for an extinguishing medium in space; the greater sparseness of the more distant or telescopic stars being supposed due to the circumstance

of entire extinction of the light which would otherwise reach us from the larger proportion of the stars of those regions. But Mr. Clark suggests, what is obviously true, that if different stars actually differ in original or inherent splendor, then it will be the least luminous which at any given distance will first elude the eye, and as the distance is increased, a continually larger proportion of all the stars will thus—as a simple effect of reduction by increasing distance—disappear; so that the sparseness of stars in the outermost yet penetrated regions of the universe does not necessarily prove the presence of an absorbing medium, or ether, between their place and the earth, but may merely illustrate the known and simple relation of the apparent magnitude or brilliancy of a visible object to its distance.

The Question of the Sun's Distance from the Earth.—Professor Joseph Lovering, of Harvard College, has communicated to the "American Journal of Science" (Sept., 1863), a highly important paper upon the subject of the sun's distance from the earth, as computed from the several sorts of data relied on, and especially upon the remarkable variance of the result very recently obtained by M. Foucault from previous calculations, and the general effect of this variance, if confirmed, upon the distances and magnitudes of the various astronomical bodies.

First, as to the usual methods for determining the sun's distance: To see the distance of any body is an act of *binocular vision*. In case of near bodies, the interval between the two eyes is the base-line of a triangle of which straight lines from the object to the eyes respectively form the other two sides; and the *sensation* of effort in converging the eyes upon the object, guided by experience, gives us approximately the distance. As the object is farther removed, the base-line must be taken greater, until, in attempts to determine the distance of the sun, it is made the distance between two telescopes directed toward that body from points at the opposite extremities of the earth's diameter; and certain parts of the triangle, giving the distance of the object, are now found by calculation. The angle between the directions of the two telescopes is the "solar parallax;" and the distance of the sun will vary—the base-line being supposed known—as the magnitude of this angle. Since a small error in the solar parallax would involve a large error in the sun's distance, astronomers select a planet coming nearer the earth than the sun—either Venus, at inferior conjunction, or Mars at opposition. The former observation can only be made in case of a transit across the sun's disc, the quantity determined being the difference of parallax between Venus and the sun: viz., from about $21''$ to $25''$. From the combined observations of the two transits of Venus last occurring—1761 and 1769—Encke deduced the solar parallax as $8''.57116$. This corresponds to a solar distance of 95,360,000 miles. Transits of Venus will occur in 1874 and 1882; but

Encke declares they will be so unfavorable for observation that the reduction of error in the solar parallax by this means to within a limit of $\frac{1}{1000}$ th of a second, is hopeless for at least two centuries to come. The solar parallax, as derived from that of Mars, in 1740, by Lacaille, was $10''.20$, with a possible error of $0''.25$; and in 1832, by Henderson, $9''.028$. Dr. B. A. Gould computed it from the first opposition of Mars observed by Lieut. J. M. Gilliss, 1849-'52, in Chili, at $8''.50$. Various determinations of the solar parallax, from the law of gravitation, and based chiefly on perturbations of the moon's longitude, have placed it at from $7''.80$ to $8''.84$; while the most recent by methods of the sort here referred to, are, that of Hansen in his new "Tables of the Moon," $8''.8762$, and of Leverrier, $8''.95$.

[Evidently, with a fixed base line, the greater the actual parallax, the less is the true distance of the sun from the earth. In a recent account of this same question, Mr. Hind calls attention to the fact that the deductions from the first transit of Venus, taken alone, gave a solar parallax of $8''.9142$, which is nearly as great as that of the most recent calculations based on other methods. He speaks of the increase of the solar parallax from the value found by Encke, and usually adopted, to about $8''.95$, as being now demanded by the concurrent results of six distinct authorities, among whom are some of those just named; but he thinks that in their calculations astronomers will retain the old value till the next transits of Venus; and, doubtless with a view to observations of these, he remarks that the important question which has recently been raised as to the existence of a large error in the estimated distance of the sun, may perhaps be set at rest in twenty years, though hardly in less time.]

Römer, as is well known, by observations of eclipses of Jupiter's satellites, first determined the fact that the transmission of light through space requires time, and calculated from the time apparently occupied by the sun's light in crossing the orbit of the earth the velocity with which it must move. Delambre, from a discussion of 1,000 of those eclipses, deduced the time of the passage of light over the mean distance from the sun to the earth as 493.2 seconds; and 96,360,000 miles divided by this number gives 193,350 miles per second as the velocity of light. Again, taking the sun's distance as now given, the velocity of the earth in its orbit is 18.977 miles per second; and the velocity of light calculated by Bradley's principle of aberration—the amount of the aberration according to Struve being $20''.45$ —is 10,088 times that of the earth in its orbit = 191,513 miles a second. From Fizeau's experiment in 1849, with a revolving toothed wheel, the radiating teeth and included spaces of which alternately interrupt or transmit, according to the moments in which it is returned to the edge of the wheel, a ray of light reflected between distant mirrors, the velocity of light was

calculated at 194,667 miles a second. Finally, Foucault has carried out, and apparently with entire success, the application suggested by Arago of Wheatstone's revolving mirror (with the addition of needful apparatus) to the purpose of determining the absolute velocity of light; and the result at which he arrives is a velocity equal only to 185,177 miles in a second.

Now, this velocity is more than three per cent. less than the lowest usually accepted (192,000 miles), as deduced from the sun's accepted parallax and distance. But Foucault states that the extreme difference of results in the various trials made by him did not exceed $\frac{1}{1000}$ th of the entire value; and he believes that the mean result can be trusted to the $\frac{1}{5000}$ th part of the value; while the aberration adopted ($20''.45$) in Bradley's method cannot be supposed at fault beyond the $\frac{1}{18000}$ th part of the whole. How is the new velocity of light to be reconciled with the old value of aberration? This latter establishes the *ratio* of the velocity of light to that of the earth. And if this ratio must still be accepted, while one term of it (the velocity of light) must be diminished by three per cent., then inevitably the other term of the ratio must also be diminished, and proportionally. Is it possible that there is an uncertainty, to the amount of three per cent., in the orbital motion of the earth? Shall we have to reverse hereafter the usual mode, and determine the velocity of the earth in its orbit from that of light, accepting the latter as the better known of the two? The error in the earth's movement, if it be such, is an error not in time but in space. We cannot, as the slower terrestrial velocity would (on that side of the question) require, lengthen the year by about 11 days; hence we must, as the only other way of satisfying the new facts, diminish our estimate of the circumference of the earth's orbit; and of course, therefore, in like proportion lessen the mean radius of the orbit, *i. e.*, the sun's mean distance. [It will be noticed that the recent tendency to a larger solar parallax has the same general effect as Foucault's reduction of the velocity of light; namely, to place the earth nearer to the sun.]

Foucault's experiment on the velocity of light has been popularly announced as making a "revolution in astronomical science." Prof. Lovering judges that it has only attracted popular attention to an old difficulty, and perhaps given a solution of it. "Neither the velocity of light, aberration, nor the sun's distance can be [was?] suspected of an error to the extent of 3 or 4 per cent.; and yet one at least must be wrong to this degree, as the best values of the three elements are irreconcilable with each other. Which shall be changed?"

"It may excite surprise in those who have heard of the *accuracy* of astronomy, without weighing the exact significance of the word as applied to so large a subject, that there should still be a lingering uncertainty, to the extent of three or four millions of miles, in the sun's

distance from the earth. But the error, whatever it is, is propagated from the solar system into the deepest spaces which the telescope has ever traversed. The sun's distance is the measuring rod with which the astronomer metres out the distances of the fixed stars and dimensions of the stellar orbits. An error of three per cent. in the sun's distance entails an error of three per cent. in all these other distances and dimensions. Trifling as three per cent. may seem, the correction runs up to 600,000 millions of miles in the distance of the nearest fixed stars."

Mr. Hind, also, in the paper already quoted from, remarks of the proposed increase of the solar parallax that by it the earth is brought about 4,000,000 miles nearer the sun, and its annual path shortened by about 25,000,000 miles, its orbital motion being correspondingly diminished. So, he adds, with the single exception of the moon, both the distances and dimensions of all the other bodies of the solar system, as expressed in miles, must be diminished in proportion. These, however, are matters of curiosity. And he states that—as we may suppose, because calculations respecting the heavenly bodies mainly involve *relative*, and not absolute values,—the proposed change in the parallax of the sun will produce but little effect in the most delicate astronomical investigations.

NOTE.—Since the above abstract was prepared, there has come to our notice a summary of an article contributed by M. Foucault to the "Comptes Rendus," November 24th, 1862, on the "Experimental Determination of the Velocity of Light, and a Description of the Apparatus." In this, that author speaks of having found a source of error in the micrometer (an instrument seldom so accurate as is commonly thought); and having obviated this error by means of another method of determining the deviation of the image observed in the revolving mirror, he considered himself at the time of writing able to give with confidence the number appearing to express the velocity of light in space; namely, 298,000 kilometres = 190,249.16 miles, in a second of mean time. This result, if accepted, would imply a less magnitude in the errors of distance, &c., above considered.

Motion of the Sun in Space.—From a consideration of the proper motions of the stars in space, Sir Wm. Herschel, Argelander, Gallogay, and others were led to infer that the sun is moving in the direction of the constellation Hercules; and Struve attempted to calculate its annual motion toward that point. From a more extensive series of observations made upon 1,167 stars, Prof. Airy is unable to find a confirmation of this conclusion; and by like observations and calculations Mr. Dunkin arrives at the same result. Latterly, it had been proposed to investigate this problem by finding whether or not the direction of motion of comets, before coming into the solar influence, was different from the motion concluded to belong to the sun. But Mr. Carrington and

Prof. Fearnley now declare their opinion that even this method could not be successfully applied; and they advise that the observation and determination of the proper motions of the stars, with a view to this question, be still persevered in.

Some Points relating to the Constitution of the Sun.—Sir Wm. Armstrong, in the opening address before the British Association for the advancement of science, at the meeting for 1863 (Aug. 26th), made upon this subject, among others, the following remarks:

"Of all the results which science has produced within the last few years, none have been more unexpected than those by which we are enabled to test the materials of which the sun is made, and prove their identity, in part at least, with those of our planet." The same researches have also corroborated previous conjectures as to the luminous envelope of the sun.

Among the most remarkable discoveries in connection with the sun must be ranked that of Mr. Nasmyth, to the effect that the bright surface of this body presents the appearance of an aggregation of apparently solid forms, shaped like willow leaves, or some well known forms of Diatomaceæ, and interlacing one another in all possible directions. These mysterious objects appear in some way connected with the heat, and [if we can understand what, in a physical sense, this is] the vivifying power of the sun. They have been seen by other observers, and computed to be each not less than 1,000 miles in length by about 100 in breadth. The enormous chasms in the sun's photosphere, to which we apply the diminutive appellation of "spots," exhibit the extremities of these leaf-like bodies pointing inward and fringing the sides of the cavern far down into the abyss. Sometimes they form a rope or bridge across the chasm, and appear to adhere to one another by lateral attraction.

A most remarkable phenomenon was seen by independent observers at two different places on the first of September, 1859. A sudden outburst of light far exceeding the brightness of the sun's surface, was seen to take place, and then to sweep like a drifting cloud over a portion of the solar face. This was attended with magnetic disturbances of unusual intensity, and with the exhibition of auroras of extraordinary brilliancy. The instant of the effusion of the light was recorded by an abrupt and marked deflection in the self-registering instruments at Kew. Probably, in fact, but a part of the phenomenon was seen, as the magnetic storm attending it commenced before and continued after the event. Perhaps this phenomenon should be regarded as having a connection with the renovation of the sun's heat. Thus, it may be explained on the supposition of the plunging of cosmical matter into the sun with the prodigious velocity which gravitation would impart to it, the arrested motion giving place to its equivalent of heat.

The comparison of the observations upon the 11-year period in the solar spots, first detected by Schwabe, in 1843, and the corresponding or secular period in the diurnal variation of magnetic action upon the earth, is still being prosecuted; but no new results of importance are announced.

Heat of the Sun's Surface, and Currents in its Atmosphere.—In a paper before the British Association, Mr. Murphy called attention to the fact ascertained by M. Secchi, of Rome, that the sun's equator is sensibly hotter than its poles. In accordance with the meteoric theory of the solar heat, this should be the case. The asteroids, or immense meteoric masses which, upon this theory, are supposed to revolve round and near to the sun, and to fall at successive intervals into its mass, probably occupy—like the entire solar system—a lenticular space having the greatest diameter nearly coincident with the sun's equator; and if this be so, a larger number of meteors must fall on the equatorial than on the polar regions of the solar surface, thus making the former more hot.

The meteoric theory will also account for the currents in the sun's atmosphere, which had been observed by Mr. Carrington. He found that the spots in the lowest latitudes drift most rapidly from west to east. Were the sun's atmosphere, like the earth's, acted on by no other motive power than the unequal heating at different latitudes, the relative direction of the currents would be the reverse of this, and in virtue of the well-known principle of trade-winds, at the surface of the earth. But if meteors are constantly falling into the sun's mass through its atmosphere, these bodies moving from west to east with a velocity scarcely less than that of a planet at the sun's surface, and if they so pierce the solar atmosphere in greatest number in its equatorial regions, then the result would be a motive power adequate to drive the sun's atmosphere round it from west to east, and with greatest velocity at the equator. The intensely bright meteoric bodies [see remarks on this phenomenon, September, 1859, in the section above] which Mr. Carrington and another observer simultaneously saw traverse the sun's disc, moved from west to east; and they were almost certainly asteroids falling [or, as Sir William Armstrong more plausibly suggests, *consequences of the fall of such bodies*] into the sun.

Zodiacal Light.—The late lamented Major E. B. Hunt, C. E., U. S. A., communicated to the "American Journal of Science," for May, 1863, a paper upon certain astronomical and meteorological phenomena observed by him at Key West, 1857-'62.

He states that during the winter, and especially in February, the Zodiacal Light habitually attains at Key West a remarkable degree of brightness. He repeatedly traced it to the zenith, never with certainty beyond. He was especially interested in certain proofs of the great amount of light proceeding from the

source in question. He frequently observed a distinct *shadow* cast by the Zodiacal Light. This could be seen moving before him when walking from the light on a white roadway, and also upon passing near or waving his arm very close to a whitewashed wall. The shadow was very positive, but (excepting in the last of the cases named) without definite boundaries, as a shadow should be when cast by a light so diffused. This shadow he had observed when the absence of the planet Venus and the total disappearance of twilight refraction forbade its being assigned to either of those causes; and other persons had corroborated his observations. The principal part of the light appeared to come from the portion within 15° or 20° of the horizon. "It is indeed a singularly beautiful thing, to see this grand mass of mellow light, softly fading out into the clear sky, and quite obscuring the lustre of the Milky Way by its superior brightness. Where it intersects the Milky Way, I think [he concludes] the two are, at the brightest, about equal in glow; but from thence to the horizon the Zodiacal Light so increases in radiance as to seem almost a prolongation of twilight."

Mr. Stillman Masterman, of Weld, Maine,—also since deceased—mentions in the journal already quoted, for July, the fact of his having observed in the Zodiacal Light, on more than one occasion, the appearance of rapid variations in brightness. These were not wave-like pulsations, like those of the aurora borealis; but the alternate brightenings and dimmings of the whole area of the light simultaneously. Sometimes there is to be observed a sudden brightening or dimming, without any other change following for a number of minutes.

In two communications to the "Philos. Magazine," February and March, 1863, Prof. Challis gives a theory of the Zodiacal Light. Reasoning from the observed positions of the light when visible, and the seasons in which it is to be seen, he concludes that the light is simply an immense luminous tract of space, symmetrically disposed about the sun; its principal plane coincident with the plane of the sun's equator; its extent in space reaching beyond the radius of the earth's orbit—so that, either the earth is at all times enveloped in it, or at least is so when passing across the line of its nodes; while, as a consequence of their relative positions, this luminous tract will, at certain seasons, especially in low latitudes, be seen as of a conical or pyramidal form, with the base near the sun. The fact of its not being visible in northern latitudes in autumn evenings and spring mornings, is explained by the small inclination at those seasons of the ecliptic to the horizon, so that the light fails to penetrate the dense parts of the atmosphere then lying between it and the eye.

Prof. Challis accordingly discards the meteoric theory of the Zodiacal Light, and considers that it is purely a *luminosity* of the space it appears in. His theory assumes a universally

extending ether, in which, aside from the steady motions excited in it by the (light-giving) solar action, the gravitative action of the revolving mass of the sun produces a disturbing effect—such effect, he finds by mathematical analysis, being adequate to cause in the disturbed space light-undulations. The related phenomenon, of a luminous arch several degrees in width across the whole sky, and spoken of by Prof. Brorsen as a “ring-form of the zodiacal light,” observed by Mr. Jones, near Quito, in 1856, by Brorsen, at Senftenberg, Prussia, 1854–’8, and previously by Humboldt, off the coast of Mexico, Prof. Challis regards as due to “gravity-undulations” originated in like manner by the axial revolution of the earth.

Nebulæ.—An account was given in this article, in the preceding volume, of the singular phenomena of variation and disappearance of certain nebulae, with allusions also to the connection of these changes with irregular appearance or variability of certain stars situated in or close to the field of nebulae. In the “American Journal of Science,” for Jan. 1863, appears a translation of Prof. A. Gautier’s “Recent Researches relating to the Nebulae” (from the “Bibliothèque Universelle,” Sept. 1862), and in which is to be found a very complete statement of the facts accumulated in regard to these interesting bodies, up to the date of appearance of the original article.

Besides a variation in brilliancy, certain nebulae have been observed to undergo changes of form or appearance. Such is now the view taken of the change in the nebula or star-cluster, 80 of Messier, in Scorpio, in 1860. This nebula, having on May 9th of that year its ordinary appearance, by the 28th of the same month had assumed the aspect of a single star of 7-8th magnitude; and by the 10th of June following the stellar appearance had nearly disappeared, though the nebula was then brighter than usual, with a well-marked central condensation.

Quite recently, Chacornac has observed with the great telescope of Foucault the annular nebula of Lyra, and he has found it to be resolved into a mass of very small stars, exceedingly near to each other. The nebula presented to him the appearance of a hollow cylinder, seen in a direction nearly parallel to its axis. As Lord Rosse describes it, its centre is veiled by a curtain of nebulous matter, resolvable into a thin stratum of stars.

Sir John Herschel has remarked that the proportion, to the whole number, of the nebulae which are—if we may so express it—*multiple*, is greater than the proportion, to the whole number, of the multiple stars. Assuming 5' as the greatest distance apart of the members of double nebulae, M. d'Arrest has estimated that out of the whole number of about 3,000 nebulae in that part of the heavens visible to us, some two or three hundred may be regarded as multiple. He has found a triple nebula, 109° 12' of right ascension and 29° 45' of

northern declination, in which, as observed in 1785, 1827, and 1862, sensible changes appear to have taken place, indicating a movement of revolution of one part round another. Between the two components, which are only 28" apart, a very small star is seen exactly where Lassell observed it ten years before. M. d'Arrest will hereafter cite other instances of change in the relative positions of double nebulae; though he does not yet infer that any of them have periods of revolution so short as those of some of the double stars. Finally, he describes a very small number of cases in which, by repeated comparison after intervals of a nebula with some small star near it, he has been able to show slight differences of distance or position, which might indicate a proper motion of one or the other of these bodies.

The La Lande Prize.—The La Lande (astronomical) prize, value 500 francs, was awarded by the French Academy of Sciences, in January, 1863, to Mr. Alvan Clark, of Cambridgeport, Mass., for his discovery of the companion of Sirius [mentioned in the preceding volume].

The great 18½ inch object-glass with which Mr. Clark made this remarkable observation, has been purchased by the Astronomical Association of Chicago, for the sum of \$11,187; about an equal sum being considered requisite to pay for mounting it properly.

AUSTRIA. (For notice of the Imperial House, detailed statistics of the population, the different nationalities, religious denominations, and principal cities, see ANNUAL CYCLOPEDIA for 1862.)

The population of Austria at the end of 1861, was estimated at 37,000,000 souls. The following portions of Austria form part of the German Confederacy:

Countries.	Geographical square miles.	Population in 1857.
Archduchy of Austria	577,98	2,889,147
Duchy of Salzburg	130,15	146,769
“ of Styria	407,84	1,056,773
“ of Carinthia	188,42	332,446
“ of Carniola	181,42	451,941
The Littoral, comprising the city of Trieste and its territory, the district of Goritz, and part of the district of Istria	84,77	361,972
County of Tyrol and Vorarlberg	532,04	851,016
Kingdom of Bohemia	943,70	4,705,525
Margraviate of Moravia	403,77	1,867,094
Duchy of Silesia	93,50	443,912
Of Galicia, the two duchies of Auschwitz and Zator	44,74	196,389

The budget of the financial department, estimated for the year beginning on Nov. 1st, 1863, and ending on Dec. 31st, 1864, which was presented to the Council of the Empire, on July 17th, 1863, gave the following results:

	Florins.
Ordinary expenditures	512,500,716
Extraordinary “	102,112,701
Total	614,613,417
Ordinary receipts	521,677,096
Extraordinary “	59,396,475
Total	581,073,571
Deficit	33,539,876

The standing army consisted, in May, 1863, of 185,182 infantry, 39,188 cavalry, and 39,455 other troops. Total, in time of peace, 263,825. In time of war, the strength of the army is 436,608 infantry, 41,862 cavalry, 86,998 other troops. Total, 565,468.

The navy, in May, 1863, consisted of 64 steamers, the total horse power of which was 11,325, and 668 guns; beside 2 ironclad frigates, in course of construction, with 1,300 horse power, and 68 guns. The number of sailing vessels was 51, with 348 guns. Total of steamers and sailing vessels, 117, with 1,084 guns.

At the beginning of the year 1863 the Provincial Parliaments of Salzburg, Upper and Lower Austria, the Vorarlberg, Silesia, Moravia, Carinthia, Istria, Goritz, Styria, Carniola, Dalmatia, the Tyrol, the Bukowina and Bohemia, were in session. All these Diets gave in their adhesion to the Central Constitution, and adopted almost unanimously the principle of trial by jury.

The Austrian Parliament (Council of the Empire) was opened on June 18th, the same number of provinces being represented as in the year before. (*See ANNUAL CYCLOPEDIA for 1862.*) In his speech from the throne the emperor made a satisfactory retrospect of the activity of the Reichsrath, and expressed a hope that Transylvania would also shortly take part in its deliberations. He thus continued: The Reichsrath closed its first session under the blessings of peace, which the Government will endeavor to maintain undisturbed. Thanks to the liberal institutions of the empire, its material and intellectual life are everywhere being rapidly developed, and its influence and position as a great Power continually becoming more powerful. The financial condition of the empire is becoming more and more satisfactory. The credit of the state and the public currency have most decidedly improved. It has been unnecessary to apply for any extraordinary credit during the current year. The budget, which will be submitted to you, has been prepared with a view to the greatest possible economy. Bills relative to taxation will be submitted to you, the object of which is to re-establish the currency on a thoroughly sound basis. Bills will also be introduced upon the reform of the administration of justice, as regards the administration of penal law more especially. These reforms will comprise oral proceedings, publicity, and trial by jury. The bills for the reform of the civil law relate to bankruptcy, the private arrangement of debts, and the right of domicile.

Besides the provinces not represented in the Council of the Empire in 1862, a majority of the Czech (Bohemian) members, and the representatives of the Italian portion of the Tyrol, resolved to cease taking part in the proceedings of the Council. The Council thereupon resolved, in its session on June 29th, that there was no reason for the absence of the Czech members from the sittings of that body, and

they were summoned to make their appearance on pain of having their title to sit as members cancelled. On the other hand, the Government and the friends of a United Austria had the gratification to see for the first time a representative from Transylvania. The Emperor of Austria, by a decree dated September 27th, had raised the Roumanian nationality to an equality, in civil and religious rights, with the other nationalities of the crownland. Hitherto the Roumanians, although by far the most numerous of all the nationalities of Transylvania, had been excluded from all political action. Hereafter, in accordance with the imperial decree, the nationalities legally recognized will be the Hungarians, the Szeklers, the Saxons, and the Roumanians; and a particular emblem will be added for the Roumanians to the escutcheon of Transylvania. The Hungarians and Szeklers of Transylvania were greatly dissatisfied with this decree. Their deputies had already withdrawn in a body from the Diet of Transylvania. The two other "nations," the Saxons and Roumanians, resolved to send delegates to the Council of the Empire, who, to the number of 26, took their seats in that body on October 20th. Shortly after the Council declared itself to be complete. Toward the close of November, the Obergespanns (chiefs of the public administration) of Croatia, in a meeting held at Vienna, resolved that Croatia also should send deputies to the Council, if the February Constitution was modified in a manner guaranteeing to the Croats the maintenance of their autonomy, the integrity of their territory, and the disposal of the direct taxes and revenue of Croatia.

Notwithstanding the unceasing efforts of the Austrian Government to reconcile the different nationalities, the animosity between them rather increased than decreased. This was the case particularly with the Slavi and Germans in Bohemia and Bavaria, with the Germans and Italians in the Tyrol, with the Hungarians in Transylvania on this side, and the Germans and the Roumanians on the other. Galicia was kept in constant agitation by a secret revolutionary government, which in some instances even decreed and inflicted the death penalty upon Poles who were regarded as opposed to the national Polish movement. But the most important of all the national manifestations took place toward the close of the year in Hungary. The "Alleanza" of Milan, a journal printed by the Hungarian insurgents in Italy, published the text of a proclamation, issued in Hungary, in the name of Kossuth. The proclamation was as follows:

By order of Louis Kossuth, the National Committee of Independence to the Nation.—Fidelity to the flag of 1849 survives in the heart of our nation. Refusing to accept any kind of compromise, the great majority of the nation is firmly resolved to shake off the detested yoke of German domination. But as the external signs of our national life have in recent times not been in harmony with that resolution, our natural allies abroad have conceived doubts as to the firmness of our de-

signs. These doubts have been the greatest obstacle to the efforts of our Government tending to the deliverance of the country. The removal of that obstacle becomes an imperious necessity before the new turn of European events—a turn offering a prospect full of promise to all the peoples who groan under a foreign yoke. We must give a sign of life in order that our natural allies may be convinced that against the common enemy they may surely count upon the arms of the Magyars. We must hold ourselves in readiness, in order that the ties of the terrified Austrian may not entangle our nation in the snare. We must prepare to be in a state to seize energetically the favorable opportunity. For these purposes the Governor, Louis Kossuth, abolishing every previous order, and having judged it necessary to decree the formation of a new general committee, makes known, by the present document, to the nation, that in consequence of that order the General Committee of Independence is constituted; that it has for its end the realization of the declaration of independence of 1849; and that, full of resolution and ready for all sacrifices, it has taken in hand the direction of affairs, according to the instructions received, or to be received, from the chosen governor of our country. The committee expects, from the patriotic sentiments of the nation, that the orders emanating from it will be promptly executed, that its instructions will be followed, and that its measures will be speedily accomplished. At the same time it calls upon the enemies, open and concealed, of the flag of 1849, to abstain from any plot or intrigue if they would not incur the penalty inflicted upon traitors. At all events, the General Committee of Independence declares that it will know how, and that it is determined, to secure obedience to its orders, and the accomplishment of the measures which it must take. Long live the nation and good hope. Let every honest patriot prepare himself for action. Our motto is—1849 and victory.

Done at BUDA PESTH, the 24th Dec., 1863.

It was asserted that the National Committee of Hungary would act on the same footing as the secret Polish Government, that its manifesto had been placarded in all the towns of Hungary and Transylvania, and that it had produced a great sensation.

In the diplomatic complications arising out of the Polish difficulties, Austria took an active part. In common with France and England, she addressed several notes to Russia, urging upon the latter Power the expediency of adopting measures calculated to restore peace, but showed herself, however, averse to going to war with Russia. (*See POLAND.*) She observed a strict neutrality in the war between Russia and Poland. Some Galician members in the Austrian Council complained of the rigorous measures adopted by the Government against the sympathizers with the insurrection, but the Council approved the steps which had been taken in this respect.

The Emperor of Austria, in August, proposed to the Governments forming the German Confederacy, a highly important plan for the reformation of the federal constitution of Germany. A Congress of Princes, and representatives of the four free cities assembled at Frankfort, on August 17th, and by a considerable majority adopted the Austrian plan; but as Prussia was not represented in this Congress, and did not consent to the resolutions, no result was obtained up to the end of the year 1863. (*See GERMANY.*)

In the Schleswig-Holstein question which, toward the end of the year, began to disturb the peace of Europe, and in particular that of Germany, Austria, in union with Prussia, was in favor of recognizing King Christian IX. of Denmark, as Duke of Schleswig and Holstein, and to compel Denmark to repeal the constitution by which Schleswig was to be incorporated with Denmark Proper. This view was, however, not shared by the Frankfort Diet, nor by any considerable portion of the German people, and the Austrian Government soon found itself in opposition to both.

B

BAIRD, ROBERT, D.D., an American Presbyterian clergyman and author, born in Fayette county, Pa., October 6th, 1798, died at Yonkers, N. Y., March 15th, 1863. He received his collegiate education at Washington and Jefferson Colleges Pa., graduating at the latter in 1818. After leaving college he taught for a year at Bellefort, where he commenced, also, his career as a newspaper writer, in the village newspaper. In 1819 he entered the Theological Seminary at Princeton, N. J., and pursued the usual course of theological study for three years, acting as tutor in the New Jersey College during his last year in the seminary. In 1822 he was licensed, and the same year took charge of an academy in Princeton, over which he presided for the next five years with great success, preaching occasionally in the neighboring pulpits. In 1827 he determined to devote himself more exclusively to professional labors, and proposed to the American Bible Society a plan for supplying every

destitute family in New Jersey with a Bible, which was adopted and carried into execution through his exertions. He also accepted an appointment as agent of the Missionary Society of New Jersey, and labored for two years among the feeble and destitute churches of his denomination in that State. In 1829 he accepted an appointment as agent of the American Sunday-school Union. For nearly six years he travelled extensively in its behalf, throughout the United States, holding meetings in most of the prominent cities and towns, and enlisting the services of able speakers, statesmen, and divines, to address the audiences he had collected. By these labors he raised the annual revenues of the Union from \$5,000 to \$28,000. In 1835 he visited Europe, and remained there, with the exception of two brief visits home, for eight years, devoting himself to the promotion of Protestant Christianity in Southern Europe, and subsequently to the advocacy of the Temperance Reform in

Northern Europe. Possessing a fine personal appearance, a kindly face, an amiable disposition, and rare affability of manner, and being an accomplished linguist and a man of extensive general information, he enjoyed extraordinary opportunities of mingling in the best circles of European society, and was on terms of personal and friendly intercourse with many of the crowned heads of Europe. He was also the valued and intimate friend of the most eminent scholars and evangelical clergymen of Great Britain and the Continent; and, from his abundant labors on both sides of the Atlantic, received the name of the "International Preacher." Upon the formation of the Foreign Evangelical Society, since merged in the American and Foreign Christian Union, he became its agent and corresponding secretary. In 1842 he published, in Scotland, "A View of Religion in America," a work which excited much attention in Europe, as being the most complete account of the religious condition of the United States which had been published up to that time. It was translated into some of the continental languages. In 1843 he returned home and remained for three years engaged in active labors for the promotion of the work of aiding the spread of Protestantism in Europe, both by personal and written appeals. In 1846 he again visited Europe to attend the World's Temperance Convention in Stockholm, and the meeting of the Evangelical Alliance in London, and spent about a year and a half abroad, visiting Russia, where he was very cordially welcomed by the Czar, and also the German States. On his return he delivered, in connection with his labors as Secretary of the Christian Union, a series of lectures on the Continent of Europe, in most of the principal cities of the country. He subsequently crossed the Atlantic several times, but his visits there were less protracted than those already mentioned. He took a great interest in the Waldenses, and rendered efficient service in bringing their churches and institutions into Turin and its vicinity. His last visit to Europe was made in 1862, and he vindicated, in London, before public assemblies, the cause of the Union against secession with great energy and eloquence, though many of his former friends were at that time hostile to the United States. Dr. Baird had been, through life, a man of most indomitable industry, and found time, amid his other arduous labors, to prepare many volumes for the press. Among them are the following: "View of the Valley of the Mississippi," 1832; "History of the Temperance Societies" (translated into five languages), 1836; "View of Religion in America" (already mentioned), Glasgow, 1842 (this was translated into seven or eight languages); "Protestantism in Italy," Boston, 1845; "The Christian Retrospect and Register," New York, 1851; "History of the Albigenses, Waldenses, and Vaudois;" "Visit to Northern Europe," 1857; besides many small volumes, pam-

phlets, etc., etc. His death was quite sudden, and was caused by a severe hemorrhage from the lungs, which occurred on the 11th of March.

BALDWIN, ROGER SHERMAN, LL.D., an American jurist and statesman, born in New Haven, Conn., January 4th, 1793; died in the same city February 19th, 1863. He was of Puritan stock on both the father's and mother's side, his father, the Hon. Simeon Baldwin, being a descendant of one of the Puritan emigrants who settled at New Haven with the Rev. John Davenport; whilst his mother was the daughter of Roger Sherman, one of the most eminent of the signers of the Declaration of Independence, himself descended from the early Puritan settlers of western Connecticut. The Hon. Simeon Baldwin, or Judge Baldwin, as he was usually called, had represented his district in Congress for some years, and was subsequently, until he reached the limit of age assigned by the State Constitution, Judge of the Superior Court and the Supreme Court of Errors of the State.

His son, the subject of this notice, entered Yale College at the age of fourteen, and graduated in 1811, with high honors. On the completion of his collegiate course, he commenced the study of law, first in his father's office, and afterward in the then famous law school of Judges Reeve and Gould, at Litchfield, Conn. Here his intense application, and his rapid acquisition of the science of law gained him a high encomium from Judge Gould. He was admitted to the bar in 1814, and by his industrious and thorough study of the principles of law, his careful preparation of his cases, his remarkable command of pure and elegant language, and the precision, definiteness, and logical character of his pleas, soon attained a very high rank in his profession. His preference was for the classes of cases which involved the great principles of jurisprudence rather than those where success depended upon appeals to the sympathies or prejudices of a jury; still he was rarely unsuccessful in jury cases, and his dignified and lofty eloquence, enforced as it was by the conviction that he would not engage in a cause which he believed to be unjust or dishonest, gave him great weight with a jury. One of the most celebrated cases in which he was engaged, and one in which his great qualities as a lawyer were finely displayed, was that of the Africans of the *Amistad*, in 1841. He managed their case against the Spanish authorities, who claimed them as the slaves of parties in Cuba, in the district court of Connecticut; and when the decision there was in favor of the Africans, and the executive authorities at Washington had appealed the case to the Supreme Court of the United States, he was associated with the venerable John Quincy Adams in defending their right to freedom. His plea on that occasion was pronounced by his learned and eloquent colleague, and by Chancellor Kent, one of the ablest fo-

rensic efforts ever made in that august court. At the age of fifty he was regarded, and justly, as not only holding the highest rank as a pleader in the Connecticut bar, but as being, in the words of General Kimberly, himself one of the finest legal minds of the century, "the ablest lawyer that Connecticut has ever produced in any part of her history." In 1837 Mr. Baldwin was elected to the State Senate, and reelected the following year, when he was chosen president of that body *pro tempore*. In 1840 and 1841 he was the representative of New Haven in the General Assembly. In 1844 he was elected governor of the State, and reelected the following year. In 1847 he was appointed by the governor to the United States Senate, to fill the unexpired term of the Hon. Jabez W. Huntington, and in the following May elected to the same position by the Legislature. His course in the Senate was highly honorable to himself and the State he represented. He took his place at once among the giant intellects of the Senate of that time, and though he spoke but rarely, his speeches were always impressive and able. The exclusion of slavery from the territory acquired in consequence of the Mexican war was a measure to which he bent the energies of his powerful mind, and he had the happiness to witness the passage of the resolutions on this subject which he had introduced and advocated. His course in this measure met with the approbation of men of all parties in his native State. He also opposed with great vigor and eloquence the Compromise Bill of 1850, and especially that portion of it which contained a new Fugitive Slave Law. On one occasion Mr. Mason, of Virginia, attempted to disparage Connecticut for retaining 3,500,000 acres of her western lands for State purposes. Mr. Baldwin replied, in an eloquent and spirited speech, in which he showed that while Virginia had reserved fourteen millions of acres of her western lands for military bounties to her soldiers, Connecticut, with a larger patrimony, had reserved but three and a half million acres, and that for a school fund, while her patriotic soldiers, who outnumbered by one half the Virginia soldiers, though from a State with only one third its population, volunteered without bounty. Gov. Baldwin was the candidate of his party for the senatorship for the term of 1851-'57, and would have been elected but for the opposition of four or five members of the party, who insisted on pledges from him, which he deemed it inconsistent with his character and independence to give, and the election was postponed for a year, at which time the democratic party were in the majority, and their candidate was elected. From this time Gov. Baldwin remained in private life, devoting to his profession his great abilities, ripened and mellowed by his increasing years. In 1860 he was one of the two electors at large on the ticket for the election of President Lincoln, and by appointment of Governor Buckingham, was a member of the "Peace Congress" of Februa-

ry, 1861. In that Congress he opposed the action of the majority of the committee proposing amendments to the Constitution.

BAPTISTS.—The Baptist Almanac for 1864 gives the following table of the different denominations of Baptists on the American continent:

	Associa- tions.	Churches.	Ministers.	Members.
Regular Baptists:				
United States.....	597	12,551	7,952	1,039,400
Nova Scotia.....	3	153	82	15,285
New Brunswick.....	2	130	73	8,392
Canada.....	10	429	175	13,764
West India Islands..	4	205	154	36,500
Total in N. America	616	13,468	8,436	1,113,341
Anti-Mission Baptists*.	180	1,800	850	60,000
Free-Will Baptists.....	142	1,277	1,049	57,007
Six Principle Baptists*.	..	18	16	3,000
Seventh-Day Baptists†.	4	66	77	6,686
Church of God (Wine- brennarians)*.....	..	275	132	14,000
Disciples(Campbellites)	1,800	1,500	...	300,000
Tunkers.....	..	200	100	20,000

Comparing the statistics of the Regular Baptists, the most numerous of the Baptist bodies, for 1863, with those for 1862, it appears that the following States have suffered a loss in numerical strength:

Maine.....	70
New Hampshire.....	129
Connecticut.....	233
California.....	494
Kansas.....	78
Maryland.....	279
New Jersey.....	86
Ohio.....	1,843
Pennsylvania.....	300
Total.....	3,502

Among the States which have witnessed an increase in their Baptist membership, Illinois stands first on the list, her net gain being 2,856, more than that of all the other States put together, and nearly nine per cent. of her former numbers.

The anniversaries of the American Baptist Missionary Union, of the American Baptist Publication Society (inclusive of the American Baptist Historical Society), and of the American Baptist Home Mission Society, were held during the year in Cleveland, Ohio, from August 19th to 21st. The receipts of the Missionary Union during the year amounted to \$103,956 (against \$95,193 the year before). The number of its missions is 19; the number of churches about 375, with 31,000 members. The anniversary assembly of the Missionary Union unanimously adopted a series of resolutions on the state of the country, of which the following are the most important:

Resolved, That the authors, aiders, and abettors of this slaveholders' rebellion, in their desperate efforts to nationalize the institution of slavery, and to extend its despotic sway throughout the land, have themselves inflicted on that institution a series of most terrible, and fatal, and suicidal blows, from which, we believe, it can never recover, and they have, themselves, thus fixed its destiny and hastened its doom; and that, for thus overruling what appeared at first to be a terrible national calamity, to the production of re-

* 1860.

† 1861.

sults so unexpected and glorious, our gratitude and adoration are due to that wonder-working God, who still "maketh the wrath of man to praise him, while the remainder of that wrath he restrains." (Psalm lxxvi. 10.)

Resolved, That in the recent acts of Congress, abolishing slavery forever in the District of Columbia and in the Territories, and in the noble proclamation of the President of the United States, declaring freedom to the slave in States in rebellion, we see cause for congratulation and joy, and we think we behold the dawn of that glorious day, when, as in Israel's ancient jubilee, "liberty shall be proclaimed throughout all the land, unto all the inhabitants thereof." (Leviticus xxv. 10.)

The Publication Society issued, in the course of the year, twenty-one Sunday-school books, and eighteen children's tracts. Of these, with the Baptist Almanac, Report, and Catalogues, there were printed 81,300 copies. Including the new editions of former publications, the total number of books and tracts issued during the year amounted to 343,850 copies. The Society employed 35 missionary colporteurs, 14 of whom labored in Sweden, the rest in the United States. The receipts were \$65,044 (against \$56,306 in 1862).

The Home Mission Society employed 87 missionaries, 9 of whom preached in foreign languages. Its receipts amounted to \$39,647 (against \$37,894 in 1862).

The American and Foreign Bible Society held its twenty-sixth annual meeting on May 14th, in New York city. Receipts for the year \$19,247 (against \$16,688 during the preceding year).

The American Baptist Free Mission Society held its twentieth anniversary on May 27th, at Mount Holly, New Jersey. Its receipts for the year were \$19,538. A series of resolutions pledging strong support to the Union of the States, and demanding the abolition of slavery, were unanimously passed. A report expressing fraternal sympathy with the anti-slavery masses of Great Britain, was also unanimously adopted.

Through the agency of the secretary of the Home Mission Society, and Mr. Harris, U. S. senator from New York and a prominent member of the Baptist communion, the Secretary of War gave full and formal authority to the Home Mission Society to take possession of every abandoned Baptist meeting house within the insurrectionary districts, and of every other Baptist church edifice in the hands of the Confederates. The Government promised the Society every practicable protection in their new fields of labor, and corresponding facilities for reaching them.

The General Convention, as well as the Missionary, Educational, and Publishing Societies of the Seventh-Day Baptists, was held at Adams Centre, Jefferson county, New York, on September 9th. The receipts of the Missionary Society during the year were \$2,634. The following resolutions were unanimously adopted:

Resolved, That the General Conference reaffirms its interest and confidence in the General Government,

VOL. III.—11 A

and desires to see the war prosecuted, on its part, until the rebellion is entirely crushed, and the authority of the Government fully restored; and that it will render, to this end, all the support at its command.

Resolved, That we approve the incipient steps taken by the Executive Board to establish a mission among the freedmen, and would recommend its prosecution as soon as possible.

At the meeting of the Baptist Missionary Convention of Canada West, which was held at Hamilton, an attempt to introduce two Confederate chaplains who had escaped from Fort McHenry, and wished to get funds to run the blockade, was met with a storm of hisses, and was utterly fruitless, and a resolution was subsequently passed condemning slavery, and sympathizing with the North.

The Baptist churches in the Confederate States continued to suffer greatly from the effects of the war. Their foreign missions in China and Africa were entirely cut off from communication with the churches and the Missionary Society from which they derived their support. The Board of Foreign Missions appointed, therefore, a committee at Baltimore, to secure and transmit funds for the use of the Southern Baptist missionaries, and otherwise to promote the interests of their missions in foreign lands. The Government of the United States gave permission to Rev. Dr. Fuller, one of the Baltimore committee, to go to Richmond, to receive \$2,000, which had accumulated there. The Baltimore committee made an urgent appeal to the Border State Baptists to maintain the Southern Baptist Mission. The General Convention of Kentucky resolved to do all in its power for this purpose.

The London "Freeman," the leading organ of the English Baptists, gives the following statement of the strength and other statistics of the Baptists of the three kingdoms as follows: England contains 1,782 churches, with 188,374 members; Wales 455 churches, and 53,783 members; Scotland 97 churches, 7,940 members; Ireland 36 churches, 1,348 members. Total number of churches, 2,370; membership, 251,445. It is to be remarked that these totals are estimated, the average membership of all the churches known being taken for those whose membership is not ascertained. England has 478 churches without pastors; Wales 116; Scotland 19, and Ireland 8. Certain of the churches included in these estimates are claimed as well by the Congregationalists.

The Baptist Societies of England had, for the year 1863, the following income: Baptist Missionary Society, £27,189; Baptist Home Mission, £1,700; Bible Translation Society, £1,809.

An interesting legal decision was obtained on the question of open communion. The court had been called upon to restrain a Baptist minister, by injunction, from permitting the chapel to be used by any other persons than Particular Baptists, and for a declaration that on the true construction of the trust deeds none but Particular Baptists were entitled to participation in the Lord's Supper. The Vice-

Chancellor minutely examined the trust deeds, as well as the "Confession of Faith" published by the body in 1643 and 1680 and at other times. He did not see that the delegates from the churches, who took part in the meetings where the Confessions were drawn up, held strict communion to be an essential and fundamental doctrine, and he did not see that it was insisted upon in the trust deeds of the chapel in question. He decided, therefore, to dismiss the case.

The Baptist Union of England, at one of its quarterly meetings, adopted an address to the American Baptist churches, expressive of its views on the American war and slavery. The following are the most important passages of this address:

It will not be needful for us to prove that the fatal origin of your present national discords has been the existence in your midst of the sinful institution of slavery. In former times we have ventured to urge upon you the duty of denouncing and extirpating this baneful and unholy institution; but now we rejoice to believe that nearly all classes among you are convinced that it is wholly opposed to the will of God, and fruitful only in calamity to those who uphold it. Yes, brethren, it is slavery that has prevented our maintaining with you that close and brotherly intercourse which your hearts ardently desired; it is slavery that has so lamentably alienated one portion of your people from the other; it is slavery that has excited fierce and ungovernable passions, which will neither listen to reason nor submit to law. And it is the foul pollution and gross injustice of slavery that have brought upon you the chastisement of Heaven, and deluged your once happy and prosperous land with seas of human blood. Brethren, it has grieved us beyond all our power to express, to know that this unhallowed and accursed institution has been upheld and defended by many who profess to believe with us in the Scriptures of eternal truth; men who bear among Christians the honored name of Baptists, and claim the same spiritual lineage with ourselves. And in proportion to our former grief is the joy we now experience in learning from one of our official correspondents amongst you, that the Baptist churches and associations in your Northern States have generally, if not universally, arrived at the conviction that slavery must be forthwith destroyed. We deprecate with all our heart the efforts of interested or malicious men in this country to exasperate strife between us, or help the abettors of slavery in yours; and we shall use our utmost endeavors to strengthen the patience of our suffering countrymen, and to encourage our rulers to maintain that wise policy of non-interference which they have hitherto observed. Be assured, brethren, that our hatred of slavery is as intense as it ever was, and that our sympathies are altogether with those who strive for its total abolition throughout the entire world.

The sixth Triennial Conference of the German Baptists was held in Hamburg in July. About ninety pastors, missionaries, and delegates were present. From the report of the Committee of the Union it appeared that during the last three years 4,658 persons had been baptized; that there was a clear increase in the membership of the churches during that time of 3,367; and that the present number of members was 11,275. It also stated that nine new churches had been formed, and 327 stations established for preaching the gospel.

The progress of the Baptists in Sweden continues to be marked. According to a report of

Rev. Mr. Wiberg, the founder of the Swedish mission, in the whole of Sweden, during the year, there were formed 14 new churches, baptized 850, restored 69, excluded 288. At the 1st of January, 1863, there were 161 churches, with 5,515 members; 4,231 children gathered in Sunday schools, with 90 teachers. Cases of persecution constantly occur all over the country. Baptist parents are often fined or charged to pay godfathers and policemen for assisting the priests. The Baptist Executive Committee published five baptismal tracts. Twenty-one of the churches now have places of worship of their own; the others assemble in private houses.

Considerable additions to the number of Baptists were made in Poland and in the Russian province of Courland. In the latter great efforts were made to put them down. The congregation of Libau sent two of its members as delegates to St. Petersburg, who had an interview with the emperor. This interview did not arrest persecution, for the district court of Courland condemned two Baptists to exile from Russia for preaching Baptist sentiments. Toward the close of the year, however, the Directing Senate of Russia reversed this decision of the district court of Courland, and the emperor issued an ukase, which forbids the restraining of Baptist preachers by force, and declares such force all the "more to be deprecated in a doctrine of religion, which may later find acknowledgment." So great an advance on the past policy of the Russian authorities was hailed as a wonderful sign by the Baptists of Germany, and Rev. Mr. Oncken, of Hamburg, the founder of the German mission, resolved to proceed to St. Petersburg, to organize a congregation in the capital of the Russian empire.

The first impulse to the establishment of a Baptist mission in Italy was given in October, 1860, by the "True Union," a Baptist paper of Maryland. In 1862, two Baptist clergymen of England, Rev. Edward Clarke, of Tiverton, and Rev. James Wall, of Calne, visited Italy, and on their return made an appeal to the English Baptists for the establishment of an Italian mission. This appeal was warmly responded to, and in October, 1863, Rev. James Wall took his departure from England as the first Baptist missionary to Italy.

BEAUCHAMP, HENRY BEAUCHAMP LYGON, Earl, an English peer, born in Powyke, Worcestershire, in 1784, died at Madresfield Court, Great Malvern, Sept. 8th, 1863. He entered the army July 9th, 1803, served in the Peninsula with the 16th Dragoons at the capture of Oporto, battles of Talavera and Busaco and elsewhere, and was severely wounded at Busaco. He eventually became a general in the army, colonel in succession of the 10th Hussars and the 2d Life Guards, and chamberlain in waiting to the Queen. He sat in the House of Commons for the county of Worcester, before the passing of the Reform Bill, and afterward

for the Western Division of the county, altogether for more than a quarter of a century. He was first elected for the county in 1816; and during the Reform agitation, being opposed to the measure, was defeated. The Reform Bill passed during the next year, and Worcestershire was separated into two divisions, East and West; Gen. Lygon, having been elected for the latter, continued to sit for that division until his elevation to the Upper House. In politics he was a conservative. In 1853 he succeeded his brother to the earldom. In his death the nation lost a faithful and trustworthy servant and soldier, and the county of Worcester, a benefactor who was always ready to aid in any charitable or benevolent work.

BEECHER, LYMAN, D. D., an American clergyman and author, born in New Haven, Conn., September 12th, 1775, died in Brooklyn, N. Y., January 10th, 1863. His early life was spent in the family of his uncle, Lot Benton, of North Guilford, where he was fitted for college by Rev. Thomas W. Bray, the minister of the parish. He entered Yale College in 1793, at the age of 18, and graduated in 1797, having spent part of his senior year in the study of theology, under President Dwight. He continued these studies till September, 1798, when he was licensed to preach, and soon afterward began to supply the pulpit of the Presbyterian church at East Hampton, Long Island, where he was ordained, in September, 1799. In 1810 he accepted an invitation to the pastorate of the First Congregational church, in Litchfield, Conn., and was installed in June of that year. He remained at Litchfield until March, 1826, and he says, in his autobiography, "it was the most laborious part of his life." His eloquence and zeal as a preacher, and the fearlessness and resolution with which he attacked the prevalent vice of intemperance, and led the way in the organization of Bible, Missionary, and Educational Societies, had gained him already a high reputation throughout New England. The rapid and extensive defection of the Congregational churches in the vicinity of Boston, under the lead of Dr. Channing and others, had excited much anxiety throughout New England, and, in 1826, Mr. Beecher was called to Boston to the pastorate of the Hanover street church, at the urgent request of his clerical brethren, to uphold the ancient doctrines of Puritanism against the onset of the able and adroit leaders of the Unitarian party. He remained there six years and a half, and battled against his opponents with an eloquence, a logical vigor, and an overwhelming power, which won for him the admiration of the members of his own denomination, and the respect and esteem which men always feel for an ardent, earnest, and honest fighter. It was during his residence here, also, that his "Sermons on Intemperance," most of which had been preached in Litchfield, were first published. No more pungent and effective portraits and denunciations of a national vice have

ever appeared in print. In 1832, when 57 years of age, he was called to the presidency of the Lane Theological Seminary at Cincinnati, and a large amount of money was pledged to the institution on condition of his acceptance. He carried to the West the same fiery ardor, the same earnestness in his advocacy of what he believed to be truth, and the same power in assailing what he believed to be error under whatever form it might appear, which had characterized his ministry in Boston. He remained at the head of the seminary for nineteen years, and his name was continued in its catalogue, as president, until his death. During the first ten years of his presidency he was also acting pastor of the Second Presbyterian church in Cincinnati. It was not long after his removal to Cincinnati that he electrified the religious public in the East, by the publication of a tract, showing the danger of Roman Catholic supremacy in the West. In the theological controversies, which led to the excision of a portion of the General Assembly of the Presbyterian Church in 1837-'8, he took an active part, though untinged with bitterness. In 1851 he returned to Boston, where he preached with great vigor and power, notwithstanding his advanced age. About his 80th year he suffered from an attack of paralysis, that affected his mental powers, which thenceforth only gleamed out occasionally with some indications of their former splendor. He removed about this time to Brooklyn, N. Y., where his last years were passed. Dr. Beecher was the author of a large number of published sermons and addresses, most of them occasional and miscellaneous, though some are deserving of permanent preservation for their extraordinary ability and eloquence. His "Sermons on Intemperance," already mentioned, still have a large sale. He made a collection of some of those he deemed most valuable, which was published in 1852, in 3 vols. 12mo. His autobiography, and a selection from his published works, edited by his son, Rev. Charles Beecher, are now (March, 1864) passing through the press of Messrs. Harper and Brothers. During the period of his active ministry from 1815 to 1851, no clergyman of any denomination in the United States was more widely known, or exerted a more powerful influence on the educated mind of the country. He was the father of 13 children, of whom ten survived him, most of whom have attained literary or theological distinction. Rev. Edward Beecher, D.D., Rev. Henry Ward Beecher, the pastor of Plymouth Church, Miss Catharine E. Beecher, and Mrs. Harriet Beecher Stowe, the authoress of "Uncle Tom's Cabin," are the best known of this remarkable family.

BERRY, HIRAM GEORGE, a major-general of volunteers in the United States service, born in Thomaston (now Rockland), Maine, August 27th, 1824, killed at the battle of Chancellorsville, May 3d, 1863. In early life he had acquired the carpenter's trade, and

followed the business for a few years, but was subsequently engaged, successfully, in navigation. He represented his native town in the State Legislature several times, and was mayor of the city of Rockland. Having a taste for military affairs he originated and commanded for several years the Rockland Guard, a volunteer company which had attained a very high reputation for its perfection of drill and discipline. At the commencement of the war he entered the volunteer service as colonel of the 4th regiment of Maine volunteer infantry. The regiment left Rockland on the 17th of June, 1861, arrived in Washington on the 20th, and went into camp on Meridian Hill on the 21st. On the 8th of July it crossed into Virginia, and on the 16th marched toward Centreville, where it arrived on the 18th. It participated in the battle of Bull Run, in acting Gen. Howard's brigade. After the battle it returned to Alexandria, and on the 24th to Meridian Hill. It was afterward brigaded in Gen. Sedgwick's brigade of the army of the Potomac, and when the army moved to the peninsula formed part of Gen. Birney's brigade, in Gen. C. S. Hamilton's division, and in that division participated in the siege of Yorktown. On the 4th of April, 1862, Col. Berry was made a brigadier-general of volunteers, his commission dating from March 17th, 1862, and was placed in charge of the third brigade of the third division of Heintzelman's third army corps. By this change he was separated from his regiment. In command of this brigade he participated in the battle of Williamsburg, where the coming of his brigade brought the first relief to the wearied and blood-stained heroes of Gen. Hooker's division; fought under Gen. Kearny at Fair Oaks, and won the special commendation of that daring and gallant officer for his indomitable bravery; bore a conspicuous part in the seven days' battles, and on the 4th of July, 1862, was, with Heintzelman's corps, highly complimented for his valor and endurance by the commanding general. On the 15th of August he moved with his brigade to Yorktown, and thence to Alexandria; thence to Warrenton Junction and Rappahannock, and on the 29th and 30th of Aug. took part with Kearny's division in the battles of Centreville and Manassas, or the second Bull Run. On the 1st of September he participated in the battle of Chantilly, where the gallant Kearny lost his life. During the campaign in Maryland he held with his brigade important fords on the Potomac, and thus cut off the retreat of the enemy. At the battle of Fredericksburg, Dec. 13th, 1862, Gen. Berry led his brigade in a charge upon a force considerably exceeding his own in numbers, and drove them back, thus relieving his division, then commanded by Gen. Birney, from imminent peril. For this brave act he was complimented by Gen. Birney in his report. In January, 1863, he was nominated by the President as major-general of volunteers, with rank dating from Nov. 29th, 1862, and was

confirmed by the Senate on the 9th of March, 1863. He was then placed in command of the second division of the third army corps, which was at that time under the command of Major-Gen. Sickles. At the battle of Chancellorsville, after the flight of the eleventh army corps, who were pursued with great fury by Gen. Jackson's corps, Gen. Hooker selected Berry's division, which had been formerly his own division, and was one of the finest in the army, to charge upon the advancing foe, and stem the overwhelming wave which was sweeping his army to destruction. His order was characteristic, and showed his thorough appreciation of the courage and military skill of Gen. Berry. It was as follows: "Go in, General; throw your men into the breach; don't fire a shot—they can't see you—but charge *home* with the bayonet." They did charge *home*, and in the shock of battle which followed, the foe went down like grass before the mower's scythe. For three hours that division, almost alone, withstood the repeated assaults of a large body of Confederate troops flushed with their previous victory, and at last drove them back, and regained a portion of their lost ground. The battle was renewed early the next morning, and again Berry and his division were in front, and received the first assault of the enemy. Intent upon driving them back, Gen. Berry headed one of his brigades in several successful bayonet charges, and in one of these was instantly killed by a shot from the enemy. Gen. Berry was not only a brave and skilful commander, but a most estimable man in private and social life, and his death caused deep sorrow among a wide circle of warmly attached friends.

BIG BLACK RIVER rises in Choctaw county, Mississippi, and flowing a south-west course it empties into the Mississippi river at Grand Gulf, below Vicksburg. It is about 200 miles in length and its course is through a fertile country, which before the war abounded in cotton plantations.

BILLAULT, AUGUSTE ADOLPHE MARIE, a French statesman, born at Vannes, in the department of Morbihan, November 12th, 1805, died at Gresilières, near Nantes, October 13th, 1863. After studying law at Rennes, he joined the bar of Nantes at the age of 20, and practised with great success. He was elected while yet very young a member of the municipal council of Nantes, and soon after a member of the general council of the department of Loire Inférieure. While holding these offices he published several pamphlets on education in France, municipal organizations, roads, &c. In 1837, before he had attained his 32d year, his popularity was so great that he was chosen a member of the National Chamber of Deputies, by three electoral districts, those of Nantes, Paimbœuf, and Ancenis, when he selected the last, which he represented till 1848. In the Chamber of Deputies he soon attracted attention by his

energy, boldness, and readiness in debate, and took position as one of the leaders of the Constitutional Opposition. When M. Thiers formed his second cabinet, March 1st, 1840, he assigned to M. Billault the position of Assistant Secretary to the Minister of Agriculture and Commerce, and in this office he displayed a rare aptitude for business. When the Thiers ministry was replaced by that of Guizot, M. Billault resigned, and returned to his old seat with the opposition. He was soon after admitted a member of the Paris bar, and, in his place in the Chamber of Deputies, became one of the most persistent and formidable opponents of the Guizot administration, distinguishing himself particularly by his opposition to the right of search, and to what was called the "Pritchard indemnity." In 1846, he was elected for the third *arrondissement* of Paris, and also for his old constituency of Ancenis, in the department of Morbihan. He declined taking any active part in the reform banquets which preceded the revolution of 1848, though expressing his sympathy with their views and purposes. He held, however, the professional relation of legal adviser to the Duc d'Aumale, the wealthiest of Louis Philippe's sons. Immediately after the revolution, he was elected to the Constitutional Assembly for the department of the Loire Inférieure, being the third on a list of 13, and receiving 88,858 votes. In this body he took, on most questions, the extreme republican view, supporting Louis Blanc's doctrine of the "right of labor." He, however, voted with the Moderates, for the banishment of the Orleans family, and against the bills requiring security from the journals, and providing for two Legislative Chambers. He was not reelected for the Legislative Assembly in 1849, but had become an influential and intimate friend of the Prince President, who consulted him frequently on important questions. Meantime, he devoted himself assiduously to his legal practice, which was now large, and bided his time. It came soon. Immediately after the *coup d'état* of December 2d, 1851, he was returned for St. Girons, in the Ariège, and was named President of the new Corps Législatif, in which capacity he greatly contributed to the reestablishment of the empire. In July, 1854, he succeeded M. Persigny as Minister of the Interior, and in December of the same year was made a senator. While occupying this position, the attempted assassination of the emperor by Orsini and his associates occurred (January 14th, 1858), and M. Billault drew up, and succeeded in passing the law of public safety, popularly known as the *Lois des Suspects*, and soon after resigned to give place to Gen. Espinasse, who was considered the man best adapted to carry out its provisions. The emperor was, however, unwilling to lose the benefit of M. Billault's eminent abilities, and, accordingly, named him and M. Baroche ministers without portfolio, their duty being to defend, in the Corps Législatif, the acts of the Government. The labor thrown

upon him by this unpleasant office (for he had often to defend measures of which he did not approve), undermined his health. At the next change of ministry he was appointed Minister of State in place of Count Walewski, and he still continued to be the official advocate of the Government in the Senate and Corps Législatif; this seems to be the first step toward a return to the old system of responsible ministers. The result of the elections of 1863 greatly affected M. Billault, as, notwithstanding the utmost efforts of the Government to prevent it, thirty-five opposition candidates were elected to the Chambers, nearly all of them men of eminent abilities. This untoward result aggravated a disease of the heart, under which he labored for some years, and probably caused his death. He was a ready, able, and eloquent speaker, of mild and unassuming manners, and singularly skilled in presenting a case, however bad, in fair and attractive colors. In private life he was greatly beloved for his strong domestic affections, and his kindness and affability to all, and especially to the young, and to those who were struggling to obtain an honorable position.

BLOCKADE. (See PRIZES.)

BOLTON, a village in Hinds county, Mississippi, seventeen miles west of Jackson, on the railroad to Vicksburg and twenty-seven miles from Vicksburg. It was on the route over which Gen. Grant's army moved.

BOTFIELD, BERIAH, M. P., born at Northamptonshire, Eng., in 1807, died at his residence in Ludlow, Aug. 7th, 1863. He was educated at Harrow, and from thence went to Christ Church, Oxford, and took his degree of B. A. in 1828. He early evinced a taste for botany, and purchased many valuable publications on that branch of science, but in after years devoted more attention to bibliography, which eventually became the favorite study of his life. In 1840 he sat in Parliament for the borough of Ludlow, and again the following year. At the ensuing election, in 1847, he contested that borough unsuccessfully, but in 1857 was solicited by his former constituents to represent them once more, and remained member for Ludlow during the rest of his life. In his early political career he was a follower and personal friend of Sir Robert Peel, and voted for free trade when that measure was first introduced into Parliament. He was remarkably successful as a book-collector, deeming neither time, labor, nor money in that service as ill spent, and his library at Norton Hall was one of the finest collections in England. Its specialty consisted in a valuable collection of *Editiones Principes* of classical authors, and costly folio editions of illustrated works, many of them in the French language. At different periods he has appeared before the world as an author, having published in 1849 "Notes on Cathedral Libraries in England," and in 1861 collected and edited the "Prefaces to the first Editions of the Greek and Roman Classics, and of the Sacred Scriptures." He also contributed articles

to the "Gentleman's Magazine," the "Philobiblon Miscellany," and other Reviews and literary societies.

BRADISH, LUTHER, an American statesman and philanthropist, born in Cummington, Mass., Sept. 15th, 1783, died at Newport, R. I., Aug. 30th, 1863. He was graduated at Williams College, Mass., in 1804, and soon after commenced the study of the law in New York, with which place his interests were thenceforth in a great measure identified. After having made a lengthened tour in Europe, he embarked in 1820 on board the United States ship of war Columbus for the Mediterranean, for the purpose of collecting and communicating to the Government information respecting the commerce of the Levant, preliminary to the establishment of diplomatic relations with the Porte. At the conclusion of his mission he travelled over many parts of Europe and the East, and in 1826 returned to New York. About the same time he removed to Franklin county in the northern part of the State, where he owned a large landed property, was a member of the Assembly 1827-'30, an unsuccessful candidate of the Anti-Masonic party for Congress in 1830, and again a member of the Assembly in 1835-'38, serving during his last term as speaker. From 1829 to 1843 he was lieutenant-governor of the State, and in 1842 he was the unsuccessful whig candidate for governor. Subsequently to that period he lived in retirement, except during the administration of President Fillmore, when he filled the office of Assistant U. S. Treasurer for New York. During the latter part of his life, which he passed in the city of New York, he was much occupied with educational, charitable, and reformatory projects, and at his death was president of the New York Historical Society and of the American Bible Society, having for many years previous been vice-president of both associations, and an active participator in all their proceedings.

BRAZIL. (For statistics, *see* CYCLOPEDIA for 1862.) Emperor Pedro II. de Alcantara John Charles Leopold Salvador Bibiana Francis Xavier de Paula Leocadio Michael Gabriel Raphael Gonzaga, born December 2d, 1825, son of the Emperor Pedro I. de Alcantara, ascended the throne, under tutorship in virtue of the abdication of his father, on April 7th, 1831, assumed the reins of government on July 23d, 1840; crowned July 18th, 1841; married Sept. 4th, 1843, to the Empress Therese Christine Marie, born March 14th, 1822, daughter of the late King Francis I. of the Two Sicilies.

The Brazilian army consisted, in 1859, of 13,364 infantry, 2,724 cavalry, 3,582 artillery, and several smaller bodies; together, 22,546 men. In the financial bill for the year 1863-'64, presented to the Chambers in May, 1862, the effective force of land troops was fixed at 14,000 men, and in extraordinary cases at 25,000; that of marines at 3,000, eventually, 5,000.

The navy, in 1863, consisted of 16 armed sailing vessels, 22 armed steamers, and 7 non-armed vessels.

The movements of shipping in the year 1862-'63 were as follows:

FLAG.	ENTERED.		CLEARED.	
	Vessels.	Tonnage.	Vessels.	Tonnage.
Brazilian.....	499	22,089	265	21,231
Foreign.....	2,265	856,509	2,204	895,210
	2,764	878,598	2,469	916,491

The recent discovery of three extensive coal fields is of great importance for the development of the resources of the country. With the exception of rumors as to the finding of surface coal, there had been nothing definite known of the existence of coal in that country. Reports, however, of the presence of coal reached Mr. N. Plant, the State geologist in Brazil, and in 1862 he fitted out an expedition to the districts of Rio Grande do Sul. He there discovered a large coal field, which had been named the Candiota, extending over about 150 square miles. The second was on the Rio Ratos, extending over about 50 square miles; and the third was in the province of San Catharina, extending over about 80 square miles. The first field was the largest, and took its name from the river Candiota, which flowed along one side of it, and to which the field presented a noble escarpment about seven leagues long. The river had washed through the strata, and laid bare the coal beds, which could be worked in the valley from the surface. The field was partly in Brazil, and partly in the free republic of Uruguay. The country from the sea to the coal bed was a table land of basalt, by which the coal field was bounded on the east side, and on the southwestern side it was bounded by the syenitic rocks, which rose to a considerable elevation. The mineral could be conveyed in a day or so from the coal field along the Candiota and the river Jaguarao to San Pedro, where it would be of great service to the ocean-going steamers. The quality of the coal was considered to be good, and as it was similar to the Australian coal, it was believed to belong to the oolitic age. It was highly bituminous, admirably suited for steam, but perhaps not so good as some English coal for ordinary purposes. In a deposit of 114 feet 65 feet were coal, the thickest stratum being 25 feet. The coal strata were separated by thin seams of clay and other deposits which sometimes totally disappeared, and in places there was a solid bed of coal 65 feet thick. The discovery of such a mineral was of immense commercial importance. The annual exports of coal to Brazil from England alone were 250,000 tons, at the rate of 49s. per ton, and these newly-discovered beds could be worked for 18s. per ton. Mr. N. Plant had obtained direct from the emperor what was termed a "concession" to work these coal beds, and he looked to English capitalists to assist him in turning it to account.

In the ANNUAL CYCLOPEDIA of 1862, the ac-

count of the difficulty between Brazil and England was continued to Jan. 6th, 1863. The people of Brazil showed with regard to this dispute the greatest determination. The Municipal Chamber of Rio had an audience with the emperor, in order to express to him their thanks for the prompt and energetic conduct of the Government, and to give him the assurance that the people of Rio would be ready to make any sacrifices which the honor of the country might demand. The emperor replied that the Brazilians might depend upon him in the hour of danger.

A committee appointed by the mercantile community to solicit subscriptions in the eventuality of a foreign war met on the 1st of January, at the house of the Viscount Ipanema, its chairman. Mr. Ottoni, the leader of the ultra-Liberal party, was appointed secretary. On the opening of the session a letter was read from the major domo of the emperor, announcing that the emperor had subscribed a monthly sum of 24,000 francs as long as it might be deemed necessary, to put the country in a state of defence; the empress a sum of 15,000 francs, and moreover 3,000 francs every month, and each of the princesses 3,000 francs a month. The emperor repeatedly visited the forts situated at the entrance of the bay, and a great agitation continued to exist in all classes of society. Enlisting offices were opened, and a large number of volunteers enrolled themselves.

It may be stated, to the honor of the English press and people, that the conduct of Mr. Christie, the British minister at Rio, was generally condemned. They declared it to be, even from a commercial point of view, entirely unpardonable to establish—for a pecuniary claim, amounting, according to Mr. Christie himself, to only £5,525, and which the British Government itself reduced to £3,200—a virtual blockade of Rio for nearly a month, and make reprisals to the value of more than £6,000. From the correspondence laid before the English Parliament it appears, that Earl Russell, in issuing instructions to Mr. Christie, expressly gave him authority to make another reference to the British Government respecting the response that might be made his ultimatum before resorting to reprisals, and that Mr. Christie, concealing that authority from the Brazilian Government, preferred the abuse to the use of those instructions. It also appears that the discussion was conducted, on his part, with a want of temper and discretion which rendered a pacific solution impossible, without such a sacrifice of principle and dignity, on the part of Brazil, as would have been a source of danger to the stability of the empire.

On February 26th, the Brazilian envoy, at London, paid the indemnity demanded by the English Government for the pretended pillage of the English vessel *Prince of Wales*; but, at the same time, protested against the acts of England. The further negotiations between the two Powers led to no result. On May

28th, the Brazilian minister at London left that city, after having broken off diplomatic relations, and on June 6th, the English envoy was recalled from Rio.

On June 18th, the King of Belgium, to whose arbitration the two Powers had agreed to submit one of the two points of litigation, gave his decision, which was entirely in favor of Brazil. He declared that the arrest of two British officers and a British chaplain by the Brazilian police was not intended to be an insult to the honor of Great Britain, and that it could not be so regarded. This decision only expressed the opinion of all Europe, which, from the beginning of the difficulty, looked upon the transaction as an encroachment of England upon a weak power. Even Portugal, generally the steadfast friend of England, was no exception, and the whole press of the kingdom denounced the unwarrantable conduct of the British Government.

Subsequently the King of Portugal offered his mediation, in order that the diplomatic relations between Brazil and Great Britain might be renewed. In reply to this, the Brazilian Government declared that, much as it wished the successful issue of so benevolent a proof of friendship and interest, it could not take advantage of that noble offer so long as there did not exist on the part of the British Government any explicit acceptance of that offer.

When the news of a rupture of diplomatic relations between the Governments reached Brazil, it produced a profound impression. The most perfect unanimity prevailed among all political parties as to the duty of Brazil not to submit to the demands of England. In Pernambuco the news of the rupture was received just previous to the festival of St. Anthony, and a printed handbill was immediately circulated in the streets, demanding that the English flag should be removed from the flags of friendly nations, which were to be displayed on the occasion, and that the flag of the United States be substituted in its place. The request was complied with.

In May, 1863, Mr. Webb, the American minister at Rio, called the attention of the Brazilian minister and Secretary of State for Foreign Affairs, to a gross breach of neutrality perpetrated, and continued, on the part of the representatives of his Majesty's Government in the ports of Pernambuco and Bahia. The ports of Brazil, he said, are made harbors of refuge and places of resort and departure for three piratical vessels—the *Alabama*, *Georgia*, and *Florida*—avowedly designed to prey upon the commerce of the United States. He asked the Imperial Government to promptly visit upon the offending governors the punishment they so richly merited. He urged a right of the United States to demand the capture of the *Alabama* by Brazil, if possible, as a duty due alike to itself, to the United States, to humanity, and to civilization.

To this the Marquis d'Alvantis positively de-

clared that the Government of his Majesty was firmly resolved to maintain and to cause to be respected, the neutrality in the terms in which it was declared when assumed; and that it was not disposed to allow this neutrality to be violated in any way by those interested in the contest, still less by the delegates of the Government itself.

Secretary Seward acknowledged the prompt, just, and friendly proceedings adopted by the Brazilian Government, but reserved the question, whether indemnities would be due to the United States for the losses and injuries inflicted upon their citizens.

Of the commerce between Brazil and the United States some interesting statements were made by the Rev. Mr. Fletcher, formerly Secretary of Legation at Brazil, in an address to the New York Board of Commerce. He said: That during his connection with the Legation at Brazil he was afforded an opportunity of examining the Government archives, and was forcibly struck with the large balance of trade against the United States. We had spent millions of dollars in opening a trade with Japan, while we had neglected the far richer field opened to us at our own doors. The trade of Japan with the rest of the world was only about \$2,500,000 annually, while that of Brazil was \$183,000,000. In the year 1861 we sent gold to all South America, except Brazil, \$8,000,000 worth, and to Brazil \$6,000,000. We bought from South America (Brazil excepted) \$14,000,000, and from Brazil \$18,000,000. This was an exceptional year, owing to the war. In 1859 and 1860 we bought from \$21,000,000 to \$22,000,000 of Brazil, and sold her about \$6,000,000. Mr. Fletcher then dwelt at length upon the richness of Brazil; its immense resources, present and prospective; its fortunate geographical position; its topographical and geological characteristics; the salubrity of its climate, and its general adaptation to all the wants of mankind, all of which conspired to show that it would eventually become the largest producing country in the world, with perhaps the exception of the United States. He also spoke of the political condition of Brazil, the rights guaranteed to all men there without regard to color, and the measures in progress for the speedy extinction of slavery. After extensive travel in Brazil he was prepared to say that two thirds of its territory was adapted to the raising of cotton; and he had gathered tobacco a thousand miles up the Amazon river, which had been declared by good judges to be equal to the best quality of Havana. In concluding, he referred to the want of proper transportation between the United States and Brazil, and carefully demonstrated the advantages of direct steamship communication. Passengers now must go in English steamers by way of England to that port, and trade, to some extent, takes the same circuitous route. The Liberals in Brazil were desirous of establishing better means of transpor-

tation between their country and the United States; they were now in a majority, and a proposition had already been made by them looking to the freedom of Brazilian ports, the opening of the Amazon, and the establishment of direct steamship and mail communication. The interests of the merchants of the United States, and particularly of New York, demanded that this subject should receive adequate attention.

BRIDGEPORT, is a station on the Nashville and Chattanooga railroad near the State line of Tennessee. At this point the railroad crosses the Tennessee river by a bridge which was partly destroyed by the army of Gen. Bragg on its retreat from the State—it was occupied by the force of Gen. Hooker at the time when communication with Chattanooga was interrupted. Several boats were built at Bridgeport to be used as transports for the Federal army.

BRONSON, Hon. GREENE C, a distinguished lawyer and politician, died at Saratoga, aged about 65 years. He was a native of Oneida, and resided the greater portion of his life at Utica, in that county, where he enjoyed an extensive practice and a high reputation. In April, 1819, he was chosen surrogate of Oneida county; in 1822 was a member of Assembly, and in 1829 was elected attorney general, which latter office he held up to January, 1836, at which time he was elected one of the Puisne Judges of the Supreme Court of Judicature. He was next appointed Chief Justice of the Supreme Court in 1845; and, two years subsequently, one of the Judges of the Court of Appeals, then just organized. After leaving the bench he removed to New York, and practised law; but, having become involved in some unfortunate speculations, he lost nearly the whole of his property. In 1853 he was appointed collector of the port, but was removed in 1854. In December, 1859, he was elected corporation counsel, which office he held until January, 1863. As a lawyer, he ranked among the first in this country. In politics he was a staunch democrat, and was the leader of the Hard Shells. He was the candidate for governor of that section of the democratic party, in 1855.

BRUNSFORD or BRUNSBURG, is a small village in Claiborne county, Mississippi. It is on a point of land on the east bank of the Mississippi river, and is the spot where Gen. Grant's army landed when it crossed the river below Vicksburg.

BUFORD, JOHN, a major-general of volunteers in the United States service, born in Kentucky in 1825, died at Washington, Dec. 16, 1863, of typhoid fever contracted in service with the army of the Potomac. His early training and education were carefully conducted, and his mental and moral development gave bright promise of future usefulness. He was appointed from Illinois, to the Military Academy at West Point, and graduated in 1848, standing well in his class, and in the estima-

tion of all who knew him; was appointed brevet second lieutenant of 1st Dragoons and served on the Plains until the war broke out, when he promptly and heartily offered himself to the service of his country. His rare abilities as an officer attracted the attention of the Government, and he was early made a major in the Inspector-General's corps. His peculiar duties did not give him an opportunity to engage in the leading campaigns until 1862, when he was made a brigadier-general, simply as an acknowledgment of his military merits. In the early part of 1862, he fought under Gen. Pope, in his Virginia campaign, succeeding General Stoneman (who afterward became his commander) on Gen. McClellan's staff, during the battle of Antietam. When the present cavalry organization of the army of the Potomac was perfected, of which Gen. Stoneman was at that time the chief, Gen. Buford was assigned to command the reserve cavalry brigade. He was subsequently conspicuous in almost every cavalry engagement, and at Gettysburg commenced the attack on the enemy at Seminary Ridge before the arrival of Reynolds on the 1st of July, and on the second of July rendered important services both at Wolf's Hill and Round Top. A short time previous to his death he was assigned to the command of the cavalry in the army of the Cumberland, and had left the army of the Potomac for that purpose. He was a splendid cavalry officer and one of the most successful in the service; was modest, yet brave; unostentatious, but prompt and persevering; ever ready to go where duty called him, and never shrinking from action however fraught with peril. His last sickness was but brief, the effect, probably, of protracted toil and exposure. On the day of his death, and but a little while before his departure, his commission of major-general was placed in his hands. He received it with a smile of gratification that the Government he had defended, appreciated his services, and gently laying it aside, soon ceased to breathe.

BURNS, Hon. ROBERT EASTON, was born at Niagara, C. W., on the 26th December, 1805. His father was the Rev. John Burns, a Presbyterian minister, who emigrated from Scotland in 1803, and became principal of the Niagara Grammar School. Educated by his father, young Burns commenced the study of the law at the age of 16, in the office of the late Mr.

John Breckenridge, of the town of Niagara, C. W. He was called to the bar immediately after concluding his studies, and practised for some years in Niagara, St. Catherine's, and Hamilton, with considerable success. In September, 1837, he was appointed Judge of Niagara District, and in the spring of 1838 went to Toronto and entered into partnership with Attorney General Hagerman. When the seat of Government was taken to Kingston the Court of Chancery followed, and Mr. Burns became resident of that city, but removed again to Toronto on the Government becoming established in Montreal. Here Mr. Burns became a partner of Mr. Philip Vankoughnet, the present Chancellor of Upper Canada, and Mr. Oliver Mowat, the present Postmaster-General, but was very soon appointed to the important office of Judge of the Home District, which he held until the year 1848 or 1849, when he resigned to form a partnership with Mr. John Duggan. A very short time afterward, however, he was appointed by the Baldwin-Lafontaine government *puisne* Judge of the Court of Queen's Bench, an office which he held until his death. A few years ago, he was appointed Chancellor of the University of Upper Canada. His last public duty was performed at the Hamilton Assizes, about two months before his death. He returned home suffering from an attack of dropsy, accompanied by a general break-up of the constitution, and was unable afterward to leave his house. At noon on the 12th January, 1863, his sufferings, which had been severe, were brought to a close, and he peacefully expired, surrounded by the members of his family. Mr. Burns married first, on the 10th Feb. 1835, Anne Flora Taylor, daughter of Mr. John Thomas Taylor. By this marriage he had four sons, three of whom survive him. His wife having died in September, 1850, in 1856 he married Miss Britannia Warton, of Toronto, who died in 1858. The funeral of the Judge took place from his residence, Yorkville, on Thursday, the 14th of January, at two o'clock, and was largely and respectfully attended. Although Mr. Justice Burns never engaged in politics, yet as a leading member of the Chancery Bar, and the occupant of three judicial situations he filled a prominent position in Upper Canada. He possessed a sound judgment, an accurate and retentive memory, and large experience.

C

CÆSIUM. Professors S. W. Johnson and O. D. Allen, of the Sheffield Laboratory, of Yale College, still separate this element from the associated rubidium, by their method of fractional crystallization of the bitartrates of the metals. Their analysis having led to doubts of the correctness of Bunsen's equivalent of cæsium, they made with great care four determinations of

the atomic weight of the element in its combination with chlorine, the mean of which giving 133.036, they have assumed as the equivalent of cæsium the round number 133. They conclude that the chloride of cæsium is not only not deliquescent, but hardly even hygroscopic. They find the cæsium spectrum to be, from the number, color, and definition of its lines, per-

haps the most beautiful to be observed among all the alkali and earthy metals. Kirchhoff and Bunsen, in the figure originally given by them, had represented 11 lines: to these, which they do not find altogether correct in position, the authors add 7 more; viz., 4 red lines, one of which is as bright as any of that color in this spectrum, a fine yellow line, and two unimportant green ones.

Bunsen, in a later communication (*Pogg. Ann.*, cxix. 1), states that he found Allen's method for preparing pure cæsium inapplicable in case of sources furnishing very minute quantities of this element. He even avails himself of the great deliquescence of the chloride of cæsium (in an atmosphere at once moist and warm) for obtaining the metal entirely free from rubidium. He now admits the correctness of the chemical equivalent, 133, found by Johnson and Allen. These authors, in their latest communication, agree with him in attributing the want of deliquescence of the cæsium chloride, in their earlier experiments, to the influence of an atmosphere at the time relatively cool and dry. Their views in reference to the spectrum of cæsium Bunsen does not substantially contradict; and it appears that a part of the disagreement between the two sets of results had arisen from differences in the spectroscopes employed in the respective experiments. ("Amer. Jour. of Science," Jan. and Nov. 1863.)

CALIFORNIA. One of the Pacific States of the Union first settled in 1769, ceded to the United States by Mexico, by the treaty of March 16th, 1848, and admitted into the Union as a State in 1850. Its capital is Sacramento, population in 1860, 13,788. The area of this State is 188,982 square miles, and its population in 1860 was 379,994, of whom 23,848 were Chinese and Mexican half-breeds, and 14,555 Indians.

The governor of the State, from December 1863 to January 1868, is Frederick F. Low, whose official residence is at Sacramento. His salary is \$7,000. The election for State officers, except superintendent of public instruction, was held September 3d, 1863. Gov. Low, Union, received 63,165 votes; the democratic candidate, John G. Downey, receiving 43,229. In October, an election was held for judges of the supreme and district courts, and the Union candidates, Oscar L. Shafter, Lorenzo Sawyer, S. W. Sanderson, John Curry, and A. L. Rhodes, were elected. The Union majority in the State was about 20,000. The Legislature elected at the same time stood as follows: Senate, 35 Unionists to 5 Democrats; Assembly, 72 Unionists to 8 Democrats—Union majority on joint ballot, 94.

Under the provisions of the amended Constitution the sessions of the Legislature are to be biennial, meeting on the 1st of December of the odd years, 1863, 1865, etc. The time of session is limited to 120 days; senators are elected for four years, one half being elected every second year; the Assembly is elected for two years.

The population of California has probably diminished somewhat during the year 1863, from the great excitement among the mining people in relation to the extraordinary productiveness of the gold mines of Idaho and of the Colorado river region in Arizona, and the large yield of the Nevada and Colorado Territory silver and gold mines. In California, placer mining is almost wholly abandoned in the oldest mining districts, though it pays well in the more recently discovered deposits, and in some sections, where the auriferous earth is deep. The shallow placers, where the gold was washed out in a cradle or tom, are now only resorted to by the Chinese miners who are contented with small gains. *Sluice* and *hydraulic mining* are now the processes most in use in placer diggings. The former requires a considerable stream of water, in such a position that it will permit a fall of from twenty to one hundred feet. This stream is conducted through an artificial aqueduct composed of sluice boxes (boxes of rough boards twelve feet long and from five to twenty feet wide, one end being four inches narrower than the other, so that the ends of the boxes may slide into each other); these boxes are set upon trestles at different angles of depression, according to the character of the dirt—tough clayey dirt requiring a steeper pitch than that which is more sandy. An eight-inch pitch or grade, that is, eight inches for each sluice box, or length of twelve feet, is the lowest grade generally used, and sixteen inches the highest. The sluice boxes have riffle-bars or clusters of slates with spaces between, wedged into them either longitudinally or at different distances across, to catch the gold and fine dirt, and to give the quicksilver an opportunity to come in contact with the fine particles and form an amalgam with them. The quicksilver is usually put in near the head of the sluice, which may be fifty or five hundred feet in length, according to the circumstances, and the dirt being thrown in by the miners, and the water let on, the washing of the gold goes on without cessation, usually from three to ten days, when the miners "clean up" by taking out a portion of the riffle-bars at a time, and collecting the coarse gold and the amalgam, pressing the gold from the mercury by straining it through cloth or buckskin, and sometimes increase the product by panning the fine sand, which is usually rich in gold, which has collected in the rifts and corners of the sluice. Where there are considerable quantities of boulders, the sluice boxes wear out very rapidly, and hence, where it is practicable, the miners often make the bottom of the sluice of cobble stones instead of wood. As water is not over-abundant in most parts of California, and it is desirable to use it as economically as possible, the miners sometimes, where they find a hill of auriferous earth situated near their sluice, resort to blasting to bring down and loosen large quantities of the earth so that it can be

more rapidly thrown into the sluice while the water is running.

Hydraulic mining requires the use of the sluice, but subjects the pay dirt, as it is called, to a preliminary process, and this dispenses with the severe digging required in the ordinary sluice mining. The water is collected either in a natural or artificial pond, flume, or canal, by some of the numerous hydraulic companies, and thence conducted by hose of from four to ten inches diameter to a point where it can be directed, under a pressure of from fifty to two hundred feet of vertical elevation against a hill of auriferous earth. The earth is rapidly washed away, and the stream of mud and water directed into the sluice, when it undergoes the further processes of amalgamation, panning, cleaning up, etc. The water is furnished to the miners at a rental of so much per inch of orifice of hose, usually about twenty cents per inch.

Quartz mining is an entirely different process, though one now carried on extensively in California. The beds of auriferous quartz are found in the mountains, at elevations ranging between two thousand and ten thousand feet. Though most of the quartz veins between these elevations contain some gold, but a small portion of them have enough to be washed profitably. Unless the yield is at least ten dollars per ton of quartz the vein will not pay for working. The quartz is first quarried at a cost of two dollars or more per ton, then carried to the stamping mill to be crushed to a fine powder, and then, by a variety of processes, the gold is separated from the quartz and caused to amalgamate with mercury. The capital invested in these enterprises is large, and when veins of quartz rich in gold are quarried the returns are ample. The Mariposa Mining Company's works yield from \$75,000 to \$100,000 of pure gold monthly; the Allison Company, in Nevada county, from \$60,000 to \$80,000 per month; and the Sierra Butte Company, in Sierra county, from \$25,000 to \$50,000 per month.

In agricultural products California is rapidly becoming a leading State. The climate and soil are admirably adapted to the growth of the vine, and she is in a fair way to become the vineyard of the Union. The production of wine in 1863 was very large, and she exported of her wines to the appraised value of \$79,026, an amount which will probably be doubled the coming year. One and a quarter millions of lbs. of grapes were also sent to market. Considerable attention is paid to the culture of tobacco, of which a superior quality can be produced in the State; and in Santa Clara county, as well as in some other portions of the State, a large amount of capital is invested in silk growing. The silk of California is regarded as superior in quality to that of any other country. The worms are fed mostly on the leaves of the *morus maretti* and other varieties of the white mulberry, though the

morus multicaulis is used to some extent in the first two stages of its growth. The silk-worms are perfectly healthy, and the eggs are in demand to a far greater amount than can be supplied by the silk growers in Europe. The dryness of the climate, and the entire absence or infrequency of thunder-storms, as well as the strength and richness of the mulberry leaves produced in the fertile soil of California, render it certain that this State must become one of the best silk-growing regions in the United States.

The great staple product of California at present is gold. Of this, \$39,938,699 were received from the interior at San Francisco in the year 1863, besides \$2,836,973 from Oregon, and \$1,347,523 from Victoria, and \$2,156,677 from foreign parts.

The wool product of the State for the last eight years has been:

Year.	Pounds.	Per cent. increase.	Year.	Pounds.	Per cent. increase.
1856.....	600,000.....		1860.....	3,260,000.....	37
1857.....	1,100,000.....	83	1861.....	4,600,000.....	41
1858.....	1,428,000.....	30	1862.....	6,400,000.....	40
1859.....	2,378,000.....	66	1863.....	7,600,000.....	19

Of Wheat, 1,983,655 sacks were received at San Francisco, and 1,146,478 sacks exported. Of flour, 124,863 bbls. were received, and 153,454 bbls. exported. Of barley, 607,216 sacks were received, and 50,026 exported. Of oats, 260,366 sacks were received, and 87,075 exported. Of hides, 308,189 were exported in 1863, a falling off of 7,562 from the exports of the previous year. Fruits are sold almost entirely by the pound, box of 25 lbs., or basket of 30 lbs. The receipts of the principal fruits were: strawberries, 300,000 lbs.; raspberries, 200,000 lbs.; blackberries, 200,000 lbs.; gooseberries, 15,000 lbs.; cherries, 75,000 lbs.; currants, 8,000 to 10,000 lbs.; apricots, 600,000 lbs.; figs, 10,000 to 15,000 lbs. (grown in California); nectarines, 15,000 lbs.; quinces, 30,000 to 40,000 lbs.; plums, 450,000 lbs.; peaches, 2,400,000 to 3,000,000 lbs.; grapes, 1,250,000 lbs.; apples, 75,000 boxes of 25 lbs.; pears, 30,000 boxes, a large proportion of them winter varieties. Besides these there were very large quantities of dried fruit, principally peaches and plums, sent to market.

The high price of turpentine and rosin has led to the collection of these articles from the pines of California. The business is yet in its infancy; but 7,250 gallons of turpentine and 1,150 barrels of rosin were sent to market in 1863, and the quality is so good that there can be no doubt that the production will be rapidly developed.

The income of the Federal Government on the California coast in the past year has been as follows:

From duties on imports.....	\$4,688,399
From internal taxation, estimated.....	2,000,000
From Postal Department, estimated....	200,000
From Branch Mint.....	240,000
Total income.....	\$7,128,399
Deficit of income.....	2,757,132
Total expenditures in 1862.....	6,726,598
Total income in 1862.....	4,150,645

The large increase in duties on imports as com-

pared with last year, \$4,688,399, against \$3,-277,308, will attract attention, and results mainly from an increase of foreign trade.

The official returns of the internal duties for the San Francisco district gave \$969,447, of which \$351,943 was for incomes. The tax on manufactures indicates that the production has doubled in the year. The disbursements of the Government were as follows:

FOR THE ARMY.	
Quartermaster's Department.....	\$5,344,526
Paymaster's Department.....	1,700,000
Commissary Department.....	609,494
Total army.....	\$7,654,020
FOR THE NAVY.	
Coast squadron, estimated.....	1,000,000
FOR THE REVENUE SERVICE.	
Custom-house, light-house, and marine hospital, } estimated.....	320,000
Cost of collecting internal revenue, estimated.....	240,000
FOR POSTAL SERVICES.	
Transportation of mails on this coast not including overland route to Atlantic States), estimated.....	\$210,000
Compensation expenses of officers, esti'd.....	65,000
	\$275,000
MISCELLANEOUS.	
Mint Department, gross, estimated.....	\$301,511
Judicial Department, estimated.....	25,000
Land offices, estimated.....	10,000
	\$366,511
Total disbursements.....	\$9,885,531

The duties are all collected in gold, amounting to \$4,688,399, and which is sent to the At-

lantic States for use, while all the payments of the Government are in notes. Those received by the Government officials, contractors, &c., are paid out to the extent of nearly \$10,000,000; but they will not circulate, the receivers sell them to the brokers, who re-sell to taxpayers, and for shipment to the Atlantic States. The price at which they sell undergoes fluctuations. In January it was 68 and 72 cents per dollar; in March the rate had fallen to 50 cents; in July it had risen to 80 cents, and subsequently declined to 70 and 68 cents. The California merchants profited largely from the paper currency at the expense of their Eastern creditors. This was emphatically the case in 1862, when paper receded from par to about 30 per cent. discount. Parties who were in debt at that time to Eastern creditors, or who purchased merchandise on credit at any time during the year, were enabled to meet their obligations fully and satisfactorily with remittances that cost much less in gold currency than the amount of their indebtedness or their invoices. The debtor classes and credit buyers were benefited largely. Meantime the value of most articles of merchandise at the East, according to the gold standard, underwent but little change. The treasure exports of California in the last year were as follows, also the value and destination of treasure shipments from San Francisco during the past ten years—1854 to 1863:

Years.	To Eastern ports.	To England.	To China.	To Panama.	To other countries.	Total.
1854.....	\$46,533,166	\$3,781,080	\$965,887	\$204,592	\$560,908	\$52,045,633
1855.....	38,730,564	5,182,156	889,675	231,207	128,129	45,161,731
1856.....	39,595,294	8,666,289	1,308,852	253,268	573,732	50,697,434
1857.....	35,531,773	9,347,743	2,993,264	410,929	692,978	48,976,697
1858.....	35,891,236	9,265,739	1,916,007	299,265	175,779	47,548,026
1859.....	40,146,437	3,910,930	3,100,756	279,949	202,390	47,640,463
1860.....	35,719,296	2,672,986	3,374,680	300,819	258,185	42,325,916
1861.....	32,628,011	4,061,779	3,541,279	349,769	95,920	40,676,758
1862.....	26,194,035	12,950,140	2,660,754	434,508	322,324	42,561,761
1863.....	10,859,330	23,467,236	4,206,370	2,503,296	505,667	46,071,920
	\$341,659,147	\$83,306,054	\$24,957,524	\$5,267,602	\$3,516,011	\$463,706,338

Including the exports of treasure, the entire exports of the productions of the State, during the past three years, may be classified as follows:

	1861.	1862.	1863.
Products of the mine..	\$42,103,193	\$44,105,662	\$47,982,398
Products of agricult're	3,265,471	1,645,350	2,013,975
Products of the herd..	1,041,217	2,027,082	2,132,155
Products of the forest.	69,931	149,560	134,036
Products of the sea....	21,823	21,868	11,285
Products of manufact..	962,876	798,191	873,354
Products of the vine..	8,000	25,836	81,456
Total.....	\$47,472,217	\$48,773,549	\$53,280,209

The following are the returns of treasure at San Francisco from the interior, and coastwise through regular channels, the records of which are accessible; also importation from foreign countries during the past three years:

	1861.	1862.	1863.
Receipts from interior.	\$41,689,077	\$42,539,799	\$45,327,326
Receipts from n'th c'st		4,931,579	4,970,023
Imports, foreign.....	1,702,683	1,904,034	2,156,612
Total.....	\$43,391,760	\$49,375,462	\$52,453,961
Exports.....	40,676,753	42,561,761	46,071,920
Currency movement	\$2,715,002	\$6,312,701	\$6,382,041

Included in the last year's receipts from the north coast is the sum of \$1,411,387 from British Columbia. The total receipts from that quarter for the year just closed, are estimated at not less than \$7,000,000.

From the silver districts (included in the northern mines), the total receipts for the past year were \$12,433,915, against about \$6,000,-000 in 1862. They were divided as follows:

Total disbursements.....	\$9,885,531
From Washoe.....	\$11,846,915
From Esmeralda.....	537,000
	\$12,433,915

The receipts from the south coast in 1863 amount to \$110,322 through regular channels, and probably as much more by private hands. From all the new mining localities the proportion of private receipts is much greater than from the older ones. Over all the established routes through the interior of this State, and from Nevada Territory, very little treasure comes in the hands of individuals. (See ARMY, UNITED STATES, and SANITARY COMMISSION.)

CENTRAL AMERICA, REPUBLICS OF.

There are at present in Central America five independent republics, namely: 1. Guatemala, with an area of 1,918 geographical square miles, and about 850,000 inhabitants. Gen. Carrera is president for life. He was elected October 19th, 1851. The receipts of the Government in 1859 amounted to \$1,283,594, the expenditures to \$1,272,280. The regular army consisted of 3,200 men; the militia of 12,000. The value of the importations was (in 1860), \$1,434,671; that of exportations, \$1,916,325. 2. San Salvador. According to a decree of 1809, the president of this republic is to be chosen every six years, and the legislative chambers consist of 24 deputies and 12 senators, who meet biennially. The area of the republic is 345 geographical square miles; the number of inhabitants 600,000. The receipts were in 1861, \$559,623; the expenditures, \$604,847. There were in circulation in 1862, treasury bonds to the amount of \$175,245. Besides the republic had a consolidated foreign debt, amounting to \$360,000. The army consisted of 1,000 regular troops and 5,000 militia. The importations amounted, in 1861, to \$1,319,727; the exportations to \$2,340,778. 3. Honduras. The duration of the office of the president is four years. The representative chamber consists of 11 members, the senate of 7, the council of state of the ministers and 7 other members. The area is about 2,215 geographical square miles, and the population 350,000. The annual receipts of the Government amount to about \$250,000. The importations are about \$750,000; the exportations, \$825,005. 4. Nicaragua. According to the constitution of August 19th, 1858, the president is elected for four years. It has a representative chamber and a senate. The area is 2,736 geographical square miles, and 400,000 inhabitants. The receipts of the Government, in 1861, amounted to \$385,044; the expenditures to \$378,955; the public debt to \$4,000,000. 5. Costa Rica. The president and vice-president of the republic are elected for a term of three years. The senate has 25, and the chamber of representatives 29 members. The area is 1,011 geographical square miles, and the population 126,750. The annual revenue of the Government is about 1,000,000 piasters. The militia numbers about 5,000 men, 200 of whom are periodically called into active service.

Propositions for reuniting the republics of Central America have frequently been made. The latest of these is the one made by Senor Iglesias, the minister of foreign affairs of Costa Rica. Under date of November 25th, 1862, he issued a project for a Central American union. By this document it was proposed that Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica should mutually guarantee their territorial integrity, their independence and institutions. To effect this purpose two representatives were to be elected by each State, and remain in permanent session, under the name of the Central American Diet.

These representatives were to be elected according to the law which exists in each State relative to the election of members to the legislature. It was proposed to elect them for two years, with power to continue them in office indefinitely. Their duties were thus defined:

In all questions arising between the Central American Governments, threatening to disturb the peace, their decision is to be definite and without appeal; in case of foreign invasion they are to adopt the measures for the general protection, decide on the contingent to be furnished by each State, and appoint the commander-in-chief. By them all treaties made with foreign Powers were to be either rejected, accepted, or modified, and all questions of colonization, transit, navigation, or grants of territory, must be submitted to them and approved.

In addition to the foregoing, constituting the principal duties of this body, a power was given to decide in international questions between the States, and to propose the best plan for a uniform system of duties, weights, measures, &c.

After a number of minor clauses, the last article of Sr. Iglesias's project appoints the first meeting to be held in the city of Guatemala, to consider on a permanent location, but the clause expressly declares that none of the capitals of the five States shall be selected.

Many of the statesmen of Central America sympathized with the plan of Sr. Iglesias, but it was not adopted.

On January 23d, 1863, the president of Guatemala, Gen. Carrera, declared war against the republic of San Salvador. Four months before, the president of San Salvador, Gen. Barrios, had proposed to Gen. Carrera to place himself at the head of a Central American league, and march to the aid of Mexico against France. The answer of Gen. Carrera was a declaration of war against Salvador. He left his capital, Guatemala, on February 4th, with an army of 2,700, who were to be joined on the frontier by 2,300 men. On February 18th, he entered the territory of Salvador, and occupied the town of Santana. On February 24th, he attempted to storm with his entire army the position of the Salvadorians at Ocotepec, but was totally routed, and forced to retreat into the territory of Guatemala. Soon after he again invaded the territory of Salvador, but had scarcely crossed the frontier before a revolution broke out against his rule in Guatemala. He at once returned, after having burned the town of Matapan, and succeeded in crushing the insurrection. He then resumed the invasion of San Salvador, in which he was assisted by the troops of Nicaragua. Gen. Barrios, who was supported by Honduras, encouraged an invasion of Nicaragua by Gen. Jerez, an exile leader of the liberal party of Nicaragua. This insurrection was, however, soon suppressed, Gen. Jerez having been totally defeated at Leon. During this insurrection the steamers of the Central American Transit Company were seized, on April 7th, by an Amer-

ican, named James Thomas, and handed over to a general of the revolutionary party. As the company observed a strict neutrality in the revolutionary troubles, both parties declared themselves satisfied with such a course, and the steamers were restored to the company.

The war in San Salvador finally took a turn unfavorable to Gen. Barrios. By the beginning of September he was completely surrounded in his capital, and its seaport cut off by the invading army. In November he escaped, with the assistance of the United States minister and the English consul. Gen. Carrera, having now conquered the whole republic, appointed Gen. Dueñas acting president, and on November 15th, with his army, retired to Guatemala.

CHATTANOOGA was a flourishing village in Hamilton county, Tennessee, situated on the Tennessee river, two hundred and fifty miles below Knoxville, and one hundred and forty miles southeast of Nashville. It is the terminus of the Nashville and Chattanooga railroad, and of the Western and Atlantic railroad, which connects it with the chief towns of Georgia. The Tennessee river is navigable by steam during eight months in the year, and by small boats at all times. This has made Chattanooga one of the most important towns in the State. The surplus productions of East Tennessee, and mostly of Middle Tennessee, are shipped from this point. It was occupied by Gen. Rosecrans in September, and subsequently held by the Federal army. Its location rendered it a very important military position.

CHEMISTRY. The record of the present volume under this head is designed to present, in brief form, some of the more important discoveries and theoretic views, in connection with chemical science, which have been published or have especially attracted attention during the year 1863. It is not intended to devote as much space as in the preceding volume to applications of chemistry; nor will the great body of the discoveries which continue to be made in the way of new derivatives from substances of an organic nature, and most of which are as yet interesting only to the chemist, be embraced in this account. For certain topics more or less directly related to chemistry, the reader is referred to the article on **ILLUMINATION**, &c.

I. ELEMENTS.—A writer in a recent number of a scientific journal, in speaking of one of the new metals below named, humorously remarks that the metals would appear to be envious of the asteroids, and to be doing their best to keep pace with them in revealing themselves to modern science. To this remark, which must be understood as in a certain degree retrospective, it may be added, however, that while the asteroids are succumbing to the increased power secured in a long-used instrument, the telescope, most of the newly-discovered metals

have the honor of having waited for the development of a wholly new scientific means and apparatus, the spectroscope. (*See CÆSIUM, INDIUM, MAGNESIUM, RUBIDIUM, SIDERIUM, THALLIUM, and WASIUM.*)

II. ALLOTROPIC STATES. *Oxygen.*—The reader is referred to this head, in the article **CHEMISTRY** in the preceding volume. By the method there briefly stated, that with hypermanganate of potash, sulphuric acid, and peroxide of barium, Schönbein states that ozone proper ($-O$) is produced in large quantities, and possessing all the energetic oxidizing properties of that obtained during the slow oxidation of phosphorus or by electrolysis.

Böttger claims priority in the discovery of the method just referred to. He recommends a mixture of two parts of dry hypermanganate of potash with three of sulphuric acid; and finding that this mixture at ordinary temperatures slowly evolves oxygen, he declares the peroxide of barium unnecessary. He finds the mixture one of the most powerful oxidizing agents yet known. Ether, alcohol, and the ethereal oils, brought into contact with a mere trace of it, burst into flame, and flowers of sulphur are converted with some degree of explosion into sulphuric acid.

Schönbein (*Journal für prakt. Chemie*, 86, p. 30) endeavors further to establish the existence of three distinct states of oxygen—the *neutral*, the *negative*, and the *positive*; or, common oxygen, ozone, and antozone. Among the facts adduced are such as the following: The $-O$ rapidly turns brown strips of paper soaked in sulphate of manganese, in consequence of forming peroxide of manganese, MnO_2 ; while $+O$ not only has no such effect, but even bleaches paper previously rendered brown with the peroxide. Hypermanganic acid is rapidly decolorized by $+O$, with formation of protoxide of manganese, which, by $-O$, may then further be converted into MnO_2 . In place of sulphate of manganese, basic acetate of lead may be used: this with $-O$ gives PbO_2 , in its turn reduced by $+O$ to PbO and neutral oxygen. Schönbein's explanation of facts of this sort proceeds upon the assumption that in the peroxide of lead, hypermanganate of potash, and chromic acid, the whole or a part of the combined oxygen exists in the form of $-O$; in the peroxides of barium and hydrogen, in the form of $+O$. He believes that union of equal weights of $+O$ and $-O$ gives ordinary oxygen. He lays it down as a principle, that for the oxidation of the same bodies the same kind of oxygen is always necessary.

The fact of production of both nitrous acid and ammonia in air, in presence of water and nascent oxygen, was announced by Prof. T. S. Hunt in 1861; and this fact has become the occasion of the objections frequently urged against the employment of paper saturated with starch and iodide of potassium (ozonometric paper, so-called) for determining the

presence of ozone in the air. The coloration of this ozonometric paper, which is still, as a very general rule, regarded as indicating the presence of ozone, may, it appears from the principle just stated, show in fact only the presence of the nitrite of ammonia which arises during evaporation of water, and in increased quantity (it is said) when the water contains calcareous substances. (See also *Nitrification*, further on.)

Dr. Wilhelm Heldt, in a pamphlet upon the "Fundamental Properties of Oxygen and Hydrogen," controverts the views of Schönbein in reference to the allotropic modification of oxygen. Among his conclusions are the following:

1. There are no such modifications of oxygen as ozone and antozone. Phosphorus, with water and oxygen, yields the ordinary—and also, a gaseous—peroxide of hydrogen; and the latter, which has powerfully oxidizing properties, is mixed in variable proportions with air or oxygen. The presence of hydrogen in this compound can be proved by the deliquescence of anhydrous phosphoric acid beyond the heated part of a tube through which the gas is passed. The so-called antozone, from peroxide of barium, gives the same result.

2. Pure uncombined oxygen never possesses the properties of the gas spoken of.

3. Various liquid or gaseous organic compounds, as oil of turpentine, &c., when saturated with oxygen, become—like the inorganic superoxides—powerfully oxidizing bodies.

4. Oxygen never passes, previous to oxidation of bodies, into a new or active state. The author proved that the air [*sic*] employed to oxidize a solution of sulphate of iron, had undergone no change whatever.

5. The only method of communicating to perfectly dry oxygen a higher activity, is by electrization. And oxygen is never, otherwise, capable of setting free iodine from iodide of potassium.

6. Atmospheric air almost always gives a more or less distinct reaction with iodide of potassium paper. This is to be explained by the fact that the atmosphere is a reservoir for all the gaseous substances formed at the earth's surface. In the reaction there are always two opposing agencies—one setting the iodine free, another combining with the iodine or bleaching the blue paper. In the former class stands nitrous acid; in the latter, various hydrogen compounds, as HS , PH_3 , &c.

7. Peroxide of hydrogen (of Thénard) is not, as Schönbein assumes, oxidized water, that is, $\text{HO} + (+\text{O})$; but is a carrier of oxygen, and of which all the oxygen may be transferred. When the peroxide is brought in contact with another substance which has an attraction for oxygen or hydrogen, the whole quantity is resolved with oxygen or with hydrogen, either of which may combine with the body in question; that is, the peroxide may act as a reducing or as an oxidizing agent. Finally, the author so

explains certain instances urged by Schönbein, as apparently to show that, in relation to them, the assumption of the polarity of oxygen is unnecessary.

[These views, it may be remarked, tend to unsettle only the question as to the precise nature of the agency concerned in constituting a certain physical condition of the atmosphere, and in producing certain specific results of a chemical or of a physiological character. The new views cannot assume to deny that peculiarity of atmospheric condition, or those special manifestations of chemical and of physiological activity, which have come latterly to be ascribed to ozone. If no such thing as ozone exists, still the so-called "ozone atmosphere," and "ozone action" in chemical affinity and upon living bodies, are *facts*; and as such they remain to be accounted for.]

Sulphur (New Modification of.)—M. Dietzenbacher (*Comptes Rendus*, Jan. 5th, 1863) observes that by action of chlorine, bromine, or iodine, the properties of sulphur may be modified to a remarkable extent. A mixture of 400 parts of sulphur and 1 of iodine being heated to about 180°C ., upon cooling, a sulphur is obtained which remains a long time elastic, and which, poured on a glass or porcelain plate, forms flexible sheets. The like change is produced by iodide of potassium, and even by a less amount of sulphur. The sulphur thus prepared is insoluble in bisulphide of carbon.

The action of 1 per cent. of bromine at 200°C . is similar; but the sulphur, instead of being then black and having a metallic lustre, has the color of yellow wax; and this variety is much softer than that before described. Of it 75 to 80 per cent. is insoluble in bisulphide of carbon. Chlorine being passed through sulphur at 240°C ., changes it into a sort of soft sulphur, which can readily be drawn out, and the parts again stuck together. Of this, rather more than of the last is soluble in bisulphide of carbon. After this modification of sulphur has been worked up for an hour or two, it suddenly hardens; and it then becomes quite insoluble in the bisulphide.

III. INORGANIC COMPOUNDS. *Supposed New Series of Metallic Oxides.*—M. H. Rose is led to believe that he has detected the existence of a new class of metallic oxides, at least one of which he appears also to have succeeded in forming. Reasoning both from the law of the relation of the specific heats of elements to their atomic weights, and also from that of isomorphism, it is inferred that the atomic weight of silver should be reduced to one-half that usually admitted. Rose finds the sulphide of copper (Cu_2S) isomorphous with that of silver (Ag_2S). But now, if in what has been called protoxide of silver there are 2 atoms of Ag to 1 of O, then the suboxide of the same metal must have the composition Ag_4O . This last consequence would necessarily be doubted, until analogous compounds are shown to exist. Rose has accordingly experimented with very

great care, with a view to find whether other such oxides can be formed. He has succeeded in the case of copper, and hopes soon to do so with mercury also, as well as to show that, though difficult of isolation, the number of such oxides is not small.

He calls attention to the great irregularity now existing in our nomenclature of the oxides of different degrees of oxidation, with the consequent uncertainty that—so far as the names go—is left in any case in respect to actual composition; and he presents a new nomenclature which, saying nothing of the assumed new oxide to be named, is in any case beautiful by reason of its simplicity and entire definiteness. He finds that there are thus far known five distinct classes (degrees) of oxides proper, at least the first four of which are salifiable; viz.:

(1.) 4 atoms of metal	to	1 atom of oxygen.
(2.) 2 " "	"	1 " " "
(3.) 1 atom	"	1 " " "
(4.) 2 atoms	"	3 atoms "
(5.) 1 atom	"	2 " " "

To these in order—M representing in the formula any metal—he assigns the following names:

- (1.) $M + \frac{1}{4}O$ = Quadrantoxide.
- (2.) $M + \frac{1}{2}O$ = Semioxide.
- (3.) $M + O$ = Isoxide.
- (4.) $M + 1\frac{1}{2}O$ = Sesquioxide.
- (5.) $M + 2O$ = Diploxide.

Corresponding compounds of the metals with chlorine, bromine, iodine, cyanogen, or sulphur, would be indicated by similar prefixes; thus, quadrantichloride, semichloride, &c.

As to the forming of the new oxide of copper: when a solution of sulphate of copper is added to an excess of a very dilute solution of protochloride of tin in caustic alkali, a hydrate of protoxide of copper is precipitated, which after a short time becomes yellow, and on shaking passes into an olive green: still later, this in turn changes color, and finally becomes reduced to metallic copper. The green oxide is only with great difficulty obtained in a state of purity, owing to its tendency to oxidize, and also to the difficulty of removing the last traces of tin.

Rose appears to have established the constitution of this green oxide beyond a doubt. Dilute sulphuric acid decomposes the oxide into 1 atom of sulphate of copper and 3 of metallic copper. Dilute chlorhydric [muriatic] acid yields at first a dark colored substance (perhaps Cu_4Cl), but metallic copper and the white subchloride are then speedily formed. Sulphydric acid water converts the oxide into a black powder, which the author regards as Cu_4S . Cyanhydric acid also converts the oxide into a black substance, probably Cu_4Cy . The moist oxide is distinguished in a remarkable manner from the suboxide and the protoxide, in not being dissolved by ammonia.

Rose extends his view to the 5 alkaline metals, and to thallium; regarding potash and soda [in this, following the views of Gerhardt and Regnault] as K_2O and Na_2O ; and so of the others. He recalls the formation by

Bunsen of blue alkaline subchlorides by electrolysis, and states that these compounds can also be obtained by fusing K with KCl, or Na with NaCl, in a current of hydrogen gas. These compounds he regards as quadrantichlorides, K_4Cl and Na_4Cl .

New Compound of Arsenic and Hydrogen.—It is well known that, in presence of zinc, iron, and certain other metals, acids disengage hydrogen from water; and also that if the nascent hydrogen comes at the moment in contact with solid arsenic, a new compound, AsH_3 , is generated. An exception is presented in case of nitrous acid and its derivatives, which, in giving rise to ammonia, generate a solid and not a gaseous hydruret of arsenic, its formula being As_2H . This is either deposited on the zinc or floats in flocculi through the liquid; and such a compound results even when the solution contains any quantity of a nitrous compound. Still, there are two obstacles that may prevent the formation of this solid body—the presence either of such metals as lead, or of organic matter.—Wiederhold has described also a method of preparing the solid As_2H , by passing an electric current through the water, and using arsenic as the negative pole.

But from the facts in relation to the first-named of the modes of formation of this compound, it must follow that Marsh's test for the presence of arsenic is still less to be relied on than was formerly supposed—that it is liable to a twofold error. Thus, if from the sulphuric acid employed, or from organic matter present, the smallest quantity of a nitrous compound be developed, the solid and not the gaseous hydruret will then be formed. Of course, as has been for some time known, the not unusual circumstance of the presence of arsenic in the sulphuric acid employed may, on this score also, lead to error.

Bloxam, indeed, finds that all sulphuric acid contains a trace of arsenic which cannot be separated by boiling with HCl or KCl, nor by the usual methods of fractional distillation. He traces the arsenic of the acid to the sulphur from which it is made. He has prepared pure sulphuric acid from sulphurous acid, steam, and nitric oxide, but only when the sulphurous acid used was evolved from crystallized sulphite of soda and sulphuric acid at a low temperature, and the nitric oxide from nitre, sulphate of iron, and dilute sulphuric acid, at a very moderate heat.

Formation of Nitrite of Ammonia in Air: Nitrification.—For a synopsis of the history of these questions, so far as developed up to the close of the year 1862, see the similar title in the preceding volume. An account is there given of the experiments of Prof. C. F. Schönbein, of Basle, apparently showing that during combustion or evaporation of water in free air, nitrite of ammonia is incidentally produced; and brief allusion is also made to the views of certain other chemists, among them Drs. Schæffer and Jones, and Prof. T. S. Hunt, which would appear in greater or less degree to have

prepared the way for Schönbein's results, if not indeed to have anticipated them.

Schönbein's experiments have appeared to show that during combustion in air of charcoal, fats, illuminating gases, wood, coal, and phosphorus, nitrite of ammonia is incidentally generated in determinable quantities; and at least ammonia, during slow combustion in air of arsenic, at 200°.

Prof. Böttger, of Frankfort, has more recently published a reclamation, believing himself to have been the first to show by experiment, and to announce, that in every act of combustion in air nitrite of ammonia is formed. (*Pogg. Ann.*, cxvii, 175.)

M. J. Nicklès ("Amer. Jour. of Science," March, 1863) is struck with what he considers a recent change in the results of Schönbein's labors—in that, where he once recognized only *ozone*, he appears now to discover only *nitrous oxide* or *nitrite of ammonia*. To the test commonly employed by Schönbein and others to determine the presence of these compounds—namely, starch-paste, to which iodide of potassium, and sometimes a very little dilute sulphuric acid is added—he objects that the blue coloration of the starch relied on as the test in the case, may no less take place from the presence of *ozone*, of *chlorine*, *bromine*, or *iodine*, of *aqua-regia*, or *hypochlorous* or *hypobromous acid*. He is led to conclude, also, that the general theory of formation of nitrites in air was substantially anticipated both by Prof. T. S. Hunt, of Montreal, and by Prof. Böttger. But he credits to Schönbein alone the observation of the apparent fact—perhaps yet to be found of the first importance in connection with vegetable physiology and with the science of agriculture—that the generation of nitrite of ammonia goes on at the very surface of the leaves of plants from which water is evaporating, and as a simple and necessary consequence of the evaporation itself that then occurs.

Prof. Hunt, in a letter to the editors of the journal last quoted (same number), says: "My object is to claim for myself the new theory of nitrification, which Schönbein seeks to found upon his recent experiments, and which I published nearly two years since. It is in reality but a natural deduction from my view of the double nature of nitrogen as the nitryl of nitrous acid [presented under ALLOTROPIC STATES, preceding volume; and which the author repeats in his communication], which I have maintained since 1848." It does not appear, however, that Prof. Hunt made explicitly a deduction of the nitrite-theory as it now stands, however naturally it might flow from his actual observations at the time.

Dr. G. C. Schæffer, in a letter through the same medium (May) claims to have put forth, through Dr. Craig's "Report on Nitrification" (really presented in 1856, although published in 1861), a "hypothesis * * * arrived at by legitimate analogies, and which it would be in-

teresting to test by experimental investigations," and which, "based upon that general chemical action by which various bodies assume the elements of water in such a way as to produce salts of ammonia," claims that this principle may be exemplified in the case of atmospheric nitrogen, the latter assuming 4 equivalents of water, and thus giving a nitrite of that alkali. Further, he believes himself to have made the first announcement, in a paper appearing in the "Proc. of the Amer. Assoc. for Adv. of Science," 1850, of such a fact as that the rainwater collected after a period of frequent and severe thunder showers contained of itself so much of nitrates and nitrites, as to be unfitted for use in certain tests for these compounds which he was then making.

Meanwhile, the subject is further complicated, if indeed the theory be not in some degree unsettled, by the recently published researches of E. Böhlig (*Ann. der Chem. und Pharm.*, cxxv, 21–33), and which he states that he has for some time been carrying on, independently of the investigations of Böttger and Schönbein. He is led to believe that the atmosphere at all times contains in greater or less proportion the nitrite of ammonia, but never the nitrate, the former being originated "wherever ozone comes in contact with nitrogen [and water-vapor, of course], as well as in all cases of combustion in free air." He does not admit Schönbein's view of a direct union of nitrogen and water attending evaporation; but he concludes that in such case the water-vapor forming merely collects the preëxisting nitrite from the atmosphere. He holds that Schönbein's experiments are vitiated by the facts of their being made with unlimited quantities of air, and of his having overlooked the preëxistence of nitrite in the air. In some of Böhlig's experiments on rain-water, as after a protracted rain, the water required to be evaporated to $\frac{1}{8}$ th its original bulk before giving evidence of nitrous acid; at other times, when the weather was fine, the water often gave the reaction after once flowing over the test-paper, and when its quantity was yet scarcely diminished by evaporation. Again, allowing carbonate of potash to *deliquesce* in the air, the liquid salt then showed that it contained also nitrite of ammonia: would Schönbein affirm that water, in the act of *condensation*, also unites with nitrogen, and generates the nitrite?

In concluding his abstract of these researches, Prof. S. W. Johnson, of Yale College, remarks that the whole subject requires thorough experimental revision. And although some of Schönbein's experiments can scarcely be explained on any other hypothesis, he thinks that the facts in our possession are still not sufficient to warrant the assumption that nitrite of ammonia is spontaneously formed in the air from nitrogen and the elements of water.

IV. ORGANIC COMPOUNDS.—Under this head will be included not only compounds which are directly of organic origin, but also such as, while resembling the former in composition and

properties, may be actually produced chemically, by any of the so-called modes of synthesis.

Acetylene.—M. Berthelot has found that when graphite is intensely heated by means of the galvanic current in an atmosphere of hydrogen, acetylene is formed in considerable quantity. The same result is obtained with gas-carbon and with purified wood-charcoal, though in this last case with much greater difficulty, perhaps because of its not being easy to heat the very porous mass to the requisite high temperature. Under the circumstances in which acetylene is thus formed, carbon does not combine with chlorine, bromine, or iodine; nor can pure carbon be made to combine with pure nitrogen. The spark of Ruhmkorff's apparatus gives no acetylene with pure carbon and hydrogen.

Alcohol from Olefiant Gas.—M. Berthelot considers that his experiments have sufficed to prove that the alcohol produced by his method from olefiant gas (C_4H_4), and common alcohol derived from the vinous fermentation, are not merely analogous and yet distinct bodies, but that they are in every respect identical—there being no physical or chemical distinction between either these alcohols or their ethers. Thus, the ethyl-sulphate of barytes obtained from ordinary alcohol is the same as that from the olefiant alcohol; and when the latter is treated with chromic acid, it gives rise to an ether and to acetic acid which are in no way distinguishable from those produced in similar manner from ordinary alcohol.

Manufacture of Alcohol by means of Olefiant Gas.—M. J. Nicklès gives an interesting statement upon this subject ("American Journal of Science," Nov., 1863) which we condense:

The industrial world has been, for some time, much interested in a process for producing alcohol by means of illuminating gas, at a very low cost—25 francs ($18\frac{1}{2}$ cts. each) per hectolitre (about 22 gallons), or about 21 cts. per gallon. It has been stated in some journals that the manufacture is going on at St. Quentin; and that the apparatus, taking in coal upon one side, pours out alcohol on the other! These statements are exaggerations; but a company at St. Quentin are now actually engaged in attempts at such a manufacture, under a patent of Mr. Cotelte, founded on Berthelot's synthesis of alcohol (1855) in the way of causing sulphuric acid to absorb olefiant gas (C_4H_4), with the production of sulpho-vinic acid, which is then readily turned into alcohol ($C_4H_6O_2$).

Cotelte employs chiefly illuminating gas, which contains from 4 to 12 per cent. of C_4H_4 . He purifies the gas from sulphydric acid and ammonia; and he then desiccates it by passing it over mono-hydrated sulphuric acid. The dry gas is then drawn along by suction and directed to a column of glass or sandstone furnished with trays or diaphragms pierced with small holes, from which descends the same acid and of the same strength as just named, to meet and

dissolve the C_4H_4 . This solution, which takes place slowly, may require a succession of 40 such trays, to take up all the olefiant gas and secure saturation of the acid. The sulpho-vinic acid thus obtained is next treated with 5 times its volume of water; a stream of vapor is made to carry over the alcoholic product; the vapors are condensed; the alcoholic liquid obtained is redistilled over a little lime, to remove any traces of sulphuric acid, and the liquid condensed from this distillation is rectified to produce alcohol of 90°.

The residue of the illuminating gas, consisting largely of C_2H_4 , CO, H, &c., can be advantageously used for fuel, thus offsetting in part the cost of making the gas in the outset, and rendering the expense of it small, especially if, as near the mines, use can be made of the gas which issues from the coke furnaces. To produce one hectolitre of alcohol of 90 per cent., about 40 cubic metres of C_4H_4 , answering to about 2 tons of the coal employed, are required. Among the chief practical difficulties, thus far, are the large amount of the acid requisite (10 parts to 1 of the alcohol product), and its great deterioration; in the latter respect, the acid, employed at a strength of 66° of Beaumé's areometer, being after the process reclaimed at from 20° to 25°; so that while a hectolitre of alcohol requires for its production 1500 kilogrammes (?) of sulphuric acid at 66° B., the acid after use must either be turned to some account in its dilute state, or must be concentrated for a new process; and hence, to all the other apparatus there must be added that for concentration, or leaden chambers. It is declared, however, that these difficulties are being gradually overcome.

Bases of Anilin Colors.—Prof. A. W. Hofmann has continued his researches into the composition and properties of the derivatives of anilin. He finds that the oxidation of anilin results in a beautiful yellow coloring matter, which he terms *chrysanilin*. This base accompanies rosanilin in all the usual modes of preparation. Isolated, it is a fine yellow amorphous powder, very soluble in alcohol and ether. It yields two classes of well crystallized salts, being monacid and biacid: its nitrate is so insoluble as to constitute chrysanilin the best known reagent for nitric acid. By the action of the chlorides of carbon, tin, mercury, and other metals, and of certain oxidizing agents upon anilin, the red coloring matter is produced: this organic base he terms *rosanilin*. Pure, it is colorless, crystalline, and slightly soluble in water, and becomes red on exposure to the air. It dissolves in alcohol with a dark red color. The change in color is not attended with change of weight. This base forms three classes of salts, monacid, biacid, and triacid. The dry salts of the first of these classes show a greenish lustre, but by transmitted light are red; their solutions are of a magnificent red color. Rosanilin, by action of nascent hydrogen, is converted into another

colorless and crystalline base, *leucanilin*: this forms salts which are triacid.

The formulas of the three bases now named exhibit a remarkable connection—a sort of homology in which H_2 is the constant difference. They are now given by Dr. Hofmann as follows:

Chrysanilin..... $C_{40}H_{17}N_3$.
 Rosanilin..... $C_{40}H_{19}N_3$.
 Leucanilin..... $C_{40}H_{21}N_3$.

The same author has examined the beautiful blue coloring matter obtained from crude chinolin, by action of iodide of methyl, or of ethyl, &c., and termed *cyanin*. The iodide of this base has the formula $C_{60}H_{30}N_2I$. Another and homologous base, its iodide $C_{56}H_{32}N_2I$, is in the commercial cyanin associated with the former. (*Comptes Rendus*, liv. 428; lv. 817-49.)

More recently, Hofmann has determined the facts that either anilin or toluidin, pure and taken singly, does not yield coloring matters with oxidizing agents. Since a mixture of these two bases readily yields the characteristic colors, he infers that the coloring matters contain both the phenyl and tolyl molecules. For the anilin blue, he has found the formula $C_{76}H_{31}N_3$; and regarding this as rosanilin in which 3 equivalents of H are replaced by 3 of phenyl, he considers its rational formula to be $C_{40}H_{16}(C_{12}H_5)_3N_3$, and terms it triphenyl-ro-sanilin. It is prepared by heating rosanilin with an excess of anilin. This base, free, is a white amorphous substance: its chlorhydrate has a bluish-brown color, and dissolves in alcohol with a magnificent blue. The iodides of methyl, ethyl, and amyl act readily upon rosanilin, forming new coloring matters analogous to anilin blue, and which contain three equivalents of one or other of the three radicles just named, in lieu of 3H. The author promises further communications on the nature of anilin-green, anilin-violet, and azulin. (*Ibid.* lvii. 25.)

V. PHYSICO-CHEMICAL Phenomena and Principles. *Dialysis*.—M. Ern. Guinet has been investigating the phenomena of transport through porous bodies. Having experienced difficulties in the use of the dialyser of vegetable parchment [see under CHEMISTRY, prec. vol.], he substituted for it a porous septum of pipe-clay, similar to the material of the porous cups of certain batteries. With this he succeeded in repeating most of Graham's principal experiments; and he also performed some which with the parchment septum appeared impossible.

Thus, into a mixed solution of gum and sugar was plunged a porous vessel containing pure water: in 24 hours most of the sugar had traversed the porous vessel and was dissolved in the water, which did not, however, contain a trace of gum. In like manner bichromate of potassa is speedily separated from its solution with caramel. M. Guinet was at the time of writing experimenting with a view to obtain a soluble modification of cotton, by separating

this substance from its solution along with ammoniacal oxide [query: sulphate?] of copper—the latter alone passing through the septum. This experiment could not be made with the vegetable parchment, since the latter would be acted on by the ammoniacal copper.

The author finds that the diffusibility of different crystalloids in a given liquid, as bisulphide of carbon, is by no means the same. When iodine, sulphur, and naphthaline are dissolved in the bisulphide, the latter permeate a porous vessel into pure bisulphide much sooner than the former. The explanation he gives of phenomena generally of the sort here considered, is not directly chemical, or physico-chemical, as that of Mr. Graham, but simply mechanical, though conditioned upon differences in character of the molecules of different substances.

He supposes the porous membrane or septum of any sort to act merely as a sieve, through which the molecules of various bodies pass with greater readiness as they are more attenuated. Thus, the crystalloids, which pass readily, have generally a compound atom but slightly complex; while the colloids, which are detained, have a high equivalent and considerable atomic volume—a consequence of their highly complex atom. And the less diffusible of the crystalloids are, also, those which correspond to the greatest atomic volume (taking for this, however, the quotient of the atomic weight by the density, which cannot be exact). Such an instance he considers as being presented in case of the two elements, iodine and sulphur, the former of which is the less diffusible.

Dissociation of Bodies by Heat.—M. Sainte-Claire Deville has made some interesting discoveries in connection with the decomposition of bodies by heat. On passing through a porous earthen tube a current of hydrogen, this element diffuses so rapidly that the gas which issues from the other end of the tube will be found to be, not hydrogen, but air. If this porous tube be surrounded by a longer and shorter tube of glazed porcelain, and carbonic acid be passed into one end of the latter, the two gases will be found to have changed places by the time they have reached the other end of the two tubes.

When the tubes were heated to 1100° — 1300° C., and a current of steam passed through the inner one, while a carbonic acid current is made to pass through the outer tube, the gas collected at the other end of the tubes consisted of hydrogen and oxygen gases, mixed with carbonic acid—a fact showing that the steam, or a portion of it, had undergone decomposition.

Devil is led to consider the decomposition of a substance as in all respects analogous to the ebullition of a liquid: water is completely decomposed at a temperature sufficient to expand its vapor to ten-fold its volume at 0° C. The decomposition can also take place at lower temperatures, the phenomenon being in this respect analogous to that of the evaporation of liquids below their boiling points. Deville

has also extended his observations to the dissociation of the elements of carbonic acid by means of heat.

Deposit of Camphor toward the Light.—It has been generally stated in books of chemistry that camphor vapor has a tendency to be deposited toward the light; that is, if a bottle containing camphor be exposed to sunlight, the camphor will be deposited in crystals against that side of the bottle which is turned toward the light. Mr. C. Tomlinson's experiments have led him to conclude that heat is the real agency concerned in determining the phenomenon thus observed. He exposed a great number of bottles of camphor to light under different circumstances (as, for instance, when immersed in water), and found that no deposit was formed under those conditions that prevented a radiation of heat.

His theory is to the effect that, in all cases in which deposits are produced in preference upon one side of a containing vessel, as of such materials as camphor, naphthaline, iodine, mercury, water, &c., from the state of vapor, this result is determined in accordance with two well-known laws: 1, there has been a radiation of heat to greater extent from that surface, rendering it colder than the vapor in its vicinity; and, 2, a condensation of vapor then takes place by contact with the colder surface. A like result is obtained with some salts in solution.

VI. THEORETICAL CHEMISTRY. *Numerical Relations of the Alkali-Metal Equivalents.*—M. Dumas remarks that, among the alkali-metals, thallium is (so far as yet known) the last term of a scale of numerical relations in which lithium is the first, and in which the equivalents of the others mark so many different degrees. Thus, taking Li as 7, and correcting Dumas' list and ratio (in this single particular) with Profs. Johnson and Allen's result for cæsium, we have the following scale:

Elements.	Equivalents.
Lithium.....	7
Sodium.....	23
Potassium.....	39
Rubidium.....	85
Cæsium.....	133
Thallium.....	204

Now, between certain terms of this series the following striking relations are to be discovered:

1. Li, Na, and K form a triad, the equivalent of the middle term of which is exactly the mean of those of the other two, thus, $\frac{7+39}{2} = 23$.

2. K, Rb, and Cs appear to form a second triad, the equivalent of its middle term being almost exactly the mean of those of the other two; thus, $\frac{39+133}{2} = 86$.

3. Addition of double the weight of Na to that of K, gives precisely the weight of Rb; thus, $23 \times 2 + 39 = 85$.

4. Addition of double the weight of Na to

the weight of Rb, gives approximately the weight of Cs; thus, $23 \times 2 + 85 = 131$.

5. Addition of double the weight of Na to 4 times that of K, gives approximately the weight of Tl; thus, $23 \times 2 + (39 \times 4) = 202$.

These relations, Dumas believes, must attract the attention of chemists; and without attributing to them a value that the actual numbers would not justify, they show the interest which attaches to the careful comparison of the equivalents of bodies belonging to the same family.

[The analogies above shown, if they have any real value, would appear to suggest a doubt whether the equivalents of some of the elements here considered have yet been with entire correctness determined.]

VII. APPLICATIONS OF CHEMISTRY.—For certain applications of chemical facts and principles, the reader is referred to the subject of ILLUMINATION, and some others of the heads previously mentioned in this article.

Coloring Articles of Copper and Brass.—Mr. J. Hunt, of Birmingham, England, coats articles of copper and brass with platinum, by immersing them in a weak solution of the bichromate of that element, heated to the boiling point, and then by the galvanic battery in the usual method causing the deposit of a thin film of the metal over their surfaces. The effect is to impart to the articles so treated a bright steel color, which, when the articles before immersion are burnished, is of a beautiful bluish cast.

Bronzing Cast Iron.—The pure copper which is deposited by a galvanic battery has been found to be peculiarly adapted to the coating of cast-iron figures exposed to the weather. This copper is mixed in a state of powder with oil, and is then laid on with the brush, as a paint. The iron balcony decorating the façade of the *Théâtre Français*, in Paris, is thus bronzed.

New Uses of Aluminium Bronze.—An account of the composition and properties, and of certain uses, of aluminium bronze, was given in the preceding volume. As the bronze is very ductile, and well suited to the processes of rolling and hammering through which steel and gold require to be passed in the making of pens, Mr. R. Pinkney, of London, proposes to substitute it for those metals in the manufacture of pens. He states that the alloy of which the aluminium amounts to 95 per cent. has a fine gold color; while that in which the copper forms $7\frac{1}{2}$ per cent., is of a beautiful green.

Mr. J. Erwood, also of London, has patented the manufacture of bronze powders and leaf from the aluminium bronze, and which are intended to take the place of the powders and Dutch-metal leaf in common use, for application to paper-hangings, gildings, &c. Copper 90 parts to 10 parts of aluminium are said to produce a bronze of a fine yellow color. This is rolled, annealed, and beaten to the thinness of foil or leaf; and in this form it can

be used for common gilding. By stamping and grinding the foil, in the manner in which the ordinary powders are produced from tin and brass, the new bronze powders are obtained. The foil and the powders are applied by pressing or dusting them upon varnished surfaces.

Paints from Iron Slag.—The iron slag produced in puddling furnaces, containing a large quantity of oxide, can, it is found, when reduced to powder, be employed as a substitute for litharge, as a drier for paints. It is prepared by pulverizing, washing and drying. It serves not only as a cheap drier for paints, but also when mixed by itself with oil, as a cheap paint for coarse uses.

Silvering Cloth.—Mr. J. Cimeg, of London, has patented a process for depositing metallic particles upon fabrics of silk or wool. He states that the concentrated juice of fruits, as of currants and apples, contains in small amount a chemical principle capable of acting as a mordant on cloth, and of precipitating from the state of solution the particles of certain metals, as silver and gold. Having cleansed thoroughly a silk or woollen fabric, to remove from it all oily and gummy matters, he immerses it (for silvering) for a short period in a solution of nitrate of silver, ammonia, and Rochelle salt; after this the fabric is steeped in the fruit juice. In consequence of the reaction then taking place, pure silver is, from the solution of the nitrate previously taken up by the cloth, deposited upon its fibres. The fabric being cleansed in soft water, the silver is found to adhere to it, and so as to be incapable of removal by washing.

Rendering Fabrics Non-inflammable.—In a notice of this subject in the *CYCLOPÆDIA* for 1862, mention was made of the use for the purpose specified of the chloride of zinc, the sulphate of ammonia, tungstate of soda, and common salt. It is recommended also to mix the phosphate of ammonia with chlorhydrate of the same base; an efficacious solution should contain 20 per cent. of this mixture; or of the sulphate alone a 7 per cent. solution will prove equally effectual. Either of these can be applied in those manufactures where stuffs are stiffened under the action of hot air or by cylinders heated by steam; but they cannot be used where the common smoothing-iron is to be employed, from the fact of their being then decomposed by the heat. In such case, however, a 20 per cent. solution of tungstate of soda may be employed; but like borax, alum, &c., this is liable to destroy the thread of cotton stuffs. All these solutions should be applied to the stuffs after they have been first stiffened with starch and dried. Common salt is not liable to either of the sorts of objection holding against the ammonia salts on one hand, and the tungstate of soda on the other.

M. Sauvageon has discovered that cotton stuffs exposed for awhile to the vapor of burning sulphur, assume such a degree of incom-

become brittle when held over the flame of a spirit lamp, yet they cannot be made to take fire; while in the same circumstances, similar fabrics not so prepared are inflamed at once. It would appear an easy matter to subject white clothing after washing to the vapor of sulphur; and an incidental effect would be that of bleaching it more perfectly. How often the exposure would be necessary appears not yet to be known; nor, perhaps, whether the fibre is damaged in consequence. But the suffocating and poisonous properties of the sulphur vapor (sulphurous acid) would evidently necessitate much precaution in any attempts at a domestic application of this method.

Caustic Soap for Cleaning Flax, &c.—In the "*Scientific American*"—to the weekly notices of discoveries and of important patents appearing in which, we are indebted also for some other items under this topic—date of April 4th, 1863, an account is given of Mr. Henry's patent for a highly caustic soap, to be used in the treatment of flax, hemp, nettles, straw, grass, &c., to obtain fibre for spinning. The soap is made by combining a concentrated solution of caustic alkali with oil, grease, or other saponifiable substance, in such a way as to secure an excess of alkali. Mr. Henry states that after the gathering of flax, &c., no further preparation than that of steeping in a solution of such soap is requisite: the fibre will then be properly freed from the glutinous matters of the plant; and pulp for paper may also be thus obtained. The use of the soap in moderate quantity is said to take the place of the usual rotting process, and to render the subsequent crushing operation much more easy. The gummy and oily parts of the plant are so removed, or disintegrated, that upon subsequent washing a clean and beautiful fibre is obtained.

Purification, and also Concentration, of Waters, by Freezing.—Sea-water, in freezing, forms flakes of ice consisting of nearly pure water, the residual liquid being then extremely saline, so that in some northern countries it is used to furnish salt. Dr. Robinet, of Paris, has recently applied the same process for the purification of fresh water. He found the ice of water taken from the Seine, and from wells and springs, and then frozen, to be nearly as perfectly freed from such impurities as salts of lime and magnesia, as is distilled water. It is accordingly now proposed to procure fresh water on shipboard, not by distillation, but by congelation.

Again, the concentration of mineral waters has long presented a difficult problem, from the fact that, if heat were resorted to, it expelled the gases in solution in such waters. Dr. Henry, of Paris, has now experimented by congelation upon forty varieties of mineral water, reducing these to $\frac{1}{8}$, $\frac{1}{15}$, and even $\frac{1}{20}$ of their original volume, but without removing or altering the gases contained in them. It is quite certain, however, that in some cases changes will under such process take place in the salts in solution; and so far, this will vary

the therapeutic properties of the waters. The concentration will secure great economy in transportation; and the ice meanwhile obtained has of course its value. Messrs. Tichon and Melsens, of Aix les Bains, Savoy, have recently put in a reclamation on the score of this process, claiming to have applied it since 1856 for the improvement of the taste of disagreeable sulphurous waters, and also to concentrate their mineral ingredients. The former asserts that the method will not suit all mineral waters, since it alters organic matters if these are held in solution in them.

Manufacture of Ice.—The objects to be secured in the processes just treated of, are much facilitated by the new method of M. Carré for the manufacture of ice, and of course, for the freezing of waters for any required purposes. This method, which attracted much attention in the Exhibition of 1862, and of which a full description is to be found in *L'Année Scientifique et Industrielle*, by Figuier (1863), is one which M. Carré has based essentially upon an apparatus of American invention, that of Prof. A. C. Twining. The latter had produced ice in a brief time by the cold consequent on volatilization of sulphuric ether; but a difficulty existed in the way of maintaining the requisite vacuum: M. Carré now substitutes ammonia, previously liquefied by condensation; the frigorific effect being due to the large amount of heat which becomes latent in this material when allowed again to assume the gaseous form. The new apparatus, which can be worked either intermittently or constantly, is being introduced into many branches of industry. Besides its application for purifying water, and for concentrating mineral waters, as above referred to, it is also employed by brewers for freezing the wort of beer destined to undergo fermentation; by restaurant keepers for preparing ices and sherbets; and by vine growers to concentrate wines.

Alcohol, Manufacture of, from Olefant Gas.—See this subject under the preceding division of ORGANIC COMPOUNDS.

A New Safety Paper.—Mention is made in "Macniven and Cameron's Paper-trade Review," of a new safety paper, designed to prevent forgery or alteration of shares, bank-notes, checks, bills, or any paper demanding such security. The sheet of this paper is formed of several layers of pulp superposed, and which can be of different colors or nature, according to requirement. It is only necessary that the middle layer of the paper be colored of a delicate or destructible color, when, if acids or other chemicals are employed to obliterate the writing or print on its surface, they will also destroy this color; and the hue wanting at such spot cannot be restored save by means that will destroy the whiteness of the surface of the paper. Thus this plan is likely to serve as an excellent check to the fraudulent alteration of documents.

Protection of Skins and Furs from Vermin.—Dry skins, as those of stuffed birds and ani-

mals, as well as furs, &c., are known to be subject to the attack of insects, by which they may soon be destroyed. To prevent such injury, P. W. Payras, of Paris, has taken out a patent for treating such articles with a mixed solution of the sulphate and the chloride of zinc, of a strength corresponding to 15° Beaumé, with the addition of ten grains of arsenic to each quart of the liquid. The preparation having been applied with a brush or sponge to the fleshy side of the skin, the latter is then hung up and dried. Where greater expedition is desired, the whole skin may be dipped in the solution, and then dried. The liquid should be kept in a glass or porcelain vessel. In moderately cold climates, the addition of arsenic may be dispensed with.

Gold and Rubber Plates for Artificial Teeth.—Mr. M. Cartwright, of London, has patented plates for artificial teeth, composed of gold and india-rubber intimately blended. The rubber having been first dissolved in benzine, leaf gold is then ground with it until an intimate mixture, and which is plastic, is formed. This compound is further softened by heating, until it can be worked into the model of the plate required; afterward it is vulcanized by heat in a suitable oven.

CHILI, a republic in South America. The population amounted on December 31st, 1861, to 1,648,804 inhabitants, of whom 822,727 were men, and 826,167 women. The annual increase is about 20,000. In 1861, 10,604 marriages were celebrated, being at the rate of one for every 153 inhabitants. The Chilian army numbered 2,028 men, and the national guard 26,839. The custom house receipts of Valparaiso, in December, 1862, presented an excess of 30,000 piasters over those of December, 1861, and the general receipts for 1862 an excess of 240,000 piasters over the receipts of 1861. The budget of expenditures for 1863 was fixed at 6,529,000 piasters.

The political history of Chili presents no events of marked importance. In the President's message on the opening of Congress, in June, reforms were as usual noticed and great promises made.

The Chilian Government claimed the ownership of the guano lately discovered on the coast in Mejillones, in conformity with a law of 1842, which declared all discoveries to be "public property," but subsequently stated its willingness to grant licenses to load vessels as formerly, when applied for according to custom house regulations, and thus in a great measure satisfied the public.

At the beginning of the year, Chili had a serious diplomatic difficulty with England. The British representative claimed £50,000 for damages for the loss of an arm sustained by a young man, Whitehead, who had most imprudently and unjustifiably exposed himself by his interference with a sentry in the streets during the late revolution. The enforcement of this claim by order of the British Government, ex-

cited the greatest indignation throughout the country, not only among the natives but also among the British residents. A meeting of about four hundred of the most influential British merchants was held in Valparaiso, to express their feelings with regard to the claim, and they were unanimous in condemning it as most unjust. The English Government, at length, consented to compromise the matter.

On the 8th of December, 1862, Santiago, the capital of Chili, was the scene of a terrible calamity. The church of the Jesuits, while crowded in the evening to overflowing by more than three thousand persons, caught fire. The camphene in a transparency on the high altar set on fire its frame-work, and wrapped in flame a kind of tabernacle wholly composed of canvas, pasteboard, and wood. As no less than twenty thousand lights in long festoons of colored globes hung in the church, with gauze and drapery of every description, the whole interior was in a few minutes an inextinguishable bonfire, and a rain of liquid blue fire poured down upon the crowded masses below. The church had only one door of easy access, which, opening inside, was soon blocked up, and made escape impossible. In less than a quarter of an hour, about two thousand human beings had perished, including many children, but very few men. Feats of the most prodigious valor and thrilling heroism were performed by many individuals on the spot. Mr. Nelson, the American ambassador, in particular, distinguished himself. He was instrumental in saving the lives of fifty young ladies, and never deserted his post at the threshold of the doors until the roof had fallen in, when a complete shower of sparks and cinders seemed to envelop him. He was carried from the spot, with his clothes smouldering, and his hair singed to the roots.

On December 11th, he addressed a letter to the Secretary of Foreign Affairs of the republic, expressing the profound regret caused in his mind, and in that of his fellow citizens residing in Chili, for the terrible misfortune, and assuring the Chilean Government that the Government and people of the United States would feel the deepest sorrow upon receiving the news of this catastrophe. To this letter Señor Toornal, the Secretary of Foreign Affairs of Chili, replied, on December 12th, that he was specially charged by the President of the republic to assure the representative and the citizens of the United States who had taken part in the public mourning, that the noble conduct manifested by them upon this sad occasion would ever be gratefully remembered by the Chilean people and Government. To allay the popular excitement, the Government issued an order that the building in which the disaster occurred should be razed to the ground. The Legislature also passed an act providing that henceforth there should be no illuminations of churches and splendid night services, and that proper measures should be taken in all the

churches to secure a sufficient number of doors. Another result of the calamity was the organization of a fire brigade. On the 31st of December, a similar calamity had nearly befallen the worshippers in another church of Santiago, but fortunately the fire was extinguished.

In point of material prosperity, Chili is making great progress. The railway of Coquimbo, and the line from Santiago to Valparaiso, are finished, and it was intended to construct a telegraphic line from Valparaiso to Panama.

CHINA. An empire in Eastern Asia. Emperor: Ki-Tsiang (before his accession to the throne, Tsai-Sung), born in 1855, succeeded his father Hiengfung in August 22d, 1861. Prime Minister, Yih-soo, Prince of Kung. Population, in 1849, estimated at 415 millions. Area, estimated by McCulloch at 76,815 geographical square miles, by Malte Brun at 69,840, by Barrow at 60,072.

The treaty of Nankin, concluded in 1842, opened to foreign commerce the ports of Canton, Amoy, Fu-tcheu, Ningpo and Shanghai. The treaty of Tien-tsin opened also the following ports: Kiung-tcheu on the island of Hainan, Taiwan upon the island of Formosa, Swatan on the coast of the province of Kiangtung, Tchi-fou on the northern coast of the province of Shan-tung, Niutchiang in the gulf of Leaotong, and the ports of Chinkiang, Kiukiang and Hangchow on the Yang-tse-kiang. The treaty of Peking, of Oct. 24th and 26th, opened the port of Tien-tsin.

Since the middle of the year 1862 the Imperial Government, supported by England and France, has been constantly gaining upon the powerful Taeping rebellion. A number of English and French officers have been in the employment of the Chinese Government and formed different corps of native troops, which learned from them the tactics of the European troops. Several of the French officers lost their lives in engagements with the Taipings. Thus Admiral Protet was killed in an attack upon the city of Kiu-ting, which he undertook to take from the insurgents. Two other officers, Lebreton and Tardif de Moidry, captains of artillery, were likewise killed. The latter was succeeded by Gen. d'Argrabelle, who, in March, 1863, compelled the insurgents to evacuate the towns of Shaouh-sing (90 miles from Ningpo) and Seaousan (20 miles from the former place), and to fall back upon Hangchow. In Oct. 1863, the Franco-Chinese contingent captured Foyang, which was accomplished with 900 men and four guns.

The American General Ward, who had greatly distinguished himself in the service of the Chinese Government, was mortally wounded on September 20th, 1862, in an engagement with the Taipings near Ningpo, and died on the following day. He was succeeded in the command of the disciplined Chinese by Gen. Burgevine, who, however, got very soon into difficulties with the Chinese. On Jan. 4th, 1863, Gen. Burgevine marched into the settlement of

Shanghai from Soong-keong with his body guard, and entered the premises of Ta-kee, a mandarin of wealth, who acted as paymaster to the force. The object of this visit was to obtain money for the payment of his men, which was in heavy arrear. It had been repeatedly promised and as repeatedly withheld, and the consequence was that the troops, being entirely dependent on their pay for the means of subsistence, became insubordinate. To prevent open mutiny, Gen. Burgevine appears to have given his personal promise that they should receive at least a portion of their dues at once, and hence his march to Shanghai. A violent altercation ensued between him and Ta-kee, which ended in Gen. Burgevine giving the Chinaman some violent blows, and seizing \$40,000, which he carried off and distributed among the starving soldiers. The Footai on this issued a proclamation denouncing Burgevine as guilty of treason, removing him from his command, and finishing by offering a reward for his head. Gen. Burgevine retired on board a British vessel, and Captain Holland, an Englishman, was in his place appointed to the temporary command of the Chinese. Mr. Burlingame, U. S. minister at Peking, while disclaiming any right to have General Burgevine restored, or to interfere in the civil war, defended him against the unjust charges brought against him, and at length sent to the Chinese Government a kind of ultimatum demanding that the charges against Burgevine, having been admitted by the Chinese Government to be unjust, should be withdrawn. The Chinese Government complied with this request on the same day.

In July, 1863, Gen. Burgevine with 500 followers joined the insurgents, and the military mandarin at Shanghai offered a reward of £1,000 for the person of Burgevine "dead or alive." Against this offer, Mr. Seward, the United States consul, protested, and the other European consuls signed the protest. Gen. Burgevine became, however, soon disgusted with the insurgents, and left them.

The Anglo-Chinese contingent, under Major Gordon, was particularly successful against the Taepings. In March, Fooshan yielded to an attack, and the siege of Chiang-zu had to be raised by the rebels. Taitan was recaptured in April, after some severe fighting, and after 500 men who had been sent to receive the surrender of the town from the rebel authorities had been treacherously murdered. On Oct. 12th Major Gordon captured Patolkon and Leookadis; on Oct. 24th, Prelung-vor (Wu-lungyow). A correspondent of the Paris "Moniteur," dated Shanghai, Nov. 2d, stated that Ly-Chung-Wong, the commander-in-chief of the rebel troops, after a brilliant campaign of three years, undertaken to relieve Kiang-si, the Hou-nan, and the Hou-pe, had returned precipitately to Nankin, which was attacked by the Imperialists and their allies. He had increased the garrison of the town to 30,000 men, and sup-

plied it with provisions and ammunition for three years. He added to the guns on the 28 advanced works which form the exterior defences of the place, and he established an intrenched camp at Mo-ling, of which he gave the command to Heon-Tien-Hia, his adopted son. Chung-Wong had learned that the greater number of the towns which he captured during the campaign had been retaken by the allies; that, moreover, the Franco-Chinese contingent was laying siege to Hangchow, and that the Anglo-Chinese forces were attacking Soochow. Should these two places fall, the strategic line which the rebel general had formed round Nankin, would be destroyed, and in that case the Imperialists and the allies would unite their forces round the capital, which must be defended to the last extremity. Such were the last orders given by the rebel commander-in-chief.

On December 5th, the important city of Soochow capitulated to Major Gordon. From the account which Major Gordon published of the capitulation, it appears that the Chung Wong, who may be called the Taeping commander-in-chief, held a council of war at Soochow, at which all the Taeping chiefs (or Wongs) were present. He suggested that, as it was useless to fight against the English, both Soochow and Nankin should be evacuated, and that they should retire to the fastnesses of Kwangsi. This all agreed to, except the Mo-Wong, who had charge of the defence of Soochow, and who was determined to defend the city to the death. The Chung-Wong then withdrew with all his men, and the other Wongs, excepting the Mo-Wong, made overtures of surrender, promising to deliver the Mo-Wong a prisoner. At a council of war, however, they came to a different conclusion, and slew the Mo-Wong in his presidential seat. They then made terms which were distinctly understood, and agreed to by the Footai, Gen. Ching, and Major Gordon. These terms embraced a full pardon for the Taeping chiefs and their followers. The city being entered under this capitulation, the Footai decapitated all the Wongs, and gave the city over to plunder, which, to a certain extent, was followed by indiscriminate massacre. Major Gordon exerted himself most efficiently to stop the carnage, to warn the Taepings at a distance of the bad faith in store for them, and to give shelter to all the refugees who were in the neighborhood. On finding himself in an anomalous position, Major Gordon sent a communication to Gen. Brown, the commander-in-chief of the British forces in China, who was on the point of leaving Shanghai for Hongkong. The General immediately proceeded to Soochow, and had an interview with both Major Gordon and the Footai. He then returned to Shanghai, and called a meeting of all the treaty consuls. The result was simply this: that Major Gordon should remain in charge of his disciplined force, and act on the defensive only, but quite independent of the Footai, until a

reply should come from Peking as to the perfidy practised by the Footai. The reason why Major Gordon retained the command is, that if he resigned a Frenchman would be appointed in his place.

In December, a great sensation was produced in Europe, and particularly in England, by the report that Prince Kung, the Chinese Minister of Foreign Affairs had refused to ratify an agreement made by Mr. Lay, inspector-general of the Chinese customs at Shanghai, with Capt. Osborn for the purchase of a fleet, and that Mr. Lay had been dismissed from the Chinese service. Mr. Lay had been authorized by Prince Kung to purchase some vessels, equip them, engage officers and seamen for them, and retain money out of the customs for his pay. He was, indeed, to make what arrangements might, in his judgment, seem desirable, with a view to successfully carrying out of the object in view. Mr. Lay accordingly set out for London, bought the ships, and put Capt. Sherard Osborn in the command of them. Messrs. Lay and Osborn entered into an agreement, and settled the terms upon which the Anglo-Chinese contingent should be managed and paid. Some of the clauses of this document were as follows:

1. Osborn agrees to take the command of the European Chinese navy for a period of four years, and stipulates that there shall be no other European naval commander-in-chief.
2. Osborn, as commander-in-chief, is to have entire control over all vessels of European construction, as well as native vessels manned with Europeans that may be in the employ of the Emperor of China, or under his authority, of the native guilds.
4. Osborn undertakes to act upon all orders of the Emperor which may be conveyed direct to Lay, and Osborn engages not to attend to any orders conveyed through any other channel.
5. Lay, upon his part, engages to refuse to be the medium of any orders of the reasonableness of which he is not satisfied.

Even the color and device of the flag under which the fleet should sail were prepared, and the two Englishmen were perfectly agreed as to the manner in which the whole affair should be managed. When the fleet reached Shanghai, Capt. Osborn was greatly surprised to receive instructions, not from Mr. Lay, whose orders alone he had bound himself to regard, but from Prince Kung, who addressed him as "Osborn, the assistant commander-in-chief of the Chinese navy." Mr. Lay, at the same time, informed him, that he was unable to obtain the emperor's ratification to the terms of agreement, which they had settled in London, and, indeed, that the Chinese authorities had not even taken the trouble to acknowledge its receipt. Capt. Osborn subsequently refused to serve under Prince Kung. "I did not come here," he writes, "or my followers either, to accustom ourselves to the treatment usual with Chinese sailors or soldiers, or to assist in a retrogressive policy in the treatment of European *employés*, or Europeans in general. The employment of ships of war and steam-

ers of European construction is an innovation; that of European officers and gentlemen still more so. I and my force are part and parcel of a new order of things, indicating 'progress in China.' I will be no party to her lapsing back into her ancient system, and treating Europeans as if they were Chinamen. By submitting to such instructions and violation of my original agreement, I should at once deprive myself of the power to assist in carrying out in China the policy of Western civilization."

The European ministers in Peking protested against allowing Prince Kung to have the ships on his own terms, and Prince Kung then requested Mr. Bruce to sell the ships for him. Mr. Bruce having requested Capt. Osborn to undertake their disposal, a part of the squadron were to sail for England, and Capt. Osborn, with the Keangsoo, Quantung, and Amoy, sailed for Bombay.

The "Overland Trade Report," an English paper, published in Hongkong, gives the following interesting details of this swindle:

The downfall of the Anglo-Chinese fleet scheme is likely to prove injurious and detrimental to British interests. It would seem that the British minister was palpably implicated in the fraudulent transaction, for it deserves no other name. The Chinese Government remitted Mr. Lay, when he was in England on sick leave, the sum of 650,000 taels (about £200,000) to buy steamers. He procured a flotilla which cost far more than the means placed at his disposal, which fleet he hypothecated to the British Government not only for the deficiency, but under certain conditions which were especially adapted for the exclusive advantage of British interests. It seems that the French and Russian ministers naturally became alarmed at the influence which the scheme, if carried out, was calculated to give the British minister, and consequently they stated their objections to Prince Kung, who, being pressed by the anti-foreign party in the state, became alarmed, and took occasion to break off friendly relations with Sir F. Bruce. The French minister supplanted him in the Prince's counsels, and his Highness has declined for some months all personal interviews with the British minister, during which period Mr. Lay has acted as his Excellency's Chinese secretary. This state of things was undoubtedly brought about by the underhand dealings of the British minister in relation to the fleet, and has ripened into an ill-feeling, if not into an open rupture of friendly relations, in consequence of his Excellency supporting Mr. Lay and Capt. Osborn in their unreasonable demands upon the Chinese Government.

The relations of the Chinese Government to the Great Powers of Europe were on the whole of a very amicable character. Prince Kung, the Minister of Foreign Affairs, showed himself anxious to introduce reforms, and to develop the resources of the country.

One of the most important reforms that were determined upon in the course of the year 1863, was that of the army. The Paris "Moniteur" publishes some very interesting details on this subject. The Chinese army, says the "Moniteur," which, according to official reports, should consist of 1,000,000 infantry, and 800,000 cavalry, had actually not one tenth of the number under arms. It is composed of Tartar troops, exclusively employed in the guard of

the emperor's person, and in the defence of the principal towns. These troops are, moreover, badly armed, badly officered, badly organized and devoid of all military enthusiasm. They are quite incapable of resisting the Taepings, who would have possessed themselves of Peking long since had it not been for the European troops. Prince Kung, perceiving at length that such a state of things cannot longer be continued, and being confirmed in that view by the empress-mother, who comprehends that the safety of her son is identified with that of the dynasty, has resolved to create an active army, while retaining the one under arms. The new army is to be organized and armed after the European fashion, and commanded by European officers, or by natives educated at the military school by French professors. This school, to which none are admitted but young Chinese who show a disposition for a military life, will, it is expected, produce officers capable of contending with the Taepings.

Great concessions continued to be made to the foreign communities in the large commercial cities. The British community at Hangchow, on the river Yang-tse, obtained from the Government a grant of 90 acres of ground. Thirty English commercial firms, three or four French manufactories, one Russian, and one American, are established there. Fifteen large business houses are in the course of construction for English subjects. A municipal council has been established, to conduct the affairs of the European community, and it pays great attention to the construction of roads. At Shanghai, these concessions to foreign communities gave rise to an interesting question. The exemption of the "foreign concessions" from Chinese authority has long been claimed, and practically acted on, by the foreign communities resident in them, with the sanction and concurrence of the consular body—the Chinese tacitly yielding the right. In the autumn of 1862 it was proposed to extend the powers of the present municipality, and the British consul, having submitted certain proposals in that sense to her Majesty's minister at Peking, received a reply, dated September 8th, 1862, that totally upsets the rights hitherto assumed. Sir F. Bruce clearly lays down that "there is great misapprehension of the position of these so-called foreign concessions. The British concession at Shanghai was neither a transfer nor a lease of the land in question to the British crown. It was simply an agreement that British subjects should be allowed to acquire land for their personal accommodation within a certain space, in order that they might have the advantage of living together. The land so acquired remains Chinese territory; it is subject to the land-tax; and if the jurisdiction of the Chinese Government over it is denied, it is done, because in China it was deemed essential, for the security of British trade, that the person and establishment of the trader should be secured from molestation." The English minister then

goes on to describe the present position of the settlement as entirely altered in its character, and to remind the consul that "the Chinese Government has never formally abandoned its right over its own subjects, nor has her Majesty's Government ever claimed or expressed any desire to exercise a protectorate over them."

In October 22d, 1862, Prince Kung informed the representatives of the foreign Governments at Peking, that the Imperial Government had adopted a national flag, to be triangular in shape, and ten feet broad for the largest vessels, and between seven and eight feet for smaller vessels. The ground color is yellow, and a dragon is painted on it, the head pointing upward.

At the close of 1863, a meeting of the Imperial Council for Foreign Affairs was held, to consider the translation and publication of a system of international law. Mr. Burlingame, the minister of the United States at Peking, called attention to the translation of Wheaton's work, which has become an authority in the cabinets of Europe. He requested an interview with one of the members, and four of them appeared and evinced by their intelligent interest, as well as by their presence, that they deemed the subject one of great national importance. It is remarkable that one of the reasons adduced by the Chinese authorities for the translation, was that it would serve as a guide to future embassies to foreign Powers. This implies a departure from the ancient disdainful policy of the Chinese Government toward "outside barbarians," which indicates that the torpidity for which it was notorious is at last giving way under the influence of new ideas and liberal sentiments.

On July 10th, 1863, the envoy of Denmark, Col. Raaslof, succeeded in concluding with the Chinese Government a most favorable treaty. The Chinese at first intended that the treaty recently concluded with the Belgians should be tendered to the Danish envoy on the coast, or at Tien-tsin, and that he should have nothing more. Col. Raaslof, however, penetrating this design, determined to proceed at once to Peking, where, after three months of earnest negotiations, he succeeded in obtaining much more favorable conditions. The Danish treaty is substantially the British treaty, with this advantage for all the foreign nations, that those changes which have been yielded to the solicitations of the foreign Powers from time to time since that treaty was signed, have been placed in the Danish treaty, and are therefore not liable to be changed. Article xvi. of the treaty mentions sixteen ports as being opened, and among them Nankin, Kiukiang, Chinkiang and Hangchow, on the river Yang-tse, although the first named city is in the hands of the rebels. For the present the trade is carried on at these ports under river regulations, to which foreign legations have agreed. Article xii. declares the coasting trade of China open to foreign nations, a stipulation which no former treaty contained. In the tariff, the clause prohibiting the

exportation of beans, peas, and bean cakes from New Chwang and from Pang-chow (Chefoo) is omitted, and foreign nations can thus rightfully participate in this important branch of the coasting trade.

CLINTON, a village in Hinds co., Mississippi. It is nine miles west of Jackson, on the railroad to Vicksburg. It was the seat of Mississippi College.

CLYDE, COLIN CAMPBELL, Lord, a British general, born in Glasgow, Scotland, October 20th, 1792, died in Chatham, August 14th, 1863. He was of humble parentage on the father's side, but through his mother claimed descent from an ancient Highland family. Removed at an early age from Scotland, to be educated in England, he was appointed in 1808, while a pupil in a military school at Gosport, through the influence of a maternal uncle, ensign in the 8th regiment of foot, with which in a few days he embarked for the Peninsula. Within three weeks from the time he had quit-
ted the schoolboy's desk at Gosport, he stood in presence of the French at Vimiero. His first experiences in military life were gained in the unfortunate campaign of Sir John Moore, terminating in the glorious fight of Corunna, where, with the remnant of the British army, he embarked for England. Scarcely had he landed from the transport, which bore him home, than he was ordered off to participate in the disastrous Walcheren expedition. A fever, contracted in the marshy plains of Holland, clung to him for more than 30 years, and until he went to China in 1842. "Walcheren," he used to say, "was with me every season." In 1810 he returned to Spain, shared in the battle of Barossa, in 1811, and the defence of Tariffa, 1812, and in the latter year was actively employed in the Spanish corps. In 1813, having meanwhile reached the grade of lieutenant he rejoined the army of Wellington, took part in the battle of Vittoria, was severely wounded while leading a forlorn hope at St. Sebastian, and at the passage of the Bidassoa received a bullet in his thigh. In the succeeding year he was transferred to America, fought at Bladensburg and New Orleans, and after the peace of Ghent returned to England, where, for many years, he rusted in inactivity. In 1823 he was promoted to a majority, having for the previous ten years been a captain, and, in 1832, he purchased a lieutenant-colonelcy.

The breaking out of war with China, in 1842, restored him to active military duties, and in command of the 98th regiment he participated in the siege and capture of Chin-Kiang-Foo, and other enterprises. From China he was transferred to India, and, during the Sikh war of 1848-'9, commanded with distinguished bravery the third division of the army of the Punjab. At Ramnuggar, at Chillianwallah, where he was again wounded while directing an important movement, and at Goojerat, he added to his reputation for intrepidity that of a skilful tactician; and his conduct at the last of

these battles obtained for him the title of Knight Commander of the Bath, and the thanks of Parliament, and of the East India Company. After conducting some successful operations against the Hill Tribes, in 1851-'2, he returned to England, was gazetted a major-general in 1854, and in the same year proceeded to the Crimea, in command of a Highland brigade of three regiments, forming part of the division of the Duke of Cambridge. His Highlanders contributed materially to the victory of the Alma, and at the succeeding action at Balaklava, drawn up in line, they easily repelled an attack of heavy Russian cavalry, eliciting by their coolness the applause of the numerous spectators of the fight. For many months after, Sir Colin held the responsible, but comparatively inactive, post of commander of Balaklava and its works. His reputation as a soldier nevertheless stood high in the army, and after the disgraceful failures of Sir James Simpson and Sir William Codrington, he was designated for the chief command of the British forces in the Crimea, but was prevented by the termination of hostilities from assuming that office. He returned to England with the army, was appointed a lieutenant-general in 1856, and prepared to enjoy his much-needed repose.

Short respite, however, was allowed him. In 1857 occurred the dreadful mutiny of the Sepoys in India, and, at twenty-four hours' notice, Sir Colin embarked for that country to assume the supreme command in Bengal, arriving at Calcutta, August 14th, thirty-two days after the issue of his commission. Organizing his forces as rapidly as circumstances would permit, he marched in October for Lucknow, where Gens. Havelock and Outram were heroically holding out against an overwhelming force of the enemy, commanded by Nena Sahib. On November 21st, he forced his way into the city, but the preponderance of the Sepoys over his army and the garrison united, being too great to admit of successful operations on the part of the Europeans, he succeeded by a clever ruse in withdrawing through the enemy's lines toward Cawnpore, where, on December 6th, he dealt the Nena a blow which may be said to have broken the strength of the rebellion. Making Cawnpore his centre of operations, he organized a series of combined movements which resulted in driving the rebels into Oude, where, during the succeeding year, they were gradually dispersed and subdued, the contest assuming, finally, the character of a guerilla warfare. On February 1st, 1859, he was enabled to declare the campaign in Oude at an end, and having accomplished the pacification of a country which, at the time of his arrival, seemed almost lost to British rule, he returned home to receive the well-merited honors and congratulations which his sovereign and country united in bestowing upon him.

During his absence in India, he had been raised to the peerage as Baron Clyde of Clydesdale, and had received the thanks of Parlia-

ment and a pension. In 1860 he was appointed colonel of the Coldstream Guards and in 1862 a field-marshal, and he had at various times been enrolled among the chief military orders of Great Britain, France, Sardinia, and Turkey. Thenceforth his declining health, undermined by long and arduous services in the field, permitted him to undertake no active duties. At a review of volunteers at Brighton in 1862, he took the command at the request of the higher powers; but, at the close, he said it was his last day in the field, and he shaved off his moustache as a sign that he had retired from active service. Within a twelvemonth occurred his final illness.

In person, Lord Clyde was well knit, symmetrical and graceful, and though late in life his shoulders became somewhat bowed, he lost little of the activity of his prime. "To the last," says a writer in the London "Times," "his teeth remained full and firm in the great square jaws, and his eye pierced the distance with all the force of his youthful vision. His crisp gray locks still stood close and thick, curling over the head and above the wrinkled brow, and there were few external signs of the decay of nature, which was, no doubt, going on within, accelerated by so many wounds, such fevers, such relentless, exacting service." Measured by the exploits of other commanders, Lord Clyde cannot be classed among the great generals of the present century, although, in consequence of the dearth of military talent in Great Britain, he stood, at the time of his death, head and shoulders above his contemporaries. As a brave, prudent, and honest soldier he will always hold an honorable place in the annals of British warfare; and he will be especially remembered by the rank and file of the army, as one who understood their character and virtues better, perhaps, than any other; who constantly looked after their comforts, and who, bearing in mind from what humble beginnings he had himself risen to the highest honors of his profession, wished to make merit, and not influence, the key to advancement.

COCKERELL, CHARLES ROBERT, emeritus professor of architecture, in the Royal Academy, born in London in 1788, died at his residence in Chester Terrace, Regent's Park, aged 75 years. His father, an eminent architect, sent him, at an early age, to Westminster School, and from thence took him into his own office, where he studied for some years, perfecting his taste for the pencil and making such proficiency that, in 1809, he became confidential assistant to Sir R. Smirke, who was then engaged in rebuilding the Covent-garden Theatre. His love of adventure, combined with a desire for a wider field from whence to draw knowledge, led him, in 1810, to secure a safe conduct to the East. Accordingly he sailed in a sloop of war, intrusted by the Under Secretary for Foreign Affairs with despatches for the embassy at Constantinople. Here he passed some months in the society of Byron, Hob-

house, Stratford Canning, and others of taste and genius; but Greece was the country of his longing, and he was impatient to realize the dreams which had so long dazzled his imagination. At Athens, where he arrived in autumn of the same year, he associated himself with Haller of Hallerstein, the eminent Bavarian; with Linck and Stackelberg; and Foster, an architect of Liverpool; and, purchasing the right of establishing themselves on the island of Ægina, they gave themselves up to the laborious but pleasant work of excavating the valuable specimens of sculpture near the temple of Jupiter Panhellenius. Here they were exposed to many dangers, not of climate only, but the island itself was a stronghold of pirates, while the mainland swarmed with banditti, who, at a later period, held Stackelberg a prisoner for ransom, and made cartridges of his valuable drawings. As a reward of their perils, they made, among other important discoveries, that of the celebrated Æginetan marbles, now at Munich. An article on these sculptures, from the pen of Mr. Cockerell, appeared in the "Quarterly Journal of Science," 1819; but the beautiful and elaborate work in which they, together with the treasures from Bassæ, are described and criticized, was not brought out by him until 1860. In 1811 they set sail for the port of Pyrga, and from thence took a fatiguing land journey, and, arriving at an Arcadian village, in the immediate neighborhood of which stood the remains of a temple of Apollo Epicurius, with indications of buried treasure, they again commenced their research, which resulted in the discovery of the Phigaleian marbles, now to be seen in the British Museum. Their labors at Bassæ being interrupted by the opposition of the police authorities, he left that country and returned to Athens. Subsequently he went to Sicily, and spent the greater part of 1812 in Syracuse and Agrigentum, a visit which resulted in his work, published at a later date, on the temple of Jupiter Olympus, or the "Temple of the Giants," as it is there styled. After a severe attack of fever, he resumed his travels, visiting Thebes and Delphi, and other haunts of classic fame. In 1814 he visited the Seven Churches of Asia Minor, and investigated Pompeii and other points of interest, and subsequently spent some time in Rome, where he was welcomed with open arms by the artistic circles there, and brought into intimate companionship with Caristie, Handelbourg, Mazois, Ingres, and other distinguished men. In 1816 he was at Florence, where, by his arrangement of the group of Niobe, he solved a long vexed question, and left to the city of the Medici a lasting memento of his perception and skill. Returning in the ensuing spring to England, he found that his fame had preceded him. Business flowed at once to his office, and before the year 1825 he had executed many valuable and important pieces of workmanship. Among them, the Hanover Chapel in Regent

street, Lampeter College, and the Bristol Institution of Science. He designed the London and Westminster Bank, the Taylor Buildings at Oxford, the Sun Fire Office in Threadneedle street, the Church of St. Bartholomew, and completed the St. George's Hall at Liverpool, the architect, Elwes, having been worn out with the work. In 1819 he was appointed surveyor of St. Paul's, which office he held till his final retirement from the profession. About the year 1832 he became architect of the Bank of England, and in that capacity executed important works, not only at headquarters, but also at Bristol, Liverpool, Manchester, and Plymouth. In his efforts for the advancement of art, he was eminently catholic and liberal. He was long a director of the School of Design at Somerset House, and was connected with the Royal Academy, where he held a position of much influence. He was for forty years treasurer of the Artists' General Benevolent Institution; was president of the Royal Institute of British Architects, receiving the first gold medal awarded by her Majesty to the institute. He was also a member of the Dilettante Society, and Fellow of the Society of Antiquaries. His honors were not confined to his own country. He was appointed one of the eight foreign members of the Institute of France, in 1841; was a member of the Royal Academies of Bavaria, Belgium, Copenhagen; of the Society of Arts of Geneva; of the Archæological Society of Athens, and of the Institute of Architects of New York, in 1860. He was the author of a preface to the "Iconography of the West Front of Wells Cathedral," and of many valuable papers written for the Archæological Institute.

COLOMBIA, UNITED STATES OF, a federal republic in South America, which, until September 20th, 1861, was called New Granada. The area of the republic is estimated at 521,948 English square miles. It consists at present of nine States, beside the Federal District of Bogota; the names, capitals, and population of which are exhibited in the following table:

States.	Capitals.	Population.
Panama.....	Panama.....	133,108
Bolivar.....	Cartagena.....	182,157
Magdalena.....	Santa Maria.....	730,093
Santander.....	Pamplona.....	378,376
Antioquia.....	Antioquia.....	224,442
Boyacá.....	Tunja.....	379,682
Cundinamarca.....	Funza.....	474,643
Tolima.....	Purificacion.....	
Canca.....	Popayan.....	330,331
Federal District..	Bogota.....	43,000
		2,223,837

The receipts for the financial year beginning September 1st, 1861, and ending August 31st, 1862, were estimated at 1,824,000 piastres,* the expenditures at 2,136,517 piastres: deficit, 312,517 piastres. The public debt for the same financial year was as follows: Interest on the external debt, 202,000 piastres; interest on the internal debt, 218,104 piastres; interest on the

floating debt, 68,100: total, 488,204. The army, which is divided into four army corps, was to consist, according to the law of August 24th, 1861, of 19,385 men. The importations amounted in the year 1856-'57, to 3,255,873 piastres; the exportations, 7,064,584.

An important revolution broke out in this republic at the beginning of the year 1860. The Liberal party, under the leadership of Gen. Mosquera, rose against the constitutional President Ospina, who had entered upon the presidential office, on April 1st, 1857, as the successful candidate of the conservative or Federalist party. On July 18th, 1861, Mosquera took possession of Bogota, the federal capital, deposed President Ospina, and assumed the reins of Government. The Federalist party continued to have control of the southern portion of the republic, with Antioquia as the seat of Government. The representatives of the Liberal States met in a Congress at Bogota, which closed on October 20th, 1861. They assumed the name United States of Colombia, and adopted a new constitution, according to which the legislative bodies of the republic were to be a Senate, consisting of three senators from each of the new States, and a Chamber of Representatives, chosen by the nine States and the Federal District, at the rate of one representative for every 50,000 souls, and every fraction over 20,000.

The leader of the troops of the conservative party, Gen. Arboleda, was assassinated in November, 1862, and was succeeded in the command of the Federalist army by Gen. Canal. On December 29th, 1862, an agreement was made between Gen. Canal and Gen. Mosquera, which put an end to the civil war. Gen. Canal, together with his troops, submitted to the Government of the United States of Colombia, which, in its turn, pledged itself to grant a complete amnesty. On February 4th, 1863, deputies of all the States met at Rio Negro, in the State of Antioquia, to form a constitutional convention. Gen. Mosquera resigned to the convention the dictatorial power which had been conferred upon him on September 20th, 1861, and the convention appointed a Provisional Government, composed of five ministers, who were to remain in office during the organization of the constitution. The new liberal constitution was proclaimed on April 23d, 1863. According to its provisions, each State administers its local affairs independently of the Federal Government. Congress and the President are elected by the States. Gen. Mosquera was appointed Provisional President until the 1st of April, 1864, when the President elected during the year 1863 by the people, was to take his place. During the existence of the Provisional Presidency, there was to be no fixed capital, Gen. Mosquera having the power to move it where he pleased. Among the provisions of the new constitution was one granting religious liberty, and another confiscating the church property. This called forth an en-

* A piastre is equal to an American dollar.

cyclical letter from the pope to the bishops of the republic, condemning both the confiscation of the church property, and the establishment of religious toleration, and urging the bishops to use the whole influence of the Church for the repeal of these features of the constitution. At the end of the year the conflict between Church and State had not terminated.

In the latter months of the year, a war broke out between the United States of Colombia and Ecuador. Gen. Mosquera, whose course in bringing about these hostilities was generally censured by the press of South America, victoriously advanced into Ecuador. On December 30th, peace was restored between the two republics by a treaty, which, at the same time, established between them free trade.

At the presidential election held toward the close of the year, Senor Murillo, the minister of the republic at Washington, was elected. His term of office begins in April, 1864.

A revolution of the conservative party against the Government of the republic, broke out in November, 1863, in the State of Antioquia, but it did not assume large dimensions, and seemed to be nearly at an end at the close of the year.

COMMERCE. The year 1863 has not exhibited much advance in a commercial point of view. The expectations that had been entertained of an immediate renewal of trade as a necessary consequence of the opening of the Mississippi, and the continued occupation of the Atlantic coast of South and North Carolina, and the penetration of the troops into the Texan country, have not been realized; and the foreign commerce of the country has greatly contracted in face of the improved harvests in Europe. These have enabled the people to dispense with much of the breadstuffs and provisions which were the main staples of the national export. The official statement of the Treasury Department gives the following returns of the trade of the Union for the fiscal years 1862 and 1863. The fiscal year ends June 30th.

	1862.	1863.
Imports.		
Goods	\$189,404,771	\$252,731,939
Specie	16,415,052	9,555,648
Total.....	\$205,819,823	\$262,287,587
Exports.		
Domestic produce..	\$181,875,938	\$249,856,649
Foreign " ..	11,027,336	17,796,200
Specie.....	36,886,956	64,156,610
Total.....	\$229,790,280	\$331,809,459

The import valuations are in specie, being the invoice value of the goods entered. The export values are at the legal tender prices, and require to be corrected by the premium on gold in order to approximate to the value actually realized for the goods abroad. The average rate of specie for the year 1863 was nearly 50 per cent. The "balance of trade," so called, may then be approximated as follows:

Imports—Goods.....	\$252,731,939
Exports—Produce.....	\$267,652,849
" " specie value.....	173,435,233
Excess imports....	\$74,296,706
Net specie export direct.....	54,600,962

There remains \$20,000,000, which has been met by the sale of California and Canada bills, which have been sent: in the former case against gold shipped from San Francisco, and in the latter case against gold carried unreported to Canada. There is, however, a correction to be made from this result, since the exports of goods from California have been on a specie valuation. The currency in that State has continued to be in the precious metals, and, as a consequence, prices of commodities there have maintained their specie values. The prices in New York and San Francisco on the same day were as follows for the same articles:

	New York.	San Fran- cisco.	Lower.
Gold.....	152	par	
Greenbacks.....	par	68c.	
Coffee, Java.....	40c.	27½c.	12½c.
Coffee, Rio.....	33c.	23c.	10c.
Shirting, ¾.....	28c.	20c.	8c.
Prints, Merrimacks...	23c.	17c.	6c.
Prints, Spragues.....	22c.	16c.	6c.
Denims.....	51c.	25c.	26c.
Cambrics.....	24c.	18c.	11c.
Flour.....	\$7.00	\$4.50	\$2.50
Wheat, white.....	1.77	1.00	.77c.
Hay.....	32.00	14.00	18.00
Oak Sole Leather.....	41c.	30c.	11c.
Iron, Scotch.....	46.00	42.00	4.00
Rice, Patna.....	6.50	4.00	2.50
Sugar, New Orleans..	11½c.	9c.	2½c.

The exports of wheat from San Francisco to England declined. This wheat is of a quality which commands 10 per cent. higher price than that of the Western States. Wheat therefore has ceased to be an article of export from the Atlantic States into California in exchange for gold.

The duties, under the existing tariff, weighed heavily upon the imports. The value of dutiable goods imported as above was \$202,731,939, and the amount of duty paid was \$69,059,642, or an average of 34 per cent. The cost was therefore as follows:

Invoice cost of Imports.....	\$202,731,939
Advance in exchange, 50 per ct.	\$101,365,969
Duties, 34 " ..	69,059,642
Gold for exchange, 50 " ..	34,529,821
	204,955,432

Total cost landed.....\$407,687,371

This cost is exclusive of freight, insurance, storage, labor, commission, &c., which raised the cost to fully 150 per cent. of the invoice prices. These imports include large quantities of those raw materials, cotton, wool, naval stores, &c., that formerly were our staple exports, but which now must be imported at high cost to feed the manufactories. In the case of many articles of importation the rate was much higher, reaching on ordinary woolen goods 234 per cent., and on linens 164 per cent. The high cost of importation naturally checked in some degree the consumption of goods; but the growing abundance of money gave a new impulse to business, and the stocks of goods generally diminished as the year drew to a close.

The imports at the port of New York monthly for the year are shown in the following table:

IMPORTS, PORT OF NEW YORK.

MONTHS.	Specie.	Free goods.	Entered for		Total.
			Consumption.	Warehouse.	
January.....	\$101,906	\$2,413,649	\$ 8,741,227	\$4,482,794	\$15,739,676
February.....	213,971	783,561	7,372,539	3,657,775	12,037,846
March.....	123,616	1,328,806	11,461,572	3,454,530	16,370,524
April.....	107,061	1,328,216	9,493,830	6,456,208	17,385,315
May.....	197,217	710,021	7,950,281	5,437,404	14,324,923
June.....	109,997	780,968	6,328,581	5,377,885	12,597,426
July.....	182,245	683,880	9,080,210	4,227,265	14,173,600
August.....	113,877	509,781	10,004,580	4,409,891	15,038,129
September.....	78,231	786,864	11,203,535	3,431,310	15,499,940
October.....	78,053	741,888	11,885,569	4,189,457	16,894,967
November.....	103,144	665,207	10,326,929	4,950,415	16,045,695
December.....	116,493	834,074	10,498,576	5,676,955	17,126,098
	\$1,525,511	\$11,567,000	\$114,377,429	\$60,144,337	\$187,614,577

The volume of goods imported rose considerably from month to month during the year, and the quantity which was entered for consumption was much affected by the price of gold. The first months of the year, when gold underwent a rapid rise, and Congress authorized large issues of legal tenders, the desire to buy goods was very active and strong. There was a prevailing belief in a continual and rapid decline of paper as compared to commodities, which naturally indicated a desire to hold the most stable values, and large quantities of goods changed hands for investment. The estimates of the probable consumption of goods, as well imported as domestic, did not apparently, however, take fully into account the influence of high prices in checking this consumption. The stocks of goods in the country were known to be insufficient as measured by the usual scale of consumption, but the high prices which special duties and paper threw upon the goods greatly diminished this scale. In illustration of this effect are the figures of some leading imported articles.

	Coffee, lbs.	Molasses, gallons.	Sugar, lbs.	Spirits, imp. bbls.	Rosin, bbls.
1860.	177,111,923	47,318,877	930,229,400	88,059	113,565
1861.	197,045,786	40,191,556	814,957,560	34,150	55,900
1862.	83,989,911	62,668,400	968,600,640	20,836	49,790
1863.	79,719,641	37,569,088	636,849,920	8,220	14,253

The decline here apparent pertains to almost all articles of consumption, and arises from the common cause of enhanced prices. The effect of this diminished consumption was to disappoint, to some extent, the anticipations of a continued rapid rise in goods; the more so, as a reaction in the price of gold set in, which, being equivalent to a rise in Federal stocks, attracted to them the money that had previously sought merchandise as an investment. With the summer months, the stock of imported goods became greatly diminished, and with the autumn trade a renewed activity sprung up. The decline in gold and exchange from 72 in February, to 25 in August, naturally operated against activity in trade, because it was virtually a fall in the prices of merchandise and a rise in the value of stocks. When, however, in August, gold again began to rise, under the renewed activity of the autumn trade, importations were renewed with much vigor, notwithstanding which the supplies of goods in the hands

of dealers at the close of the year were unusually small. The necessities of the times compelled the transaction of business mostly on a cash basis, and this of itself tended to make the trade of the year more safe and consequently more profitable. The following synopsis will, however, show a largely diminished number of failures for the past year as compared with the preceding one, and a remarkable decrease when compared with the average number in a normal condition of the country. This is accounted for chiefly by the check given to speculation, the heavy rise in the prices of goods, and the disposition shown by merchants, in view of the uncertain prospect which the future presented, to profit by the opportunities offered and place themselves in shape to meet any emergency. The number of failures has diminished in uniform ratio throughout the Northern and Western States.

The liabilities of the partner firms in the last two years have been as follows:

	1862.	1863.
New York City and Brooklyn....	\$7,491,000	\$2,035,000
Philadelphia.....	1,310,000	442,000
Boston.....	2,013,000	1,133,000
Balance Northern States.....	12,235,300	4,289,000
British Provinces.....	3,292,588	2,568,000
Total N. States and British Prov..	\$26,341,888	\$10,467,000

The insignificant figures here presented, may be appreciated by comparison with former years. Thus, in 1857, the failures in New York city were \$135,129,000; for 1858, \$17,773,462; in 1859, \$13,218,000; and these were reduced to only \$2,035,000 for the past year. In Philadelphia, the failures in 1857 were \$32,954,500; in Boston, they were \$41,010,000. The figures have now become, therefore, quite nominal.

The large number of houses that have, from various causes, either failed or ceased business in the prominent cities since the war began, has left the trade in the hands of comparatively few, whose ample means enabled them to lay in their stocks in the beginning of the year at low figures. The rapid advance in price of all merchandise, with a steady, but not excessive demand, has made the year's business a more than usually profitable one to importers and jobbers; while the purchases have not been on so large a scale as in peaceful times, the enhanced value of goods has increased the amount beyond precedent. The retail trade has been equally prosperous.

Stocks of merchandise of all kinds, at the close of the year, were comparatively light, and business generally in a healthy and prosperous condition. There has been but little disposition to speculate by regular traders. The producing interests of the country have not shown a disposition to expand. The plethora of money, and the high prices of produce, have enabled them to clear themselves of all indebtedness: hence the country merchant has been enabled to buy, either for cash, or on short credit.

The imports at the port of New York for the year 1863, were as follows:

Dry Goods.....	\$68,764,847
Other "	117,323,929
Specie.....	1,525,811

Total.....\$187,614,587

The general import trade embraces many articles which formerly figured in the export column. Of these cotton and wool are the most conspicuous.

The imports at the port of New York were as follows:

FOREIGN IMPORTS AT THE PORT OF NEW YORK FOR THE YEAR ENDING DECEMBER 31st, 1863.

This table embraces the following unusual items in the list of importations:

Wool, lbs.....	114,864	\$3,533,021
Cotton, “.....	103,542	13,153,314
Hides.....	—	7,051,091
Guns, no.....	11,996	3,975,413
Lead, pigs.....	263,262	1,520,599
Tar.....	2,017	18,080
Turpentine, spirits.....	4,641	292,039
Rosin, bbls.....	2,656	86,587
		\$34,635,144

These figures were formerly on the export

list, and aided farm produce to pay for imports, but by the change produced by war they are now to be paid for by farm produce, and thus curtail the national resources. Rosin was formerly sold at 80 cts. per bbl., it is now bought back at \$32 per bbl. That is, we give for one bbl. what we formerly got for forty bbls.

The exports from the port of New York were in the aggregate, monthly, as follows:

EXPORTS—PORT OF NEW YORK.

MONTHS.	Specie.	Free.	Dutiable.	Domestic.	Total.
		Foreign.			
January.....	\$4,624,574	\$73,111	\$668,275	\$14,829,398	\$19,695,351

December.....	5,259,053	55,555	458,575	12,346,151	18,619,334
Total.....	\$49,254,066	\$1,087,212	\$5,424,579	\$114,249,177	\$220,465,034

These values, except for specie, are in currency, and widely different from their real value, or that which is realized abroad. The fluctuation in the value of exchange, however, had an important influence upon the export market, since the disposition to ship depended almost altogether upon what could be obtained for bills. Nevertheless, the chief exports were

breadstuffs and provisions; and those articles, in consequence of the improved crops of England and Western Europe, were far less in demand than in the previous year. The following table shows the exports, from the port of New York, of the articles which make up the bulk of the export trade for the year:

Reducing the flour to wheat, the quantities of grain exported were comparatively as follows :

	1862.	1863.	Decrease.
Wheat, bushels.....	40,977,208	28,884,138	12,093,070
Corn, ".....	11,883,272	7,553,270	4,330,002
Rye, ".....	1,026,832	420,156	606,676
Oats, ".....	207,792	126,213	81,574
Total, bushels.....	54,095,104	36,983,782	17,111,322

This represents a decline of nearly \$20,000,000 in the grain exportation—a result of the improved harvests and decline in prices abroad. The price of wheat fell in England from 48s. in January, to 39s. per quarter of eight bushels, at the close of the year, or about 30 cents per

bushel. The shipments were large when the rate of exchange was high; but the losses sustained were very considerable through the year on corn and wheat. An actual shipment of corn resulted as follows, showing the effect of the high rate of gold upon exchange; 7,714 bushels of corn equal 900 quarters; the cost price was 94 cents per bushel; freight 6d. sterling; exchange 160. The grain sold at 26s. 6d. per quarter :

900 quarters, at 26s. 6d.....	£1,192 10 0
Insurance and 3 per cent. war risk.....	£36 00 00

Without either buyer's or seller's commissions, the loss would have been 16 cts. per bushel. Such a trade could not continue, and corn ceased, with the summer, to be exported; especially as a severe frost at the West was supposed to have done much damage to the crops, and the distillation of whiskey was carried on to a great extent in the prospect that the necessities of the Government would require a higher tax to be imposed upon that article, and that all whiskey on hand, when that tax should be laid on the manufacture, would have the benefit of the rise. Under these circumstances corn rose to very high prices, and ceased to be exported. The exports of wheat were diminished, and suffered loss in most cases, but with an occasional rally as the price fluctuated abroad. The internal movement of the grain trade, as indicated in the movements at Chicago, the great growing grain market, and Buffalo and Oswego, the points of receipt, will be seen in a table on the following page.

The amount of grain and flour—reducing the latter to wheat—delivered at tide-water by the Erie Canal to the close of navigation, compares as follows with the season of 1862 :

Thus, the whole quantity of cotton obtained was little more than one third of that before the war, when seven eighths was supplied by the United States. The other countries, including Egypt, had been enabled to double their production, under prices which have risen as follows, at Liverpool, for middling:

	United States.	Brazil.	Egypt.	E. Indies.
1861.....	7	8½	7½	4½
1862.....	13½	13½	12½	7½
1863.....	27½	27½	27½	20

This enormous rise has brought forward large supplies, with the drawback upon the production that the moment the American war should cease the product would become unsalable, since the accumulated American cotton would everywhere have preference.

Meantime the amount of money that must be paid into new channels for the produce of

The average price of crude was 30.4 cents. This very large business has grown up in the three last years, and as the use of the article spreads in Europe, it seems scarcely to have a limit to its future growth.

The operations of the Confederate cruisers have had a strong adverse influence upon the commerce of the country. The arrivals of vessels at the port of New York were as follows:

	Foreign arrivals.	Of which Br. vessels.	Passengers from foreign ports.	Pass. from California.
1861.....	5,122	1,449	80,790	9,117
1862.....	5,487	1,919	94,607	7,421
1863.....	5,129	2,280	178,727	11,561

The freights in American bottoms became very unsafe, and the majority of goods were carried in foreign bottoms. The sales of American vessels to foreign nations were numerous.

The cotton trade of the United States being cut off, there has gradually been produced a most extraordinary change in the commerce and financial condition of Europe. The great rise in prices in Europe, consequent upon a short supply of cotton, naturally gave an immense impulse to its production in all parts of the world. It also diminished the local consumption of the article, and urged shipments from all quarters to the common centre, England, for the supply of the workshops of Europe. The general tendency is seen in the imports into England for four years:

cotton, is apparent in the following figures of the value imported into Great Britain, rendering the £ at \$5 each:

Cotton imported into Great Britain.

From	1861.	1862.	1863.
United States....	\$132,851,995	\$6,106,385	\$2,300,000
Brazil.....	3,450,500	8,383,705	8,500,000
Egypt.....	12,354,490	18,617,200	39,000,000
East Indies.....	47,297,780	110,212,185	132,200,000
Other countries...	1,932,220	11,145,750	34,000,000
Total.....	\$197,886,985	\$154,465,225	\$178,500,000
“ cwt.....	11,223,078	4,678,333	4,720,857

Thus, in 1861, England bought 1,262,607,800 lbs. of cotton for \$197,886,985, and this year she has been obliged to pay as much money for only 431,085,300 lbs., or little more than one third the quantity. This is, however, not the

chief difficulty growing out of the change. The cotton purchased now is not of the same quality as the American, and will not answer the same purposes; moreover, it is to be paid for in money, and not in goods, as was the case with the United States article; and this fearful drain of money in a new direction, has produced great changes in the financial condition of France and Great Britain, notwithstanding that an improved harvest greatly reduced the payments abroad for food.

COMMERCIAL INTERCOURSE. Extensive regulations were adopted by the Government of the United States relative to trade with the inhabitants within the lines of the army in the insurrectionary States.

On the 13th of July, 1861, Congress passed an act to provide for the collection of duties on imports and for other purposes, which authorized the President to issue his proclamation declaring certain States in insurrection, and prohibiting all commercial intercourse with them, except under certain conditions.

On the 16th of August, 1861, the President, by proclamation, declared certain States and parts of States to be in insurrection, and that all commercial intercourse with them by citizens of other parts of the United States was unlawful, and would remain unlawful until such insurrection should cease or be suppressed, and that all goods, &c., coming from or proceeding to any parts of such States without his license through the Secretary of the Treasury, would be forfeited. An exception was made to this prohibition in these words: "except the inhabitants of that part of Virginia lying west of the Alleghany mountains, and of such other parts of that State and the other States hereinbefore named as might maintain a loyal adhesion to the Union and to the Constitution, or might be from time to time occupied and controlled by forces of the United States engaged in the dispersion of said insurgents."

Under this proclamation, licenses were granted by the Secretary, as the armies progressed; some ports, such as Beaufort, Port Royal, and New Orleans, were opened under licenses, except to whatever was contraband of war, and the collectors and surveyors on the Ohio and Mississippi rivers were instructed to act, dispensing with applications to the Secretary for licenses.

On the 31st of March, 1863, the President issued another proclamation, stating that embarrassments had arisen to the due enforcement of the original act, by the exceptions of the first proclamation; therefore, so much was withdrawn as "related to the parts of States which might be from time to time occupied and controlled by forces engaged in the dispersion of the insurgents."

On the 12th of March, 1862, an act of Congress was approved, which authorized the Secretary of the Treasury to appoint special agents to receive and collect all the abandoned property in any of the States and Territories desig-

nated as in insurrection against the United States Government, and prescribed the manner of proceeding.

On the 20th of May, 1862, another act of Congress was approved, which authorized the Secretary of the Treasury to refuse a clearance to any vessel or vehicle laden with goods, &c., destined to any domestic or foreign port, whenever he thought such goods were destined ultimately for places in possession of the enemy. It further authorized the Secretary to take security in such cases and to establish such regulations as he might deem necessary for the purposes of the act.

On the same day that the President issued his last mentioned proclamation, general orders were issued by the Secretaries of War and Navy to the officers of their respective departments, for the purpose of "more effectually preventing all commercial intercourse with insurrectionary States, except such as shall be authorized in pursuance of law, and of securing consistent, uniform, and efficient action in conducting such intercourse as shall be authorized, and for the purpose of carrying out the provisions of the act of Congress entitled 'An act to provide for the collection of abandoned property, and for the prevention of frauds in insurrectionary States.'" These orders prohibited every officer of the army or navy or any person connected with either from having any interest in the transportation of any goods, &c., into any State declared by the President to be in insurrection, excepting supplies for the military and naval forces, and excepting sutlers' supplies, and other things for the comfort of the military and naval forces moving under authorized permits of the Treasury. The orders further continued: "nor shall any person aforesaid have any interest in the purchase or sale therein of any goods or chattels, wares or merchandise, cotton, tobacco, or other product of the soil thereof; nor the transportation of the same, except as aforesaid, therefrom or therein; nor shall any such officer or person authorize, prohibit, or in any manner interfere with any such purchase or sale or transportation, which shall be conducted under the regulations of the Secretary of the Treasury, unless under some imperative military necessity, in the place or section where the same shall be conducted, or unless requested by an agent or some other authorized officer of the Treasury Department, in which case all commanders of military departments, districts, and posts, will render such aid in carrying out the provisions of the said act, and in enforcing due observance of the said regulations of the Secretary of the Treasury, as can be given without manifest injury to the public service."

Further regulations prescribed the manner of proceeding with abandoned property.

At the same time, the Secretary of the Treasury prescribed the Regulations for the government of the several special agents and agency aids in pursuance of the act of March 12th,

1863. The first, second, and third of the Regulations were as follows:

The territory of the United States designated as in insurrection against the lawful Government of the United States by the Proclamation of the President, July 1st, 1862, to which special agents have been assigned to receive and collect abandoned and captured property, is divided into districts called Special Agencies, numerically designated and described as follows, viz.:

The First Special Agency comprises the district of the United States west of the Alleghany mountains, known as the Valley of the Mississippi, and extending southward so as to include so much of the States of Alabama, Mississippi, Arkansas, and Louisiana, as is, or may be occupied by national forces operating from the North.

The Second Special Agency comprises the State of Virginia, and so much of West Virginia as lies east of the Alleghany mountains.

The Third Special Agency comprises the State of North Carolina.

The Fourth Special Agency comprises the States of South Carolina, Georgia, and Florida.

The Fifth Special Agency comprises the States of Texas and Louisiana, and so much of the States of Arkansas, Alabama, and Mississippi, as is, or may be within the lines of the national forces operating from the South.

If additional Special Agencies shall be established, they will be numerically designated in the order of their establishment. And if the boundaries of agencies already established shall be changed, due notice thereof will be given.

Supervising Special Agents and Assistant Special Agents will be appointed by the Secretary of the Treasury, and Local Special Agents and Agency Aids will be appointed by Supervising Special Agents, or under their direction by Assistant Special Agents, subject to the approval of the Secretary, to carry into effect the said Act and these Regulations.

Supervising and Assistant Special Agents are authorized and directed to receive and collect all abandoned and captured property found within their respective Agencies, and within the lines of military occupation by the United States forces, except such as has been used or was intended to be used for waging or carrying on war against the United States, viz.: arms, ordnance, ships, steamboats or other water craft and their furniture, forage, military supplies, and munitions of war.

The Regulations required the special agents to collect and receive property, and make and keep a true record and account of expenses; to receive voluntarily abandoned property, give receipts, and take stipulations; to collect and receive from officers and privates, sailors and marines, abandoned property, and give receipts; captured property in the hands of officers or others was to be turned over and receipts given; property required for public uses was to be appraised and delivered over; perishable property was to be sold; household furniture and family effects to be stored; agents might contract with others for the collection and delivery of property; a bond was to be given by the contractor to indemnify the Government; local special agents and agency aids were to be appointed; necessary expenses were to be paid; property to be transported to loyal States and sold, except household effects, perishable property, and that taken for public use.

On the 3d of July, the Secretary addressed

the following general circular to the agent at Memphis, Tennessee:

TREASURY DEPARTMENT, July 3d, 1863.

SIR: I have received your letter of the 5th of June, from Memphis, and also those of previous dates from Cincinnati, relative to the collection of abandoned and captured property within the States heretofore declared to be in insurrection.

In reply, I think it important to direct your attention, in the first place, to the general distinctions under which all property, subject to the disposition of national officers within the district under your supervision, may be arranged.

There may be said to be four classes of such property, viz.: abandoned, captured, commercial, and confiscable.

First; Abandoned property is of two descriptions, (1st), that which has been deserted by the owners; and (2d), that which has been voluntarily abandoned by them to the civil or military authorities of the United States. Such property is to be collected or received by the special agents of this department, and sold under the authority of the Act of March 12th, 1863; and the proceeds, after deducting the expenses of transportation and sale, and other expenses attending the collection and disposition thereof, are to be deposited in the Treasury, subject to award by the Court of Claims. Before this Court, claimants to such property, or the proceeds thereof, have the right, under the Act, to prefer their claims at any time after the sale, and before the expiration of two years from the close of the war. No guaranty can be given to owners of abandoned property in respect to the time when, or the persons to whom proceeds will be paid.

Second; Captured property is understood to be that which has been seized or taken from hostile possession by the military or naval forces of the United States, and is to be turned over, with certain exceptions named, to the Special Agent of this Department, in accordance with the provisions of the Act of March 12th, 1863. All property taken possession of by military or naval forces and turned over to Special Agents, must be regarded as *prima facie* captured property. Such property you will receive and direct to be sold, and will cause the proceeds to be deposited in the Treasury, subject to the future award of the Court of Claims.

Captured property which is held as lawful prize by the navy is not to be turned over to the Department Agents, nor to be in any way controlled by them.

Third; Commercial property is that which has been or may be sold and purchased under the license of the President, through permits granted by the officers of the Treasury Department.

Fourth; Confiscable property is that which belongs to certain classes of persons, as recited in the Confiscation Act of July 17th, 1862, and is liable to seizure and condemnation by judicial proceedings in the manner prescribed by that act.

Great care must be exercised in properly classifying all property, that the provisions of the law applicable to each class may be complied with; and it must be remembered that with the property included in the fourth class, unless found deserted and abandoned, the Agents of the Treasury Department have no authority to interfere. The execution of the Confiscation Act is confided by its express terms to the President, by whom the Attorney-General has been charged with the direction of all seizures and proceedings under it.

It must be remembered, also, that all property coming from insurrectionary districts into loyal States, or in reversed direction, or being transported within or to insurrectionary districts, in contravention of law or Departmental Regulations, is forfeited or forfeitable; and that it is the duty of the Agents of the Department, as well as of other proper officers, to enforce the forfeitures thus incurred; but property thus forfeited or forfeitable must not be confounded with confiscated or confiscable property, which is to be proceeded against and disposed of under the Act of July 17th, 1862, or with prize-money captured by the navy, and sub-

ject to disposition under the direction of Prize Commissioners and Courts.

In respect to property embraced in the first class, namely, abandoned property, it is to be observed that no agent is authorized to make any other assurance than that property, voluntarily abandoned, shall be faithfully disposed of, under the law, so as to secure, as far as practicable in the existing condition of the country, the rights of owners. No authority is given, or intended to be given, to agents to make any promises of special immunities or advantages not specified in the law.

In respect to both descriptions of abandoned property, whether found deserted or voluntarily abandoned, the law authorizes the payment of such expenses as must necessarily be incurred in its collection, or receipt and disposition.

You will, therefore, pay all such expenses, including fees, taxes, freights, storage, charges, labor, and other necessary expenses, out of the general fund arising therefrom; being careful to avoid all useless or indiscreet expenditures, and to charge each particular lot or parcel, with the amount of expense pertaining to it, and, unless unavoidably prevented, to take vouchers therefor, to be filled with the account of sales in this Department.

Where property is liable to be lost or destroyed, in consequence of its location being unknown to the Special Agent, or from other causes, and parties propose, for compensation, to collect and deliver it into the hands of the Agents of this Department, at points to be designated by them, you may contract for the collection and delivery thereof, on the best possible terms, not exceeding twenty-five per cent. of the proceeds of the property; which percentage must be full compensation for all expenses of whatever character incurred in collecting, preparing, and delivering such property at the points indicated. Prior to any contract being entered into, each party proposing must submit, in writing, a statement, as near as may be, giving the kind and amount of property proposed to be collected; the location whence to be obtained; and all the facts and circumstances connected with it, particularly as to its ownership: and any contract made in pursuance of this authority will be restricted, either to the collection and delivery of particular lots at named localities, which is preferred, or when circumstances clearly justify, to the general collection and delivery of all abandoned property in limited districts, not greater in any case than one parish or county, and not more than one district to be assigned to one contractor.

Before payment to any contractor for services in fulfillment of any contracts made in pursuance of this authority, a bond equal to the amount stipulated to be paid must be given by him, indemnifying the United States against all claims to the property delivered, on account of damages by trespass or otherwise, occasioned by the act of connivance of the contractor, and against all claims that may arise on account of expenses incurred in the collection, preparation, and transportation of said property to the points designated in said contract.

Should cases arise justifying, in your opinion, the allowance of a larger percentage than that herein authorized, you will refer such cases to this Department, accompanied by a statement of the facts and circumstances connected therewith, together with such views and opinions of your own as you may think proper to submit for my consideration.

If property of a perishable nature is found abandoned, and its immediate sale is required by the interest of all concerned, it may be disposed of as provided for by regulations. You will aim to mitigate as far as possible, and will in no case do anything avoidable to augment the calamities of war.

In relation to the captured property, you will observe the same directions, as far as they may be applicable, as to its receipt and subsequent disposition, as are prescribed in relation to abandoned property.

In relation both to captured and abandoned prop-

erty, you will remember that no release must be granted to persons claiming ownership of property which has come into the possession of the Agents of the Department as abandoned, captured, or forfeited; nor must any permits be granted to individuals to remove such property; nor must personal favors, in any case, be extended to one individual or party rather than to another; nor must any liabilities be assumed or contracts made on the part of the United States not clearly warranted by law and the Departmental Regulations made in pursuance to law.

In case furniture, or other movable property of like character, is abandoned or captured, you will cause it to be retained and left on the premises where found whenever it can be done with safety; otherwise, if practicable, and not attended with too great cost, you will have it safely stored and properly marked and numbered, and will report the facts to this Department and await further directions.

Your principal embarrassment will doubtless arise from questions relating to property of the third class, or commercial property.

The general purposes which, under the acts charging me with the regulation of the restricted commercial intercourse permitted by the President, I have kept steadily in view, have already been sufficiently explained in general regulations and in letters.

They may be briefly stated thus: (1) To allow within districts in insurrectionary States, when the authority of the Government is so completely reestablished, in your judgment, sanctioned by that of the commanding general, as to warrant it, and between such districts and loyal States the freest commercial intercourse compatible with prevention of supplies to persons within rebel lines. (2) To allow beyond such districts, but within the lines of our military occupation such intercourse sanctioned by the commanding general, as may be required to supply the inhabitants with necessities, but to allow no other until the complete reestablishment of the national authority shall warrant it; and (3) To allow no intercourse at all beyond the national and within the rebel lines of military occupation; across these lines there can be no intercourse except that of a character exclusively military.

The limits of the districts within which the most general trade may be allowed must necessarily be prescribed by you, after full conference with the commanding Generals of Departments, whenever such conference is practicable, and these should be so clearly and distinctly marked by known geographical boundaries, or by the enumeration of counties, as to leave no uncertainty as to their course or comprehension. The limits of the regions within which necessities may be supplied cannot be so clearly defined, but must be ascertained as well as possible from the commanding generals, and the power to permit any supplies within them must be exercised with great caution.

There does not seem to me to be so much danger in intercourse which does not involve the furnishing of supplies. If, for example, any person desires to bring cotton, tobacco, sugar, turpentine, or other property, already purchased, or to be purchased for money only, from any place within the lines of our military occupation, I can see no objection to his being permitted to do so, subject to the fees and obligations specified in the General Regulations, on his giving a bond in a sufficient sum, and with sufficient sureties, conditioned that no military, naval, or civil officers or persons, prohibited by law, or by orders of the President, or of the Secretaries of War or Navy, or of military or naval commanders having proper authority, from being interested in such property, whether purchased or to be purchased, shall be so interested therein. Intercourse such as this might, it seems to me, be safely permitted, almost, if not quite, coextensively with our lines of military occupation.

Should this view meet the approval of the generals commanding Departments within your Agency, the question of intercourse within the doubtful region between what may be called the commercial and the military line would be reduced to a question of

For permits for individual, family, or plantation supplies, not over twenty dollars in amount, no charge is allowed, except for revenue stamps on affidavits and certificates in districts under restriction; and no charge, except five cents for permit and five cents for each revenue stamp on affidavit and certificate.

is allowed in States declared in insurrection. When purchases are less than five dollars, the permit officer may dispense with affidavits and certificates when no ground to suspect fraud or imposition appears.

The internal revenue stamps required were for affidavits, five cts., certificates, eight cts., bonds, twenty-five cts. Other regulations related to details which are unimportant.

Under these general regulations, there were prescribed special rules for the First, Second, &c., Special Agency districts. The First Special Agency district comprised the valley of the Mississippi. On the 23d of December, the following rules were adopted for this district:

RULE I. The First Agency is divided into Districts designated and described as follows:

The Wheeling District comprises that part of the Agency embraced in the State of West Virginia, excepting the counties upon and south of the Kanawha river.

The Lexington District comprises that part of the State of Kentucky south of the restricted line, as hereinafter indicated in Rule VII., and east of the Louisville and Nashville Railroad, excepting the counties of Pike, Floyd, Johnson, Lawrence, Carter, and Boyd.

The Louisville District comprises that part of the First Agency north of the State of Tennessee, east of the Louisville and Nashville Railroad, which is not embraced in the Wheeling and Lexington Districts, as above described.

The Cairo District comprises that part of the Agency west of the Louisville and Nashville Railroad, north of the State of Tennessee, and east of the Mississippi river.

The St. Louis District comprises that part of the Agency west of the Mississippi river, and north of the south line of the State of Missouri, except the counties embraced in the Springfield District, as hereinafter described.

The Springfield District comprises the counties of Vernon, Cedar, Polk, Dallas, Laclede, Wright, Webster, Green, Dade, Barton, Jasper, Lawrence, Christian, Douglas, Ozark, Maney, Stone, Barry, Newton, McDonald, in the State of Missouri, and that part of the State of Arkansas north of the White river and west of the Big Black river.

The Helena District comprises the counties of Arkansas, Desha, Drew, Chicot, and Ashley, in the State of Arkansas, and also those counties in the said State upon and east of the Big Black river, and upon and east of the White river, from its junction with the Big Black to its mouth, except the counties of Crittenden and Mississippi. Also the counties of Tunica, Bolivar, Washington, and Coahoma, in the State of Mississippi.

The Little Rock District comprises that part of the State of Arkansas not included in the Helena and Springfield Districts, as above described.

The Knoxville District comprises that part of the State of Tennessee known as East Tennessee.

The Nashville District comprises that part of the State of Tennessee west of the Knoxville District, and east of the Tennessee river, and so much of Alabama as lies north of the Tennessee river.

The Memphis District comprises that part of the State of Tennessee west of the Tennessee river; the north tier of counties in the State of Mississippi, and Mississippi and Crittenden counties in the State of Arkansas.

The Vicksburg District comprises so much of the State of Mississippi as lies north of the mouth of the Big Black river, and is not embraced in the Memphis and Helena Districts, as above described; and so much of the State of Louisiana as lies north of the mouth of the Big Black river, and east of the Washita.

The Natchez District comprises the territory within the lines of the army operating from the north, which lies south of the Districts above designated.

II. An Assistant Special Agent for each District above named will be appointed by the Secretary of the Treasury, whose duties, under the Regulations, will be prescribed by the letter of appointment, or as may be therein directed.

III. Local Special Agents and Agency Aids will be appointed by the Assistant Special Agents for their respective Districts, but in all cases these appointments must be forthwith reported to the office of the Supervising Special Agent for approval, stating the date when service commenced, rate of compensation, and location of each. Compensation will in no case be allowed for service performed more than twenty days before notice of the appointment is received at the office of the Supervising Special Agent.

IV. All reports required to be made by Local Special Agents, under the Regulations, must be made as therein required, on or before the third day of every month, and Assistant Special Agents will remove any Local Agent failing in this.

V. Any Surveyor failing to make the reports required by the Regulations at the time specified therein, will be promptly reported to the office of the Supervising Special Agent, by the Assistant Special Agent of the District, that his default may be at once brought to the attention of the Secretary.

VI. All reports required under the Regulations from Assistant and Special Agents must be made and forwarded to the office of the Supervising Special Agent, before the tenth day of each month. Any failure to do this will be reported to the Secretary.

VII. In order to prevent, under pretence of legitimate trade, the conveyance of supplies which are intended for persons in rebellion against the Government, or for places under the control of insurgents, and also to prevent undue accumulation of goods at points in dangerous proximity to districts under the control of insurgents, it is found necessary to restrict, temporarily, the trade with certain parts of States not declared in insurrection, from which the insurgents could be otherwise conveniently supplied; therefore, no merchandise designed for sale will be permitted to go to any place in the State of West Virginia, on or south of the Baltimore and Ohio Railroad, between Oakland and Grafton, nor to either of those places, nor to any place on or south of the Northwestern Virginia Railroad, between Grafton and Parkersburg, nor to either of those places, nor to any place on the south side of the Ohio river, between Parkersburg and the mouth of the Big Sandy; nor to any place in the State of Kentucky, upon or south of a line drawn from the Big Sandy to Bowling Green, thence to the northeast corner of Logan county, thence along the northern boundary of Logan, Todd, Christian, and Trigg counties, to the Cumberland river, thence down that river to its mouth, including all that part of Kentucky west of said river; nor to any place in the State of Missouri, on or south of the Missouri river, except the counties of St. Louis, Jefferson, St. Genevieve, Perry, and Franklin; except upon and in pursuance of the certificate of the proper Local Special Agent, and the letter of appointment and instructions to such Agent will in all cases indicate the amount of merchandise he will be allowed to recommend for his district.

VIII. The only officers authorized to permit the transportation of merchandise into such restricted districts, or to any insurrectionary State within the first Special Agency, are the Surveyors at Pittsburg, Wheeling, Cincinnati, Madison, Louisville, New Albany, Evansville, Paducah, Cairo, Quincy, St. Louis, Nashville, and Memphis.

IX. Family supplies may be permitted to go into restricted districts in loyal States, by either of the above named officers in their discretion, or by the Local State Agent most convenient to the residence of the family requiring them.

X. The transportation of merchandise into such restricted districts for sale, will only be permitted

upon the certificate of the Local Special Agent into whose district it is desired to transport the merchandise.

XI. No trade, either in buying or selling, will be authorized in any State declared in insurrection, except within lines hereinafter designated, under Regulation IX.

XII. No sale of merchandise therein can be made except by traders authorized under the Regulations to establish trade stores.

XIII. Trade stores will not be established at any place within a State declared in insurrection, until it shall be agreed by the military commander of the department, or of the army corps district in which such place is situated, after conference between him and the Supervising Special Agent, or such Assistant Special Agent as shall be designated by him for that purpose, that the same may be done.

XIV. After a place has been so agreed upon, if it is a military post, no supplies shall be allowed to go therefrom except upon the permit of the proper Local Special Agent, countersigned by the commander of the post, or some person authorized by him for that purpose.

XV. The monthly amount of goods that may be permitted to any trading post, shall be agreed upon between the proper Assistant Special Agent and the commanding officer of the army corps district in which such trading post is situated. The maximum amount that may be authorized to any individual or firm shall also be agreed upon, and this shall not exceed \$3,000 per month, unless the commanding officer for military reasons desires it to be larger, and if such reasons exist, all persons trading there shall be equally affected thereby. If the monthly amount allowed to any trade store is not all taken up by the trader during the month, he may be allowed all deficiencies upon any future application during the continuance of his authority.

XVI. Persons living within the lines of national military occupation, must obtain permits for the purchase of supplies at such trade stores, on application to the nearest Local Special Agent, with a memorandum in duplicate of the supplies desired, and on making and filing with him the affidavit prescribed in Regulation XVI. The Local Special Agent will, on receiving such application and affidavit, in case no fraud appear, attach one memorandum of the supplies to the application and affidavit, and file the same; and will attach the other memorandum, countersigned by him, to a permit, and deliver it to the applicant, charging and receiving the following fees therefor:

If the sum is under \$5, he will dispense with Affidavit and Certificate, and only charge for Permit.....	5 cents.
If the sum is over \$5, and not over \$20, he will charge for Permit, 5 cents; Revenue Stamp on affidavit, 5 cents.....	10 cents.
If the sum is over \$20, and not over \$50, Permit 5 cents, Affidavit 10 cents, Revenue Stamp on Affidavit 5 cents.....	20 cents.
If the sum is over \$50, and not over \$100, Permit 10 cents, Affidavit 10 cents, Revenue Stamp on Affidavit 5 cents.....	25 cents.
If the sum is over \$100, Permit 15 cents, Affidavit 10 cents, Revenue Stamp on Affidavit 5 cents.....	30 cents.

XVII. Persons desiring to obtain supplies elsewhere than at the nearest trade store, will make and file the same application and affidavit with the nearest Local Special Agent, and obtain from him a certificate and recommendation directed to the Permit Officer nearest the place of proposed purchase of supplies; and the Local Special Agent will grant such certificate and recommendation, and charge therefor as follows:

If the sum is not over \$20, for the Revenue Stamp on Affidavit 5 cents, do. on Certificate 5 cents, and the officer granting Permit will charge 5 cents.....	15 cents.
If the sum is over \$20, and not over \$50, for Affidavit 10 cents, Certificate 10 cents, Revenue Stamp on Certificate 15 cents, on Affidavit 5 cents, and the officer granting Permit 5 cents.....	45 cents.

If the sum is over \$50, and not over \$100, for Affidavit 10 cents, Certificate 10 cents, Revenue Stamp on Affidavit 5 cents, on Certificate 5 cents, and the officer granting Permit will charge 10 cents.....	40 cents.
If the sum is over \$100, he will charge for Affidavit 10 cents, Certificate 10 cents, Revenue Stamp on Affidavit 5 cents, Certificate 5 cents, and the officer granting Permit will charge 15 cents.....	45 cents.

XVIII. In order to equalize assessments on all goods transported to States and parts of States declared in insurrection, persons obtaining permits to purchase family or plantation supplies in States so declared, in addition to the fees prescribed will be required to pay five per cent. on the sworn invoice value of such family and plantation supplies.

XIX. Trade stores will be authorized only by the Assistant Special Agent of the District in which they are to be established, or upon his recommendation by any other Assistant Special Agent in the First Agency, or by the Supervising Special Agent.

XX. No purchase of products of States declared in insurrection within the First Agency can be made therein, except under the authority to the purchaser provided for in the Regulations.

XXI. Every authority for the purchase of products shall distinctly designate the place at which or the limits of the district within which such purchase may be made, and no authority shall be issued to parties beyond the limits and boundaries designated in Rule XXIV.

XXII. Authority to purchase the products of that portion of States declared in insurrection within the First Agency, and within the boundaries named in Rule XXIV., will be given by any Assistant Special Agent therein, or at the office of the Supervising Special Agent.

XXIII. After the designation of boundaries under Regulation IX., boats without supplies on board may be cleared by the Surveyor nearest the destination thereof, to anywhere therein, with persons on board authorized to purchase products within the District to which they are cleared, provided that the clearance of each boat for such purpose shall state definitely where it is permitted to go, and shall be countersigned with the approval of the military officer in command at the place of clearance nearest to its destination. Boats with supplies on board can only be cleared for named places until after the supplies are discharged; after such discharge they may proceed as other boats, under the original clearance, but all such clearances shall also be approved by the commanding officer at the place of clearance. All clearances must state by whom the boat is chartered, if chartered, or for whom it is to transport products to market.

XXIV. The limits and boundaries of the Trade Districts in the First Agency after conference with the Generals commanding the Departments therein, are hereby designated as follows, as provided in Regulation IX.

The plantations on both sides of the Mississippi throughout the Agency; the counties upon and north of the Tennessee river in the State of Alabama; the counties of Warren, Issequena, Yazoo, Washington, Sunflower, Bolivar, Coahoma, Tunica, De Soto, Marshall, Tippah and Tishamingo, in Mississippi; the parishes of Tensas, Madison, and Carroll, in Louisiana; so much of the State of Arkansas as lies upon the north of the Arkansas river; all that part of the State of Tennessee lying west of the Tennessee river; and so much of the counties of Stewart and Montgomery as lies north of the Cumberland river; so much of the county of Cheatham as lies north of the Harpeth river; Robertson, Davidson, and so much of the Williamson and Maury as lies north of the Harpeth river and east of Hillsboro Pike, north of Duck river and east of the Alabama and Tennessee Railroad; Bedford, Rutherford, Sumner, Macon, Warren, Coffee; so much of Franklin as lies east of the Nashville and Chattanooga Railroad; Marion, Grundy; so much of Marshall as lies

north of Duck river; so much of Hamilton as lies north and west of Tennessee river; Sequatchie, Knox, DeKalb, Bay, Meigs, McMinn, Rome, Blunt, Sevier, Jefferson, Cocke, Greer, Washington, Carter, Johnson, Sullivan, Hawkins, Hancock, Claiborne, Union, Campbell, Anderson, Morgan, Fentress, Van Buren, Wynn and Hardin counties.

XXV. After the first fee of fifty cents shall be paid by a boat for a trip clearance, no more than twenty-five cents shall be charged under section XXIX. of the Regulations, for any renewal thereof upon the same trip.

XXVI. Of the two months' supplies to be permitted to sutlers under Regulation XIV., only one month of such supplies shall be on account of arrearages; and no Post, Division, or Battery Sutler shall be recognized by any surveyor of Customs or other officer of the Treasury Department.

XXVII. Officers will in all cases attach to permits issued by them either the original invoices of the merchandise, or certified copies thereof (except the item extension), each one of which shall be officially stamped or countersigned by them.

XXVIII. These rules shall take effect immediately; but every authority to purchase products issued prior to January 5th, 1864, shall be conditioned that no purchase be made under it until after that date, and no boat shall be cleared below Helena under Rule XXIII., before that time.

XXIX. Blank applications, affidavits, and bonds for Trade Stores, and authority to purchase the property of insurrectionary districts, will be furnished to any Surveyor applying for them at the office of the Agency in Cincinnati, which blanks will be prepared by such Surveyor for applicants thereof, and the certificate of the Surveyor as to the sufficiency of the sureties upon the bond shall be satisfactory to any Assistant Special Agent, to whom the same shall be presented for the desired authority.

In May a decision was given by Chief Justice Taney on a case which arose in Baltimore under regulations previously prescribed for trade in Maryland. One Carpenter neglected or refused to obtain the permit required, and his goods were seized. The case was carried to the United States Court, and Chief Justice Taney decided as follows:

But if these regulations had been made directly by Congress they could not be sustained by a court of justice, whose duty it is to administer the law according to the Constitution of the United States. For from the commencement of the Government to this day it has been admitted on all hands, and repeatedly decided by the Supreme Court, that the United States have no right to interfere with the internal and domestic trade of a State. They have no right to compel it to pass through their custom houses, nor to tax it. This is so plainly set forth in the Constitution that it has never been supposed to be open to controversy or question. Undoubtedly the United States authorities may take proper measures to prevent trade or intercourse with the enemy. But it does not by any means follow that they disregard the limits of all their own powers as prescribed by the Constitution, or the rights and powers reserved to the States and the people.

A civil war, or any other, does not enlarge the powers of the Federal Government over the States or the people, beyond what the compact has given to it in time of war. A state of war does not annul the 10th article of the amendment to the Constitution, which declares that "the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people." Nor does a civil war, or any other war, absolve the judicial department from the duty of maintaining, with an even and firm hand, the rights and powers of the Federal Government and of the States

and of the citizens as they are written in the Constitution, which every judge is sworn to support. Upon the whole, the Court is of opinion that the regulations in question are illegal and void, and that the seizure of the goods of Carpenter, because he refused to comply with them, cannot be sustained. The judgment of the District Court must, therefore, be reversed and the goods delivered to the claimant, his agent or proctor.

COMONFORT, YGNACIO, a Mexican statesman, born in the city of Puebla, March 12th, 1812, was murdered, Nov. 13th, 1863. He entered the Jesuit College in his native city in 1826, became a captain of cavalry in 1832, and soon after began to take an active part in politics, attaching himself to the liberal party, of which, from that time, he continued a leader. In 1834 he was made prefect and military governor of the district of Tlapa, and in 1842 he was elected member of the National Congress, which was soon dissolved by Santa Anna. In 1846 he was reelected to Congress, but this Congress was again dissolved, and a revolution followed in which Comonfort took a conspicuous part. On the return of Santa Anna to power, in 1853, Comonfort was at once dismissed from office. In conjunction with Alvarez he raised the standard of revolution; proclaimed the peace of Ayutla, on the 11th of March; and compelled Santa Anna to retreat from Ayutla; and, having obtained from his friends in New York, where he made a flying visit, the necessary funds to carry on the war, he returned, and drove the Dictator from Mexico, in 1855. Alvarez assumed the supreme government on Santa Anna's abdication, but soon wearying of political cares, delegated his authority to Comonfort, who became provisional president of Mexico, Dec. 11th, 1855. He soon, however, found himself strongly opposed by the conservative party, which comprised in its ranks the clergy, a part of the army, and the citizens who were under the influence of the clergy. The Junta of Zacapoastla first issued a *pronunciamento*, on the 19th of Dec., and the conservatives soon marched on Puebla, where they assembled a force variously estimated at from 5,000 to 15,000 men, in Feb. 1856. Comonfort promptly marched against them with a force of 12,000, consisting of the National Guard and that portion of the army which had remained faithful to him, and, on the 20th of March, compelled them to surrender. On the 31st of March he issued a decree ordering the confiscation of the church property, and followed it on the 28th of June by another, forbidding the clergy to hold landed estate. The church party were at once arrayed against him, and a conflict of great bitterness ensued. Revolts, inspired by this party, broke out in different portions of the republic, but were soon suppressed by his vigorous movements. In March, 1857, the Congress of the Republic at Mexico promulgated a new constitution, vesting the legislative power and the control over religious and military affairs solely in Congress. The president, finding it impossible to govern the country, agitated as it was by

factions, under such restrictions was eventually constrained, in October, 1857, to apply for extraordinary powers. These were granted, Nov. 4th, 1857, and, on the 1st of December, he was proclaimed constitutional president. Troubles were, however, multiplying around him. The army, with the exception of a single brigade, had been alienated from him; and on the 17th of December this brigade declared against the new constitution, but named him as chief of a new Government. On the 11th of January, 1858, however, they discarded him altogether, and a bloody insurrection broke out that day in the capital, which lasted for ten days. Gen. Comonfort appointed Juarez, then president of the Supreme Court, provisional president, and attempted, by taking the field in person, to retrieve his fortunes, but in vain. On the 21st of January, his capital was in the hands of the insurgents, and he fled with Juarez to Guanajuato, where the latter convened a Congress to take measures to reinstate Comonfort. Meantime, the insurgents and church party had appointed Gen. Zuloaga provisional president, and Comonfort, finding that he could do nothing more for his country, escaped from Mexico, in Feb. 1858, and sailed for the United States, and thence repaired to France. Soon after the success of his friend Juarez, who, in 1859, triumphed over Miramon and the church party, and upon the first movement of the French for the invasion of his country, Comonfort returned thither, and offered his services to Juarez, who at once appointed him chief commander of the troops. In this position, his skill, bravery, and loyalty won him the respect of the French forces, as well as of his own troops. He was murdered by a gang of bandits while on his way to San Luis Potosi.

CONFEDERATE STATES. Most terrible trials befell the Confederacy* in 1863, the like

of which have not happened to any such people in modern days. With a currency which had become nearly worthless, a Government that seized upon supplies for the army with a ruthless hand, a railway system so worn as to be incapable of transporting troops and supplies of food for the army and people promptly, its most fertile regions desolated and a scarcity in the entire crops, a blockade so stringent as to cut off the outer world, a conscription that took every man between eighteen and forty-five into the army, a formidable power claiming their allegiance, invading their towns and States, offering liberty to their slaves, enrolling them in its armies, and defying their retaliation; their strongholds captured, their territory divided, their armies defeated in the field with thousands slain, and the prisoners captured—being large in numbers—held without exchange, the territory growing less and less, themselves unrecognized among nations; any other people than those reared under American institutions would have succumbed—would have proposed terms of peace.

The currency of the Confederate States has, during the year, exerted a most unfavorable influence on their internal affairs, and very seriously diminished their hopes of ultimate success in the war.

At the commencement of hostilities, the impression was universal that the war would be short. The most distinguished politicians, the wisest commercial men and capitalists of all classes, indeed every household, acted upon this view. Hence, every one was soon embarrassed for the want of hundreds of small articles, which might have been procured at cheap rates if the parties had been able to look only a few months into the future. This same short-sightedness controlled the financial affairs of the Confederacy. Its loans were to be in bonds, and its currency was to be paper. The capital invested in the bonds was drawn principally from banks, from merchants who had been driven out of business, and from trust estates and charitable institutions. Such sources were soon exhausted, and it became impossible to make further progress in bonding by appeals to the patriotism of the people, in consequence of their peculiar habits. There were no great money capitalists in the community. The capital of the people consisted mainly in lands and negroes, and the habits of the wealthy for generations had kept them in one channel—that of producing cotton, tobacco, and

* OFFICERS OF THE CONFEDERATE GOVERNMENT.

EXECUTIVE:—Jefferson Davis, of Mississippi, *President*; A. H. Stephens, of Georgia, *Vice-President*.

AIDS TO PRESIDENT—Col. Wm. M. Browne, of Georgia; Col. James Chestnut, of South Carolina; Col. Wm. P. Johnston, of Kentucky; Col. Joseph C. Ives, of Mississippi; Col. G. W. C. Lee, of Virginia; Col. John T. Wood.

Private Secretary to President—Burton N. Harrison, of Mississippi.

DEPARTMENT OF STATE:—J. P. Benjamin, of Louisiana, *Secretary of State*; L. Q. Washington, *Chief Clerk*.

DEPARTMENT OF JUSTICE:—George Davis, of North Carolina, *Attorney-General*; Wade Keyes, of Alabama, *Assistant Attorney-General*; Rufus E. Rhodes, of Mississippi, *Commissioner of Patents*; G. E. Nelson, of Georgia, *Superintendent of Public Printing*; R. M. Smith, of Virginia, *Public Printer*.

TREASURY DEPARTMENT:—C. G. Memminger, of South Carolina, *Secretary of Treasury*; Robert Tyler, *Register*; E. C. Elmore, *Treasurer*; J. M. Strother, of Virginia, *Chief Clerk*; Lewis Cruger, of South Carolina, *Comptroller*; B. Baker, of Florida, *First Auditor*; W. H. S. Taylor, of Louisiana, *Second Auditor*.

WAR DEPARTMENT:—James A. Seddon, of Virginia, *Secretary of War*; Judge J. A. Campbell, of Alabama, *Assistant Secretary of War*; R. G. H. Kean, *Chief Bureau of War*; Gen. S. Cooper, *Adjutant and Inspector-General*; Lieut.-Col. J. Withers, Lieut.-Col. H. L. Clay, Major E. A. Palfrey, Major Charles H. Lee, Major S. W. Melton, Captain Reilly, *Assistant Adjutants and Inspector-Generals*; Brig.-Gen. A. R. Lawton, of Georgia, *Quartermaster-General*; Col. L. B. Northrop, of South Carolina, *Commissary-General*; Col. J. Gorgas, *Chief of Ordnance*; S. P. Moore,

M. D., *Surgeon-General*; C. H. Smith, M. D., *Assistant Surgeon-General*.

NAVY DEPARTMENT:—S. B. Mallory, of Florida, *Secretary of the Navy*; E. M. Tidball, *Chief Clerk*; Com. John M. Brooke, *Chief of Ordnance*; Com. A. B. Fairfax, *Inspector of Ordnance*; Com. J. K. Mitchell, *in charge of Orders and Detail*; Surgeon W. A. W. Spotswood, *Chief of Medicine and Surgery*; Paymaster J. DeBree, *Chief of Clothing and Provisions*.

POST OFFICE DEPARTMENT:—J. H. Reagan, of Texas, *Postmaster-General*; H. St. George Offutt, of Virginia, *Chief of Conveyance Bureau*; B. N. Clements, *Chief of Appointment Bureau*; John L. Harrell, of Alabama, *Chief of Finance Bureau*; B. Fuller, of North Carolina, *Chief Clerk*.

rice—the surplus products to be invested in lands and negroes. This thirst for land and negro investments absorbed the millions of income, and kept the people generally in debt as much as a year's income. There existed no millionaire bankers, merchants, manufacturers, and other moneyed capitalists, that lived in splendor on incomes derived from money at interest. Such people as those in the Confederate States were not in a situation to invest in bonds; nor was it reasonable to expect them to volunteer to invest in bonds at the expense of incurring new debts, or with the necessity of selling property. Many, very many planters who subscribed to the cotton loan sold the bonds immediately, and invested the proceeds in the payment of debts, or in land and negroes, and were unwilling afterward to sell, even to aid the Government, any of their agricultural products for less than the highest market value for currency. Many were not willing to sell for currency at any price. The consequence of this was an act of impressment on the part of the Government, and starvation to towns and villages, and all that class of persons who live on fixed incomes. The financial career of the Government in providing for the expenses of a great war, is shown in the following statements of the Secretary of the Treasury:

OUTSTANDING TREASURY NOTES, AUGUST 8TH, 1863.

Total of all kinds of General Currency Notes..	\$523,114,406
Estimated on hand for cancellation.....	70,134,600
Total.....	\$452,979,806
And probable beyond the Mississippi.....	150,000,000
Balance.....	\$302,979,806

STATEMENT OF BONDS INTO WHICH CURRENCY HAS BEEN FUNDED, INCLUDING AVAILS OF THE PRODUCE LOAN.

Total of 100 million loan.....	\$100,000,000
Funded since Feb. 20th, 1863.....	124,318,370
Funded of notes, May 16th, 1861.....	8,056,300
Total.....	\$232,404,670
On hand, to be funded by estimate.....	70,000,000
Total funded.....	\$302,404,670
Five per cent. call, partly funded.....	15,442,000
Total.....	\$317,846,670

The following is a statement of the finances at the close of the third quarter of 1863:

RECEIPTS FROM JANUARY 1ST, TO SEPTEMBER 30TH, 1863.

For eight per cent. stock.....	\$107,292,900
For seven per cent. stock.....	38,737,650
For six per cent stock.....	6,810,050
For five per cent. call certificates.....	22,992,900
For four per cent. call certificates.....	482,200
Cotton certificates, act April 21st, 1862.....	2,000,000
Interest on loans.....	140,210
War tax.....	4,128,988
Treasury notes.....	391,623,530
Sequestration.....	1,862,556
Customs.....	934,798
Export duty on cotton.....	8,101
Patent, fund.....	10,794
Miscellaneous, including repayments by disbursing officers.....	24,498,217
Total.....	\$601,522,893

EXPENDITURES DURING SAME PERIOD.

War Department.....	\$377,988,244
Navy Department.....	38,437,661
Civil, miscellaneous, etc.....	11,629,278
Customs.....	56,636

Public debt.....	\$32,212,290
Notes cancelled and redeemed.....	59,044,449
Total expenditures.....	\$519,368,559
Total of receipts.....	601,522,893

Balance in treasury.....	\$82,154,334
From which is to be deducted the amount of Treasury notes which have been funded and brought in for cancellation, but have not yet been regularly audited, estimated.....	65,000,000
Total.....	\$17,154,334

The public debt (exclusive of the foreign loan) at the same period, was as follows:

FUNDED.	
Eight per cents.....	\$207,128,750
Seven per cents.....	42,745,600
Six per cents.....	41,006,270
Six per cent. cotton interest bonds.....	2,035,000
Total.....	\$292,915,620

UNFUNDED.	
Treasury notes : general currency.....	\$603,632,798
Two-year notes.....	8,477,975
Interest notes at 3.65.....	627,450
Interest notes at 7.30.....	122,582,200
Under \$5.....	4,837,095
Five per cent. call certificates.....	26,240,000
Total.....	\$766,447,519
Deduct amount of Treasury notes funded and cancelled.....	65,000,000
Total.....	\$701,447,519

In order to estimate the amount of Treasury notes in circulation at the date of this report, there must be added the further sum of one hundred millions for the two months which have elapsed since the date of the above schedules. The balance of appropriations made by Congress, and not drawn on September 30th, stood as follows:

War Department.....	\$395,502,698
Navy Department.....	24,413,645
Civil, miscellaneous, etc.....	56,240,996
Customs.....	294,460
Total.....	\$476,451,799

The estimates submitted by the various departments for the support of the Government, were made to 1st July, 1864, the end of the fiscal year, and were as follows:

Legislative Department.....	\$309,005
Executive.....	52,350
Treasury.....	22,583,359
War.....	438,078,870
Navy.....	13,624,945
Post Office.....	8,908
State.....	544,409
Justice.....	222,587
Total.....	\$475,498,493

If these estimates be extended to embrace the remaining six months of the same year, they must be doubled, and that sum added to the undrawn appropriations would make an aggregate of \$1,427,448,778.

The Confederate currency was sold during the year at six cents, and less, on the dollar. This depreciation was followed by most serious consequences. The staple property of the country became worth two or three, and in some cases four, times its old value. But most of the articles of consumption, such as food and clothing, were from five to one hundred times their former value. This state of affairs

caused much discussion among the public men as to the cause and the remedies. Mr. Toombs, of Georgia, in a published letter, presented the following views:

The first great error was in attempting to carry on a great and expensive war solely on credit—without taxation. This is the first attempt of the kind ever made by a civilized people. The result of the experiment will hardly invite its repetition. During the first year of its existence, the present Congress neither levied nor collected a single cent of taxes, and postponed the collection of those levied for the second year to a period fatally too late to support our currency.

The second error naturally resulted from the first, and consummated the destruction of public credit. This error was the use of the public credit almost exclusively in the form of currency. The natural result of this policy was plain, inevitable, overwhelming. It is a well-settled and sound principle in currency that a nation which has a sufficient quantity of circulating medium properly to answer the wants of its trade and commerce, cannot add to the value of that currency by any further addition to its quantity. In the ordinary state of trade, any excess of the proper quantity exhibits itself in the form of the exportation of bullion—any deficiency, in importation. When, from any cause whatever, the operation of this law is prevented, any redundancy of currency must necessarily depreciate the whole mass, and this depreciation will exhibit itself in the rise in price of all commodities which it circulates. It is also true that if this redundant currency exists in the form of paper money not convertible into coin at the will of the holder, the measure of this depreciation is the difference between the standard or mint price of bullion and the market price when paid in this currency.

Tested by these plain and sound principles, the solution of the causes of our present financial troubles is easy. When this revolution commenced, our currency was in excess of the wants of society. The proof is that nearly all of the banks within the Confederate States had suspended cash payments, and their notes were depreciated; therefore, the first Treasury note which was put into circulation added its nominal value to this excess; each succeeding issue enlarged it, and increased the depreciation of the whole mass. This depreciation soon began to manifest itself in the rise of commodities; yet the Government has unwisely continued daily by a forced circulation to add to this excess, increase the depreciation, and enhance the price of all the commodities which it is compelled to purchase, and is thus exhausting the national resources in the ratio of geometrical progression.

This ruinous policy would have long since run its course but for the fact that law, intimidation, and, above all, the ardent, sincere, honest but mistaken patriotism of the people have been invoked to uphold it. But the principle being radically wrong, no human power could uphold it long, and in spite of all these powerful proofs, our national currency is depreciated more than one thousand per cent. below gold and silver, four hundred per cent. below suspended bank notes, and prices and payments are rapidly adjusting themselves to the inexorable facts.

Others denounced the Government for the existing state of affairs, but all agreed that the evil consisted in the excess of paper money. The problem to be solved was to sustain the operations of the Government, and at the same time reduce the volume of the currency. Mr. Toombs suggested the following measures:

This depreciation of currency having been shown to have resulted chiefly from the excessive issue of Treasury notes, we can only correct this evil by stopping instantly any further issue under any pretence whatever, and by reducing as rapidly as possible our present outstanding issues. It requires large, compre-

hensive, and efficient measures for their continual deduction, until they shall rise in value, and approximate as nearly as our circumstances will allow to the standard value of gold and silver.

Taxation and loans are the only means of attaining this result—taxation, comprehensive, simple, rigid, and equal. The present tax law does not possess these qualities—it is partial, unequal, and complex; it fosters vulgar prejudices, and will gather an abundant harvest of frauds and perjuries. The tax in kind and principle is subject to many grave objections. This mode of taxation should never be resorted to when the currency is redundant, but with all its faults may be a necessary evil whenever there is a great deficiency in the circulating medium. The execution of such a law is necessarily difficult, irritating, wasteful, and productive of much fraud.

But certainly, in our present condition, the war cannot be carried on and the currency sustained by taxation alone; we must resort to loans. I am not in the least discouraged by the ill success of the Government lately in funding its Treasury notes. Treasury notes are in great excess; the holders are anxiously hunting for a safe and profitable investment for them. The Government is perfectly able to supply that want; heretofore it has not done so. We must issue new bonds with principal and interest payable in gold and silver, or their equivalent, and adopt measures to make such payment certain. This can be done by mortgaging a specific portion of the revenue to the new bondholders, adequate to the payment of both principal and interest as each may respectively fall due, coupled with clear provisions that their taxes shall be irrepealable until the mortgages are paid, and that these taxes shall only be paid in gold or the coupons of the bonds for which they are pledged.

By making the provision for our bonds ample at the beginning, so that no future legislation shall be necessary to preserve the public faith, we give the public creditor the best possible security for his money which we are able to offer. The overthrow of Government will be his only danger; that cannot be provided against.

Mr. Oldham, of Texas, later in the year, proposed a plan in Congress, the main feature of which was the levy of such a tax as would extinguish a large portion of the debt. The feature of it was a tax on all outstanding Treasury notes and other securities of the Government. This is similar to the plan suggested in his message to Congress by Mr. Davis. (See PUBLIC DOCUMENTS.)

Another scheme proposed was the following:

First, a continued money tax should be levied to pay the interest of our debt; and second, the levy of a tax or forced loan of twenty-five per cent., or as much more as may be needed, upon the property of the country, the taxpayers to receive either seven or eight per cent. bonds for such forced loan. I would suggest that the bonds bear not a less rate of interest than seven per cent., this being less than the average rate of interest in the different States. This tax should be distributed equally upon the wealth of every individual in the Confederacy, to be collected in sums sufficient first to absorb the present currency, and next to provide for the future wants of Government up to fifteen hundred millions.

I believe there are few men of property who could not raise the money to pay this tax, having bonds to hypothecate. But it would not be necessary to require cash from individuals. A tax note would be taken. This tax note, having a prior lien over all other debts, and in addition having the bonds collaterals attached, would command money anywhere, and be at a premium, until our currency became equal to gold and silver. They would be negotiable here and in every other country. Such an assumption of our national debt by the wealth of our country would silence the

now undercurrent hints at final repudiation, and raise our bonds to the highest standard in all European markets.

If this tax or forced loan be levied equally on all the wealth of our country, its necessity, justice, and propriety will commend it to everybody, for all would see that it is better to give up even half of our estates than to become a conquered people and lose all.

The following is another view that was presented:

When the first excitement of war stirred the patriotism of the people, it was believed that every man able to bear arms would volunteer, and it was equally believed that every dollar of property would be willingly held subject to the call of the Government. But disappointment has attended both expectations; and as the conscription act was necessary for the army, so a property conscription act has become equally necessary for the Treasury. Funding and volunteering both "played out" about the same time, and as the Government found it necessary to abandon volunteering, and to resort to compulsory conscription, to make all men bear their proper part of the burdens of the army, so now it has become necessary for the money arm of the Government to abandon voluntary funding, and to resort to compulsory loans upon the property of the people.

Two expedients only remain to the Government—the forced loan and the public sale of Confederate bonds for what they will bring, both to be accompanied with a cessation of the issue of Confederate Treasury notes.

The most serious consequence which resulted from the depreciation of the currency, was the refusal of the agriculturists to sell their produce for the Government notes, or to sell only at the highest price. This determination, if adhered to, would result in the destruction of the army from a lack of supplies, and the starvation of the people who were engaged in other industrial pursuits in towns and cities. In anticipation of this danger, an act was passed by Congress in the beginning of the year, which authorized the Government to seize or impress all the produce necessary for the army. It provided that a board of commissioners should be appointed in each State, who should determine, every sixty days, the prices which the Government should pay for each article of produce impressed within the State. A central board of commissioners was also appointed for all the States. The act authorized the agents of the Government to seize all the produce of the farmer, except so much as was necessary to maintain himself and family. For this produce the agent paid at the rate fixed by the State commissioners. The operation of the act created an unparalleled excitement among the people. A farmer in Louisa county, Virginia, thus wrote, on October 23d, to the papers at Richmond:

You speak of the tardiness with which the farmers are sending forward their crop of wheat. I do not know how it may be in other counties, but so far as Louisa is concerned, there is none to send, as the Government has taken the entire crop. As far as I have heard from, it has all been sent to Richmond on Government account, at the fixed price of five dollars per bushel, barely leaving sufficient for seed and family use. All the hay and oats have long since been hauled off to our army in Orange and Culpepper.

Another farmer, on James river, at the same time, wrote as follows:

I see that you and other papers state that there is no wheat in the city mills, and none arriving; and you blame the farmers. You write in ignorance of the facts. The farmers are not blamable. The Government agents have impressed all the wheat, and flour and beef in this region, which was destined for Richmond. I suppose the same is the case all over the State. This will explain to you why no wheat arrives—the farmers have none to send—it has been seized by Government agents. Look to them.

JAMES RIVER.

Soon after the act authorizing impressment took effect, instructions were issued from the War Department regulating this proceeding. The details upon which difficulty arose became the subject of further instructions. The following explains some of these details, and shows the severity with which the law might be enforced:

General Orders, No. 19.

ADJUTANT AND INSPECTOR-GENERAL'S OFFICE, }
RICHMOND, VA., March 19th, 1863. }

In consequence of numerous applications made by various persons to the War Department, it is obvious that some misconception in regard to the instructions of the Secretary of War, in relation to the impressment of supplies, must exist on the part of the people, or that the agents of the Government have violated their instructions. Now, therefore, for the purpose of removing such misconception, and to prevent any violation of these instructions, it is hereby ordered:

I. That no officer of the Government shall, under any circumstances whatever, impress the supplies which a party has for his own consumption, or that of his family, employés, or slaves.

II. That no officer shall at any time, unless specially ordered so to do by a general commanding, in a case of exigency, impress supplies which are on their way to market for sale on arrival.

III. These orders were included in the instructions originally issued in relation to impressment by the Secretary of War; and the officers exercising such authority are again notified that "any one acting without or beyond" the authority given in those instructions, will be held strictly responsible.

In conformity with the foregoing, to prevent any inconsiderate action on the part of officers or agents charged with the duty of impressment, they are enjoined, until further orders (which will not be given unless under imperative exigencies for the supply of the army), not to impress any necessities of subsistence to man, owned by producers, *in transitu* to market, or after arriving at market, unless retained an unreasonable time from sale to consumers.

By order, S. COOPER,
(Signed) Adj't and Insp.-Gen.

At a meeting of the board of commissioners for impressment in the Confederate States, held at Augusta, Georgia, near the close of the year, the following regulations, among others, were adopted:

That the practice of the Confederate Government's agents in making contracts for the purchase of manufactures and other articles for the army, at higher prices than those adopted by the several boards of commissioners in the different States, is highly reprehensible, injurious to the Government, and should be stopped at once by the Secretary of War.

Resolved, That the habit which prevails in many sections of the Confederacy, with the quartermasters and commissaries and their agents, in impressing articles for private consumption in families, is contrary to the acts of Congress regulating impressments, and should be prohibited by the War Department.

Resolved, That in impressing articles of food and forage for the army, the agents of the Government should exercise a discretion, and impress in those sections of the different States where food and forage are most abundant.

Resolved, That in those parts of the country where the provision crop is short, and will not more than supply the wants of the country, the tithes due the Government should be commuted for in money, and left for the supply of soldiers' families and other destitute persons at Government prices.

Resolved, That upon the true construction of the act of Congress regulating the matter, the price of no article manufactured for the use of the Government under the said act can be more than seventy-five per cent. on the cost of production, excluding the cost of the raw material, which should only be reimbursed without a profit thereon.

The effect of these measures was to create a difficulty in procuring food for both army and people. Both suffered. Innumerable methods were resorted to for the purpose of saving property from impressment. Hundreds of producers were driven to sell clandestinely or openly their stores to non-producers out of the army, who were willing and anxious to pay fifty or a hundred per cent. more than the Government paid. The effect upon the spirit of the people was shown in the declarations of the press, the speeches of public men, and those made in the House of Congress.

"These arbitrary impressments of Government," said the press, "touch the people's pride and sense of justice; and they effect a great and natural change in their sentiments toward the cause. Men who, in a romantic and pious enthusiasm for their country, have cheerfully given up their sons to the battle, and have assisted with a sort of mournful pride in the burial of their offspring slain on the field, have had their feelings and temper toward the Government suddenly changed by the rude and rapacious action of the Government pressgangs. They make this natural reflection, whether a good cause, administered in wrong and rapacity, can succeed; and these impressments have done more to shake the confidence of the country in the capacity of its public men in civil office for administering affairs than any other cause and all causes combined."

While numerous commissioners, post quartermasters, and other Government agents practised gross abuses, oppressed the people, and caused starvation to threaten whole villages and towns, and thus brought odium upon the Government, the Government itself was guilty of many abuses. The impressment law was enforced at the same time that the tithe or produce tax was in process of collection. The tithes were often waiting for the tithe gatherer, and even rotting for lack of his approach. Great delay often occurred in collecting or transporting Government supplies after they had been purchased, and waste and destruction were the consequence.

The following remarks by ex-Senator Toombs, of Georgia, in the Hall of the Assembly of that State, on November 13th, present a very complete view of the operation of the impressment:

"I have heard it frequently stated, and it has

been maintained in some of the newspapers in Richmond, that we should not sacrifice liberty to independence; but I tell you, my countrymen, the two are inseparable. If we lose our liberty we shall also lose our independence; and when our Congress determined to support our armies by impressment, gathering supplies wherever they found them most convenient, and forcing them from those from whom their agents might choose to take them, in violation of the fundamental principles of our Constitution, which requires all burdens to be uniform and just, and paying for them such prices as they choose, they made a fatal blunder, which cannot be persisted in without endangering our cause, and probably working ruin to our Government. The moment they departed from the plain rule laid down in the Constitution—that impressment of private property should only be made in cases where absolute necessity required them—they laid the foundation for discontent among the people, they discouraged labor, and incorporated a principle which is not only in violation of the Constitution, but fatal to the rights of property. The Constitution cannot be dispensed with in time of war any more than in time of peace. If it is overthrown we are already conquered. Liberty is lost when a man holds his life, liberty, and property, not under the law, but at the mere pleasure of another. Stand, therefore, by the Constitution of your country, which you have sworn to support, and which all the public officers have sworn to support, from the President down to the lowest officer in the country. There is duty, safety, and honor in that course. I hope to stand by it, in peace or in war, through evil as well as through good report.

"Then when you come to levy burdens, it matters not how heavy they be, if they are necessary, so they be just. If five per cent. of the wealth of the country will answer, take only that; but if ten, or twenty, or fifty per cent. are necessary, if the last dollar of the country, and the last drop of blood are necessary, take that; for I would rather see this whole country the cemetery of freemen than the inhabitation of slaves. Therefore it is not a question how much shall be levied for the support of our Government, but only that your levies be just and uniform. The citizens of this country demand that they shall be permitted to bear their just proportion of the burdens that may be necessary in the achievement of our independence. They demand that if provisions are necessary for the support of our armies in the field; if horses are necessary; if clothing, if property of any kind is needed—they demand that the burden of supplying it shall not fall on a few individuals, but on society at large, and in just and uniform proportion on all. It is the right, the privilege, as well as the duty of all, to bear a just and equal portion of the demands of the Government.

"When, therefore, the Government seeks to levy its supplies through commissaries, or other

agents, by impressment, instead of entering the market as others do, and purchasing them, it deprives the people of the right which they claim of bearing their just proportion of the burdens as well as of the benefits of the Government. The wisdom of twenty centuries is against this policy, and I here affirm that it will not support the army and will ruin the republic. Already it has deprived many of their honest earnings, and left their families in penury, want, and dependence, and I call on you to right them.

"Such a system has never been pursued with profit to the country, from the time of Alexander the Great down to the present time. Gen. Scott did not practise it, even when in the enemy's country. From the whole of his march from Vera Cruz to the city of Mexico, he obtained his supplies by purchases, and obtained them plentifully, while our armies, which depend for their support on impressments, have often been upon half rations all over the country, even where provisions are abundant.

"There are said to be nine millions of people in our Confederacy. There are eleven hundred thousand in population, black and white, in our State, and provisions are ample for the support of all, if they were only distributed; and yet the course which has been pursued in obtaining supplies for the army has reduced it almost to the point of starvation, even in the midst of plenty; and, in the name of the Constitution and of justice, I have come to protest against it. It is your business, as legislators, to provide for the wants of those who may have suffered from this system in your midst, and I hope you will do it. If it requires taxation, impose it; if a loan, make it; whatever is necessary, do it, that the families of those who are in need of provisions and clothing, whether because what they have had has been taken from them by the Government, or whether the absence of their natural protectors in the military service of the country has deprived them of support, do all that is necessary to make them comfortable. You have the power, and you should exercise it.

"Why cannot the Government go into the market as others do, and purchase their supplies? It is said that the people will not sell for the currency at reasonable rates. Well, if they will not sell for one price, pay another. You have the power of raising what is necessary for the country. If one dollar is not sufficient, raise ten—pay just compensation, market price for all commodities, not monopolized, and tax those who are able to pay. Why should all the burdens fall on one class, as it has heretofore fallen almost exclusively on the agriculturists? Why should the capitalist, the merchant, manufacturer, the speculator, the extortioner be passed over? They have remained at home during the war, and made money. Why should not their money be taken to carry on the war as well as the productions of the agriculturists? The latter are not a favored

class; there are no exemptions among them; they have been the greatest sufferers in this war, both in blood and treasure.

"But shall I proceed? If a man advocates such principles as these, it is to be said he is against the Administration.

"I say to you all in candor, that the course our Government has pursued in obtaining its supplies has sowed the seeds of discontent broadcast over the land, and is generating hostility to the Government itself. Look at the practical workings of it in our own State. In the northern section of it the hand of Providence has been laid heavily upon them for the last two years. Last year the rains were withheld from them. Sterility cursed, and old mother Earth seemed to forget her children. This year the frost has come, and, in addition, the foot of the invader has been set upon the land, and blighted the prospects of the agriculturists. Famine, war, and worse than impressment, has laid its hand upon them, and you are asked to make provision for the support of many who will be unable, from these causes, to support themselves, and I hope you will do it. In addition to this, the impressing agent has gone around, and, in many cases, robbed the families of their meagre support for the year. As a consequence, the soldiers in the field have become discontented, and desertions have taken place.

"It is useless to attempt to conceal these facts. You know them to be true, and our enemy knows them to be true. The part of wisdom is to rectify the evils, not to conceal them. It is your duty, as the guardians of the people of Georgia, to speak out, and see to it that the republic shall suffer no detriment at the hands of those whose duty it is to guard and defend her interests. You are bound to see to it that the rights and liberty of the people are maintained."

The embarrassment which arose from this state of affairs was greatly increased by the decay of the railroads. The means of transportation possessed in the Confederate States have become more and more limited during each year of the war. In Virginia the railroads were on the point of giving out at the beginning of 1863. Their rate of speed was reduced to ten miles an hour as a maximum, and their tonnage diminished from twenty-five to fifty per cent. This change in the rate of speed and quantity of freight was made through necessity. The wood work of the roads had rotted, and the machinery was worn out, and owing to the stringent enforcement of the conscription law among the men employed by the railroad companies, they had not been able, with all their efforts, to renew the one or repair the other. This failure extended to the roads in all the States. The scarcity of iron for rails was another serious injury, which could not be repaired. In this respect, the pressure of the blockade was more severely felt than in any other. So completely were these roads a part of the military system,

that serious apprehensions existed that the armies might be obliged to fall back from some of their positions in consequence of the difficulty of getting to them food for men and horses. The country, in the vicinity of the armies, had been stripped of its provisions and forage, and they depended for their existence and the maintenance of their positions upon the railroads. The better the roads were, the more certain were the supplies of the troops and their ability to resist all the efforts of the Federal army to occupy the country.

In two instances the Government made roads, to complete the internal system, where gaps existed. From Selma, in Alabama, to Meriden, in Mississippi, a link was built which completed this great highway, from west to east, and superseded the necessity of a long detour by Mobile, and rendered useless any attempt by the forces at Pensacola to cut off communication by destroying the railroad which connects Montgomery with Mobile. The other instance was the line, of fifty miles in length, between Danville, in Virginia, and Greensborough, in North Carolina. By this work the Government was relieved from a dependence upon the line of railroad which runs from Richmond through Petersburg and Weldon, and which has for years been the great highway between the North and the South.

But while the armies were exposed to want, from the probable inability of the roads to transport sufficient provisions, the situation of the inhabitants in some parts of the Confederacy was equally critical, from the same cause. The northern part of Virginia, the fruitful valley of the Shenandoah, and the eastern section of North Carolina produced in ordinary times most of the grain which supplied bread to the South, and which was exported to South America. Each of these districts was now in possession of the Federal forces. In Middle Tennessee agriculture was suspended, and the aged men, women, and children who adhered to the Confederacy, were forced to retire still farther south and increase the number of mouths to be fed there. Another source of supply, the North Carolina Fisheries, which annually yielded millions of herring besides shad to be salted, was also cut off. The wheat crop of 1862 was an unusually poor one; and although a sufficiency of grain for the year's supply of food was grown, the limited means of transportation possessed by the Confederacy were taxed to the utmost to bring this grain from the remote corners of States to the spots where it was demanded for consumption—to bring the food and the mouths together. Such was the aspect, relative to provisions, in the beginning of the year. It was evident that a great change must be made in the production to enable the country to surmount these evils. The Government, foreseeing the danger, made vigorous appeals to the people. A series of resolutions were passed by Congress on the subject, one of which requested Mr. Davis

to issue an address to the people. In compliance with this request he soon after issued an address, dated Richmond, April 10th. After presenting a most flattering view of the general military result in staying the Federal progress, he turns to the subject of provisions, and thus proceeds:

With such a contest before us there is but one danger which the Government of your choice regards with apprehension; and to avert this danger it appeals to the never-failing patriotism and spirit which you have exhibited since the beginning of the war.

The very unfavorable season, the protracted drouths of last year, reduced the harvests on which we depend far below an average yield, and the deficiency was, unfortunately, still more marked in the northern part of our Confederacy, where supplies were especially needed for the army. If, through a confidence in an early peace, which may prove delusive, our fields should now be devoted to the production of cotton and tobacco, instead of grain and live stock and other articles necessary for the subsistence of the people and army, the consequences may prove serious, if not disastrous, especially should this present season prove as unfavorable as the last. Your country, therefore, appeals to you to lay aside all thought of gain, and to devote yourselves to securing your liberties, without which these gains would be valueless.

It is true that the wheat harvest in the more southern States which will be gathered next month promises an abundant yield; but even if this promise be fulfilled, the difficulties of transportation, enhanced as it has been by an unusually rainy winter, will cause embarrassments in military operations and sufferings among the people, should the crops in the middle and northern portions of the Confederacy prove deficient. But no uneasiness may be felt in regard to a mere supply of bread for men. It is for the large amount of corn and forage required in the raising of live stock, and the supplies of the animals used for military operations, too bulky for distant transportation; and in them the deficiency of the last harvest was mostly felt. Let your fields be devoted exclusively to the production of corn, oats, beans, peas, potatoes, and other food for man and beast; let corn be sowed broadcast for fodder in immediate proximity to railroads, rivers, and canals, and let all your efforts be directed to the prompt supply of these articles in the districts where our armies are operating. You will thus add greatly to their efficiency, and furnish the means without which it is impracticable to make those prompt and active movements which have hitherto stricken terror into our enemies and secured our most brilliant triumphs.

Having thus placed before you, my countrymen, the reasons for the call made on you for aid in supplying the wants of the coming year, I add a few words of appeal in behalf of the brave soldiers now confronting your enemies, and to whom your Government is unable to furnish all the comforts they so richly merit. The supply of meal for the army is deficient. This deficiency is only temporary, for measures have been adopted which will, it is believed, soon enable us to restore the full rations; but the ration is now reduced at times to one half the usual quantity in some of our armies. It is known that the supply of meat throughout the country is sufficient for the support of all; but the distances are so great, the condition of the roads has been so bad during the five months of winter weather through which we have just passed, and the attempt of grovelling speculators to forestall the market and make money out of the life blood of our defenders, have so much influenced the withdrawal from sale of the surplus in the hands of the producers, that the Government has been unable to gather full supplies.

The Secretary of War has prepared a plan, which is appended to this address, by the aid of which, or some similar means to be adopted by yourselves, you can assist the officers of the Government in the purchase of

the corn, the bacon, the pork, and the beef known to exist in large quantities in different parts of the country. Even if the surplus be less than believed, is it not a bitter and humiliating reflection that those who remain at home, secure from hardship and protected from danger, should be in the enjoyment of abundance, and that their slaves also should have a full supply of food, while their sons, brothers, husbands, and fathers are stinted in the rations on which their health and efficiency depend?

Entertaining no fear that you will either misconstrue the motives of this address, or fail to respond to the call of patriotism, I have placed the facts fully and frankly before you. Let us all unite in the performance of our duty, each in his sphere; and with concerted, persistent, and well-directed effort, there seems little reason to doubt that, under the blessings of Him to whom we look for guidance and who has been to us our shield and strength, we shall maintain the sovereignty and independence of the Confederate States, and transmit to our posterity the heritage bequeathed to us by our fathers.

JEFFERSON DAVIS.

This was followed by appeals from the governors of several States to their citizens, and by resolutions of legislative bodies. A very extensive effort was also made to secure the planting of more wheat and corn.

An extra session of the Legislature of Georgia was called by Governor Brown, to meet on March 25th, "to secure the use of all productive labor in the cultivation of grain and articles necessary to sustain life." Governor Vance, of North Carolina, in March issued an address to the people, urging them to plant corn and raise articles of prime necessity, saying: "By universal consent there is allowed to be but one danger to our speedy and triumphant success, and that is the failure of provisions. Everything depends now upon the industry and patriotism of the farmer." Governor Shorter, of Alabama, issued an appeal to the people, saying: "The failure to raise the largest possible quantity of supplies in the present year may bring disaster to our cause." (*See ALABAMA.*)

On the 3d of April, the Legislature of South Carolina assembled. The Governor in his message stated that they were called together for the express purpose of considering the proper measures to be taken to provide food for the sustenance of the army and the people.

The prospective result of these efforts was thus described in a letter from the Commissary-General to the Secretary of War, as follows:

ATHENS, April 25th, 1863.

Hon. James A. Seddon, Secretary of War:

SIR: As the excessive want of supplies in this department will require me to proceed back to Atlanta, Georgia, before returning to the capital, I deem it expedient, in view of the present importance of time, to acquaint you by letter of the impressions I received from my conference with the Governors, etc. Governors Brown, Shorter, and Vance only were present; but Governor Pettus, I have learned, arrived at Milledgeville after my departure.

All agree that the planters of their States evince no disposition to seed for more than the usual quantity of grain and other articles necessary for the subsistence of the people and the army. Neither the resolutions of Congress, requesting the President to appeal to the people, nor the appeal itself, have produced any visible effect. Such of the planters as doubt the ex-

pediency of raising more cotton and tobacco seem bent upon clearing up new lands instead of tilling those now fit for cultivation. In riding by mail from Milledgeville to this point, I passed, as you are aware, through one of the best corn districts in Georgia, and not one acre in fifty, as I am assured by my own observations and the reports of travellers on the roads, is being prepared for raising that indispensable article, or other products requisite for the subsistence of man and beast.

It is lamentable that the people are so deaf to the many appeals of their representatives and so blind to their own interests. It is obvious that something must be done immediately, or both the people and the army must starve next winter. This is an alarming reflection, but it is fully warranted by the situation. Now is the time to avert the impending danger. A few days more and it will be too late.

Several plans were suggested by the Governors for promoting our object—among them that of convoking the farmers, at numerous points throughout the States, and addressing them through prominent speakers on the absolute importance of meeting the wants of the nation. Although this plan was favorably regarded, it was deemed too late in the season to attain the desired results by its execution; and the Governors finally decided to send an address—not to be published by the press, exposing our wants to the enemy—to all leading planters in their respective States, urging upon them the imperative necessity of producing all the grain, live stock, etc., possible. But since the appeal of the President is disregarded by this class of citizens, what response can we expect them to make to similar appeals of the Governors? In my judgment, none.

It is only by more rigorous, and indeed arbitrary, measures that we can prevent distress in our towns, and subsist the armies in the field through next winter and spring. The appeal put forth by the President, and the one proposed by the Governors, will be entirely useless. This is the opinion also of General Bragg, with whom I yesterday conferred for two hours at Dalton.

The general suggests three plans for preventing the threatened famine. The first is, that the President, by proclamation, prohibit the raising of any more cotton and tobacco, or clearing of new lands, until further notice. The second is, that by proclamation he order all planters to seed a certain number of acres of grain or other articles of necessary consumption in proportion to the quantity of cleared land and negroes belonging to them. The third is, for the Government to take possession of the plantations, or such portion of them as the owners do not intend to seed with grain, etc., and to employ the negroes belonging thereto in raising such agricultural products as may be deemed necessary. Officers and soldiers who have been rendered by wounds and disease unfit for further service in the field could be employed as superintendants and overseers.

The last mentioned plan appears to me to be feasible and entirely the best that can now be adopted. As reasonable compensation would, of course, be allowed for the use of the land and negroes, etc., I think the plan would in general meet with favor. At all events, the measure would not be more arbitrary than others the Government has been forced to resort to, and in view of the emergency, and as a military necessity, it would be perfectly justifiable.

The wheat harvest, it is easy to see and learn from a trip through the country, will not be half as bountiful as we have anticipated; and the belief into which the Government has been led, that there are large quantities of bacon in many parts of the country, is erroneous. The inventory ordered by Governor Brown of the bacon and live stock in Georgia (of which you have by this time probably received a copy) shows the well-nigh exhausted condition of that State, and yet, beyond peradventure, it is less nearly exhausted than any other State in the Confederacy.

It will, therefore, be no easy matter to keep our ar-

mies in the field without causing suffering among the people till the harvests are gathered next autumn. From that time we shall be entirely dependent on those harvests, and that they may be rendered adequate to our wants I unhesitatingly recommend the adoption of the third plan suggested by Gen. Bragg.

Let the emergency be urged upon the President, while there is yet time to save ourselves.

Your obedient servant,
L. B. NORTHPROP,
Commissary-General, C. S. E.

Three causes operated during the year to distress the people for provisions: the desolation by war of some of the most productive portions of the country, and the reduction of the number of farmers by conscription; the difficulty of transportation thereby equalizing the production; and the absence of any proper medium of exchange to induce the farmers and planters to exchange their produce. The first and severest sufferers under these circumstances were those inhabitants of cities and towns who were dependent on wages, and those who composed the families of soldiers in the army. Early in the spring, the dissatisfaction which existed broke out in open tumults. At Salisbury, North Carolina, a body of soldiers' wives, on March 19th, assembled to make an attack upon a storehouse where flour was deposited. On the 25th, a similar occurrence took place at Raleigh, in the same State. On the 2d of April, a riot broke out in Richmond, the object of which was to obtain food. Another occurred in Mobile, Alabama, about the 15th of April. (*See ALABAMA.*) In other places similar disturbances took place. In all the cases women were the actors. (*See RIOTS.*)

These public disturbances soon ceased with the advance of the season. By the military operations which followed, the supply of cattle from Texas was cut off, and also the produce from Middle and Eastern Tennessee. The crops during the summer were represented to be good, but as the latter part of the year approached, the apprehensions of a scarcity were manifest. It was said, "the coming winter will be one of unusual trials." In October the following facts occurred at Richmond. One firm sent one hundred barrels of flour to be sold at \$27, while the price in the stores was from \$65 to \$75, and promised to the city all the flour on hand and all the tolls they might receive at Government prices. Another firm offered to sell all the flour sent for consumers without any charge for commissions. Another offered to grind all the wheat purchased by the city, at the cost of labor. The city of Richmond established a Board of Supply to purchase articles of necessity to be sold to the poor at cost. Petersburg did the same, and the Secretary of War instructed the officers of the Government to facilitate the labors of these committees. All the churches and civic societies undertook to support their own poor. One firm, after strenuous efforts for several days, were unable to purchase a lot of flour for the accommodation of their customers, and concluded that the farmers were prevented

from sending in their wheat because they were required to sell it at five dollars per bushel. That there was an abundance in the country, and to spare, no one doubted. On the 29th of October, beef was quoted in Richmond at a dollar to a dollar and a half per pound. The butchers said they were unable to get cattle, and might be compelled to close their stalls. By an arrangement between the butchers and the Government, it ought to have sold at sixty-five to seventy cents per pound. The newspaper press of Richmond said: "By a very decided vote the consumers of Richmond have agreed to pay the market price for everything. But if nothing is brought to market, and the people are made to suffer for food and fuel, when both are abundant, then it is very certain that force will secure what funds cannot. Consumers have done their duty; producers must do theirs." The agents of the city of Richmond sent to Louisa and the adjoining counties reported that "the farmers had nothing to sell." It was said that graziers would not bring their cattle to the city to be seized, if they did not sell to the butchers at Government prices. As an illustration of the operation of the "maximum" (price fixed), considerable slaughtered beef was received by some of the butchers. Slaughtered beef was exempt from impressment. It was said, on November 2d:

The speculators are now masters of the situation in regard to the prices of flour—a barrel of which, of any kind, at any price, is next to impossible to obtain. The hoarders should be made to come to terms—that is, to put their stores in the market.

Beef is in great abundance in the Piedmont country, we learn, and also in the upper valley, and sells at from thirty-five to fifty-six cents on the hoof. If the impressing officers will hold off their hands, we need have no fears for the coming winter.

At an early hour on Saturday morning the meat supplied at the city market gave out, and numerous families in consequence had to dine off Grahamite dinners. So long as beef is impressed for the benefit of twelve thousand Yankee prisoners, this condition of the city markets may be expected to continue.

The condition of the supplies in Charleston is thus described:

Since the necessities of life have reached the very exorbitant rates which they now command, our city fathers have been most zealously laboring for the benefit of the citizens at large, and with what success the thousands who are now daily supplied with flour, rice, &c., at less than half the current market prices, can gratefully testify. The action of the council in this matter, as well as for the supply of fuel, has tended very materially to check the inflation of prices, which, but for this course, would be much higher. Yesterday afternoon one hundred and fifty cords of wood were distributed in quarter cord lots to six hundred families, at the rate of twelve dollars per cord.

It was reported that in Southeastern Alabama, and Southwestern Georgia, fifty per cent. more of hogs had been raised than at any previous season of the year. The crops of wheat gathered in those sections were unusually large. In North Carolina the agents of the city of Petersburg were quite successful in procuring supplies. It was asserted that either North or South Carolina, Georgia, or Alabama, could

furnish a sufficient supply for the population of Richmond.

The report of the Richmond market on the 6th of November, was as follows:

There is no wheat in market, but we have been informed that sales of small quantities have been made during the week at \$10. With an open market, a higher figure would no doubt be reached until a fair supply could be thrown in. The injudicious and indiscriminate system of impressment by the Government, through impressing agents who have no practical knowledge of the wants of the army or the necessities of the people, has made the supply of bread for those outside the army a question for serious consideration, and if not speedily remedied will make starvation a more than probable event.

Within two weeks flour has jumped from \$40 to \$75 per barrel, and we have even heard of sales at \$100. Some are ready to attribute this unprecedented advance solely to speculation, but this is a mistake. The flour is not in the market, and people are beginning to learn that an actual scarcity of the staff of life stares them in the face. We do not mean an actual scarcity in the country, but a scarcity in the market, caused by the starvation plan of impressment by the Government.

Beardless and senseless boys, who do not know how many bushels of wheat it requires to make a barrel of flour, are sent through the country with authority to impress supplies for the army, and, without knowing what is needed, they serve written notices upon the farmers that their whole crops are impressed, and that they must not send one bushel of grain to the market. The farmer believes that the necessities of the Government require all that he has, feels that he is deprived of his interest in his grain, and it is left to sprout and spoil in stacks, or mould and mildew in granaries. This is one reason, and the chief one, too, why we have not flour in the Richmond market. The same system is pursued, and the same starvation plan adhered to. Corn was yesterday selling at \$14 50 per bushel, and scarce at that.

Country Produce and Vegetables.—Bacon, hog-round, \$2 50 to \$3; lard, \$2 10; butter, \$3 75 to \$4; eggs, \$2; Irish potatoes, \$10 to \$12 per bushel; sweet do., \$12 to \$15; tallow candles, \$3 50 to \$3 75; salt, 45c. per lb.

Groceries.—Coffee, \$9 50 to \$10; sugar: common brown, \$2 75 to \$3; crushed do., \$5; sorghum molasses, from \$12 to \$15 per gallon; rice, 33c. per lb. by the tierce.

Liquors.—Whiskey, \$40 to \$50 per gallon, according to quality; apple brandy, \$34 to \$36.

In the city markets there has been a slight advance in nearly all the articles offered for sale. Fresh meats are worth from \$1 25 to \$1 50 for beef and mutton, and \$2 for pork; chickens, \$6 to \$8 per pair; turkeys, \$12 to \$15 apiece; ducks, \$7 to \$8 per pair; raccoon, \$10 apiece; opossum, from \$2 50 to \$5, according to size; rabbits, \$1 50 to \$2; squirrels, \$1; fish: small alewives, \$2 per bunch of four; catfish, \$1 50 to \$2 per bunch of four; butter, \$5 per pound; sweet potatoes, \$2 50 per half peck; Irish potatoes, \$2 per half peck; turnips, \$2 per peck; cabbage, 75c. to \$1 25 per head.

Leather.—Sole leather, \$5 50 to \$6; harness do., \$5 50 to \$6; upper do., \$6 50 to \$7. Hides are quoted at \$1 for dry; \$1 for salted green, and 60c. for green.

The cotton accumulated by the Government amounted in August to five hundred thousand bales. This cotton was principally in the States of Georgia and Alabama, and some also in the eastern part of Mississippi, Northwestern Louisiana, and Texas, and was stored on the plantations of the planters from whom it was purchased, in sheds or warehouses three hundred feet from any other buildings, and in all cases the planters agreed with the Government to

take the same care of the cotton as if it still belonged to them, and to deliver it to the order of the Government when wanted. The capture of all the seaports would not endanger the loss of a pound, as there were no stocks of cotton at any of them, nor were there any considerable stocks of cotton at any one place in the interior, care having been taken by the Confederate as well as State Governments, that no cotton should be stored at any point within five miles of a railroad station or navigable stream. That portion of the crop of 1861 which had been brought to the various interior depots, had been taken back to the plantations by special order of the State Governments. This cotton would be delivered to any holder of the bonds on demand, as provided for in the fourth article of the contract. In the States of Alabama and Mississippi, the cotton had been sampled, weighed, marked, and invoiced, and the agents of the bondholders could examine the samples at the offices of the chief agents of the loan in the different States, and take their orders on the planters for the delivery of the cotton without trouble or expense. The cotton obtained under this loan was not subject to any tax or duty, except the export duty of one eighth of a cent per pound, existing at the date of the contract.

The purchasing agent of the Government issued a circular on the 25th of July, announcing the policy of the Government as follows:

The policy of the Government is, that the same course be pursued with regard to public or private cotton, viz.: apply to it the torch whenever in imminent and manifest danger of falling into the hands of the enemy, but only in such cases. In presence of a mere raid, cotton should not be burnt. On the other hand, where military and permanent occupancy is likely to be had, it is of the last importance that cotton should not be the trophy of the enemy.

Notwithstanding the general stringency of the blockade, many trips were made by vessels to Charleston and Wilmington during the early part of the year, with great profit to the owners. The officers of the Government owned many of these vessels. A large number, however, were captured.

The relations of the Confederate States with foreign nations underwent no favorable change during the year. England and France steadily declined to treat with them as independent States. Their views were approved by all the other States of Europe. It finally became evident that the simple recognition, not accompanied or followed by anything in the shape of intervention, would be fruitless. The successes of the North also were such as to create the conviction in Europe that the time for declaring the seceded States to have established their independence had not yet arrived. Yet, in England, the Confederate States have enjoyed the sympathy of an active portion of the people, who were led to believe that the struggle was really a war of independence. Nor was this all; for they notoriously received assistance from individuals in that country, which could

not have been tolerated by the law without giving to the United States a ground for complaint, and which, though not so tolerated and furnished with the utmost secrecy, brought the United States and England to the verge of war. It appeared by despatches of the Confederate Government, which were intercepted near the beginning of the year, that it had contracted for six ironclad steamers, combining the capacities of freighting and fighting ships, to be constructed in England, and to be paid for with cotton.

On the 5th of June, President Davis addressed a letter to the British consul, Moore, at Richmond, revoking his exequatur. The reason given for this was, that Moore "assumed to act as consul for a place other than the city of Richmond, and a State other than the State of Virginia, and was thereupon, on the 20th day of February, 1863, requested by the Secretary of State to submit to the Department of State his consular commission, as well as any other authority he may have received to act in behalf of the Government of her Britannic Majesty before further correspondence could be held with him as her Majesty's consul at the port of Richmond; and whereas the said George Moore has lately, without acceding to said request, entered into correspondence, as her Majesty's consul, with the Secretary of War of these Confederate States, thereby disregarding the legitimate authority of this Government."

Subsequently, Mr. Fullerton, the British consul at Savannah, was dismissed, and all the other British consuls. In a letter to Mr. Fullerton, Mr. Benjamin, Secretary of State, thus explains the ground for the action of the Government:

It thus appears that the Consular Agents of the British Government have been instructed not to confine themselves to an appeal for redress, either to courts of justice or to this Government, whenever they may conceive that grounds exist for complaint against the Confederate authorities in their treatment of British subjects (an appeal which has in no case been made without receiving just consideration), but that they assume the power of determining for themselves whether enlisted soldiers of the Confederacy are properly bound to its service; that they even arrogate the right to interfere directly with the execution of the Confederate laws, and to advise soldiers of the Confederate armies to throw down their arms in the face of the enemy.

This assumption of jurisdiction by foreign officials within the territory of the Confederacy, and this encroachment on its sovereignty, cannot be tolerated for a moment; and the President has no hesitation in directing that all Consuls and Consular Agents of the British Government be notified that they can no longer be permitted to exercise their functions, or even to reside within the limits of the Confederacy.

It was deemed proper to explain this proceeding to the Emperor of France, and in a letter to Mr. Slidell, October 8th, Mr. Benjamin says:

The exercise of the *droit de renvoi* is too harsh, however, to be resorted to without justifiable cause, and it is proper that you should have it in your power to explain the grounds on which the President has been compelled to enforce it. Lest also the Government of his Imperial Majesty should be misled into the

error of supposing that the rights of French citizens are in any manner involved in the action of the President, which has been rendered necessary by the reprehensible conduct of the British Consular Agents, you are requested to take an early occasion for giving such explanation to M. Drouyn de l'Huys as will obviate all risk of misapprehension.

In August, Mr. Mason received instructions to withdraw from England. He had been sent to that country to endeavor to obtain the recognition of the Confederacy by Great Britain, and to act as minister upon such recognition. In the order of recall to him, Mr. Benjamin said:

The President believes that the Government of her Majesty has determined to decline the overtures made through you for establishing, by treaty, friendly relations between the two Governments, and entertains no intention of receiving you as the accredited minister of this Government near the British court. Under these circumstances, your continued residence in London is neither conducive to the interest, nor consistent with the dignity, of this Government.

He retired to France, but subsequently returned to England as a private citizen. In a letter to Mr. Lamar, commissioner to St. Petersburg, June 15th, Mr. Benjamin says:

It has been suggested to this Government, from a source of unquestionable authenticity, that, after the recognition of our independence by the European Powers, an expectation is generally entertained by them that in our treaties of amity and commerce a clause will be introduced making stipulations against the African slave trade. It is even thought that neutral Powers may be inclined to insist upon the insertion of such a clause as *a sine qua non*.

He then proceeds to state the principles upon which the Confederacy is organized, and says:

Moreover, any attempt on the part of the treaty-making power of this Government to prohibit the African slave trade, in addition to insuperable objections above suggested, would leave open the implication that the same power has the authority to permit such introduction. No such implication can be sanctioned by us. This Government unequivocally and absolutely denies its possession of any power whatever over the subject, and cannot entertain any proposition in relation to it.

(See PUBLIC DOCUMENTS, MESSAGES TO CONFEDERATE CONGRESS.)

The Proclamation of Emancipation to all persons held as slaves in certain States and Districts, issued by President Lincoln, on January 1st, 1863, caused great excitement in the Southern States. It stated that "the Executive Government of the United States, including the military and naval authorities thereof, will recognize and maintain the freedom of such persons;" also, "such persons will be received into the armed service of the United States," &c. Its immediate effect was expected to arise under these clauses. The Confederate Congress took action at once on the subject. It was at first contemplated to make slaves of all free negroes found with arms in their hands; to kill all slaves found armed, and to hand over to the State authorities all their officers, to be dealt with according to the laws of the States relative to persons exciting insurrection. Severe measures were proposed in the Confederate

Congress. These, however, were not adopted, and the subject was referred to the discretion of the President. Whether any extreme measures were inflicted upon these soldiers or their officers during the year, is not officially known. It was finally considered that, under the law of nations, a belligerent could employ against his antagonist any persons whom he could obtain, and, therefore, free negroes captured as Federal soldiers were entitled to be treated as prisoners of war. On the 23d of April an "Address to Christians throughout the World" was issued at Richmond, signed by ninety-six clergymen of all denominations. After asserting that "the Union cannot be restored," and that "the Confederate Government is a fixed fact, the address proceeds to say:

The recent Proclamation of the President of the United States, seeking the emancipation of the slaves of the South, is, in our judgment, a suitable occasion for solemn protest on the part of the people of God throughout the world.

The address charges President Lincoln with intending to produce a general insurrection of the slaves, and such an insurrection "would make it absolutely necessary for the public safety that the slaves be slaughtered, and he who would write the history of that event—would record the darkest chapter of human woe yet written." The Proclamation, however, liberated no slaves except such as could come within the lines of the Federal armies. The political aspect of the Proclamation was discussed at some length in the Message to the Confederate Congress in January. (*See PUBLIC DOCUMENTS.*)

The difficulties which had arisen relative to the exchange of prisoners (*see PRISONERS*), and the threats of retaliation for some occurrences on each side, which were regarded by the other as unjustifiable acts of cruelty, was made the ostensible occasion for a mission by Vice-President Stephens to Washington. The following correspondence embraces all the details on the subject:

RICHMOND, July 2d, 1863.

Hon. A. H. Stephens, Richmond, Va.:

SIR: Having accepted your patriotic offer to proceed as a military commissioner, under flag of truce, to Washington, you will receive herewith your letter of authority to the commander-in-chief of the army and navy of the United States.

This letter is signed by me, as commander-in-chief of the Confederate land and navy forces.

You will perceive from the terms of the letter that it is so worded as to avoid any political difficulties in its reception. Intended exclusively as one of those communications between belligerents which public law recognizes as necessary and proper between hostile forces, care has been taken to give no pretext for refusing to receive it on the ground that it would involve a tacit recognition of the independence of the Confederacy.

Your mission is simply one of humanity, and has no political aspect.

If objection is made to receiving your letter, on the ground that it is not addressed to Abraham Lincoln, as President, instead of Commander-in-Chief, &c., then you will present the duplicate letter, which is addressed to him, as President, and signed by me, as President. This latter objection may be made on the ground

that I am not recognized to be President of the Confederacy. In this event, you will decline any further attempt to confer on the subject of your mission, as such conference is admissible only on the footing of perfect equality.

My recent interviews with you have put you so fully in possession of my views that it is scarcely necessary to give you any detailed instructions, even were I, at this moment, well enough to attempt it.

My whole purpose is, in one word, to place this war on the footing of such as are waged by civilized people in modern times; and to divest it of the savage character which has been impressed on it by our enemies, in spite of all our efforts and protests. War is full enough of unavoidable horrors, under all its aspects, to justify, and even to demand of, any Christian rulers who may be unhappily engaged in carrying it on, to seek to restrict its calamities, and to divest it of all unnecessary severities. You will endeavor to establish the cartel for the exchange of prisoners on such a basis as to avoid the constant difficulties and complaints which arise, and to prevent, for the future, what we deem the unfair conduct of our enemies in evading the delivery of the prisoners who fall into their hands; in retarding it by sending them on circuitous routes, and by detaining them, sometimes for months, in camps and in prisons, and in persisting in taking captives non-combatants.

Your attention is also called to the unheard-of conduct of Federal officers in driving from their homes entire communities of women and children, as well as of men, whom they find in districts occupied by their troops, for no other reason than because these unfortunates are faithful to the allegiance due to their States and refuse to take an oath of fidelity to their enemies.

The putting to death of unarmed prisoners has been a ground of just complaint in more than one instance, and the recent executions of officers of our army in Kentucky, for the sole cause that they were engaged in recruiting service in a State which is claimed as still one of the United States, but is also claimed by us one of the Confederate States, must be repressed by retaliation if not unconditionally abandoned, because it would justify the like execution in every other State of the Confederacy, and the practice is barbarous, uselessly cruel, and can only lead to the slaughter of prisoners on both sides—a result too horrible to contemplate without making every effort to avoid it.

On these and all kindred subjects you will consider your authority full and ample to make such arrangements as will temper the present cruel character of the contest, and full confidence is placed in your judgment, patriotism, and discretion, that while carrying out the objects of your mission, you will take care that the equal rights of the Confederacy be always preserved.

Very respectfully,
(Signed)

JEFFERSON DAVIS.

RICHMOND, 8th July, 1863.

His Excellency, Jefferson Davis:

SIR: Under the authority and instructions of your letter to me of the 2d instant, I proceeded on the mission therein assigned, without delay. The steamer *Torpedo*, commanded by Lieut. Hunter Davidson, of the navy, was put in readiness as soon as possible, by order of the Secretary of the Navy, and fendered for the service. At noon, on the 3d, she started down James river, hoisting and bearing a flag of truce after passing City Point. The next day (the 4th) at about one o'clock P.M., when within a few miles of Newport News, we were met by a small boat of the enemy, carrying two guns, which also raised a white flag before approaching us. The officer in command informed Lieut. Davidson that he had orders from Admiral Lee, on board the United States flagship *Minnesota*, lying below, and then in view, not to allow any boat or vessel to pass the point near which he was stationed without his permission. By this officer I sent to Admiral Lee a note stating my objects and wishes, a copy of which is hereto annexed, marked A.

I also sent to the admiral, to be forwarded, another

in the same language addressed to the officer in command of the United States forces at Fort Monroe. The gunboat proceeded immediately to the Minnesota, with these despatches, while the Torpedo remained at anchor. Between 3 and 4 o'clock P.M., another boat came up to us, bearing the admiral's answer, which is hereunto annexed, marked B.

We remained at or about this point in the river until the 6th inst., when, having heard nothing further from the admiral, at 12 o'clock M., on that day, I directed Lieut. Davidson again to speak the gunboat on guard, and to hand to the officer on board another note to his admiral. This was done. A copy of the note is appended, marked C. At half past two o'clock P.M., two boats approached us from below, one bearing an answer from the admiral to my note to him of the 4th. This answer is annexed, marked D. The other boat bore the answer of Lieut. Col. W. H. Ludlow to my note of the 4th, addressed to the officer in command at Fort Monroe. A copy of this is annexed, marked E. Lieut. Col. Ludlow also came up in person in the boat that brought his answer to me, and conferred with Col. Ould, on board the Torpedo, upon some matters he desired to see him about in connection with the exchange of prisoners. From the papers appended, embracing the correspondence referred to, it will be seen that the mission failed from the refusal of the enemy to receive or entertain it, holding the proposition for such a conference "inadmissible."

The influences and views that led to this determination after so long a consideration of the subject, must be left to conjecture. The reason assigned for the refusal of the United States Secretary of War, to wit: that "the customary agents and channels" are considered adequate for all needful military "communications and conferences," to one acquainted with the facts, seems not only unsatisfactory but very singular and unaccountable; for it is certainly known to him that these very agents, to whom he evidently alludes, heretofore agreed upon in a former conference in reference to the exchange of prisoners (one of the subjects embraced in your letter to me), are now, and have been for some time, distinctly at issue on several important points. The existing cartel, owing to these disagreements, is virtually suspended, so far as the exchange of prisoners on either side is concerned. Notices of retaliation have been given on both sides.

The effort, therefore, for the very many and cogent reasons set forth in your letter of instructions to me, to see if these differences could not be removed, and if a clear understanding between the parties as to the general conduct of the war could not be arrived at before this extreme measure should be resorted to by either party, was no less in accordance with the dictates of humanity than in strict conformity with the usages of belligerents in modern times. Deeply impressed as I was with these views and feelings, in undertaking the mission, and asking the conference, I can but express my profound regret at the result of the effort made to obtain it; and I can but entertain the belief that, if the conference sought had been granted, mutual good could have been effected by it; and if this war, so unnatural, so unjust, so unchristian, and so inconsistent with every fundamental principle of American constitutional liberty, "must needs" continue to be waged against us, that at least some of its severer horrors, which now so eminently threaten, might have been avoided.

Very respectfully,

ALEXANDER H. STEPHENS.

[A]

C. S. STEAMER TORPEDO, ON JAMES RIVER, }
July 4th, 1863. }

SIR: As Military Commissioner, I am the bearer of a communication in writing from Jefferson Davis, Commander-in-Chief of the land and naval forces of the Confederate States, to Abraham Lincoln, Commander-in-Chief of the land and naval forces of the United States. Hon. Robert Ould, Confederate States Agent of Exchange, accompanies me as secretary.

For the purpose of delivering the communication in

person, and conferring upon the subject to which it relates, I desire to proceed directly to Washington city, in the steamer Torpedo commanded by Lieut. Hunter Davidson, of the Confederate States navy, no person being on board but the Hon. Mr. Ould, myself, and the boat's officers and crew.

Yours, most respectfully,

ALEXANDER H. STEPHENS.

To Rear Admiral S. P. LEE, U. S. Flagship Minnesota.

[B]

U. S. FLAGSHIP MINNESOTA, OFF NEWPORT }
NEWS, Va., July 4th, 1863, 2.30 P.M. }

SIR: Your communication of this date is received. I will report by telegraph your arrival and object, and inform you of the result without delay.

Very respectfully yours,

S. P. LEE, A. R. Admiral,

Commanding North Atlantic Blockading Squadron.
Hon. ALEX. H. STEPHENS, Military Commissioner.

[C]

C. S. STEAMER TORPEDO, OFF NEWPORT NEWS, Va., }
12 o'clock M., July 6th, 1863. }

Acting R. Admiral S. P. Lee, U. S. Flagship Minnesota:

SIR: Will Admiral Lee inform me, if he can, how long it will probably be before an answer will be made to my note of the 4th instant?

Will he please, also, forward the accompanying letter from Hon. Mr. Ould, Confederate Agent of Exchange, to Lieutenant-Colonel Wm. H. Ludlow, United States Agent of Exchange?

Most respectfully,

ALEXANDER H. STEPHENS.

[D]

U. S. FLAGSHIP MINNESOTA, OFF NEWPORT NEWS, Va., }
July 6th, 1863. }

SIR: The request contained in your communication of the 4th instant is considered inadmissible.

The customary agents and channels are adequate for all needful military communications and conferences between the United States forces and the insurgents.

Very respectfully yours,

S. P. LEE, A. R. Admiral,

Commanding N. A. Blockading Squadron.
Hon. ALEX. H. STEPHENS.

[F]

HEADQUARTERS DEPARTMENT OF VA., SEVENTH }
ARMY CORPS, FORT MONROE, July 6th, 1863. }

Hon. Alex. H. Stephens:

SIR: In the temporary absence of Major-General John A. Dix, commanding this department, I have the honor to acknowledge the receipt of your communication of the 4th instant, addressed to the officer commanding United States forces, Fort Monroe, and in the execution of instructions from the Secretary of War, to inform you that the request therein contained is deemed inadmissible.

The customary agents and channels are considered adequate for all needful military communications and conferences.

I am, very respectfully, your obedient servant,

WM. H. LUDLOW,

Lieut.-Col. and Assistant Inspector-General,
Seventh Army Corps,
Agent for Exchange of Prisoners.

At the beginning of the year the military power of the Confederacy was regarded by its citizens as able to cope very strongly with its adversary. It had been pressed back at some points, and received some severe blows, but it was very far from being either shattered or broken. The Mississippi river was firmly closed. The advance in Tennessee was firmly checked, and no progress was made by Gen. Hooker in Virginia. On all sides a hopeful

aspect was presented until the crisis came at once and paralyzed the military strength in the field. The disaster at Gettysburg, the loss of Vicksburg and Port Hudson, the falling back of Gen. Bragg, and the success of Gen. Gillmore at Charleston, demonstrated that the military power in the field was broken. Unless new armies could be created or the reduced ranks refilled, an ultimate failure was certain. The views relative to the capture of Vicksburg were thus expressed:

If it be fated that, in spite of all human valor and devotion can do, Vicksburg and its defenders should become the prey of the enemy, then, indeed, will come the tug of war. Then also will come the political crisis. Whatever of imbecility and faint-heartedness and downright latent toryism and treason exists in the Confederacy will at once receive a new accession of weakness; many will again begin to cry out for an "honorable peace," as they call it, by means of submission.

Thus, Vicksburg is at this moment a point not only of strategic but also of political importance. While our flag flies defiant over the great river, no party of compromise can venture to raise its head; no man will dare to breathe one word of "reconstruction," in whole or in part. All will be good Confederates. The cause which is supposed to be failing and sinking is the one which is likely to be abandoned by the cowards and betrayed by the traitors. To the cause that prospers we are always as true as steel.

In a speech before the Mississippi Legislature President Davis said: "Vicksburg and Port Hudson are the real points of attack. Every effort will be made to capture these places, with the object of forcing the navigation of the Mississippi, of cutting off our communications with the trans-Mississippi Department, and of severing the western from the eastern portion of the Confederacy. Let, then, all who have at heart the safety of the country go without delay to Vicksburg and Port Hudson."

The division of the Confederacy produced by the loss of the Mississippi river, is shown by the following figures of the area on the west and east sides:

	Square miles.
Area of Arkansas.....	52,198
Area of Louisiana.....	41,255
Area of Texas.....	237,504
	330,957

That is territory cut off. The following is what remains.

Alabama.....	50,722
Georgia.....	58,000
Mississippi.....	47,156
South Carolina.....	29,385
North Carolina (four fifths).....	40,600
Virginia (two thirds).....	41,000
Tennessee (one half).....	22,800
Florida (two thirds).....	40,000
	329,663

In this extremity of the Government, a levy *en masse* of the fighting population was ordered. It was plain that, unless this order was complied with, the Confederacy would not be able to contend much longer in the field, except in Virginia and Charleston, with the forces and material of the North. In this cri-

sis President Davis ordered a day of fasting, humiliation, and prayer to Almighty God to be observed. At the same time the North failed to push these advantages vigorously, and the campaigns closed for a time both east and west. The response of the Confederacy to the levy of all between eighteen and forty-five years of age was now watched with great interest. Meanwhile troops were sent from Virginia to Gen. Bragg, in Tennessee, and also from Gen. Meade, on the Federal side, and the result of the operations was another severe blow to the Confederacy in the loss of East Tennessee. Its effect was thus described:

By the falling back of Gen. Bragg to the Georgia line, we lost the use of all the extensive mines and iron works of Tennessee and Northern Georgia, which left us but the almost untried ore fields of Alabama and North Carolina; the Western Virginia works being lost to us early in the war. Alabama, though rich in minerals of all kinds, had lacked the necessary energy and enterprise to develop its vast wealth. In the selection of W. R. Hunt to take control of those important interests, the Department at Richmond was fortunate in securing the services of one of the most intelligent and energetic officers in our service. By his energy and perseverance, Alabama and Georgia mines had been made to meet all the demands of our armies and fortifications, including Charleston. In fact, it is said and believed by many that the city of Charleston would have been in the hands of the Yankees long since, but for the untiring labors of Major Hunt in furnishing the founderies and arsenals with ample material.

The lack of military supplies created great embarrassment to the operation of the armies. This was increased whenever the blockade was most stringent. Immense numbers of Southern soldiers were clothed in the Federal uniforms which had been captured. At the close of the year there were three thousand barefooted men in Gen. Longstreet's corps. Blankets and clothing were asked for with piteous appeals from Gen. Johnston's army, which had been commanded by Gen. Bragg until December. The army of Gen. Lee was likewise destitute of blankets. It was said: "Day by day the clothes made for the soldiers exhibit less wool and more cotton." Supplies could no longer be counted upon from abroad. The prospect for obtaining the raw materials was thus estimated:

Any one who buys beef has discovered that the quarters and sides are rapidly diminishing in size. Younger cattle are being slaughtered every year. It is now thought that we will have to fall back upon milch cows. As cattle diminish, mutton must be substituted, and hence the sources both of leather and wool may be expected to decrease every month. Thus the prospect at home does not encourage the belief that we will be able to clothe armies larger than those which are now shivering in nakedness.

The prospect for the subsistence of the army was thus represented:

Very little bacon is left, beef is going, and mutton will hardly feed great armies, even if the supply were double what it is. It is said that Gen. Lee, during his late visit to this city, exclaimed that the citizens had no right to indulge themselves while the soldiers were living on a quarter of a pound of meat per day. The hue and cry against the starvation of Yankee prison-

ers had scarcely subsided, and the excuse that three of our largest hospitals were forced to do without meat for a day or two at a time had not been forgotten.

East Tennessee, on which we relied mainly for supplies, has fallen into the hands of the enemy. The clamor about impressments and the stoppage of supplies on their way to market, still rings in the ears of the Government. The standing crops in entire counties have been impressed at one fell swoop, under the plea that in no other manner could a sufficient supply for the army be certainly secured. Under this system, and because of a real scarcity as well, flour of a low grade is selling this day in the Confederate capital at \$120 a barrel. It appears, therefore, that the prospect of feeding the army already in the field, much less one twice or thrice its size, is not encouraging.

The deficiency of labor was such as to endanger the supply of provisions. The slave required the supervision of the white man at all times, and especially when an unusual amount of work was demanded of him. Women, lads, and old men cannot make him work effectually. Whereas the fears of an insurrection, arising from the absence of the greater portion of the white able-bodied men, produced a leniency and indulgence among the farmers, which encouraged the idleness of the slave, and resulted in a yearly decrease of the crops. The scarcity of horses and forage was such that the Government seized both.

Enormous losses of muskets and cannon took place at Vicksburg, at Chattanooga, and Gettysburg, so that there was left a bare sufficiency to supply the wants, and to make good the annual wear and destruction, without furnishing any to new troops. The supply of ammunition often fell short during the year, and when Gen. Lee was in Pennsylvania, Richmond was so bare that cartridges had to be taken from a portion of the city troops and sent to him.

During the year no signs of yielding up were exhibited by the Confederate Government, or by the Governments of any of the seceded States. On the question of submission to the Federal Government, no organized body manifested any assent, but on the contrary the most determined opposition. Here and there some views were uttered in favor of peace. The following letter from Mr. T. Butler King, formerly in the Federal Congress from Georgia, dated June 26th, appeared; but its authenticity is disputed.

But war must end in peace; and sooner or later both parties must agree to terms upon which they will lay aside their arms. The events of the past two years should be sufficient to convince every reasonable man, both North and South, that it is impossible for the Federal Government to subjugate our people; and statesmen of the South cannot fail to perceive that the Federal Government cannot abandon the war, except on a restoration of the Union, without danger of the further dismemberment of the nation.

Then, unless both parties can be influenced by the spirit of compromise and concession, "when," in the language of one of our distinguished senators, "is this struggle to end?" No man can answer as to the years; but he may safely answer, "Not until both parties are exhausted and ruined—not until the North is reduced to a condition worse than it would have been if she had quietly acquiesced in our separation, and not until

the South is worse off than she would have been by remaining in the Union under an abolition administration of the Government."

These considerations would lead me to favor any terms of peace that the South could, with a proper regard for her interests and honor, accept.

The energy, skill, and blood of our fathers helped to achieve and establish the independence of the United States, and our own enterprise, treasure, and statesmen have helped to make the nation one of the greatest and most powerful on the globe. We have the same right to enjoy the power and grandeur of that nation as the people of the North. Our States cut the Gordian knot, retired from the Union, and formed a new Government, because, and only because, our rights in the Union, and under the Constitution we have helped to establish, were denied us. If the people of the North would now concede our rights, and the Federal Government secure them to us, the danger with which we were threatened by remaining in the Union, and the objection we had to it, would be removed, and we might with honor and advantage return to it.

The Federal Government has proceeded so far with the war that these are the only terms of peace to which we could reasonably expect it to agree; and I regret to say that I have no expectation that such terms will be proposed, or would be accepted by that Government while the Presidential chair is occupied by the present abolition incumbent. But if, fortunately, during his administration, or within a reasonable time afterward, such terms should be offered, I am free to say that I should prefer their acceptance by our people to the continuance of the war, which must result in the desolation of our country, and the ruin of both North and South. A peace on such terms would be eminently honorable to both parties—neither could claim the victory—while the strength and valor each has exhibited would command the respect and admiration of the other.

To this extent I am a "reconstructionist." But it must not be understood that I would prefer reconstruction and peace on the terms indicated to a speedy peace recognizing our independence—if that were possible; nor must it be understood that I doubt our ability to achieve our independence if the conflict is continued. But I believe it would be better for ourselves, for our posterity, and for mankind, that we should accept peace with our rights secured within the Union, than to continue the war many years, giving oceans of blood, millions of treasure, and ruining our country, for independence.

On the 31st of July, a writer of distinction in North Carolina, reviewing in the public press the whole subject of the war, closed as follows:

The one great demand of the people of this part of the State is peace—peace upon any terms that will not enslave and degrade us. They may perhaps prefer that the independence of the South should be acknowledged, but this they believe cannot now be obtained; nor, in viewing the situation of affairs, do they see much hope of it in the future. They naturally ask, "If, with no means of recruiting to any extent, we cannot hold our own against the armies which the Yankees now have in the field, how can we meet them with their three hundred thousand new levies which will soon be in readiness, while they can keep their army recruited to a great extent, if not up to its maximum number, from adventurers who are constantly arriving in their ports from every country in Europe?" But, if independence cannot be obtained, then they are for any terms that are honorable—any terms that do not degrade us. They would be willing to compromise upon the amendment to the Constitution proposed by Mr. Corwin, from the Committee of Twenty-six, perpetuating slavery in the States to which I have before alluded. But in what precise way overtures shall be made, or the movement inaugurated, I leave to wiser men and abler statesmen than myself to propose.

I would, however, suggest to the people to elect members to the next Congress who are in favor of an armistice of six months, and in the mean time of submitting all matters in dispute to a convention of delegates from all the States, North and South, the delegates to be elected by the people themselves, in such manner as may be agreed upon by the two parties. Others there are who desire that the people of North Carolina should be consulted in their sovereign capacity through a convention; that the Legislature should submit the question of "convention or no convention" to the people, as was done in February, 1861. Such a convention would undoubtedly speak the sentiments of the people of the State, citizens as well as soldiers, as all would be consulted. But I propose nothing definite, and only make these suggestions to bring the matter before the public. I would, however, most earnestly appeal to the friends of humanity throughout the State to use their utmost efforts to procure as speedily as possible an honorable peace. In the name of reason, of suffering humanity, and of the religion which we profess, would I appeal to the public men and statesmen of North Carolina, and especially to that eminent statesman who possesses in a greater degree than all others the confidence of the people of the State, and who has recently been elevated to a high place in the Confederate Government, to lend a helping hand and use their influence to bring about an honorable peace. And, lastly, I would appeal to the ministers and professors of our holy religion to pray constantly, without dictation of terms, to Almighty God for an honorable peace.

The military disasters which occurred about this time, and the apparent impotency of the Confederate military power, led to the conviction in many minds that independence was unattainable. The terms of peace upon a basis of reconstruction began to be discussed, and proceeded to much length in North Carolina. But as the friends of reconstruction could promise nothing from the Federal Government except submission and emancipation, and as they possessed the control of no political organization which could sustain their views, they seem to have become finally silent. Such persons as desired a return of the Federal Government were speechless, and kept their views unknown. Numbers took an oath of allegiance, and joined the Federal army in States from which the Confederate forces had been driven.

Vice-President Stephens, in a speech at Charlotte, North Carolina, on July 17th, thus opposed all views except those in favor of separation.

The enemy have already appropriated twenty-seven hundred millions of dollars and one million of men for our subjugation, and after two years' war had utterly failed, and if the war continued for two years longer, they would fail to accomplish our subjugation. So far they had not broken the shell of the Confederacy. In the Revolutionary war the British at one time had possession of North Carolina, South Carolina, and other States; they took Philadelphia, and dispersed Congress, and for a long time held almost complete sway in the Colonies—yet they did not conquer our forefathers. In the war of 1812, the British captured the capital of the nation, Washington City, and burnt it, yet they did not conquer us; and if we are true to ourselves now, true to our birthrights, the Yankee nation will utterly fail to subjugate us. Subjugation would be utter ruin and eternal death to Southern people, and all that they hold most dear. He exhorted the people to give the Government a cordial support, to frown down all croakers and grumblers, and

to remain united and fight to the bitter end for liberty and independence.

As for reconstruction, said Mr. Stephens, such a thing was impossible—such an idea must not be tolerated for an instant. Reconstruction would not end the war, but would produce a more horrible war than that in which we are now engaged. The only terms on which we can obtain permanent peace are final and complete separation from the North. Rather than submit to anything short of that, let us all resolve to die like men worthy of freedom.

In regard to foreign intervention, Mr. Stephens advised his hearers to build no hopes on that yet awhile. He did not believe that the leading foreign Powers ever intended that the North and South should be again united—they intended that the separation should be permanent, but they considered both sides too strong now, and did not deem it good policy on their part to interfere and put a stop to the war. Foreign nations see that the result of the war will be to establish a despotism at the North, and are therefore willing to allow it to continue a while longer.

Mr. Herschel V. Johnson, a candidate for the vice-presidency in 1860, on the same ticket with Senator Douglas, at the time he was elected senator to the Congress at Richmond by the Legislature of Georgia, said:

There is no step backward. All is now involved in the struggle that is dear to man—home, society, liberty, honor, everything—with the certainty of the most degraded fate that ever oppressed a people if we fail. It is not recorded in history that eight millions of united people resolved to be free and failed. We cannot yield if we would. Yield to the Federal authorities, never—to vassalage and subjugation! The bleaching bones of one hundred thousand gallant soldiers slain in battle would be clothed in tongues of fire to curse to everlasting infamy the man who whispers yield.

Many other examples might be presented to show that the views of those who held political power in the Confederate States now appeared as decided in favor of absolute independence as at any previous period. What other views existed in the minds of the people then were not expressed in language, nor by public meetings; hence the indications of them could only be found in the manner in which the measures of the Government were sustained. Dissatisfaction with many of its actions existed, such as the impressment of provisions, and the levy *en masse*, but its ability to enforce these measures showed its power still to control all the resources of the country for the object of independence. The feelings, however, with which the approach of the year 1864 was received by the authorities, are expressed in the following language:

The year 1864, the filling of whose circle will form another stage in the march of time, will also mark a most interesting and critical period in the fortunes of our Confederacy. To the timid the newborn year lowers gloomily. To the prudent there appears cause for anxious solicitude; while even heroism itself sees that the tug of war, the crisis of the struggle, is upon us, and that we must prepare ourselves for the tremendous shock. As when the skirmishers are driven in, and the distant cannonade is ended, two great armies rush to the death grapple, and wrestle for the victory, so now the progress of the war has brought us to that final stage in which decisive blows are to be given and received.

We cannot contemplate the coming of the next and fourth campaign of the pending war without solicitude. We shall be strongly pressed by the enemy. They are

making busy preparations. They are buying mercenaries for the fight as men buy sheep for the shambles. They are paying bounties, the half of which the world never heard of before. They are spending money with a reckless profusion that contrasts strangely with their native parsimony.

Our enemies, too, will commence the next campaign with some advantages of position which they did not have in the beginning of 1863. They will begin at Chattanooga instead of Nashville; at Vicksburg instead of Memphis. They come flushed also with wild hopes, and they are animated with increased arrogance.

It will be incumbent upon us during the current year to call out all our resources and put forth all our strength. We must make the most vigorous battle of which we are capable. Everything is at stake—property, honor, liberty, life itself; and a giant danger presses. "The Philistines be upon thee, Samson!"

If we thus act our part, the dangers which menace us will all be averted. The ship may be among the rocks, and the sound of the breakers may be heard, but a steady captain and brave and united crew shall bring her safely out of her peril. Our real danger lies not in the martial array the enemy may send against us, for, under the blessing of God, we have already shown ourselves able to withstand them; but the point of anxious solicitude is, are we all prepared and resolved to do our whole duty?

Do we appreciate the magnitude and the vital character of the crisis that is upon us? Are we all ready to make every sacrifice which the cause may require; to go into the ranks, if called for; to contribute our property; to be ready with our personal service, wherever wanted, and to count not our lives dear unto us if our country is to be served? Are we ready to respond, without murmuring, to the military laws which Congress shall judge the exigency to require? Are we prepared to hail the law which shall impose heavy taxes upon us to retrieve our currency and establish our finances?

Fellow citizens, if we are not ready for all this, we must become so. Such a spirit and resolve among us are the condition, as they will prove the guarantee, of our success. But we must win this victory among and over ourselves before we shall be ready to meet the enemy. We must be ready to risk all, and offer all, if we do not wish to lose all. Every man who is able to level a musket must be ready to shine in arms; if too old or infirm for the army, then as State guards, or home defenders, or reserves. Every producer must arouse his utmost energies to provide food and clothing for the soldiers and the people. All must be ready to renounce comforts or endure hardships without murmuring or complaint.

One gleam of peaceful light for a moment illuminated the dark scenes of 1863, which is thus described by the "New York Church Journal," in July:

About ten days ago we received, through some Church ladies, just arrived from the South through our lines, an earnest appeal from bishops and clergy there that we would, if possible, send down some two or three thousand prayer books, and a quantity of Church tracts, for use especially in the Southern army. Application was at once made, by the Rev. Dr. Dix, rector of Trinity church, to our Government, to know whether the books and tracts thus asked for would be passed through our lines; and the Government has promptly and kindly replied in the affirmative.

We cannot refrain from adding, that the bishops and clergy there, Bishop (Maj.-Gen.) Polk included, sent the kindest messages of undiminished love, as of old, to their brother churchmen at the North. Moreover, we are well assured that, even in the midst of the fearful struggles of war, the Church is steadily gaining ground all through the South. From every part of the Southern armies, as well as from every part of the Southern country, the demand for the services of Church clergy-

men is greater than can by any possibility be supplied.

At the same time there is an evident change going on in regard to the feeling with which the North is regarded. The fierce and fanatical hatred with which the war broke out, is steadily giving way to a nobler and better feeling; so that many of those who, two years ago, were ready to swear that they would never eat, or wear, or purchase anything that came from here, are now looking forward, with expectant interest, to the time when they may be able to resume their annual summer visits to the North, as in the days before the war began. No political message was brought us, of any sort or kind; it would not have been proper that any such should either have been sent or received. But it was said, that there is a growing conviction at the South that if ever the country does come together again in one, the Church and the churchmen will be at the very heart of the reunion.

CONFISCATION. The power of the Government to confiscate the property of the inhabitants of the insurgent States, early commanded the earnest attention of Congress and led to a full discussion of the extent of this power, the manner of its exercise, and the restrictions imposed by the Constitution. The results of the examination were the enactment by Congress of the act of August 6th, 1861, and of the act of July 17th, 1862. The distinctive features of these laws are, that the first provides for the confiscation of property actually used in aiding, abetting or promoting the measures of the Rebels, while the second frees the slaves and confiscates all other property of persons assisting, engaged with or giving aid or comfort to the Rebellion. By an order of the President under date of November 13th, 1862, and a subsequent one extending the directions of the first, the Attorney General was charged with the superintendence and direction of all proceedings under the two acts of Congress above referred to, in so far as concerned the seizure, prosecution, and condemnation of the estate, property, and effects coming under the operation of the same. Attorney General Bates on the 8th of January, 1863, issued "General instructions to District Attorneys and Marshals relative to proceedings under the acts of Congress for confiscation." These instructions provide generally that—

1st. All seizures are to be made by the Marshal under the written authority of the District Attorney.

2d. A true return thereof by the Marshal to the District Attorney.

3d. A record by the District Attorney of every order of seizure, and one by the Marshal of every return.

4th. That the District Attorney should exercise vigilance in executing the law and care to avoid hasty and improvident seizures.

5th. State laws directing seizures should be conformed to as nearly as may be, consistently with the objects of the acts of Congress.

6th. That property seized by the military officers may be received by the Marshal who shall make return thereof to the District Attorney.

7th. After seizure the District Attorney to

proceed in the proper court for the condemnation of the property seized.

In pursuance of these instructions, proceedings were commenced in several districts to enforce the provisions of both laws. In these proceedings the following questions arose:

(1st.) What is the legal status of the inhabitants of the Confederate States? (2d.) What is the duration of the forfeiture? (3d.) Is real estate included in the act of 1861? (4th.) Are the acts of 1861 and 1862 constitutional?

The relation of residents of seceding States to the Government.—In July, Judge Wylie of the Supreme Court of the District of Columbia, in rendering his decision in the matter of the property of Dr. A. S. P. Garnett, said:

The act of Congress did not, as was generally supposed, treat the inhabitants of the so-called Confederate States as traitors, but as alien enemies, and in that point of view, by the law of nations, their property of every description is liable to absolute forfeiture and alienation to the use of the Government. There is no distinction between personal property and real estate, nor did the Constitution, as was supposed, forbid the absolute forfeiture of real estate. But the joint resolution passed by Congress on the same day as the confiscation act, under the provision of which this property is sought to be confiscated, was a declaration by them that, in a spirit of kindness, they would confiscate the real estate of the rebel only during his lifetime. He was bound by that resolution, and would therefore condemn the real estate during the lifetime of the owner, and the personal property absolutely.

Judge Wylie referred to a large number of authorities, among them acts of the Legislatures of Maryland and Pennsylvania, confiscating absolutely the property of Americans who remained loyal to the British crown during the Revolution.

July 25th, 1863, an information was filed in the U. S. District Court for the Southern District of New York, praying the seizure and confiscation of a number of railroad shares, money, &c., as being owned by Leroy M. Wiley, "being an alien enemy of the United States." A paper subscribed by Bowdoin Larocque and Barlow, proctors, and Jeremiah Larocque, advocate, verified by the oath of Barlow, and purporting to be "the answer and claim of Leroy M. Wiley, of Eufala in the State of Alabama, to the above libel of information" was put on file in the case, proffering the averment of matters in bar and avoidance of the allegations contained in the information. A motion was made to strike out this claim, founded on an affidavit that Wiley had been since the breaking out of the existing rebellion absent from the Southern District of New York, residing in the State of Alabama. Judge Betts in the course of his decision of the motion says:

It cannot be permitted that any party, without having a lawful standing in court, shall intercept or meddle with the orderly action of the law in its due process if he be destitute of a capacity to act as a suitor before the court. The present motion proceeds upon that doctrine. The gist of the application by the libellants is that Leroy Wiley has no *persona standi* in a court of the United States in respect to claims, property, interests, or trusts of any description in suit or prosecution before that court, he being an alien enemy of the United States, and thus disqualified from being a vol-

unteer party in respect to civil suits before those tribunals resting upon contracts or legal liabilities, unless, perhaps, ransom bills of exchange for personal substance drawn by prisoners of war and held by alien enemies (1 Kent, 68.—2 Wildman, International Law, 274, 275) may be exceptions. No such privilege attends the demand of the claimant in this instance.

Wiley, by intervening and attempting to enforce a supposed title or lien in respect to the railroad shares or dividends, would become a party actor in the suit equally as if prominent in its inception. This, in a judicial sense, is the legal relation of both parties to the suit in actions *in rem*, as each side acts affirmatively in carrying on the processes and remedies imparted to them respectively by the action, and seeks positive adjudications in his favor in the disposal of effects and interests within the jurisdiction of the court.

The answer and claim interposed and placed on file in this suit, declares upon its face that the claimant "Leroy M. Wiley is of Eufala, in the State of Alabama," and that fact is also asserted and attested to in the test oath accompanying the claim when filed.

The court must take judicial notice that Alabama is an insurrectionary State, having been at the commencement of this suit and yet continuing in a condition of rebellion and actual hostility to the United States.

That condition constitutes all the inhabitants of that State alien enemies of this country.

This is indisputably so on clear principles of international law in regard to residents in countries foreign to each other (3 Phillimore, International Law, ch. 6, § 82. Halleck, Nat. Law, ch. 29, § 6. 1 Kent, 76).

In *Jecker vs. Montgomery* (18 How. 112), the Supreme Court says: "In a state of war between two nations, declared by the authority in whom the municipal institution vests the power of making war, the two nations and all their citizens or subjects are enemies to each other." Still more emphatically and pertinently in respect to the existing rebellion in this country, the same court declares that the residents of the several States in war with the United States are enemies to this country, to the same effect as if citizens or subjects of a foreign nation. (Crenshaw and others, administrators. The United States Laws, March, 1863.)

It is unimportant to determine in this matter whether the right of Wiley, in the subject matter of the suit before the court, is determined definitely by the subsisting state of hostilities between the place of his residence and the United States, or only suspended during such war; this decision goes no further than to rule that he is disqualified and inhibited becoming a party to the pending action. I do not in this decision discuss the regularity of practice pursued in making appearance and answer for Wiley. I consider him effectively barred by law of all power to intervene in court.

The application of the libellants is therefore granted, and it is ordered that the answer and claim interposed in the suit on behalf of Leroy M. Wiley has been irregularly and improperly admitted on file in this cause, and that the same be stricken therefrom.

In both these cases, residence in an insurrectionary State, is held as conclusive proof that the party is an alien enemy. The decision of Judge Betts occasioned comment, it being urged that if the doctrine in the opinion was correct, "the mere fact of the residence of Mr. Wiley in a southern insurrectionary State precludes him from appearing and contesting the allegations of the information, that he has rendered active aid to the rebellion. Congress might as well have spared itself the trouble of confining by such strict and guarded language the liability to confiscation, to cases where such aid has been rendered. Under such a practice, every dollar of property owned by Southern citizens in the North, no matter how loyal,

need only be seized under an allegation of disloyal practices, and as the accused cannot be heard to deny that allegation (and if he remains silent no proof of it is required), the whole matter is very summarily disposed of to the great comfort and advantage of the informer, and to the increment of his personal possessions.

"It was adjudged by the Supreme Court of the United States, in the case of *Brown vs. the United States* (Cranch 8th), that enemy's property found on land was not liable to confiscation by the mere fact of the hostile character of the owner, and without an act of Congress expressly subjecting it to confiscation. In that case the court was unanimous, with the exception of Judge Story, who, sitting in the Circuit Court in Massachusetts, had reversed the decree of the District Court acquitting the property, and whose decree was in return reversed by the Supreme Court. That decision remains unshaken to the present day. Only day before yesterday it was followed by Judge Nelson in the Circuit Court in this very district, who refused to condemn a quantity of rosin seized in a distillery in Newbern, North Carolina, on the taking possession of that place by the Federal forces.

"Judge Betts most strangely in the opinion speaks of this proceeding under the confiscation act as a civil suit. It would clearly have been more pertinent, however, to have shown that an alien enemy, under an indictment for treason, is precluded from being heard in his defence and must be hanged, not because he is guilty, but because, being an enemy, he has no "*persona standi*" in the court of the country where he is tried. Indeed, it would have been even more to the purpose to produce some authority for the proposition that an alien enemy, sued for a debt or for damages for an assault and battery, or other tort, in a court of the hostile Government, must be mulcted in the alleged debt, or damages and costs, on account of his belligerent status, without being heard in his defence; and finally, the provision of the fifth article of the Constitution of the United States, that 'no person shall be deprived of life, liberty, or property without due process of law,' would appear to an unprofessional mind to be a much more apt and proper citation.

"Even in prize causes, where the libel need contain no allegation of ownership, and does not assume to know or to prove who the owner is, the books are full of cases where the property has been condemned, on the final hearing, it is true, on the ground of enemy ownership; but it would be difficult to find one where the whole case had been prejudged on a motion to strike the claim from the files, thus depriving the party of the opportunity of a hearing on the merits and precluding him from an appeal."

Duration of the forfeiture.—It will be remembered that, after the passage of the act of

1862, a joint resolution explanatory of the act was passed, to obviate an objection raised by the President as was suggested, and which appears in his message of July 12th, 1862 (*see ANNUAL CYCLOPÆDIA*, 1862, page 374), being that the provisions of the act divesting title forever were unconstitutional. The constitutional restriction that "no attainder of treason shall work corruption of blood or forfeiture, *except during the life of the person attainted*," and to enforce which the resolution was passed, received judicial construction in proceedings instituted under the act. Judge Wylie, in his decision before quoted, held that this provision did not forbid the absolute forfeiture of real estate.

The question was elaborately argued by Judge John C. Underwood, of the United States District Court for the eastern district of Virginia, in his opinion upon proceedings for the confiscation and sale of the real estate of one Hugh Latham, and in which he decreed a sale of the estate, and a conveyance of the same in fee to the purchaser. He arrives at this construction as follows:

The decree in this and similar cases must depend upon the construction given to article third, section third of the Constitution of the United States, and the legislation of the last Congress for the confiscation of rebel property.

This court cannot limit the decree to a condemnation of a traitor's right, title, and interest in the property forfeited for the term of his own life, with a reversion to his heirs, for the reason that it does not consider such limitation warranted by the section and acts of Congress above referred to. The language of the Constitution is as follows:

The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of the blood or forfeiture, except during the life of the person attainted.

The authors of the constitutional provision were doubtless profound lawyers, and used the term "forfeiture" in the strict technical and well-settled legal meaning. Blackstone gives us a whole chapter on this important word, which he begins thus:

Forfeiture is a punishment annexed by law to some illegal act or negligence in the owner of lands, tenements, hereditaments, whereby he loses all his interest therein, and they go to the party injured as a recompense for the wrong sustained.

Again he enumerates "forfeiture," deed, device, etc., as the modes of absolute conveyance of real estate, and it seems clearly that this was the sense in which it was used in the constitutional provision.

The court holds that the authors of the clause meant not that only the life-tenure of real estate should be forfeited, but that the act of forfeiture must be legally completed during the lifetime of the party attainted. The word *except* should be used in the sense of *unless*, the sense in which it was used commonly at the time the clause was drawn, and which is given by Webster:

If we use the word "*except*" in the above sense in the constitutional provision, or make it read "*unless during the life of the person attainted*," we shall at once come to the true intent and meaning of the provision, to wit: That the forfeiture was to be perfected during, and not after, the lifetime of the party attainted.

The conclusion reached by Judges Wylie and

Underwood, it will be seen, is in direct conflict with the opinion of the President at the time of the passage of the act of 1862. The construction of Judge Underwood, which overruled this opinion of the President and his decree, which seems to disregard the explanatory resolution of Congress, viz.: that "no punishment or proceedings under said act shall be so construed as to work a forfeiture of the real estate of the offender beyond his natural life," would appear to have received the sanction of the Administration, and a great number of cases were decided in conformity with the principles laid down in the Latham case as it was stated about the first of December, as follows:

The Hon. John C. Underwood, Judge of the United States District Court of Virginia, has just returned from Norfolk, where he has cleared the docket in three days, five out of the twenty cases upon it being postponed in consequence of the absence of witnesses. Decrees were entered confiscating the personal and real estate of fifteen rebels, of whom three were formerly in the Union navy, and are now in the rebel navy, viz.: Commodore Barron and Capts. Page and Sinclair. Some of the estates confiscated are among the finest in the aristocratic quarter of the town. The fee simple, according to principles laid down in Judge Underwood's decrees at Alexandria, goes to the purchaser from the United States. The court was adjourned till the third Monday in January, when it is anticipated that about one hundred cases will be disposed of under the confiscation law. Yesterday Judge Underwood opened court again in Alexandria. Of the seventy cases which were on the docket there, about half are yet to be disposed of.

Is real estate covered by the act of 1861?—In November an information was filed in the United States Court, held at Nashville, Tennessee, against the "Republican Banner" printing office and real estate, under the act of August 6th, 1861. A motion was made to quash the information, on the ground that real estate did not come within the provisions of the act, not being property subject to prize and capture. This motion was denied on the 6th of November, by Judge Trigg, with the concurrence of Justice Catron, of the Supreme Court of the United States. The following are extracts from Judge Trigg's opinion:

It is not denied that the words of the act, "and property of whatever kind or description," are very comprehensive, and in their terms embrace real as well as personal property. But it is insisted that Congress did not intend to include all kinds of property by the broad and comprehensive language employed, and that this is manifest from the words used in the act denouncing the penalty against the property used or employed, or intended to be used or employed, as therein stated.

The act declares that "all such property is hereby declared to be lawful subject of prize and capture wherever found;" and it is argued that the words "prize and capture" are purely technical in their meaning, and apply only to personal property, real estate not being a subject of prize and capture, and that these words, therefore, must be understood to have been used in their technical sense. And the words "prize and capture" being thus technical in their meaning, must control the previous words, and limit and confine their operation to that description of property to which "prize and capture alone are applicable."

* * * * *

The term prize then would seem to have an exact

legal and technical signification, and is appropriate only to captures made from an enemy on the high seas in time of war. And if our construction of the statute of August 6th, 1861, is to be limited by the strictly technical sense of the words "prize and capture," it would follow that such property only as might be captured upon the high seas, and which was intended to be used or employed in aiding or promoting the insurrection, could be the lawful subject of condemnation under said statute. Thus it will be seen that, in the construction of the act under consideration, if we are to be controlled by the purely technical meaning of the words "prize and capture," the operation of the law will be confined to such captures only as may be made upon the high seas, and all property on land would be exempt therefrom, and be not lawful subject of prize.

I do not mean to assert that Congress has not the power to declare any other property, than that which shall be captured from an enemy in time of war, upon the high seas, a lawful subject of prize; but simply to maintain that no capture of property as prize can be so considered technically, unless there be an act of capture on the high seas. In other words, that property captured or taken on land as prize could not be considered as prize in the technical meaning of the phrase, and that the prize court would have no jurisdiction over it.

The question presented to the court is not without difficulty, but it is clear, from what has been stated, that in giving a construction to this statute, it will not do to be limited by the mere technical sense of the words "prize and capture," for in that case it is apparent that a large and distinct class of property would be excluded from its operation. And it is manifest from the reading of the act that property other than such as might be captured upon the sea was intended to fall within its provisions. For the act, independent of the sweeping provision "any property of whatsoever kind or description," expressly declares that "all such property is hereby declared to be lawful subject of prize and capture wherever found." To give a just construction, therefore, to the statute we must ascertain what the Congress intended, and to do this, after looking at the words of the act itself, we may look to the surrounding facts and circumstances which would properly have influenced Congress in its passage.

* * * * *

These technical words, then, cannot control us in our construction, and we must look to the whole body of the act, ascertain the intention of Congress in passing it, and construe the technical words "prize and capture," in the sense intended by them, and not in the strict legal sense in which they are usually understood.

* * * * *

The act declares that if "any person or persons, his, her, or their agent, attorney, or employé, shall purchase or acquire, sell, or give any property of whatsoever kind or description, with intent to use or employ the same, or suffer the same to be used or employed, in aiding or abetting or promoting such insurrection or resistance to the laws, or any person or persons engaged therein; or if any person or persons, being the owner or owners of any such property, shall knowingly use or employ the same as aforesaid, all such property is hereby declared to be lawful subject of prize and capture wherever found; and it shall be the duty of the President of the United States to cause the same to be seized, confiscated, and condemned." The language of this act is broad and comprehensive, and, looking at the surrounding facts and circumstances at the time, there being then a formidable rebellion in progress, the intention of Congress, in enacting this law, must have been to deter persons from so using and employing their property as to aid and promote the insurrection, and thereby to diminish and weaken the power of the rebellion; and perhaps it was also intended, by taking from him his property so unlawfully employed, to inflict upon the party a penalty for his misconduct in thus aiding and promoting a resistance to the laws. What, then, is included, it may be asked, under that broad language of the statute,

"any property, of whatsoever kind or description," which is lawful subject of prize and capture, and liable to be seized, confiscated, and condemned? We answer that it is manifestly any property, of whatsoever kind, which is capable of being used or employed in aiding, abetting, or promoting the insurrection. The only question, then, is whether real estate can be so used or employed; for if it can, there is no more reason why it should not be seized and confiscated than any other description of property. Certainly the mischiefs to result from such use of it would be as great as those from the use of property of any other kind. Suppose that a person, with the avowed purpose of aiding the insurrection, should purchase a piece of ground suitable for his object, and proceed to erect upon it the necessary buildings and machinery for the manufacture of guns and other small arms, and he does proceed, in accordance with his previous intent, to the manufacture of such weapons of war, to supply the rebel army, can it be contended that such property—real estate, if you choose—is not used, and as effectually used, in aiding, abetting, or promoting the insurrection, as any movable property whatever? And if so, why should it not be as much a subject of confiscation as any other? All property used in its ordinary and legitimate mode is exempt from the operation of the act, but the moment it is purchased or acquired, sold or given, with intent to use or employ it in aiding the insurrection, or if the owner knowingly or intentionally uses or employs his property for such a purpose, it immediately becomes the subject of seizure and condemnation under the act, whether it be real or personal property. The words "prize and capture" in the act were intended to have the same meaning which is given to the word "seizure" in the act of July, 1862, and to apply as well to real as personal property. * * * * *

Upon the whole, I am of the opinion that the information filed in this case ought not to be quashed.

I concur in the foregoing opinion of the District Judge.
J. CATRON, Associate Justice.

The Constitutionality of the Acts.—The question of the constitutionality of the act of 1861 was disposed of by Judge Trigg in the opinion in the case of the "Republican Banner," as follows:

The question raised by claimant's counsel in the closing argument, as to the constitutionality of the act, was not made upon the original motion as the same was entered, and was not argued on behalf of the United States. No authority, however, was produced, and it seems to me that the arguments relied on to sustain its unconstitutionality would be as applicable to any other law of Congress imposing the penalty of forfeiture, as to the act we are considering.

The constitutionality of the act of 1862 was brought directly in question in proceedings instituted in New Orleans in December. No decision was given during the year, but the following points were made on either side. M. F. Day, Esq., on behalf of the United States, said:

When we find terms in that instrument which are not clearly defined in the Constitution itself, we must go to the common law to ascertain the meaning of those terms; and any technical terms in the Constitution, which have a known signification in the common law, are to be understood in the Constitution in the same sense in which they are used in the common law.

Section 3, of Article III., of the Constitution, declares that "the Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture, except during the life of the person attainted."

Now, it has been contended that this provision is a limitation upon the power of Congress for the punishment of treason. This is an error. This word attainted is not a limitation of the power given by that

portion of the sentence which precedes it. "The Congress shall have the power to punish treason."

The whole question turns upon the meaning of the word *attainder*. There is nothing in the Constitution or laws of the United States that tells us what attainder is. When we fix the meaning of the term it will be easy to fix the power of Congress. Attainder is the resulting consequence of a conviction and *sentence of death*. Then it was a consequence just as certain to follow, as death is certain to follow when the head is severed from the body. The power is given Congress to declare the punishment of treason, except that no resulting consequence shall work corruption of blood or forfeiture, except during the life of the party attainted. The consequences of attainder are the corruption of blood and the forfeiture of estate.

On the whole, I conclude that the Constitution means just as though it read: "You may punish treason as you please, but if you make any provision for its punishment, no mere sentence of death shall work corruption of blood or forfeiture of estate beyond the life of the person attainted." The joint resolution in no way limits the operation of the act, except as to any resulting consequences.

The next position taken by the claimants is on the right of trial by jury. They rely on the constitutional provision that a man cannot be deprived of life, property, or liberty, without "due process of law," and claim that due process of law means a trial by jury.

There are two answers to this argument: First, this proceeding can in no case be considered as a criminal proceeding. It is merely a proceeding to enforce a *forfeiture*, and the universal practice in these cases has been to enforce forfeitures without trial by jury.

There is another position that is impregnable—that is the war right. We are in a state of war—a public war on the part of the United States, and a private war on the part of the rebels. The statutes put it on that ground. The property is to be condemned as enemy's property.

The whole war power is vested in the President and Congress. There is no power on earth that can dictate to Congress what disposition they shall make of the property of enemies, and even when the power is left to the discretion of the President there is no power on earth that can question it. Who is to say to Congress what course they shall pursue, not only toward the rebels themselves, but toward their property, or to attempt to control that body in the exercise of the means which it shall use to prosecute the war. They have an unlimited discretion to do all things necessary to carry out the power given them by the Constitution of the United States, and they are the sole judges of the means necessary to accomplish these purposes, and their judgment is final and supreme.

There is no power in the judiciary to limit the discretion of Congress in this matter: whether it is a wise direction or not, they are not responsible to the judiciary. The representatives are only responsible to the people. This grant of power to Congress to conduct the war is as broad as a grant can be. Courts have no power to say how a war should be conducted.

On behalf of the claimants Mr. C. Roselius followed:

The protection of life, liberty, reputation and property is, or at least ought to be, a preëminent purpose in every government. The powers of the Government are separate and distinct. Those powers which belong to one department are exercised by officers belonging to that department, who exercise their powers independent of any of the others. Each department is separate, co-ordinate and equal. In this admirable system no majesty is recognized but the majesty of the law. And no man can exercise any power except such as has been delegated to him merely as the servant of the people. Man, individually, is without any power, except that power which under the law he has the right to enjoy and exercise.

Under such a government one of the first principles which strikes the reflecting mind is, that no person

can be deprived of life, liberty, reputation, or property, without due process of law, or by the law of the land, for these terms are clearly convertible. We hold that everything that belongs to us by the law of the land, is secured to us by the law of the land, and can only be taken away from us by the law of the land, by due process, judgment, and execution.

What is the due process of law? That is the point; the whole case turns upon this single inquiry. In criminal proceedings, the Constitution tells us the prosecution can only be by presentment or indictment of the Grand Jury, and the trial must be by the peers of the party accused, collected in the vicinage where the offence was committed, or in certain other localities where the crime has been on the high seas. The Constitution itself has determined what is due process of law in a criminal prosecution. [Art. 5 of amendments to Constitution.] The constitution provides that no one shall be deprived of life, liberty or property, without due process of law, and defines due process of law, in a preceding part of the same article, to be presentation and indictment by a grand jury. When we refer to the Constitution, as originally adopted, we find that "all trials shall be by jury."

Is this in reality a criminal proceeding?—The answer is found, in the first place, in this paper, which is called a *Libel of Information*, and which has been presented to this honorable court as if it was sitting in admiralty. Now, if it does declare such a case as can be proceeded against by the law of nations in an admiralty court, my objections are groundless.

It is the facts discovered in the libel that call the court into action to enforce the law, and for this reason the state of facts in this libel impresses its character on the proceedings, I care not by what name he or anybody else may call it. The ground on which we claim is, that they have endeavored to evade the Constitution by giving a wrong name and directing a wrong process to issue in the case.

There is no offence against the law of nations set forth in the case.

The United States have passed a law for the punishment of traitors and rebels who have been in arms against the legitimate authorities of the best Government that ever existed. They had a right to do it. No one will question the right of a government to make laws for inflicting condign punishment on traitors, but it does not follow that they have a right to proceed against them with a *libel of information*. Congress is subservient to the behests of the Constitution. It cannot do any act in violation of the Constitution. Its powers have been restricted in order that it may afford protection to life, liberty, and property, just as the powers of the other departments of the Government have been restricted. You may prosecute traitors before a grand jury and find an indictment. It is not necessary that they should be before the court. It is only necessary that the offence should have been committed within the jurisdiction of the court.

My learned friend argues that the clause in the Constitution providing that "no attainder shall work corruption of blood," was intended to prevent the resulting consequences under the common law, of the conviction of treason. By that law, the moment a person was convicted of treason, he forfeited his estate and his blood was corrupted, his children could no longer inherit, and his property went to the crown.

The United States goes to the common law for the definition of technical terms and to determine the rules of evidence in criminal cases. It is idle to say that this is intended to guard against the consequences of a conviction at common law, as my friend has attempted to show. It does not fortify the position he has taken. It refers to an offence created by statutes under the Constitution, not to an offence against the law of nations. I do not invoke the law of nations to establish that this offence was against that law. I claim that this offence which has been transcribed in this *libel* is the very offence to which the Constitution refers, and, therefore, that it is an offence against the

laws of the United States, and not against the law of nations. That law had nothing to do with the law of nations. It was enacted for the punishment of treason and the suppression of rebellion. That is a subject of general legislation; a subject regulated by the Constitution in express terms.

The Confiscation Act is, in reality, an act for the punishment of treason and rebellion, and every line of the act shows it. Is it not clear that the act is punitive and nothing else, and that is what is limited by the clause in the Constitution providing that "no attainder for treason shall work corruption of blood," etc.

He next proceeded to the argument that had been adduced on the ground that this was a

Proceeding in rem,—and argued that a proceeding *in rem* could only be instituted when a *jus in re* had been acquired by the act of the thing itself, which, by the use that had been made of it, was forfeited, and that unless it was forfeited by some use to which it was put, it could only be forfeited by the act of the owner, and the proof of that act was the record of his conviction. The Government might confiscate enemies' property. The right existed, but had not been exercised for 260 years.

Belligerents had the abstract right and were responsible to the civilized world for its exercise. It was claimed by his opponents that, by virtue of this law, the property in question was liable to confiscation. But to be liable under the law of nations, as enemy's property it must have been in the enemy's country at the date of the enactment, or it must be the produce of the enemy's country.

But the act was passed on the 17th of July, 1862, two months after the United States authority had been reestablished here, therefore, it could not be held under the law of nations, for it was not the produce of the enemy's country, and at the time of the passage of the act it was in New Orleans, which was a part of the United States not under the jurisdiction of the enemy.

The District Attorney, Rufus Waples, in his argument presented the following propositions:

By the law of nations all the property of enemies is confiscable, including lands in fee simple.

Civil wars are governed by the same rules as international wars concerning confiscation of enemies' property; the sovereign-belligerent has the right to confiscate the property of the subject-belligerent.

As the right to confiscate enemies' property found on land had grown somewhat into disuse, it was necessary for Congress to pass a law expressive of the will of the sovereign to exercise the right, and to "make rules concerning the capture" of this species of property, in order to enable the courts to take judicial proceedings.

Congress made such rules in the acts of August 6th, 1861, and July 17th, 1862, sections 5, 6, 7, 8; the former act being against property which obtains its enemy character by use; the latter, against property which obtains that character by ownership.

Sections 5, 6, 7, and 8 of the act of July 17th, 1862 (bringing into exercise the right of the Government as sovereign-belligerent against subjects-belligerent), are clearly authorized by the Constitution.

There is nothing in the Constitution which prohibits the confiscation of enemies' property in the manner and to the extent provided for in the 5th, 6th, 7th, and 8th sections of the act; that is, absolute forfeiture of all the "right, title, and interest" of the enemy-owner by proceedings *in rem*.

1. The act does not deny trial by jury in any case in which the Constitution secures it. The first four sections relate to crime, and its punishment is to be by indictment and jury trial, as a matter of course. Con., Art. 3, section 2d and 7th. All forfeitures are to be by "due process of law," but not all by jury trial.

2. No attainder, there being no death or outlawry.

3. No corruption of blood—the capacity of the heirs to inherit is not affected.

4. No remainder or reversionary interest of the heirs forfeited.

5. No working of corruption or forfeiture.

6. No forfeiture after death. Forfeiture, like a sale, is an instantaneous act, and must take place while the owner is alive, if its enemy character is caused by ownership.

As the act (sec. 5, 6, 7, 8) provides, without ambiguity, for the absolute forfeiture, the Joint Resolution passed with reference to the act cannot affect it.

The belligerent right of the Government to treat rebellious subjects as though they were *alien* enemies and thus to confiscate their property absolutely, is a constitutional right. Late decision of the Supreme Court in proof sheets of 1 Black's U. S. Supreme Court reports. See PROVISIONAL COURT FOR LA.

CONGREGATIONALISTS, TRINITARIAN.

The "Congregational Quarterly" for January, 1864, contains full statistics of the Orthodox Congregational churches, as collected in 1863. The number of churches reported is 2,729. Of these 610 are not specified, 830 have pastors, 768 have stated supplies, and 495 are vacant. Of the 2,594 ministers of the denomination, 632 are not in active service. The total church membership (including ministers) is 253,200, of whom 90,163 are males, and 164,037 females; 31,178 are represented as "absent," 6,487 have been received by letter, and 5,576 have been dismissed by letter, leaving an excess favorable to denominational growth of 910. There have been admitted by profession 7,999, while 4,288 have died, and 680 have been excommunicated, leaving 2,931 as an increase, and which, with this 910, will make a total increase in the year in the 2,729 churches of 3,841 members, with no deduction for the 31,178 absent.

An interesting case of doctrinal controversy was tried in July, before a mutual board called by a petition of about one half of the male members of the Congregational church at Georgetown, Mass. The letter of call set forth that the Rev. Charles Beecher, the pastor, did not, in the view of the petitioners, preach according to the creed of the church and of the Orthodox churches generally of New England, especially in presenting his views of the pre-existence of man, the condition of souls after death, the atonement and divine sorrow. With regard to the pre-existence of souls, Mr. Beecher was reported to profess to the following effect: "We were all created in a previous world, and were drawn into apostasy by the fallen angels. God then proposed to create this world as a hospital for our race, introduce us here, and heal us of sin. It was proposed to Lucifer to become our redeemer. He refused. God then chose a younger brother, who proved willing. To him was added the divine nature, and he became among us the Christ. As it seemed doubtful whether Christ could do this work that Lucifer refused to do, he, Lucifer, remained in heaven after his refusal till Christ's resurrection. Lucifer was not expelled while he could raise a doubt whether this redemption could be accomplished."

The council adopted, by a vote of 16 yeas

against 5 noes, the report of a committee, which found Mr. Beecher guilty of heretical preaching, and recommended the dissolution of pastoral relations between him and the congregation of Georgetown. The latter, however, by a vote of 27 against 21, refused to accept the doings of this ecclesiastical council. Toward the close of the year, Mr. Beecher resigned the pastoral charge of the church.

The Canada Congregational Union, at its annual meeting, held in Montreal, on June 15th, passed the following resolution:

The ministers and delegates of the Congregational Union of Canada, in annual session of the Congregational Union, beg to express their deep and heartfelt sympathies with brethren in the neighboring republic in the dire calamities of civil war with which their country is afflicted, and their homes desolated.

With them we love to fraternize, their delegates are gladly welcome among us, and recognizing, as we do, that slavery is the chief cause of the fearful struggle in which they are involved, our prayers are to the Father of mercies, the great Ruler of the universe, that he would bring hostilities to a speedy and righteous termination, by which the principles of civil and religious liberty, the rights of humanity and universal freedom may be advanced and perpetuated.

At the 24th autumnal session of the Congregational Union of England and Wales, which commenced at Liverpool, on October 12th, an interesting paper was read on the bicentenary movement in commemoration of the ejection of Non-Conformist ministers from the Church of England in 1662. It appeared that the Congregational churches up to that time had subscribed £251,568 for the objects in view. Out of the thirty chapels, contemplated by the Lancashire churches, eight capable of accommodating 6,000 persons, had been opened; others were in progress, and sites for thirteen more had been secured. A large educational establishment had been opened at Farnworth, and another at Ashton, involving a large expenditure. Lancashire intended, as it appeared, to expend £150,000 upon these measures; Wales was determined to collect £20,000, to found a college, and £30,000 for the liquidation of chapel debts, and for other denominational purposes.

The "English Congregational Yearbook" of 1864, gives the following summary of Congregational statistics of England and the Colonies:

Number of Congregational Churches.

In Great Britain—	In Colonies—
England.....1,818	The Canadas..... 93
Wales..... 687	Other British Provinces, North America, 20
Scotland..... 103	Vancouver's Island.. 1
Ireland..... 28	Australasia.....121
Jersey..... 8	South Africa..... 10
Guernsey..... 5	Demerara..... 3
Isle of Man..... 2	
Total..... 2,651	Total..... 248

To these may be added 203 mission churches among the heathen, in connection with the London Missionary Society, making a total throughout the world of 3,102. This number does not include the numerous village chapels,

out-stations, schoolhouses, &c., in connection with the foregoing churches, amounting probably to double the number of those churches, making a total of some 10,000 places where, statedly or occasionally, the Gospel is preached. In addition to the above, a considerable number of independent churches exist in London and throughout the country, known generally as "High Calvinist," but which, having no organized associations themselves, not being in fellowship with the Congregational body, are not included. Number of churches vacant: in England, 155; Wales, 79; Scotland, 14; Ireland, 4; Colonies, 27—total, 279. Number of Congregational ministers: In England, 1,737; Wales, 361; Scotland, 99; Ireland, 30; Colonies, 216; heathen lands, 168—total, 2,611. Number of students: in England, 320; Wales, 90; Scotland, 16; Colonies, 30—total, 456. Of the 2,612 ministers, there are at present without pastoral charges: in England, 387; Wales, 35; Scotland and Ireland, 17; Colonies, 41—total, 480. There are on the Continent of Europe 148 independent churches, in Belgium, France, Geneva, Holland, and Switzerland." (*See CONGREGATIONALISTS, UNITARIAN.*)

CONGRESS, CONFEDERATE. The proceedings of the Congress* at Richmond were so generally conducted in secret session, that their action on only a few subjects of interest is known. In the House on the 19th of Jan. Mr. Clopton, of Alabama, offered a series of joint resolutions relating to the conduct of the existing war and the late proclamation of the President of the United States.

Mr. Foote, of Tennessee, preferred in lieu of retaliatory measures, as suggested by the resolutions, that an attempt should be made to stop the shedding of blood by a movement to bring about peace. It would strengthen the friends of peace at the North, and perhaps have the

effect of producing a state of things so much desired notwithstanding the opposition of the abolition party.

Mr. Dargan, of Alabama, took the ground that Powers at war must retaliate. The resolutions contemplated the turning over of captured officers to State Governments, and to let them be punished according to the laws. He did not think that was correct, but he suggested that the Government should take the responsibility itself. Mr. Lyons, of Virginia, suggested that the Government had no power to turn these captured officers over to the States. Nor was there any necessity for the resolutions, since the President has said in his message he will do it unless prevented by Congress. He favored the passage of a law prohibiting such a course, and to repose the power of retaliation entirely in the hands of the Government. When an officer was captured, if there was cause for retaliation, we might retaliate upon him; if not, we were bound to exchange him. They could not, by any law of nations, when captured by one Government, be turned over to another Government for trial. He would prefer that any officer captured in any State after the promulgation of that proclamation should be instantly hung; not subject him to the uncertainties of a trial by jury.

Mr. Kenner, of Louisiana, called the attention of the House to the fact that this portion of the President's message was referred to the Committee of Ways and Means. The committee was now prepared to report. He moved, as instructed by the committee, that the House now go into secret session for the purpose of receiving that report.

The motion was agreed to.

Subsequently the subject came up in the Senate, when Mr. Yancey, of Alabama, offered the following resolution:

* The following were the members of Congress at the second session convened in Richmond on the 1st of December, 1863. For the list of members convened at the first session in December, 1862, *see ANNUAL CYCLOPEDIA, 1862.*

SENATE.

ALEXANDER H. STEPHENS, of Georgia, *President.*
J. H. NASH, of South Carolina, *Clerk.*

Alabama—Clement C. Clay, Robert Jemison, Jr.
Arkansas—Robert W. Johnson, Charles B. Mitchell.
Florida—James M. Baker, Augustus E. Maxwell.
Georgia—Benjamin H. Hill, Herschel V. Johnson.
Kentucky—Henry C. Burnett, William E. Simms.
Louisiana—Thomas J. Semmes, Edward Sparrow.
Mississippi—Albert G. Brown, James Phelan.
Missouri—John B. Clark.
North Carolina—George Davis, William T. Dortch.
South Carolina—Robert W. Barnwell, James L. Orr.
Tennessee—Landon C. Haynes, Gustavus A. Henry.
Texas—William S. Oldham, Lewis T. Wigfall.
Virginia—Robert M. T. Hunter, Allen T. Caperton.

HOUSE.

THOMAS S. BOCOCK, of Virginia, *Speaker.*
ALBERT R. LAMAR, of Georgia, *Clerk.*

Alabama—Thomas J. Foster, William R. Smith, John P. Rawles, Jabez L. M. Curry, Francis S. Lyon, William P. Chilton, David Clopton, James L. Pugh, Edward L. Dargan.
Arkansas—Felix I. P. Batson, Grand. D. Royster, Augustus H. Garland, Thomas B. Hanley.
Florida—James B. Dorkins, Robert B. Hilton.
Georgia—Julian Hartridge, C. J. Monnalym, Augustus H.

Keenan, David W. Lewis, William W. Clark, Robert P. Trippe, Lucius J. Gartrell, Hardy Strickland, Augustus R. Wright.

Resolved, That the Committee on Judiciary be instructed to inquire into and report whether an officer of the army of the United States, acting under the authority of that Government, can be made liable and punished as a criminal for the violation of the criminal laws of a State, by a State tribunal, when turned over to State authorities by order of the President.

Mr. Yancey said he was in favor of retaliation, but inasmuch as that involved "counter retaliation," and jeopardized the lives of officers, it was well to consider whether, on the whole, the retaliatory measures recommended had better be adopted. Mr. Yancey said that this counter retaliation had already commenced, and that Confederate officers are already "suffering inconvenience" from it. He was sure, however, that even though the proposition of President Davis was adopted, there would be no retaliation, for, he added:

When these officers shall be turned over to State tribunals, under the judgment of these State tribunals they will be declared as not liable, as criminals, to the State laws. We recognize the United States as a public enemy, and public enemies are not liable, in my opinion, to the criminal laws of the country with which they are at war. * * * If amenable to one State law, he is amenable to all State laws; and surely it would not be held for a single moment that an officer of the United States would be held liable to the law of trespass. In my opinion, no one law is more sacred than another law, and the very same principle of construction, which would make him liable for exciting an insurrection, would make him amenable to all other laws of the State which would be violated by him in the conduct of war.

Mr. Yancey then proceeded to meet the argument that the United States were violating the law of nations, and very distinctly took the ground that the public enemy might stir up an insurrection or do any act to weaken the power of his foe without violating the law of nations or military law. Mr. Yancey was willing to have the policy established that every officer of the enemy shall be killed in the field of battle, but he thought it was the duty of the Confederate Government to take the matter in hand, and not to shift the responsibility upon the local laws of the separate States.

The following are the joint resolutions as adopted:

Resolved, by the Congress of the Confederate States of America, in response to the message of the President, transmitted to Congress at the commencement of the present session, That, in the opinion of Congress, the commissioned officers of the enemy ought not to be delivered to the authorities of the respective States, as suggested in the said message: but all captives taken by the Confederate forces ought to be dealt with and disposed of by the Confederate Government.

Sec. 2. That, in the judgment of Congress, the proclamations of the President of the United States, dated respectively September twenty-second, eighteen hundred sixty-two, and January first, eighteen hundred and sixty-three, and the other measures of the Government of the United States and of its authorities, commanders, and forces, designed or tending to emancipate slaves in the Confederate States or to abduct such slaves, or to incite them to insurrection, or to employ negroes in war against the Confederate States, or to overthrow the institution of African slavery and bring on a servile war in these States, would, if successful, produce atrocious consequences,

and they are inconsistent with the spirit of those usages which in modern warfare prevail among civilized nations; they may, therefore, be properly and lawfully repressed by retaliation.

Sec. 3. That in every case wherein, during the present war, any violation of the laws and usages of war among civilized nations shall be, or has been, done and perpetrated by those acting under the authority of the Government of the United States, on the persons or property of the citizens of the Confederate States, or of those under the protection or in the land or naval service of the Confederate States, or of any State of the Confederacy, the President of the Confederate States is hereby authorized to cause full and complete retaliation to be made for every such violation, in such manner and to such extent as he may think proper.

Sec. 4. That every white person, being a commissioned officer, or acting as such, who, during the present war, shall command negroes or mulattoes in arms against the Confederate States, or who shall arm, train, organize, or prepare negroes or mulattoes for military service against the Confederate States, or who shall voluntarily aid negroes or mulattoes in any military enterprise, attack, or conflict in such service, shall be deemed as inciting servile insurrection, and shall, if captured, be put to death, or be otherwise punished at the discretion of the court.

Sec. 5. Every person, being a commissioned officer, or acting as such in the service of the enemy, who shall, during the present war, excite, attempt to excite, or cause to be excited servile insurrection, or who shall incite or cause to be incited a slave to rebel, shall, if captured, be put to death, or be otherwise punished, at the discretion of the court.

Sec. 6. Every person charged with an offence punishable under the preceding resolutions shall, during the present war, be tried before the military court attached to the army or corps by the troops of which he shall have been captured, or by such other military court as the President may direct, and in such manner, and under such regulations as the President shall prescribe, and, after conviction, the President may commute the punishment in such manner and on such terms as he may deem proper.

Sec. 7. All negroes or mulattoes who shall be engaged in war or be taken in arms against the Confederate States, or shall give aid or comfort to the enemies of the Confederate States, shall, when captured in the Confederate States, be delivered to the authorities of the State or States in which they shall be captured, to be dealt with according to the present or future laws of such State or States.

The section of the conscription law which exempted one person as owner or overseer of each twenty negroes was repealed. A resolution was adopted in favor of free navigation of the Mississippi river, as follows:

Resolved by the Congress of the Confederate States of America, That the Confederate States again repeat the principles above set forth, and declare the free navigation of the Mississippi river to be the natural right of the people of all the States upon its banks, or upon the banks of its navigable tributaries.

In the House, on the 3d of March, a resolution was adopted to inquire into the expediency of repealing the resolutions declaring that a neutral flag covers an enemy's goods, with the exception of contraband goods.

A bill, introduced into the Senate, placed all telegraph lines under the control of the Postmaster-General.

A tax bill was also passed at this session, which levied a tax of eight per cent. on the value of all naval stores, salt, wines, spirituous liquors, tobacco, manufactured or unmanufactured, cot-

ton, wool, flour, sugar, molasses, syrups, rice, and other agricultural productions. Bankers were taxed \$500; auctioneers \$50, and $2\frac{1}{2}$ per cent. on the gross amount of their sales; wholesale liquor dealers were taxed \$200, and 5 per cent. of their gross sales; retail liquor dealers pay \$100 and 10 per cent. of gross sales; distillers pay \$200 and 20 per cent. of gross sales; hotels and eating houses pay according to the yearly retail of the property, from \$800 a year down to \$30; theatres pay \$500 and 5 per cent. of gross receipts; tobacconists pay \$50 and 5 per cent. of gross sales; billiard rooms pay \$40 for each table; butchers and bakers pay \$50 and 1 per cent. of gross sales; peddlers pay \$50 and $2\frac{1}{2}$ per cent. of sales; photographers, lawyers, apothecaries, doctors, and confectioners pay \$50 each, with a tax on all but lawyers and doctors of $2\frac{1}{2}$ per cent. of sales. Incomes are taxed as follows: over \$500 and under \$1,500 a year, 5 per cent.; over \$1,500 and less than \$3,000 a year, 5 per cent. on the first \$1,500 and 10 per cent. on the rest; over \$3,000 and less than \$5,000, 10 per cent.; over \$5,000 and less than \$10,000, $12\frac{1}{2}$ per cent.; over \$10,000, 15 per cent.

The following section related to farmers:

SEC. 11. Each farmer and planter in the Confederate States, after reserving for his own use fifty bushels of sweet potatoes and fifty bushels of Irish potatoes, one hundred bushels of corn or fifty bushels of wheat produced in the present year, shall pay and deliver to the Confederate Government, of the products of the present year, one-tenth of the wheat, corn, oats, rye, buckwheat, or rice, sweet and Irish potatoes, and of the cured hay and fodder; also, one tenth of the sugar, molasses made of cane, cotton, wool, and tobacco; the cotton ginned and packed in some secured manner; the tobacco shipped and packed in boxes, to be delivered by him on or before the first day of March in the next year. Each farmer or planter, after reserving twenty bushels of peas or beans, but not more than twenty bushels of both, for his own use, shall deliver to the Confederate Government, for its use, one tenth of the peas, beans and ground peas produced and gathered by him during the present year.

An act was also passed adopting a new flag. It consisted of a white ground with a bright red union, the latter crossed diagonally, with two blue stripes with white stars on the stripe. The law directed it to be hoisted for the first time on all ships and forts, on the first day of July. The steamer *Atlanta*, when she advanced to attack the *Weehawken* and *Nahant*, hoisted it in anticipation of the day appointed, but instead of floating in triumph, it was hauled down in defeat.

Congress also passed an Impressment bill, the design of which was to protect the holders of property seized by the Government. It provided that compensation should be determined, in the case of producers, by two or three impartial and loyal citizens of the vicinage, and in the case of non-producers, by two commissioners in each State—one appointed by the President, the other by the Governor.

Soon after the passage of this bill, a case of impressment occurred in Virginia—of hay or

corn—and the appraisers put on a most exorbitant price. Acting thus on the presumption that citizens would invariably extort from the Government exorbitant prices, Congress passed a supplementary bill, providing that in case the impressing officer did not approve the award of the appraisers, he should so endorse on the appraisal, and turn the matter of price over to be settled by the State Impressment Commissioners. As these commissioners fixed prices every sixty days, or oftener, for a whole State, their prices would most probably be always either too much or too little for some articles in the various districts of a large State. Under the supplementary bill instructions were issued from the War Department at Richmond, prohibiting impressing officers from approving any appraisal in excess of the schedule price fixed by commissioners for a whole State. Thus the principle of adjusting compensation by the arbitrament of impartial citizens of the vicinage—a most important feature of the Impressment bill—was virtually abandoned.

This impressment was enforced at the same time that the produce tax was collected, and caused much dissatisfaction.

On the 7th of December, Congress convened again at Richmond. In the Senate, Mr. Simms, of Kentucky, and Mr. Clark, of Missouri, offered resolutions and bills against permitting substitutes to be employed any longer in the army. The proposition was, that the Government should return the substitute money, and require all to do their duty.

The House adopted a resolution for a joint committee to consider the currency, and report speedy measures for action. In the House, on the 9th, Mr. Foote, of Tennessee, offered a resolution instructing the appropriate committee to provide for the increase of the pay of soldiers. He urged the question at some length, assuming that no action in regard to the currency would fully restore it to its nominal value, and that, therefore injustice was done the soldier in refusing him an equable compensation. He contended that the President was opposed to the increase of the soldiers' pay, from the fact that he stated in his message that the suggested action upon the currency would obviate its necessity, by approximating the nominal value of the money. He wanted the whole value secured.

Mr. Gartrell, of Georgia, vindicated the President from the imputation, and argued at some length, in order to show that the increase of the pay of the soldier was one of the President's most eager wishes.

The resolution was lost.

The following resolution was then offered by Mr. Foote:

Resolved, That said committee be instructed to inquire whether there be any ground for the allegation made by the enemy, in formal official letters and otherwise, that the prisoners of war detained by us in custody have been refused adequate supplies of a

wholesome and nutritious character, at any time, and report the result of the inquiry herein, in order that not a moment should be lost in vindicating the honor of our own Government in regard to this solemn and interesting matter, and that no plausible pretext shall remain for the maltreatment of our own valuable soldiers, now retained in Northern prison houses upon the plea of needful retaliation.

In explaining and urging this resolution upon the Committee of the Whole, Mr. Foote said that his design was to investigate facts, and he had a few to offer; not to give information to the enemy, but to give information to this House, and to the country, that the honor of the country may be protected. A certain commissary-general, who was a curse to our country, had been invested with authority to control the matter of subsistence. This man has placed our Government in the attitude charged by the enemy, and has attempted to starve the prisoners in our hands! Here Mr. Foote read a letter from the quartermaster for the prisons, Capt. J. Warner, addressed to Gen. Winder, and placed on the record at Col. Ould's office, which stated that he (Capt. Warner) had, from the 1st to the 20th of the last month, been able to obtain meat for the prisoners in a very irregular and meagre manner from the department, and that for six days only of the period was he able to obtain a regular supply; for twelve days the supply was irregular and inadequate, and for eight days they got none at all. This commissary-general, who, he was told (continued Mr. Foote), was a sort of pepper doctor down in Charleston, and he must say, looking as like a vegetarian as his practice would indicate, had actually made an elaborate report to the Secretary of War, showing that, for the subsistence of a human Yankee carcass, a vegetable diet was the most proper that could be adopted. He had other facts which he could bring forward, in addition to this, to show that this Northrop should be turned out. For the honor of the country he should be ejected at once.

The vote was then taken on the resolution, and it was lost.

In the Senate, on the 11th, Mr. Brown, of Mississippi, offered a resolution that the state of the country demanded that the laws should, without delay, be passed declaring every male citizen in the military service; to repeal the laws authorizing substitutes; to authorize the President to issue his proclamation commanding all foreigners to leave the country, in sixty days, or to take up arms; to regulate details for necessary civil pursuits; to levy direct taxes; to make Confederate notes a legal tender after six months; to prohibit the trade in gold and silver and bank notes and United States Treasury notes during the war, or to prohibit blockade running, under heavy penalties, and to declare these laws war measures, and make those violating them amenable only to military courts.

Mr. Wigfall, of Texas, offered a resolution instructing the Military Committee to inquire

into and report upon the treatment by the military authorities of prisoners of war, which was agreed to.

Mr. Phelan, of Mississippi, introduced a bill which was referred to the Finance Committee and ordered to be printed, providing for the issue of \$500,000,000 of coupon bonds in sums not less than five hundred dollars, payable in twenty years, and bearing interest of six per cent., payable semi-annually. The coupons when due to be a legal tender for all debts due in dollars or other money, and a refusal to accept the same when tendered to act as a discharge to the indebtedness in payment of which they are offered.

Mr. Holcombe offered a resolution that the Special Committee on the Currency consider the expediency of requesting the State Banks of the Confederacy to loan their respective reserves to the Confederate Government.

Mr. Sparrow, of Louisiana, from the Military Committee, reported back the following bill, with the recommendation that it pass:

The Congress of the Confederate States do enact, that no person liable to the military service shall hereafter be permitted or allowed to furnish a substitute for such service, nor shall any substitute be received, enlisted, or enrolled in the military service of the Confederate States; and that all laws heretofore passed permitting or allowing persons liable to military service to furnish substitutes for the same, or authorizing the acceptance, enlistment, or enrolment of any substitute in the military service, be and the same are hereby repealed.

Mr. Wigfall moved to strike out the last clause of the bill, which being rejected, the bill was passed and sent to the House.

In the House, Mr. Foote offered several bills, among them one for the repeal of the existing substitute law, and one for the increase of the pay of soldiers. They were referred. He also introduced several resolutions, one requesting the President to withdraw all diplomatic agents from such foreign Governments as have not recognized the Confederacy, before the first day of February next, and to dismiss all foreign consuls in the country.

Mr. Foote also introduced a resolution in regard to unreasonable searches and seizures.

Also a resolution that the Judiciary Committee inquire into the expediency of so amending the present law with reference to the exchange of prisoners of African descent as to distinguish between those who were free when the war commenced, and those who are recognized as slaves by the laws of the Confederate States. Agreed to.

On the 18th, Mr. Goode, of Virginia, offered a resolution instructing the Committee on the Judiciary to inquire into the expediency of so amending the act to regulate impressments, as to relieve sufficient bread and provisions to supply the wants of the non-producers of the country.

Mr. Goode said that the agents of the commissary and quartermaster departments have been recently going all over the country, and

where they could not go themselves, had written communications, notifying all producers that their whole surplus was impressed, and forbidding them to move it. The question was, what are all the non-producers—the large number of persons residing in cities—the mechanics, the wives and children of our soldiers, the vast number of refugees who were driven from their homes by the enemy—what were these to do? As an instance of the great injustice of the system, he stated that he knew of a mill in which all the toll corn had been impressed by the commissary agent at the depot, who knew at the time that twenty or thirty families were supplied by that mill, and he impressed it, simply because it was convenient to the depot, and he was too lazy to go some distance further and obtain supplies from a place which could afford to give them. Mr. Goode represented, as a part of his district, the little county of Carroll, which had sent into the field eleven hundred volunteers out of twelve hundred voters. It had not furnished a single conscript, and but three substitutes, and contained only one hundred and fifty slaves. Almost all of the laboring population, therefore, consisted of the old men, the women and boys; and if the producer was not allowed to furnish his poor neighbor with bread and meat, what was he to do? He knew and admitted the necessity of feeding the army; but by so doing he could not admit the necessity of starving the country. He had been told that there were "oceans of corn" in the State of Georgia; if so, why was it not brought here? Could not the Government regulate its own transportation? He could not say that he knew the remedy for the evil, but it was his opinion that a change in the commissary department would be very beneficial.

On the 21st, Mr. Miles, of S. C., offered the following bill, which was referred to the Committee on Military Affairs:

A bill to be entitled an Act to continue in the service all troops now in the service of the Confederate States.

SEC. 1. The Congress of the Confederate States of America do enact, that all musicians, privates, and non-commissioned officers now in the armies of the Confederate States, by virtue of volunteering, enlistment, or conscription into the military service of the Confederate States, be and the same are hereby retained in said service for and during the existing war with the United States, and no longer.

SEC. 2. *Be it further enacted*, That all troops so retained in service shall continue to serve in the companies, battalions, squadrons, batteries, and regiments in which they now are, until transferred, detailed, exempted or discharged in accordance with existing laws and regulations, or such laws and regulations as may hereafter be passed and adopted with reference to transfers, details, exemptions, or discharges in the armies of the Confederacy.

Mr. Gartrell, of Ga., offered an amendment to allow the troops so retained in service to elect their company and field officers.

Mr. Read, of Ky., offered an amendment to allow the troops from Kentucky to mount themselves and become part of the cavalry.

The amendments were ordered to be sent to the committee with the original bill.

Mr. Foote, of Tennessee, rose to a personal explanation. He had seen in the papers extracts from Northern papers, reporting him as having said that our Government officials were trying to starve Federal prisoners. He had made no such statement, but had merely offered a resolution looking to an inquiry into the subject, and had presented papers to show that there had been some irregularity in feeding them, and the Committee on Quartermaster and Commissary Departments were now engaged in a strict investigation of the subject.

Mr. Hilton, of Fla., from the Committee on Military Affairs, presented the following bill which was ordered to be printed:

Whereas, Through frauds perpetrated on the Government under the clause of the act approved April 16th, 1862, which granted the privilege that persons not liable to military duty might be received for those who were, our armies have been deprived of the services of men necessary for the public defence, therefore,

SEC. 1. The Congress of the Confederate States do enact, That, in all cases where substitutes received under the provision of the above (or any other) law have deserted, or shall hereafter desert, the obligation of the principal shall revive upon the desertion of the substitute being established under regulations to be prescribed by the Secretary of War.

SEC. 2. In all cases where a substitute has proved unfit for the discharge of the ordinary duties of a soldier, by reason of physical or mental incapacity existing at the time he was received as a substitute, the obligation of the principal shall revive upon such incapacity being established and attested under regulations to be prescribed by the Secretary of War.

SEC. 3. In all cases where a man who is a substitute would be liable to enrolment for military service under existing or future laws, if he were not already in the army, the principal is hereby declared to be subject to such enrolment.

On the 24th, a bill was unanimously passed in the House prohibiting every person from dealing in the paper currency of the United States.

The following bill was passed by a vote of 52 ayes to 13 noes:

Whereas, In the present circumstances of the country, it requires the aid of all who are able to bear arms;

The Congress of the Confederate States do therefore enact, That no person shall be exempted from military service by reason of having furnished a substitute. *Provided*, That nothing in the foregoing clause shall be so construed as to relieve a substitute from any obligation or liability contracted or assumed by him as such substitute. But this act shall not be construed so as to affect persons who, though not liable to military service, have, nevertheless, put in substitutes.

In the Senate, on the 30th, Mr. Phelan, of Miss., presented joint resolutions of the General Assembly of Mississippi, which were referred to the Military Committee.

The resolutions severally provide that Congress be requested to repeal that portion of the Conscript act authorizing substitution in the army, to take into consideration the practicability of using negro men in the service as teamsters, &c., and to appoint an agent, or

agents, on the part of the Confederate States, to visit different portions of the State of Mississippi for the purpose of auditing, adjusting, and paying off certificates and receipts given persons for provisions and other property impressed by the Confederate Government.

The Senate then resumed consideration of the House bill to put an end to the exemption of persons who have furnished substitutes, the pending question being on the adoption of the amendment of Mr. Maxwell, of Florida, excepting those engaged in agricultural pursuits whose substitutes have not deserted.

Mr. Hill favored the amendment. There was a great clamor to put everybody in the army. The ranks of the army certainly required filling up, but they were thin, not because the muster rolls were not full, but because the men on the muster rolls were not in the ranks. Absenteeism was the greatest vice of the day. We lost the battle of Missionary Ridge because of absenteeism. Officers of that army were absent who were as well as he was. He could give the names of some of these officers, but not all of them, as they were too numerous. But if any one of them ever come before the Senate for promotion, and he knew it, he would mention the facts and vote against him. Gen. Bragg had stated in his report that two thirds of his army were absent. All of them were, probably, not on sick furloughs. Many of them were, no doubt, engaged on provost duty. It had come to this, that every little village in the country must have a provost and provost guard, who, as far as his own observation went, were a great deal more active in annoying citizens than in arresting deserters. The army was discontented with the Substitute law because most of those who had put in substitutes had set themselves down in towns and amassed fortunes out of the necessities of the country. If they had betaken themselves to some occupation useful and necessary to the country, this discontent would not have arisen. To exempt from the operation of this act men who were engaged in producing food for the support of the army and the country would certainly be agreeable to the army. He therefore favored the amendment.

Mr. Wigfall said he wished to say a few words, not to influence the mind of the Senate, for he was satisfied the Senate had made up their minds. This matter of substitutes was one which might have once been defended, but now it seemed to him that the bill abolishing all substitution ought to pass unconditionally. It was absolutely necessary that every soldier in the army should remain there, under the present organization, without any change of company, battalion, or regiment. The *statu quo* must be preserved. We could not afford to disorganize the army. Incompetent officers must be gotten rid of by examining boards. He meant what he said, and had said what he meant. The army and the country had been talked of in a manner calculated to

produce confusion. The army was the country, and the country was the army. We were engaged in such a conflict as the world never saw. By a misnomer we spoke of "this revolution," and compared it with the revolution of '76. There was no comparison whatever. If we had failed then we should still be under the best government the world had then seen. We should have been under a government which reserved to us the trial by jury, &c. A half dozen persons, if so much, would have been executed, and there would have been an end of it. But if we failed now? Has any man in or out of the army, considered what subjugation and confiscation mean—what is comprehended and signified by these terms? Confiscation means to have no house to cover the head; no bed whereon to lie; to have nothing. Subjugation means a negro guard in every house and a provost marshal at every cross road; with no right to visit a neighbor; no right to visit the house of God without a permit from a Yankee provost marshal to be handed to a negro guard.

Senators should recollect that there was discontent in the army. He believed that this discontent was groundless, but still it existed. It had been said upon the floors of Congress that there had been discrimination in favor of certain classes, and this had produced dissatisfaction. Those who had fought under the suns of July and August, and under the frosts of October and November, and were not yet buried, were discontented that their rich neighbors were not in the army to share their lot with them. The soldiers in the army were content to remain there; but they insisted that their rich neighbors should be there also. There had been reasons for the exemption of some and the permitting of others to furnish substitutes. Those reasons were that some men could do more good, could benefit the country and the cause more, out of the army than in it. We were obliged to have merchants, tailors, shoemakers, and blacksmiths. But when the bill passed permitting substitutes, what was the result? It was the fashion to talk about the bone and sinew of the country, and to speak of the planters and farmers as having all of the religion, cultivation, education, and patriotism of the country. Talk of speculators, extortioners and Dutch Jews! The farmers have been the worst speculators, extortioners, and Dutch Jews of this war. Has the population of the South changed? No. Have the Yankees driven out the people from their lands, and put into their places the Dutch and Irish with whom they have threatened to colonize the conquered States? No. These are the people of the South who are fighting for their liberties or getting other people to fight for them. And, singular to say, they think a great deal more of their negroes than of their sons and brothers. A gentleman of his acquaintance had, last summer, met a negro on the cars coming to Richmond to work on the batteries. The

negro looked sad, and the gentleman enquired the reason. Sambo said he was sorrowful because his old master looked so downcast when he parted with him; that his master had five sons in the army, but never grieved half so much at parting with all of them as with him. The patriotic planters would willingly put their own flesh and blood into the army, but when you asked them for a negro the matter approached the point of drawing an eyetooth. A great change had come over the planters within the last two years. Two years ago, when that pink of gallantry and soldierly qualities was at Manassas, to keep his army from starving he wrote a letter to a farmer in Orange county, asking him to send him sixty wagon loads of corn and provisions; to pay for the grain and the expense of hauling the same as soon as he was in funds. On the next Sunday this letter was read at every church in Orange, and on Monday morning the sixty wagons, loaded with corn, were sent to General Beauregard, free of charge, and telling him to keep also the wagons and teams. Such was the patriotism in Orange county then. Now, those very farmers will actually burn their wheat rather than sell it to the Government at five dollars a bushel for the use of their own sons and brothers. They stood haggling about the price of pork per pound when their sons and brothers were living on a quarter of a pound a day, and sometimes had none at all. What had produced such a change in this people? He did not hesitate to answer, an inflated currency. No patriotism could stand an inflated currency. Make money cheap and you make men mean. But the effect had been produced, and when you talked of patriotism, of the planters and bone and sinew of the country, these facts should not be forgotten. Of late a wild spirit of speculation had seized upon the people, which bid fair to work our ruin. This is felt in the army. The soldiers in the army believed they were better than the people at home, but he honestly believed they were no better. If the soldiers were sent home, in the present condition of the currency, they would immediately turn speculators and extortioners. And if the people now at home were put into the army, they would become patriotic. The people, the farmers, have bowed the knee to Baal, and nothing could be done till the currency was reduced.

When the Substitute bill passed, Congress said to preachers, doctors and some others, you are exempt; and to others, you will be allowed to furnish substitutes. But there was no contract between the Government and these men. The contract, if any there was, was between the principals and the substitutes themselves. Government only said, if you can get a man who is not liable to military duty to go for you, you shall be exempt. But now Government wanted them all, substitutes and principals. We are again to conscribe all the men in the army, not for three years, but for the war, if that war lasts, like the contest in which the Dutch republic was

engaged for eighty years. They stay in the army till they die or our independence is achieved. These men in the army did not feel it was right they should do all the fighting for the protection of their lives and property, and for the lives and greater property of the substitute men. If it was said these substitute men were necessary to the subsistence of the army, it might, with truth, be replied that they were not doing anything for the subsistence of the army. They were speculating—charging from fifteen to twenty dollars for a bushel of meal, and upward of a thousand per cent. profit upon shoes and clothing. Our liberties were inevitably lost unless we pass the conscript bill—the bill of the Military Committee. If we were going to disband the army it was useless to pass any other measures.

The question being called, Mr. Maxwell's amendment was lost.

The vote was then taken on Mr. Simms' amendment, proposing to repay the principals a fair proportion of the money paid by them to their substitutes, and the amendment was lost by a vote of—yeas, 10, nays, 10.

Mr. Orr moved to amend the bill by altering the enacting clause, so that instead of reading "The Congress of the Confederate States do therefore," it should read, "The Congress of the Confederate States of America do." The amendment was agreed to. The bill was then passed by the following vote:

YEAS—Messrs. Brown, Caperton, Clay, Clark, Davis, Dortch, Henry, Hill, Hunter, Jamison, Johnson, of Arkansas, Maxwell, Phelan, Semmes, Simms, Sparrow, and Wigfall—17.

NAYS—Messrs. Johnson, of Georgia, and Orr—2.

The following is the bill as amended and passed:

A Bill to be entitled an Act to Put an End to the Exemption from Military Service of those who have heretofore furnished Substitutes.

Whereas, in the present circumstances of the country, it requires the aid of all who are able to bear arms, the Congress of the Confederate States of America do enact, that no person shall be exempt from military service by reason of his having furnished a substitute; but this act shall not be so construed as to affect persons who, though not liable to render military service, have, nevertheless, put in substitutes.

The Conscription Act finally adopted declared every man between eighteen and fifty-five years of age to belong to the army, subject at once to the articles of war, military discipline, and military penalties, and required him to report within a certain time or be liable to death as a deserter. The whole people were made soldiers under martial law. Mechanics and laboring men would be detailed from the army to work on army supplies. Railroad men, telegraphers, and miners would also be detailed under military rule and on the pay of \$13 a month. Government, State, and county officers will be detached from the army. Planters likewise sent to oversee the negroes. All the production and labor of the country was under military control.

CONGRESS, UNITED STATES.—The third session of the 37th Congress* commenced at Washington on the 1st day of December, 1862. For the President's Message, see ANNUAL CYCLOPÆDIA, 1862.

In the House, on the first day of the session, Mr. Cox, of Ohio, offered the following resolution:

Whereas, many citizens of the United States have been seized by persons acting, or pretending to be acting under the authority of the United States, and have been carried out of the jurisdiction of the States of their residence, and imprisoned in the military prisons and camps of the United States, without any public charge being preferred against them, and without any opportunity being allowed to learn or disprove the charges made, or alleged to be made, against them; and whereas, such arrests have been made in States where there was no insurrection or rebellion, or pretence thereof, or any other obstruction against the authority of the Government; and whereas, it is the sacred right of every citizen of the United States, that he shall not be deprived of liberty without due process of law, and when arrested, that he shall have a speedy

and public trial by an impartial jury of his countrymen; therefore,

Resolved, That the House of Representatives do hereby condemn all such arrests as unwarranted by the Constitution and laws of the United States, and as a usurpation of power never given up by the people to their rulers, and do hereby demand that all such arrests shall hereafter cease, and that all persons so arrested and yet held should have a prompt and public trial, according to the provisions of the Constitution.

It was laid upon the table. Yeas, 80; nays, 40.

Subsequently, on the same day, Mr. Richardson, of Illinois, offered the following resolution:

Resolved, That the President of the United States be requested to inform the House what citizens of Illinois are now confined in the Forts Warren, La Fayette, and Delaware, or the old Capitol prison, and any other forts or places of confinement; what the charges are against said persons; also the places where they were arrested. That the President be further requested to inform this House of the names of the persons that have been arrested in Illinois and taken to and confined

* The following is a list of the members of both Houses:

SENATE.

Maine—William Pitt Fessenden, Lot M. Morrill.
New Hampshire—Daniel Clark, John P. Hale.
Vermont—Solomon Foot, Jacob Collamer.
Massachusetts—Charles Sumner, Henry Wilson.
Rhode Island—Henry B. Anthony, Samuel G. Arnold.
Connecticut—Lafayette S. Foster, James Dixon.
New York—Preston King, Ira Harris.
New Jersey—John C. Ten Eyck, Richard S. Field,* James W. Wall.†
Pennsylvania—Edgar Cowan, David Wilmot.
Delaware—James A. Bayard, Willard Saulsbury.
Maryland—Anthony Kennedy, Thomas H. Hicks.
Virginia—John S. Carlile, Waitman T. Willey.
Kentucky—Lazarus W. Powell, Garrett Davis.
Missouri—John B. Henderson, Robert Wilson.
Ohio—Benjamin F. Wade, John Sherman.
Indiana—Jos. A. Wright, Henry S. Lane, David Turpie.‡
Illinois—Orville H. Browning, Lyman Trumbull.
Michigan—Zachariah Chandler, Jacob M. Howard.
Wisconsin—Timothy O. Howe, James R. Doolittle.
Iowa—James W. Grimes, James Harlan.
Minnesota—Henry M. Rice, Morton S. Wilkinson.
California—Milton S. Latham, James A. McDougall.
Oregon—James W. Nesmith, Benjamin F. Harding.
Kansas—S. W. Pomeroy, James H. Lane.

HOUSE.

Maine—John N. Goodwin, Charles W. Walton, Samuel C. Fessenden, Anson P. Morrill, John H. Rice, Frederick A. Pike, Thomas A. D. Fessenden.
New Hampshire—Edward H. Rollins, Thomas M. Edwards, Gilman Marston.
Vermont—E. P. Walton, Justin S. Morrill, Portus Baxter.
Massachusetts—Thomas D. Eliot, James Buffinton, Benjamin F. Thomas, Alexander H. Rice, John B. Alley, Chas. R. Train, Amasa Walker, Charles Delano, Henry L. Dawes, Samuel Hooper, Daniel W. Gooch.
Rhode Island—William P. Sheffield, George H. Browne.
Connecticut—Dwight Loomis, Alfred A. Burnham, Geo. C. Woodruff, James E. English.
California—Aaron A. Sargeant, T. G. Phelps, F. F. Low.
New York—Edward H. Smith, Moses F. Odell, William Wall, Frederick A. Conkling, Elijah Ward, Edward Haight, Charles H. Van Wyck, John B. Steele, Stephen Baker, Abraham B. Olin, Erastus Corning, William A. Wheeler, Socrates N. Sherman, Richard Franchot, Roscoe Conkling, E. Holland Duell, William E. Lansing, Ambrose W. Clark, Charles B. Sedgwick, Theodore M. Pomeroy, Robert V. Van Valkenburgh, Augustus Frank, Burt Van Horn, Elbridge G. Spaulding, Reuben E. Fenton, Benjamin Wood, James E. Kerrigan, Isaac C. Delaplaine, James B. McKean,

* Appointed to fill a vacancy occasioned by the death of John R. Thompson.

† Elected by the Legislature in January, 1863, to fill the vacancy occasioned by the death of John R. Thompson.

‡ David Turpie was subsequently elected by the Legislature to fill the vacancy temporarily filled by J. A. Wright.

Chauncey Vibbard, Jacob B. Chamberlain, Alexander S. Diven, Alfred Ely.

New Jersey—William G. Steele, George T. Cobb, Nehemiah Perry, John T. Nixon, John L. N. Stratton.

Pennsylvania—William E. Lehman, John P. Verree, William D. Kelley, William Morris Davis, John Hickman, Sydenham E. Ancona, Thaddeus Stevens, James H. Campbell, Galusha A. Grow, Charles J. Biddle, Joseph Bailey, Edward McPherson, Samuel S. Blair, Jesse Lazear, James K. Moorhead, Robert McKnight, John W. Wallace, John Patton, Elijah Babbitt, J. D. Stiles, John W. Killinger, Hendrick B. Wright, Philip Johnson, James T. Hale, John Covode.

Maryland—Cornelius L. L. Leary, Henry May, Francis Thomas, Charles B. Calvert, John W. Crisfield, Edwin H. Webster.

Virginia—Charles H. Upton, Jacob B. Blair, Joseph Segar, William G. Brown, Kellam V. Whaley.

Ohio—George H. Pendleton, John A. Gurley, Clement L. Vallandigham, William Allen, James M. Ashley, Chilton A. White, Richard A. Harrison, Samuel Shellabarger, Warren P. Noble, Carey A. Trimble, Valentine B. Horton, Samuel S. Cox, Samuel T. Worcester, Harrison G. Blake, James R. Morris, Sidney Edgerton, Albert G. Riddle, John Hutchins, John A. Bingham, Robert H. Nugen, William P. Cutler.

Kentucky—Charles A. Wickliffe, George W. Dunlap, John W. Menzies, Aaron Harding, Samuel L. Casey, George H. Yeaman, Henry Grider, Robert Mallory, John J. Crittenden, William H. Wadsworth.

Tennessee—Horace Maynard, A. J. Clements.

Indiana—John Law, James A. Cravens, W. McKee Dunn, William S. Holman, George W. Julian, Albert G. Porter, Schuyler Colfax, William Mitchell, Daniel W. Voorhees, Albert S. White, John P. C. Shanks.

Illinois—Elihu B. Washburne, Isaac N. Arnold, Owen Lovejoy, William Kellogg, William A. Richardson, James C. Robinson, Philip B. Foulke, William J. Allen, Anthony L. Knapp.

Missouri—Francis P. Blair, jr., Elijah H. Norton, John W. Noell, James S. Rollins, William A. Hall, Thomas L. Price, John S. Phelps.

Michigan—Bradley F. Granger, Fernando C. Beaman, Rowland E. Trowbridge, Francis W. Kellogg.

Iowa—William Vandever, James F. Wilson.

Wisconsin—John F. Potter, Walter McIndoe, A. Scott Sloan.

Louisiana—Benjamin F. Flanders,* Michael Hahn.*

Minnesota—Cyrus Aldrich, William Windom.

Delaware—George P. Fisher.

Oregon—George K. Shiel.

Kansas—Martin F. Conway.

Dakota—John B. S. Todd.

Nebraska—Samuel G. Daily.

Utah—John M. Bernhisel.

Nevada—John Cradlebaugh.

Colorado—H. P. Bennet.

New Mexico—John S. Watts.

Washington—William H. Wallace.

* Elected by authority of the military governor of Louisiana, Decatur, 1862.

in prisons outside of the limits of said State, and who have been released, what were the charges against each of them, by whom the charges were made, also by whose order said arrests were made, and the authority of law for such arrests.

It was laid on the table. Yeas, 74; nays, 40.

In the Senate, on December 2, Mr. Powell, of Kentucky, offered the following joint resolution, which was read and laid over:

Whereas, many citizens of the United States have been seized by persons acting, or pretending to be acting, under the authority of the United States, and have been carried out of the jurisdiction of the States of their residence and imprisoned in the military prisons and camps of the United States, without any public charge being preferred against them, and without any opportunity being allowed to learn or disprove the charges made, or alleged to be made, against them; and whereas, it is the sacred right of every citizen that he shall not be deprived of liberty without due process of law, and when arrested shall have a speedy and public trial by an impartial jury; therefore,

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That all such arrests are unwarranted by the Constitution and the laws of the United States, and a usurpation of power never given by the people to the President or any other official. All such arrests are hereby condemned and declared palpable violations of the Constitution of the United States; and it is hereby demanded that all such arrests shall hereafter cease, and that all persons so arrested and yet held should have a prompt and speedy public trial according to the provisions of the Constitution, or should be immediately released.

Mr. Davis, of Kentucky, offered the following joint resolution, which was also laid over:

Resolved by the Senate and House of Representatives, &c., That it be and is hereby recommended to all the States to choose as many delegates, severally, as they are entitled to Senators and Representatives in Congress, to meet in convention in Louisville, Kentucky, on the first Monday in April next, to take into consideration the condition of the United States, and the proper means for the restoration of the Union; and that the Legislatures of the several States take such action on this proposition as they may deem fit at the earliest practicable day.

On the same day, Mr. Sumner, of Massachusetts, offered the following resolution, which was adopted:

Resolved, That the Secretary of War be requested to furnish to the Senate any information which he may possess with reference to the sale into slavery of colored freemen, captured or seized by the rebel forces, and to state what steps have been taken to redress this outrage upon human rights.

Mr. Clark, of New Hampshire, introduced a joint resolution, approving the policy of the President in setting slaves free in insurrectionary districts, which was read twice, and laid over.

In the House, on the 4th, Mr. Wickliffe, of Kentucky, offered the following resolution:

Resolved, That the Committee on the Judiciary be instructed to inquire and report to this House on the following subjects: First. Under what law there has been appointed a military governor for the District of Columbia. Second. What powers does he possess or exercise, and by and under what law has he derived his power. Third. What salary or compensation is paid him, and out of what appropriation. Fourth. What is the entire annual expense of such military governor, including all sums paid for quarters, guard-houses, and prisons, and for house rent, servants, sol-

diers, and assistants under his control. Fifth. Whether the said office of military governor has interfered with and obstructed the administration of justice and law by the civil or judicial tribunals within the District of Columbia. State the case and facts of such obstruction. And if, in the opinion of the committee, such officer is not provided for by law, that they report a bill prohibiting his existence and the exercise of power by him.

It was moved to add to the second inquiry the words, "in the said District, or in the State of Pennsylvania, or in any of the United States." The resolution and amendment were laid over. Yeas, 85; nays, 46.

Mr. Stevens, of Pennsylvania, offered the following resolutions, and moved their postponement:

Resolved, That this Union must be and remain one and indivisible forever.

Resolved, That if any person in the employment of the United States, in either the legislative or executive branch, should propose to make peace, or should accept, or advise the acceptance, of any such proposition on any other basis than the integrity and entire unity of the United States and their Territories as they existed at the time of the rebellion, he will be guilty of a high crime.

Resolved, That this Government can never accept the mediation or permit the intervention of any foreign nation in this rebellion in our domestic affairs.

Resolved, That no two governments can ever be permitted to exist within the territory now belonging to the United States, and which acknowledged their jurisdiction at the time of the insurrection.

Mr. Wickliffe: "If in order now to amend the resolutions, I offer to add the following words:"

That any officer of the United States, either executive, legislative, or judicial, who is opposed to close the present war upon preserving the Constitution as it is, with all its guarantees and privileges, and the union of the States as established by said Constitution, is unworthy to hold such office, and should be dismissed or removed from the same.

The Speaker: "After a motion to postpone, it is not in order to move an amendment."

The motion to postpone was agreed to.

On the next day Mr. Vallandigham, of Ohio, proposed the following resolutions as amendments to those of Mr. Stevens:

1. *Resolved,* That the Union as it was must be restored and maintained one and indivisible forever under the Constitution as it is—the fifth article, providing for amendments, included.

2. *Resolved,* That if any person in the civil or military service of the United States shall propose terms of peace, or accept or advise the acceptance of any such terms, on any other basis than the integrity and entirety of the Federal Union, and of the several States composing the same, and the Territories of the Union, as at the beginning of the civil war, he will be guilty of a high crime.

3. *Resolved,* That this Government can never permit the intervention of any foreign nation in regard to the present civil war.

4. *Resolved,* That the unhappy civil war in which we are engaged was waged in the beginning, professedly, not in any spirit of oppression or for any purpose of conquest or subjugation, or purpose of overthrowing or interfering with the rights or established institutions of those States, but to defend and maintain the supremacy of the Constitution and to preserve the Union with all the dignity, equality, and rights of the several States unimpaired, and was so understood and accepted by the people, and especially by the Army and Navy of the United States; and that, therefore, whoever

shall pervert, or attempt to pervert, the same to a war of conquest, and subjugation, or for the overthrowing or interfering with the rights or established institutions of any of the States, and to abolish slavery therein, or for the purpose of destroying or impairing the dignity, equality, or rights of any of the States, will be guilty of a flagrant breach of public faith and of a high crime against the Constitution and the Union.

5. *Resolved*, That whoever shall propose by Federal authority to extinguish any of the States of this Union, or to declare any of them extinguished, and to establish territorial governments within the same, will be guilty of a high crime against the Constitution and the Union.

6. *Resolved*, That whoever shall affirm that it is competent for this House or any other authority to establish a dictatorship in the United States, thereby superseding or suspending the constitutional authorities of the Union, and shall proceed to make any move toward the declaring of a dictator, will be guilty of a high crime against the Constitution and the Union and public liberty.

The resolutions were laid on the table. Yeas, 79; nays, 50. On the same day, Mr. Morrill, of Vermont, offered the following resolution:

Resolved, That at no time since the commencement of the existing rebellion, have the forces and materials in the hands of the executive department of the Government been so ample and abundant for the speedy and triumphant termination of the war as at the present moment; and it is the duty of all loyal American citizens, regardless of minor differences of opinion, and especially the duty of every officer and soldier in the field, as well as the duty of every department of the Government—the legislative branch included—as a unit, to cordially and unitedly strike down the assassins, at once and forever, who have conspired to destroy our Constitution, our nationality, and that prosperity and freedom of which we are justly proud at home and abroad, and which we stand pledged to perpetuate forever.

This resolution was adopted by the following vote: Yeas, 105; nay, 1—W. J. Allen.

Subsequently, Mr. Cox, of Ohio, offered the following explanatory resolution:

Resolved, That the word "assassins," used in the resolution this day offered by the member from Vermont, [Mr. Morrill], is intended by this House to include all men, whether from the North or the South, who have been instrumental in producing the present war, and especially those in and out of Congress who have been guilty of flagrant breaches of the Constitution, and who are not in favor of the establishment of the Union as it was and the Constitution as it is.

This resolution was laid on the table. Yeas, 85; nays, 41.

In the Senate on the 8th of December, Mr. Saulsbury, of Delaware, offered the following resolution:

Resolved, That the Secretary of War be, and he is hereby directed to inform the Senate whether Dr. John Laus and Whitely Meredith, or either of them, citizens of the State of Delaware, have been arrested and imprisoned in Fort Delaware; when they were arrested and so imprisoned; the charges against them; by whom made; by whose orders they were arrested and imprisoned; and that he communicate to the Senate all papers relating to their arrest and imprisonment.

Mr. Saulsbury, in calling for the consideration of the resolution, said: "These two gentlemen, one of whom resides in my own county, and the other not far off, in the adjoining county, are

known to me personally, and have been for a number of years; and as their friends do not know of any just cause why they should be imprisoned in Fort Delaware or elsewhere, I have felt it my duty to call for this information. I hope the Senate will not perceive any reason for refusing to comply with this request. If they are there properly, if they have been guilty of any attempt to subvert the Government, if they have acted traitorously in any respect, their friends do not know it; I do not know it, and I do not believe it. They have been in Fort Delaware now for some time, and neither themselves nor their friends have been apprised of any cause for their arrest, or of the reasons upon which the arrests were made."

Mr. Wilson, of Massachusetts, opposed the adoption of the resolution, saying: "I think the Senate of the United States ought not to be engaged during this brief session in calling upon the Government for this kind of information, or in arraigning the administrators of the Government. We have had some arrests made, and it is possible there may have been some mistakes made; but I believe that instead of the few hundred arrests we have had, we ought to have had several thousand, and that not one man in ten who ought to have been arrested, has been arrested. I know the Government of this country has forborne a great deal. Adopting this resolution at this time looks to me as a sort of arraignment of the Government of the country for making these arrests—arrests that have done much toward maintaining the just authority of this Government. Never since the dawn of creation has any Government menaced by insurrection or rebellion been so considerate, so forbearing, so just, so humane, so merciful. While spies and traitors are skulking around us, ready to destroy the life of the nation, I am unwilling to censure the Government of my country for protecting the nation menaced by assassins."

Mr. Bayard, of Delaware, thus urged the resolution: "I always supposed that the great value of this Government consisted in the fact that it afforded, beyond all other Governments, the best guardianship to the liberty of the individual citizen. Sir, what is the state of things now? The honorable senator from Massachusetts tells us that, in his opinion, the Government have forborne; that some mistakes may have been made in making arrests, but that they ought to have gone farther than they have gone. The question does not lie there. The question lies in the great principle that the liberty of the citizen ought to be protected against the Government, except by public judicial inquiry on facts *prima facie* established by affidavit in order to justify his incarceration, because incarceration is imprisonment, it is punishment. In no free Government can the citizen be arrested at the will of an officer—I do not care who the officer is, whether a Secretary of War or a Secretary of the Navy, or any subordinate to whom a Sec-

retary chooses to delegate the power; and it is impossible to call the Government where such a power exists a free Government."

Mr. Doolittle, of Wisconsin, thus objected: "Mr. President, this complaint of the great oppression of this Government because, in time of war, men have been arrested under circumstances to raise suspicions of their loyalty, it seems to me is not very well founded, so long as the prison door is open to all arrested upon suspicion only, if they will simply take the oath of allegiance and to support the Government. I think, sir, I am not misinformed in this respect. There has been some complaint, and with more reason, perhaps, made against the Government because it has been too lenient toward men who have been notoriously engaged, in sympathy and in act too, with the traitors against the Government; and the complaint has been, not because suspected parties have been arrested, but because the guilty have not been shot or hung; that the prison door has been opened too easily to many of these men."

Mr. Saulsbury, in further urging the adoption of the resolution, stated as follows: "We do hold that a State situated as we are, where there has never been any attempt to resist Federal authority, should have some consideration in the American Senate. But, sir, I tell the Senate that at our last general election armed soldiery were sent to every voting place in the two lower counties of the State of Delaware. I am informed that this soldiery consisted of men from New York, from Pennsylvania, and from Maryland. When I went to vote myself, I had to walk between drawn sabres in order to deposit my ballot. Peaceable, quiet citizens, saying not a word, on their way to the polls, and before they had got to the election ground, were arrested and dragged out of their wagons and carried away. Peaceable, quiet citizens were assaulted at the polls. I do not, however, propose to discuss these matters now; I may do so hereafter. I simply wish to call the attention of Senators to this fact, which distinguishes us from States that are in revolt: we have offered no resistance to Federal authority."

Mr. Bayard, in reply to Mr. Doolittle, said: "He tells us he thinks the Government has been too forbearing; that men ought not only to have been arrested and imprisoned, but that they ought to have been shot or hung. Shot or hung in this country without a trial? Shot or hung, according to the generality of his language, "for sympathy?" Is that the state of things throughout the United States? Is that what we are to expect to see established in this country—that sympathy is to be the ground on which a man is to be hung? You may charge sympathy on a man because he differs from you in opinion. Suppose a man believes that the restoration of the Government of this country over the revolted States cannot be effected by war; the Administration

may say that is an evidence of sympathy with rebellion, and hang a man for that! That is the doctrine, as I understand it. It seems to me that there could not possibly be a form of Government more despotic in its character—and I might use a much stronger term—than a Government that would carry out such a principle as that in action."

Mr. Doolittle immediately rose to explain, saying: "I did not intend to be understood that men who are arrested should be either shot or hung without trial. If anything that I said led the gentleman from Delaware to suppose such was my meaning, I did not express myself as I intended. I simply say that the complaint against the Government is that they have not been either shot or hung. I ought to have said, perhaps, tried, shot, and hung."

Mr. Hale, of New Hampshire, thus expressed his views: "I have regretted the exercise of this power from first to last; but, sir, I will say that where the emergencies of the country are such, and the condition of things is such, as to justify a resort to extraordinary proceedings for the safety of the Government, I am willing that the Executive should act upon that old maxim, which, translated into plain English, is, "The safety of the republic is the supreme law." I confess, for myself, that nothing in the whole history of the war has so embarrassed me, has left me in such doubt what course to take and pursue, as questions of this character. I have as earnest a desire for the preservation of the Constitution in all its integrity as anybody else; and it matters not to me whether victory or defeat attends our arms, if, when the war is over, it does not leave us a constitutional Government. We are at war for that, sir; and I hope we shall make every sacrifice that is necessary to sustain it. That being our object and our end and our aim, I would not now, while the enemy is in the field, and while the contingencies of battle are pending, and the issues of life or death are suspended upon the result, impede or hinder those who are charged with the execution of the laws by inquiries which are not vital to the Government. I do not look upon this as so, because I believe it is one that belongs to the judiciary to examine and settle; and if anybody has made an attempt to apply that remedy and has failed, it will be time enough then to look to some ulterior course."

Mr. Bayard, of Delaware, in reply said: "The President of the United States—rightly or wrongly is immaterial; I am not going to enter into that discussion—has asserted the right to dispense with the law which requires the *habeas corpus* to be issued in any case of judicial arrest. He has claimed that right; he has exercised that right. He has openly, through the Secretary of War, issued a proclamation which virtually subverts this Government, if carried out in practice; because the Secretary of War is authorized to appoint an indefinite number of men, constituting a corps of provost

marshals, who are to have the right, in addition to their military duties, to arrest any citizen throughout the country on indefinite charges, and to call in military aid to sustain their action; and they are to report to the central authority at Washington, and hold the party in custody subject to the orders of that central authority. There is no law which authorizes such an organization as that. If the judiciary attempt to intervene, as in the case of the prisoner at Fort Warren, the bayonet of the soldier prevents the service of the writ upon the military commandant who has possession of the prisoner. The judiciary, then, are powerless for redress; and under this asserted right on the part of the President, that feeblest department of the Government being powerless to redress individual wrong, if the legislative branch, which is equally powerful with the executive, are not to interpose by calling for the information, the facts, and by the expression of their opinion, if it be necessary, when the facts are returned to them, what protection has the citizen against the aggressions of executive power? Can a Government be a free Government, where, when the judiciary is set at defiance, the legislature unites in saying to the citizen: 'You shall have no investigation; you may be arrested by officers unknown to the law, indefinite in numbers, on offences unknown to the laws, not described, for disloyal practices, which may mean anything that an executive officer pleases; you may be arrested not only by the order of a functionary at Washington, who, from his position, may be supposed to have ability to exercise some discretion, but you may be arrested at the discretion of any one of his subordinate deputies, and an investigation is not to be made by any other tribunal than by an *ex parte* return made in your absence, and without any power of investigation on your part, to the central authority at Washington?' If the proclamation of the President of the 26th of September be carried out, and the general facts that have occurred taken as matters of history, that is the state of things and the power claimed by the executive. Sir, I consider that power a subversion of this Government. I consider it also unnecessary; and though the honorable senator says that while we are engaged in war he would not call for any account from the executive department for its actions, I submit there is a wide distinction there. I am asking nothing in reference to a continuation of the war. I am seeking not to embarrass the Government in reference to the prosecution of the war; but war certainly can be in the present, as it has been in the past, prosecuted without trampling upon the rights of the individual citizen at home, and in States which are entirely untainted by anything like resistance to the authority of the Federal Government."

Mr. Sherman, of Ohio, expressed the following views on the arrests which had been made: "I say to my political friends that we cannot

afford these arrests; they should not be made except where the facts are so glaring that when they are stated to us here by the Secretary of War, every one of us will say he did right in making the arrest. We ought, in justice to ourselves and to our constituents, to demand of the Secretary of War a reason in every case for the arrest made. I have that confidence in the President of the United States, who I believe is thoroughly honest and patriotic, and who would deprive no man of his liberty without good cause, and I have that confidence in the Secretary of War to believe, especially since this subject has been made the object of public inquiry, that they will not make any arrest except for cause that in the opinion of every loyal senator would justify the arrest. Congress neglected its duty in not, at the first session after the opening of this rebellion, authorizing in terms, by law, the suspension of the writ of *habeas corpus*, and imposing conditions upon arrests, requiring the cause of the arrest to be reported to Congress in each case, and requiring an examination by a military or other court. The power to suspend the writ of *habeas corpus* should only be exercised with all the guards that can be thrown by wise legislation around it. Such a power uncurbed, unregulated, and unchecked, would make this Government a despotism worse than England ever saw, worse than France was in the time when *lettres de cachet* were used for the arrest of citizens, and they were confined in dungeons for forty years. The power to suspend the writ of *habeas corpus*, while it must be exercised in certain cases for the public safety, ought to be so guarded by legislation that no oppressive act to the citizen can be done, and in every case of an unlawful arrest the legislation of Congress ought to require that the person making the arrest should make a formal report to Congress, so that we and our constituents might judge whether the necessity justified the arrest."

Mr. Powell, of Kentucky, followed in favor of the resolution. He said: "Taking it for granted that the writ of *habeas corpus* is suspended by competent constitutional authority, then I hold that they have no right to make these arrests. The writ of *habeas corpus* has nothing to do with the arrest of an individual. The whole scope, verge, and object of the writ of *habeas corpus* is to relieve a man, when arrested, from illegal imprisonment. The object is to open the prison doors, and to bring him before the court, to inquire whether he is lawfully detained or not; and if he has been lawfully lodged in the prison, it is the duty of the judge before whom he is brought to remand him to prison, and if it is a bailable case, to allow him bail, and if he is illegally imprisoned, to let him go free. That is the only object of the writ of *habeas corpus*. It is a great remedial writ. The suspension of that writ confers no authority on any officer in this Government to make an arrest. The arrest and the discharge are separate and distinct things.

"I hold that there is no authority vested by the Constitution of the United States in the President or any of his cabinet ministers to make these arrests; and whenever they exercise such a power it is an act of usurpation and an overthrow of the Constitution of the country. The Constitution defines what are the duties of the various departments of this Government. The duties of the executive are plainly marked out in the instrument. So it is with the legislative power; so it is with the judicial power. Upon each and every one of these distinct bodies of the magistracy are conferred separate and distinct powers which they can legitimately exercise; and whenever they go beyond the powers prescribed in the Constitution, they usurp an authority not given to them by the law, and deserve and should receive the honest censure of every loyal man in the country—I mean of every man loyal to the Constitution of the country.

"Now, sir, I ask senators who claim that the President and his cabinet ministers have exercised this power rightfully, to point me to the clause in the Constitution or the law that authorizes those officials to arrest a citizen, a civilian. The President, as commander-in-chief of the army and navy, may have the right, by virtue of the laws passed to regulate the army and navy, to make arrests of persons employed in land and naval service; but I ask senators to show the law that authorizes him to make an arrest of a citizen not connected with either service. Why, sir, even suppose the position of the senator from New Jersey were true, that the President has a right to suspend the writ of *habeas corpus*, does it necessarily follow, after that suspension, that he has a right to arrest whom he pleases? If so, I would not give a fig for the liberties of this people. If it be so, any President who is wicked enough and abandoned enough to do it, may, *ad libitum*, overthrow the liberties of this country."

Mr. Fessenden, of Maine, rose to ask a question of the senator, saying: "My question is this: If he were at the head of the Government, and he were satisfied in his own mind that an individual, in a time like this, was about to commit a crime, the consequence of which would be exceedingly injurious to the Government itself, and would strengthen the arm of the rebellion, and there was no other way in which he could prevent it, would he not prevent it, would he not arrest the individual without law, and hold him by the strong hand, for the safety of the people?"

Mr. Powell, in reply said: "I will say to the senator, that if I were the President (which is not a supposable case) I would by no act violate the Constitution and laws of my country. If I thought that a man was about to do anything wrong, and there was a law of the land by which I could have him arrested and punished, or placed under bonds for good behavior, I would have the law executed. If there was no law to reach the case, and I

thought the man meditated very great injury, I think I would have a watch kept on him, and prevent his committing the act, and then, at the next session of Congress, I would recommend the passage of a law for the punishment of just such an offence. I would adhere to the law."

Mr. Fessenden replied: "The senator forgets one clause of my question, and that is that there was no other way to prevent it."

Mr. Powell, in answering, said: "The senator is supposing a state of facts that could not exist."

Mr. Collamer, of Vermont, now rose to ask a question: "If a man cannot be unlawfully imprisoned while the *habeas corpus* is in force, when it is suspended may he not be imprisoned unlawfully?"

Mr. Powell in reply said: "If the writ of *habeas corpus* is suspended, the party may be held in prison either lawfully or unlawfully. If he is in prison, having been put there lawfully or unlawfully, the suspension of the writ of *habeas corpus* only denies him the great remedial process by which he is taken before the court, and the legality of his imprisonment inquired into by the court. That is all it does."

Mr. Collamer: "Does the gentleman wish to be understood that the *habeas corpus* can only be used for the purpose of inquiring whether the process was legal?"

Mr. Powell: "No, sir; it may be used to inquire whether he is rightfully deprived of his liberty; whether he is confined by virtue of legal process or not."

Mr. Collamer answered: "No, sir; questions of guilt or innocence are never tried on a writ of *habeas corpus*."

Mr. Powell continued: "In some classes of cases, the guilt or innocence may be inquired into. So far as the record shows guilt or innocence, it is a proper inquiry."

Mr. Collamer: "They require a jury."

Mr. Powell: "Upon a *habeas corpus*, the facts in the record which go to show the guilt or innocence of the party are before the court, and upon them they may decide whether he is rightfully or wrongfully imprisoned. If from the facts in the record it appears he is guilty, he is rightfully imprisoned; if innocent, he is wrongfully imprisoned, and is let go free. In the inquiry arising upon *habeas corpus*, the guilt or innocence of the party, to some extent in a certain class of cases, is necessarily looked into."

Mr. Collamer: "If a *habeas corpus* is brought to relieve a man charged with murder, does that *habeas corpus* enable the judge or court, before whom it is brought, to try in any way whether that man is guilty of the murder or not?"

Mr. Powell: "I am astonished that so good a lawyer as the senator from Vermont should ask such a question. We know that it is not the function of a judge, before whom a prisoner is brought on a writ of *habeas corpus*, to try

and pass judgment upon him. He can only be tried by a jury. The judge, however, on the return of the *habeas corpus*, inquires into the cause of the arrest, and if on all the facts that are developed in the record the presumptions are that he is guilty, the judge sends him back to confinement, and if it appears that he is innocent, he is allowed to go free. The judge may incidentally inquire into the facts in the class of cases to which I have alluded, though he does not do so for the purpose of inflicting punishment. But, Mr. President, I wish to ask the senator from Vermont a question, if he will allow me to do so. My question is, whether the legitimate suspension of the writ of *habeas corpus* authorizes the President of the United States to arrest and imprison a man? I wish the senator to answer that question, for that is the gist of the whole point I make."

Mr. Collamer in reply said: "I merely say, that the exercise of the power of the courts in the use and sustaining of a *habeas corpus* before them, is confined simply to the question of the process by which a man is holden; the legality of that process; and if the *habeas corpus* is suspended in relation to that subject matter, then the court has no control or jurisdiction over it."

Mr. Powell continued: "I differ from the senator, if he will allow me, about the definition he has given about the object of the writ of *habeas corpus*. He says the only object is to inquire whether the process under which the prisoner is held is legal or not. I am very well aware that, under the common law, the writ of *habeas corpus* was more circumscribed than it is in many of our States. It has been very much enlarged by statute. But I know that you have a right to a *habeas corpus* to bring persons before a court, to be released from unlawful confinement, when they are confined by no process whatever; and consequently, the senator is too limited in his explanation. There is a large class of persons, infants, for instance, who are held by others; there are persons held by certain societies of people—the Shakers, for example—and writs of *habeas corpus* are allowed for such persons, though they are not held by virtue of any process. The writ can be issued to bring a party before the court whenever he is restrained of his liberty, and the court is not limited to an inquiry as to the legality of the process, but inquires as to the right of the party to hold him."

Mr. Collamer replied: "The idea that a man may be holden without process is not contemplated by the law. The command of the writ is to bring the body of A B and the cause of his confinement. That is the *cum causâ*, the great writ. It is not the *habeas corpus ad satisfaciendum* that we are talking about, but the *habeas corpus cum causâ*, and the command of the writ is to bring the body, with the cause of confinement."

Mr. Powell: "He may be brought with the cause without bringing the process. If I had the senator's infant son in my custody, would he not have a right to the writ of *habeas corpus*, to inquire into the cause of the detention, and should I not then be at liberty to say that the son was apprenticed to me, or to give any other good reason for holding him?"

Mr. Collamer: "Certainly."

Mr. Powell: "That shows clearly that the question is not always whether the process is legal or not, because persons may be held without process."

Mr. Collamer: "By the word 'process,' I mean not merely technical process, but the instrument, the authority by which a person is holden, let it be what it may; and that authority is the thing to be looked into, and that only."

Mr. Powell: "Still, my excellent friend does not answer my question. I should like any senator to get up here and show me the authority of the President, or any of his cabinet ministers, to make arrests. That is the point to which I wish to direct attention, and I ask the country to look right to that point."

Mr. Morrill, of Maine, opposed the resolution, saying: "We are informed in this resolution—I think substantially, although it does not take that form in terms—that certain persons in Delaware have been arrested by the commander-in-chief of your army and navy, and have been restrained of their liberty. That is the charge substantially."

"Well, sir, what of it? It is said that it is extraordinary and tyrannical. Well, that depends upon what? Why, they say it is so because it is without shadow of law. That is a question to be examined; that is a question to be considered. But I repeat, what of it? Is it extraordinary that such things should occur in a time of civil war, in a time of gigantic rebellion, when a million of armed men are arrayed on the side of the supremacy of the Constitution and the laws; when as many more stand for the overthrow of this Constitution, and against the supremacy of the laws; when one half of your Confederacy is in rebellion against your authority, and armed rebels confront you, and denounce your authority and defy it, and when we know that those rebels have allies throughout the whole country, that traitors infest every portion of your country in sympathy and alliance with rebels under arms? I say, sir, that when such a state of affairs is evident, showing that the whole country is involved in civil war, not partial, affecting a few interests; not local, confined to a few places; but general, extending to the utmost confines of the republic, involving every interest, and reaching to every fireside in the land, making our condition one of war, a state of general intestine strife and commotion, affecting the liberty and the rights of every man, woman, and child in the nation, and making our condition to-day, instead of one of peace, one of war, gen-

eral war, general internal civil war, the laws of war everywhere embrace this nation in its length and its breadth. The laws of war are the law of the land, sir; not the Articles of War, as the senator from Kentucky says, but the principles of war, as defined by international law, govern us. That is our state to-day and our condition to-day, and in that sense it is the higher law; it is the law above the Constitution and above all laws; it is the law of our life and the law of our existence to-day—the *ultima ratio*. Our state to-day is that state known to nations when the laws are silent. Your municipal regulations and your Constitution have no law for such an occasion and such a time; but the law known to nations everywhere, the right of self-defence, the *ultima ratio*, is the law of our life and the law of our destiny. Therefore, sir, under such circumstances, it is easy for me to say, I vote for no such resolutions, because the presumption is, if the commander-in-chief has arrested men under these circumstances and imprisoned them, he has rightfully done it."

Mr. Wright, of Indiana, thus expressed his views: "I agree with the senator who said, the other day, that it was very remarkable that only five hundred arrests had been made. I understand that from the time this rebellion broke out down to the present, the arrests made by order of the President have not exceeded that number. It is, indeed, an astonishing fact that, in this entire country, with the land full of treason, with our very capital full of traitors, so few have been arrested. It would be very strange if, in some of these instances, there were not cases of great hardship. I am willing, however, to trust these affairs to the President, and, when necessary, to aid in the passage of a resolution calling on him to report to this body the facts, if he does not deem such a course inconsistent with the public interest. The President is the representative of the unity, the power, and the strength of this republic. I hold him responsible. I wash my hands of that miserable doctrine too often inculcated here, that in such a time as this there is such a thing as loyalty to the Government and disloyalty to those in power. Sir, there is but one true loyalty, and that is unconditional adherence to, and support of, those who stand at the helm of the Government, placed there by the people to direct, whether in calm or storm, the great affairs of state."

Mr. Bayard, of Delaware, in reply, said: "Sir, I regret that gentlemen will bring extraneous matters to bear on this resolution of inquiry; but they may do so if they please, and they may give to it a party aspect and invite party support, for the purpose of smothering the resolution. Be it so; but they cannot smother the debate; they cannot keep from the people of the country the knowledge of the fact that a citizen of the United States, in a State where the courts are open, is denied redress by the

executive for the wrong through the law of the land and through the judicial power, and that when he comes by his representative and asks barely for information as to the cause why he has been arrested and detained in prison for two months, he is told, 'We will make no inquiry whatever; we will leave everything to the President;' or, perhaps, in the language of the honorable senator from Indiana, that loyalty must be to an Administration and not to a Government, and that it is a miserable sentiment for a man to say that, in a republic, loyalty means affection to the laws and Constitution, and a determination to sustain them. I uttered that sentiment."

Mr. Fessenden, of Maine, thus expressed his views: "Sir, I hold—and I may be accused perhaps of not exactly understanding quite so much about private rights as my honorable friends on the other side of the chamber—I hold that the safety of the republic is the supreme law. Now, sir, allow me to say, most respectfully, it is useless in this day to attempt to apply rules to the conduct of the Government that you would apply in time of peace. The senator's argument would be a very able one if it was fitted to the times; but the people of the country cannot fail to see that what may be necessary at one time is not at another, and what is an excuse at one period is no excuse under other circumstances. Because the President, in this time of war, in this time of rebellion, in this time of danger, has seen fit to lay his hand upon men 'without due process of law,' in the language of the Constitution, they will not judge that, therefore, he has forgotten what is due to every citizen of the country, but will believe that what he may have done in reference to matters like these has been done honestly in the endeavor to discharge his great duty to protect, preserve, and defend the Constitution of the United States. That is all they desire to know, and all that the people will desire to know so long as the rebellion continues. When the time comes, if it ever does arrive, that, in my judgment, the President, either by himself or those who are his servants in the eye of the law, is exercising his power maliciously, even carelessly, with reference to men, I am willing to call him to account; but until that time comes, I am willing to leave it to them, and I will not compel them to give reasons for their action which they may think will place the country in a worse attitude than it is at present."

Mr. Bayard, in reply, said: "The honorable senator seems to labor under what I consider this delusion—that supposing the President to mean rightly, that his intention is honest, therefore you are not to question his acts, and not to oppose them, or not to redress the wrong that he does. I hold that to be an exceedingly erroneous and dangerous doctrine. The President might be a timid man, and timidity always resorts to violence; but his intention might not be wrong. He may be a

man who lacks judgment; and his error of judgment might lead him into improper measures. Are not those measures to be opposed, because you do not impugn the motive of the man who has committed it? That is one point on which I think the senator's argument has led him into error."

Mr. Davis, of Kentucky, followed in a lengthy speech, saying: "In this day of bold and ruthless innovation, it has also been claimed that the right to suspend the writ of *habeas corpus* is an executive and not a legislative power? Is there anything more untrue than that position? What! a right to repeal a law, to dispense with, to suspend a law temporarily, is an executive power? Sir, what is the essence and nature of an executive power in our Government? It is to execute the law, to enforce the law; not to throw obstructions in the way of the law, and to defy its execution. Why, sir, this question was tested two centuries ago in England. The Stuarts claimed the power to suspend the law, to dispense with the law; and the claim and exercise of this high prerogative, even in that monarchical Government, brought one of them to the block, and lost to the other his crown and sent him an exile into foreign countries. Have we come to this, that an act of tyranny, of oppression, which in England lost a head to one monarch and a diadem to another, shall be claimed as the constitutional right of the President of the United States? Sir, here is a short argument upon this question of *habeas corpus*, which, to my mind and judgment, is unanswerable: the power to pass a law is a legislative power, it is not an executive one; the power to repeal a law is a legislative power, it is not an executive one. What is the suspension of a law but its temporary repeal? The only executive function in relation to a law is to enforce it. What process of reasoning, what rule of logic, would allow the President of the United States the power to suspend a law that would not give him the greater power of repealing it?

"The President and all men who do these acts are trespassers—trespassers by the law. They may be sued as trespassers, and when they are, they can give the whole state of fact in evidence before the jury in mitigation of damages; and in such cases as have occurred and many others, the verdict of the jury would be that the plaintiff recover one cent. But, sir, this Congress, with all its fancied power, with all the power which it may imagine appertains to it in time of war, can pass no law that would screen the President of the United States from an action of trespass in such a state of fact as that, in the name of the humblest citizen of America. No, sir; any act which you may pass on the subject being pleaded as a defence, would be laughed at by a lawyer engaged in the prosecution, and would be hooted in scorn by any man sitting as a judge who had the legal learning and independence that should belong to a court.

"I am no prophet, but I will tell you where we are drifting to. The power of the nation and of this Government is in the valley of the Mississippi, and that power is going to enlarge from day to day until it overshadows the Pacific and the Atlantic slopes. The people of the great West and the Northwest understand this Constitution, the masses of them. They have given their minds and their hearts to its support. They will, when it becomes necessary, give their lives, too, to this holy cause, and they will be willing martyrs in its defence and for its preservation. No Utopian dream for the freedom of the negro will ever lure or corrupt them from their allegiance to the Constitution. They know that the State of Kentucky has as much right to continue that condition of the African race, domestic slavery, as Massachusetts or Rhode Island had to abolish it. The Constitution is so written. That is its provision; that is its spirit. Away with this nonsense, that slavery has been the cause of the war.

"How many wars have been waged, the Christian religion being the pretext! What oceans of blood have been shed in the name of our holy religion, and to propagate the faith that was given to us by the Redeemer of the world! Will you charge the Christian religion with having caused these wars, and say that therefore the Christian religion is to be put down? What caused the war of 1812? Was it not the violation of 'free trade and sailors' rights?' Was it not that England claimed to be the mistress of the seas, and to exercise upon the decks of our vessels the ruthless power of dragging native citizens from under the stars and stripes, and making them fight against their country under the union jack? You might as well say, destroy the foreign commerce of the United States and the shipping of the Eastern States, because this commerce and shipping was the cause of that war."

The question was now taken on laying the resolution on the table, and decided as follows:

YEAS — Messrs. Anthony, Arnold, Browning, Chandler, Clark, Collamer, Dixon, Doolittle, Fessenden, Field, Foot, Foster, Grimes, Hale, Harlan, Harris, Howard, Howe, King, Lane of Kansas, Morrill, Sumner, Ten Eyck, Trumbull, Wade, Wilkinson, Wilmot, Wilson of Massachusetts, and Wright—29.

NAYS — Messrs. Bayard, Carlile, Cowan, Davis, Harding, Henderson, Kennedy, Nesmith, Powell, Rice, Saulsbury, Willey, and Wilson of Missouri—13.

In the House, on December 8th, Mr. Stevens, of Pennsylvania, introduced a bill to indemnify the President and other persons for suspending the privilege of the writ of *habeas corpus*, and acts done in pursuance thereof, which was read. Objection was made to the second reading, which was not sustained. The bill was then put on its passage.

Mr. Olin, of New York, said: "I hold that the President had the authority by law, and was the proper tribunal, to exercise all the power that he has exercised in suspending

the writ of *habeas corpus*; nevertheless, I concur with my friend from Pennsylvania that a bill of this character is proper under the circumstances. But while I thus concur with him, I would regret above all things to see a measure of this kind thrust through the House without a moment's consideration, and probably without ten members of the House knowing the legal effect of the provisions of the bill. This mode of legislation is discreditable to the country, and discreditable to this House."

Mr. Colfax, of Indiana, urged the immediate passage of the bill, thus: "I think a majority of the House are prepared to pass the bill now. Instead of being anything discreditable, I think it would be highly creditable to the House to pass the bill at this early stage of the session. We all understand the whole question. It has been discussed all over the land whether the President should have authorized the suspension of the *habeas corpus* as to persons charged with treason, or with sympathizing with it during this rebellion or not. All that has been done has been done by his authority communicated to his secretaries, and through them to others. I stand ready to pass a bill indemnifying him. We have either to vindicate him as now proposed, or leave him to be persecuted as soon as he retires from office by those whom he arrested. I rejoice that I have this opportunity of voting for this bill, and I hope it will pass at once."

The bill stated that since the 4th of March, 1861, the United States have been in an insurrectionary condition; that the public safety has required the suspension of the writ of *habeas corpus*; that during that time the privilege of said writ had been several times suspended by the President of the United States, and that several arrests and imprisonments had taken place under and in consequence thereof, and that there was not entire unanimity of opinion as to which branch of the government possessed constitutional power to declare such suspension. It, therefore, enacted that all such suspensions, arrests, and imprisonments, by whomsoever made or caused to be made under the authority of the President, should be confirmed and made valid; and it indemnified and discharged in respect thereof the President, secretaries, heads of departments, and all persons who have been concerned in making such arrests, or in doing or advising any such acts, and made void all indictments, informations, actions, suits, prosecutions, and proceedings whatsoever, commenced or to be commenced against the President, or any of the persons aforesaid, in relation to the acts or matters aforesaid, or any of them.

The second section invested the President during the existence of the war with authority to declare the suspension of the privilege of the writ of *habeas corpus*, at such times, and in such places, and with regard to such persons, as, in his judgment, the public safety might require.

Mr. Stevens, of Pennsylvania, thus explained

the bill: "It provides that the President and cabinet, and all who, in pursuance of their authority, have made arrests during the time of the declared suspension, shall be indemnified and saved harmless. That is the full extent of the bill. It goes no farther in any of its provisions."

Mr. Thomas, of Massachusetts, objected to the bill. He said: "A bill of indemnity is that which secures to an officer who may have, through mistake or otherwise, violated the law, an indemnity for that proceeding. It does not necessarily deprive a party of his civil remedy. If a man has been unjustly or illegally imprisoned—however long his imprisonment or grievous his injury—he is deprived by this bill of any remedy or redress whatever. He alone is to suffer, and not the Government. If the gentleman from Pennsylvania will put his bill in such form as to indemnify officers acting under the direction of the President, still leaving the parties to their civil remedy if they were illegally and without cause imprisoned, I could support it. I could not, without further opportunity for examination, vote for this."

Mr. Stevens, of Pennsylvania, replied: "The gentleman from Massachusetts (Mr. Thomas) will find on examination—and I dare say that he has examined it—that I have drawn this bill precisely according to the English precedents; that I have used precisely the language used by all of the bills of indemnity for the last two centuries passed by the English Parliament, except that, in their bills, they have confessed the illegality of all of the acts which have been done and for which ministers have advised the passage of an indemnity. I have not confessed the illegality of these acts, for this reason: the Attorney General of the United States and the Administration have held that the President had, without such a bill, full power; and if he had the power to order all these acts, then there is no remedy for anybody. A remedy exists only where there is a wrong. If the President had the right to suspend the writ of *habeas corpus*, and under that these results took place, I should like to know who had the right of action against him? There can be no such thing. If there be a remedy for these false imprisonments, it may extend to indictments as well as to civil suits, and how is the Government to indemnify the President for two years' imprisonment in the penitentiary? What kind of indemnity is the Government to afford to men thus prosecuted under these laws? But, sir, if the President was right in supposing that he had the authority to suspend the privilege of the *habeas corpus*, I admit with my friend from New York (Mr. Olin) that there would be no necessity for this bill. But then it would do no harm, it would confer no additional power, it would do only what could be done before. But I have recited that there is doubt on that subject.

"Then it seems to me that we would have the right to give him that power. As there has been an illegal exercise of the power before, one arising from necessity, a bill of indemnity is the proper remedy which has been practicable for the Government, where it was necessary for the Executive, for the safety of the country, to assume the responsibility of acts not contemplated by the Constitution."

The previous question was then demanded, and the bill passed by the following vote:

YEAS—Messrs. Aldrich, Alley, Arnold, Ashley, Babbitt, Baker, Baxter, Bingham, Jacob B. Blair, Samuel S. Blair, Blake, William G. Brown, Baffinton, Burnham, Campbell, Casey, Chamberlain, Clark, Colfax, Frederick A. Conkling, Roscoe Conkling, Cutler, Davis, Delano, Duell, Dunn, Edgerton, Edwards, Eliot, Ely, Fenton, Samuel C. Fessenden, Thomas A. D. Fessenden, Franchot, Frank, Gurley, Hale, Harrison, Hickman, Hooper, Horton, Hutchins, Julian, Kelley, Francis W. Kellogg, William Kellogg, Lansing, Loomis, Lovejoy, Low, McKnight, Moorhead, Anson P. Morrill, Justin S. Morrill, Nixon, Noell, Olin, Patton, Pike, Pomeroy, Porter, Potter, Alexander H. Rice, John H. Rice, Riddle, Edward H. Rollins, Sargent, Sedgwick, Segar, Shanks, Shellabarger, Sherman, Sloan, Spaulding, Stevens, Stratton, Train, Trimble, Trowbridge, Van Horn, Van Valkenburgh, Walker, Wall, Wallace, Washburne, Wheeler, Albert S. White, Wilson, Windom, and Worcester—90.

NAYS—Messrs. William J. Allen, Ancona, Baily, Clements, Cobb, Conway, Cox, Cravens, Crisfield, Crittenden, Dunlap, English, Fouke, Goodwin, Granger, Grier, Harding, Holman, Johnson, Knapp, Law, Lazear, Mallory, Menzies, Morris, Noble, Norton, Pendleton, Price, Richardson, Robinson, Sheffield, Shiel, Smith, John B. Steele, William G. Steele, Stiles, Benjamin F. Thomas, Vallandigham, Voorhees, Chilton A. White, Wickliffe, Woodruff, Wright, and Yeaman—45.

On the 22d of December, Mr. Pendleton, of Ohio, submitted the following resolution, in the nature of a protest against the above proceedings:

Resolved, That the following protest of thirty-six members of this House against the passage of House bill No. 591 be entered upon the Journal:

On the 8th day of December, A. D. 1862, and during the present session of Congress, Mr. Stevens, of Pennsylvania, introduced the bill No. 591, entitled "An act to indemnify the President, and other persons, for suspending the privilege of the writ of *habeas corpus*, and acts done in pursuance thereof," and after its second reading moved that its consideration be made the special order for the Thursday then next ensuing, which motion being objected to, he moved the previous question, and this being sustained, under the operation thereof the bill was read a third time, and passed.

This bill involves questions of the gravest importance. It provides that all suspensions of the privilege of the writ of *habeas corpus*, all arrests and imprisonments upon whatever pretexts or by whomsoever made, under the authority of the President, however arbitrary or tyrannical or unjust, are confirmed and made valid; and that all persons who advised or executed or assisted in the execution of any such acts are discharged from all liability, whether to the State or to individuals, "in respect thereof;" and that all proceedings against them of every nature, whether for the recovery of damages or for the infliction of punishment, "commenced or to be commenced," are discharged and made void. It also provides that the President may, during the existence of this rebellion, at any time and anywhere throughout any of the United States, and as to any person, suspend the privilege of the writ of *habeas corpus*.

The bill is framed upon the idea that the acts recited were illegal, and without just cause or excuse; that they were violations of the rights of the persons arrested and imprisoned; and that for them redress might be had in the courts of the United States, by resort to the peaceful, regular, and ordinary administration of the law. It is framed upon the idea that the citizen was arrested without the existence of crime on his part, or even probable cause to suspect it, and that in making such arrests, the substance, as well as the form, of those provisions of law intended to secure personal liberty were entirely disregarded. It makes no exception of those cases in which the arrests have been made with malice, and the imprisonments have been inflicted with circumstances of brutality and cruelty—in which the "public good" has been made the cloak wherewith to cover the gratification of political animosity or private hatred. It distinguishes in nothing between the cases in which an honest mistake has been followed by its immediate correction, and cases in which malignity has been enabled, by false pretences, to procure the arrest and to prolong the imprisonment, to the loss of property, the destruction of health, and, in some instances, the insanity, suicide, or lingering death of the unhappy victim. It distinguishes in nothing between the active officer, zealous in the full discharge of his official duties, and the base miscreant who volunteers to assume the degrading character of spy and informer, that he may, with more effect, and secretly, use the falsehood which the venom of his heart prompted him to invent. It proposes to condone all offenses, to protect all offenders, and to take away all redress for injuries, however great, or with whatever circumstances of aggravation or bad motive inflicted.

If these acts had been done in all cases from the purest motives, with an eye single to the public good, with as little aggression as possible on private rights, with all circumspection and care that only those who were really guilty should suffer such confinement as would prevent the commission of an unlawful act—if the public good were in fact subserved by them—it might be proper to protect the President, and those acting under his authority, from criminal prosecution and penal sentence; it might be proper to protect them from pecuniary loss, by the payment, from the public Treasury, of the damages assessed against them. Even then, whilst admitting that circumstances like these would in seasons of great public dangers negative all wrongful intent in the commission of these illegal acts, it would be the duty of the representatives of the people to affirm that at all times the President of the United States, before all other men, should adhere most strictly to the forms of legal procedure when directing his powers against the personal liberty of the citizen. It could never be proper to indemnify the President, and those acting under his authority, at the expense of the citizen whom they had injured, or to add to their security by the destruction of his remedies.

The Constitution of the United States guards most carefully the rights of the citizen; it was ordained "to establish justice," "insure domestic tranquillity," and to "secure the blessings of liberty;" and so steadily was this object kept in view, that in addition to the reservation of all powers not granted, there are special prohibitions of seizures without warrant, detentions without indictment, imprisonment without a speedy and public trial, and deprivation of life, liberty, or property without due process of law; and there are clauses which extend the judicial power of the United States to all controversies between citizens of different States, and secure a trial by jury in all cases in which the value in controversy exceeds twenty dollars. Congress has hitherto uniformly maintained, and, as far as was necessary, has perfected by its legislation these guarantees of personal liberty, and the courts have enforced them by the assessment of damages for their infraction. This bill proposes to deprive the courts of the power to afford such protection. It will, if carried out into practical and general operation, release the people from the duty of appealing to such peaceful and

legal means of redress, and will provoke more summary and less constitutional measures. Yet this bill, without precedent in our history, suggesting such grave questions of constitutionality and expediency, believed by many members to be utterly subversive of the rights of the citizen and of the express provisions of the Constitution, by the force of mere numbers and against the remonstrance of the minority, was passed within one hour of its first introduction, without having been printed, without having been referred to any committee, select or standing, and without any opportunity for consideration or discussion.

The undersigned, members of the House of Representatives, do therefore most solemnly remonstrate against this action of the House, and respectfully ask that this their protest may be entered upon the Journal.

They protest against the refusal of the House to permit consideration and discussion of the bill, as an arbitrary exercise of power by the majority, unjust to the members, unjust to their constituents, and derogatory to its character as a deliberative legislative body.

They protest against the passage of the bill—

1. Because it purports to deprive the citizen of all existing, peaceful, legal modes of redress for admitted wrongs, and thus constrains him tamely to submit to the injury inflicted or to seek illegal and forcible remedies.

2. Because it purports to indemnify the President and all acting under his authority for acts admitted to be wrongful, at the expense of the citizen upon whom the wrongful acts have been perpetrated, in violation of the plainest principles of justice, and the most familiar precepts of constitutional law.

3. Because it purports to confirm and make valid, by act of Congress, arrests and imprisonments which were not only not warranted by the Constitution of the United States, but were in palpable violation of its express prohibitions.

4. Because it purports to authorize the President, during this rebellion, at any time, as to any person, and everywhere throughout the limits of the United States, to suspend the privilege of the writ of *habeas corpus*, whereas, by the Constitution, the power to suspend the privilege of that writ is confided to the discretion of Congress alone, and is limited to the places threatened by the dangers of invasion or insurrection.

5. Because, for these and other reasons, it is unjust and unwise, an invasion of private rights, an encouragement to lawless violence, and a precedent full of hope to all who would usurp despotic power and perpetuate it by the arbitrary arrest and imprisonment of those who oppose them.

6. And finally, because in both its sections it is "a deliberate, palpable, and dangerous" violation of the Constitution, "according to the plain sense and intention of that instrument," and is therefore utterly null and void.

Norton, Geo. K. Shiel, S. J. Ancona, J. Lazear, Nehemiah Perry, C. Vibbard, John Law, C. A. Wickliffe, Chas. J. Biddle, J. A. Cravens, Elijah Ward, Philip Johnson, John D. Stiles, D. W. Voorhees, G. W. Dunlap, Hendrick B. Wright, H. Grider, W. H. Wadsworth, A. Harding, Chas. B. Calvert, Jas. E. Kerrigan, Henry May, R. H. Nugen, Geo. H. Yeaman, B. F. Granger.

Mr. Stevens: "I move to lay the resolution on the table."

The yeas and nays were ordered.

The question was taken; and it was decided in the affirmative. Yeas, 75; nays, 41.

In the Senate, on the 22d of December, a motion to strike out the third section of their bill to provide for the discharge of state prisoners, &c., was considered. The section to be stricken out was as follows:

SEC. 3. *And be it further enacted*, That it is and shall be lawful for the President of the United States, whenever, Congress not being in session, and in his judgment, by reason of "rebellion or invasion, the public safety may require it," to suspend, by proclamation, the privilege of the writ of *habeas corpus* in all cases of political offences throughout the United States, or in any part thereof, until the meeting of Congress thereafter; and whenever and wherever the said writ shall be suspended as aforesaid, it shall be unlawful for any of the judges of the several courts of the United States, or of any State, to allow said writ, as to such offences, anything in this act or in any other act to the contrary notwithstanding.

Mr. Lane, of Indiana, took the floor against the entire bill. He said: "Mr. President, the bill under consideration contemplates a provision for the release of political prisoners under certain circumstances, and also to authorize the President of the United States, under the conditions of the Constitution, to suspend the writ of *habeas corpus*. If any such legislation be proper and constitutional, the provisions of the bill seem aptly drawn to effect the object. I believe, however, that no such legislation is either proper or constitutional; that it is an improper interference with the duties and powers of the executive office.

"I shall attempt no finely drawn distinctions upon this occasion between the acts of the President of the United States which are justifiable and acts which are excusable. All the political arrests which the President of the United States, in the discharge of his sworn duty, has made, I justify and defend, in the widest and broadest sense of that term. Nay, more, I believe that the President, if he had not made those arrests under the circumstances under which they were made, would have been unworthy of the high position he occupies, and recreant to his duty to the Constitution and the country."

He then proceeded to show that the power existed in the President to suspend the privilege of the writ of *habeas corpus*, and also the right to make military arrests. The latter was an inference from the powers already conferred, and the duties enjoined in the Constitution. It also followed from the great right of self-preservation, the great law of self-defence, known and recognized everywhere. He then proceeded to examine the circumstances of the arrests made in Delaware, Maryland, and Kentucky, and the proceedings in foreign countries in cases of rebellion, and thus expressed his views of the means which the Government should use to secure success:

"Another fact I learn from history—that in the suppression of rebellions in other countries, there is no single instance in which the Government has not called to its aid every description of persons and every possible destructive agency known to civilized warfare for the purpose of putting down the rebellion. I use that in answer to the imputation upon the Republican party that they are willing to use slaves in the suppression of this rebellion. I have no concealment upon that

or any other subject. I desire to speak out precisely what I as an honest man do believe. I believe that as yet there is no necessity for the employment of negroes for the purpose of suppressing the rebellion; but if the necessity shall exist hereafter, we have a perfect right to employ their services; nay, more, it will be our bounden duty to do so. I would rather that a rebel master should fall by the hand of his slave than that he should live to overthrow my Government, or to destroy the life of my brother upon the battle field. Gentlemen who are so fastidious in reference to the means which it is proper to employ for the purpose of putting rebels out of existence, it seems to me are hardly in earnest in wishing them destroyed at all. I am willing to employ any agency—the white man, the negro, the cannon, the musket. I would invoke, if it were not impious, any power in God's physical universe. I would blast them with lightning; I would rain upon them the showers of fire and brimstone for which they are now as ready as Sodom and Gomorrah were in the olden times."

Mr. Wright, of Indiana, followed, saying: "Men do not seem to realize the condition of things in the country, and the most improper appeals are made to the ignorant and the unsuspecting, which alarm their fears on this subject. In the dark days of '76, General Lee wrote to James Bowden, president of the Massachusetts council:

We must save the community, in spite of the ordinances of the legislature. There are times when we must commit treason against the laws of the State, for the salvation of the State. The present crisis demands this brave, virtuous kind of treason.

"No statesman of this day would be willing to use language so strong as that which one of Washington's generals used in the war of the Revolution; but occasions arise when arrests become a necessity which cannot be disregarded without an impeachment of fidelity to the best interests of the commonwealth; and I am not disposed to yield the credit to the Republican party of originating a policy as bold as it is necessary, for in the despondent days of our infant struggle for liberty it was justified. Jefferson and Jackson subsequently demonstrated that it had their sanction, and it ever has had the approval of old-fashioned democracy. General Jackson suspended the liberty of the press in New Orleans, and he kept the entire city and suburbs under martial law after the British had left the coast. He arrested Judge Hall for issuing a writ of *habeas corpus* in favor of a French subject who had been seized by General Jackson's orders; and a recent Congress of the United States, by its legislation, commended that exercise of authority. Firmness and promptitude, fearlessness in assuming responsibility when his country was in an emergency, were among the prominent traits of his character, which secured the deep devotion of the democracy, and the earnest and enthusiastic regard which was akin to idolatry.

"Mr. Jefferson sustained General Wilkinson for suspending the *habeas corpus* in New Orleans on the occasion of certain military arrests of persons who were suspected of complicity in Burr's expedition; thus justifying the setting up of military authority over the jurisdiction of the courts in times of public danger. As late as the 3d of February, 1807, in a letter to Governor Claiborne respecting Burr's conspiracy, he wrote:

On great occasions, every good officer must be ready to risk himself in going beyond the strict line of law, when the public preservation requires it. His motives will be a justification, as far as there is any discretion in his ultra-legal proceedings, and no indulgence of private feelings.

"I call the attention of senators to this language, and to the time and circumstances under which it was used. That it was not a rebellion of one third of the entire republic against its Government. The straits of the Union were not then so desperate. On that occasion a mere handful of men, starting on a distant expedition, were arrested and brought to trial. Now the conspiracy is more extended, the interests at stake are more vital, and the emergency more imperious. In a letter to General Wilkinson, of the same date, he says:

Your sending here Swartwout and Bollman, and adding to them Burr, Blennerhasset, and Tyler, should they fall into your hands, will be supported by the public opinion.

"There is another passage in this letter which I may be justified in reading in this connection. Its appropriateness will be felt:

The Feds, and the little band of Quids, in opposition, will try to make something of the infringement of liberty by the military arrests and deportation of citizens; but if it does not go beyond such offenders as Swartwout, Bollman, Burr, Blennerhasset, Tyler, &c., they will be supported by the public approbation.

"May I not, Mr. President, slightly alter the language of Jefferson of that day, and by a paraphrase adapt it to the present, and say that those who think more of party than of country, who seek to make political capital out of every act of the Government, may try to make something of the political arrests that have been made, but if it does not go beyond such offenders as Governor Morehead, Buckner, Wallis, and their compeers, they will be supported by the public approbation?"

Mr. Field, of New Jersey, said: "Mr. President, the motion is to strike out the third section of this bill. There are two objections to the provisions of that section. The first is, it takes for granted that the power of suspending the privilege of the writ of *habeas corpus* is conferred by the Constitution upon Congress alone; and then it proposes that Congress should delegate to the President, not only the power of suspending the writ, but also of determining whether the exigency has arisen which would justify such a suspension. Both these objections, I think, are well taken. I hold that the Constitution of the United States confers upon the President, and not upon Congress, the

power of suspending the privilege of the writ of *habeas corpus*; but if mistaken in this, I hold that Congress has no authority to delegate to the President the exercise of such a power."

He then proceeded to explain his views at much length, and thus stated his conclusions:

"I think, sir, I have established that there is nothing in the practice or in the theory of the British constitution; there is nothing in the position which this clause occupies in our Constitution; there is nothing in the history of this clause in its passage through the Convention, and there is nothing in the omission of all reference to legislative power that can furnish any argument in favor of this power being intended to be a legislative power. And now, Mr. President, it remains only to inquire what is the nature of this power? Is it an executive power, or is it a legislative power? If it is an executive power, then I insist that the only possible construction that can be put upon this clause of the Constitution is that it was designed to give the power in question to the President. In order to judge of the nature of the power, we must ascertain when it is to be exercised. It is to be exercised only in two cases, rebellion and invasion. First, in case of rebellion—not a mere local sedition, not insurrection only, which is opposition to some particular law, as the whiskey insurrection for instance, but rebellion, which involves the overthrow of the Constitution and Government itself; which is an opposition to all laws. Second, invasion—not merely foreign war, but foreign war accompanied by invasion, the tendency of which, in like manner, would be the overthrow of the Government, Constitution, and laws.

"Now, whose duty is it to preserve the Government, protect the Constitution, and execute the laws? The President, by his oath of office, swears that he will preserve, protect, and defend the Constitution of the United States; and then it is made his duty to 'take care that the laws be faithfully executed.' Rebellion is resistance to these laws. Rebellion is an attempt to overthrow this Constitution and Government. Who, then, is competent to decide whether the exigency has arisen which will justify the suspension of the writ of *habeas corpus*? Who but the President alone? Congress may not be in session. For nine months out of the twelve, every other year, Congress is not in session; and yet the idea is that the framers of this Constitution meant to confer upon that body alone the power of suspending the writ of *habeas corpus*. Suppose Congress were in session, how could that body know whether the exigency had arisen? How could Congress know whether the execution of the laws had been resisted? They would have to depend upon the President for the information upon which they were to act; and then, while a bill for the purpose of suspending the privilege of the writ of *habeas corpus* was making its way through both Houses, every individual engaged in a conspiracy for the overthrow of the Gov-

ernment might be at the distance of a thousand miles from the seat of Government. How utterly impossible, then, would it be for Congress to exercise such a power as this! This power, I admit, is a high, transcendent power. It is a power which ought never to be exercised except upon the most solemn, pressing, and urgent occasions. But, sir, it is a power the exercise of which may be absolutely essential to the very existence of the Government; and in order that it should be efficacious, in order that it should accomplish the end for which it is designed, it must be exercised with the utmost promptitude and vigor. The slightest delay may frustrate entirely the objects sought to be accomplished by it. The idea, then, that a power of this character, which depends for its successful exercise on the utmost possible promptness and alacrity, should be exercised by Congress and not by the President, is a reflection, it seems to me, upon the wisdom of those who framed this instrument; it is an impeachment of their character, which I, for one, am not willing to make."

Mr. Saulsbury, of Delaware, followed on the other side. The positions which he took were that the President had not the power to suspend the privilege of the writ, but that Congress alone had the power. Reviewing the rights of English subjects, and of the American colonists, he inferred that the framers of the Constitution did not intend to abridge their liberties by conferring power upon one man to do so, whenever he should adjudge the public safety should require it.

He thus argued: "Never having known the privilege of suspending a law enacted by the legislative agents of the people, other than as a legislative privilege, it is not to be presumed that they intended it should be otherwise under the system of government which they framed. In order to the existence of this power in the executive, it must be shown positively that the Constitution confers it upon him. Under the Constitution, and independently of it, the citizen is entitled to freedom from imprisonment, unless in accordance with the law of the land. The power to imprison is nowhere in the Constitution given to the President, either for or without cause. He can only execute, not make the law. 'He shall take care that the laws be faithfully executed,' not that they shall not be executed, by reason of his having assumed to suspend their execution; and he shall use all the means necessary and proper, which have been conferred upon him by the Constitution or by Congress, not by means usurped by him independently of the Constitution or act of Congress. He is to use the means given to execute, not make the means with which to execute. Suppose nothing had been said in the Constitution about the suspension of the privilege of the writ of *habeas corpus*, would the President have a right to suspend the writ, which might, nevertheless, have been provided for by act of Congress? Surely

not; and why? Because such act, being the act of the legislature, could only be suspended by an act of legislation. Can the provision of the Constitution that the privilege of the writ, which the Constitution contemplated the Congress would provide, shall not be suspended unless in certain cases, possibly be regarded as conferring a power on the President, and on no one else, to suspend? If the Constitution had been silent in reference to the suspension, Congress might have passed the bill providing for issuing the writ or not, as they deemed proper; and having passed it, they could have repealed or suspended it at pleasure. Does the fact that it is provided that it shall not be suspended unless in case of rebellion or invasion deprive Congress of the power of suspension in the case of invasion and rebellion—the cases where suspension is not prohibited—and confer such power on a coördinate branch of the Government, which, but for those restrictive or prohibitory words, no one contends it would have possessed?

"It will not be denied that in England, Parliament alone can suspend or legalize the denial of the privilege of this writ. But it is contended that here, under our Constitution, the act of suspension is executive in character, and not legislative. The advocates of this view of the question contend, in the language of Mr. Horace Binney, that, 'the power to imprison, and to deny or delay discharge from imprisonment, is an executive power,' and that 'the warrant of arrest, with the order that the party's privilege be denied for a season, is suspension under the Constitution.' Here is the assumption upon which the whole argument is based. Has the President the authority under the Constitution to arrest the citizen for any cause whatever, unless that power is given in the clause relating to the suspension of the privilege of the writ of *habeas corpus*? None whatever; because it is not among the powers conferred upon him in the Constitution, and because it is expressly provided therein that no 'person shall be deprived of his liberty without due process of law.' Due process of law relates to arrest as well as to trial. Arrest cannot be made except upon warrant, supported by affidavit, any more than can conviction be had except upon trial by jury. The suspension of the privilege of the writ relates to a person legally imprisoned, but confers no power to imprison contrary to law. The advocates of executive despotism argue in a circle. Their argument is nothing more nor less than this: the President may arrest because he has power to suspend, and he may suspend because he has power to arrest.

"The support of the hypothesis of the power in the President to suspend, as contended for by Mr. Binney, is assumption, and assumption alone. He assumes not only that 'the power to imprison and to deny or delay a discharge from imprisonment is an executive power,'

but necessarily, to make his argument consistent, that this executive power is with the President. The assumption is without warrant, from the fact, as we have seen, that the President is not by the Constitution authorized to arrest any one, the right to arrest being based upon affidavit and warrant, not of mere motion. The power to imprison is only executive in the sense of executing process, and the power to deny or delay discharge rests not in the volition of the person imprisoning, or having the custody of the prisoner, but in the judgment of the judge or court to whom application for release is made as to the sufficiency of the warrant when the privilege of the writ is not suspended. When suspended, the power to delay or deny a discharge rests upon the fact of such suspension by virtue of the rightful authority to suspend. The question, therefore, remains, notwithstanding the assumption of Mr. Binney, who is the depositary of this power? To support his first assumption of the power to suspend in the President, Mr. Binney further assumes that 'all the conditions of the exercise of the power described in the *habeas corpus* clause are of executive cognizance, that is to say, rebellion or invasion, and the requirement of the public safety in time of either.' What is this but assuming what requires proof? The right to determine whether the public safety requires the suspension rests necessarily with the depositary of the power. To assume that the President is to determine this fact is to assume the matter in controversy. 'No legislative act is necessary or proper,' says the same authority, 'to give the cognizance of these facts to the executive.' So to say in reference to the 'requirements of the public safety,' is still to assume, not to prove.

"But to follow the argument. It is said that 'no act of Parliament has ever been passed in England, or has been proposed in Congress, to take away or abridge the executive power in regard to these facts.' Why not? Because no such executive power existed, as is further evidenced from the fact that the acts passed by Parliament, or proposed in Congress, were acts of suspension or proposed suspension by those bodies themselves. If the executive had the power independently of the act of Parliament or Congress, passed or proposed, where was the necessity of passing or proposing such acts? To continue: Mr. Binney says:

All the acts of Parliament which deprive persons of the right to bail or trial in derogation of the *habeas corpus* act of Charles II. leave this power and discretion to the crown.

"If by the expression, 'leave this power and discretion to the crown,' is meant confer upon or confide to the crown this power and discretion, the phrase is intelligible and argumentative; but if it is thereby meant that these acts of Parliament do not take away this 'power and discretion' from the crown, it is an admission that the 'power and discretion'

are subject to the authority of Parliament to remove them from the crown. If, however, it is meant that the 'power and discretion' remain where they were, notwithstanding the acts of Parliament, the point in controversy is assumed and not proved, and makes the acts of Parliament useless things. Again he says:

They cannot be taken away by Congress without invading the constitutional limits of the executive office.

"Not if they pertain to the executive office. Do they? This, again, is the point in dispute. Again he says:

They cannot be given by Congress to the executive without supererogating what the Constitution gives.

"Assumption again, not proof, that the Constitution gives this power to the President.

"Again, says Mr. Binney:

The power to suspend the privilege of the writ is moreover inseparably connected with rebellion or invasion, with internal war.

"Not at all. For although the privilege cannot be suspended unless there be rebellion or invasion, yet both or either of these may exist, and the suspension be unauthorized. The power to suspend is inseparably connected with the requirement of the public safety in time of rebellion or invasion, and with it alone, for either or both rebellion and invasion may exist, and the public safety not require the suspension. Again he says:

The direction of such a war is necessarily with the executive. The office cannot be deprived of it. It is the duty of the office, in both its military and civil aspects, to suppress insurrection and repel invasion.

"Granted; but by what means? By those granted by the Constitution and conferred by Congress. Is the power to suspend the privilege of this writ granted by the Constitution? This is the matter in controversy. It must be proved, not assumed. Again, says the same writer:

The true character of every act of Parliament in this relation, and of the only bill that has ever been proposed in Congress, has been executive, and so it must be.

"If by this is meant that the design of every such bill has been to confer power upon the executive, or those acting under his authority, to detain in custody persons legally arrested, it is true, otherwise it is not. To say that the character of an act of Parliament or of Congress is executive is an absurdity. It can only be legislative. It declares what law is or shall be. It cannot execute either judgment or power. He again remarks:

The only aspect in which an act of Congress to this effect can be regarded as legislative is as the grant or creation of authority to detain against the writ; but this is supererogation, because the Constitution gives it.

"Again, this is the assumption of the very matter in dispute.

"I have thus far, Mr. President, considered the question, has the President the right to suspend the privilege of the writ of *habeas corpus* as presented in the argument of Mr. Bin-

ney, because that argument is the fountain of justification to him, most generally, if not exclusively, relied upon by his friends? It is, in fact, the source from which the honorable senators from Indiana and New Jersey, who have attempted the only legal defence of the executive in this regard during this session, have drawn their materials."

Mr. Collamer, of Vermont, expressed the opinion that no bill should be passed and sent to the President for approval, in which it was necessarily implied that his decision relative to the suspension of the privilege of the *habeas corpus* was wrong. It would be asking him to approve a law which declared that he had done that which he had no authority under the Constitution to do. "Is that common courtesy? Can we get along with the Government in that way?"

He then passed to a consideration of the propositions before the Senate, the first of which was the bill under discussion, and the other a bill from the House, to indemnify the President (see page 241) for suspending the privilege of the *habeas corpus*, and acts done in pursuance thereof. The objections to the first he stated as above; and the latter he regarded as an act of oblivion, such as are passed occasionally by the British Parliament. This he considered as of doubtful constitutionality, and thus proceeded: "Then I may be asked, what would you do? I would not undertake to smother up judicial inquiry at all. I do not think it necessary; neither do I think we have the power to do it, if it was necessary. It may become necessary to regulate judicial proceedings, to adapt them to the occasion which arises, and to furnish the remedies which are needed; but we should not say that a law shall be passed to make that lawful which was unlawful; we should not say in effect: 'Having done a thing which was not authorized by the Constitution, we tell you now that the courts shall never inquire into it all; we are afraid to have it inquired into any way; and they, in relation to the private claims of individuals, shall be ousted of jurisdiction in relation to them entirely.' Sir, in my judgment, that is very bad policy, very bad statesmanship, and of extremely questionable constitutionality.

"Now, Mr. President, I propose that every person sued for any act done under the executive of the United States, by order of the President, during this rebellion, if he is sued in any State court, may, like the citizen in the case just stated, remove that case from the State court into the Circuit Court of the United States. I believe we have a right so to legislate. I have no doubt on that point. In the first place, the occasion now requires that to be done. In the next place, if gentlemen will look at the case of *Cohen vs. Virginia*—the case which settles the construction of the twenty-fifth section of the Judiciary Act—they will find that in the opinion of Judge Story in that case, the court held that the United States, by

legislation, may order, in the first instance, all the cases which may, under the provisions of the Constitution, go into the Circuit Court, to be removed there whenever they are commenced in a State court. It is quite obvious, from the reading of the Constitution, that if you could order one of these forms removed, you could the other. I have a precedent for this. I am not going now merely by my own speculations and conjectures. I have a full precedent for it.

"Now, what is the object of getting a case into the Circuit Court of the United States? Is there any great purpose in it? We cannot but know that these very provisions of the Constitution were intended to be provided for a great occasion of this kind. The Constitution contemplates that the State courts, in great emergencies, and in relation to subjects which concern the Government of the United States, are not safe for the Government of the United States always to trust. Suits may be brought against those who have arrested and imprisoned men under the order of the executive, in various States. They may be brought before a justice of the peace, before a county court, before a circuit court, according to the various provisions of the different States as to their jurisdictions. The great question arises before them, was the President authorized to make the order on which the defendant relies? Did the Constitution authorize it? That is important, not merely to the individuals sued, but to the nation; because it is most clear, as I take it, that if the President and his subordinates, and the individuals to whom his authority has been deputed, have acted in good faith in this period of trial, at least we must indemnify them. We therefore have a pecuniary interest; and thus it becomes quite important to have some sort of check as to the measure of damages that shall be awarded, if the court should find these proceedings to be irregular. According to common-law principles, in such a case, the court should tell the jury, in my humble judgment, if they rejected the man's defence, if he presented the order of the executive under which he acted, and the court should decide that it did not constitute a legal defence, yet, after all, the court should tell the jury: 'If you find that, though this was a mistaken authority, the man acted in good faith, or if there was a probable cause in law for making the arrest, the most you can do is to give the defendant actual damages. You will give no exemplary damages; you will give nothing by way of what is commonly called smart money; you will give nothing for attacks through the individual upon the vitals of the Constitution, or all that. These people have acted in good faith; and if in your verdict you go beyond simply paying the man the damage sustained by him by reason of his confinement for the time he was actually confined, the court will set aside your verdict.' But do we know that these State judges will do this? Have we any good

reason to have confidence in their holding over the jury the proper judicial influence to keep them in potent control? I am afraid of them. I do not like to leave our citizens and officers in their hands. I desire that the cases may be carried into our courts, into the United States Circuit Courts, in order to avail the defendants of all the advantages and protections under our Constitution which those courts give."

Mr. Collamer closed by introducing a substitute for the House bill, p. 241, which was referred to the Committee on the Judiciary, p. 256.

On the 27th of January, the Committee on the Judiciary reported this bill with an amendment striking out all after the enacting clause and substituting Mr. Collamer's bill.

Mr. Harris, of New York, moved to amend by inserting the words "civil or criminal," after the word "prosecution."

Mr. Trumbull, of Illinois, suggested numerous objections. He said: "The amendment of the committee which we are considering provides for the transfer of suits, commenced against the officers of the Government who have acted under the authority of the President in making arrests and doing other things during this rebellion, from the State courts in which they may be commenced, into the United States courts. I think that may be done. The amendment proposed by the senator from New York is to extend this to criminal prosecutions. Now, let us take a case. Suppose that a postmaster in the State of Illinois, acting, as he contends, under the authority of the Government, should get into a wrangle and kill a man, if you please; I put an extreme case to test the principle which it is sought to incorporate into this bill. That is an offence against the peace of the people of the State of Illinois; it is no offence against the United States. He is indicted by the grand jury of the proper county of the State of Illinois for murder. He files his petition stating that he was acting under the color of authority derived from the President of the United States through the Postmaster-General; that case is thereupon transferred into the United States court, and it is to proceed there in the same manner as in the State court. When you get it there, can the United States court administer the law of the State of Illinois? It is no offence against any law of the United States for one man to kill another in the State of Illinois, unless it be in the military service; unless it be in a place where the United States have jurisdiction, in some fort or arsenal. Could the United States court go on with the trial and convict him, in case it should turn out that he acted maliciously in the killing; and if convicted, could it sentence him to be hung? Who would have the pardoning power in such a case? Could the President pardon the offender?"

Mr. Harris, of New York, replied: "Mr. President, this power to transfer a cause from a State court to the United States courts, falls within the appellate jurisdiction of the Federal

courts, and since the senator from Illinois has been speaking on this question my eye has rested on the language of Chief-Justice Marshall, as quoted by Judge Story in his Commentaries on this question, and it presents in a very few words an answer to his difficulty. This is the language of Chief-Justice Marshall:

This power of removal is not to be found in express terms in any part of the Constitution; if it be given, it is only given by implication, as a power necessary and proper to carry into effect some express power. The power of removal is certainly not, in strictness of language, an exercise of original jurisdiction; it presupposes an exercise of original jurisdiction to have attached elsewhere.

"In the State courts.

The existence of this power of removal is familiar in courts, acting according to the course of the common law, in criminal as well as in civil cases; and it is exercised before as well as after judgment.

"That is precisely what is proposed here.

But this is always deemed, in both cases, an exercise of appellate, and not of original jurisdiction. If, then, the right of removal be included in the appellate jurisdiction, it is only because it is one mode of exercising that power; and as Congress is not limited by the Constitution to any particular mode, or time of exercising it, it may authorize a removal either before or after judgment.

Mr. Powell, of Kentucky, strongly opposed the amendment, saying: "I hope the amendment of the senator from New York will not prevail. It has been decided by the Supreme Court that no jurisdiction over crimes against the United States has been delegated to the State courts, and by parity of reasoning, it would certainly be held by any enlightened court that crimes committed against the States cannot be transferred to the jurisdiction of the United States courts. The scope and object of this bill is to prevent those who have been injured in their persons and their property from having redress in the courts. It is astonishing to me that so distinguished a senator as the senator from Vermont should ever have produced such a bill. Alfred the Great has received more approval and won more distinction for having brought justice to the door of every Englishman than for fighting a hundred pitched battles. But here, sir, we find the Senate of the United States engaged, by its legislation, in preventing those who have been injured by the minions of power from having redress in the courts of justice; and it is now proposed to insert a clause that criminals who have violated the criminal laws of the country shall have their cases transferred to the courts of the United States. Sir, suppose you do it; you try a man in the Federal court—you convict him. I ask you, if he is tried for an infraction of the criminal laws of a State, has the President of the United States any power to pardon him? None. The Governors of the States alone have the right to pardon for criminal offences against the criminal codes of the States. The amendment of the senator, in my judgment, is clearly unconstitutional."

Mr. Collamer, of Vermont, in answer to Mr. Powell, said: "This bill the senator seems to think is a perfect outrage upon all men's rights. I do not want to argue it, but there is a precedent for it. The case occurred in the days of Mr. Madison. Chief-Justice Marshall says, in relation to these questions over which the United States courts have jurisdiction—that is, questions arising on the construction of the Constitution and the United States laws—that by statute made for that purpose they may be removed into the courts of the United States for their decision."

Mr. Bayard, of Delaware, followed in opposition to the bill: "I believe the honorable senator from New York proposes to insert in the third line of the substitute, after the word 'prosecution,' the words 'civil or criminal.' The effect of that is intended to be, I presume—it certainly will be—the assumption, by the authority of Congress, of the power of removing from a State court the exercise of its criminal jurisdiction. It is perfectly clear, and has been frequently decided, that the criminal laws of the United States cannot be enforced in the State courts; nor can the criminal laws of the State courts be enforced in the courts of the United States. If a party is indicted in a criminal prosecution in a State court for an offence, it must be an offence against the laws of the State. Does this Congress mean to pass a law which shall authorize offences against the laws of the States to be tried in the Circuit Court of the United States on appeal? When I pursue the substitute farther, it seems that it would not only give the power to appeal before trial, but, after judgment in a criminal case, to carry the case into the Circuit Court of the United States to rehear it on the law and the facts.

"Sir, I cannot believe that that is within the intent of the Federal Constitution. I cannot believe it is within your powers in any way whatever. I can easily see that it must lead necessarily to the entire destruction of the power of the States as regards their own criminal jurisprudence. It tends to a system of centralization which must subvert and break down this Government, if carried out."

The substitute was subsequently accepted. Yeas, 27; nays, 15.

The point, however, came up again for discussion under other amendments.

Mr. Browning, of Illinois, said: "Mr. President, I had intended to move to strike out this portion of the bill, with a view to hear the views of senators upon it, from the word 'and,' in the thirty-fourth line, to the word 'court,' in the seventy-second line, inclusive—all that portion of the bill which relates to annulling or avoiding judgments after they shall have been rendered in the State courts. That is going very far. I do not know of any precedent for taking a case from the State courts to the Circuit Court of the United States after it has been tried and judgment pronounced. In a class of cases provided for by the statute upon

the subject, the judiciary law, appeals or writs of error may be taken from the final judgment of the State courts to the Supreme Court of the United States; but this portion of the bill contemplates an abrogation of the judgments of the State courts, or some sort of appeal from the State courts to the Circuit Court of the United States. The portion of the bill which I move to strike out has no connection whatever with, and no pertinence to, the removal of actions that have been commenced and are pending in the State courts, where the defence intended to be made in them may arise under the Constitution or laws of the General Government, or under the authority of the executive head of the General Government; but it relates totally and entirely and exclusively to cases that have been already adjudicated, and in which final judgment has been pronounced. I should like to hear the reasons for that."

Mr. Collamer, of Vermont, stated that the provisions of the bill were copied from the act of 1815. He further said: "It is no innovation at all. It is the reënactment of that act in the very words. The occasion which called for that law was the passage of the non-intercourse law, which had occasioned a great deal of difficulty, and gave rise to claims for suits; but when it was understood that the actions which had been or should be commenced might be carried into the Circuit Court of the United States, they ceased. It was a law of peace."

Mr. Bayard, of Delaware, asked if it applied to "criminal" cases?

Mr. Collamer replied: "It does not use the word 'criminal,' but I have copied the mode of removing causes, word for word, from that act."

"It is provided here, in the first place, that when a man is sued or prosecuted for an act of the kind stated in the bill, he may, at the first term, have it removed to the Circuit Court of the United States. In his application he states that such a question arises; that is, that he acted in the manner charged against him, be it what it may, under the authority of the executive, or under the authority of a law of the United States, under which he claims protection. That is his petition; that is what he states as the cause of the removal; and then he gives bail, and the case is removed. When that case comes before the Circuit Court, if it appears that in point of fact that was not the question which arises in the case, the court will turn the case out, and send him back to the State court."

"Again: suppose a judgment has been rendered before he can get this removal. In that contingency, I have followed the statute which was passed in 1815, for the removal of the case at that stage of the proceedings. That bill provided, then, for carrying it by appeal into the Circuit Court. I have followed all the machinery provided in that law, and I propose to allow the defendant to carry the case to the circuit court of the United States by way of appeal, on the ground that the question arising

is his right to be protected under the laws of the United States, or the authority of the executive of the United States. If the case does not contain any such question, the court will say it is improperly brought there, and it will be remitted, remanded to the court from which it came."

Mr. Browning, of Illinois, said: "Now, sir, if judgments have been rendered, if judgments should be rendered before the passage of this bill, there is already provision for prosecuting appeals. The parties may take an appeal from the Circuit Court of the State where the case is tried, and where the judgment is rendered, to the Supreme Court of the State; and there are already provisions existing and means provided for prosecuting an appeal from the judgment of that final tribunal of the State to the Supreme Court of the United States, in the event of any question arising, as I have said, under the Constitution, laws, treaties, or authority of the United States. I think the case is already provided for so as to give the right of appeal. They have the unquestionable right of appeal to their own State tribunal, the court of ultimate resort there; and already the provisions are such, I think, as to warrant the prosecution of an appeal or writ of error from the decision of the ultimate tribunal in the State to the Supreme Court of the United States. I do not feel as if I can go any farther."

Mr. Harris, of New York, replied: "The provision which is now objected to provides that after a trial shall have been had in a State court, either party, not simply the party that is charged with the violation of the law, but either party who shall prove unsuccessful, the plaintiff as well as the defendant, if he shall appeal, may remove the cause to the Federal courts, and have a second trial. I see nothing alarming in that provision; on the contrary, it secures to the unsuccessful party what the legislatures of the different States have thought a beneficial thing, a second trial; and in that, certainly, there can be no harm. Whether the proceeding may be a civil or criminal proceeding, what harm or danger can there be in allowing the unsuccessful party to try the cause over again?"

Mr. Browning said: "I desire only to suggest to the senator from New York that he is mistaken in one of the provisions of the bill, I think. This is not a mutual right; it is a right restricted to one of the parties and denied to the other; for the bill reads:

And provided also, That no such appeal or writ of error shall be allowed in any action or prosecution where final judgment shall have been rendered in favor of the defendant or respondent by the State court."

Mr. Collamer: "That is precisely the same limitation which applies to a writ of error under the twenty-fifth section of the Judiciary Act."

The amendment proposed by Mr. Browning was rejected. Other amendments were proposed and rejected, and the bill was ordered to

a third reading. Mr. Bayard, of Delaware, alone, took the floor to express opposition to its passage. He said: "With the solitary exception of an amendment proposed by the honorable senator from Ohio, which was originally rejected and afterward adopted, there is nothing in the bill which does aught than advance us toward a despotic exercise of power. It refers not only to the past but to the future action of the executive of the United States, and it throws a shield over every act of aggression that he can commit against the rights of an American citizen, and interposes a bar, in point of fact, to the right of recovery against even the individual who is the agent for the purpose of infracting those rights. The Senate, I have no doubt, from the votes already given, will pass this bill. I do not intend to enter into any argument against it further; but I will make this prediction: you may pass this bill, but the public sentiment of the country will not ratify your action. The spirit of civil liberty has been dormant, but it is awakened. Rely upon it. Gentlemen may think me mistaken now, but they will find hereafter that they have committed a blunder, a political blunder, and that is said to be worse than a crime. They will have by the passage of this bill brought the legislative power into accord with the executive, so as to prevent for past action and for future action of the executive any redress on the part of an American citizen, however great the outrage may have been. In my judgment it would have been better to pass the House bill. That is a plain, open, manly defiance of the Federal Constitution. This is more indirect. It is, in some respects, sustainable; but I trust that in others, when it comes to the criterion of the courts, it will be adjudged to be void and of no effect. It is useless to particularize now; but whether it be done under cover of law, and whether it be sustained or not, it is, in my belief, equally true that the passage of the bill is but an advance toward a centralized despotism in this country."

The question being taken by yeas and nays, resulted as follows:

YEAS—Messrs. Anthony, Arnold, Browning, Chandler, Clark, Collamer, Cowan, Dixon, Doolittle, Fessenden, Foot, Foster, Grimes, Hale, Harlan, Harris, Henderson, Hicks, Howard, King, Lane of Indiana, Lane of Kansas, Morrill, Pomeroy, Sherman, Sumner, Ten Eyck, Trumbull, Wade, Wilkinson, Willey, Wilmot, and Wilson of Massachusetts—33.

NAYS—Messrs. Bayard, Carlile, McDougall, Powell, Turpie, Wall, and Wilson of Missouri—7.

The bill passed the Senate and went to the House.

In the House, on the 18th of February, the original bill, as amended by the Senate, came up for consideration. Mr. Voorhees, of Indiana, spoke at much length in opposition to it. His views, however, were embraced in these words: "Sir, the bill now before the House has no parallel in the history of this or any other free people. It is entitled 'An act to indemnify the President and other persons for

suspending the privilege of the writ of *habeas corpus*, and acts done in pursuance thereof.' But it embraces even more than its startling title would indicate. It gives to the executive and all his subordinates not merely security for crimes committed against the citizen in times past, but confers a license to continue in the future the same unlimited exercise of arbitrary power which has brought disgrace and danger to the country. I propose, to the best of my ability this day, to show that neither indemnity for the past nor impunity for the future can be bestowed on those who have violated, and who propose further to violate, the great and fundamental principles of constitutional liberty."

Mr. May, of Maryland, strongly opposed the bill, saying: "The House bill is a pure, unmitigated product of ideas of republican liberty as manifested by the dominant party of this House. The Senate's amendments claim to draw a sanction from a Democratic precedent. The provisions of the amendment adopted by the Senate, and which is, indeed, a substitute for the original bill, look to the example of the celebrated Force Bill of 1833 to justify it. But, sir, the provisions of the Senate amendment go infinitely beyond the principle asserted by that law.

"The Force Bill adopted in General Jackson's day proposed simply a transfer of jurisdiction from the State to the Federal courts in revenue cases only; in actions brought for some alleged wrong committed in the execution of the revenue laws. The law of 1833 limited the exercise of the right of transferring the case to the period before trial, and there it ceased.

"But here, sir, is a proceeding which gives the right to remove a suit in all that comprehensive class of cases brought to redress wrongs committed 'under color of any authority derived from or exercised by or under the President of the United States,' both before trial and also after judgment. It also gives the strange right of an appeal at once from the State to Federal courts, or, if the party shall prefer it, 'within six months after judgment, by writ of error or other process,' to remove the case from a State to the Federal Circuit Court, there 'to try and determine the facts and the law as if the said case had been there originally commenced;' and provided further, 'that no such appeal or writ of error shall be allowed where the judgment is in favor of the defendant in the State court,' and if 'the plaintiff is nonsuited or judgment passed against him, the defendant shall recover double costs.' These amendments further provide that if the Federal judge shall certify that the defendant had probable cause to act, or acted in good faith, then, notwithstanding the jury have found otherwise and a judgment been recovered by the plaintiff, yet no execution shall issue until after the next ensuing session of Congress; thus striking down in effect the trial by jury in such cases. It is further provided that an appeal shall be allowed to the defendant to

the Supreme Court of the United States, 'what-ever may be the amount of the judgment.'

"Am I not authorized, Mr. Speaker, in view of these before unheard-of and most monstrous provisions of a judicial bill, to say that, while proposing to promote justice, it is simply a mean and cunning scheme, designed purposely to frustrate it?"

"The measure before us, so far from following the principle of the Force Bill, flagrantly violates it. That Force Bill simply provided for the impartial administration of law by allowing, upon certain prescribed conditions, the transfer of jurisdiction. The principle it asserted was supremacy of law. It transferred only such suits as were brought to question the execution of a law. Its language is 'for acts done under the revenue laws of the United States or under color thereof.'

"But here the monstrous power is asserted of justifying the acts of the executive power committed against law. The mere arbitrary will of the President, or his agents 'acting under color of his authority,' and despoiling the citizen of his constitutional rights, is now for the first time to be vindicated and approved by Congress, that ought to feel insulted and outraged by such a proposition.

"I need hardly add, sir, that I shall vote against these measures."

An extended debate followed on the policy of the Government, at the close of which, the amendment of the Senate was not concurred in, and a committee of conference was appointed by the House.

On the 27th of February, the Committee of Conference, in the House, reported an agreement that the Senate recede from their amendment, and approve of the House bill, with some amendments. The consideration of the report was postponed to March 2d.

In the Senate a similar report was made by the Committee of Conference on the 2d of March, and the bill was debated through a portion of the ensuing night.

Mr. Powell, of Kentucky, having the floor, yielded it to Mr. Cowan, who wished to ask of him a question.

Mr. Cowan, of Pennsylvania, said: "I ask whether it is possible that the legislature can deny the privilege of the writ of *habeas corpus* to any one; whether from the very nature of the thing, *ex necessitate rei*, it does not follow that the legislature must delegate to somebody the right to deny the privilege, whether it be the party arresting, whether it be the judge who issues the writ, or whether it be the custodian in whose keeping the prisoner is? It is not possible that the legislature, in my humble judgment, could say that the privilege shall be denied in this case, or in that case, or in any other case, because that would require them to legislate in particular cases; but are they not obliged when they suspend the writ to declare that somebody, either executive or judicial in his functions, shall have the power in his hands

to deny the privilege? It may be, I see nothing improbable in it, that they should delegate to the judges the power to determine who should be denied the privilege and who should not, or they may delegate it to the President. But even admitting that it is their function to declare when the contingency shall happen that the writ shall be suspended, still I ask if it does not follow, and follow inevitably, that either the judicial officer or the ministerial officer shall apply the law to the exigency declared by the legislature?"

Mr. Powell replied: "I will answer the senator's question with great pleasure. If Congress, in obedience to the power vested in it by the Constitution, should suspend the writ of *habeas corpus*, there can be no doubt that the judiciary would obey the law. If you were to pass such a law, it would be the duty of the executive to see that the law, like every other, was faithfully executed. That would be all the President would have to do with the matter."

Mr. Cowan again asked: "Mr. President, allow me to request the attention of my learned friend to the phrase in the Constitution. I admit that if the writ of *habeas corpus* were to be suspended, the power would be delegated to the judge to say when he should refuse the writ; but upon referring to the Constitution, it will be found that the writ is not to be suspended, but it is the privilege of the writ which is to be suspended. Now, what is the privilege? The privilege is that great right which inheres as a prerogative to every citizen to be discharged upon bail, or to be delivered over to the civil magistrate to be tried, and that privilege is in the hands of his custodian, not in the hands of the judge. As I understand it, in this republic, the writ can never be suspended. That is not the language of the Constitution. The writ must always issue; but the privilege may be suspended, that is, the right to be delivered over under the writ, or to be delivered upon bail, or to be discharged. Now, then, the privilege only being suspended, in whose hands is that privilege? Not in the judge's, certainly. The judge has the writ; he grants the writ; but it is upon the return of the writ that the privilege comes in question, and it is a question upon that return whether the petitioner, the complainant, is entitled to the privilege. If the privilege is suspended *pro hac vice*, for that turn, as to him, then I think it could properly be delegated to the executive to suspend it, or in other words, to his custodian."

Mr. Powell replied: "I do not concede that the language of the Constitution justifies the senator in his construction. That language is this: 'The privilege of the writ of *habeas corpus* shall not be suspended unless when in cases of rebellion or invasion the public service may require it.' Who has the privilege of the writ? Every person who is deprived of his liberty. To whom does he apply for the writ? To the judges, the judiciary; not to the executive. If

you suspend the privilege, and an individual should make application to the judge, the law being suspended, the judge would not grant him the privilege of the writ. That is the way I construe it. Certainly the executive has nothing to do with it. When you put your law upon the statute book suspending the privilege of the writ of *habeas corpus*, it is the duty of the executive to see that, as every other law, faithfully executed. Apart from that the President has nothing to do with the writ of *habeas corpus*."

Mr. Cowan: "Mr. President, is it not in the breast of the custodian? Even suppose the privilege be suspended, is it not in his breast to waive the statute? Could he not come forward, and bring the body of the prisoner, and say to the judge, 'Here he is; dispose of him as you see proper; I will abide your judgment;' showing that the privilege is in his hands, the privilege under the law? But if he deny the privilege, if he refuse to obey the mandate of the writ, that is what I understand in the privilege being suspended, not the writ. The writ issues, because *non constat* that the custodian may not agree to deliver upon the writ, and the writ must be issued in order to know whether he chooses to avail himself of the suspension by the statute, because it is not in all cases to be suspended. Nobody would pretend, I suppose, that the privilege was to be suspended in all cases. It is only in such cases as affect the matter in hand; that is, the rebellion or the invasion, or in such cases as would endanger the public safety. Of that the legislature judge. They judge of the general contingency, and the custodian judges of the particular one."

Mr. Powell: "When Congress suspends the privilege of the writ of *habeas corpus*, it deprives the party of the privilege of that writ. Who are to administer the laws? The judges. When a man applies to a judge for the writ, the judge cannot grant it, if the privilege is suspended by law. He will say, 'No, sir, the law allowing you the privilege of that writ'—for he only has the privilege by virtue of the law—'is necessarily suspended; Congress having suspended the privilege of the writ, we must deny you that privilege which you had before that action of Congress.'"

"But the honorable senator thinks it cannot be done in all cases. I had supposed that no legislative body on the earth would ever attempt to suspend it in all cases, or to authorize anybody else to do so; but if the senator will look at this bill closely, he will find that it proposes to allow the President to suspend the writ in all cases. The language is, 'the President of the United States, whenever in his judgment the public safety may require it, is authorized to suspend the privilege of the writ of *habeas corpus* in any case throughout the United States or any part thereof.' The power conferred upon the executive by this bill is not confined to a class of cases which may arise in

the country in its present disturbed condition, such a class of cases as would endanger the public safety. If this bill should become a law, and shall be held to be constitutional, it will allow the President to suspend the writ in any case whatever, whether a party be charged with treasonable practices, with aiding or abetting the enemy, or with petty larceny, or any description of theft. 'In any case,' is the language. There is no limitation upon it. If this bill pass and shall be held to be constitutional, it will authorize the President to suspend it in the case of a parent who applies for the writ to relieve his infant child from the custody of another. He may suspend it in the case of a man charged with petty or grand larceny, or with manslaughter, murder, or any other offence known to the law, as well as for treason, or aiding or abetting the enemy. The senator from Pennsylvania thinks nobody would think of suspending it in all cases. Here it is proposed to clothe the executive with the power to suspend it 'in any case,' and consequently he can carry it to all cases. This is the startling power you propose to confer upon the executive. What, sir, if a member of the Senate should be arrested upon any charge, or committed to jail, without having committed any offence, upon suspicion, the President could say upon that suspicion, 'That is a case, and as to it I will suspend the writ of *habeas corpus*.' Sir, I think there never was before an attempt to confer such a power on any magistrate by law."

"Mr. President, I do not regard this matter of the *habeas corpus* so lightly as some others. I do not believe that the writ of *habeas corpus* should ever be suspended where your courts are open, and where you have virtuous and upright judges. I think the danger to the liberty of the citizen is much more than the danger to the public liberties, provided the courts are upright, honest, and just, and are open. If you arrest a man and he is released, if he does anything wrong you can arrest him again."

Mr. Cowan further said: "The language of the Constitution is somewhat peculiar as well as precise; it does not warrant the suspension of the laws relating to writs of *habeas corpus*, therefore those laws remain intact just as before in every State of the Union, not to be repealed or suspended under any circumstances, even in cases of rebellion or invasion. Nor is it said that the writ can be suspended. No judge or court having jurisdiction dare refuse it to the suit of the citizen; it must issue in all cases, and at all events, when it is properly demanded. It can hardly ever happen that it would be either necessary or proper to suspend the writ of *habeas corpus*, because if the invasion or rebellion has left either courts or judges to issue the writ, there will always be many cases properly within their cognizance and jurisdiction. The writ must then issue in order that the return may indicate to the judges whether or not the person claiming the privilege is or is not

of the class to which it ought to be denied. As, for instance, if it were determined that the public safety required that persons charged with political offences alone should not be delivered upon the writ, it could only be known on the return of the writ whether the complainant was held for such an offence or not. Hence the bill under consideration provides that if the officer having the custody returns that he holds the prisoners by order of the President, the privilege is denied, but without this return the proceedings remain just as before.

"But it is distinctly provided that the 'privilege of the writ of *habeas corpus* shall not be suspended except in cases of rebellion or invasion, when the public safety may require it;' thus declaring, by way of exception, that in such cases the privilege may be suspended.

"The law remains undisturbed. The writ issues in all cases, but the privilege of it may be suspended. What is that privilege? It is the right which belongs privily and personally to every man arrested and detained of his liberty, to be either freely discharged, or in case he is charged with an offence, that he be delivered over to the proper judicial tribunal to be tried for the same according to law. These distinctions may be thought too refined, still they result from the language used; and there are besides many good and valid reasons why they should be preserved.

"Now, we can readily conceive a state of things when it would be perfectly proper to allow this privilege to one man, and yet, strange as it may seem, to deny it to another. A man charged with murder might insist upon it, while one charged with treason could not. The civil tribunals might, even in times of civil war, give to the first a fair and impartial trial, while at the same time to allow them to try the second for treason would be a mere mockery, resulting in his acquittal or conviction, not according to the evidence, but according as the court and jury were affected for or against his cause."

The debate was further continued until a late hour by Messrs. Powell, Cowan, Grimes, Bayard, &c., when the question of concurring in the report was taken without calling the yeas and nays. On the next day a discussion took place on these proceedings, and it was urged that the vote was taken at a time when a member had yielded the floor only to a motion to adjourn. It was finally agreed that a motion should be made to reconsider, and that the vote on this motion should be regarded as a test vote on the adoption of the report.

The vote was as follows:

YEAS—Messrs. Bayard, Carlile, Davis, Henderson, Latham, Nesmith, Powell, Rice, Richardson, Saulsbury, Turpie, Willey, and Wilson of Missouri—13.

NAYS—Messrs. Anthony, Chandler, Clark, Dixon, Doolittle, Foster, Grimes, Harlan, Harris, Hicks, Howard, Howe, King, Lane of Indiana, Lane of Kansas, Morrill, Pomeroy, Sherman, Sumner, Ten Eyck, Trumbull, Wade, Wilkinson, Wilmot, and Wilson of Massachusetts—25.

The following is the bill as it passed:

An Act relating to Habeas Corpus, and regulating Judicial proceedings in certain cases.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, during the present rebellion, the President of the United States, whenever, in his judgment, the public safety may require it, is authorized to suspend the privilege of the writ of *habeas corpus* in any case throughout the United States, or any part thereof. And whenever and wherever the said privilege shall be suspended, as aforesaid, no military or other officer shall be compelled, in answer to any writ of *habeas corpus*, to return the body of any person or persons detained by him by authority of the President; but upon the certificate, under oath, of the officer having charge of any one so detained that such person is detained by him as a prisoner under authority of the President, further proceedings under the writ of *habeas corpus* shall be suspended by the judge or court having issued the said writ, so long as said suspension by the President shall remain in force, and said rebellion continue.

SEC. 2. *And be it further enacted,* That the Secretary of State and the Secretary of War be, and they are hereby, directed, as soon as may be practicable, to furnish to the judges of the circuit and district courts of the United States and of the District of Columbia a list of the names of all persons, citizens of States in which the administration of the laws has continued unimpaired in the said Federal courts, who are now, or may hereafter be, held as prisoners of the United States, by order or authority of the President of the United States or either of said Secretaries, in any fort, arsenal, or other place, as state or political prisoners, or otherwise than as prisoners of war; the said list to contain the names of all those who reside in the respective jurisdictions of said judges, or who may be deemed by the said Secretaries, or either of them, to have violated any law of the United States in any of said jurisdictions, and also the date of each arrest; the Secretary of State to furnish a list of such persons as are imprisoned by the order or authority of the President, acting through the State Department; and the Secretary of War a list of such as are imprisoned by the order or authority of the President, acting through the Department of War. And in all cases where a grand jury, having attended any of said courts having jurisdiction in the premises, after the passage of this act, and after the furnishing of said list, as aforesaid, has terminated its session without finding an indictment or presentment or other proceeding against any such person, it shall be the duty of the judge of said court forthwith to make an order that any such prisoner desiring a discharge from said imprisonment be brought before him to be discharged; and every officer of the United States having custody of such prisoner is hereby directed immediately to obey and execute said judge's order; and in case he shall delay or refuse so to do, he shall be subject to an indictment for a misdemeanor, and be punished by a fine of not less than five hundred dollars and imprisonment in the common jail for a period of not less than six months, in the discretion of the court: *Provided, however,* That no person shall be discharged by virtue of the provisions of this act until after he or she shall have taken an oath of allegiance to the Government of the United States, and to support the Constitution thereof; and that he or she will not hereafter in any way encourage or give aid and comfort to the present rebellion, or the supporters thereof: *And provided, also,* That the judge or court before whom such person may be brought, before discharging him or her from imprisonment, shall have power, on examination of the case, and, if the public safety shall require it, shall be required to cause him or her to enter into recognizance, with or without surety, in a sum to be fixed by said judge or court, to keep the peace and be of good behavior toward the United States and its citizens, and from time to time, and at such times as such judge or court may direct, appear before said judge or court

to be further dealt with, according to law, as the circumstances may require. And it shall be the duty of the district attorney of the United States to attend such examination before the judge.

SEC. 3. *And be it further enacted*, That in case any of such prisoners shall be under indictment or presentment for any offence against the laws of the United States, and by existing laws bail or a recognizance may be taken for the appearance for trial of such person, it shall be the duty of said judge at once to discharge such person upon bail or recognizance for trial as aforesaid. And in case the said Secretaries of State and War shall for any reason refuse or omit to furnish the said list of persons held as prisoners as aforesaid at the time of the passage of this act within twenty days thereafter, and of such persons as hereafter may be arrested within twenty days from the time of the arrest, any citizen may, after a grand jury shall have terminated its session without finding an indictment or presentment, as provided in the second section of this act, by a petition alleging the facts aforesaid touching any of the persons so as aforesaid imprisoned, supported by the oath of such petitioner, or any other credible person, obtain and be entitled to have the said judge's order to discharge such prisoner on the same terms and conditions prescribed in the second section of this act: *Provided, however*, That the said judge shall be satisfied such allegations are true.

SEC. 4. *And be it further enacted*, That any order of the President, or under his authority, made at any time during the existence of the present rebellion, shall be a defence in all courts to any action or prosecution, civil or criminal, pending, or to be commenced, for any search, seizure, arrest, or imprisonment, made, done, or committed, or acts omitted to be done, under and by virtue of such order, or under color of any law of Congress, and such defence may be made by special plea or under the general issue.

SEC. 5. *And be it further enacted*, That if any suit or prosecution, civil or criminal, has been or shall be commenced in any State court against any officer, civil or military, or against any other person, for any arrest or imprisonment made, or other trespasses or wrongs done or committed, or any act omitted to be done, at any time during the present rebellion, by virtue or under color of any authority derived from or exercised by or under the President of the United States, or any act of Congress, and the defendant shall, at the time of entering his appearance in such court, or if such appearance shall have been entered before the passage of this act, then at the next session of the court in which such suit or prosecution is pending, file a petition, stating the facts and verified by affidavit, for the removal of the cause for trial at the next circuit court of the United States to be holden in the district where the suit is pending, and offer good and sufficient surety for his filing in such court, on the first day of its session, copies of such process and other proceedings against him, and also for his appearing in such court and entering special bail in the cause, if special bail was originally required therein. It shall then be the duty of the State court to accept the surety and proceed no farther in the cause or prosecution, and the bail that shall have been originally taken shall be discharged. And such copies being filed as aforesaid in such court of the United States, the cause shall proceed therein in the same manner as if it had been brought in said court by original process, whatever may be the amount in dispute or the damages claimed, or whatever the citizenship of the parties, any former law to the contrary notwithstanding. And any attachment of the goods or estate of the defendant by the original process shall hold the goods or estate so attached to answer the final judgment in the same manner as by the laws of such State they would have been holden to answer the final judgment had it been rendered in the court in which the suit or prosecution was commenced. And it shall be lawful in any such action or prosecution which may be now pending, or hereafter commenced, before any State court whatever, for any cause aforesaid, after final judgment, for

either party to remove and transfer, by appeal, such case during the session or term of said court at which the same shall have taken place, from such court to the next circuit court of the United States to be held in the district in which such appeal shall be taken, in manner aforesaid. And it shall be the duty of the person taking such appeal to produce and file in the said circuit court attested copies of the process, proceedings, and judgment in such cause; and it shall also be competent for either party, within six months after the rendition of a judgment in any such cause, by writ of error or other process, to remove the same to the circuit court of the United States of that district in which such judgment shall have been rendered; and the said circuit court shall thereupon proceed to try and determine the facts and the law in such action, in the same manner as if the same had been there originally commenced, the judgment in such case notwithstanding. And any bail which may have been taken, or property attached, shall be holden on the final judgment of the said circuit court in such action, in the same manner as if no such removal and transfer had been made, as aforesaid. And the State court, from which any such action, civil or criminal, may be removed and transferred as aforesaid, upon the parties giving good and sufficient security for the prosecution thereof, shall allow the same to be removed and transferred, and proceed no farther in the case: *Provided, however*, That if the party aforesaid shall fail duly to enter the removal and transfer, as aforesaid, in the circuit court of the United States, agreeably to this act, the State court, by which judgment shall have been rendered, and from which the transfer and removal shall have been made, as aforesaid, shall be authorized, on motion for that purpose, to issue execution, and to carry into effect any such judgment, the same as if no such removal and transfer had been made: *And provided also*, That no such appeal or writ of error shall be allowed in any criminal action or prosecution where final judgment shall have been rendered in favor of the defendant or respondent by the State court. And if in any suit hereafter commenced the plaintiff is non-suited or judgment pass against him, the defendant shall recover double costs.

SEC. 6. *And be it further enacted*, That any suit or prosecution described in this act, in which final judgment may be rendered in the circuit court, may be carried by writ of error to the Supreme Court, whatever may be the amount of said judgment.

SEC. 7. *And be it further enacted*, That no suit or prosecution, civil or criminal, shall be maintained for any arrest or imprisonment made, or other trespasses or wrongs done or committed, or act omitted to be done, at any time during the present rebellion, by virtue or under color of any authority derived from or exercised by or under the President of the United States, or by or under any act of Congress, unless the same shall have been commenced within two years next after such arrest, imprisonment, trespass, or wrong may have been done or committed or act may have been omitted to be done: *Provided*, That in no case shall the limitation herein provided commence to run until the passage of this act, so that no party shall, by virtue of this act, be debarred of his remedy by suit or prosecution until two years from and after the passage of this act.

APPROVED, March 3, 1863.

In the Senate, on the 19th of February, the bill for the discharge of state prisoners and others was considered. Mr. Trumbull, of Illinois, offered a substitute for the whole bill, when Mr. Carlile, of Virginia, offered an amendment in the form of a substitute for the substitute.

Mr. Carlile, of Virginia, thus explained his amendment: "Under the provisions of the substitute which I have offered, every arrest

that is made by the President's authority must be made under and by virtue of a precept issued by him, and that, as a necessary consequence, would, even in the rebellious States, call the attention of the President to the name, at least, of the party to be arrested, and would probably lead to an inquiry as to the cause of arrest; but under the provisions of the bill, and under the provisions of the substitute of the senator from Illinois, arrests are to be made by the Secretary of War, or by his order, or by the order of the Secretary of State, with no process issuing directly from the President, and nothing that can be made a matter of record going to show why an arrest has been made.

"I believe that greater opposition has been made, and that opposition has been more effectual, to the party in power because of the exercise of this arbitrary and despotic power of arrest than because of any other act that has been committed by the Administration. The loyal citizen is laboring for the maintenance of the Union, because of the value of the constitutional rights which that Union has secured to him; but if you take from him this right to personal liberty, this right to be protected in that personal liberty, and not be deprived of it without due process of law, and without an opportunity of knowing the charge upon which he is confined and for which he is said to have forfeited his liberty, will you not make that Government, instead of an object of love, an object of hate?"

Mr. Trumbull, of Illinois, followed and thus explained his amendment: "Although the immediate question is between the bill proposed by the senator from Virginia and the substitute which I have offered, I will state as briefly as I can what the provisions of the substitute offered by me are, and wherein they differ from the bill which has passed the House of Representatives. The House of Representatives passed a bill, the first two sections of which provided for the discharge of political prisoners, persons now in confinement by authority of the Secretary of War or the Secretary of State for what are called political offences. The third section provided for the suspension of the writ of *habeas corpus*. The substitute which I have proposed alters the numbers of the sections. It seemed to me a little more appropriate to provide in the first section for the suspension of the writ of *habeas corpus*, and in the other sections for the discharge of the persons who might be arrested. There is no importance in that. It is no matter whether it is the first or the third section; but as I deemed it advisable to rewrite the bill which passed the House of Representatives, the second and third sections being, as I thought, somewhat confused and not very clear, and desiring some amendments, I rewrote them. There is no substantial difference between the substitute I have offered and the bill which passed the House of Representatives,

in the first and second sections, corresponding with the second and third sections of the substitute. There is a substantial difference between the first section, as I propose it, and the third section of the House bill. The third section of the House bill authorized the President of the United States to suspend the writ of *habeas corpus* until the meeting of Congress. The substitute that I propose authorizes him to suspend the writ of *habeas corpus* throughout the United States, or any part of it, at any time during the existing rebellion; and that is the difference between the two. The House bill limited the suspension until Congress should meet. The substitute I propose authorizes the suspension wherever the President, by proclamation, shall declare the writ suspended, so long as the proclamation continues in force and the rebellion exists:

"Under this first section, persons arrested, when the writ of *habeas corpus* is suspended, of course cannot be discharged by virtue of the writ of *habeas corpus*; but the second and third sections provide for the discharge of those persons. They are not to be taken and held indefinitely, without knowing for what and why; but the second and third sections make it the duty of the Secretary of State and the Secretary of War, immediately upon the passage of the bill, to furnish the judge in each district where the parties reside, or where they may be charged with the commission of an offence, with a list of their names. They are to be laid before the grand jury; and whenever a grand jury shall have assembled in the proper district, and shall have adjourned without finding an indictment or making a presentment of any kind against the party who has been imprisoned, it is made the duty of the judge forthwith to issue an order discharging the prisoner from arrest, and any person resisting that order is to be punished by fine and imprisonment. The judge, however, before discharging the prisoner from arrest, is to take from him an oath of allegiance to the country and to the Constitution of the United States, and is authorized also, if on examination of the facts he deems it advisable, and if the public safety shall seem to demand it, to take from the prisoner a bond conditioned that he will keep the peace toward the United States, and appear from time to time to answer in the court as the court shall direct."

Mr. Doolittle, of Wisconsin, said: "Whether the power is derived from the Constitution or derived from the act of Congress to suspend the writ, it is the best policy to have it declared by Congress that the power exists either under the Constitution or under the act of Congress; and I will state my reason for this opinion. We know very well that the people of the United States are so familiar with these terms, "be it enacted," which are used in the passage of laws by their representatives, whom they have chosen, who speak their own

voice, who legislate for them, who declare the popular will, which, as our ancestors maintained, is to them the voice of God, that they submit to an enactment, passed by their representatives, commencing "be it enacted," as the Israelites of old would submit to a "thus saith the Lord." But, sir, when a thing is assumed to be done by the order of any one individual, the Secretary of War or the President, their jealousy of despotic power exercised by an individual is such, that although he may be acting within his clear constitutional power, the people, perhaps, are less likely to acquiesce in an order of the War Department or an order of the President than they are to acquiesce in an enactment of Congress."

Mr. Bayard, of Delaware, opposed the delegation of power to the President, thus: "I suppose this bill does give the power if you can delegate it in this way. If the power exists, certainly those who claim that the power exists in the executive are only making a reflection upon him if they undertake to grant him the power. I suppose this bill does give the power if you can grant it to him. Then comes this objection: can you delegate the legislative authority of this nation to the executive, to be determined upon his discretion and not upon yours? Let those who believe that the power to suspend the privilege of the writ of *habeas corpus* is vested in the legislative power reconcile it to themselves, if they can, that they can dispense with their own judgment as to whether the public safety requires that the writ should be suspended, and can delegate that power of legislation, founded on an act of high discretion, to the executive of the nation. Why, sir, you might just as well delegate to him the power to make any appropriations out of the Treasury he saw fit. You might as well delegate to him all your powers of legislation and abdicate your seats in Congress, and do what this and other bills you have passed will do—create a single despotic government in this country. Do it, and in terms you abandon legislation."

Mr. Powell, of Kentucky, said: "Of the two propositions, I favor the one of the senator from Virginia, and I will assign to the Senate very briefly the reasons why I prefer the proposition of the senator from Virginia. The proposition of the senator from Virginia requires that no citizen of the United States during the existence of these troubles shall be arrested except upon oath or affirmation of a loyal citizen of the United States. It further requires that any citizen who may be deprived of his liberty by being arrested shall have the privilege of the writ of *habeas corpus*, in order to have the facts concerning the arrests judicially investigated. The proposition of the senator from Illinois is widely different. The amendment proposed by the senator from Illinois, which is offered in lieu of the original bill, authorizes the President of the United States to suspend the writ of *habeas corpus* in

all cases of political offences. I would ask the learned senator to define what he calls a political offence. There is no definition. You leave it to the discretion of the executive to say what a political offence is. We know that since these unhappy difficulties have existed in this country, persons have been seized in every part of the country upon charge of political offences, and that those offences have been, perhaps, as variant as the names of the persons seized."

Mr. Trumbull, of Illinois, replied: "The senator from Kentucky objects that the bill declares that the President of the United States shall have authority by proclamation to suspend the 'privileges of the writ of *habeas corpus* in all cases of political offences.' He says the term 'political offences' is not a technical term, it has no fixed and definite meaning, and that it is uncertain what it does mean; and he asks, who is to decide what is meant by 'political offences?' Are you to leave it to the President to decide at his discretion? And he thinks this is monstrous. Now, I will compromise with the senator from Kentucky, who is in favor of compromise, and I will strike out of the bill the words, 'in all cases of political offences,' and then the President will be authorized to suspend the writ of *habeas corpus* whenever, in his judgment, the public safety requires it during this rebellion, everywhere and for all offences."

After a considerable debate on political issues, the amendment was adopted, and the bill passed as follows:

YEAS—Messrs. Anthony, Chandler, Clark, Collamer, Doolittle, Fessenden, Foot, Foster, Grimes, Harlan, Harris, Hicks, Howe, King, Lane of Kansas, Morrill, Pomeroy, Sumner, Ten Eyck, Trumbull, Wade, Wilkinson, Wilmot, and Wilson of Massachusetts—24.

NAYS—Messrs. Carlile, Henderson, Kennedy, Lane of Indiana, Latham, Powell, Rice, Richardson, Saulsbury, Turpie, Wall, Willey, and Wilson of Missouri—13.

This bill was reported to the House, and finally laid aside, as having been provided for by the report of the Committee on Conference, above stated, which had been adopted.

In the Senate, on the 22d of December, Mr. Saulsbury offered the following resolution:

Resolved, That the Secretary of War be, and is hereby directed to inform the Senate whether armed soldiers were sent into the State of Delaware, to be present at the polls on the 4th day of November last, the day of general election in said State; and if so, by whose orders, upon whose application, the necessity, if any, for their being so sent; for what purpose they were sent, to what places by name they were sent, how many were sent, how many to each of such places, the names of the regiments or companies sent, the names of the officers commanding such regiments and companies; and whether any, and, if so, how many provost marshals were or have been appointed, and at what places, in said State, with their names, the necessity, if any, for their appointment, and the powers conferred upon them; and that he communicate to the Senate all papers and orders in his Department relating to the sending of such soldiers into said State.

Mr. Saulsbury, of Delaware, said: "Sir, in a State where everything was perfectly calm and quiet, where there had been no attempt since the commencement of this revolution to take sides with the States in revolt, military were sent on the day of the general election to every voting place in the two lower counties of that State except two. I state to the Senate and to the country what I know to be true, and what I can prove, that peaceable citizens were arrested on the day of the election, and incarcerated in the common jail of the county, at one place; that at another voting place, peaceable citizens, who were making no disturbance, doing nothing illegal or improper, were arrested and placed in confinement in a room; that at another place, peaceable citizens, before they arrived on the ground, before they had done or said anything on the election ground, were taken from their wagons and fastened up in a house, and some of them deprived of their right to vote. I state another fact which can be proved: at another voting place, persons were intimidated from voting, and others were assaulted. At some voting places the inspectors of the election were compelled to take what they believed to be illegal votes; at other voting places, persons having a clear legal right to vote were prevented from voting by the military.

"Now, sir, I do not say that the General Government desires this to be done. Gen. Wool left his headquarters, went to the town of Seaford, in my State, and stayed there until after the election. I believe, as far as Gen. Wool was concerned, and as far as the election was concerned at that place, there was very little wrong done—nothing further than what would be the natural effect of having soldiers at a poll, the natural intimidation which it occasioned. I will state also that where there were regular soldiers, under officers of character, there was not generally so much wrong done as at other places. But, sir, where Maryland home guards were stationed, outrages of a gross character were committed upon our citizens. I want to know—and that is the object of this resolution—what were the reasons for the sending of these men into the State of Delaware; what representations have been made to the General Government."

Mr. Bayard, of Delaware, said: "I hope the resolution will be adopted. I do not desire to debate it; but I desire the information. I think we are entitled to it. The Government of the United States having sent into the State of Delaware, under the command of a major-general of the army of the United States, some three thousand troops, on the day before the election, and distributed them throughout the State—a State which has at no time whatever, either by her position, her course of conduct, or the action of her people, offered any resistance to the authority of the United States—we have a right to know the reasons for such actions. It may be, and probably it will be

shown, that some of our own citizens, in the heat of political excitement and partisan resentment, have made improper, erroneous, and false statements to the Secretary of War. If that is so, we have a right to know it. We have a right to know who those recreant sons of Delaware are. The people of Delaware have a right to know who it was that thus attempted to cause civil strife and military rule to be established in the State."

Mr. Sumner, of Massachusetts: "I think it were better that the resolution should be passed over; and I therefore move that it lie upon the table."

Mr. Anthony, of Rhode Island, said: "Will the senator from Massachusetts withdraw that motion for a moment? I was going to suggest that the resolution be referred to the Committee on Military Affairs."

Mr. Sumner: "I have no objection to that."

Mr. Anthony: "I have no objection at all to the information asked for being obtained; I desire that it should be laid before the country; but I think the resolution is not expressed in such felicitous language as the senator from Delaware usually employs. It seems to charge all the matter that is to be inquired into upon the Secretary of War, and the particularity of the inquiries seems to imply that unless he is pinned down to the exact point, he is going to evade the inquiry. I do not think it is respectful or proper. I would prefer that a resolution should be offered inquiring generally into the matter; and if the Secretary should not reply fully, then we should know, what the resolution now seems to assume, that he does not mean to answer the inquiry?"

Mr. Saulsbury, in reply, said: "Mr. President, I offer this resolution asking information of the Secretary of War. The proposition now is to refer a resolution asking for information from the Secretary of War to the Committee on Military Affairs. Can the Committee on Military Affairs give the information? How can you refer a resolution of inquiry, directed to the Secretary of War, to the Committee on Military Affairs? It is not to be supposed that they are the persons who have sent soldiers into the State of Delaware. I would prefer, and I say so frankly to the Senate, if they think we ought not to be furnished with this information, that they meet the question fairly and vote the resolution down."

Mr. Grimes, of Iowa, followed, saying: "It seems to me that a part of the information sought for in this resolution is manifestly improper. It not only inquires of the Secretary of War whether he has done this thing, but it requires an inquisition as to who instituted these proceedings, who made the representations to the Secretary of War that induced him to take this official action, if he did take it. It is manifestly improper for us to go into any such inquiry as that. Does the senator desire to lay the basis here, or to furnish the testimony for any number of judicial investigations,

for private prosecutions and personal collisions, in the State of Delaware? Does he not see (if I apprehend the state of public sentiment in Delaware) that such must be the case, if it be true that armed men were sent into the State of Delaware upon the advice and recommendation of some of the citizens of Delaware? I am perfectly content to ask the Secretary of War whether or not he did send men into the State of Delaware to attend the polls; but I am not going into any such private inquisition as is proposed by the resolution, and ask the Secretary to inform me upon whose instance it was done, whether upon the recommendation of this senator or that senator. If we establish a rule that we shall do this, and go on and inquire of each head of a department upon whose recommendation he does this act and that act, we shall have no end to these inquiries."

Mr. Bayard, in reply, said: "We do not want to inquire into the fact of whether the army was sent there and whether they were distributed at the polls—that is notorious; but we want the reasons which justify an act which certainly is an infraction of the rights of the people of Delaware, and an infraction which, carried out in other States—I am not speaking of what the design was, for I do not know what the grounds were; I want to know—would enable any existing Administration to keep itself in power and control the Government of this country just as long as it had the military force to do so. That would be the effect of submitting to such action. I want to know the grounds and the reasons, to see whether there was any justification for this action. It is not, as the honorable senator from Iowa supposes, with any desire for judicial inquiry against individuals there; nothing of the kind. It would not be evidence for the purpose of subjecting them to judicial inquiry."

In the House, on the 8th of January, the appropriation bill being under consideration, an amendment was offered to add to the clause "for compensation of thirty-three commissioners, at \$3,000 each, and eleven clerks, at \$1,200 each, \$112,200," the following proviso:

Provided, A sufficient sum shall be collected in the insurrectionary States to pay said salaries: *And provided further*, That no greater sum shall at any time be paid to said commissioners, or to any of them, than shall have been collected from the taxes in the insurrectionary States, and paid into the Treasury of the United States.

The discussion which followed brought out an expression of views relative to the position of the seceded States under the Federal Government. Mr. Stevens, of Pennsylvania, in the course of his remarks said: "I did say, sir, that I find no warrant in the Constitution for the admission, under the Constitution, of West Virginia. I do not know whether the gentleman from Kentucky voted for that bill or not."

Mr. Dunlap: "I will say to the gentleman from Pennsylvania that I voted against the bill, because I deemed it unconstitutional."

Mr. Stevens: "Then the gentleman voted against it upon the same opinion I expressed, that it was unconstitutional. But I went farther, and voted for it because I did not believe that the Constitution embraced a State now in arms against the Government of this Union, and I hold that doctrine now. It was not said upon the spur of the occasion. It is a deliberate opinion, formed upon a careful examination of the law of the United States and the laws of nations."

"Though it may be out of place just now, I will give one or two reasons for my opinion. The establishment of our blockade admitted the Southern States, the Confederates, to be a belligerent power. Foreign nations have all admitted them as a belligerent power. Whenever that came to be admitted by us and by foreign nations, it placed the rebellious States precisely in the position of an alien enemy with regard to duties and obligations. Now, I think there is nothing more plainly written in the law of nations than that whenever a war, which is admitted to be a national war, springs up between nation and nation, ally and ally, confederate and confederate, every obligation which previously existed between them, whether treaty, compact, contract, or any thing else, is wholly abrogated, and from that moment the belligerents act toward each other, not according to any municipal obligations, not according to any compacts or treaties, but simply according to the laws of war. And I hold and maintain that with regard to all the Southern States in rebellion, the Constitution has no binding influence and no application."

Mr. Dunlap: "Are not those seceded States still members of this Union, and under the laws of the Government?"

Mr. Stevens: "In my opinion they are not."

Mr. Dunlap: "Then I would ask the further question, did the ordinances of secession take them out of the Union?"

Mr. Stevens: "The ordinances of secession, backed by the armed power which made them a belligerent nation, did take them, so far as present operations are concerned, from under the laws of the nation."

Mr. Dunlap: "Are they then members of the Union?"

Mr. Stevens: "They are not, in my judgment."

Mr. Dunlap: "And the ordinances of secession took them out?"

Mr. Stevens: "I have my own views of this subject, and if erroneous the gentleman will not act upon them."

Mr. Dunlap: "Then if these States are not within the Union, how, as chairman of the Committee of Ways and Means, do you propose to pass an appropriation to pay officers to collect revenue in States which do not belong to the Union?"

Mr. Stevens: "I propose to levy that tax and collect it as a war measure. I would levy a tax wherever I can upon these conquered

provinces, just as all nations levy them upon provinces and nations they conquer. If my views and principles are right, I would not only collect that tax, but I would, as a necessary war measure, take every particle of property, real and personal, life estate and reversion, of every disloyal man, and sell it for the benefit of the nation in carrying on this war. We have such power, and we are to treat them simply as provinces to be conquered, and as a nation fighting in hostility against us until we do conquer them. I can arrive at no other conclusion. To me it is a great absurdity to say that men, by millions, in arms, shall claim the protection of the provisions of the Constitution and laws made for loyal men, while they do not obey one of those laws, but repudiate their binding effect. There never was a principle more clear than that every obligation, whether in a national or civil point of view, in order to be binding, must be reciprocal; and that the moment the duty ceases upon the one part, the obligation ceases upon the other; and that, in my judgment, is precisely the condition of the rebel States now."

Mr. Yeaman: "I am so much astonished at the doctrine I am now hearing, and I feel so much interest in this thing, not only as a question of constitutional law, but in view of the influence which these announcements may have upon this controversy, that I hope the gentleman will allow me to ask another question."

Mr. Stevens: "Certainly."

Mr. Yeaman: "Does the gentleman hold, or does he not, that the ordinance of secession passed in South Carolina was legal under the Constitution of the United States?"

Mr. Stevens: "I hold that it was an act of treason and rebellion."

Mr. Yeaman: "I would ask further whether the backing up of these ordinances of secession by armed force imparts to them any validity?"

Mr. Stevens: "I hold that so long as they remain in force against us as a belligerent power, and until they are conquered, it is in fact an existing operation. I will not say any thing about its legality. I hold that it is an existing fact, and that so far from enforcing any laws, you have not the power."

Mr. Yeaman: "What I want to know is whether these people are now citizens of the United States, or whether they are an independent nation; and if the latter, I want to know where we derive our right or authority to wage war against them, and to tax them to support that war, all of which I am in favor of."

Mr. Stevens: "I hold that the Constitution, in the first place, so far operated that when they went into secession and armed rebellion, they committed treason; and that when they so combined themselves as to make themselves admitted as belligerents—not merely as men in insurrection, but as belligerents—they did ac-

quire the right to be treated as prisoners of war, and all the other rights which pertain to belligerents under the laws of nations."

Mr. Mallory: "Will the gentleman yield to me for a moment?"

Mr. Stevens: "Certainly, sir."

Mr. Mallory: "I would inquire of the gentleman from Pennsylvania with what propriety he can speak of these men at the South who are engaged in this armed resistance to the United States as rebels, or as disloyal men, when he distinctly stated just now that he thought that the duty of obedience and the duty of protection were reciprocal, and that when protection is not afforded by the Government, the citizen is not bound in allegiance to that Government? Does not his doctrine release these men from all obligation to the Government of the United States, which is not protecting them from the confederate government; and has he therefore a right to punish them by the confiscation of their property, or by hanging them as traitors, for the acts which they have committed?"

Mr. Stevens: "All these crimes were committed before they became belligerents; before they had acquired the *status* of a belligerent power, and compelled us to treat them as belligerents—for instance, as prisoners of war."

Mr. Mallory: "I would ask the gentleman from Pennsylvania if the Confiscation Act does not apply to those crimes which have been committed since the commencement of the armed resistance which, in his doctrine, converted them from traitors and rebels into public enemies. It cannot, therefore, refer to crimes, as the gentleman says, which were committed before this armed resistance was made, and our relations with the Southern States became the relations of one belligerent nation to another."

Mr. Stevens: "I suppose that bill refers to a continuation of what was commenced before. My own notion is, sir, that we have a right to treat them as we would treat any other provinces that we might conquer. Now, sir, I do not know but what the President looks upon it in that light."

Mr. Maynard: "This discussion has become very interesting; and I would like to ask the gentleman whether he holds to the theory that this is a Government of the American people, or whether he holds that it is simply a compact between separate, independent, and sovereign States?"

Mr. Stevens: "Well, that is an abstract question. It has been well settled heretofore."

Mr. Maynard: "If he holds to the latter view, I can well conceive why he should hold every individual citizen in each particular State responsible for all the acts committed by the State authorities. If he holds to the former hypothesis, I would ask him how any citizen can lose his rights under the Constitution, wherever he may be found, excepting by his own act, or by the regularly authorized act of the Government through its different branches,

legislative, executive, and judicial? I will ask the gentleman a further question, because this is a matter in which my constituents will feel great interest. The gentleman's remarks will go out to the country as those of a representative of his party, the party which is now in power, and they will be repeated all over the country as those of a representative man, not expressing his own opinion only, but the opinions of a large party, the opinions of the executive."

Mr. Stevens: "I speak for myself only."

Mr. Maynard: "I am very glad to hear the gentleman say that, for I am personally well aware he does speak for himself alone; but I know that it will not be so understood and so represented in certain portions of the country."

"I would ask the gentleman how it can happen that people situated as those in my own particular district are, for instance, who have resisted the action of the majority of the State and of the State Government from the beginning—have resisted it by arms and are now resisting it—how it happens that they can, by any possibility, have lost their rights under the Constitution, although they happen to be within the limits of one of the so-called seceded States?"

Mr. Stevens: "I hope I may be able now to finish the few remarks I proposed to make, because I wish to get through with this bill if I can. I have seen no act, either done by the executive or proposed by the Congress, which would take away any rights or sacrifice any interests of the loyal men in the rebellious States. I have seen, on the other hand, that they have been carefully protected from all the consequences even of a war measure which was supposed to be necessary, and which did, in the first instance, take some of their property. There has been great care taken to separate them from the original sin of those who went into the rebellion, and to guard all their property."

"Now, sir, as I said before, I speak only for myself. These views of mine are not now for the first time put forth, and I am sorry that I have been provoked into the expression of them on this occasion, for I wanted to go on with the bill. But I do not see how the executive can view these questions any other way than I do. He appoints in places which we conquer military governors, and I was told yesterday that he had created a court in New Orleans. Now, if the Constitution still operates in those portions of the country, if it is not a question of military power, I want to know by what authority he does that. I see also that by the proclamations of military governors he orders men to be elected to take their seats in this Congress. To be sure, he has seen fit to direct what kind of men shall be elected, which, perhaps, was right enough, or we might have been overrun by secessionists. Only to-day, evidence has been presented of what purports to have been an election held in Accomac

county, or in some of the adjacent counties in Virginia. Will any of these gentlemen here who are such sticklers for 'the Constitution as it is, and the Union as it was,' tell me by what authority that election took place, unless it was by that military authority the existence of which I have been asserting? Why, I saw from some reports when that election was going on, that at one of the precincts they had to send a squadron of cavalry to protect the ballot box and those voting, and that the secessionists attacked them and drove them off. Now, I ask again, under what part of the Constitution are these proceedings; and if they are not under the Constitution, how is it that the Constitution is in full force in all these States? I would ask my friend from Tennessee (Mr. Maynard), under what clause of the Constitution does his excellent friend, Andrew Johnson, hold his office as Governor of Tennessee?"

Mr. Maynard: "I will answer the gentleman with a great deal of pleasure. Under that part of the Constitution which requires the United States Government—not the people of the United States, but the Government as a Government—to guarantee to the people of every State a republican form of government. Whenever the authorities of a State have abdicated, or have been driven away by usurpation or invasion, the United States Government must see that the machinery already there is vitalized and set to work."

Mr. Stevens: "I hold that the Governor of Virginia to-day is John Letcher, so far as the Constitution is concerned. No other man has ever been elected according to the provisions of the Constitution. I hold, too, that there is no necessity for the exercise of the provisions of the Constitution in order to effectuate these objects, for that these rebellious States are all now under military law and military rule, and that this Government has a right to do all those things which are necessary to repress this rebellion, and to conquer these people, and then we shall come to the question of the Union afterward. I say that you cannot justify nine out of ten of the acts of the Government, or of our own acts here, if you consider the Constitution a valid and binding instrument with reference to those in arms in the rebellious States."

Mr. Olin: "The only theory that can justify the prosecution of this war is, that it is a war waged in obedience to the Constitution and the laws; that no law or ordinance of secession relieves any citizen from a single obligation that he was under to the country, nor from his allegiance to the General Government."

"Now, sir, if there be but a single man remaining loyal to the Constitution in any one of the seceded States, he is entitled to all the rights, all the privileges, and all the immunities granted to any citizen in any loyal State. It is the duty of this Government to protect such loyal citizen in the enjoyment of those

rights, privileges, and immunities; and the performance of that duty alone justifies this war.

"Now, sir, look at the theory that is attempted to be defended by my learned friend from Pennsylvania. That he is learned in the law, his high reputation and his long and laborious life in that profession entitle him to be considered. Look at his theory. No member of this House pretends to deny that any act or ordinance of secession is void in law; and yet the gentleman from Pennsylvania finds that somehow or other the ordinance of secession, though void and of no effect, did somehow take the State out of the Union, and has relieved the General Government from all obligation even to protect, or to attempt to protect, the loyal citizens of that State in the enjoyment of their rights. Now, can there be a plainer proposition than this, that if there be one loyal citizen remaining in a rebel State, no man, no body of men, by any act, illegal and unconstitutional, can deprive such a citizen of his rights?

"The duties of obedience and protection are reciprocal; and no just and humane Government, where it cannot give such protection, will punish disloyalty. The first duty of the Government is to protect its citizens; and the next duty of the Government is to punish those who violate its laws. Sir, I have no patience with the doctrine announced by the gentleman from Pennsylvania; I hold it in utter abhorrence. I think it equally unsound and mischievous as that of the so-called right of secession.

"The gentleman speaks of the appointment of these military governors over the conquered States, as he calls them. Did anybody ever pretend that we had the authority of the Constitution for that? It is only to be justified as a military necessity. It is only to be justified by the usage of war. It is the exercise of authority by the commanding general. If a judge or a police magistrate be appointed, it is only in pursuance of the power of the commander-in-chief of the army. Constitutional questions have nothing more to do with the appointment of those judicial officers than they have with the appointment of his aids. He had undoubtedly a right, where military and where judicial authority was to be exercised, to delegate a judge, or to delegate a major-general for the exercise of that power. That delegation of authority is to be justified alone by the usage of war. The power to appoint a military governor over one of the States of the Union, or a person to discharge temporarily the functions of a magistrate, or a police officer, by the President, has its origin in necessity, and is alone justified by it. Of that necessity the President is alone the judge, as the commander-in-chief of the army. Congress can neither exercise the power nor judge of the necessity of its exercise."

Mr. Thomas, of Massachusetts: "Mr. Chairman, I beg to call the attention of the House back to the precise matter before us. It is a

provision for the appropriation of money for a definite and specific purpose; and that purpose is to enforce the collection of a direct tax assessed by this House in conformity to a provision of the Constitution of the United States (article one, section two, clause four); a tax which could only have been assessed in exact conformity to that provision. The object of this provision in the appropriation bill, and of the law of the last session, was to enforce, in the disaffected States, the collection of that tax. Upon what ground, Mr. Chairman? Upon this ground, that the authority of this Government at this time is as valid over those States as it was before the acts of secession were passed; upon the ground that every act of secession passed by those States is utterly null and void; upon the ground that an act legally null and void cannot acquire force because armed rebellion is behind it seeking to uphold it; upon the ground that the Constitution makes us not a mere confederacy, but a *nation*; upon the ground that the provisions of that Constitution strike through the State Government and reach directly, not intermediately, the subjects. Subjects of whom? Of the nation; of the United States. If this be so, Mr. Chairman, if these acts of secession be void, what is our position to-day? Gentlemen say that there is a belligerent power exercising authority against us. That is, you say that rebellion is attempting revolution. Very well. Who ever heard, as a matter of public law, that the authority of a Government over its rebellious subjects was lost until that revolution was successful—was a fact accomplished?

"My position, then, Mr. Chairman, is that we may appropriate this money, that we may enforce the collection of this tax, because to-day, as always heretofore, the authority of the National Government binds and covers every inch of the territory of the national domain; because that law which we call the Constitution is, to-day, the supreme law of the land. If the position taken by the learned gentleman from Pennsylvania be true, that we are every day passing unconstitutional acts, we are every day violating our oaths recorded in heaven to support the Constitution of the United States. I hold, therefore, Mr. Chairman, that it is our duty to compel the collection of this tax just as if the ordinance of secession had not been passed. But I beg leave to say that however we may differ as to the extent of powers which the Constitution gives us (and they are ample for all good ends), when we deliberately pass from fidelity to this Constitution to enact law in violation of its sacred provisions, we are ourselves inaugurating revolution. It is fire against fire, and God have mercy on the country.

"I have only a word or two more to say, Mr. Chairman. In all events, at whatever cost or peril of treasure or of life, we must cling to the national unity; and for this end we must cling to the only possible bond of unity—the Constitution. Mr. Chairman, I have listened quietly,

but with great sorrow, to the attacks which are often made on the Republican side of the House against the gentlemen from the border States. I desire to say, what I have often said, and repeat, with the fullest sense of my responsibility, that, in fidelity to the Union and the Constitution, and every earnest effort to uphold them, there have been no truer, nobler, more devoted men than these representatives from the border States. And the great heart of this country to-day goes out to meet them and to bless them. It is easy in New England, where fortunes are rapidly built up and industry quickened and material prosperity advanced by this war, or in New York, or in Pennsylvania, to be patriotic and loyal and national. These men have stood the touch of fire and the sword. They have been tried by suffering. No ties of natural affection, no love of kindred, no fear of desolation or death has moved them, not even your unkindness. And I do not believe that it is policy or wisdom to alienate such men from us; we should rather grapple them with hooks of steel.

"Say what you will, Mr. Chairman, as a practical question this war must be fought out in the border States. They constitute the battle ground of this contest to-day, as they have been from the beginning of the war. Can you hold the border States to their allegiance? If you can, then the final victory is with us. If you cannot, separation is inevitable. I hope, therefore, and trust and pray, Mr. Chairman, that we shall hear no more of these party discussions and wrangles, no more reproaches thrown from the one side of the House to the other. We have no strength thus to fritter away. God knows we need a united people to save the Union, trembling even now on the very verge of dissolution; and therefore, if we cannot agree upon all questions of law, if we cannot agree upon all questions of policy, let us consent to differ as we best may, but with the firm resolve that everything of strength, of power, of purpose, of motive, of will that is in us shall combine, concentrate, converge to save the national integrity, the national life."

Mr. Stevens: "As the gentleman from Kentucky (Mr. Mallory) undertook to charge that the views I held were the views of others than myself, and that I was speaking for the party, it very properly brought out a very mild denial from the pleasant gentleman from New York (Mr. Olin), and the somewhat softened and modified repudiation of the gentleman from Indiana (Mr. Colfax), and I hope that will satisfy the gentleman from Kentucky as to at least a portion of this side of the House. I desire to say that I know perfectly well, as I said before, I do not speak the sentiments of this side of the House as a party. I know more than that: that for the last fifteen years I have always been a step ahead of the party I have acted with in these matters; but I have never been so far ahead, with the exception of the principles I now enunciate, but that the members of the

party have overtaken me and gone ahead; and they, together with the gentleman from New York (Mr. Olin), will again overtake me, and go with me, before this infamous and bloody rebellion is ended. They will find that they cannot execute the Constitution in the seceding States; that it is a total nullity there, and that this war must be carried on upon principles wholly independent of it. They will come to the conclusion that the adoption of the measures I advocated at the outset of the war, the arming of the negroes, the slaves of the rebels, is the only way left on earth in which these rebels can be exterminated. They will find that they must treat those States now outside of the Union as conquered provinces and settle them with new men, and drive the present rebels as exiles from this country; for I tell you they have the pluck and endurance for which I gave them credit a year and a half ago, in a speech which I made, but which was not relished on this side of the House, nor by the people in the Free States. They have such determination, energy, and endurance, that nothing but actual extermination or exile or starvation will ever induce them to surrender to this Government. I do not now ask gentlemen to indorse my views, nor do I speak for anybody but myself; but in order that I may have some credit for sagacity, I ask that gentlemen will write this down in their memories. It will not be two years before they will call it up, or before they will adopt my views, or adopt the other alternative of a disgraceful submission by this side of the country."

Mr. Lovejoy: "My chief object is to repudiate for myself and the Republican party, and the Administration, the idea advanced by the gentleman from Pennsylvania, that if it should be necessary, as I believe with him it is, to annihilate these rebels, to extirpate them, and repeople those States with a loyal population, that that exile and that annihilation by military authority would be unconstitutional. Now, I claim that this is precisely, if necessary, just what the Constitution imperatively requires of us. That it imposes it upon us as a sacred duty to destroy these rebels, and, to the extent that may be necessary, to exterminate them in order to restore as a matter of fact, what still exists as a matter of right, the constitutional authority of the Government of the United States. I repudiate the theory which, if I understand the gentleman from Pennsylvania, is his theory, that if I own a vessel, the mere fact that pirates come and take possession of it, destroys the validity of my title to it. I may not be in possession; I may go and demand the possession to which I am legally and constitutionally entitled, and force may prevent my taking possession; but that does not invalidate my rightful claim.

"I hold that if one third of the citizens of Kentucky are loyal, the State belongs to that third; that if one fourth of the citizens of Tennessee are loyal, the State belongs to that

fourth; and that just as soon as the Government can enforce their rights, it is bound to enforce them; and the whole machinery of the State Government can be set going by those who remain, who are loyal, whether one half, one fourth, one tenth, or one hundredth. The right of the Federal Government never was invalidated, and never ceased for a moment."

The committee rose and reported.

In the House, on the 14th of January, the following resolutions, offered by Mr. Wright, of Pennsylvania, were considered:

Resolved by the House of Representatives of the United States in Congress assembled: 1. That the rebellion on the part of the seceding States against the Government and laws of this Union was deliberately wicked and without reasonable cause; the compact of union being perpetual, no State has the constitutional power to forcibly secede; and that there was no grievance, real or imaginary, upon the part of the seceding States, for the redress of which the Constitution does not furnish ample remedies.

2. That the rebellion being in contravention of the Constitution and laws, it is the duty of the Government to put it down without regard to cost or the consequences that may befall those engaged in it, and all necessary constitutional means for this purpose, and this alone, should be furnished by the people; that inasmuch as the great and wicked crime invoked the power of the sword, the war should be prosecuted with all the vigor and strength and means of the Federal Government till the rebellion is subdued, and no longer.

3. That an honorable peace is desirable, but no peace while armed opposition menaces the capital and threatens the overthrow of the Union, nor that peace which would be established upon the dismembered fragments of a mighty and prosperous nation; and that man who would entertain peace upon these conditions is a traitor to his country, and unworthy the protection of its laws.

4. That the war was inaugurated solely for the suppression of the rebellion and the restoration of the Union as it was; that any or all attempts to change or divert this line of policy is a fraud upon the nation, a fraud upon the memory of the gallant men who have sacrificed their lives, and a fraud upon the living soldiers who now stand up as a wall between their loved country and its wicked invaders.

5. That the value of dollars and cents does not enter into the momentous question of the maintenance of popular liberty, or the preservation of a free government, any more than the lives and comfort of the traitors, who have conspired and leagued together for their destruction.

6. That the Union restored, the war should cease, and the seceding States be received back into the Union with all the privileges and immunities to which they were originally entitled.

Mr. Vallandigham, of Ohio, speaking in opposition to the resolutions, said: "And now, pardon me, sir, if I pause here a moment to define my position at this time upon this great question of civil war.

"Sir, I am one of that number who have opposed abolitionism, or the political development of the anti-slavery sentiment of the North and West, from the beginning. In school, at college, at the bar, in public assemblies, in the Legislature, in Congress, boy and man, as a private citizen, and in public life, in time of peace and in time of war, at all times and at every sacrifice, I have fought against it. It

cost me ten years' exclusion from office and honor, at that period of life when honors are sweetest. No matter: I learned early to do right and to wait. Sir, it is but the development of the spirit of intermeddling, whose children are strife and murder. Cain troubled himself about the sacrifices of Abel, and slew him. Most of the wars, contentions, litigation, and bloodshed, from the beginning of time, have been its fruits. The spirit of non-intervention is the very spirit of peace and concord. I do not believe that if slavery had never existed here we would have had no sectional controversies. This very civil war might have happened fifty, perhaps a hundred years later. Other and stronger causes of discontent and of disunion, it may be, have existed between other States and sections, and are now being developed every day into maturity. The spirit of intervention assumed the form of abolitionism because slavery was odious in name and by association to the Northern mind, and because it was that which most obviously marks the different civilizations of the two sections. The South herself, in her early and later efforts to rid herself of it, had exposed the weak and offensive parts of slavery to the world. Abolition intermeddling taught her at last to search for and defend the assumed social, economic, and political merit and values of the institution. But there never was an hour from the beginning when it did not seem to me as clear as the sun at broad noon, that the agitation in any form in the North and West of the slavery question must sooner or later end in disunion and civil war. This was the opinion and prediction for years of Whig and Democratic statesmen alike; and after the unfortunate dissolution of the Whig party in 1854, and the organization of the present Republican party upon the exclusive anti-slavery and sectional basis, the event was inevitable; because, in the then existing temper of the public mind, and after the education through the press and the pulpit, the lecture and the political canvas, for twenty years, of a generation taught to hate slavery and the South, the success of that party, possessed as it was of every engine of political, business, social, and religious influence, was certain. It was only a question of time, and short time. Such was its strength, indeed, that I do not believe that the union of the Democratic party in 1860 on any candidate, even though he had been supported also by the entire so-called conservative or anti-Lincoln vote of the country, would have availed to defeat it; and if it had, the success of the Abolition party would only have been postponed four years longer. The disease had fastened too strongly upon the system to be healed until it had run its course. The doctrine of the "irrepressible conflict" had been taught too long and accepted too widely and earnestly to die out, until it should culminate in secession and disunion, and, if coercion were resorted to, then in civil war. I believed from the first that it was the purpose of some

of the apostles of that doctrine to force a collision between the North and the South, either to bring about a separation or to find a vain but bloody pretext for abolishing slavery in the States. In any event, I knew, or thought I knew that the end was certain collision, and death to the Union.

"Believing thus, I have for years past denounced those who taught that doctrine with all the vehemence, the bitterness, if you choose—I thought it a righteous, a patriotic bitterness—of an earnest and impassioned nature. Thinking thus, I forewarned all who believed the doctrine, or followed the party which taught it, with a sincerity and depth of conviction as profound as ever penetrated the heart of man. And when, for eight years past, over and over again, I have proclaimed to the people that the success of a sectional anti-slavery party would be the beginning of disunion and civil war in America, I believed it. I did. I had read history, and studied human nature, meditated for years upon the character of our institutions and form of government, and of the people South as well as North; and I could not doubt the event. But the people did not believe me, nor those older and wiser and greater than I. They rejected the prophecy, and stoned the prophets. The candidate of the Republican party was chosen President. Secession began. Civil war was imminent. It was no petty insurrection; no temporary combination to obstruct the execution of the laws in certain States; but a revolution, systematic, deliberate, determined, and with the consent of a majority of the people of each State which seceded. Causeless it may have been; wicked it may have been; but there it was; not to be railed at, still less to be laughed at, but to be dealt with by statesmen as a fact. No display of vigor or force alone, however sudden or great, could have arrested it even at the outset. It was disunion at last. The wolf had come. But civil war had not yet followed. In my deliberate and solemn judgment, there was but one wise and masterly mode of dealing with it. Non-coercion would avert civil war, and compromise crush out both abolitionism and secession. The parent and the child would thus both perish. But a resort to force would at once precipitate war, hasten secession, extend disunion, and, while it lasted, utterly cut off all hope of compromise. I believed that war, if long enough continued, would be final, eternal disunion. I said it; I meant it; and, accordingly, to the utmost of my ability and influence, I exerted myself in behalf of the policy of non-coercion. It was adopted by Mr. Buchanan's Administration, with the almost unanimous consent of the Democratic and Constitutional Union parties in and out of Congress; and, in February, with the concurrence of a majority of the Republican party in the Senate and this House. But that party, most disastrously for the country, refused all compromise. How, indeed, could they accept any? That which

the South demanded, and the Democratic and Conservative parties of the North and West were willing to grant, and which alone could avail to keep the peace and save the Union, implied a surrender of the sole vital element of the party and its platform—of the very principle, in fact, upon which it had just won the contest for the Presidency; not, indeed, by a majority of the popular vote—the majority was nearly a million against it—but under the forms of the Constitution. Sir, the crime, the "high crime" of the Republican party was not so much its refusal to compromise, as its original organization upon a basis and doctrine wholly inconsistent with the stability of the Constitution and the peace of the Union.

"But to resume: the session of Congress expired. The President elect was inaugurated; and now, if only the policy of non-coercion could be maintained, and war thus averted, time would do its work in the North and the South, and final peaceable adjustment and reunion be secured. Some time in March it was announced that the President had resolved to continue the policy of his predecessor, and even go a step farther, and evacuate Sumter and the other Federal forts and arsenals in the seceded States. His own party acquiesced; the whole country rejoiced. The policy of non-coercion had triumphed, and for once, sir, in my life, I found myself in an immense majority. No man then pretended that a Union founded in consent could be cemented by force. Nay, more, the President and the Secretary of State went farther. Said Mr. Seward, in an official diplomatic letter to Mr. Adams:

For these reasons he [the President] would not be disposed to reject a cardinal dogma of theirs [the secessionists], namely, that the Federal Government could not reduce the seceding States to obedience by conquest, although he were disposed to question that proposition. But in fact the President willingly accepts it as true. Only an imperial or despotic Government could subjugate thoroughly disaffected and insurrectionary members of the state.

"Pardon me, sir, but I beg to know whether this conviction of the President and his Secretary is not the philosophy of the persistent and most vigorous efforts made by this Administration, and first of all through this same Secretary, the moment war broke out and ever since till the late elections, to convert the United States into an imperial or despotic Government? But Mr. Seward adds, and I agree with him:

This Federal Republican system of ours is, of all forms of government, the very one which is most unfitted for such a labor.

"This, sir, was on the 10th of April, and yet that very day the fleet was under sail for Charleston. The policy of peace had been abandoned. Collision followed; the militia were ordered out; civil war began.

"Now, sir, on the 14th of April, I believed that coercion would bring on war, and war disunion. More than that, I believed, what you all in your hearts believe to-day, that the

South could never be conquered—never. And not that only, but I was satisfied—and you of the abolition party have now proved it to the world—that the secret but real purpose of the war was to abolish slavery in the States. In any event, I did not doubt that whatever might be the momentary impulses of those in power, and whatever pledges they might make in the midst of the fury for the Constitution, the Union, and the flag, yet the natural and inexorable logic of revolutions would, sooner or later, drive them into that policy, and with it to its final but inevitable result, the change of our present democratical form of government into an imperial despotism.

“These were my convictions on the 14th of April. Had I changed them on the 15th, when I read the President’s proclamation, and become convinced that I had been wrong all my life, and that all history was a fable, and all human nature false in its development from the beginning of time, I would have changed my public conduct also. But my convictions did not change. I thought that if war was disunion on the 14th of April, it was equally disunion on the 15th, and at all times. Believing this, I could not, as an honest man, a Union man, and a patriot, lend an active support to the war; and I did not. I had rather my right arm were plucked from its socket, and cast into eternal burnings, than, with my convictions, to have thus defiled my soul with the guilt of moral perjury. Sir, I was not taught in that school which proclaims that ‘all is fair in politics.’ I loathe, abhor, and detest the execrable maxim. I stamp upon it. No state can endure a single generation whose public men practise it. Whoever teaches it is a corrupter of youth. What we most want in these times, and at all times, is honest and independent public men. That man who is dishonest in politics is not honest, at heart, in any thing; and sometimes moral cowardice is dishonesty. Do right; and trust to God, and Truth, and the People. Perish office, perish honors, perish life itself; but do the thing that is right, and do it like a man. I did it. Certainly, sir, I could not doubt what he must suffer who dare defy the opinions and the passions, not to say the madness, of twenty millions of people. Had I not read history? Did I not know human nature? But I appealed to TIME, and right nobly hath the Avenger answered me.

“I did not support the war; and to-day I bless God that not the smell of so much as one drop of its blood is upon my garments. Sir, I censure no brave man who rushed patriotically into this war; neither will I quarrel with any one, here or elsewhere, who gave to it an honest support. Had their convictions been mine, I, too, would doubtless have done as they did. With my convictions I could not.

“But I was a Representative. War existed—by whose act no matter—not mine. The President, the Senate, the House, and the country, all said that there should be war—

war for the Union; a union of consent and good will. Our Southern brethren were to be whipped back into love and fellowship at the point of the bayonet. Oh, monstrous delusion! I can comprehend a war to compel a people to accept a master; to change a form of government; to give up territory; to abolish a domestic institution—in short, a war of conquest and subjugation; but a war for Union! Was the Union thus made? Was it ever thus preserved? Sir, history will record that after nearly six thousand years of folly and wickedness in every form and administration of government, theocratic, democratic, monarchic, oligarchic, despotic, and mixed, it was reserved to American statesmanship in the nineteenth century of the Christian era to try the grand experiment, on a scale the most costly and gigantic in its proportions, of creating love by force, and developing fraternal affection by war; and history will record, too, on the same page, the utter, disastrous, and most bloody failure of the experiment.

“But to return: the country was at war; and I belonged to that school of politics which teaches that when we are at war, the Government—I do not mean the executive alone, but the Government—is entitled to demand and have, without resistance, such number of men, and such amount of money and supplies generally, as may be necessary for the war, until an appeal can be had to the people. Before that tribunal alone, in the first instance, must the question of the continuance of the war be tried. This was Mr. Calhoun’s opinion, and he laid it down very broadly and strongly, in a speech on the Loan bill, in 1841. Speaking of supplies, he said:

I hold that there is a distinction in this respect between a state of peace and war. In the latter, the right of withholding supplies ought ever to be held subordinate to the energetic and successful prosecution of the war. I go farther, and regard the withholding supplies, with a view of forcing the country into a dishonorable peace, as not only to be what it has been called, moral treason, but very little short of actual treason itself.

“Upon this principle, sir, he acted afterward in the Mexican war. Speaking of that war in 1847, he said:

Every senator knows that I was opposed to the war; but none knows but myself the depth of that opposition. With my conception of its character and consequences, it was impossible for me to vote for it.

“And again, in 1848:”

But, after war was declared, by authority of the Government, I acquiesced in what I could not prevent, and what it was impossible for me to arrest: and I then felt it to be my duty to limit my efforts to give such direction to the war as would, as far as possible, prevent the evils and dangers with which it threatened the country and its institutions.

“Sir, I adopt all this as my own position and my defence; though, perhaps, in a civil war, I might fairly go farther in opposition. I could not, with my convictions, vote men and money for this war, and I would not, as a representative, vote against them. I meant that, without op-

position, the President might take all the men and all the money he should demand, and then to hold him to a strict accountability before the people for the results. Not believing the soldiers responsible for the war, or its purposes, or its consequences, I have never withheld my vote where their separate interests were concerned. But I have denounced from the beginning the usurpations and the infractions, one and all, of law and Constitution, by the President and those under him; their repeated and persistent arbitrary arrests, the suspension of *habeas corpus*, the violation of freedom of the mails, of the private house, of the press and of speech, and all the other multiplied wrongs and outrages upon public liberty and private right, which have made this country one of the worst despotisms on earth for the past twenty months; and I will continue to rebuke and denounce them to the end; and the people, thank God, have at last heard and heeded, and rebuked them, too. To the record and to time I appeal again for my justification."

In the House, on the 27th of January, the bill to raise additional soldiers for the service of the Government was considered.

Mr. Stevens, of Pennsylvania, proposed the following substitute for the bill:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President be, and he is hereby authorized to enroll, arm, equip, and receive into the land and naval service of the United States such number of volunteers of African descent as he may deem useful to suppress the present rebellion, for such term of service as he may prescribe, not exceeding five years. The said volunteers to be organized according to the regulations of the branch of service in which they may be enlisted, to receive the same rations, clothing, and equipments as other volunteers, and a monthly pay not to exceed that of other volunteers; to be officered by white or black persons appointed and commissioned by the President, and to be governed by the rules and articles of war and such other rules and regulations as may be prescribed by the President: *Provided*, That the President may forthwith proceed to raise as aforesaid, in the free as well as in the slave States, not less than one hundred and fifty thousand soldiers of African descent; and shall accept slaves as well as freemen; and such slaves as are received into the service of the Government, and their families, shall thenceforth be free; and the United States shall make reasonable compensation for such of them as belonged to persons who had never been disloyal during this rebellion.

Mr. Sheffield, of Rhode Island, moved, when the bill came up on the next day, to refer it to the Committee on Military Affairs.

The previous question was now demanded, the object being, on the one side, to adopt the amendment without debate, and on the other, to prevent its adoption without ample discussion. A series of manœuvres now commenced of a most exciting character, which resulted in an agreement that was thus stated:

The Speaker *pro tempore*: "The Chair then understands the proposition to be that by unanimous consent the vote ordering the main question shall be understood to be reconsidered, all

incidental motions now pending dispensed with, and the bill postponed until the meeting of the House at twelve o'clock."

The House then adjourned at twenty-five minutes to six A. M.

The subject came up on the next day, when Mr. Stevens withdrew the proviso to his proposed amendment.

Mr. Maynard, of Tennessee, then moved to refer the bill and amendments proposed to the Committee on Military Affairs. The previous question was demanded and seconded.

Mr. Cox, of Ohio, said: "I think there is a radical difference between the law of last session and the present law, although that law was rather radical when it was passed. That law, as it has been interpreted by its friends, and as it may be now, simply provided that Africans might be employed in the military service. It says:

That the President be, and he is hereby authorized to receive into the service of the United States for the purpose of constructing intrenchments, performing camp service, or any other labor in the military or naval service for which they may be found competent, &c.

"Now, the present pending law, as the gentleman correctly observed, is intended to place the African soldier on a perfect equality in every regard with the white soldier, and that is the gist of our objection."

Mr. Stevens said: "I have not said so. I said the object was to put them upon an equality as to the protection which the President could afford them. I do not mean to say that they are to be put upon a social and political equality."

Mr. Maynard, of Tennessee, followed: "It is provided in this bill that any number of this kind of troops may be raised that the President may deem useful. Well, how large that number may be, of course can only be determined by the success which this volunteering meets with, and by the necessities of the service. If they are to be officered indiscriminately, either by white or by black persons—as officered by somebody they must be—we shall not only have brigadier-generals but major-generals of the African race, if under the powers conferred by this bill, the President should choose to confer that high authority upon men of that race; and when they are brought into the same field with white troops officered by white men who are outranked by such colored officers, the consequence will be that the white officers must yield military obedience to them. I need not say to the gentleman from Pennsylvania, or to the gentlemen of the House, what effect this must have, whether rightfully or wrongfully, whether in consequence of insane and wild and unreasoning prejudice or not, I will not undertake to say. I speak to the facts. I speak to things as they are. I speak to men's opinions as they have formed them, and as we cannot change them by our legislation, or by anything we can say here. I ask gentlemen

to consider what would be the practical effect of such an arrangement of our army."

Mr. Porter, of Indiana, offered the following amendment:

But no person of African descent shall be admitted as a private or officer of any regiment in which white men are in the ranks, nor shall any person of African descent, in any case, be placed in command of white soldiers.

Mr. Wickliffe, of Kentucky, opposed the bill with great vigor. He said: "What have we heard in this hall since this bill has been reported? The gentleman from Pennsylvania (Mr. Stevens), who is the leader of the Abolition party in this House, and who was the originator of this project, and who has nursed it with the fondness for a sickly and only child, one for whose fate he cannot but fear, tells us, and in his place proclaims to the South, that we, with a white population in Pennsylvania and New York alone of a million and a half more than there are whites in the whole eleven seceded States of the South, and eight millions in the fifteen States more than the whole white population of the eleven States—that with all this difference, this country cannot conquer and suppress this rebellion, unless he can employ the negro slave, and put Sambo, or some other man meaner than Sambo, in command. Great God! Is that so? Are you, gentlemen upon the other side of the House, prepared to indorse this statement of the chairman of the Committee of Ways and Means, and proclaim to the world that our States, with all their resources of population and physical power, with such resources of means for carrying on the war, with a million soldiers now in the field, still find it necessary at this time to blacken our record for the first time, by adopting into the army of the United States the African slave, and making him the equal and associate, by legislation, of the gallant soldier who may have distinguished himself in many a hard-fought battle; and that a captain Sambo and captain white somebody, and colonel Sambo and colonel white somebody must stand side by side, day after day, on terms of perfect equality?"

Mr. Dunn, of Indiana, was in favor of these troops, urging as follows: "I have another object in the employment of these men, and I am willing here to avow it. It is this: we have not only to conquer this rebel country, but we have to hold it after it is conquered. We have for a time to hold it by force of arms; and the question arises whether we shall send our men of the North there to perish in Southern swamps and sickly localities, or whether we shall make use of that population which, from their peculiar physical adaptation, can brave the malaria of that climate like alligators? If they are ignorant in the use of arms, instruct them in that use. Teach their 'hands to war, and their fingers to fight.' Are they so brutalized that they will not fight for their own liberty? Shall we receive them and edu-

cate them to arms for this purpose, or shall we send our own sons there?"

Mr. Crittenden, of Kentucky, took the floor in opposition to the bill, saying: "You propose by this bill to raise a force of one hundred and fifty thousand slaves as soldiers. You include, to be sure, and permit to be enlisted, free men of color. How, in a general view of the subject, can you approve of it? What is your reason for it? Have you any deficiency of numbers in your army? Have your own constituents shrunk from this contest? You say it is a contest for freedom, a contest for liberty; and shall we, sir, stigmatize our constituents, our brothers, the white free-born men of this land, as being so degenerate as to shrink from this contest, and so compel you to appeal to your own black men to defend the liberties of the white man?"

"What a perversion of all feeling to make such an appeal! There is no want of patriotism, no want of courage upon the part of the free white men in this country. Have they shown any such want? In a war that has not lasted more than eighteen months, you have now in the field, or marching for the field, or in preparation for the field, one million of white men, who, with a few exceptions, have voluntarily become soldiers. Where has the world exhibited such an example of universal patriotism and universal devotion to country? Yet in the face of all this, gentlemen here propose to raise one hundred and fifty thousand Americans of African descent. You stigmatize them, while you invite them into the field. The bill is an indelible stigma upon their character. You employ them as soldiers to fight your battle, but give them only one half pay, and exclude them from command to a great extent. You put a stigma upon them, while you call them into the field, and while you say they are worthy to be the defenders of the liberties of this country. Your own soldiers are stigmatized by your own hands. Is this right; or is it anything else, in view of all this, but a portion of that abolition policy which would take every slave from the master? That must be the object. They are not necessary for the putting down of this rebellion. They are not worthy of being called to the aid of those who aspire to be considered free-born men.

"All nations which have held slaves have been found to reject their services for military purposes in time of war. My learned friend from Ohio (Mr. Shellabarger,) who the other day was comparing these rebels to Catiline, is well enough acquainted with his history, and can bear testimony that he, that bold conspirator, had Roman pride enough left in the midst of his vices to reject the assistance, even in his extremest hour of peril, of slaves and gladiators, although they were white slaves, men who had been born free, men who had been made captives in war, and reduced by the inhuman policy of that age to the con-

dition of slavery; they had been tainted and marked with that degradation, and that was enough; even Catiline would not be their leader, and preferred to face the perils of the battle alone. And what a spectacle is here presented! The representatives of a nation which has ever boasted of its readiness to shed the last drop of its blood in defence of the liberties of its people, are calling upon slaves to defend it and to defend them! Sir, it is a mockery—a mockery of the American people. It is a policy unlike that of any other nation. It is an insult to your army. It is a crime against the civilization of the age. It is a crime against the Constitution. It is an act of hostility against the Union. These are the sentiments with which I am compelled to regard this measure.

"But, sir, I do not care so much about the employment of these men in respect to their inefficiency as soldiers, as I do in respect to the character their employment will give to the war itself. In what will it result? In a servile war. You put one white man to command a thousand negroes at the South, and will he restrain them? Will it not result in servile war? It will be a servile war led by white men. You may get a white man who will endeavor to restrain them, who will endeavor to enforce discipline among them, but could he do it? You promise to all these negroes set free by the President's emancipation proclamation the enjoyment of actual freedom, and you will find that, though you may attempt to restrain them, whenever you attempt to put the experiment into operation, you give license to turn this civil war into a servile war. That will be the result, and that is what you are going to do?

"Mr. Speaker, I am utterly in opposition to the language used on the other side of the House, that there can be no reconciliation; that we must subjugate or exterminate the rebels; that we must employ all of the energies of the Government to drive them from the country. We are told that the rebel States are to be colonized and a new and loyal race is to be raised up. Robbers are to go in in a time of national adversity and take advantage of an abolition policy. They are to occupy the land and drive the people there out of the country. Is that a fair beginning for an honest and loyal race? What can be hoped for the virtue of a people like that? I know that one object gentlemen have in view is to abolish slavery. You want to abolish slavery, whether you call it the means of the end or the end of the means. They have verified it in this matter. It seems likely to be the end of the means. They are not willing to have it done by any other means. It is undertaking on the part of the North to dominate over the South. What right has the North to do it? The South has equal rights with the North. It is a domination more intolerable than any you have complained of."

Mr. Hutchins, of Ohio, insisted upon the right of the Government to take slaves for the army, saying: "Now, the master is entitled to the service of his apprentice by virtue of statute law; the parent is entitled to the service of his child by statute law; the master is entitled to the service of his slave by statute law. What is the gentleman's answer to that? Simply that the apprentice and the son can be taken, because they are not property, but are free citizens, and not slaves. That is no answer to the argument. The Attorney-General of the United States, in an able and elaborate opinion recently published, maintains that native-born colored persons are citizens. In this he is correct. If we can take as soldiers minor apprentices and minor sons, we have the same right to take slaves, for they are either persons or property. If they are persons, we are entitled to their services to save the Government; and the fact that they are or are not citizens does not change the right of the Government to their services as subjects, unless they owe allegiance to a foreign Government. If colored persons are property, we may use that property to put down this rebellion. The bill under consideration does not limit the use of colored persons to slaves; and a large proportion of them will not be slaves."

Mr. Sedgwick, of New York, thus explained the policy of the Government: "The policy of the Government has been rather dictated by necessity than by choice, for there is abundant evidence of the willingness of the Government to save the institution of slavery. The President, at an early day, foreseeing the course which this controversy must take, intimated to the semi-loyal border States the willingness of the Government to aid them pecuniarily in any reasonable scheme of gradual and compensated emancipation, advising action while the Federal Government was liberal in spirit and strong in its resources, and at the same time intimating that the probable exigencies of the war might render emancipation on some terms necessary throughout all the States of the republic. Acting on this suggestion, the State of Delaware, by its executive, the State of Maryland, by its executive, and the State of Missouri, by its legislative and executive authority, have brought before their people projects of emancipation on the terms and under the conditions which Congress has been, and I presume still is, willing to offer.

"The next step was the proclamation of the President of the 22d of September, announcing the purpose of the executive department of the Government to proclaim the emancipation of the slaves in all of those States remaining unrepresented in Congress after one hundred days, on the 1st of January of this year. The emancipation proclamation of the President, as commander-in-chief of the army and navy, followed. And I here desire to bear testimony to the firmness of the executive on this point, against strong remonstrances, against violent

opposition, against opposition in his cabinet, against threatenings from the army, threatenings from the traitor States, and timid counsels among his friends. That proclamation, in my judgment, is the salvation of the republic. I have no time, however, to argue it at length. I saw that it was a necessary and logical consequence of this war. Its constitutional authority, in my sober judgment, is beyond a doubt. I have no time to argue it here at length, but I affirm the war power of the President to issue this proclamation; and its necessary effect, to liberate the slaves in all the territory over which it was designed to operate, never can be successfully questioned, either by Congress or any of the judicial tribunals of the country. The law of nations clearly sanctions the emancipation of the enemy's slaves by military force and authority. It is an understood and received doctrine. It has been practised repeatedly in this country. Great Britain exercised its authority. France has exercised it in a memorable instance. In Colombia, in the South American republics, the right has been exercised both by the Spanish and American generals. This right has been affirmed by eminent statesmen in our own country, by Jefferson and by Adams."

Mr. Cox of Ohio, said the reason of the opposition to the bill was as follows: "I say that I believe the object of gentlemen in forcing this bill here is to bring about, or rather make final and forever, a dissolution of the Union. This is our justification for the extraordinary proceedings the other night, when we were determined to use all the means which the laws of this House gave, to prevent the passage of a law like this, which is aimed at the national life.

"The gentlemen from the border States here, gentlemen from Kentucky and Ohio—for there are two sides to the border—understand very well the hidden meaning and certain effect of this bill. Every man along the border will tell you that the Union is forever rendered hopeless if you pursue this policy of taking the slaves from their masters and arm them in this civil strife. It will only keep alive and aggravate this alienation of sections, which had its beginning in hate, and would have its end in vengeance. I stated, as my reason for the part I took in the proceedings of our eighteen-hours' session, that this bill was a part of the plot to drive the border Slave States out of the Union, or to place them in such hostility to the Government as to hurl our armies at their throats and strangle their political life. I have been confirmed in my belief by the statements of the eloquent members from Kentucky, as well as by the course of the discussion on the other side."

Mr. Thomas, of Massachusetts, in opposition to the bill, said: "I believe that I shall have the concurrence of every member of this House, and of the gentleman from Pennsylvania (Mr. Stevens) among the rest, when I say that this

bill, in its new form, proposes to vest in the President of the United States a larger power and wider discretion than were ever reposed by Congress in the hands of one man, unless under our previous legislation on the same subject.

"I am not here, Mr. Speaker, to raise the question whether we may not wisely repose a large discretion in the executive at a time like this. It is among the necessities of our condition that a large discretion should be reposed in the executive; but it is the duty of Congress to see that no such extent of power is vested in the President, or any one else, that that power may be readily used, as all power is liable to be used, to defeat the ends for which it is given, to subvert instead of upholding the laws. And this question is not of the individual character of the officer, but of principle and policy. In what condition of our affairs do we propose to raise this new army?"

"If I understood rightly the chairman of the Committee on Military Affairs, my friend from New York (Mr. Olin), we have now in the field, or rather we have upon the pay rolls of the Government, a million of white men of the Anglo-Saxon, Celtic, or German races. This, no man can doubt, is a sufficient army for the purpose of suppressing this rebellion, if this rebellion can be subdued by physical power alone. I do not say how many of those men are engaged to-day in active service in face of the enemy. There are, we are told, very large desertions from the army. There are vast numbers now on your pay rolls capable of service who are doing no service. But that must be to a considerable extent the fault of the administration of the army. It is the plain, obvious duty of the Government to see that these men who are on your pay rolls and capable of service are rendering that service. With a million of efficient men in the army and at work, and with our large and gallant navy, if it is practicable to conquer rebellion by arms, you have force adequate for the purpose, as large a force as we can hope to maintain and replenish without bankruptcy.

"We must look, Mr. Speaker, to the *financial* aspect of this question, the question of ways and means. I do not think the financial condition of this country has been truly presented, or rather, I should say, fully presented, for no gentlemen, of course, could desire to present it otherwise than truly. If I understand the facts spread by the gentlemen of the Committee of Ways and Means before the country in the speeches made on this floor, our national debt at the end of the next fiscal year will be at the least two thousand million dollars. By that debt is meant the *liquidated* debt of the country. I call the attention of the House to the fact that the unliquidated debt of this country, the debt for damages for the taking of property and the destruction of property by the military power in the prosecution of the war, upon any equitable or reason-

able rule which this Congress or any other Congress may adopt in its adjustment, may reach as high as five hundred millions more. That may be possibly too large an estimate, but gentlemen will see at once that how large it may be and whether it reaches this limit must depend on the rule which Congress shall apply to the adjustment of those claims—how widely the door is thrown open. If it is disposed to admit not only all legal claims, but all claims that are equitable in the ordinary sense of that word, and if we also include pensions, I think I do not state the case too strongly when I say it would reach five hundred millions.

“Do not fail to observe one other fact of our financial condition; and that is, that when you get the national debt of this country, liquidated and unliquidated, you do not reach the whole marrow of the thing. Your State, county, city, town, and parish debts all over this country, taken together, will make an aggregate approaching at least half of the liquidated national debt at the end of the present fiscal year; and when you combine these debts, the liquidated debt, the unliquidated debt, the liability for pensions, the State, county, city, and town debts, and consider, also, how much higher interest we are paying than that paid by any other people, the fact will stare you in the face that this nation at the end of the next fiscal year will be more heavily laden with debt than any nation in Europe.

“But to the money aspect of the question: the bill, without disturbing the present army at all, without diminution of its numbers, authorizes the President of the United States to enlist one hundred thousand, or two hundred thousand, or three hundred thousand men of African descent; and every new man you put into your army, according to the estimates of intelligent gentlemen on the floor of this House, costs you from seven hundred to a thousand dollars, and if you raise one hundred and fifty thousand men, as was proposed by the gentleman from Pennsylvania originally, you increase your expenses from one hundred to one hundred and fifty millions a year.

“Mr. Speaker, let me now turn to another feature of this bill, the term of enlistment. It provides for the enlistment of men for a period of five years. Why five years? I think there is more significance in that word ‘five’ in this bill than in all other words written in it. Its possible objects are not written. Do you mean to say to the country that it is your expectation, your reasonable expectation, and the basis on which you propose to make enlistments for your army, that this war is to continue for a period of five years longer? Do you mean to say to the country that on the vast scale on which the war is now prosecuted, and at the expense of treasure and life at which it is prosecuted, you expect to carry it on for five years more? If such be your expectation it is just and manly to say so. If such be not your ex-

pectation, pray add nothing to the anxiety and alarm of the people.

“Mr. Speaker, if the object of this war is restoration, that involves a state of things present or future which will soon be developed and felt. A war for restoration proceeds upon the ground that you will find in the rebel States as your army advances and protection is made possible, men who are ready to rally again under the blessed flag of the Union and to return to their allegiance to the National Government. If that feeling exists and is developed, certainly it will be developed before the lapse of five years; never, indeed, by this instrumentality, never. But if the object of this war is not restoration; if the purpose and object of this war are—as is sometimes declared in the heated and brilliant rhetoric of gentlemen on your left—subjugation, extermination, the recolonization of the whole rebel territory—then your term of enlistment is altogether too short—altogether too short.

“If, Mr. Speaker, the object be extermination, there is not one of these pages, snatched prematurely from his mother’s arms or cradle, who will live to see the end. You have been waging the war two years, and yet the number of inhabitants in the rebel States today is larger than it was when the war was begun. You cannot, probably, if you would, and you would not if you could, carry on a war with a fierceness and severity that would destroy life as rapidly as it germinates. Men, in war even, will marry and women be given in marriage; children will be born to them, and their mothers will hold them to their flowing breasts as the storm sweeps by. The angel of life will triumph over the angel of death. Such is the blessed economy of God. The extermination of eight millions of people, with the use of all our power and all our resources, is a moral and physical impossibility. Of this war, if it is carried on for extermination, neither you nor I, Mr. Speaker, may hope to see its close but in one way, to us the way of deepest humiliation, the intervention of other nations to stay its ravages. Who talks of a war of extermination is simply mad.”

The debate was further continued at some length in the House; the substitutes were rejected, and the bill passed in the following form:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President be, and is hereby authorized to enroll, arm, equip, and receive into the land and naval service of the United States such number of volunteers of African descent as he may deem useful to suppress the present rebellion, for such term of service as he may prescribe, not exceeding five years. The said volunteers to be organized according to the regulations of the branch of service in which they may be enlisted, to receive the same rations, clothing, and equipments as other volunteers, and a monthly pay not to exceed that of other volunteers; to be officered by persons appointed and commissioned by the President, and to be governed by the rules and articles of war and such other rules and regulations as

may be prescribed by the President: *Provided*, That nothing herein contained, or in the rules and articles of war, shall be so construed as to authorize or permit any officer of African descent to be appointed to rank, or to exercise military or naval authority over white officers, soldiers, or men in the military or naval service of the United States; nor shall any greater pay than ten dollars per month, with the usual allowance of clothing and rations, be allowed or paid to privates or laborers of African descent which are, or may be, in the military or naval service of the United States: *Provided further*, That the slaves of loyal citizens in the States exempt by the President's proclamation of January 1, 1863, shall not be received into the armed service of the United States, nor shall there be recruiting offices opened in either of the States of Delaware, Maryland, Western Virginia, Kentucky, Tennessee, or Missouri, without the consent of the Governor of said State having been first obtained.

The vote was as follows:

YEAS—Messrs. Aldrich, Alley, Arnold, Ashley, Babbitt, Baxter, Beaman, Bingham, Samuel S. Blair, Blake, William G. Brown, Buffinton, Campbell, Casey, Chamberlain, Clark, Colfax, Frederick A. Conkling, Roscoe Conkling, Conway, Cutler, Davis, Dawes, Dunn, Edger-ton, Edwards, Eliot, Ely, Fenton, Samuel C. Fessenden, Thomas A. D. Fessenden, Fisher, Frank, Gooch, Gurley, Hooper, Hutchins, Julian, Kelley, Francis W. Kellogg, Lansing, Loomis, Lovejoy, Low, McIndoe, McKean, McKnight, McPherson, Marston, Mitchell, Justin S. Morrill, Nixon, Noell, Olin, Timothy G. Phelps, Pike, Pomeroy, Porter, John H. Rice, Riddle, Edward H. Rollins, Sargeant, Sedgwick, Shanks, Sheffield, Shellar-bager, Sherman, Sloan, Spaulding, Stevens, Train, Trimble, Trowbridge, Van Horn, Walker, Wall, Wallace, Washburne, Wheeler, Albert S. White, Wilson, Windom, and Worcester—83.

NAYS—Messrs. William Allen, William J. Allen, Ancona, Bailey, Biddle, Jacob B. Blair, Clements, Cobb, Cox, Cravens, Crisfield, Crittenden, Delaplaine, Granger, Grider, Hale, Hall, Harding, Harrison, Holman, Horton, Johnson, William Kellogg, Kerrigan, Law, Lazear, Leary, Mallory, May, Maynard, Menzies, Morris, Noble, Norton, Odell, Pendleton, Price, Robinson, James S. Rollins, Shiel, Stiles, Benjamin F. Thomas, Francis Thomas, Vallandigham, Vibbard, Wadsworth, Webster, Whaley, Chilton A. White, Wickliff, Wood, Woodruff, Wright, and Yeaman—54.

On the 3d of February the bill came up in the Senate, and was referred to the Committee on Military Affairs.

On the 12th of February, the Committee reported the bill back to the Senate, with a recommendation "that it do not pass, because the authority intended to be given by it is sufficiently granted in the twelfth and fifteenth sections of the act approved July 17, 1862, chapter 101." The following are the sections referred to:

SEC. 12. *And be it further enacted*, That the President be, and is hereby authorized to receive into the service of the United States, for the purpose of constructing intrenchments, or performing camp service, or any other labor, or any military or naval service for which they may be found competent, persons of African descent, and such persons shall be enrolled and organized under such regulations, not inconsistent with the Constitution and laws, as the President may prescribe.

SEC. 15. *And be it further enacted*, That all persons who have been or shall be hereafter enrolled in the service of the United States under this act shall receive the pay and rations now allowed by law to soldiers, according to their respective grades: *Provided*, That persons of African descent, who under this law shall be employed, shall receive ten dollars per month and one ration, three dollars of which monthly pay may be in clothing.

In the Senate, on the 5th of February, the bill for enrolling and drafting the militia, &c., was considered with the amendments reported by the Committee on Military Affairs.

Mr. Carlile, of Western Virginia, stated that some provisions of the bill appeared to be of doubtful propriety, and of very doubtful constitutionality. He therefore moved to strike out the second section, as proposing "to put the entire militia of the States under the control of the President, and subject to certain rules and regulations for drafting them as he may prescribe." If this motion succeeded, it was his intention also to move to strike out the fourth, seventh, and tenth sections of the bill, of which he said: "Those sections strike down everything like the rights of the States to take care of their own militia, and they take from the States really all control over them. The Constitution of the United States authorizes Congress—

To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions.

To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States.

"This is a general conscript law, asserting the power on the part of the Congress of the United States, without reference at all to the States of the Union, to give to the President the right to call the entire military force of the several States into the service of the United States, to provide how they shall be called in, to provide for enrolling and drafting them, and to make rules for their government, ignoring entirely the governments of the States. If this were a despotic Government, or if the people belonged to this Government, there might be some such assertion of power on the part of Congress; but, as I understand it, the Government belongs to the people, and the present war is an effort to preserve that Government. If the people do not feel interest enough in their own Government to preserve it, I doubt very much whether you can place power enough in the hands of their agents to make them do it."

Mr. Richardson, of Illinois, in opposition to the bill, said: "Mr. President, no bill has ever been introduced into Congress of such fearful import as the one now under consideration. It confers upon the President of the United States power to make all rules and regulations for the enrollment of the militia; and when they are enrolled, it places the entire militia of the United States at his absolute command.

"It is the enrollment that puts him into the service. As soon as he is enrolled, no matter what his disabilities may be, he is subject to the order of the President of the United States and the rules and articles of war. There is no exemption. I object to the bill on that account.

"But, Mr. President, I object to the bill still more on another ground. Heretofore, in our

history, Congress has assumed the responsibility of passing laws for the purpose of bringing soldiers into the field. This bill proposes to surrender that right now and forever, and to confer upon the President of the United States more power than belongs to any despot in Europe or anywhere else. I ask gentlemen to look at the second and fourth sections of this bill, and to pause before they cast their vote for either. As has been well said by the senator from Virginia, they strike down every right pertaining to the States. In some of the States we have in our militia those who do not belong to the militia in other States. In some of the States you have the negro in your militia; in others you have not. Under the operation of this bill the President of the United States has the absolute power to take every man into the service who may differ with him in political sentiment and political views. He is to make the regulations; he is to make the law. He may take, upon the other hand, that class of people whom we do not believe to be capable of fighting battles or maintaining the civil government.

"Mr. President, when I look at the measures that are proposed here, when I see the deep interest that is felt in the section of the country from which I come, I cannot forbear saying to the Senate of the United States, and to the country, if you pass this bill, if you pass the bill you had under consideration the other day to appropriate money to purchase slaves, and the bill to bring into your armies, side by side with our white race, an inferior race, the negro, I fear you will plunge the country into civil war. I ask you to consider; I ask you to reflect. I will not discuss the question of whether this feeling so deep and fearful is right or wrong. I know it exists, and as legislators it is our duty to treat of facts as they are. It is our duty to remember that our fellow citizens have passions which may dethrone reason, and sometimes cause them to act precipitately and hastily. God knows I do not wish to augment this feeling, already excited enough. I have a right to call upon the American Senate to forbear before passing acts that may involve us in further trouble, in disaster, and, it may be, in civil war. Whenever you have called on that section of the country for volunteers you have got them. Whenever you have asked for them they have come. If in other sections of the country they have not come as promptly as they have from that, is there nothing less than to give absolute, extreme, dangerous power to the President to fill up your army?"

Mr. Wilson, of Massachusetts, then explained the bill: "The Government has the power to organize the militia and to arm the militia, and, in the exercise of that power, the Congress of the United States has enacted that all persons between eighteen and forty-five, not exempted by law, shall be enrolled. Congress, at the last session, enacted that the President of the United States should make the needful rules

and regulations, whenever it was necessary to make them. Now, this bill simply provides that the President shall have the power to make the needful rules and regulations for enrolling the militia of the country, and for drafting the militia. It does not take away from the States the power to appoint the officers; it does not give the President of the United States the power to appoint the officers; it does not take away from the States the power to train the militia when organized and when enrolled; it does not take away from the States the power to train the militia according to the laws and regulations prescribed by the Congress of the United States. I do not see, sir, that it trenches in any way upon the provisions of the Constitution; but it is an important provision, giving the President of the United States during this rebellion the authority to make the needful rules and regulations for the enrollment of the militia, and for the drafting of the militia.

"Objection is made to the fourth section, which provides that persons when drafted shall be considered as in the service of the United States. I think it a very important provision. When either a volunteer or a drafted militiaman is mustered into the service of the United States, he is under the rules and articles of war. Now, this section simply provides that the rules and articles of war, which apply to a person who is mustered into the service of the United States, shall apply to a man when he is drafted into the service of the United States; and after being drafted, it is provided that he may be examined and discharged for physical disability; and if found incapable of bearing arms, of course he will be discharged. The bill also provides that any person drafted may supply a substitute, and then he shall be exempted during the war. But it is important that when persons are drafted into the service of the United States, they shall be placed under the rules and articles of war just as much as though they were mustered into the service of the United States. It is a fact, it is a sad one, but it is nevertheless true, that in some localities where men were drafted, not one fifth of those men were ever mustered into the service of the United States, but absented themselves. There was no mode to reach them, and the draft was substantially broken up in that way."

Mr. Bayard, of Delaware, in reply said: "Sir, there is, in my view, a difference between the army and navy of the United States and the militia of the United States. I think the Constitution makes a difference. It gives you the power to raise and support armies, with a limitation as to the appropriations; but the militia are the forces of the States as States. The Constitution gives you power to call them forth for the service of the United States in two cases; but it does not give you the control, nor does it intend to give you the control of the militia of the States in the same manner that you have of the army and navy. You

have not the authority, in my judgment, to govern the militia of the United States. You may provide for their organization; you may provide for their enrollment, which is part of the organization; you may provide for arming them; you may provide the mode and manner in which they shall be disciplined; but you cannot execute that by your own executive; it is left to the States to do it themselves, the authorities of the States being in express terms authorized to do it. You may provide for the government of such part of them as are employed in the service of the United States. Does that include the right to place the entire control over all citizens between eighteen and forty-five in every State at the mere discretion of the President, whether they have been mustered into the service or not? Is it not an abuse of terms to say that they are in the employment of the United States?"

Mr. Nesmith, of Oregon, expressed the following views on the points under consideration: "The power which it is proposed to confer upon the President is merely a power which is to go into force antecedent to these militiamen becoming a portion of the army of the United States. It is merely provided that he shall make rules and regulations for enrolling and drafting the militia; not for the execution of the enrollment and the draft itself, that being already provided for by law. It is therefore clear to my mind that the constitutional objection which has been raised by the senator from Delaware does not apply. The language is, 'all proper rules and regulations.' I apprehend that the term 'proper,' as there used, must have reference to existing laws; and if the President should make rules and regulations for drafting the militia into the service of the United States, which were not authorized by the existing laws, the courts might intervene and discharge from service persons who were drafted into the service by means of an improper exercise of this power.

"The objection which the senator from Illinois made was that certain classes or persons of particular political opinions or of some particular complexion might be drafted or might be left out, as the President, in the exercise of his power, saw proper. I think the provisions of the section are such as to exclude any such idea. It is very explicit in the enumeration of the persons who shall be subject to the draft, and it says that in all cases it shall 'include all able-bodied male citizens between the ages of eighteen and forty-five years, except such as may be exempt therefrom by existing laws of the United States.' I do not suppose that under the provisions of the section as it stands the President could make any discrimination against persons entertaining political sentiments different from his own; neither do I suppose that he could force any alien or any person of African descent into the service under this section. It confines him strictly to those who are citizens of the United States."

Mr. Richardson, of Illinois, interrupting the senator, said: "Allow me to suggest to the senator that the Attorney-General has given an opinion that all persons who are born free in this country are citizens, no matter whether of African descent or not. I believe that is the purport of his opinion, and I presume the President accepts that as the law."

The amendment of Mr. Carlile was rejected as follows:

YEAS—Messrs. Bayard, Carlile, Davis, Hicks, Kennedy, Latham, Powell, Rice, Richardson, Saulsbury, Turpie, Wall, Willey, and Wilson of Missouri—14.

NAYS—Messrs. Anthony, Arnold, Chandler, Clark, Collamer, Cowell, Dixon, Doolittle, Fessenden, Foot, Foster, Grimes, Hale, Harding, Harlan, Harris, Henderson, Howard, Howe, King, Lane of Indiana, Lane of Kansas, Morrill, Nesmith, Pomeroy, Sherman, Sumner, Ten Eyck, Trumbull, Wade, Wilkinson, Wilmot, and Wilson of Massachusetts—33.

A motion from Mr. Carlile to strike out the fourth section of the bill was next considered.

Mr. Collamer, of Vermont, took the floor in opposition. He said: "The section now under consideration provides that when a man shall have been drafted into the militia according to law, he shall from that time be considered as subject to the rules and articles of war. The provision is that he 'shall, when so drafted, be deemed to be in the actual service of the United States.' It is suggested that that declaration is beyond our power. I do not propose to argue that point now, but simply to suggest that if I can find a precedent in the early practice of the country, in our better times, if you please, I shall have gone far enough. I do not want to consider it as *res integra* again. The Constitution, indeed, provides in the amendments:

ART. V. No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia when in actual service in time of war or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall he be compelled in any criminal case to be a witness against himself, nor to be deprived of life, liberty, or property, without due process of law.

"That phrase 'due process of law' has often been decided by our courts to mean the ordinary course of judicial proceedings by courts and juries. In the act of 1795, regulating the drafting of the militia, it is provided that when a man who is drafted neglects or refuses to appear and do duty, he shall be subject to such and such fines described, which shall be levied upon him by a court martial. The part of the Constitution which I have read would not subject any man to the infliction of any penalty by a court martial (for that is not 'due process of law') unless he was in the service of the United States. The act of 1795 subjected men to fine by court martial when they had been drafted, though they had not been mustered. That has been the law ever since. In the case of *Martin vs. Mott*, which the honorable senator will find in 12 Wheaton's Reports, and also in another case reported in 5 Wheaton, the

marshal had levied upon property and collected the fine assessed; the owner of the property replevied the property thus taken, which was distrained for the fine; and the whole case came to the Supreme Court of the United States. The entire question was brought before the court, and a great variety of points was started. The constitutionality of such a law was contested. The court, however, sustained the levying of a fine by a court martial in that case. They said it was a constitutional law, notwithstanding the provision of the Constitution which I have read."

Mr. Carlile, of Virginia, in reply, said: "The clauses in the Constitution authorizing the President to call forth the militia, and to provide for their organizing and disciplining, have been cited as authority for the power sought to be exercised by this bill; and the distinguished senator from Vermont, for whose learning and intellectual ability I have the highest respect, contented himself this morning, by way of sustaining the provision, by citing two precedents, decisions which he says have been made by the Supreme Court, the proper tribunal to settle constitutional questions. I desire to invite his attention to an authority which I know will be respected by him. It is none other than Chief-Justice Story, who wrote his Commentaries long after the decisions to which the senator from Vermont has referred, and who it must be presumed was perfectly familiar with those decisions, which authority directly controverts the position attempted to be established by the precedents cited, and denies the power claimed by the friends of this bill. It is a remarkable fact that in the discussions of this subject by Chief-Justice Story, he refers to the debates in the Convention which formed the Federal Constitution, and shows by reference to those debates that one of the objections urged to the clauses as they now stand in the Constitution, providing for calling forth the militia and organizing and disciplining and governing them when in the service of the United States, was that it might be construed to confer the very power which is now sought to be exercised by the fourth section of this bill. I repeat, Mr. President, and I desire to call the attention of senators to this important fact, that one of the reasons urged in the Federal Convention against the adoption of the clauses of the Constitution which are relied upon as conferring authority for this provision which is now moved to be stricken out, was, that it might be construed as a warrant for the exercise of the very power sought to be ingrafted into this bill. 2 Elliot's Debates, pages 287, 288, and 294, shows the fact that I have stated; and Justice Story, in commenting upon it, says:

The right of governing them [the militia] was confined to the single case of their being in the actual service of the United States, in some of the cases pointed out in the Constitution. It was then, and then only, that they could be subjected by the General Government to martial law.

"This fourth section proposes to subject the men who may be drafted under the provisions of this bill to martial law, to bring them under the rules and articles of war, to deprive them of their constitutional right of being tried for criminal offences by presentments and an indictment before a jury of their peers before they have been mustered into the service, or before they have entered the service of the United States. Such a power, Justice Story says, in the passage which I have quoted, is not conferred by the Constitution or warranted by that instrument. (Story's Commentaries on the Constitution, volume 3, page 85, section 1202.) I will read it again:

The right of governing them was confined to the single case of their being in the actual service of the United States, in some of the cases pointed out in the Constitution. It was then, and then only, that they could be subjected by the General Government to martial law.

"We know that this right of calling the militia into the service of the United States, out of their States, was resisted by Connecticut and Massachusetts; and Justice Story, in his Commentaries, refers to that resistance:

In Connecticut and Massachusetts it was held that the Governors of the States, to whom orders were addressed by the President to call forth the militia on account of danger of invasion, were entitled to judge for themselves whether the exigency has arisen; and were not bound by the opinion or orders of the President.

"Again, Justice Story says in the same volume, page 93, section 1208:

There is a clear distinction between calling forth the militia and their being in actual service. These are not contemporaneous acts, nor necessarily identical in their constitutional bearings. The President is not commander-in-chief of the militia except when in actual service, and not when they are merely ordered into service. They are subjected to martial law only when in actual service, and not merely when called forth, before they have obeyed the call.

"Now, Mr. President, upon the constitutional question, it seems to me the authority which I have read, laid down by Justice Story, in his Commentaries on the Constitution, should be sufficient, and is a sufficient answer to the constitutional argument made by the senator from Massachusetts, and the precedent cited by my distinguished friend from Vermont.

"We cannot shut our eyes to the fact—whether it be true or false, the fact exists—there is a prevailing opinion and impression in the country that this war is not being waged for the maintenance of the Constitution and the restoration of the Union as it was. So long as that sentiment exists, your efforts will be more or less paralyzed, and all your bills and all your authority will, if in the opinion of the people they are the exercise of unconstitutional, arbitrary power, be resisted by them. That impression will prevail in my opinion, if we look to force, and force alone, not only to suppress the rebellion, but to fill up our armies, and to strengthen the arm of this Government. Sir, force is one of the means to be used against

this rebellion; but force is not the most desirable means to be used against the people loyal to the Constitution and the Government of their country."

Mr. Doolittle thus explained the case stated by Mr. Collamer: "Mr. President, the case referred to by the honorable senator from Vermont is a case arising under the law of Pennsylvania. Congress had provided by law for the drafting of the militia, and subjecting those who did not appear to penalties to be imposed by courts martial. Congress did not provide that the courts martial should be established by the authorities of the United States. The law of Pennsylvania, however, stepped in, and provided that if persons were drafted in pursuance of this act of Congress and failed to come, they should be subjected to the penalties imposed by this act of Congress, and provided also that a court martial of the State should be organized to impose the penalty. The State court martial of Pennsylvania imposed the penalty and levied the fine. The property was seized. The property seized by virtue of this order of the court martial was replevied, and the controversy which grew out of that went up to the Supreme Court of the United States; and then this question, which my honorable friend is now discussing, was one of the precise questions which were discussed in that case. Justice Washington, who delivered the opinion of the court, laid down the rule that under the law of Congress as it then existed, a distinction was taken between a person called to go into the service and a person who was actually employed within the service. He said, further, that Congress might, by law, have declared, and perhaps it would have been better if they had declared, that the time when he went into the service might date from the time when he was drafted, or from the time when the order went to the Governor to call for the troops, or when it went to any other officer. Mr. Justice Story, who was a member of the bench of the Supreme Court at that time from New England, which was supposed to be a little disaffected to the war of 1812, in delivering a dissenting opinion, took issue with the court, and laid down this dogma, which he subsequently put into his book, in which he claimed that under the Constitution such a distinction did exist; and it is this opinion of Justice Story expressing a dissenting opinion which the Senator from Virginia has quoted.

"Having said thus much, in order to make it certain, I propose to read a little from this authority. Justice Washington, in delivering the opinion of the court, uses this language:

The first question, then, is at what time and under what circumstances does a portion of militia, drafted, detached, and called forth by the President, enter into the service of the United States, and change their character from State to national militia? That Congress might by law have fixed the period by confining it to the draft; the order given to the chief magistrate or other militia officer of the State; to

the arrival of the men at the place of rendezvous; or to any other circumstances, I can entertain no doubt. This would certainly be included in the more extensive powers of calling forth the militia, organizing, arming, disciplining, and governing them. But has Congress made any declaration on this subject, and in what manner is the will of that body, as expressed in the before-mentioned laws, to be construed?

"Then he goes on to say that under the laws of 1795 and 1814, and the other laws of Congress, Congress, in the legislation which had taken place on that subject, did not declare that they were to be considered as in the service of the United States until they were finally mustered in, and were entitled to receive their pay. There is one point further. He says:

But, although Congress has been less explicit on this subject than they might have been, and it could be wished they had been, I am, nevertheless, of opinion that a fair construction of the different militia laws of the United States will lead to a conclusion that something more than organizing and equipping a detachment, and ordering it into service, was considered as necessary to place the militia in the service of the United States.

"And therefore he arrives at his conclusion that, inasmuch as Congress had not by its law declared when a man was drafted, he was from that moment in the service of the United States and subject to the rules and articles of war; and as Congress still left him as a part of the State militia, he was still subject to the laws governing the State militia, and therefore a militia court martial of the State could impose a legal, valid fine upon him for refusing to obey the call. The court, therefore, sustained the proceeding of the court martial. Justice Story, in giving a dissenting opinion, in which he as a dissentient judge arrives at the conclusion that the law of Pennsylvania is unconstitutional and void, uses the same language which he subsequently put into his Commentaries, and that is the language which the senator from Virginia has read."

Mr. Carlile, of Virginia, still further in explanation said: "Mr. President, I did not interrupt the senator from Ohio; but on this subject of conscription I have not expressed myself as he seems to think. On the question of giving up this contest I agree with him; the people of this country never will give up their Government; but I desire to call the attention of the senator from Wisconsin (Mr. Doolittle) to the authority which he presumed he found decided in the case of *Houston vs. Moore*. If the senator will turn a little further to the history of that case, he will find that what he read as the opinion of the court is the mere *dictum* of Mr. Justice Washington, who delivered the opinion of the court, which was not concurred in by any of the other judges so far as the case shows. On the contrary, Mr. Justice Washington says:

The other judges are of opinion that the judgment ought to be affirmed;—

"That is, the judgment of the court below—but they do not concur in all respects in the reasons which influence my opinion.

"Mr. Justice Johnson delivered a separate opinion on that occasion, to which I desire to call the attention of the honorable senator from Ohio, who seems to be under the impression that in opposition to the action of the States and without State concurrence in your action of conscription, you can still enforce it. If Mr. Justice Johnson be authority, the senator is mistaken in that as a question of constitutional law. In the very same case, Mr. Justice Johnson said:

They [Congress] may command or request; and in the case before us, they obviously confined themselves to the latter mode. Indeed, extensive as their power over the militia is, the United States are obviously intended to be made in some measure dependent upon the States for the aid of this species of force. For, if the States will not officer or train their men, there is no power given to Congress to supply the deficiency.

"In the conclusion of his opinion, going on to show still that what the senator from Wisconsin thought was the opinion of the court was nothing but the *dictum* of Mr. Justice Washington, Mr. Justice Johnson said:

In this case it will be observed that there is no point whatever decided, except that the fine was constitutionally imposed upon the plaintiff in error. The course of reasoning by which the judges have reached this conclusion is various, coinciding in but one thing, namely, that there is no error in the judgment of the State court of Pennsylvania.

"In the opinion as rendered by Justice Story, the weight of authority is decidedly with him so far as this case is concerned, as is stated by him in his Commentaries, from which I read; for Justice Story expressly tells us that in his views he has the concurrence of one of his brethren, and not one of them concurred with Justice Washington in the opinion referred to by the senator from Wisconsin."

The motion to strike out was rejected. Yeas, 13; nays, 28.

On the 16th, the subject came up again in the Senate.

Mr. Wilson, of Massachusetts, urged the passage of the bill, stating these reasons: "We are now engaged in a gigantic struggle for the preservation of the life of the nation, menaced by the foulest and most wicked rebellion recorded in the annals of mankind. The young men of the republic for more than twenty months have been thronging to the field to uphold the cause of their perilled country. They left their homes in the pride and bloom, and filled with the high hopes of young manhood. Those noble regiments of volunteers that left their homes full of lusty life, and in all the pride of strength and assured confidence, are now thinned and wasted by the diseases of the camp and the storms of battle. The old regiments hardly average now more than four hundred men in the field fit for the stern duties of war. Many who rallied at the call of their country, and who have followed its flag with unswerving devotion, now sleep in bloody graves, or linger in hospitals, or, bending beneath disease and wounds, can no longer fill the ranks of our

legions in camp or on the battle field. If we mean to maintain the supremacy of the Constitution and the laws, if we mean to preserve the unity of the republic, if we mean that America shall live and have a position and name among the nations, we must fill the broken and thinned ranks of our wasted battalions.

"The issue is now clearly presented to the country for the acceptance or rejection of the American people: an inglorious peace with a dismembered Union and a broken nation, on the one hand, or war fought out until the rebellion is crushed beneath its iron heel. Patriotism, as well as freedom, humanity, and religion, accepts the bloody issues of war rather than peace purchased with the dismemberment of the republic and the death of the nation.

"If we accept peace, disunion, death, then we may speedily summon home again our armies; if we accept war, until the flag of the republic waves over every foot of our united country, then we must see to it that the ranks of our armies, broken by toil, disease, and death, are filled again with the health and vigor of life. To fill the thinned ranks of our battalions, we must again call upon the people. The immense numbers already summoned to the field, the scarcity and high rewards of labor, press upon all of us the conviction that the ranks of our wasted regiments cannot be filled again by the old system of volunteering. If volunteers will not respond to the call of the country, then we must resort to the involuntary system. If we summon the militia, we must have new regiments and new officers—raw soldiers and untrained officers—enormous expenses and impotent forces. The nation needs not new regiments nor more officers; it needs new bayonets in the war-wasted ranks of the veteran regiments. In the ranks of these battle-scarred regiments one new recruit is worth more than three in new regiments under untried officers; and the chances of comfort, health, and life are far greater in the old than in new regiments.

"Volunteers we cannot obtain, and everything forbids that we should resort to the temporary expedient of calling out the militia. Such a call would waste resources and absorb the energies, and increase but little the military forces of the country. The needs of the nation demand that we should rely not only upon volunteering, nor upon calling forth the militia, but that we should fill the regiments now in the field, worn and wasted by disease and death, by enrolling and drafting the population of the country under the constitutional authority 'to raise and support armies.' The Constitution of the United States confers upon Congress the absolute and complete power 'to raise and support armies,' qualified only by the provision that appropriations for that purpose shall be for not more than two years.

"Sir, this grant to Congress of power 'to raise and support armies' carries with it the

right to do it by voluntary enlistment or by compulsory process. If men cannot be raised by voluntary enlistment, then the Government must raise men by involuntary means, or the power to raise and support armies for the public defence is a nullity."

Numerous amendments were made to the bill.

Mr. Cowan, of Pennsylvania, moved to make the period of service for the conscripts one year. This was rejected by the following vote:

YEAS—Messrs. Collamer, Cowan, Davis, Dixon, Foot, Grimes, Harris, Henderson, Hicks, and Trumbull—10.

NAYS—Messrs. Anthony, Arnold, Chandler, Clark, Doolittle, Fessenden, Foster, Harding, Harlan, Howard, Howe, King, Lane of Indiana, Lane of Kansas, Latham, McDougall, Morrill, Nesmith, Pomeroy, Rice, Sherman, Sumner, Ten Eyck, Wade, Wilkinson, and Wilson of Massachusetts—26.

The bill was then ordered to be engrossed for a third reading, and read the third time and passed. The vote is not given in the official report.

On the 23d of February, the bill was considered in the House.

Mr. Olin, of New York, who had charge of the bill in the House, thus stated the course he proposed to pursue: "I propose to move to commit the bill to the Committee on Military Affairs, and on that motion to permit discussion upon the merits of the bill for a reasonable length of time; then, after such discussion, if I can obtain the floor, I propose to withdraw that motion, and to ask the House to vote upon the bill as reported from the Senate.

"My reasons for adopting this course are simply these: the bill, in some of its details, I consider more or less imperfect; but all these details are of minor consequence when compared with the great importance of the measure itself; and so far as these details are concerned, if any of them are objectionable, they can very easily be remedied by a supplementary bill. These defects or imperfections are, in my judgment, of infinitely less importance than that this measure, or one substantially like this, should be secured and passed into law by the present Congress. I am, therefore, not willing to hazard the loss of a bill which I deem so important by opening it to the various propositions which may be made by way of amendment to this bill. The Committee on Military Affairs have carefully considered this measure. It has been a measure of vital interest from the commencement of the session to the present hour. Our attention has not been diverted from this measure since the commencement of the session.

"Now, although the committee would, if the time permitted, alter some of its minor provisions, yet I think as a whole they agree with me in the propriety of asking this House to pass this bill without amendment, and thus to secure with certainty the measure, and clothe the Government with power to exercise this

necessary authority under the present situation of our public affairs. I intend, if there shall be time during the present session, to introduce a bill into the House, open for discussion and amendment, to allow us to perfect, if it is thought we can perfect, some of the details of this bill. I mean that the House shall have an opportunity to do so if this bill shall become a law.

Mr. Olin then noticed the chief objections to the bill thus: "Some objections are made to this measure. First, that it does not ask the coöperation of the States, and invite the instrumentality of State organizations in raising these troops conceded to be necessary at this time. My first answer is, there is no time to employ such instrumentality. Many of our State Legislatures would not and could not perfect such measures within the next twelve months. In the mean time untold disasters would very likely befall our arms by reason of such delay. All concede the present is the critical period of the war, and that the present exigency demands imperiously that whatever of vigor, whatever of authority, whatever of power the National Government has as a Government, should be exerted at this time.

"My second answer is, that this 'power to raise and support armies,' expressly given by the Constitution to Congress, should be exercised by Congress, and not petitioned for as a boon from the State Governments. This idea of calling upon the Governors of the States to furnish troops had its origin in that accursed doctrine of State rights, State sovereignty, which has been chiefly instrumental in bringing upon the republic our present calamity. It is high time the Federal Government exerted every power clearly and expressly granted to it. And if the Government cannot exercise those powers, the sooner we know it the better, and let us resolve again into that Confederacy which existed before the formation of the Federal Constitution. I am unwilling to rely upon State instrumentality for the exercise of this sovereign power. I wish now that the Government, as a Government, should be felt in the exercise of its rightful authority. This is not the time to abdicate any of the sovereign powers granted in the Federal Constitution, or to withhold their exercise."

Mr. Holman, of Indiana, said: "I wish to ask the gentleman from New York, whether I understood him to say that he should not give opportunity to offer amendments to the bill?"

Mr. Olin replied: "The gentleman certainly could not have misunderstood me if he had listened to my remarks. I stated that I was unwilling to hazard the passage of this bill by putting amendments to it, and thereby sending it back to the Senate at this late hour of the session.

"I stated further that I intended, if the House would give us the liberty to do so, to bring in a bill speedily, and thereby afford

an opportunity to perfect or modify the bill, as the House thought proper."

Mr. Holman further said: "There is no intention, or at least wish, to filibuster upon this bill, and there is no gentleman, I presume, opposed to its details who cares to discuss it, unless an opportunity to offer amendments is afforded. For what can debate amount to without an opportunity to amend? It is not for the mere purpose of expressing opinions hostile to the measure that discussion is desired, but for the purpose of perfecting the bill, so that, shorn of its objectionable features, it may pass with some degree of unanimity through this house. It is important that a well-digested militia bill should be passed by Congress, curing the defects in the existing law."

Mr. Wickliffe, of Kentucky, moved to amend the motion to refer by instructing the committee to report back the bill with the following provision:

That it shall be the duty of the commander of troops at any post, in any State, on the days of election, by the citizens of such State, held for the purpose of electing State officers, or officers of the United States, or Representatives to Congress, or electors for the President and Vice President, to remove and keep his troops at least one mile from the place of voting during said election.

Mr. Cox, of Ohio, moved to amend by adopting the following proviso:

Provided, That no one shall be enrolled under this act except able-bodied white male citizens of the United States.

An extended discussion ensued, involving the general administration of public affairs rather than the points of the bill, which were only incidentally mentioned. Mr. Biddle, of Pennsylvania, urged objections to the bill as follows: "This is part of a series of measures, which, to my mind, seem materially to alter the construction of the Government under which we live. The bill to transfer to the President, without limitation of time or place, our power over the writ of *habeas corpus*, the bill of indemnity which, to use the words of the Senate's amendment, secures for all wrongs or trespasses committed by any officer of the Government full immunity if he pleads in the courts of justice the order of the President, and which also deprives State courts of their jurisdiction in such cases; the bank bill, which puts the purse strings in the same hand with the sword—these bills, to my mind, couple themselves with this bill, and they seem to me, taken together, to change the whole framework of this Government, and instead of the constitutional Government which was originally so carefully devised for this country, they leave us a system which does not materially differ, according to any definition I can frame, from the despotism of France or of Russia.

"This particular bill, to sum it up in a word, for I shall not continue at any length these general objections, turns the militia of the United States into a regular army. That is

its leading feature. I do not intend to animadvert upon small particulars, such as, for instance, that while the executive departments of the Government are exempted from the draft, members of Congress are made subject to it. I allude to that merely as one of those straws which shows which way the wind blows in these times. But the two sections to which I hoped to offer amendments successfully are the fifth and seventh sections of this bill.

"Look at these provisions: a provost-marshal in every congressional district, to 'inquire into and report all treasonable practices,' arresting summarily under this act, or under no act, but under some order or proclamation, any one who may be obnoxious to him or his superiors. Five of these functionaries will reign at once in Philadelphia—twenty-five in Pennsylvania; a proportional number in all the other States. Why, Athens had but thirty imposed on her by military power, and such was their rule that, in Grecian history, the year of the thirty tyrants was known as 'the year of anarchy.'

"These two sections, Mr. Speaker, cover the whole country with a network of military authority. For the first time this new character in civil society, the provost-marshal, is recognized by law, and without those limitations on his authority which are necessary for the protection of the citizen from those extraordinary abuses of power of which we have already seen so many examples. I do not speculate on what will be the construction of the authority of these officers. I have no occasion to speculate on it. I presume that we may fairly 'judge the future by the past.'

"In order, Mr. Speaker, to exhibit the more clearly the aim of the course of argument which I am pursuing, I will state to the House the general purport of the amendments which it is the object of my remarks to recommend to its favor. At the end of the seventh section, which gives vague powers to provost-marshals to inquire into the vague offence of treasonable practices, I propose to add a proviso, that nothing in this act contained shall authorize the arrest or trial by military authority of any person who is not in the military service of the United States, nor drafted into the same under the provisions of this act; nor shall the said provost-marshal, or any other officer of the United States interfere with the lawful exercise of the elective franchise in any State or Territory wherein the execution of the laws of the United States is not obstructed by force of arms."

Mr. Wright, of Pennsylvania, also objected to it as interfering with the personal liberty of the citizen, thus: "There is, then, the great question involved in the bill of depriving the citizen of his personal liberty without a trial by jury, or even without the ordinary forms of law; and that citizen may be the most loyal man in the land. You put at defiance the constitutional safeguards which have been wisely placed around him. This House cannot have forgotten the

bad feeling which grew up all over the country in regard to arrests made, not in accordance with, but in opposition to, the law; and in my judgment it now behooves this legislative body to act with caution in regard to all authority conferred for the arrest and imprisonment of citizens of the United States. The provisions of the last section of the bill, to which I have already referred, put it in the power of the provost-marshal to arrest and imprison citizens of the United States on his own motion. That is wrong. It ought not to be so. If there is to be any charge of disloyalty against any citizen of the Government, there are other ways in which it may be fairly tried and decided, and that, too, according to constitutional law. I do not think that when gentlemen come to reflect on the vast power which this bill confers upon any one of the provost-marshals created under it to go into any one of the sovereign States of the Union, and arrest on his own motion, and imprison under his own construction of what may be 'treasonable practices,' they will be willing to retain such power in the bill.

"This is one of the insuperable objections I see to the bill. I am willing, and I say it with candor, to send every man in the loyal States into the field, if necessary. I am willing to devote every cent of the nation's money, and every drop of blood to put down this rebellion. But, sir, you must not put the life and liberty of the citizen under the whim and caprice of every upstart officer who may take upon himself under this bill to judge as to what is treason and what is not treason."

Mr. Sargeant, of California, thus urged the importance of the bill: "The practical question arises, will this bill increase the efficiency of the national forces? Will it place more men in the field, and enable the Government to carry on the war upon sounder and surer principles? It must be admitted that the successful raising of armies by the rebels has been accomplished by the conscription principle. By no other could they have kept full half a million men in arms—so large a proportion of their available population. As we must fight, we must begin to fight upon effective principles. We must gird up the loins of the nation for a conclusive struggle. The enemy have made their last effort. It is now with them a question of endurance. If they can keep us at bay until our present enlisted men are discharged with the expiration of their short terms of enlistment, and their allies in the North can defeat the refilling of our armies, they have gained their purposes, and the Union is dissolved. It matters little upon what pretence this or a kindred bill is opposed, the effect is the same. Some such measure is imperative, and no one can be devised which a fault-finding ingenuity cannot fill an hour in condemning. One gentleman objects because the patronage of Governors of States in the appointment of officers is abridged, while it has full scope under the volunteer system. Yet gentlemen know that a curse of that

system is that militia appointments have gone more by favor than fitness, and the Government is compelled to pay thousands of officers who curse the army by their inefficiency. Another thinks the Constitution gives no power to Congress to summon the people to the army unless they volunteer to come; as if the founders of this Government erected this beautiful fabric of liberty and national glory, and provided no means to secure its safety. The Constitution confers the right to summon every man, whether from the plough, the workshop, or the pulpit, to press back invasion or crush insurrection; and gives to Congress the power to pass laws to see that that summons is effectual. Else we are secured by a rope of sand, and are dissolved into chaos at the first jar of war."

Mr. White, of Ohio, opposed the bill as being unconstitutional. He said: "Mr. Speaker, if there was anything of which our fathers were jealous, and against the dangers of which they sought to provide, it was the power of an overshadowing standing army. The writers and commentators on the Constitution, contemporaneous with its adoption, have written on the subject and elucidated the meaning, the intent, and the spirit of that instrument. The power is clearly given to raise and support armies. How are they to be raised and supported? I admit the power of the General Government, independent of the States, to get all the men into the army that it can by voluntary enlistments. But when it goes beyond that, you have to resort to the militia of the States and call them into the service of the United States as such. You have no power to force soldiers into the service of the United States in any other way than through and by means of the militia organizations established under the laws of the States.

"After granting the power to raise and support armies, the Constitution further provides that Congress shall have power—

To provide for calling forth the militia to execute the laws of the Union, to suppress insurrection, and repel invasions.

"There is no other conceivable purpose for which a military force could be used than those here enumerated. And in order to make the militia when called into the service efficient, the further power is given Congress—

To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers and the authority of training the militia according to the discipline prescribed by Congress.

"These are plain, practical provisions incorporated into the Constitution in order to establish that uniformity in the organization, arming, and discipline of the militia of the different States necessary to make them efficient when brought into the service of the United States, so that when placed under the governing power of Congress and fused into one mass, they

should have arms of the same caliber adapted to the use of the same kind of fixed ammunition, and they should be subject to the same organization, discipline, and drill. Here we have not only the power given to raise and support armies, but the mode, means, and purposes by and for which they are raised is clearly defined and prescribed; and I maintain that every other mode and power is excluded. The great point to be attained by the framers of the Constitution was to provide for every exigency that might arise, and at the same time to guard against the dangers of a large standing army, the bane of republics, and always dangerous to liberty. Another point to be attained was to provide against undue encroachments on the rights and sovereignty of the States by the General Government. It was thought, and so argued in the Convention that formed the Constitution, that these provisions effected all these objects; that every power was granted necessary to make the militia thoroughly efficient and effective; the President is made their commander-in-chief when called into the service of the United States, and Congress is vested with exclusive power to organize, arm, discipline, and govern them; reserving to the States the power, equally exclusive, of appointing the officers, and training according to the discipline prescribed by Congress.

"This bill takes away from the States the right to appoint the officers, while it subjects the entire militia of every State in the Union to be brought into the service at the pleasure of the President, giving him the power to appoint every officer from second lieutenant up to major-general, thus breaking down that barrier erected by the founders of the Government to prevent Federal encroachment upon the rights of the States, the very object for which this provision, reserving to the States the exclusive right to appoint these officers, was incorporated in the Constitution. A proposition was made in the Constitutional Convention to strike this clause out of the Constitution. It was voted down. A proposition was offered giving the General Government the appointment of all officers above the rank of colonel, and that proposition was also voted down. It was claimed by the members of that body that the militia of the States, officered by the State authorities, would always be a sure check against the encroachments of Federal authority upon the vested rights of the States."

Mr. Mallory, of Kentucky, asserted the following as the reasons for the passage of the bill: "Mr. Speaker, why is this measure called for at this time? The answer, sir, is one which must be very galling to the pride of the Administration and its supporters. It is a complete confession of incompetency to manage the stupendous war in which it finds itself involved—a most humiliating and reluctant acknowledgement that its measures have been mistakes, its policy a blunder. We were told by the gentleman from Pennsylvania (Mr. Stevens),

the other day, that no more volunteers could be had from the North. We have seen that no reliance can be placed on the negro troops. We know that desertions from the army in great numbers are of daily occurrence. Indeed, this evil has become so extended and alarming that especial provision is made to cure it in this very bill by the agency of these provost-marshals. The expiration of the terms of service of thousands of volunteers is rapidly approaching, and it is known that among them an almost insuperable objection to reënlisting exists, and is increasing.

"These, Mr. Speaker, are the reasons why the Administration now comes to Congress and asks for this enormous power. We are told that this measure will remove all the difficulties that surround us, and enable the Government to carry on the war with renewed vigor to a successful termination. Sir, if this were all true, I could not support the bill. Believing, as I do, that its provisions are subversive of the Constitution, and that its passage would establish a precedent dangerous to the liberties of the people—if not directly destructive of those liberties—I could not, in view of my oath to support the Constitution of the United States, give the bill the sanction of my vote. But I do not believe that this bill would remove the difficulties in the way of the Government. I believe that it would increase and multiply them. Mr. Speaker, let us examine into the cause of this dead lock of the Government. Let us inquire why it is that no more volunteers can be obtained; why it is that our soldiers are so much dissatisfied; why desertions are daily occurring, and why those whose terms of service expire will not reënlist? Sir, I charge that the cause of all this is to be found in the measures of policy of the President and the party in power. It is to be found in the fact now patent, that the whole policy of the President and his party, in the conduct of the war, has been changed; that this change has been both in the object of the war and in the means used for conducting it."

Mr. Dunn, of Indiana, thus urged the necessity for the adoption of the measure: "The necessity is upon us to pass a bill of this character. We have many regiments in the field greatly reduced in numbers, some to four hundred rank and file, some to three hundred, some to two, and a gentleman behind me remarks, some to one hundred. These reductions have not all been caused by the casualties of war, but by various circumstances combined. It is due to the gallant men remaining in these regiments that their numbers should be promptly filled up. This cannot be done by voluntary enlistment, on account of the influence of just such speeches as are made here and elsewhere denouncing the war. Many make a clamor against the war as an excuse for not volunteering. Moreover, a draft is the cheapest, fairest, and best mode of raising troops. It is to be regretted this mode was not adopted at first.

Then all would have shared alike in the perils and glories of the war. Every family would have been represented in the field, and every soldier would have had sympathy and support from his friends at home. The passage of this bill will give evidence to the rebels that the nation is summoning all its energies to the conflict, and it will be proof to foreign nations that we are preparing to meet promptly any intermeddling in our domestic strife. The Government has a right in war to command the services of its citizens, whom it protects in war as well as in peace. We, as legislators, must not shrink from the discharge of our high responsibility. This Congress will be memorable in the annals of our country and the history of the world. 'The fiery trials through which we are passing will light us down in honor or dishonor to the latest generation.' If we cannot 'escape history,' let us make our record right, and display that patriotism, wisdom, and energy which history cannot fail to commend."

Mr. Wickliffe, of Kentucky, next took the floor in opposition to the bill, saying: "We have in this country, under our Constitution and system of government, but two classes of military men—one the regular army, and the other the militia. Volunteer soldiers are militia. You have a regular army, and then you have a volunteer army, which is composed of the militia. This bill proposes to give you an army of conscripts; and I should like to know what then becomes of the militia which belongs to the several States of this Union."

"Now, sir, let us see what power this Government has over the militia of the States. Here is the power granted to Congress by the Constitution:

To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States.

"I do not care how they are brought into the service of the United States, whether they volunteer or are drafted; when you have got the soldier, you must treat him as a militiaman under the Constitution. But the clause goes on thus:

Reserving to the States, respectively, the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

"When you call the militia into the service, who is to appoint their officers, under the Constitution? Why, sir, such was the feeling upon this question, that in 1812 some of the States—Massachusetts, I know, was one—took the ground that they had not only the right to organize their militia and officer them, but that the Government of the United States had no right to march them outside the limits of the State for the defence of this Union in the contest then waging with Great Britain.

"Now, I beg the advocates of this bill to look at its provisions. The provost-marshal are to enroll the militia in every State and district, all the able-bodied men between the ages

of eighteen and forty-five. These men are subject to be called from their homes, unorganized even into companies. They are to be taken by the order of the President and driven to the army like cattle or mules to market. I ask you whether you are prepared to say to the people, to the fathers and mothers, the wives and relatives of the men whom you thus enroll, that you will take them in this way from their homes, without even giving them the poor privilege of electing their company officers."

Mr. Thomas, of Massachusetts: "The gentleman from Kentucky has adverted just now to the power to organize the militia. I ask the gentleman from Kentucky what limitation he finds in the Constitution on the power 'to raise and support armies?' and whether there is anything in the Constitution to require that an army raised by the Government of the United States shall be raised by voluntary enlistment, as distinguished from the conscription? What is the limitation of that power to call out the citizens in defence of the Government, and against a foreign enemy?"

Mr. Wickliffe: "I answer that question by saying that the power of Congress to raise an army, a regular army, is unlimited."

Mr. Thomas, of Massachusetts: "What limitation has the regular army?"

Mr. Wickliffe: "None in number."

Mr. Thomas, of Massachusetts: "What limitation in quality?"

Mr. Wickliffe: "None in quality. The laws, however, have prescribed the qualifications for a man in the army as well as in the militia."

Mr. Thomas, of Massachusetts: "I understand that a practice has been observed by the Government heretofore in regard to enlisting men in the army; but does that interfere with the constitutional power of the National Government to raise armies?"

Mr. Wickliffe: "Sir, the contemporaneous exposition of the Constitution ought to have some weight with a jurist of such eminence as the gentleman from Massachusetts. The interpretation of the powers of the Government under that Constitution as adopted, explained, and acted upon since 1789 down to the present day, is not to be disregarded by those who have any regard for the men that have passed before us, and who are presumed to have understood the intention and purpose of that instrument which they themselves made or assisted in making. Refer to the first legislation under Washington's Administration, and see what he thought and what Congress thought was the meaning of the clause in the Constitution in regard to organizing the army of the United States.

"Has Congress, ever since the adoption of the Constitution, left it to the executive to settle what should be the strength of the military force of the United States? And is Congress now prepared, when authorizing the raising of an army, to surrender the right of fixing the number of that army, and to leave it to the dis-

cretion of the executive to make it a million or half a million, a thousand or a hundred men? This bill gives him the right to force into his service every militia man in the twenty-three States and Territories."

Mr. Thomas, of Massachusetts: "I understand, if the question is addressed to me, that the law already existing fixes the number of persons who may be called into the army of the United States, and that this bill simply provides for the mode of putting men into the army."

Mr. Wickliffe: "Then, for the public safety, obey the Constitution, and let that be inserted in the bill. Let Congress retain some power over the army. Say that the number to be raised shall not exceed any number now authorized by law. Do not leave it open to the discretion of the President. Do not leave it open to misconceptions. When this Congress at the called session authorized the acceptance of five hundred thousand volunteers, the Government claimed, under the provisions of another law, a right to accept an additional half million. This I thought, and still think, was a great error. Let this law fix the number of men to be taken. Let it say that in calling these men into service, the army shall not exceed that now allowed by law. Then we will understand what army we have and what army we must pay. But as this bill now stands, there is no restriction as to numbers. The President is authorized, without limit as to number, by a bill which passed this House, to enroll the whole three million negroes that may be caught in the South, and the slaves of citizens of other States; and I suppose the gentleman from Massachusetts will not agree that they shall constitute a part of the white army heretofore organized."

"This bill, Mr. Speaker, is drawn and intended to leave it to the discretion of the President to call on all the citizens of the United States, at his will or pleasure, for two years, or for three years, or during the war, without any restriction as to numbers, place them under military law in the army, and to place the whole population left in the States under martial law, denying to them the freeman's writ, the *habeas corpus*. It is a surrender by Congress of the sovereignty of the States and the liberty of the citizen. Besides that, it puts under his exclusive control every militiaman in every State, leaving none for its own self-defence. Under this law, your provost-marshal may go to the State of New York, the State of Pennsylvania, or the State of Kentucky, and enroll every man in those States between the ages of eighteen and forty-five, leaving the States themselves without any militia for defence against invasion or insurrection. The moment they are enrolled, this bill deposits the State authority over its own militia."

Mr. Stevens, of Pennsylvania, followed in support of the bill: "This bill is objected to

for various reasons. One of them is that it is unconstitutional, inasmuch as the militia of the nation are to be officered by the Governors of the States. Sir, it is enough to say that this bill provides for no calling out of the militia. This bill establishes what is called a national force. Now the militia of a State are under the regulation of the authorities of that State, and they have a right to say how they shall be disciplined, and how they shall be armed, and when they are called as militia into the service of the United States, they shall be officered by the Governors of the States.

"This, therefore, being in no sense of the word a militia force, but a national force, as declared by this bill, none of the provisions of the Constitution referred to should stand in its way, because the provision of the Constitution is that Congress shall raise armies. This is a mode of raising armies. The provision for calling out the militia for certain purposes is an entirely distinct and separate provision of power. I have said now all I desire upon that point.

"Now, sir, I say that this bill, in its main features, is a beneficent, a benevolent bill. At present we know that there are no exemptions when men are called into service, except those that refer to the ability of the party to serve. That operates very harshly upon many men, who are obliged to leave at their homes widowed mothers and aged fathers who are dependent on them for support. They are drafted, and they are obliged to go, leaving their relatives in this condition. All these cases are provided for by this bill, and I have seen enough in the late draft in Pennsylvania to know that its provisions will afford great relief to a large class of persons. This bill exempts from military duty the only son of a widow dependent upon him for support. That is a beneficent provision, which does not now exist in the law. This bill also provides that the only son of aged and infirm parents, who are dependent upon his labor for their support, shall be exempt—a most benevolent provision. It also provides that where there are two or more sons of such parents, and they are drafted, the father, or if he be dead, the mother, may elect which of the sons shall be exempt. It exempts also the brother of a family of children under twelve years of age, and who are dependent upon him for support. This embraces a very large number of very worthy people, while there is no law now in existence that affords them relief. If this bill had no other beneficent feature in it than this, that would be enough to commend it to my favorable consideration, and I should vote for it. I will not enumerate the other beneficent provisions of the bill. I leave that to others.

"There are two amendments which I desire to have made in this bill, and which I shall offer under the privilege which has been granted for amendments, in case no other gentleman offers them. The bill provides that a person

drafted may be exempt from service either by furnishing a substitute or by paying a sum of money not exceeding \$300. Now I think it very necessary that the amount to be paid shall be fixed by law. I know that in my district, at the last draft, men who, from conscientious scruples, could not and would not go, who would rather become martyrs than serve, were so imposed upon by substitute brokers, that some of them were compelled to pay as high as \$1,500 for substitutes. I am informed that some of these substitute brokers in my own and adjacent counties cleared as high as \$10,000 each by trafficking in this business of hiring substitutes for their neighbors. It is wrong that men who are entitled to exemption at all should be subjected to these impositions and these extortions. I do not know whether the sum fixed upon is high enough or not. I suppose it is, but it is very important that some limitation should be fixed.

"But there is a portion of this provision which I do not and cannot assent to. By this law, every man, whether he has any conscientious scruples or not, who chooses to raise \$300, and pay it into the Treasury, may refuse to serve his country. I do not recognize the propriety of conferring such a right. There are in all countries exemptions for conscience, sake, and it is right that there should be. In my own county, a very large number of our best citizens, our most loyal men, are conscientiously opposed to bearing arms. They are willing to pay their taxes. They would be willing to pay this amount to procure substitutes, but I do not believe that they should be forced to violate their conscientious and religious scruples, which have existed from their birth, and which have descended to them from their ancestors."

Mr. Thomas, of Massachusetts, was in favor of the passage of the bill, saying: "Now, sir, a word or two as to the necessity of this bill. We have been asked over and over again what is the necessity for it, and what has caused that necessity. Well, sir, I think I could give some reasons for its necessity. I do not think that you can at this moment obtain volunteers to fill up your army. The clamor of this House, and the clamor of the Democratic party out of the House, have so frightened a timid Senate that it has not dared to pass the bill which this House sent to it, which would have supplied the deficiency and given us half a million of recruits. We must, therefore, do without that bill, and the passage of this bill is now the only remedy that I see for the evil. There are reasons why we cannot procure volunteers. Had we been united in wishing honestly to put down this rebellion, had the Whigs, the Republicans, and the Democrats of the Free States acted with an honest instead of a pretended desire to crush this rebellion, and united in urging on the people the necessity, propriety, and duty of sustaining the Government, there would have been no more necessity for this

bill now than there was when the first call was made.

"But, sir, it is a fact not to be disputed, that for the last six or nine months a whole party, a strong party, has deliberately entered into a combination to discourage, to prevent, and, as far as in it lay, to prohibit the volunteering of the people of the country as soldiers in our army. Members of that party have gone from house to house, from town to town, and from city to city, urging their brethren not to enlist in the armies of the nation, and giving them all sorts of reasons for that advice. One of these reasons is that it was an abolition war; that it was 'a war for the nigger,' as the slang phrase is.

"Mr. Speaker, this is a terrible bill; terrible in the powers it confers upon the executive, terrible in the duty and burden it imposes upon the citizen. I meet the suggestion by one as obvious and cogent, and that is that the exigency is a terrible one, and calls for all the powers with which the Government is invested. Some of the features of the bill my judgment condemns, unhesitatingly condemns.

"The period for which the service is required is unreasonably long. I think the enrollment should not include judges of the State courts, or ministers of the gospel of peace, or members of Congress of either branch, though the inclusion of members of Congress would be, I think, simply void. I earnestly object, also, to the provision of the bill for the arrest of civilians by the military power; but I understand that gentlemen upon my right will consent to an amendment which will strike that feature from the bill. But excepting these objections, I think the bill is within the scope of the Constitution, and necessary.

"I do not rest the power of Congress to pass this bill upon the provisions of the Constitution in relation to the militia. I put it upon the simple and clear provision which gives to Congress the 'power to raise and support armies,' and upon the absence of any provision of the Constitution which limits or restricts that power. In the nature of things, there can be no such limitation. The powers of Congress, within the scope of the Constitution, are supreme, and strike directly to the subject and hold him in its firm, its iron grasp. I repeat what at an early day I asserted upon this floor, that there is not a human being within the territory of the United States, black or white, bond or free, whom this Government is not capable of taking in its right hand and using for its military service whenever the defence of the country requires, and of this Congress alone must judge. The question of use is a question of policy only.

"Having the power to raise and support armies, and the exigency existing in which the use of that power is necessary, the question arises whether the powers given to Congress with respect to the militia, qualify and restrain the power to raise and support armies. Very

clearly not, Mr. Speaker. They are distinct, independent powers. The militia is a branch of service well understood in the mother country and our own, to be called forth 'to execute the laws, to suppress insurrections, and repel invasions.' It was not designed for permanent service, but to meet special exigencies, and for brief periods of time.

"Now, the gentleman from Kentucky (Mr. Wickliffe) says that the army is made up, and has been made up, by volunteer enlistments, and that you never have 'conscripted' men into the army. Doubtless such has heretofore been the practice. But the exigency never before arose when it was necessary to conscript men into an army. The exigency does not confer new powers, but invokes them into service. At this moment the question whether we shall use this power, is not one of policy, not what is best. It is in effect a question to this nation of life or death. We literally have no choice. Gentlemen upon my right (the Republican side of the House) know that it is my conviction that the vaunted panaceas for our troubles have failed, utterly failed. I expected them to fail. I attempted in vain to satisfy the House that it was leaning upon reeds shaken by the wind. My earnest, repeated suggestions were of course unheeded. But the results are too palpable to be overlooked or mistaken, and reason is slowly reascending the steps of its throne. Pray God it may not be too late."

"The policy inaugurated on the 1st of December, 1861, has been fruitless of good. It has changed the ostensible, if not real issue of the war. That policy and the want of persistent vigor in our military counsels render any further reliance upon voluntary enlistments futile. The nostrums have all failed. Confiscation, emancipation by Congress, emancipation by the proclamation of the President, compensated emancipation, arbitrary arrests, paper made legal tender, negro armies, will not do the mighty work. Nothing will save us now but victories in the field and on the sea; and then the proffer of the olive branch, with the most liberal terms of reconciliation and reunion. We can get armies in no other way but by measures substantially those in the bill before us, unless the Administration will retrace its steps, and return to the way of the Constitution—for us the strait and narrow way which leads unto life. At any rate, the war on paper is at an end. The people have, for a time, been deluded by it. That delusion exists no longer. If you are to suppress this rebellion, all instrumentalities will fail you but the power of your own right arm. Mr. Speaker, the measures and policy heretofore pursued have not been merely fruitless of good; they have been fruitful of evil. They have made, or largely contributed to make, a united South; they have made for you a divided North; they have alienated from the Administration the confidence and affection of large portions of the people; they have paralyzed your arm, and di-

vided your counsels. Gentlemen flatter themselves this alienation and disaffection are the work of Democrats; that the people have been misled and deceived by their wiles. Sir, the people of this country read, and keep their eyes open, and comprehend, and the plain fact is, you cannot unite them upon the policy you now pursue. They do not believe in destroying the Union and the Constitution in the hope of building up better by force of arms. You may unite them on the issue of maintaining the Union and the Government at every price and cost; but upon no other.

"Having distracted the public mind, having alienated to a great degree the affection and confidence of the country, what is left to you? To resort to those constitutional powers vested in you for the preservation of the Government which you have in trust, and which you must use or be false to that trust. Gentlemen say the people will not bear this measure. I will not believe it. I believe the people of this country are ready to do and to endure everything for the preservation of their unity, their national life, and, through that unity and that national life, all that makes life precious to men. They will submit to it. In view of the infinite interests at stake in this great controversy; in the solemn conviction that there is to-day no hope of peace except in disintegration; that as a nation we must conquer in arms or perish, they will meet and respond to this imperative call of duty. Such is my hope and trust.

"But, Mr. Speaker, suppose they hesitate; suppose they do not submit; you can but try; you have no other hope; the negro will not save you, paper money will not save you, your infractions of personal liberty will not save you. If persisted in in the peaceful and loyal States, they will ruin you. Go firmly to the people, and present to them the issue. They will understand the terrible exigency in which the country is placed, and they will be true to that country if you show clearly to their comprehension the length and breadth and height and depth of that exigency. Mr. Speaker, the issue must be met at all hazards. If the people will not support you, if they will not do this highest act of duty, the days of this republic are numbered, and the end is nigh. Satisfy them that you mean to be true to the Constitution and the Union, and they will be true to you.

"The issue, I repeat, must be met. You die without this measure; you can do no more with it, except you die as cowards die many times. I go, therefore, for appealing from these panaceas and makeshifts and paper bullets, to this highest, most solemn and imperative duty of the citizen to protect the life of the state, and I believe that appeal will be answered."

Mr. Crittenden of Kentucky, followed, and stated his views at much length: "The measure, it seems to me, is but the natural result of the course of policy which this Congress has pursued from the commencement, or very near the commencement of this war.

"When this war first broke out it was a national war, with a single national object; and upon that one purpose and object all hearts were united. That object was the reestablishment of this great republic—our republic. Upon that great object, I repeat, we were all united. There was no division; and in order to satisfy the country more effectually of the fact of our unity, but little more than eighteen months ago a resolution offered by me was passed, almost unanimously, declaring that this was our sole object. We then declared that this was our only object. We pledged ourselves that no interference should be made in any of the institutions of the States, having a special reference to the institution of slavery.

"Mr. Speaker, had the pledges then solemnly made by this Congress been adhered to, how different would be the condition of the country to-day! There was then but one sentiment pervading the whole people of the country. The people then flocked to your standard by hundreds of thousands, filling the ranks of such an army as the world never saw. There was then but one sentiment in the people of the country. No coercion was then talked of. What has produced the change that now presents itself? What, as my friend from Massachusetts says, has united the South in one solid iron phalanx? What has crushed out, and destroyed to a great extent, if not wholly, the confidence and enthusiasm that swelled up in the heart of the people of the nation? What has done all this! It is our departing from our faith. It is our departing from that object which we declared to be the only just and patriotic one. What else has done it? Have you not departed from the policy of that faith? Have you not, in a manner considered perfidious, violated pledges which you gave the country more than eighteen months ago? Was there any discontent expressed at that time? I heard of none. The hearts of the loyal people North and South were fired with a common purpose to preserve the integrity and honor of the republic. Every man felt himself under every honorable obligation to step forward, and abandon his private affairs, and look after the welfare of the Union. That was the undivided, pervading, patriotic sentiment of the whole body of the people. Nowhere in the North or Northwest was heard a murmur of discontent; and the same confidence and patriotic feeling was as strong among the Union men of the border States as it was anywhere in the North and West. It was everywhere the same. We were willing to suffer to the last extremity to preserve the Government. That was the feeling of the people then; we all know it.

"What has brought this mighty change? What has done it, Mr. Speaker? Do not we all know? Can there be any doubt on the subject? It has been our infidelity to the pledges made to the people. It has been because of the reckless course of the dominant power. It is because of the impolicy of which Congress has been

guilty. Is it not time to learn that the course we have pursued and are pursuing has produced a state of division and dissension even in the remaining States? Yes, sir, the policy that has been recently pursued has been the fruitful source of these disastrous dissensions. It has been our departure from our policy of not attacking the institution of slavery, and fighting only for the Government, for the Union, and the Constitution.

"What have we seen at this session? We have passed bills changing the rules and articles of war in order that slavery might be encroached upon. We deprive the loyal people of the South of all protection by the army for their property. You have passed a law taking the slaves from any of the citizens of the country. You have passed a law for organizing an army of three hundred thousand negroes. This you know is against the deep-rooted prejudices of at least one half our people. Such a bill would have been rejected with one common voice eighteen months ago. Even the mention of the subject created profound indignation. You have done this and more. You have passed laws, in the opinion of the people, which violate the Constitution. You have scorned the friends of the Government. You have turned away from us the hearts of the people by these measures. We have sown deep the seeds of future disasters to the Government. I implore the House to pause before it sanctions any more measures of that kind.

"Mr. Speaker, can we carry on the war more successfully by transcending the Constitution than we can by obeying it? I have always said that the Constitution was our bulwark; that it was the best defence; that our strongest defence was to keep within the clearly defined powers of that instrument. But what have we done? We have assumed powers not delegated by the Constitution. We have acted, not according to the provisions of the Constitution, but according to the sentiment which actuated us at the moment. We seem to have been controlled by the petty spirit of party, rather than by the spirit of patriotism and a determination to obey the Constitution and the laws. You have lost the heart of the people, and you have lost it by the dogmas you have inaugurated and established rather than follow the Constitution.

"The gentleman from Pennsylvania (Mr. Stevens) said the other day that we have every man in the field that we can get voluntarily. Why is that? Because the object is clearly proclaimed of abolishing slavery throughout the United States. You have done this while you have had an accidental majority here. Hence it is that the people have changed. This is the only time when that party ever had a majority in the House—I mean a majority of Abolitionists. With this accidental power, what has it done? It has declared emancipation by law. It has declared by law for the raising of negro armies. It has declared emancipation and con-

fiscation by law. By these means, I say, you have lost the hearts of the people. Why do not the people have the same enthusiasm in the war that they had at first? Then they put a million of men into the field. The country is still in peril, in more peril than at first, and why is not an army of two million men now put into the field? It is only because of the bad policy by which you have established the dogmas of the Abolitionists, of emancipation of slavery throughout the country. It is that which has induced them to lose confidence in you. It is not for the country, it is not for the white man, it is for the negro this war is to be waged; and for that war I am not. The logical conclusion from the impolitic course we have pursued is, that we have lost the hearts of the people.

"You say that this bill is framed on the idea that the people will no longer volunteer—that the people will no longer stand a draft. Why not? Because the people will not do one thing or another; they will neither volunteer nor stand a draft, and you are obliged by law to coerce them. That is the condition in which we are placed; and this bill is nothing more than the logical conclusion of what we have previously done. We have created a necessity for it. The people are no longer with us, and therefore we must force the people by coercive and penal laws, by new jurisdictions, provost-marshals scattered through the land, and by a new sort of military judicature to which the people have not been accustomed. And knowing that you have an unwilling people to deal with, you make that law as coercive as possible, and accompany it with every sort of inquisitorial and compulsory power, judicial and executive, in order to insure obedience, willing or unwilling, to that law. Is not that our condition fairly considered?

"There is but one sort of consistency which deserves the respect of honest men, and that is to let your acts be consistent with your convictions at the time you are called upon to vote. It is not what we did yesterday that we are to consider alone. We have lived through a time of trial and of trouble. Have we learned nothing? Up to this time I fear we have learned very little. Our lessons have been very severe, and the fear of more dangerous lessons hereafter ought to instruct us. The life of the country is attacked, and that life is upon your hands, and its preservation depends in a great measure upon your wisdom, upon your solemn deliberations, and your solemn consideration of all the mighty questions upon us.

"If we want to get back the Union, how must we do it? We must change our policy. This will not answer your purpose. You must get back what you have lost. You have lost the heart of the people, and the confidence of the people. The people's affections are turned away from us; and will they bear more exactions and burdens laid upon them? No, sir; you are mistaken in the remedy. Your only

remedy is to regain the confidence and heart of the people, to substitute for the distrust which now exists confidence that your object is a national one, and not a mere public one; not the abolition of slavery, but the salvation of the country. Get that back, and you do not want this bill; fail to get it back, and this bill will be just as inoperative as if there was not a word written upon it.

"You say a draft will not do; that a draft will not be submitted to. I know nothing about that. Will, then, this more exacting provision be submitted to? In a country like ours, laws which do not carry along with them the assent of the people are but blank paper. Have you not cause to fear that unless you win back the hearts of the people, and their confidence, this bill will do no good? You are mistaking the disease altogether. The disease of the public heart is loss of confidence in us, members of Congress. It is the Abolition element here which has destroyed everything; that has clouded the great ideas of nationality—the pride of the American heart.

"That is the disease of the public heart, and you should endeavor to administer measures which will reclaim it, and that will heal discontent. And yet in the last moments of our existence you are endeavoring to consummate a policy which the people have condemned, and to put the people beyond the means of redress. The remedy, and the sole remedy, is by reversion, by retracing our steps, and making this again a national war. Then you will not want this bill, nor will you want a draft. You will have volunteers enough. I do not speak rashly, because you had volunteers enough, and more than you knew what to do with, when you stood upon that ground. But you chose to change that ground. Political Abolitionists thought the time had come for them to introduce the sword and the spear into the public arena, and to make use of this war to carry out the ends which they have long cherished—the abolition of slavery.

"These, Mr. Speaker, are my views of the discouragements which now exist in the country, and these are my views of the remedy, and the only remedy, which can be efficacious. This bill would have done well enough at the time the resolution I offered here passed. It would have passed, not with all the provisions which now accompany it, but the principle would have been adopted, and the whole power of the nation would have been placed in the hands of the Government to be used, if necessary, for the defence of the country. But the disease assumed another shape. The political body has become infected with poison, and the mind of the people, poisoned with distrust of us, disapproves of our measures. There is a disease, and there is no mortal remedy for it but one. We must administer that remedy to ourselves; we must change our steps. We must no longer be Democrats, no longer be Abolitionists; but we must, if we would save our country and save

ourselves, be patriots merely, and not hesitate or falter about undoing what we have already done, whenever we discover that its operation and effect has been different from what we anticipated. Have not your anticipations failed in regard to the measures you have heretofore adopted? Have not your acts been such as to make the people believe that whatever may have been the principles upon which this war was begun, it is now used for the overthrow of slavery. As candid men, is not that the object of the war?

"There is a little tweedledum and tweedledee about this matter. One says the war is not to overthrow slavery—it is to save the Union. Another says, if you do not destroy slavery, the Union is worth nothing. The argument here is exactly the argument of the Jesuit—fix your mind and attention upon one object which you think a lawful one, and then all the means are lawful. One object is the abolition of slavery; but that is not lawful. No, says one, but the salvation of the Union is constitutional. Direct your attention to that, and you may abolish slavery. This is the doctrine which makes the end justify the means. One says that abolition is his object, and that he goes for it because abolition is necessary for the salvation of the Union. Have we found it so? Has it conduced in any way to save the Union? Will your three hundred thousand black men tend to save the Union? Have you brought them out as soldiers? We know better. They are no soldiers, and you cannot during this war make soldiers of them. I put out of sight the question as to their capacity as a military people, or what they may become by a course of education; but you cannot in two, three, or ten years, make efficient soldiers of them.

"Again: will your white soldiers serve with them? The whole country suspects that this is an Abolition movement. You do not know what to do with the runaway negroes which infest you, and are calling on you for the bread which they left behind when they left their homes and families. You do not know what to do with them. You can have some color for feeding them or for setting them free, but when you hold out the pretence that you mean to make soldiers of them, it is all a delusion. It is a pretence for abolitionism. It is a pretence for placing negroes on an equality with your own white soldiers. It will either raise to an equality with white soldiers those whom they regard as an inferior race, or else it will level them down to an equality with negroes. That is the whole effect of it.

"I do not know that I differ with my honorable friend from Massachusetts (Mr. Thomas) as to the principles which he advocates, that this Government has a right to the employment of all the force it can command in this exigency and peril. I will not say that this bill, so far as regards the enrollment of the men liable to military duty in the country, and sub-

jecting them to be called out for military service, does not come within the power given to Congress to raise and support armies. I will not contest that question with him here, at any rate. But I do not think that the Constitution intended at all, as my friend from Massachusetts seems to think, that Congress should have the power of enlisting negroes. They were regarded as property, and it was not intended that a man's property should be taken from him. They fall within another category. The gentleman says they may be employed if it be necessary to save the republic. He postpones the employment of negro soldiers until the last. I differ with him in this. I believe that that time has not only not come, but that it never can come. It never can be expedient in this country to raise an army of negroes so long as we remain of the proud free race to which we belong. Instead of being a source of power, the negro in our army would be a source of weakness and discontent, and his presence would drive from the field men a thousand times more capable of defending the country than he himself can be made. The principle for which the gentleman contends, therefore, can never apply here; nor does he apply it. I want to show that it has no application. A negro army is a weakness to your country. It unnerves the white man's hand. It unnerves the white man's heart. White men will not fight by the side of negroes."

Mr. Vallandigham, of Ohio, offered the following amendment:

Strike out of section twenty-five, in line ten, after the word "law," the words, "such persons shall be subject to summary arrest by the provost-marshal, and shall be delivered to the civil authorities," and insert instead thereof as follows:

Every person so offending shall be subject to arrest upon warrant issued from some civil officer or court of competent jurisdiction, upon oath or affirmation specifying the offence, and upon trial and conviction.

It was rejected. Yeas, 57; nays, 101.

Mr. Cox, of Ohio, moved to amend, by inserting the word "white" in the first line after the word "able bodied." It was rejected. Yeas, 52; nays, 85.

Some amendments were made to the bill, and it was passed by the following vote:

YEAS—Messrs. Aldrich, Alley, Arnold, Ashley, Bab-bitt, Bailey, Baker, Baxter, Beaman, Bingham, Jacob B. Blair, Samuel S. Blair, Blake, William G. Brown, Buffinton, Calvert, Campbell, Casey, Chamberlain, Clark, Colfax, Frederick A. Conkling, Roscoe Conkling, Crisfield, Cutler, Davis, Dawes, Delano, Diven, Dunn, Edgerton, Edwards, Eliot, Ely, Fenton, Samuel C. Fessenden, Thomas A. D. Fessenden, Fisher, Flanders, Franchot, Frank, Gooch, Goodwin, Granger, Gurley, Hahn, Haight, Hale, Harrison, Hickman, Hooper, Horton, Hutchins, Julian, Kelley, Francis W. Kellogg, William Kellogg, Killinger, Lansing, Leary, Lehman, Loomis, Lovejoy, Low, McIndoe, McKean, McKnight, McPherson, Marston, Maynard, Mitchell, Moorhead, Anson P. Morrill, Justin S. Morrill, Nixon, Olin, Patton, Timothy G. Phelps, Pike, Pomeroy, Porter, Alexander H. Rice, John H. Rice, Riddle, Edward H. Rollins, Sargeant, Sedgwick, Segar, Shanks, Sheffield, Shellabarger, Sherman, Sloan, Spaulding, Stevens, Stratton, Benjamin F. Thomas, Francis Thomas, Train,

Trimble, Trowbridge, Vandever, Van Horn, Verree, Walker, Wall, Wallace, Walton, Washburne, Webster, Wheeler, Albert S. White, Wilson, Windom, and Worcester—115.

YAYS—Messrs. William Allen, William J. Allen, Ancona, Biddle, Clements, Conway, Corning, Cox, Cravens, Crittenden, Delaplaine, Dunlap, English, Fouke, Grider, Hall, Harding, Holman, Johnson, Kerrigan, Knapp, Law, Lazear, Mallory, May, Menzies, Morris, Noble, Norton, Nugen, Pendleton, Perry, Price, Robinson, James S. Rollins, Shiel, John B. Steele, William G. Steele, Stiles, Vollandigham, Voorhees, Wadsworth, Ward, Whaley, Chilton A. White, Wickliffe, Wood, Woodruff, and Yeaman—49.

The bill, with amendments, was returned to the Senate, and came up for consideration on the 28th of February.

A debate ensued on the policy of the Administration and its measures, &c., in which Messrs. Bayard, Wilson, Turpie, Hicks, and Kennedy and others addressed the Senate.

The several amendments of the House were then taken up, and voted upon separately. The last one was as follows:

SEC. 38. *And be it further enacted*, That all persons who in time of war or of rebellion against the supreme authority of the United States, shall be found lurking or acting as spies, in or about any of the fortifications, posts, quarters, or encampments of any of the armies of the United States, or elsewhere, shall be triable by a general court martial or military commission, and shall, upon conviction, suffer death.

The vote upon it was as follows, which is about the same as the vote on the other amendments:

YAYS—Messrs. Anthony, Arnold, Chandler, Clark, Collamer, Cowan, Davis, Dixon, Doolittle, Fessenden, Foot, Foster, Grimes, Harding, Harlan, Harris, Henderson, Hicks, Howard, Howe, King, Lane of Indiana, Lane of Kansas, Latham, McDougall, Morrill, Pomeroy, Sherman, Sumner, Ten Eyck, Wade, Wilkinson, Willey, Wilmot, and Wilson, of Massachusetts—35.

NAYS—Messrs. Bayard, Carlile, Kennedy, Powell, Saulsbury, and Wall—6.

The votes of the Senate approving each of the amendments of the House, terminated the action of the two Houses on the bill. This was so declared by the President *pro tem*.

Subsequently, on the 2d of March, the bill to promote the efficiency of the corps of engineers, &c., being under consideration in the Senate, Mr. Trumbull, of Illinois, offered the following amendment:

And be it further enacted, That so much of the thirteenth section of the act for enrolling and calling out the national forces, and for other purposes, passed at the third session of the Thirty-seventh Congress, as authorizes the Secretary of War to receive from a person drafted under the provisions of said act a sum not exceeding \$300 for the procuration of a substitute, and discharge of the person paying the money from further liability under that draft, be, and the same is hereby repealed.

Mr. Trumbull thus explained his reason for offering the amendment: "Mr. President, I have offered this amendment in view of the fact that an objection is made in many quarters to that provision of the act for enrolling and calling out the national forces which allows money to be substituted for blood. The bill provides, as will be recollected by senators, that any person, by paying to the Secre-

tary of War a sum not exceeding \$300, may discharge himself from the draft."

The amendment, after debate, was rejected by the following vote:

YAYS—Messrs. Grimes, Harlan, Howe, Lane of Indiana, Powell, Saulsbury, Ten Eyck, Trumbull, Wilkinson, and Wilson of Missouri—10.

NAYS—Messrs. Arnold, Chandler, Clark, Collamer, Cowan, Davis, Dixon, Fessenden, Foot, Foster, Harris, Henderson, Hicks, Howard, Kennedy, King, Lane of Kansas, Morrill, Nesmith, Pomeroy, Sherman, Sumner, Turpie, Willey, and Wilson of Massachusetts—25.

Mr. Davis, of Kentucky, offered the following amendment:

And be it further enacted, That no negro, free or slave, shall be enrolled in the military, marine, or naval service of the United States.

It was rejected by the following vote:

YAYS—Messrs. Davis, Henderson, Hicks, Kennedy, Nesmith, Powell, Richardson, Saulsbury, Turpie, Wall, Willey, and Wilson of Missouri—12.

NAYS—Messrs. Chandler, Clark, Collamer, Cowan, Doolittle, Fessenden, Foot, Foster, Grimes, Harding, Harlan, Harris, Howard, Howe, Lane of Indiana, Lane of Kansas, Morrill, Pomeroy, Sumner, Ten Eyck, Trumbull, Wilkinson, and Wilson of Massachusetts—23.

Mr. Powell, of Kentucky, offered the following amendment:

Provided, That no person of African descent shall be commissioned or hold an office in the army of the United States.

It was adopted by the following vote:

YAYS—Messrs. Cowan, Davis, Harding, Harris, Henderson, Hicks, Howe, Kennedy, Lane of Indiana, Nesmith, Powell, Richardson, Saulsbury, Ten Eyck, Turpie, Wall, Willey, and Wilson of Missouri—18.

NAYS—Messrs. Chandler, Clark, Doolittle, Fessenden, Foot, Foster, Grimes, Harlan, Howard, King, Lane of Kansas, Morrill, Pomeroy, Sumner, Trumbull, Wilkinson, and Wilson of Massachusetts—17.

In the Senate, on the 18th of February, the bill to provide a national currency was considered.

Mr. Collamer, of Vermont, took the floor in opposition to the bill, and expressed his views at much length, saying: "What are its great purposes and objects, as stated by those who framed, recommended, and support it? It is said to be to institute a great national paper currency through the medium of banks, to be organized under this act, who are to take United States stocks and deposit them in the Treasury, and take ninety per cent. of them in notes to circulate as money, with which to do banking business, and that they shall have twenty-five per cent. more than this circulating part as a permanent capital to work upon. They are to pay two per cent. on their circulation to the United States Government annually, or one per cent. every six months, and the United States are to pay them six per cent. per annum on the bonds in gold. The United States further agree that they will take all this money in circulation, receive it for and pay it out on all public dues, and declare it to be in the act a national currency. Besides that, the United States agree that they will guarantee to the billholders the payment of these

bills at the Treasury. If the banks do not redeem them in currency when asked for their redemption, they may be protested and presented at the Treasury, and the Treasury is to pay them, and to pay them in full, whether the stocks left upon deposit are able to meet them or not. Besides this investment, the property put into these associations is itself to be clear of taxation.

"Now, Mr. President, it is to be further understood, and is an integral part of the very system, without which it is good for nothing, that the circulation of the existing banks of the country is to be withdrawn. Measures are to be taken with those banks that shall induce or compel them to take home their circulation and put it out no more, so that this shall be a national currency. Unless this latter part of the scheme is secured, its great professed object of making a uniform national currency throughout the United States is not and cannot be effected. It therefore implies all this, and we must understand that if we enter upon this proposition and entertain this plan, we are to take measures in order to perfect it to do the other thing; that is, to destroy, put out of existence, the circulation of the present State banks.

"The Supreme Court, in the case of *McCulloch vs. Maryland*, decided that the United States had the right to make a United States Bank, with branches in different States, and they said the States could not tax that United States Bank. Why? Because the exercise of that power in the extreme would destroy it, and therefore you would make it out that the Congress had a power to establish a bank; but after all, it was subject to the power of the States to put it down. In the case of *Kentucky*, the Supreme Court decided that the long-continued usage in this country in States to make banks was constitutional, and that a State had a right to make a bank of issue. There were other questions in that case which it is not necessary now to bring in here. It was decided that a State had a right, not to make a bank to issue the State paper, but a bank to issue paper currency.

"Now, sir, if a State has that right, it has that right certainly independent of the consent of Congress. Does it hold it at the will of Congress? Certainly not. The United States, in making a United States Bank, held it independent of State action, and it was so decided. If the State has this right, and has it independent of the consent of Congress, it cannot have that right if the United States can tax it out of existence. Hence, I say the United States has no more power to tax a State institution out of existence than a State has to tax a United States institution out of existence. I should like to see that answered. I have sometimes proposed that question, but I have never received any answer to it. In most of the States, the State of New York, for instance, almost all their banks are founded upon their

own State stocks. It is a part of their financial system to make their stocks valuable, and to enable them to make internal improvements. All these State banks are more or less connected with and ramified in with the business of their several States. Can they be taxed out of existence by the United States? Why, sir, you might just as well tell me that the United States, under the power of taxation, could go on and extinguish all the schools in New England by taxing its schools, its colleges, and its academies, and their books and their buildings and the salaries of the professors, and in that way destroy them under the very general principle of the power of universal taxation. I shall not dwell any longer upon that point. I have stated my view upon it.

"But, Mr. President, there is another principle involved in this measure, and I am looking at it now in its great national aspects, as a national principle, without regard to the time. I say it is to establish corporations in all the States and Territories, entirely independent of any power of visitation by those States or Territories. This, to say the least of it, is an extremely questionable power. What may be the number of these institutions? As the capital is to be \$300,000,000, that will make three thousand banks of \$100,000 each; and the bill provides that they may be made \$50,000 banks, which will make six thousand \$50,000 banks. I believe we have now, in what are called the loyal States, between thirteen and fourteen hundred banks altogether; and this bill proposes to make at least three thousand, or perhaps six thousand of these bank corporations, established all over the States.

"That is not all. It is proposed that there shall be no other banks but these; the whole banking capital is to be put into these banks, and the whole of that property is removed from all State taxation. I ask gentlemen to reflect on what will be the effect in their different States of closing up the present banks, and taking the capital belonging to the stockholders, putting it into the banks under this bill, and removing the whole of it from all the forms of State taxation—State, county, city, and town. Many of our States derive their school fund from what they obtain from these State banks. I believe it is so in New Hampshire. They have their school fund in that way.

"The next point to which I desire to call attention is the propriety of our undertaking as a nation to say that we will be responsible for the ultimate redemption of these bills by the securities that are deposited. I am aware that the honorable senator who is the parent of the bill here thinks he has got in it something very valuable, in the provision about the liability of individual stockholders, and requiring twenty-five per cent. of the amount of their circulation to be kept on hand. All these things, to my mind, are hardly worth the paper on which they are written; they are good for nothing at all. How can you follow the re-

sponsibility of stockholders? The very stocks are assignable; they are personal property. They are bought and sold in the market every day for more or less, according to their worth. Although one of these banks may start with some very responsible men when it first sets up, the moment it becomes at all doubtful or troublesome it quickly passes off into the hands of men who have no responsibility. You can never pursue it in that way. As to the provision that they shall retain twenty-five per cent. on their circulation on hand, that is their own money; it is not United States money. The fact is just this: whenever your bonds that you hold for your security to redeem these bills depreciate essentially, the bank will wind up, and they will do it without any sort of disparagement or any dishonesty. The stockholders will say at once to themselves, 'We have noticed the fall of these stocks; we know that they are very much down; we will not redeem any more of these bills; we will leave them to be redeemed by the Government; we gave them \$100,000 and deposited it with them in bonds; they only allowed us \$90,000; that is all we have had of them; we leave these notes in their hands to redeem; we will let them redeem them; we gave them a great deal more than they ever gave us, and let them redeem them.' When would that occur? Why, sir, in great national calamities such as those under which we already suffer by the unfortunate proceedings of this war, we know that public stocks rise and fall with the prosperity or decline of the nation.

"Again, I will take the very reverse of this state of things. Suppose we should close this unfortunate controversy and return to peace. The moment you are at peace every man wants all the money he has got to go into business. He has lent it to the United States, taken this, that, or the other sort of stock, in order to have it earn something while this public controversy and difficulty was going on. The moment that is ended he wants his money to go into business again in our cities and towns—importing and the like. He immediately cashes these bonds, and a very large portion of these bonds will at once be thrown on the market at a discount the moment you are at peace. In either of these cases, whether from public calamity or from peace, there comes a deterioration upon the value of these bonds; these banks are wound up, the bills are protested and presented to the Treasury here in bundles for payment. What will you do? It is said in the bill that they are to be paid here. You may take the stocks the bank left as security and go and sell them in the market, and thus get money to pay them. If they have deteriorated so much that the banks do not want to pay their bills, it will be a pretty hard bargain for us to pay them with those bonds. We should have to sell at as much discount as they. Besides, we do not get rid of anything in that way. We have to anticipate our bonds.

They run twenty years. We have got to pay these notes when they are presented; and if we sell our bonds at a discount in the market to get some money to redeem them with, we have got to meet that bond in the end, have we not? We do not get rid of it at all; but we are compelled to get the money about twenty years before it is due. I do not see the policy, the expediency, or the profit of such a bargain.

"The next aspect to which I will call attention is this: we once had, or twice had, a United States Bank. The history of the last one is within the recollection of most of those who hear me. That bank had a capital of \$35,000,000. The proposition now is to make United States banks with a capital of \$300,000,000. The United States took \$7,000,000 of that stock. They paid nothing in, but put in their stock for it on time. They had directors of their own appointed to keep watch of that bank. They had the right to borrow money at that bank. The bank was bound to loan it to them at a certain rate and limitation. They went on with that bank during the whole period of its existence. They took their dividends from year to year by extinguishing the payment of interest on their bonds; and at the close of the whole they received back their stock and ten per cent. upon it of accumulated profits that had not been divided. Everybody concerned in it was paid; the stock was paid back; and the United States made that money.

Now, sir, why did that institution go down; or rather, why was it not renewed and enlarged and adapted to the condition of the country? It was because it was said to be a dangerous political engine in the hands of whatever political party existed at the time; that it would be used as a great machine in the different States by the favor which the Government would give it, or the control which they would exercise over it; and it was dangerous, as it was said then, and I think it was demonstrable.

"Mr. President, look at the proposition now before us in this aspect. It provides that the Secretary of the Treasury shall nominate the Comptroller of the Currency. He can be appointed by the President only on the nomination of the Secretary of the Treasury; and he is given any number (not limited at all) of clerks and agents. There are established, if you please, three thousand of these banks under this bill, of \$100,000 each, scattered through all the country. They can be visited by agents appointed here under this bill, and inspected from time to time and reported upon. The Secretary is authorized to make such of them as he thinks proper depositories of the public revenue, and he is to distribute this stock, one half of the \$300,000,000 to the different States, according to their representative population, and the other half according to the banking resources of the country; there is no

limitation upon him whatever. If the old United States Bank furnished well-grounded apprehensions of its dangerous political tendency as a political agency, permit me to ask gentlemen to reflect for a moment on what you have got here, with \$300,000,000 of capital, with three thousand banks subject to inspection, and to be troubled, just as much as the head of the Treasury Department pleases, if they do not support his views; or to receive favors by way of being made depositories for the public dues; and the Secretary having the power to appoint agents and clerks *ad libitum*. I do not wish to enlarge upon this point at all, but I say this: if a Secretary of the Treasury can be furnished with these powers and chooses to use them, he must be a very bungling politician if he cannot make himself President any day.

"Then, putting it in plain English, you propose to hire these people to go into these associations, take these bonds, and deposit them. They are to pay two per cent. on their circulation, and you pay them six on their bonds. I will call it four per cent.; though it is more, as the gentleman knows, because the two per cent. they pay in currency, and the six per cent. we pay in gold. The amount of it is this: we say to them, 'If you will do this to the amount of \$300,000,000, and put out notes to the extent of ninety per cent. of the bonds, we will pay you \$12,000,000 in gold every year for doing it.' You may talk about its being in the form of bonds, but that does not alter it at all. We are to enter into that arrangement with them. If they take their money, buy these bonds, put them on deposit, issue paper to the extent of ninety per cent. of those bonds and circulate it, and pay two per cent. on that circulation, we pay them six on the bonds; that is, we pay them four per cent. on the bonds, if they will do us this great service! There is all there is about it. You may discuss it as you please, and use a great many financial expressions and schemes; but that is the English of it; that is the simple common sense of it. Instead of circulating that amount of our own currency upon our own responsibility and paying nothing, we are to hire them to circulate that amount of our currency, and pay them \$12,000,000 a year in gold for doing it; and we are to be responsible after all. That is all there is of it. Yankee as I am, I am unable to perceive how it is possible that that can be a good trade for us, or how any shrewd man would ever think of entering into an agreement of that kind.

"It is said, however, that it is a fair tax in proportion to our other war taxes. Let us look at this for a moment. My neighbor here has \$100,000 saved, we will say, and having retired from business, he lives by loaning out that money, and he realizes six per cent. a year on it. How much do we tax him? One hundred and eighty dollars, three per cent. on what he gets. I am going now upon the ground that he has got \$6,000 income in some other way.

We tax him three per cent. on his *gain*; and that is \$180, although he has used \$100,000. Here are three other neighbors of mine—I will not include myself, because that would make the supposition too improbable—who have \$100,000, and they bank with it according to the law of their State. What do they make? Perhaps they make eight per cent. If they do make \$8,000 on the \$100,000, they have to pay a tax of three per cent. on that now, and it goes into the Treasury. But what is the proposition here? The Government says to them, "You have got \$100,000 invested in banking; you will therefore probably have about \$150,000 of circulation; we will tax you on the \$150,000 one per cent. every six months, or two per cent. a year." How much will that be? Three thousand dollars. "For the use of your \$100,000 in banking you shall pay \$3,000 a year." The other man, for the use of his \$100,000, pays but \$180 a year. Do you call that fair and equal taxation? The one pays \$180, while the other, on the same amount of capital, pays \$3,000. It is perfectly monstrous.

"But, in the next place, I think it a mere matter of figures and capable of mathematical certainty about this problem of whether banks will be set up in my part of the country under this bill, even if the existing banks are all destroyed. To illustrate it, I will take the plain case of a \$100,000 bank, because that is the ordinary size of a country bank in my part of the country, and it is in round numbers, easy of calculation. You are to take \$100,000, go and buy bonds with it, leave them there, and take out \$90,000 of circulating notes. As to exchange, that is to be the same all over the country, and that is to be no item in the profit of a bank hereafter.

"Now let us see how it will work. In the first place, I believe I am borne out by examination of experienced men in saying that you cannot operate a country bank, or any bank of the amount of \$100,000, with less than \$2,500 per year. Pay your cashier, open your office, warm it, light it, take care of it, pay your expresses, and do all your business, and it cannot be done for less than \$2,500, and that is putting it very low. Now, a \$100,000 bank, under this bill, will, in the first place, get from the Government of the United States \$4,000 a year interest, after paying the tax. We understand that. They lend the \$90,000 which they receive and they get six per cent. interest on that. That interest would amount to \$5,400. There is all they can make without stealing. It is all that can be made. What does it cost? It costs \$2,500 to operate the bank, the ordinary expenses, and they lose the use of \$22,500 for that year, because they are to keep on hand twenty-five per cent. on their circulation. They have kept that on hand, and of course the use of it is lost. That is over \$1,300. That expense and loss makes \$3,800. The interest from the Government

and the interest on the \$90,000 amounts to \$9,400. Deducting the one from the other, it leaves \$5,600. Now, what did it make that on? On the \$100,000 put in, and the \$22,500 which was kept on hand. The investment was \$122,500, and the profit is \$5,600; that is, about four per cent. That is all that can be made under it. They are to run the risk in their loans of all the loanings of \$90,000, and getting it out and in, and cannot make five per cent., if all works smoothly and there are no losses at all. I say that is not a matter of speculation; that is a matter of certainty. Those figures which I have given in this instance cannot lie."

Mr. Sherman, of Ohio, followed in defence of the bill. "That bankers can make a reasonable profit under this bill I have no doubt. They have the benefit of four per cent. on the bonds deposited by them. They have the benefit of interest on the notes given them for circulation. They have the benefit of exchange; not the rates of exchange formerly paid, but that incidental exchange which every bank charges in drawing a draft, probably a quarter or a half of one per cent. They have the profits they can make from deposits. They have other profits from the ordinary incidents of banking. I have no doubt from all these various profits they will make what banks in ordinary times under specie payments could make, that is, seven or eight per cent. a year.

"But, sir, the principal point made by the honorable senator, and one most likely to influence the judgment of senators, is this: he asks what benefit the United States derives from this arrangement, and he endeavors by argument to show that the United States derives no benefit. I would put to him this simple proposition: there are now \$167,000,000 of local bank circulation in the country. Suppose we can induce through their interests—I do not propose to do it by any arbitrary mode—the retirement of \$100,000,000 of this circulation, taking the smallest sum that will probably be used in the course of a year; suppose we can induce the banks to withdraw \$100,000,000 of their circulation, is it no benefit to the United States? Now, the United States gets no benefit whatever from their circulation. The United States cannot receive it in their ordinary business transactions. It fills the channels of circulation to the exclusion of the greenbacks. Suppose we can induce the banks to withdraw \$100,000,000 of their circulation, and invest that much money in our bonds, and receive United States circulation, does not the honorable senator see that we should derive a great advantage from it? That is the object of this bill. The object is, by appealing to the patriotism and the interest of the people and the banks, to induce the banks to withdraw their local circulation and convert it into a national circulation. If it fails, as a matter of course it does no harm. But suppose it succeeds, does not the United States derive a

benefit from it? Certainly; because at once a demand is created for the purchase of \$100,000,000 of United States bonds. We are anxious to sell these bonds. They are now below the par of gold. The creation of a demand for \$100,000,000 will, as I showed yesterday, by the well-known and recognized laws of trade, probably create a demand for \$500,000,000. There is the benefit, there is the advantage we seek to derive. We shall make a market at once for the sale of \$100,000,000 worth of our bonds, and the additional market which is always created by making a demand for a particular commodity, which is equivalent at least to five times the amount of the real demand. The Government of the United States is willing to borrow money from the honorable senator at six per cent. and pay the interest in gold coin. Any person who desires to loan money to the United States may receive six per cent. interest on it, and we are very glad to sell our bonds at that rate in this time of war; but to those who avail themselves of the privileges of this law we only pay four per cent., so that we save one third of the interest on the amount of our bonds used for banking; and more than that, we get a circulation which by the laws of the United States may be used in the collection of our dues; and in the ordinary operations of our Government these banking agencies may be made useful and beneficial as depositories. There is the answer. The benefit derived to the Government is by making a market for its bonds, by having fiscal agencies throughout the United States, so that it may the more readily collect its debts, and by saving one third of the interest on the payment of its bonds, and by securing to the people of the country a uniform national currency which can be passed from hand to hand in all parts of the country without loss by exchange, or deterioration, or alteration.

"But the honorable senator says that the power granted by this bill would render the Secretary of the Treasury a very dangerous person, or a very powerful person; probably that is the meaning. He says that this bill would create a dangerous political power. According to all experience, if you invest in any particular person the power to appoint men to office, or the power to manage banks or control a scheme of this kind, it rather weakens him. Sir, it will be a dangerous power in one sense; not to the American people, but it will be dangerous to the individual who exercises the power. Any man in this country who is clothed with the power of appointing men to office or selecting certain persons to have certain privileges, loses more than he makes, by the well-known law that he disappoints more than he benefits. And if you confer upon the Secretary of War or the Secretary of the Treasury the power to appoint twenty clerks, as we did the other day, there are five hundred applicants at once; and you disappoint four hundred and eighty, and make them enemies, for the sake of gaining twenty

friends. No, sir, the administration of patronage, the power to select depositories, all the power conferred by this bill, the power of visitation, all these are powers which tend rather to decrease the influence of the Secretary of the Treasury, because they are more likely to make him enemies than friends."

Mr. Howard, of Michigan, urged the following grounds for his opposition to the bill: "Sir, I am opposed to the scheme of the bill, because it ignores the great principle which I think is the only sound principle, that a paper circulation shall be convertible at the will of the holder into specie. I oppose it because it is likely to wage a very unnecessary and, I fear, dangerous war upon the State institutions; and I oppose it because I deplore the contest which will probably arise out of it in our local politics."

Mr. Wilson, of Massachusetts, briefly said: "Mr. President, I do not believe the banks are warring on the Government. They have proved in the past that they are not hostile to the Government. I do not believe the Government means to be hostile to them. I believe that this is a system which will absorb the existing banking system, and will be for the credit of the Government now, and for the interests of the people afterward, including the banks."

Mr. Doolittle, of Wisconsin, approved of the bill. He said: "As an original question, under the Constitution, I would maintain that the States have no constitutional power to issue paper money in any form, or to incorporate any company to do so; I would maintain, further, that under the Constitution, gold and silver coin is the only constitutional currency; but the truth is that the whole history of the country, and I am constrained to say the decision of the Supreme Court, has gone the other way."

"I say the practical effect is, that the history of the Government and the decision of the court have given rise to about fifteen hundred or two thousand banks created under the authority of the States; and they have issued their money, so that at the beginning of this war practically all the money we had in this country was the paper money of these two thousand State banks; and they very soon suspended, and all the practical currency we had was the irredeemable paper money of the State banks. That is the real truth; and in that state of things and under the necessity which grew out of it, I felt constrained, for one, to vote for the issue of notes by the Government of the United States."

"I maintain, sir, that in that state of the currency, our only circulation, in fact, being the irredeemable paper money of bank corporations created by the States, it was impossible for this Government to go on with this war on gold and silver. We must go on with the war on paper money as a practical fact; and if we must wage the war with paper money, we have got to take the control of that paper money

into our own hands, or the Government will be destroyed; and the practical question is the mode of arriving at the control. This Government must dominate and master and control the currency of this country in this exigency."

"I maintain, again, that it is not possible for us to return to gold and silver at this present time, and go on with this war, because the State banks are continually issuing their paper money. Such is the state of things that it is an impossibility, and we must look the issue squarely in the face."

"As I have said, I believe it is a necessity of this Government, in some mode, to take control of the paper currency of the country. In some way we have got to restrain the issues. I will not say the paper that has already been issued by the banks; but the new issues of the State banks, the issues which the banks have made since the Government has commenced issuing its legal-tender notes. While we are creating and issuing paper money, we cannot allow the banks still to continue to flood the channels of circulation. By that course we are destroying ourselves. We must restrain them, at least to the limit at which they stood when we began, and not allow them to flood all the channels of circulation."

"Mr. President, the only possible way in which we can do this is by inaugurating some better system. It is claimed and maintained that the system proposed to be inaugurated here is a better system. Sir, I have listened to the arguments on both sides, and I confess that at times in my own mind I have been shaken somewhat by the arguments I have heard against this system: but no better system seems to be proposed. Those who oppose this system do not come forward with another; and as, in my judgment, it is necessary to have some system, upon the whole I have been constrained to say that I shall favor this system, because I do not see that a better system is proposed to meet the exigency."

After further brief debate, the vote was taken on the bill as follows:

YEAS—Messrs. Anthony, Arnold, Chandler, Clark, Doolittle, Fessenden, Foster, Harding, Harlan, Harris, Howard, Howe, Lane of Kansas, Morrill, Nesmith, Pomeroy, Sherman, Sumner, Ten Eyck, Wade, Wilkinson, Wilmot, and Wilson of Massachusetts—23.

NAYS—Messrs. Carlile, Collamer, Cowan, Davis, Dixon, Foot, Grimes, Henderson, Hicks, Kennedy, King, Latham, McDougall, Powell, Rice, Richardson, Saulsbury, Trumbull, Turpie, Wall, and Wilson of Missouri—21.

The bill came up in the House on the 19th of February. Mr. Spaulding, of New York, thus stated some of the advantages of the measure: "The additional advantages held out by the bill to induce rich men, men of accumulated capital, to join the Government in maintaining this national currency, are:

"1. The national character given to the bills to circulate at par in all parts of the United States.

"2. It is made receivable at par for all in-

ternal taxes and all other dues to the Government, except customs, and payable to the army and navy and all other creditors of the Government.

"3. The banking associations are to be exempt from all State and United States taxation, and only pay two per cent. per annum for engraving, paper, and printing their circulating notes, and which is to include all the other expenses of the Currency Bureau at Washington.

"On a full review of this proposed plan of a national currency, it will be seen that it is based on public and private faith; that it proposes to combine the interest of the nation with the rich individuals belonging to it. Men of surplus capital only can profitably engage in the business of banking. If speculators and adventurers, without positive capital, attempt to bank under this bill, they will fail. Money-lenders, and not money borrowers, can successfully organize and manage banking associations under the provisions of this act."

Mr. Harrison, of Ohio, urged the following objections to the bill: "As long, Mr. Speaker, as our domestic troubles continue, the business of the country must be done with an unredeemed paper circulation; and the alternative is presented of a circulation of Treasury notes issued directly by the Government, or bank notes issued by institutions organized under Federal grant. The former, it seems to me, is to be preferred, and for obvious reasons. It is an expedient resorted to in an emergency, justified by an emergency, and made acceptable to the country by reason of the emergency. The evils and inconveniences arising from it can be borne, because there is no other way by which we can help ourselves along in our present straits. There has been and there will necessarily be an expansion of credits—a rise of values, or, rather, of prices—a good deal of speculation—but then the ordinarily disastrous consequences of this state of things will be measurably averted by the temporary character of the cause which produced it. When the necessity for the expedient ceases, the expedient will be abandoned, and business will resume its ordinary courses. On the other hand, the other alternative inaugurates an expedient into a policy, and fastens permanently upon the country evils otherwise of a temporary character."

The debate was further continued, and the bill finally passed by the following vote:

YEAS—Messrs. Aldrich, Alley, Ashley, Babbitt, Beaman, Bingham, Jacob B. Blair, Blake, Buffinton, Calvert, Campbell, Casey, Chamberlain, Clements, Colfax, Conway, Covode, Cutler, Davis, Delano, Dunn, Edgerton, Eliot, Ely, Fenton, Samuel C. Fessenden, Thomas A. D. Fessenden, Fisher, Frank, Goodwin, Granger, Hahn, Haight, Hickman, Hooper, Hutchins, Julian, Kelley, Francis W. Kellogg, William Kellogg, Lansing, Leary, Lovejoy, Low, McIndoe, McKean, McPherson, Marston, Maynard, Moorhead, Anson P. Morrill, Noell, Olin, Patton, Timothy G. Phelps, Potter, Alexander H. Rice, John H. Rice, Sargeant, Sedgwick, Segar, Shanks, Shellabarger, Sherman, Sloan, Spaulding, Stevens, Trimble, Trowbridge, Van Horn,

Van Wyck, Verree, Wall, Wallace, Washburne, Albert S. White, Windom, and Worcester—78.

NAYS—Messrs. William Allen, Ancona, Bailey, Baker, Baxter, Biddle, Cobb, Frederick A. Conkling, Roscoe Conkling, Cox, Cravens, Crittenden, Dawes, Edwards, English, Gooch, Grider, Gurley, Hall, Harding, Harrison, Holman, Horton, Johnson, Kerrigan, Knapp, Law, Lazear, Loomis, Mallory, May, Menzies, Justin S. Morrill, Morris, Nixon, Noble, Norton, Nugen, Odell, Pendleton, Perry, Pike, Pomeroy, Porter, Price, Robinson, James S. Rollins, Sheffield, Shiel, John B. Steele, William G. Steele, Stiles, Stratton, Benjamin F. Thomas, Francis Thomas, Vallandigham, Wadsworth, Wheeler, Whaley, Chilton A. White, Wickliffe, Wilson, Woodruff, and Wright—64.

The following is the bill as passed:

An Act to provide a National Currency, secured by a pledge of United States Stocks, and to provide for the circulation and redemption thereof.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be established in the Treasury Department a separate bureau, which shall be charged with the execution of this and all other laws that may be passed by Congress respecting the issue and regulation of a national currency secured by United States bonds. The chief officer of the said bureau shall be denominated the Comptroller of the Currency, and shall be under the general direction of the Secretary of the Treasury. He shall be appointed by the President, on the nomination of the Secretary of the Treasury, by and with the advice and consent of the Senate, and shall hold his office for the term of five years, unless sooner removed by the President, by and with the advice and consent of the Senate. He shall receive an annual salary of five thousand dollars. He shall have a competent deputy, appointed by the Secretary, whose salary shall be two thousand five hundred dollars, and who shall possess the power and perform the duties attached by law to the office of comptroller during a vacancy in such office, and during his absence or inability. He shall employ, from time to time, the necessary clerks to discharge such duties as he shall direct, which clerks shall be appointed and classified by the Secretary of the Treasury in the manner now provided by law. Within fifteen days from the time of notice of his appointment, the Comptroller shall take and subscribe the oath of office prescribed by the Constitution and laws of the United States; and he shall give to the United States a bond in the penalty of one hundred thousand dollars, with not less than two responsible freeholders as sureties, to be approved by the Secretary of the Treasury, conditioned for the faithful discharge of the duties of his office. The Deputy Comptroller so appointed shall also take the oath of office prescribed by the Constitution and laws of the United States, and shall give a like bond in the penalty of fifty thousand dollars. The Comptroller and Deputy Comptroller shall not, either directly or indirectly, be interested in any association issuing national currency under the provisions of this act.

SEC. 2. *And be it further enacted,* That the Comptroller of the Currency, with the approval of the Secretary of the Treasury, shall devise a seal, with suitable inscriptions, for his office, a description of which, with a certificate of approval by the Secretary of the Treasury, shall be filed in the office of the Secretary of State with an impression thereof, which shall thereupon become the seal of office of the Comptroller of the Currency, and the same may be renewed when necessary. Every certificate, assignment, and conveyance executed by the Comptroller, in pursuance of any authority conferred on him by law, and sealed with his seal of office, shall be received in evidence in all places and courts whatsoever; and all copies of papers in the office of the Comptroller, certified by him and authenticated by the said seal, shall in all cases be evidence equally and in like manner as the original. An

impression of such seal directly on the paper shall be as valid as if made on wax or wafer.

SEC. 3. *And be it further enacted*, That there shall be assigned to the Comptroller of the Currency by the Secretary of the Treasury suitable rooms in the Treasury building for conducting the business of the Currency Bureau, in which shall be safe and secure fire-proof vaults in which it shall be the duty of the Comptroller to deposit and safely keep all the plates and other valuable things belonging to his department; and the Comptroller shall from time to time furnish the necessary furniture, stationery, fuel, lights, and other proper conveniences for the transaction of the said business.

SEC. 4. *And be it further enacted*, That the term "United States Bonds," as used in this act, shall be construed to mean all coupon and registered bonds now issued or that may hereafter be issued on the faith of the United States by the Secretary of the Treasury in pursuance of law.

SEC. 5. *And be it further enacted*, That associations for carrying on the business of banking may be formed by any number of persons not less in any case than five.

SEC. 6. *And be it further enacted*, That persons uniting to form such an association shall, under their hands and seals, make a certificate which shall specify—

First. The name assumed by such association.

Second. The place where its operations of discount and deposit are to be carried on; designating the State, Territory, or district, and also the particular city, town, or village.

Third. The amount of its capital stock, and the number of shares into which the same shall be divided; which capital stock shall not be less than fifty thousand dollars; and in cities whose population is over ten thousand persons, the capital stock shall not be less than one hundred thousand dollars.

Fourth. The names and places of residence of the shareholders, and the number of shares held by each of them.

Fifth. The time when such association shall commence.

Sixth. A declaration that said certificate is made to enable such persons to avail themselves of the advantages of this act.

The said certificate shall be acknowledged before a judge of some court of record or a notary public, and the acknowledgment thereof certified under the seal of such court or notary, and shall be transmitted, together with a copy of the articles of association which shall have been adopted, to the Comptroller of the Currency, who shall record and carefully preserve the same in his office. Copies of such certificate, duly certified by the Comptroller, and authenticated by his seal of office, shall be legal and sufficient evidence in all courts and places within the United States, or the jurisdiction of the Government thereof, of the existence of such association, and of every other matter or thing which could be proved by the production of the original certificate.

SEC. 7. *And be it further enacted*, That at least thirty per centum of the capital stock of such association shall be paid in at the time of the commencement of its banking business, and the remainder of the capital stock of such association shall be paid in instalments of at least ten per centum each on the whole amount to which the association shall be limited, as frequently as one instalment at the end of each succeeding two months from the time of the commencement of its banking operations, until the whole of the capital stock shall be paid in.

SEC. 8. *And be it further enacted*, That if any shareholder or his assignee shall fail to pay any instalment on the stock when the same is required by the foregoing section to be paid, the directors of such association may sell the stock held by such delinquent shareholder at public auction, having given three weeks' previous notice thereof in a newspaper published and of general circulation in the city where the association is located,

if the same be located in a city, and if not so located, then in a newspaper printed or of general circulation in the county where the same is located, to any person who will pay the highest price therefor, and not less than the amount then due thereon, with the expenses of advertisement and sale; and the excess, if any, shall be paid to the delinquent shareholder. If no bidder can be found who will pay for such stock the amount due thereon to the association, and the costs of advertisement and sale, the amount previously paid shall be forfeited to the association, and such stock may subsequently be sold as the directors may order.

SEC. 9. *And be it further enacted*, That whenever a certificate shall have been transmitted to the Comptroller of the Currency, as provided in this act, and the association transmitting the same shall notify the Comptroller that at least thirty per centum of its capital stock has been paid in as aforesaid, and that such association has complied with all the provisions of this act required to be complied with before such association shall be authorized to commence the business of banking, and that such association is desirous of commencing such business, the Comptroller shall immediately proceed, in such manner as he shall by general rules prescribe, to examine the condition of such association, to ascertain especially the amount of money paid in on account of its capital stock; the name and place of residence of each of the directors of such association, and the amount of the capital stock of which each is the *bona fide* owner, and generally whether such association has complied with all the requirements of this act to entitle it to engage in the business of banking; and shall cause to be made, and testified by the oaths of a majority of the directors and by the president or cashier of such association, a statement of all the facts necessary to enable the Comptroller to determine whether such association is lawfully entitled to commence the business of banking under this act.

SEC. 10. *And be it further enacted*, That if, upon a careful examination of the facts so reported, and of any other facts which may come to the knowledge of the Comptroller, whether by means of a special commission appointed by him for the purpose of inquiring into the condition of such association, or otherwise, it shall appear that such association is lawfully entitled to commence the business of banking, the Comptroller shall give to such association a certificate under his hand and official seal, showing that such association has complied with all the provisions of this act required to be complied with before being entitled to commence the business of banking under it, and that such association is authorized to commence said business accordingly; and it shall be the duty of such association to cause said certificate to be published in some newspaper published in the city or county where such association is located, for at least sixty days next after the issuing thereof: *Provided*, That if no newspaper is published in such city or county, such certificate shall be published as the Comptroller of the Currency shall direct.

SEC. 11. *And be it further enacted*, That every association formed pursuant to the provisions of this act may make and use a common seal, and shall have succession by the name designated in its articles of association and for the period limited therein, not, however, exceeding twenty years from the passage of this act; by such name may make contracts, sue and be sued, complain and defend in any court of law or equity as fully as natural persons, and may make by-laws, approved by the Comptroller of the Currency, not inconsistent with the laws of the United States or the provisions of this act, for the election of directors, the management of its property, the regulation of its affairs, and for the transfer of its stock; and shall have power to carry on the business of banking by obtaining and issuing circulating notes in accordance with the provisions of this act; by discounting bills, notes, and other evidences of debt; by receiving deposits; by buying and selling gold and silver bullion, foreign coins, and bills of exchange; by loaning money on real and personal security, in the manner specified in

their articles of association, for the purposes authorized by this act, and by exercising such incidental powers as shall be necessary to carry on such business; to choose one of their number as president of such association, and to appoint a cashier and such other officers and agents as their business may require; and to remove such president, cashier, officers, and agents at pleasure, and appoint others in their place; and their usual business shall be transacted in banking offices located at the places specified respectively in its certificate of association, and not elsewhere.

SEC. 12. *And be it further enacted*, That the shares of associations formed under this act shall be deemed personal property, and shall be transferable on the books of the association in such manner as may be prescribed in the by-laws or articles of association; and every person becoming a shareholder by such transfer shall, in proportion to his shares, succeed to all the rights and liabilities of the prior holder of such shares; and no change shall be made in the articles of association by which the rights, remedies, or security of the existing creditors of the association shall be impaired. For all debts contracted by such association for the circulation, deposits, or otherwise, each shareholder shall be liable to the amount, at their par value, of the shares held by him, in addition to the amount invested in such shares.

SEC. 13. *And be it further enacted*, That it shall be lawful for any association formed under this act, by its articles of association, to provide for an increase of its capital from time to time as may be deemed expedient, subject to the limitations of this act; but no such increase shall be valid until the increased capital shall be paid in, and notice thereof shall have been transmitted to the Comptroller of the Currency, and his certificate obtained, specifying the amount of such increase of capital stock, and that the same has been duly paid to such association.

SEC. 14. *And be it further enacted*, That it shall be lawful for any such association to purchase, hold, and convey real estate as follows:

First. Such as shall be necessary for its immediate accommodation in the transaction of its business.

Second. Such as shall be mortgaged to it in good faith by way of security for loans made by such association, or for moneys due thereto.

Third. Such as shall be conveyed to it in satisfaction of debts previously contracted in the course of its dealings.

Fourth. Such as it shall purchase at sales under judgments, decrees, or mortgages held by such association.

Such association shall not purchase or hold real estate in any other case or for any other purpose than as specified in this section.

SEC. 15. *And be it further enacted*, That every association, after having complied with the provisions of this act preliminary to the commencement of banking business under its provisions, shall transfer and deliver to the Treasurer of the United States any United States bonds bearing interest to an amount not less than one third of the capital stock paid in, which bonds shall be deposited with the Treasurer of the United States, and by him safely kept in his office until the same shall be otherwise disposed of, in pursuance of the provisions of this act.

SEC. 16. *And be it further enacted*, That upon the making of any such transfer and delivery, the association making the same shall be entitled to receive from the Comptroller of the Currency circulating notes of different denominations, in blank, registered and countersigned as hereinafter provided, equal in amount to ninety per centum of the current market value of the United States bonds so transferred and delivered, but not exceeding the par value thereof, if bearing interest at the rate of six per centum, or of equivalent United States bonds bearing a less rate of interest; and at no time shall the total amount of such notes, issued to any such association, exceed the amount at such time actually paid in of its capital stock.

SEC. 17. *And be it further enacted*, That the entire amount of circulating notes to be issued under this act shall not exceed three hundred millions of dollars. One hundred and fifty millions of which sum shall be apportioned to associations in the States, in the District of Columbia, and in the Territories, according to representative population, and the remainder shall be apportioned by the Secretary of the Treasury among associations formed in the several States, in the District of Columbia, and in the Territories, having due regard to the existing banking capital, resources, and business of such States, District, and Territories.

SEC. 18. *And be it further enacted*, That, in order to furnish suitable notes for circulation, the Comptroller of the Currency is hereby authorized and required, under the direction of the Secretary of the Treasury, to cause plates to be engraved in the best manner, to guard against counterfeiting and fraudulent alterations, and to have printed therefrom, and numbered, such quantity of circulating notes, in blank, of the denominations of five dollars, ten dollars, twenty dollars, fifty dollars, one hundred dollars, five hundred dollars, and one thousand dollars, as may be required to supply, under this act, the associations entitled to receive the same; which notes shall express upon their face that they are secured by United States bonds, deposited with the Treasurer of the United States, and issued under the provisions of this act, which statement shall be attested by the written or engraved signatures of the Treasurer and Register, and by the imprint of the seal of the Treasury; and shall also express upon their face the promise of the association receiving the same, to pay on demand, attested by the signatures of the president, or vice-president, and cashier; and the said notes shall bear such devices and such other statements, and shall be in such form, as the Secretary of the Treasury shall, by regulation, direct.

SEC. 19. *And be it further enacted*, That the plates and special dies to be procured by the Comptroller of the Currency for the printing of such circulating notes as shall remain under his control and direction, and the expenses necessarily incurred in executing the provisions of this act respecting the procuring of such notes, shall be audited and paid as contingent expenses of the Treasury Department; and for the purpose of reimbursing the same, and all other expenses incurred under this act, and in lieu of all taxes upon the circulation authorized by this act, or upon the bonds deposited for the security of the same, such association organized under this act shall semi-annually, on the first days of January and July, after its organization, pay to the Comptroller of the Currency, in lawful money of the United States, one per centum on the amount of circulating notes received by such association, and in default thereof, the Treasurer of the United States is hereby authorized to reserve and retain one per centum on the amount of said bonds so deposited, at each semi-annual payment of interest thereon; and all sums so reserved and retained shall be paid into the Treasury under the direction of the Secretary; and every bank, banking association, or organization, not organized under the provisions of this act, issuing notes calculated or intended to circulate as money, shall, on the first day of July next, and regularly on the first days of January and July thereafter, make and deliver to the Comptroller of the Currency a true and accurate return of the gross amount of notes issued by it, whether in circulation, or in its vaults, or on deposit elsewhere, and in default of any such return, the bank, banking association, or corporation so failing to make return, shall pay to the United States a penalty of two per centum upon its entire capital stock, to be recovered, for the use of the United States, in any court of competent jurisdiction.

SEC. 20. *And be it further enacted*, That after any such association shall have caused its promise to pay such notes on demand to be signed by the president or vice-president and cashier thereof, in such manner as to make them obligatory promissory notes, payable on demand, at its place of business, such association is hereby authorized to issue and circulate the same as

money; and the same shall be received at par in all parts of the United States in payment of taxes, excises, public lands, and all other dues to the United States, except for duties on imports, and also for all salaries and other debts and demands owing by the United States to individuals, corporations, and associations within the United States, except interest on public debt; and no such association shall issue post notes, or any other notes to circulate as money, than such as are authorized by the foregoing provisions of this act.

SEC. 21. *And be it further enacted*, That all transfers of United States bonds which shall be made by any association as security for circulating notes under the provisions of this act, shall be made to the Treasurer of the United States, with a memorandum written or printed on the certificate of such bonds, and signed by the cashier, or some other officer of the association making the deposit, stating that it is held in trust for the association on whose behalf such transfer is made, and as security for the redemption and payment of the circulating notes delivered to such association; and no transfer of any such bonds by the Treasurer shall be deemed valid, or of binding force and effect, unless sanctioned by the order or request of the Comptroller of the Currency upon the Treasurer. It shall be the duty of the Comptroller of the Currency to keep in his office a book in which shall be entered the name of every association from whose account such transfer of bonds is made by the Treasurer, and the name of the party to whom such transfer is made, unless such transfer is made in blank, in which case the fact shall be stated in said book, and in either case the par value of the bonds so transferred shall be entered therein; and it shall be the duty of the Comptroller, immediately upon countersigning and entering the same, to advise by mail the association from whose account such transfer was made, the kind of bonds and the amount thereof so transferred.

SEC. 22. *And be it further enacted*, That it shall be the duty of the Comptroller of the Currency to countersign and enter in the book, in the manner aforesaid, every transfer or assignment of any bonds held by the Treasurer presented for his signature; and the Comptroller shall have at all times during office hours access to the books of the Treasurer for the purpose of ascertaining the correctness of the transfer or assignment presented to him to countersign; and the Treasurer shall have the like access to the book above mentioned kept by the Comptroller during office hours to ascertain the correctness of the entries in the same.

SEC. 23. *And be it further enacted*, That it shall be the duty of either the president or cashier of every banking association having stocks deposited in the office of the Treasurer of the United States, once or more in each fiscal year, and at such time or times during the ordinary business hours as said officer or officers may select, to examine and compare the bonds so pledged with the books of said Department, and, if found correct, to execute to the said Treasurer a certificate setting forth the different kinds and the amounts thereof, and that the same are in the possession and custody of the Treasurer at the date of such certificate. Such examination may be made by an agent of such association, duly appointed in writing for that purpose, whose certificate before mentioned shall be of like force and validity as if executed by such president or cashier.

SEC. 24. *And be it further enacted*, That every association issuing circulating notes under the provisions of this act shall make a quarterly report to the Comptroller of the Currency, commencing on the first day of the quarter of the year next succeeding the organization of such association, and continuing on the first days of each succeeding quarter in every year thereafter, which report shall be verified by the oath or affirmation of the president and cashier; and all wilful false swearing in respect to such report shall be perjury and subject to the punishment prescribed by law for such offence. The report hereby required shall be in the form prescribed by the Comptroller, and shall

contain a true statement of the condition of the association making such report before the transaction of any business on the morning of the day specified next preceding the date of such report, in respect of the following items and particulars, to wit: loans and discounts, overdrafts due from banks, amount due from the directors of the association, real estate, specie, cash items, stocks, bonds, and promissory notes, bills of solvent banks, bills of suspended banks, loss and expense account, capital, circulation, profits, amount due to banks, amount due to individuals and corporations other than banks, amount due the Treasurer of the United States, amount due to depositors on demand, amount due not included under either of the above heads. And it shall be the duty of the Comptroller to publish full abstracts of such reports together in two newspapers, to be designated by him for that purpose, one in the city of Washington and the other in the city of New York, exhibiting the items of capital, circulation, and deposits, specie and cash items, public securities and private securities; and the separate report of each association shall be published in a newspaper published in the place where such association is established, or, if there be no newspaper at such place, then in a newspaper published at the capital of the State, at the expense of the association making such report. In addition to the quarterly reports required by this section, every association located and doing business in the cities of Boston, Providence, New York, Philadelphia, Baltimore, Cincinnati, Chicago, St. Louis, and New Orleans, shall publish or cause to be published, on the morning of the first Tuesday in each month, in a newspaper printed in the city in which the association making such report is located, to be designated by the Comptroller of the Currency, a statement, under the oath of the president or cashier, showing the condition of the association making such statement, on the morning of the day next preceding the date of such statement, in respect to the following items and particulars, to wit: average amount of loans and discounts, specie, deposits, and circulation.

SEC. 25. *And be it further enacted*, That if any such association shall at any time fail to redeem, in the lawful money of the United States, any of its circulating notes, when payment thereof shall be lawfully demanded, during the usual hours of business, at the office of such association, the holder may cause the same to be protested, in one package, by a notary public, unless the president or cashier of the association shall offer to waive demand and notice of the protest, and shall, in pursuance of such offer, make, sign, and deliver to the party making such demand an admission in writing, stating the time of the demand, the amount demanded, and the fact of the non-payment thereof; and such notary public, on making such protest, or upon receiving such admission, shall forthwith forward such admission or notice of protest to the Comptroller of the Currency; and after such default it shall not be lawful for the association suffering the same to pay out any of its notes, discount any notes or bills, or otherwise prosecute the business of banking, except to receive and safely keep money belonging to it, and to deliver special deposits: *Provided, however*, That if satisfactory proof be produced to such notary public that the payment of any such notes is restrained by order of any court of competent jurisdiction, such notary public shall not protest the same; and when the holders of such notes shall cause more than one note or package to be protested on the same day, he shall not receive pay for more than one protest.

SEC. 26. *And be it further enacted*, That on receiving notice that any such association has failed to redeem any of its circulating notes, as specified in the next preceding section, the Comptroller of the Currency, with the concurrence of the Secretary of the Treasury, may appoint a special agent (of whose appointment immediate notice shall be given to such association), who shall immediately proceed to ascertain whether such association has refused to pay its circulating notes, in the lawful money of the United States,

when demanded as aforesaid, and report to the Comptroller the facts so ascertained; and if, from such protests or the reports so made, the Comptroller shall be satisfied that such association has refused to pay its circulating notes as aforesaid, and is in default, he shall, within thirty days after he shall have received notice of such failure, declare the United States bonds and securities pledged by such association forfeited to the United States, and the same shall thereupon be forfeited accordingly, and thereupon the Comptroller shall immediately give notice, in such manner as the Secretary of the Treasury shall, by general rules or otherwise, direct, to the holders of the circulating notes of such association to present them for payment at the Treasury of the United States; and the same shall be paid as presented, whereupon said Comptroller may, in his discretion, cancel an equal amount of the bonds pledged by such association, equal at current market rates, not exceeding par, to the notes paid; and it shall be lawful for the Secretary of the Treasury, from time to time, to make such regulations respecting the disposition to be made of such circulating notes after presentation thereof for payment as aforesaid, and respecting the perpetuation of the evidence of the payment thereof, as may seem to him proper; but all such notes, on being paid, shall be cancelled; and for any deficiency in the proceeds of the bonds pledged by such association, when disposed of as hereinafter specified, to reimburse to the United States the amount so expended in paying the circulating notes of such association, the United States shall have a first and paramount lien upon all the assets of such association, and such deficiency shall be made good out of such assets in preference to any and all other claims whatsoever, except the necessary costs and expenses of administering the same.

SEC. 27. *And be it further enacted*, That, whenever the Comptroller shall become satisfied, as in the last preceding section specified, that any such association has refused to pay its circulating notes as therein mentioned, he may, instead of cancelling the United States bonds pledged by such association, as provided in the next preceding section, cause so much of them as may be necessary to redeem the outstanding circulating notes of such association to be sold at public auction in the city of New York, after giving thirty days' notice of such sale to such association.

SEC. 28. *And be it further enacted*, That the Comptroller of the Currency may, if he shall be of opinion that the interests of the United States will be best promoted thereby, sell at private sale any of the stock so transferred to him by such association, and receive therefor either money or the circulating notes of such failing association: *Provided*, That no such bonds shall be sold by private sale for less than the par, nor less than the market value thereof at the time of sale. *And provided further*, That no sales of any such stock, either public or private, shall be complete until the transfer thereof shall have been made with the formalities prescribed in this act.

SEC. 29. *And be it further enacted*, That on becoming satisfied, as specified in this act, that any such association has refused to pay its circulating notes as therein mentioned, and is in default, the Comptroller of the Currency may forthwith appoint a receiver, and require of him such bond and security as he shall deem proper, who, under the direction of the Comptroller, shall take possession of the books, records, and assets of every description of such association, collect all debts, dues, and claims belonging to such association, and, upon the order of a court of record of competent jurisdiction, may sell or compound all bad or doubtful debts, and, on a like order, sell all the real and personal property of such association, on such terms as the court shall direct; and such receiver shall pay over all moneys so made to the Treasurer of the United States, and also make report to the Comptroller of the Currency of all his acts and proceedings. The Comptroller shall thereupon cause notice to be given, by advertisement in such newspapers as he may direct, for three consecutive months, calling on all persons

who may have claims against such association to present the same, and to make legal proof thereof; and from time to time the Comptroller, after full provision shall have been first made for refunding to the United States any such deficiency in redeeming the notes of such association as is mentioned in this act, shall make a ratable dividend of the moneys so paid over to him by such receiver on all such claims as may have been so proved or adjudicated in a court of competent jurisdiction, and from time to time, as the proceeds of the assets of such association shall be paid over to him, he shall make further dividends, as aforesaid, on all claims previously proved or adjudicated; and the remainder of such proceeds, if any, shall be paid over to the shareholders of such association, or their legal representatives, in proportion to the stock by them respectively held: *Provided, however*, That if any such association, against which proceedings have been so instituted on account of any alleged refusal to redeem its circulating notes as aforesaid, shall deny having failed to do so, such association may at any time within ten days after such association shall have been notified of the appointment of an agent, as provided in this act, apply to the nearest circuit, or district, or territorial court of the United States, to enjoin further proceedings in the premises; and such court, after citing the Comptroller of the Currency to show cause why further proceedings should not be enjoined, and after the decision of the court or finding of a jury that such association has not refused to redeem its circulating notes, when legally presented, in the lawful money of the United States, shall make an order enjoining the Comptroller, and any receiver acting under his direction, from all further proceedings on account of such alleged refusal.

SEC. 30. *And be it further enacted*, That the bonds transferred to the Treasurer of the United States, as hereinbefore provided, by any banking association for the security of its circulating notes, shall be held exclusively for that purpose, until such notes shall be redeemed, except as provided in this act; but the Comptroller of the Currency may give to any such banking association powers of attorney to receive and appropriate to its own use the interest on the bonds which shall have been so transferred to the Treasurer by it; but such powers shall become inoperative whenever such banking association shall fail to redeem its circulating notes as aforesaid; and said Comptroller may direct the return of any of said bonds to the banking association which transferred the same, upon the surrender to him and the cancellation of a proportionate amount of such circulating notes: *Provided*, That ninety per centum of the current market value of the remaining bonds which shall have been transferred by the banking association offering to surrender such circulating notes shall be equal to the amount of all the circulating notes retained by such banking association: *And provided further*, That there shall have been no failure by such association to redeem its circulating notes, and that there shall have been no other violation by such association of any of the provisions of this act for the security of the creditors of such association; nor shall the Treasurer be required to surrender such bonds in fractional sums of less than one thousand dollars; and if, at any time after said bonds shall be deposited with the Treasurer of the United States, as aforesaid, the market or cash value shall be reduced, the Comptroller of the Currency is hereby authorized to demand and receive the amount of such depreciation in other United States bonds at cash value, or in money, from the association receiving said bills, to be deposited with the Treasurer of the United States, as long as such depreciation continues.

SEC. 31. *And be it further enacted*, That whenever the price of any of the bonds pledged as aforesaid for the redemption of the circulating notes of any such banking association shall be, at the stock exchange in the city of New York, for four consecutive weeks, at a rate less than that at which they shall have been estimated when so pledged, and such depreciation shall not have been made good by a deposit of other bonds

or money, it shall be the duty of the Comptroller of the Currency to notify the Treasurer of the United States of such fact, and the payment of interest upon such depreciated bonds shall be suspended, and such interest shall be retained by said Treasurer until the same, when added to the current market value of the bonds so pledged, to be ascertained as before provided, shall be equal to the amount for which such bonds were pledged: *Provided*, That it shall be the duty of the Comptroller of the Currency, at the expiration of every period of three months, to cause the whole of the sums so retained, and then remaining in the Treasury of the United States, to be invested in United States bonds, in the name of the Comptroller of the Currency, in trust for the respective associations by which the bonds on which such interest shall have accrued shall have been pledged; and whenever the price of such depreciated bonds at the stock exchange in New York shall rise to the price at which they were pledged, and so remain for four consecutive weeks, such investment shall be assigned to such association; and all accruing interest on such pledged bonds shall thereafter be paid to such association on demand thereof.

SEC. 32. *And be it further enacted*, That it shall be the duty of the Comptroller of the Currency to receive wornout or mutilated circulating notes issued by any such banking association, and to deliver in place thereof to such association other blank circulating notes to an equal amount; and such wornout or mutilated circulating notes, after a memorandum shall have been entered in the proper books, in accordance with such regulations as may be established by the Comptroller, as well as all circulating notes which shall have been paid or surrendered to be cancelled, shall be burned to ashes in the presence of three persons, one to be appointed by the Secretary of the Treasury, one by the Comptroller of the Currency, and one by the Treasurer of the United States, under such regulations as the Secretary of the Treasury may prescribe; and in case such notes shall have been delivered to the Comptroller by an officer or agent of such association, then in the presence also of such officer or agent; and a certificate of such burning, signed by the parties so appointed, shall be made in the books of the Comptroller, and a duplicate thereof given to such officer or agent.

SEC. 33. *And be it further enacted*, That it shall be unlawful for any officer acting under the provisions of this act to countersign or deliver to any such association, or to any other company or person, any circulating notes contemplated by this act, except as hereinbefore provided, and in accordance with the true intent and meaning of this act; and any officer who shall violate the provisions of this section shall be deemed guilty of a high misdemeanor, and on conviction thereof shall be punished by fine not exceeding double the amount so countersigned and delivered, and imprisonment not exceeding fifteen years, at the discretion of the court in which he shall be tried.

SEC. 34. *And be it further enacted*, That all fees for protesting the notes issued by any such banking association shall be paid by the person procuring the protest to be made, and such banking association shall be liable therefor; but no part of the stock pledged by such banking association, as aforesaid, shall be applied to the payment of such fees; and all expenses of any preliminary or other examinations into the condition of any association shall be paid by such association; and all expenses of any receivership shall be paid out of the assets of such association before distribution of the proceeds thereof.

SEC. 35. *And be it further enacted*, That the stockholders, collectively, of any such association shall at no time be liable to such association, either as principal debtors or sureties, or both, to an amount greater than three fifths of the capital stock actually paid in and remaining undiminished by losses or otherwise; nor shall the directors be so liable, except to such an amount and in such manner as shall be prescribed by the by-laws of such association, adopted by its stockholders to regulate such liabilities.

SEC. 36. *And be it further enacted*, That the capital stock of any association formed under this act shall be divided into shares of one hundred dollars each, and shall be assignable on the books of the association in such manner as its by-laws shall prescribe; but no shareholder in any association under this act shall have power to sell or transfer any share held in his own right, so long as he shall be liable, either as principal debtor, surety, or otherwise, to the association for any debt which shall have become due and remain unpaid, nor in any case shall such shareholder be entitled to receive any dividend, interest or profit on such shares so long as such liabilities shall continue, but all such dividends, interests, and profits shall be retained by the association, and applied to the discharge of such liabilities; and no stock shall be transferred without the consent of a majority of the directors while the holder thereof is thus indebted to the association.

SEC. 37. *And be it further enacted*, That no banking association shall take, as security for any loan or discount, a lien upon any part of its capital stock; but the same security, both in kind and amount, shall be required of shareholders as of other persons; and no such banking association shall be the purchaser or holder of any portion of its capital stock, or of the capital stock of any other incorporated company, unless such purchase shall be necessary to prevent loss upon a debt previously contracted in good faith, on security which, at the time, was deemed adequate to insure the payment of such debt, independent of any lien upon such stock, or in case of forfeiture of such stock for the non-payment of instalments due thereon, and stock so purchased or acquired shall in no case be held by such association so purchasing for a longer period of time than six months, if the same can, within that time, be sold for what the stock cost.

SEC. 38. *And be it further enacted*, That in all elections of directors, and in deciding all questions at meetings of shareholders, each shareholder shall be entitled to one vote on each share of stock held by him; shareholders may vote by proxies duly authorized in writing; but no officer, clerk, teller or bookkeeper of such association shall act as proxy; and no stockholder whose liability is past due and unpaid shall be allowed to vote.

SEC. 39. *And be it further enacted*, That the affairs of every such association shall be managed by not less than five nor more than nine directors, one of whom shall be president of the association; every director shall, during his whole term of service, be a citizen of the United States and a resident of the State in which such association is located. At least three fourths of the directors shall have resided in the State in which such association is located one year next preceding their election as directors; and each director shall own in his own right, at least one per centum of the capital stock of such association not exceeding two hundred thousand dollars, and the half of one per centum of its capital if over two hundred thousand dollars. Each director shall take an oath that he will, so far as the duty devolves on him, diligently and honestly administer the affairs of such association, and will not knowingly violate, or willingly permit to be violated, any of the provisions of this act, and that he is the *bona fide* owner, in his own right, of the shares of stock standing in his name on the books of the association, and that the same is not hypothecated, or in any way pledged, as security for any loan obtained or debt owing to the association of which he is a director, which oath, subscribed by himself, and certified by the officer before whom it is taken, shall be immediately transmitted to the Comptroller of the Currency, and by him filed and preserved in his office.

SEC. 40. *And be it further enacted*, That the directors of any such association first elected shall hold their places until their successors shall be elected and qualified. All subsequent elections shall be held annually, on such day in the month of January as the stockholders of said association may prescribe; and the directors so elected shall hold their places for one year,

and until their successors are elected and qualified. But any director removing from the State, or ceasing to be the owner of the requisite amount of stock, shall thereby vacate his place. Any vacancy in the board shall be filled by appointment by the remaining directors. The director so appointed shall hold his place until the next annual election; and if, from any cause, an election of directors shall not be made at the time appointed, the association shall not for that cause be dissolved, but an election may be held on any subsequent day, thirty days' notice thereof having been given in a newspaper printed, or of general circulation, in the city, town, or county in which the association is located, and if no newspaper is published in such city, town, or county, such notice shall be published in a newspaper in the county adjoining.

SEC. 41. *And be it further enacted*, That every such association shall at all times have on hand, in lawful money of the United States, an amount equal to at least twenty-five per centum of the aggregate amount of its outstanding notes of circulation and its deposits, and whenever the amount of its outstanding notes of circulation and its deposits shall exceed the above-named proportion for the space of twelve days, or whenever such lawful money of the United States shall at any time fall below the amount of twenty-five per centum of its circulation and deposits, such association shall not increase its liabilities by making any new loans or discounts otherwise than by discounting or purchasing bills of exchange, payable at sight, nor make any dividend of its profits, until the required proportion between the aggregate amount of its outstanding notes of circulation and its deposits and lawful money of the United States shall be restored: *Provided, however*, That clearing-house certificates, representing specie or lawful money specially deposited for the purpose of any clearing-house association, shall be deemed to be lawful money in the possession of any association belonging to such clearing house holding and owning such certificates, and considered to be a part of the lawful money which such association is required to have, under the foregoing provisions of this section: *Provided further*, That any balance due to any association organized under this act in other places from any association in the cities of Boston, Providence, New York, Philadelphia, Baltimore, Cincinnati, Chicago, St. Louis, and New Orleans, in good credit, subject to be drawn for at sight, and available to redeem their circulating notes and deposits, may be deemed to be a part of the lawful money which such association in other places than the cities of Boston, Providence, New York, Philadelphia, Baltimore, Cincinnati, Chicago, St. Louis, and New Orleans, are required to have by the foregoing provisions of this section, to the extent of three-fifths of the said amount of twenty-five per centum required. And it shall be competent for the Comptroller of the Currency to notify any such association whose lawful money reserve as aforesaid, shall fall below said proportion of twenty-five per centum, to make good such reserve; and if such association shall fail for thirty days thereafter so to make good its reserve of lawful money of the United States, the Comptroller may, with the concurrence of the Secretary of the Treasury, appoint a receiver to wind up the business of such association, as provided in this act.

SEC. 42. *And be it further enacted*, That no association shall at any time be indebted, or in any way liable, to an amount exceeding the amount of its capital stock at such time actually paid in, and remaining undiminished by losses or otherwise, except on the following accounts, that is to say:

First. On account of its notes of circulation.

Second. On account of moneys deposited with, or collected by, such association.

Third. On account of bills of exchange or drafts drawn against money actually on deposit to the credit of such association, or due thereto.

Fourth. On account of liabilities to its stockholders, for money paid in on capital stock, and dividends thereon, and reserved profits.

SEC. 43. *And be it further enacted*, That no association

shall, either directly or indirectly, pledge or hypothecate any of its notes of circulation for the purpose of procuring money to be paid in on its capital stock, or to be used in its banking operations or otherwise.

SEC. 44. *And be it further enacted*, That no association, or any member thereof, shall, during the time it shall continue its banking operations, withdraw, or permit to be withdrawn, either in form of dividends, loans to stockholders for a longer time than six months, or in any other manner, any portion of its capital; and if losses shall at any time have been sustained by any such association equal to or exceeding its undivided profits then on hand, no dividend shall be made; and no dividend shall ever be made by any association, while it shall continue its banking operations, to an amount greater than its net profits then on hand, deducting therefrom its losses and bad debts; and all debts due to any association, on which interest is past due and unpaid for a period of six months, unless the same shall be well secured, and shall be in process of collection, shall be considered bad debts within the meaning of this act.

SEC. 45. *And be it further enacted*, That the directors of every association shall semi-annually in the months of May and November, declare a dividend of so much of the profits of such association as they shall judge expedient; and on each dividend day the cashier shall make, and verify by his oath, a full, clear, and accurate statement of the condition of the association as it shall be on that day after declaring the dividend; which statement shall contain—

First. The amount of the capital stock annually paid in and then remaining as the capital stock of such association.

Secondly. The amount of the circulating notes of such association then in circulation.

Thirdly. The greatest amount in circulation at any time since the making of the last previous statement, as shall be exhibited by the weekly statements of the cashier, specifying the times when the same occurred.

Fourthly. The amount of balances and debts of every kind due to other banks and banking associations.

Fifthly. The amount due to depositors.

Sixthly. The total amount of debts and liabilities of every description, and the greatest amount since the making of the last previous statement, specifying the time when the same accrued.

Seventhly. The total amount of dividend declared on the day of making the statement.

Eighthly. The amount of lawful money of the United States belonging to the association and in its possession at the time of making the statement.

Ninthly. The amount subject to be drawn at sight in lawful money of the United States then remaining on deposit with any associations, banks, or bankers, specifying the amounts so on deposit in the cities of Boston, Providence, New York, Philadelphia, Baltimore, Cincinnati, Chicago, St. Louis, and New Orleans.

Tenthly. The amount then on hand of bills or notes issued by other banks and banking associations.

Eleventhly. The amount of balances due from other banks, bankers, and banking associations, excluding deposits subject to be drawn at sight as aforesaid.

Twelfthly. The amount on hand of bills, bonds, stocks, notes, and other evidences of debts, discounted or purchased by the association, specifying particularly the amount of suspended debt, the amount considered bad, the amount considered doubtful, and the amount in suit or judgment.

Thirteenthly. The value of the real and personal property held for the convenience of the association, specifying the amount of each.

Fourteenthly. The amount of real estate taken in payment of debts due to the association.

Fifteenthly. The amount of the undivided profits of the association.

Sixteenthly. The total amount of the liability to the association by the directors thereof collectively, specifying the gross amount of such liabilities as princi-

pal debtors, and the gross amount of indorsers or sureties.

The statement thus made shall forthwith be transmitted to the Comptroller of the Currency.

SEC. 46. *And be it further enacted*, That every association may take, reserve, receive, and charge on any loan or discount made, or upon any note, bill of exchange, or other evidence of debt, such rate of interest or discount as is for the time the established rate of interest for delay in the payment of money in the absence of contract between the parties, by the laws of the several States in which the associations are respectively located, and no more: *Provided, however*, That interest may be reserved or taken in advance at the time of making the loan or discount, according to the usual rules of banking; and the knowingly taking, reserving, or charging of a rate of interest greater than that allowed by this section shall be held and adjudged a forfeiture of the debt or demand on which the same is taken, reserved, or charged; but the purchase, discount, or sale of a bill of exchange drawn on actually existing values, and payable at another place than the place of such purchase, discount, or sale, at the current discount or premium, shall not be considered as taking, reserving, or charging interest.

SEC. 47. *And be it further enacted*, That the total liabilities of any person, or of any company or firm (including in the liabilities of a company or firm the liabilities of the several members thereof), to any association, including liabilities as acceptor of *bona fide* bills of exchange, payable out of the State where the association is located, shall at no time exceed one third; exclusive of liabilities as acceptor, one fifth; and exclusive of liabilities on such bills of exchange, one tenth part of the amount of the capital stock of such association actually paid in.

SEC. 48. *And be it further enacted*, That no association shall, at any time, pay out on loans or discounts, or in purchasing drafts or bills of exchange, or in payment of deposits, nor shall it in any other mode put in circulation the notes of any bank or banking association, which notes shall not at any such time be receivable, at par, on deposit, and in payment of debts by the association so paying out or circulating such notes; nor shall it knowingly pay out or put in circulation any notes issued by any bank or banking association which at the time of such paying out or putting in circulation is not redeeming its circulating notes in lawful money of the United States.

SEC. 49. *And be it further enacted*, That all transfer of the notes, bonds, bills of exchange, and other evidences of debt owing to any association, or of deposits to its credit; all assignments of mortgages, sureties on real estate, or of judgments or decrees in its favor; all deposits of money, bullion, or other valuable thing for its use, or for the use of any of its shareholders or creditors; and all payments of money to either, made after the commission of an act of insolvency, or in contemplation thereof, with a view to prevent the application of its assets in the manner prescribed by this act, or with a view to the preference of one creditor to another, except in payment of its circulating notes, shall be utterly null and void.

SEC. 50. *And be it further enacted*, That if the directors of any association shall knowingly violate, or knowingly permit any of the officers, agents, or servants of the association to violate, any of the provisions of this act, all the rights, privileges, and franchises of the association derived from this act shall be thereby forfeited; such violation shall, however, be determined and adjudged by a proper circuit, district, or territorial court of the United States, before the association shall be declared dissolved; and in case of such violation, every director who participated in or assented to the same shall be held liable in his personal and individual capacity for all damages which the association, its shareholders, or any other person shall have sustained in consequence of such violation.

SEC. 51. *And be it further enacted*, That the Comptroller of the Currency, with the approbation of the Secretary of the Treasury, as often as it shall be deem-

ed necessary or proper, shall appoint a suitable person or persons to make an examination of the affairs of every banking association, which person shall not be a director or other officer in any association whose affairs he shall be appointed to examine, and who shall have power to make a thorough examination into all the affairs of the association, and, in doing so, to examine any of the officers and agents thereof on oath, and shall make a full and detailed report of the condition of the association to the Comptroller; and the association shall not be subject to any other visitatorial powers than such as are authorized by this act, except such as are vested in the several courts of law and chancery. And every person appointed to make such examination shall receive for his services at the rate of five dollars for each day by him employed in such examination, and two dollars for every twenty-five miles he shall necessarily travel in the performance of his duty, which shall be paid by the association by him examined.

SEC. 52. *And be it further enacted*, That every president, director, cashier, teller, clerk, or agent of any association, who shall embezzle, abstract, or wilfully misapply any of the moneys, funds, or credits of the association, or shall, without authority from the directors, issue or put in circulation any of the notes of the association, or shall, without such authority, issue or put forth any certificate of deposit, draw any order or bill of exchange, make any acceptance, assign any note, bond, draft, bill of exchange, mortgage, judgment, or decree, or shall make any false entry in any book, report, or statement of the association, with intent, in either case, to injure or defraud any other company, body politic or corporate, or any individual person, or to deceive any officer or agent appointed to examine the affairs of any such association, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by imprisonment not less than five nor more than ten years.

SEC. 53. *And be it further enacted*, That the president and cashier of every such association shall cause to be kept at all times a full and correct list of the names and residences of all the shareholders in the association in the office where its business is transacted; and such list shall be subject to the inspection of all the shareholders and creditors of the association during business hours of each day in which business may be legally transacted; and a copy of such list, verified by the oath of such president or cashier, shall, at the beginning of every year, be transmitted to the Comptroller of the Currency, commencing on the first day of the first quarter after the organization of the association.

SEC. 54. *And be it further enacted*, That the Secretary of the Treasury is hereby authorized, whenever, in his judgment, the public interest will be promoted thereby, to employ any of such associations doing business under this act as depositories of the public moneys, except receipts from customs.

SEC. 55. *And be it further enacted*, That all suits and proceedings arising out of the provisions of this act, in which the United States or its officers or agents shall be parties, shall be conducted by the district attorneys of the several districts, under the direction and supervision of the Solicitor of the Treasury.

SEC. 56. *And be it further enacted*, That every person who shall mutilate, cut, deface, disfigure, or perforate with holes, or shall unite or cement together, or do any other thing to any bank bill, draft, note, or other evidence of debt issued by any such association, or shall cause or procure the same to be done, with intent to render such bank bill, draft, note, or other evidence of debt, unfit to be reissued by said association, shall upon conviction, forfeit fifty dollars to the association who shall be injured thereby, to be recovered by action in any court having jurisdiction.

SEC. 57. *And be it further enacted*, That if any person shall falsely make, forge, or counterfeit, or cause or procure to be made, forged, or counterfeited, or willfully aid or assist in falsely making, forging, or counterfeiting any note in imitation of, or purporting to be

in imitation of, the circulating notes issued under the provisions of this act, or shall pass, utter, or publish, or attempt to pass, utter, or publish any false, forged, or counterfeited note, purporting to be issued by any association doing a banking business under the provisions of this act, knowing the same to be falsely made, forged, or counterfeited, or shall falsely alter, or cause or procure to be falsely altered, or willingly aid or assist in falsely altering any such circulating notes issued as aforesaid, or shall pass, utter, or publish, or attempt to pass, utter, or publish as true, any falsely altered or spurious circulating note, issued or purporting to have been issued as aforesaid, knowing the same to be falsely altered or spurious, every such person shall be deemed and adjudged guilty of felony, and being thereof convicted by due course of law, shall be sentenced to be imprisoned and kept at hard labor for a period not less than five years nor more than fifteen years, and to be fined in a sum not exceeding one thousand dollars.

SEC. 58. *And be it further enacted*, That if any person shall make or engrave, or cause or procure to be made or engraved, or shall have in his custody or possession any engraved plate or block after the similitude of any plate from which any circulating notes issued as aforesaid shall have been printed, with intent to use such plate or block, or cause or suffer the same to be used in forging or counterfeiting any of the notes issued as aforesaid, or shall have in his custody or possession any blank note or notes engraved and printed after the similitude of any notes issued as aforesaid, with the intent to use such blanks, or cause or suffer the same to be used in forging or counterfeiting any of the notes issued as aforesaid, or shall have in his custody or possession any paper adapted to the making of such notes, and similar to the paper upon which any such notes shall have been issued, with intent to use such paper, or cause or suffer the same to be used in forging or counterfeiting any of the notes issued as aforesaid, every such person, being thereof convicted by due course of law, shall be sentenced to be imprisoned and kept at hard labor for a term not less than five nor more than fifteen years, and fined in a sum not exceeding one thousand dollars.

SEC. 59. *And be it further enacted*, That suits, actions, and proceedings by and against any association under this act may be had in any circuit, district, or territorial court of the United States held within the district in which such association may be established.

SEC. 60. *And be it further enacted*, That it shall be the duty of the Comptroller of the Currency to report annually to Congress, at the commencement of its session—

First. A summary of the state and condition of every association from whom reports have been received the preceding year, at the several dates to which such reports refer, with an abstract of the whole amount of banking capital returned by them, of the whole amount of their debts and liabilities, the amount of circulating notes outstanding, and the total amount of means and resources, specifying the amount of specie held by them at the times of their several returns, and such other information in relation to said associations as, in his judgment, may be useful.

Second. A statement of the associations whose business has been closed during the year, with the amount of their circulation redeemed, and the amount outstanding.

Third. To suggest any amendment to the laws relative to banking by which the system may be improved, and the security of the billholders and depositors may be increased.

Fourth. To report the names and compensation of the clerks employed by him, and the whole amount of the expenses of the banking department during the year; and such report shall be made by or before the first day of December in each year, and the usual number of copies for the use of the Senate and House, and one thousand copies for the use of the Department, shall be printed by the public printer, and in readiness for distribution on the first meeting of Congress.

SEC. 61. *And be it further enacted*, That any banking association or corporation lawfully in existence as a bank of circulation on the first day of January, anno Domini eighteen hundred and sixty-three, organized in any State, either under a special act of incorporation or a general banking law, may, at any time within— years after the passage of this act, become an association under the provisions of this act; that in such case the certificate of association provided for by this act shall be signed by the directors of such banking association or corporation, and in addition to the specifications required by this act, shall specify that such directors are authorized by the owners of two thirds of the capital stock of such banking association or corporation to make such certificate of association; and such certificate of association shall thereafter have the same effect, and the same proceedings shall be had thereon, as is provided for as to other associations organized under this act. And such association or corporation thereafter shall have the same powers and privileges, and shall be subject to the same duties, responsibilities, and rules, in all respects, as is [are] prescribed in this act for other associations organized under it, and shall be held and regarded as an association under this act.

SEC. 62. *And be it further enacted*, That any bank or banking association, authorized by any State law to engage in the business of banking, and duly organized under such State law at the time of the passage of this act, and which shall be the holder and owner of United States bonds to the amount of fifty per centum of its capital stock, may transfer and deliver to the Treasurer of the United States such bonds, or any part thereof, in the manner provided by this act; and upon making such transfer and delivery, such bank or banking association shall be entitled to receive from the Comptroller of the Currency, circulating notes, as herein provided, equal in amount to eighty per centum of the amount of the bonds so transferred and delivered.

SEC. 63. *And be it further enacted*, That upon the failure of any such State bank or banking association to redeem any of its circulating notes issued under the provisions of the preceding section, the Comptroller of the Currency shall, when satisfied that such default has been made, and within thirty days after notice of such default, proceed to declare the bonds transferred and delivered to the Treasurer forfeited to the United States, and the same shall thereupon be forfeited accordingly. And thereupon the circulating notes which have been issued by such bank or banking association shall be redeemed and paid at the Treasury of the United States, in the same manner as other circulating notes issued under the provisions of this act are redeemed and paid.

SEC. 64. *And be it further enacted*, That the bonds forfeited, as provided in the last preceding section, may be cancelled to an amount equal to the circulating notes redeemed and paid, or such bonds may be sold, under the direction of the Secretary of the Treasury, and after retaining out of the proceeds a sum sufficient to pay the whole amount of circulating notes, for the redemption of which such bonds are held, the surplus, if any remains, shall be paid to the bank or banking association from which such bonds were received.

SEC. 65. *And be it further enacted*, That Congress reserves the right, at any time, to amend, alter, or repeal this act.

APPROVED, February 25, 1863.

In the House, on the 9th of December, a bill to admit the State of West Virginia was considered. Mr. Conway, of Kansas, opposed the bill as unconstitutional. His reasons were thus briefly stated: "This bill is not so much for the admission of a new State as it is for the division of an old one. Nevertheless, I would have no objection to that, were it presented

under proper conditions. But the Constitution of the United States requires that no State shall be divided unless the assent of its Legislature be first obtained.

"I do not regard this proposed division of Virginia as having received that assent from the Legislature of the State which the Constitution requires. Here, however, is a question; and the question turns on whether the State of Virginia of which a Mr. Pierpont is Governor, is the lawful State or not. I do not believe that it is.

"This Pierpont State is an institution of very recent origin. It started into existence about two years ago, and is a spontaneous production of the soil. A number of individuals met at Wheeling, and, without any legal authority whatever, arranged a plan for a government. Several persons have since been holding themselves out as officials of this organization, including Pierpont, the Governor; but to what extent it executes the actual functions of a government does not satisfactorily appear.

"It is true, the President of the United States has recognized this as the actual State of Virginia; and acting upon his sanction, the Senate has admitted its senators into that body. But this is of no binding force upon us. On the contrary, if the President and Senate are wrong in so grave a matter, it is the more important that the House of Representatives should be right. The argument in favor of the validity of the Wheeling government is that the original State of Virginia fell into treason and became null and void, and caused a vacuum which could only be filled in this way. Now this is entirely unsatisfactory to me; for, in the first place, I do not see how a State can fall into treason; and secondly, if it should, what right Mr. Pierpont would have to assume the office of Governor over any other individual who might wish it. Where did the law come from which gave him his warrant? From a mob or a mass meeting? Neither mobs nor mass meetings make laws under our system. It seems to me that this presents a question of the utmost magnitude, as touching other matters than the one immediately under consideration. Eleven States have placed themselves in the same situation as Virginia; and in order to proceed toward them justly and properly, it is necessary to adopt correct legal principles at the outset. I have serious reason to believe that it is the intention of the President to encourage the formation of State organizations in all the seceded States. A policy seems about to be inaugurated, looking to an assumption of State powers by a few individuals, wherever a military or other encampment can be effected in any of the rebellious districts. The utter and flagrant unconstitutionality of this scheme—I may say, its radically revolutionary character—ought to expose it to the reprobation of every loyal citizen and every member of this House. It aims at an utter subversion of our constitutional system."

VOL. III.—20 A

Mr. Brown, of West Virginia, followed, for the purpose of showing the legitimacy of the Wheeling government: "Let us see how the fact was in Virginia, and we shall see how, upon the soundest principles of political philosophy, the government at Wheeling can be vindicated. The government at Richmond, and all the officers under the old government of Virginia, transferred themselves and attempted to transfer their people to a foreign organization. I need hardly detail the particulars of that act, as they must be fresh in the memory of every gentleman. They know that the functionaries at Richmond, immediately after they passed the ordinance of secession, which they were bound to submit to the people, did not wait for the people to act upon their so-called ordinance, but immediately entered into a treaty with the government at Montgomery, and the whole military and civil powers of the State were transferred, so far as they could transfer them, to that government.

"The loyal people of Virginia immediately, finding that their rulers, those to whom the legislative and executive powers had been intrusted, had betrayed them, and had ceased to be capable of exercising their prerogative, called, in all the loyal counties where they had permission to do so, mass meetings, which sent to Wheeling five hundred of as loyal and good men as live in any portion of the United States, not for immediate action, but for the purpose of consulting upon the emergency of the times.

"That convention merely organized and proposed a plan by which regular elections were to be held to fill the vacancies caused by the withdrawal of all disloyal representatives. A day was fixed and elections held, not within the boundaries of the proposed new State, but held throughout Virginia wherever loyal men chose to hold them, from one end of the commonwealth to the other, and the body thus elected assumed the legislative functions of the people."

Mr. Brown then proceeded to state that, in addition to the counties composing West Virginia, those of Fairfax and Alexandria were represented in this Legislature, so elected, but more than one half the counties of the original Virginia, were not at all represented, saying: "It is sufficient for me to say that they were invited to coöperate, and if they stayed away, it was their fault, not ours. They were invited to act, and, if they were loyal men, they ought to have acted with us. If they were disloyal, they should have no voice in the Legislature of Virginia, or in this body."

He then read the following act adopted by this Legislature:

1. *Be it enacted by the General Assembly*, That the consent of the Legislature of Virginia be, and the same is hereby given to the formation and erection of the State of West Virginia within the jurisdiction of this State, to include the counties of Hancock, Brooke, Ohio, Marshall, Wetzel, Marion, Monongalia, Preston, Taylor, Tyler, Pleasants, Ritchie, Doddridge, Harri-

son, Wood, Jackson, Wirt, Roane, Calhoun, Gilmer, Barbour, Tucker, Lewis, Braxton, Upshur, Randolph, Mason, Putnam, Kanawha, Clay, Nicholas, Cabell, Wayne, Boone, Logan, Wyoming, Mercer, McDowell, Webster, Pocahontas, Fayette, Raleigh, Greenbrier, Monroe, Pendleton, Hardy, Hampshire, and Morgan, according to the boundaries and under the provisions set forth in the constitution for the said State of West Virginia and the schedule thereto annexed, proposed by the convention which assembled at Wheeling on the 26th day of November, 1861.

2. *Be it further enacted*, That the consent of the Legislature of Virginia be, and the same is hereby given that the counties of Berkeley, Jefferson, and Frederick shall be included in and form part of the State of West Virginia, whenever the voters of said counties shall ratify and assent to said constitution, at an election held for the purpose at such time and under such regulations as the commissioners named in the said schedule may prescribe.

3. *Be it further enacted*, That this act shall be transmitted by the executive to the senators and representatives of this commonwealth in Congress, together with a certified original of the said constitution and schedule, and the said senators and representatives are hereby requested to use their endeavors to obtain the consent of Congress to the admission of the State of West Virginia into the Union.

4. This act shall be in force from and after its passage.

Mr. Colfax, of Indiana, urged that West Virginia was entitled to admission as a State, for the following reasons: "Two things are required by the Constitution of the United States for the admission of this new State: first, the assent of the Legislature of the State out of which it is to be formed; and secondly, the assent of Congress. The decision then turns to a great extent upon the question whether the Governor now acting as the Governor of Virginia, and residing at Wheeling, and the Legislature to which he communicates his messages, are really the Governor and Legislature of the loyal people of Virginia. I think they are, and that the history of events in Virginia will prove that fact.

"When, in February, 1861, the traitorous authorities of Virginia attempted to take that State out of the Union, the people of Western Virginia nobly resisted that conspiracy; and instead of joining with their fellow citizens in other parts of the State, they called together a convention elected by the loyalists of that region, and some other counties not included within the boundaries of the new State, and determined to stand, at every hazard and through every persecution, by the Union as it was. That convention, speaking the voice of all loyal Virginians, called all the members elect of the Legislature—chosen as they were on the day prescribed by their State constitution—who would take the oath of fealty to the Union, to meet at Wheeling; and thus a loyal Legislature, chosen in accordance with the constitution and laws of Virginia, assembled and was organized. This machinery of the State government had been abandoned by Governor Letcher and by the Legislature which participated with him in his treason. It having thus lapsed, the loyal people of Western Virginia took possession of this machinery, in

order that all the State might not be driven into this wicked rebellion.

"The next question is, has this loyal Legislature been recognized? There are facts enough in the action of the various branches of this Government to prove to us that they have, one and all, fully, and in various ways, recognized this as the only true and rightful government of Virginia."

Mr. Yeaman, of Kentucky, said: "Mr. Speaker, I do not desire to debate the question, but prefer to avail myself of the kindness of the gentleman from Indiana to ask him a question. I understand the theory on which Virginia is now represented in this House and in the other wing of the Capitol to be this: that the ordinance of secession was null and void, and did not take the State out of the Union; that the government at Wheeling is not merely the *de facto* government, but is the legal government of the people of the State of Virginia, as she heretofore existed in the Union, and that if those disloyal people east of the mountains do not choose to avail themselves of that government, it is their own fault. Now, the question is, if Virginia is already in the Union, and is represented on this floor, and in the other end of the capitol, what need is there for another act to let her in again? If it is intended to divide the State, what fact takes her case out of the constitutional prohibition that no State shall be divided, and no new State shall be erected in the jurisdiction of another State, without the consent of the Legislature of that State?"

Mr. Colfax replied: "I will answer the gentleman from Kentucky with great pleasure. This is not Virginia that is being admitted into the Union. It is West Virginia, a different State. It does not embrace the whole territorial limits of Virginia, and I am glad to say that it does not even embrace all the loyal people of Virginia. It embraces only forty-eight counties. But there are people left in the old State of Virginia, in the Accomac district, along the Baltimore and Ohio railroad, and fronting Washington City, that are loyal. The loyal people thus remaining are not many, to be sure, as far as we know now; but I trust that in time they will be enough, with the power of the Government aiding them, to leaven the whole mass. These people, loyal as they are, are left with old Virginia; but what we propose to admit by this bill is a different State. It is West Virginia."

Mr. Crittenden, of Kentucky, opposed the measure, saying: "Sir, can any argument make stronger the case than the mere statement of the question? The Constitution says you shall make no new State within the jurisdiction of another State without its consent. You are asked to make Western Virginia into a State. The Constitution requires that the State of which the new State has formed a part shall give her consent. Where is there room for doubt? If the Constitution

which we have sworn to support is to be the rule of our action, I ask you, in all calmness and all sobriety of feeling, is not the rule plain?

"There was a Virginia once by that simple name—a great name at one period of our history, and one of the original formers of the Constitution. She made it. She never was admitted into the Union; she formed it; she is a part of the original creation and being. Does she ask to be admitted? No. But a part of that State wishes now to be formed into a new State, and to be admitted into the Union as an independent State. Is not that so? Is there any ingenuity or any technicality which can change the face of the facts?

"You say that old Virginia no longer exists, and therefore can give no consent. Is there one man here who can be misled and blinded by such hypercriticism? We know the fact to be otherwise. We know that at this time old Virginia is in a state of rebellion, which we are endeavoring, by all the means in our power, to put an end to; a rebellion which once put an end to, will restore her to her constitutional place in the Union just as she existed before. You cannot admit a new State out of her boundaries without her consent, says the Constitution. That is the limit of your power, and that is enough to settle the question. You are appealed to and your power is invoked now to make this a new State. It seems to me that you cannot do it. I do not presume to argue with you on this question, because it seems to me that the very statement of it is an argument stronger than anything that I can urge. We have heard a great deal of imagination and of sympathy. That does not make constitutions. That does not sustain empires. It is not out of such stuff as that that the great, the majestic pillars have been reared that support the mighty fabric of this republic. This question is to return to you. Remember that! Look to the future. Is there a man here who does not contemplate the restoration of this Union, and the restoration of all these States to it? If Virginia were to-morrow to lay down the arms of her rebellion and to ask to be admitted into our councils, to be part of us, as she is by the Constitution to-day, to be actually what she is constitutionally, what could you say to her if you had created a new State out of her territory? What could you say to her? Do you believe that with the pride which ought to belong to one of the States of this Union, the State would agree to come back, not as she was, not with the boundaries she had, but cut up and divided and made into different States, to come back with circumscribed and diminished power as a State? Can you expect such a thing?"

Mr. Blair, of Virginia, now rose to say: "I take it, from the gentleman's argument, that he is not aware that the Legislature of Virginia has given its consent to the formation of this new State. It is probable, however, that he

does not recognize the government at Wheeling as the government of Virginia. If that Legislature be the Legislature of the State, and it has given its consent, then the whole people of Virginia have given their consent, and the constitutional requirement is fully met."

Mr. Crittenden, of Kentucky, in reply said: "This is one of the arguments to which I had a general allusion when I spoke of the strange arguments and fancies which had been employed upon this question. The gentleman's argument supposes that the government at Wheeling is the government of Virginia. Does he not know that the contrary is the fact? Do we not all, in point of fact, know the contrary? Do we not know that the Legislature of the old State of Virginia is sitting, for aught I know, at this very moment, in the city of Richmond, and has never discontinued its sessions there?"

"What does it amount to but that here is an application to make a new State at the instance of the parties desiring to be made a new State, and nobody else consenting, and nobody else left to consent to it."

Mr. Blair, of Virginia, further said: "I would remind the gentleman from Kentucky, that there were counties besides those embraced within the boundaries of the proposed new State, represented in the Legislature of Virginia, that gave this consent. It was not composed exclusively of counties included in the new State; and if it was the Legislature of the State, it spoke the voice of the people of the whole State, and the constitutional requirement is complied with."

Mr. Crittenden, in reply, said: "Is the party applying for admission consenting to the admission. That is the whole of it. If that is not clear in itself, nothing that I can add to it will make it clearer."

Mr. Edwards, of New Hampshire, in favor of the bill said: "It seems to me that the only question that exists is the single one of whether the State of Virginia, by its legislature, has consented to the formation of this new State within its boundaries? The Constitution of the United States clearly contemplates the formation of a new State out of the territory of an existing State. Its language presupposes that a case of this kind would be likely to occur in the progress of the country, and therefore provides for it. This is the clear and admitted interpretation of that provision. That being the case, the only question now relating to the question of power is whether the State of Virginia, through her legislature, has consented to the formation of this State. On that subject I do not intend to go through the history of the proceedings in Virginia, eastern or western, but shall rest my vote on these grounds: first, that there was no legal legislature or government in Virginia after that government put itself in the attitude of rebellion against the United States, and refused to conform to the constitutional provisions necessary

to constitute it a government, without which the legislature of a State can have no legal existence; secondly, that in the absence of any legal government in Virginia, a convention of the whole people of Virginia was called, which convention framed a government for the State, and that the legislative branch of the government thus established consented to this admission of Western Virginia as a State. If these premises are true, they certainly show the consent of Virginia, by her constituted authorities as created by that convention in the absence of any State government legally and constitutionally organized.

"But it is said that the whole State was not represented in the convention. To this it may be answered, it is enough if the whole people of the State were properly warned to be present. Notice, it is understood, was given to all. If all did not choose to be present and act, then the action of those who did assemble and act is just as legal and constitutional as if all had assembled and acted. If any notified were prevented from being present, it is not alleged that they were prevented by those who ask the creation of the new State and are to be comprised within its limits."

Mr. Dawes, of Massachusetts, in opposition to the bill, said: "I affirm that nobody has given his consent to the division of the State of Virginia and the erection of a new State, who does not reside in the new State itself. When it must be admitted that there is nobody in Virginia, in that part which is left, that has consented, I submit that this question assumes a different form from that which gentlemen give it. It seems to me that this bill does not comply with the spirit of the Constitution. If the remaining portions of Virginia are under duress, and while under duress this claim of consent is made, it seems to me that it is a mere mockery of the Constitution."

Mr. Brown, of Virginia, replied: "I do not understand the gentleman from Massachusetts. Do I understand him to say that nobody representing counties outside of the new State gave consent to the formation of the new State? Is that what the gentleman means to assert?"

Mr. Dawes answered: "There is no misunderstanding ourselves in this matter. It is true that a representative was picked up—I say it with all respect—in Fairfax, and that two or three gentlemen in other parts of the State were procured; but they protested that they did not pretend to represent the counties from which they hailed. So far as I know, I do not believe there is a single person representing any portion of that part of Virginia which is left, who ever consented to the erection and admission of this new State. Not one."

Mr. Stevens, of Pennsylvania, followed, saying: "Sir, it is but mockery, in my judgment, to tell me that the Legislature of Virginia has ever consented to this division. There are two hundred thousand, out of a million and a quarter of people, who have participated in this

proceeding. They have held a convention, and they have elected a legislature in pursuance of a decree of that convention. Before all this was done the State had a regular organization, a constitution under which that corporation acted. By a convention of a large majority of the people of that State, they changed their constitution and changed their relations to the Federal Government from that of one of its members to that of secession from it. Now, I need not be told that that is treason. I know it. And it is treason in all the individuals who participated in it. But so far as the State municipality or corporation was concerned, it was a valid act, and governed the State. Our Government does not act upon the State. The State, as a separate and distinct body, was the State of a majority of the people of Virginia, whether rebel or loyal, whether convicts or freemen. The majority of the people of Virginia was the State of Virginia, although individuals had committed treason.

"Now, to say that the legislature which called this seceding convention was not the legislature of Virginia, is asserting that the legislature chosen by a vast majority of the people of a State is not the legislature of that State. That is a doctrine which I can never assent to. I admit that the legislature were disloyal, but they were still the disloyal and traitorous Legislature of the State of Virginia; and the State, as a mere State, was bound by their acts. Not so individuals. They are responsible to the General Government, and are responsible whether the State decrees treason or not. That being the Legislature of Virginia, Governor Letcher, elected by a majority of the votes of the people, is the Governor of Virginia—a traitor in rebellion, but a traitorous Governor of a traitorous State. Now, then, how has that State ever given its consent to this division? A highly respectable but very small number of the citizens of Virginia—the people of West Virginia—assembled together, disapproved of the acts of the State of Virginia, and with the utmost self-complacency called themselves Virginia. Now, is it not ridiculous? Is not the very statement of the facts a ludicrous thing to look upon—although a very respectable gentleman, Governor Pierpont, was elected by them Governor of Virginia? He is a most excellent man, and I wish he were the Governor elected by the whole people of Virginia.

"The State of Virginia, therefore, has never given its consent to this separation of the State. I desire to see it, and according to my principles operating at the present time, I can vote for its admission without any compunction of conscience, but with some doubt about the policy of it. My principles are these: we know the fact that this and other States have declared that they are no longer members of this Union, and have made, not a mere insurrection, but have raised and organized an army and a power, which the governments of Europe

have recognized as a belligerent power. We ourselves, by what I consider a most unfortunate act, not well considered—declaring a blockade of their ports—have acknowledged them as a power. We cannot blockade our own ports. It is an absurdity. We blockade an enemy's ports. The very fact of declaring this blockade recognized them as a belligerent power, entitled to all the privileges and subject to all the rules of war, according to the law of nations.

"Now, then, sir, these rebellious States being a power, by the acknowledgment of European nations and of our own nation, subject and entitled to belligerent rights, they become subject to all the rules of war. I hold that the Constitution has no longer the least effect upon them. It is idle to tell me that the obligations of an instrument are binding on one party while they are repudiated by the other. It is one of the principles of law universal, and of justice as universal, that obligations, personal or national, must, in order to be binding, be mutual, and be equally acknowledged and admitted by all parties. Whenever that mutuality ceases to exist, it binds neither party. There is another principle just as universal; it is this: when parties become belligerent, in the technical sense of the word, the war between them abrogates all compacts, treaties, and constitutions which may have existed between them before the war commenced. If we go to war with England to-day, all our treaty stipulations are at an end, and none of them bind either of the parties. If peace is restored, it does not restore any of the obligations of either. There must be new treaties, new obligations entered into, before either of the parties is bound.

"Hence I hold that none of the States now in rebellion are entitled to the protection of the Constitution, and I am grieved when I hear those high in authority sometimes talking of the constitutional difficulties about enforcing measures against this belligerent power, and the next moment disregarding every vestige and semblance of the Constitution by acts which alone are arbitrary. I hope I do not differ with the executive in the views which I advocate. But I see the executive one day saying, "You shall not take the property of rebels to pay the debts which the rebels have brought upon the Northern States." Why? Because the Constitution is in the way. And the next day I see him appointing a military governor of Virginia, a military governor of Tennessee, and some other places. Where does he find anything in the Constitution to warrant that?

If he must look there alone for authority, then all these acts are flagrant usurpations, deserving the condemnation of the community. He must agree with me or else his acts are as absurd as they are unlawful: for I see him here and there ordering elections for members of Congress wherever he finds a little collection

of three or four consecutive plantations in the rebel States, in order that men may be sent in here to control the proceedings of this Congress, just as we sanctioned the election held by a few people at a little watering place at Fortress Monroe, by which we have here the very respectable and estimable member from that locality with us."

Mr. Ashley: "As I understand it, when the new State is admitted, Governor Pierpont is to move over into Alexandria and remain the Governor of the old State of Virginia; while the two senators who are now in the other end of the capitol, from Virginia, will, by the same proceeding, still remain the senators from that State."

Mr. Stevens: "Certainly. We shall have four senators, instead of two. I wish they would bring Mason back instead of one of them. But, sir, I understand that these proceedings all take place, not under any pretence of legal or constitutional right, but in virtue of the laws of war; and by the laws of nations these laws are just what we choose to make them, so that they are not inconsistent with humanity. I say, then, that we may admit West Virginia as a new State, not by virtue of any provision of the Constitution, but under our absolute power, which the laws of war give us in the circumstances in which we are placed. I shall vote for this bill upon that theory, and upon that alone; for I will not stultify myself by supposing that we have any warrant in the Constitution for this proceeding."

Mr. Segar, of Virginia, followed in opposition to the bill. He said: "I believe it is a fundamental maxim in our political system, dating as far back as the Declaration of Independence, that all government derives its authority from the consent of the governed; in other words, from that source of all legitimate power, the sovereign people. Now, sir, this bill is in the very teeth, in direct subversion of this cardinal principle of republican, popular government. This new State proposition has not received the sanction of the people upon whom the new government is to operate. Casting out of the calculation the whole rebel portion of the State, I propose to show that the consent of the northwestern people themselves has not been had. It is not founded on the consent even of the people whose government it is claimed to be, and who are to come within its rule. There has not been that general, close representation of the people included within the limits of the proposed new State, which is absolutely necessary to impart legality to all governments among us. A very large portion of the people that were never represented at all, neither in the Legislature which called the convention that ordered a vote to be taken on the new State question, nor in the Wheeling Legislature, nor in the convention that framed the constitution of the proposed new State.

"Let us look to the facts. I find that of

the forty-eight counties to compose the new State, eleven never had even the semblance of representation—had no part, nor lot, nor say in the establishment of the new government. The counties of Logan, Calhoun, Nicholas, McDowell, Mercer, Monroe, Greenbrier, Pocahontas, Webster, Morgan, and Pendleton, eleven in number, and containing a white population of 55,400, were never represented anywhere—neither in Legislature nor convention—in reference to the formation of a new State. They never cast a vote either for the election of a member of the Wheeling Legislature, or for the convention that submitted the question of the new State to the people, or for the convention that framed the constitution of the new State. Are these eleven counties, with these 55,400 white freemen, to be brought within the operation of a government which they had no part in making, and to which they have in no way consented?

"Again, sir; the three counties of Hampshire, Hardy, and Morgan, holding a population of 27,509, were never represented either in the House of Delegates, or either of the conventions. Is it to be supposed that the people of these counties cared aught for the new government, when they would send representatives neither to the Legislature nor to the conventions acting in the premises? Are they to be bound by this new government under such circumstances? Is it their government? Can it be said that they have given their consent to it through their Legislature, as the Constitution prescribes, when they were not represented there at all?

"Still another test of the absence of popular, constitutional consent: On comparing the ordinary vote of the counties composing the new State with the vote actually cast for the adoption of the new State constitution, it will be found that there was not only not a majority of the people, but a singularly small proportion of them, that voted for the new State and its new constitution. I submit a few particulars. In 1860, the county of Braxton cast a vote, in the Presidential election, of 754; in 1862, on the vote for the new constitution, only 83, just one ninth of the population; Barbour county, 1,269 in 1860, and 459 in 1862; Boone, 566 in 1860, to 78 in 1862; Hampshire, 1,915 in 1860, to 157 in 1862; Hardy, 1,479 in 1860, to 192 in 1862; Pendleton, 929 in 1860, to 116 in 1862; and this proportion runs through the vote generally. Is the new government to be inaugurated by such a vote as this?

"Yet, again: ten counties, to wit, Logan, Fayette, Wyoming, Mason, Mercer, Monroe, Webster, Morgan, McDowell, and Pocahontas, with a population of 50,000, did not cast a vote on the new State and constitution. Are these counties and their 50,000 population to be bound by a government about which they never cast a vote? Is it their government? Have they consented to it? Is this the way of carrying out the great and revered principle

of civil liberty, that taxation and representation are to go together?

"And I find the aggregate vote of the counties composing the new State to be, ordinarily, 48,000; while on the new State question, the entire vote was only 19,000! Does a government formed under such circumstances merit the name of government? I must say that my friend from Massachusetts (Mr. Dawes) was not far from the truth when he said that civil organizations, raised under such imperfect representation, were the merest mockery of the Constitution and of the elective franchise.

"But the most remarkable anomaly involved in the measure embraced in this bill, I have yet to state. There are three counties embraced within the limits of the new State, those of Greenbrier, Mercer, and Monroe, with a population of 30,000, which are far removed from the neighborhood of the northwest, and which are totally dissimilar in interest. They are on the line of the great Central Virginia railroad, running through the very heart of Virginia, and extending from the Ohio river to the seaports of Virginia. Their fortunes are indissolubly connected with the fortunes of Eastern and Central Virginia. You can no more separate their interests from those of tide-water and middle Virginia, than you can divide the interests of man and wife. Their market is in the cities of tide-water Virginia; that of the people of the new State is, by nature and by nature's God, in the city of Baltimore.

"Now, sir, upon none of the laws of the human constitution or the instincts of mortal nature, can the people of these three counties assimilate with their fellow-citizens of the northwest. Nor is there one man or woman, in my opinion, in these three counties, who desires to be connected with this West Virginia government."

Mr. Bingham, of Ohio, closed the debate. In opposition to the view of Mr. Stevens, he urged that the Legislature of West Virginia was the Legislature of the State, as follows: "We come now to the great point in discussion here. Who constitute the State of Virginia? I beg leave here to thank my friend from Massachusetts (Mr. Dawes) for suggesting what was essential to the line of my argument. The gentleman from Pennsylvania (Mr. Stevens) said the majority of the citizens of the United States within any State are the State. I agree to that, sir, subject to this limitation, that the majority act in subordination to the Federal Constitution, and to the rights of every citizen of the United States guaranteed thereby.

"But, sir, the majority of the people of any State are not the State when they organize treason against the Government, and conspiracy against the rights of its citizens. The people of a State have the right to local government. It is essential to their existence.

To-day, as the law stands in this country, and by the uniform construction of the powers of this Government, there is no law by which the midnight assassin of a mere private citizen can be brought to judicial trial, to conviction, and to judgment, within any State of this Union, save the law of the State. Your Federal tribunals under existing laws have no cognizance of the crime if committed within a State on a private citizen, and can do nothing in the punishment of it judicially.

"Now, sir, I beg leave to ask, can the minority of the people of the State, by the act of the majority committing treason, and taking up arms against the Federal Government, be stripped of their right within the State of protection, under State laws, in their homes and in their persons, even against the hand of the assassin? Am I to stand here to argue such a question as that with intelligent representatives? I say, that if the majority of the people of Virginia have turned rebels, as I believe they have, the State is in the loyal minority, and I am not alone in that opinion. I repeat, where the majority become rebels in arms, the minority are the State; that the minority, in that event, have a right to administer the laws, and maintain the authority of the State government, and to that end to elect a State Legislature and executive, by which they may call upon the Federal Government for protection 'against domestic violence,' according to the express guarantee of the Constitution. To deny this proposition is to say that when the majority in any State revolt against the laws, both State and Federal, and deny and violate all rights of the minority—that however numerous the minority may be, the State government can never be reorganized, nor the rights of the minority protected thereby, so long as a majority are in the revolt. In such an event, the majority, being rebels, must submit to the law of the minority, if enforced by the whole power of the National Government. That is no new idea, even. It is as old as the Constitution. I ask gentlemen to refer to that remarkable letter of the Federalist, addressed by Mr. Madison to the American people, wherein he discusses the fourth section of the fourth article of the Constitution of the United States, to wit:

The United States shall guarantee to every State in the Union a republican form of government, and shall protect each of them against invasion; and on application of the Legislature (or of the executive, when the Legislature cannot be convened), against domestic violence.

"As if that great man had been gifted with the vision of a seer, standing amidst his own native hills of Virginia, he foretold that it might come to pass that a majority of the people of a State might conspire together to sweep away the rights of the minority, and break down their privileges as citizens of the United States. In that paper Mr. Madison says:

Why may not illicit combinations, for purposes of violence, be formed as well by a majority of a State as by a majority of a county or a district of the same

State? And if the authority of the State ought, in the latter case, to protect the local magistracy, ought not the Federal authority, in the former, to support the State authority?

"That is precisely the question here to-day. That is precisely the condition of things in Virginia. The majority have become traitors. When the Representatives whom they had elected, who were required by the existing constitution of Virginia, as well as by the Federal Constitution, to take an oath to support the Constitution of the United States, went to Richmond, joined in this conspiracy, lifted up the hand of treason and rebellion against the Government, forswore themselves, and, in short, entered into a deliberate article of bargain and sale with Alexander H. Stephens, vice-president of the Southern confederacy, transferring the State of Virginia to that confederacy, they surrendered all right to represent any part of the people of Virginia; as a Legislature they utterly disqualified themselves to execute that trust. But, sir, what are we told? According to the logic of some gentlemen, it would seem that because the Legislature at Richmond turned traitors, because every man of them, except those few who escaped for their lives from that doomed city—as I trust it is a doomed city—joined in this red-handed rebellion, therefore the people could have no legislation. I appeal to the immortal words of the Declaration in refutation of that conclusion. 'The legislative powers, incapable of annihilation, have returned to the people at large for their exercise.' No matter, sir, who turns traitor, the legislative powers are incapable of annihilation. Now, what but this power remained to the people of Virginia? Their Governor and Legislature had turned traitor. You say that no special election could be had under the constitution of Virginia without a proclamation from the Governor, in vacation, or without a writ of election issued by the Legislature. What was to be done? I say that the power remained with the loyal people of that State to call a convention and create a provisional government, which they did. On the 23d day of May, 1861, the people of the State of Virginia, invited by an original convention of the people themselves, met at the time and place specified in the existing law of that commonwealth, and elected a Legislature.

"Is it said that a majority of those chosen on that day, including those chosen by the rebels, took the road to Richmond, and took the oath of treason against the Government of the country? Then I tell gentlemen who make that remark that these members elect never became part of the Legislature at all. The original convention of the people declared, in 1861, that only those who were elected, and were qualified, should be the Legislature of the State. I might go somewhat farther with this argument. I say that the ultimate power to decide that question, 'Which of these bodies is the Legislature of Virginia?' is in the Con-

gress of the United States. What is the lawful Legislature of the State? Although they were literally chosen under the amended constitution of Virginia (adopted in 1851), and the statute of the State, nevertheless I say that it is competent for Congress to say—and it is not only competent, but it is the imperative duty of Congress to say—that not a man of them who refused to take the oath prescribed by the Federal Constitution, and who took the oath of that treasonable conspiracy at Richmond, ever became a member of the Legislature of the State of Virginia. Who then are the Legislature of Virginia? Only those who qualify in pursuance of the requirements of the ordinance of the people themselves, by taking the oath prescribed by the Federal Constitution, and by the Virginia constitution. If those gentlemen had chosen to observe that form they might have constituted a majority of the Legislature; but they did not do it, either at Wheeling or at Richmond. They violated the constitution of their own State, as well as the Federal Constitution, when they went to Richmond and took the oath of treason.

“Now, who are the judges of this matter? I say it without the fear of contradiction, because it has been affirmed by every branch of this Government, legislative, executive, and judicial, more than once, that when the storm of revolution shakes the civil fabric of a State of the Union, the ultimate and final arbiter to determine who constitute the legislative and executive government of that State, and hold its great trust of sovereignty, is the Congress of the United States, or the President acting by authority of an act of Congress. The great case of Luther and Borden must be fresh in the mind of every Representative of the people, and that was the very question which was then and there decided. What did the court decide in that case? Luther brought his action for trespass to his domicile in the circuit court of the United States for the district of Rhode Island. He charged the defendant in that case with having broken open his residence, which every man knows is, under our laws, his castle. He charged in his declaration that defendant not only broke into and entered his house, but went through all his rooms, from garret to cellar, in search of his person; that he had violated, if you please, his sacred right of domicile.

“Now, I may be pardoned for reminding gentlemen here that there is no right known to the citizen, under the American law, or under the law of any country beneath the sun where the principles of the common law obtain, which is looked upon as more sacred than the right of domicile. You know that by the common law it is held so sacred that he who invades it without the leave of the owner, and especially menacingly, is not entitled to the benefit of the rule that the party whom he assails must flee to the wall, but he may suffer instant death, and the owner is justified before the law, be-

cause his hearthstone is not to be violated by a malicious intruder against his protest and against his consent. There was a strong case against defendant on that record, if he had not justified the act. But he did justify—and how? Rhode Island had been in revolution. Two opposing governments had been in operation. Who was to decide which was the lawful government? They first said that the courts were to decide. They asked the courts of Rhode Island to sit in judgment upon the question whether the government under which they held their commission was a government at all. The Chief Justice of the United States, with bitter irony and sarcasm, remarked that he did not ‘see how the question could be tried and decided in a State court;’ for that, whenever they arrived at the conclusion that the government to which they owed their existence was no government at all, the court itself ceased to be a court, and could not pronounce the judgment. The breath of life would go out of its body instantly. This action, however, for trespass, was instituted in the United States Circuit Court for the district of Rhode Island.

“The defendants, by their plea, justified the trespass on the ground that plaintiff was engaged in insurrection, together with others, against the State; that the State was, by competent authority, declared under martial law; and that defendants, being in the military service of the State, by command of their superior officer, broke open and entered plaintiff’s house. The plaintiff denied the authority, and replied it was defendants’ own proper wrong. In other words, was the government against which the plaintiff was in insurrection the government of Rhode Island?

“The case finally came up to the Supreme Court of the United States. The Chief Justice (Taney), in delivering his opinion, said that it was a political question, and that the decision of it by the Federal executive, under the authority of Congress, was binding on the judiciary. He also said the power to decide the question which of two governments in a State is the true government is in Congress.

“That decision amounts to just this, and that is what gives importance to it in the discussion of this question: if the Congress of the United States solemnly decide, as they are the ultimate arbiter of this political question, that the people of Western Virginia have no right to maintain the government which they have established, and under which they have made this new constitution, and apply here for admission, they thereby decide that it is void. All that remains is for the executive to follow your example, and leave that people to their fate.

“What is the effect of such a decision by Congress and the executive? It is to bind your own judiciary to hold the legislation of that people for the protection of their lives and property void. You bind the judiciary of the State itself. You bind everybody who is appointed

to execute the laws within that State. While you pretend to be for the Constitution as it is, you say to this people, that inasmuch as they are in a minority, and inasmuch as the majority have taken up arms against the Government of the United States and of the State of Virginia, they are without the protection of local State law; that their representatives duly elected are not and cannot be called the Legislature of Virginia.

"I think I have said enough to satisfy the gentlemen who have done me the kindness to attend to what I have said, that the Legislature which assembled at Wheeling, Virginia, was the Legislature of the State of Virginia; and that it remains with you alone to determine whether it shall be or not. If you affirm that it is, there is no appeal from your decision. I am ready, for one, to affirm it, and upon the distinct ground that I do recognize, in the language of Mr. Madison, even the rights of a minority in a revolted State to be protected, under the Federal Constitution, both by Federal law and by State law. I hold, sir, that the Legislature assembled at Wheeling, then, is the legal Legislature of the State; that it had power to assent to this division of the State of Virginia; and that it is wholly immaterial to me whether a majority of the counties of that State refused, by reason of their treason, to coöperate in the election of delegates and senators to that Legislature. On the subject of granting the admission of the proposed State, to which that body has assented, it is enough for me to know there is a sufficient number of loyal men within the limits of the proposed State to maintain the machinery of a State government, and entitle them to Federal representation. That is the only rule heretofore recognized by Congress in the matter of admitting new States duly organized."

The vote was then taken as follows:

YEAS—Messrs. Aldrich, Arnold, Babbitt, Baker, Baxter, Beaman, Bingham, Jacob B. Blair, Samuel S. Blair, Blake, William G. Brown, Buffinton, Burnham, Campbell, Casey, Chamberlain, Clark, Clements, Colfax, Frederick A. Conkling, Covode, Cutler, Davis, Duell, Dunn, Edgerton, Edwards, Eliot, Ely, Fenton, Samuel C. Fessenden, Thomas A. D. Fessenden, Franchot, Frank, Goodwin, Gurley, Haight, Hale, Harrison, Hickman, Hooper, Horton, Hutchins, Julian, Kelley, Francis W. Kellogg, William Kellogg, Killinger, Lansing, Lehman, Loomis, Lovejoy, Low, McKnight, McPherson, Maynard, Mitchell, Moorhead, Anson P. Morrill, Justin S. Morrill, Nixon, Noell, Olin, Patton, Timothy G. Phelps, Pike, Pomeroy, Porter, Potter, John H. Rice, Riddle, Edward H. Rollins, Sargeant, Sedgwick, Shanks, Sheffield, Shellabarger, Sherman, Sloan, Spaulding, Stevens, Stratton, Trimble, Trowbridge, Van Horn, Van Valkenburgh, Van Wyck, Verree, Walker, Wall, Washburne, Whaley, Albert S. White, Wilson, Windom, and Worcester—96.

NAYS—Messrs. William J. Allen, Alley, Ancona, Ashley, Baily, Biddle, Cobb, Roscoe Conkling, Conway, Cox, Cravens, Crisfield, Crittenden, Delano, Delaplaine, Diven, Dunlap, Gooch, Granger, Grider, Hall, Harding, Holman, Johnson, Kerrigan, Knapp, Law, Mallory, Menzies, Morris, Noble, Norton, Odell, Pendleton, Price, Alexander H. Rice, Richardson, Robinson, James S. Rollins, Segar, Shiel, Smith, John B. Steele, William G. Steele, Stiles, Benjamin F. Thomas,

Francis Thomas, Train, Vallandigham, Voorhees, Ward, Chilton A. White, Wickliffe, Wright, and Yeaman—55.

The bill was sent to the Senate, and without debate passed. For the bill, *see* ANNUAL CYCLOPÆDIA, 1862, VIRGINIA, WEST.

In the Senate on the 29th of January, the bill giving aid to the State of Missouri for the purpose of securing the abolition of slavery in said State was considered. Mr. Henderson, of Missouri, proposed to amend the second section so that it should read as follows:

That in case the law or act of emancipation to be adopted by said State shall provide for the full and perfect manumission of all the slaves therein on or before the 4th day of July, A. D. 1865, and the future exclusion of the system of slavery from the State forever thereafter, the President shall cause bonds to the amount of \$20,000,000 to be prepared and delivered as aforesaid immediately on the passage of said act. But if it should provide for the termination of slavery at a date subsequent to that last named, then said bonds, to an amount not exceeding \$10,000,000 in the aggregate, shall be delivered in four equal instalments, dating from the passage of such act to the time when slavery shall cease under its provisions.

He thus explained his object in the proposed amendment: "If the act passed by the Legislature shall provide for the exclusion of slavery on or before the 4th of July, 1865, I propose to grant \$20,000,000 for that purpose; and if it shall take place at a subsequent date, or if the Legislature, in other words, shall adopt a gradual system of emancipation, I propose that \$10,000,000 shall be granted; and I do it not because I desire to reduce the amount, but because I am satisfied that senators will not vote for \$20,000,000 under a gradual system of emancipation. I am satisfied that it cannot be carried."

Mr. Sherman, of Ohio, said: "To carry out the pledge we made a year ago, I am willing to vote \$10,000,000 in the bonds of the United States to the State of Missouri. I would prefer a system of gradual emancipation to a system of immediate emancipation. I will not vote for granting any more money. I have made up my mind on the subject. I think \$10,000,000 is as much as we ought to allow the State of Missouri under the circumstances. Many of her people are disloyal, and they ought not to receive anything."

Mr. Wilson, of Massachusetts, was opposed to the amendments. "With these provisions in the amendment, I shall not vote for it. I shall not give my vote to aid in permitting the State of Missouri to hold men in bondage thirteen years longer. I desire to see that State free, and free now; free within a very few years at least."

Mr. Fessenden, of Maine, doubted the constitutionality of the measure—saying: "The recommendation of the President, as I understood it, and I believe I commented on it at the time, and the resolution we passed, was that the United States ought to aid any State that wished to abolish slavery; not that Con-

gress ought to do it; and the question was started then whether Congress, without a change of the Constitution, or some special authority given, would have a right to appropriate from the Treasury any amount of money for this purpose. I presume it was with a view to that constitutional objection that the resolution was worded as it was, and that the recommendation came from the President as it did, an expression that the United States ought to assist the States in paying for the slaves that might be emancipated, if they chose to adopt such a policy. What may be the true construction of it, I do not undertake now to say. If this measure can be defended, in my judgment it must be defended as a matter that in this time of war would be advisable, necessary, perhaps, with a view to the more speedy and effectual suppression of the rebellion. In that point of view, we may have authority to pass it."

Mr. Trumbull, of Illinois, objected to the views of the preceding senator: "The senator from Maine says he did not mean to premise that there was constitutional authority to give this aid, but all he meant was that the United States ought to do it, and that the Constitution might be changed for that purpose if it was necessary. Sir, how can you change it? What is the mode provided for changing the Constitution of the United States? Is there any mode provided by which, during this rebellion, it may be changed? Has the United States any authority in enough of the States of this Union to obtain the expression of their opinion as to whether they would consent to a change or not? Did the senator from Maine mean to say by this resolution to the people of the border States: "Congress ought to furnish you pecuniary aid, but there is no power under the Constitution to do it, and we will never do it until the Constitution is changed? Why, sir, that is not the way this resolution reads, nor is it the legitimate and proper meaning of the resolution.

"Then I repeat that in my judgment there is an obligation upon Congress to stand by the pledge it has given; and further, I believe it to be politic. I regard it as of the highest importance, as has been eloquently said by the senator from Missouri, that we should now take the steps to make Missouri a free State."

Mr. Foster, of Connecticut, said: "If we would abolish slavery within the State of Missouri, either that State or the United States, or both together, must provide the means which, according to the Constitution of the State of Missouri, shall be an adequate compensation, an equivalent to the owners of slaves who, under the law, are to be set free. That is the problem which is to be worked out, or we accomplish nothing.

"Now, sir, we may say, and perhaps say with great propriety, that the Congress of the United States ought not to be called upon to pay one dollar; that this is a State affair; that

it concerns the prosperity and happiness of a State; that this is a domestic institution; and that the State of Missouri ought herself to provide the means by which to get rid of the institution. I am by no means prepared to say that this is not so; that it would not be just and proper for Missouri to do so; but the question is, does any reasonable man suppose she will do it? The bill assumes, everybody assumes, that she will not. Some assume that she cannot. It may not be an assumption, under the circumstances, to say that she cannot; but all assume that she will not. There being, then, no other known mode of adding to what the State may do, the Congress of the United States is called upon, if the object is to be accomplished, to furnish the amount which the State will not furnish. Otherwise the object is unaccomplished; the State of Missouri remains as she is, a slave State.

"Sir, if any senator is prepared to say that he will give \$10,000,000, and if the State will go on with the \$10,000,000 and abolish slavery, he will be glad of it, but if she will not, he will consent to stand by and see Missouri a slave State for all time, so far as we know, on him be the responsibility; I am not one of that class. Impoverished as the treasury is, impaired as our credit is, loud as are the calls for all the money we can raise in other quarters, I am still prepared to raise this sum from \$10,000,000 up to \$20,000,000, because I believe the accomplishment of the object is of such vast importance that it will be worth all it will then cost."

Mr. Sherman, of Ohio, thus explained the point of difficulty in the question: "The real difficulty in this measure, if I understand it correctly, is that certain senators insist that emancipation in Missouri shall be immediate, instead of gradual. There is no practical difficulty in providing for the gradual abolishment of slavery in Missouri, for the sum of \$10,000,000, in strict conformity to the laws of Missouri, and to the entire satisfaction of two thirds of the Legislature of that State, if senators will but waive the idea on which they so much insist, that slavery shall be immediately abolished. This proposition will not be disputed. From a conversation with the senator from Missouri, I can state as his opinion that there is no difficulty in framing a law to provide for the gradual emancipation of slaves in Missouri, in which the Legislature of Missouri will pledge the faith of the State—and that is all they can do—to emancipate all slaves within twenty-three years, for the sum of \$10,000,000.

"We have, by a resolution passed a year ago, pledged the faith of the United States—the faith of Congress, if you please—that we will aid pecuniarily the State of Missouri in the gradual abolishment of slavery. We have not agreed to pay any definite sums; we have not agreed even to coöperate in the immediate emancipation of slaves in Missouri. All we have agreed to do is, by pecuniary aid to co-

operate with the State of Missouri or with any other State in promoting the gradual abolishment of slavery. The immediate emancipation of the slaves of Missouri is a matter of comparatively little moment. Whether those who are now slaves there, held as such under the local laws, shall continue to serve as slaves for life, is an important matter to them; but to the fate of this nation it is of comparatively little importance. I believe, however, that the condition of slavery as a fixed and permanent relation in Missouri tends to keep up civil war in that State, and that the very moment she enters upon the path of gradual emancipation all her sympathies and all her interests will be opposed to the present rebellion, and in favor of the preservation of the Union."

Mr. Bayard, of Delaware, in opposition to the measure, said: "I would not throw a straw in the road of the people of Missouri, if it is the will of the people of that State to abolish slavery within its limits either now or at a future day; but I am unable to find in the Constitution of the United States any authority for Congress interfering with that institution, or making an appropriation to aid any State for the purpose of emancipation. I shall, therefore, vote against any bill in any form whatever which proposes an appropriation of the money of the Federal Government for the purpose of securing the emancipation of the slaves in a State.

"As regards my own State, all that I claim for her is the right which in past time has been accorded to the other States of this Union that were slaveholding States when the Constitution was adopted.

"We ask not from the Federal Government a dollar in relation to the question; but we ask that it shall not violate the Constitution of the United States by attempting to interfere with the domestic institutions of the State, either directly or indirectly. Whenever the people of Delaware determine that their interest, or their sympathy, if you please, or their moral sense, renders it proper that they should put an end to the institution within the State, they will do so; and let me say it is not the value of the slave property in the State that determines that question in their judgment; nor is there really any slaveholding interest in the State that has any power whatever to sway its political destinies; but it is other considerations that affect them. What they claim is, that they are the best judges of the time and mode in which they shall act on the subject, and that the same right belongs to them that has been accorded to other States—non-interference on the part of the Federal Government with the action of the States in relation to their own peculiar institutions."

Mr. Howard, of Michigan, regarded the measure as constitutional. He thus expressed his views: "I like the amendment reported from the Committee on the Judiciary, and shall vote for it with pleasure. The scheme of that

amendment is to authorize the Government of the United States to issue \$20,000,000 in the bonds of the United States, to be delivered over to the State of Missouri to aid her in bringing about the emancipation of her slaves. The State authorities are authorized by this bill—invited, perhaps, would be the more proper term—to take steps for the emancipation of the slaves in that State. Naturally, the first question which arises is, whether it is authorized by the Constitution of the United States; and upon this question, I understand the learned senator from Delaware (Mr. Bayard) to express it as his opinion that Congress is not clothed with competent authority under the Constitution to pass this bill, for the reason that Congress, as he insists, has no authority whatever to interfere or intermeddle with the so-called institution of slavery in any of the States.

"Mr. President, have we a right to use all the means which are reasonable, necessary, and proper to put an end to the civil war now raging in the State of Missouri? Have we a right to suppress the insurrection in that State? Have we a right to bring about a perfect quietude and pacification of the people within the limits of that State, now agitated by the rebellion? Have we a right to take means and to use instruments, not in themselves absurd or unreasonable, to insure this most desirable result? It appears to me that there cannot be any doubt upon this point. Congress certainly has the power to suppress insurrection: it has a right to protect, secure, and perpetuate the public tranquillity, and, to this end, to use the means which are natural and reasonable, adapted to the end. I discover nothing in the Constitution itself against it."

Mr. Wilson, of Massachusetts, advocated immediate emancipation for the following reasons: "I will state the reason especially why I wish this emancipation policy in this State closed now. I believe that the cause of this country is to triumph; that this foul slaveholders' rebellion, brought upon this country without any cause whatever, will be put down; but I do not believe when it goes down that the dark spirit that made this rebellion will go down with it. I expect to see these chambers filled again—not by the leading traitors who plotted treason here, who plunged this country into the fire and blood of revolution—but I do expect to see many of their disciples here who have followed them, who have sustained this rebellion; and I expect to see in these chambers and in this Government again—not permanently, but temporarily—a large class of men who have been the obedient followers of the men who are now in revolt, or who sympathize more or less to-day with rebels in arms.

"Here is a proposition to extend this time from 1876 to 1885, twenty-two years. We are to give \$10,000,000 of our money, and they are to have their slaves for twenty-two years. When twenty years have passed away, they

will have had twenty-two or twenty-three millions of money, and will have all their slaves still. Then suppose they choose to continue slavery. How are we to enforce it against the State? We have its plighted faith, but we have before had plighted faith in this country and that faith violated. If we allow the time to go to 1876, we agree to give \$10,000,000, and they have their slaves and work their slaves for thirteen years. They will have the money; they will have its accumulated interest; and still what security have we except their pledge?

"Sir, I see the importance of making Missouri a free State now, and I shall vote for a practical measure for that purpose. I believe emancipation in Missouri to be of transcendent importance—an importance that I can hardly measure—and I want its benefits now. I want certainty; I want to know that the thing is to be accomplished when I vote to tax the toiling men of my State to free the State of Missouri."

Mr. Kennedy, of Maryland, was opposed to the bill, and thus expressed his views: "I merely desire to say, without going into any argument, that I am against this whole system of legislation for the emancipation of slaves in the border Slave States. I will only say now that while I am not disposed to oppose any local proposition coming from the State of Missouri, and while I might, from feelings of kindness, yield my own views on such a question, I am not prepared to commit myself to a policy which acknowledges that the General Government has any power under the Constitution of the United States to appropriate money for the emancipation of slaves. I have determined, sir, not to connect myself with a record of this sort. I do not mean that it shall be said hereafter, that I, as a representative of a State lying in the pathway of the great North to the capital, have interposed any objection to the prosecution of their views so far as the suppression of rebellion is concerned; but I must be allowed to say that in the course of the last two years, in carrying out the purpose of ending the war, as it is said—of which certainly no man is more desirous than I am—I have seen all the sovereign rights of my State utterly disregarded. I do not mean now to challenge a controversy as to the right of the majority to exercise any power in their hands to put down and to suppress rebellion. I only beg, as a representative of that State, holding the rights of the State sacred and above all usurpation of authority, if I may be pardoned for using a word so harsh, that while we take that ground, I am not to commit myself in any way whatever to a policy that is hereafter to rise in judgment against you; I will not indorse that which I believe to be subversive of law; and pardon me, senators, when I say that I think it is not a means of restoring the Union."

The bill, with several amendments proposed, was referred to the Committee on the Judiciary, who reported it back with amendments,

which were considered on the 7th of February.

Mr. Wilson, of Missouri, thus explained the features of the bill: "In my opinion the provisions of this act cannot be complied with without an alteration in the constitution of the State of Missouri; and if that alteration is sought to be made by constitutional means, by the ordinary provision incorporated into our constitution, which requires one Legislature to propose amendments to our constitution, to be ratified by the next succeeding Legislature, twelve months do not give the necessary time. It is manifest to me that the Legislature of Missouri in its legislative capacity has not the power to comply with all the provisions of this act without an amendment to or a violation of the constitution of that State; and, for that reason, I desire that this time may be extended, so that these alterations in the constitution, if desired by the people of Missouri, may be made according to our constitution."

"This bill, among other things, requires that this act, to be passed by the Legislature of Missouri, shall forever prohibit slavery in that State. That is a power that is not conferred on the General Assembly of the State of Missouri, and it will require an alteration of and an amendment to the constitution of that State before it can be complied with."

"Again, sir, this act requires that the people of Missouri shall forever surrender a constitutional right which is exercised by every State of this Union; that is to say, they are to enter into a compact with the United States of America that slavery shall be forever prohibited in that State; thereby relinquishing, in the form of a compact, a right which is reserved, as I understand it, to every State in this Union. Certainly an ordinary legislature, exercising only legislative powers, cannot surrender a constitutional power which is enjoyed by the people of that State. Many of the States of this Union have abolished slavery within their limits; but I am not aware that a single State of the Union has been called upon by the United States to enter into a compact that they will never admit slavery in the future. I grant that the people of the State may so alter their constitution and adopt a provision prohibiting slavery within that State; but that they will bind themselves to any other Government to surrender a constitutional privilege forever, I do not believe the people of Missouri will consent to."

Mr. Davis, of Kentucky, in opposition, said: "Mr. President, it is perfectly apparent that this measure is to pass. Notwithstanding that foregone conclusion, I will occupy the attention of the Senate a few minutes in opposition to it. I have been unable to find any authority by which Congress can appropriate money for this object. When the subject was up last, many gentlemen assumed that Congress had pledged itself, by voting for the resolution which the President of the United States recommended in

connection with this subject, to sustain the measure. I was one of those who voted for that resolution, and I now intend to show why I was not pledged to the support of this measure by having voted for the resolution which the President recommended to the adoption of Congress. Here is his accompanying message, and the resolution which he recommended to Congress is in these words:

Resolved, That the United States ought to coöperate with any State which may adopt gradual abolishment of slavery, giving to such State pecuniary aid to be used by such State in its discretion, to compensate for the inconvenience, public and private, produced by such change of system.

"Whose measure was this? Who conceived it? Who endeavored to enforce it upon the favorable consideration of Congress? It was the President. On this subject he asked for a conference of the members of both Houses of Congress from the border Slave States, and we held that conference with him, and he explained to us the nature of his proposition. It was suggested to him in the course of that conference, by members from some of the States, that it was not competent for Congress to pass such a measure, that it had no constitutional power to pass it. He said, in reply: 'I do not offer it as a practical measure. I commend it to your consideration as a sentiment.' To use his own phrase, which I heard, and which some twenty-five other gentlemen heard: 'I do not assume that Congress has the power to pass such a measure, but the Constitution could be amended to give it. I do not offer it to you to be sustained as a practical measure; I commend it to your consideration as a proposition which I desire you to lay before the people of your respective States.' It was in that sense, and in that sense alone, that the President of the United States commended this sentiment to the favorable consideration of the members of Congress who represented the border Slave States. He still adheres to that interpretation of the measure, and he has given the most satisfactory and conclusive evidence upon that point that it was possible for him to give; for at the commencement of the present session, in his annual message to Congress, he recommends an amendment of the Constitution of the United States, which shall confer upon Congress the power to pass this measure. I voted for the resolution, understanding it as the President afterward explained it, in the conference to which I have referred.

"I have always been of the opinion, and I am yet, that when any State of this Union spontaneously, of her own free will, determines to emancipate her slaves, then, in the form of colonizing these slaves, the United States ought to give that State aid, and ought to coöperate in every legitimate manner to transport the negroes that are thus liberated from the State and from the United States.

"But, sir, I gave my consent to this sentiment, this principle of giving assistance to the

States that would emancipate their slaves, just as the President of the United States did when he asked Congress to take the steps to amend the Constitution to give them that power. Until such an amendment as that is made, the power does not exist in the instrument. What, sir, said the President in his conference with the border State members of Congress? He said this, in the most distinct terms—he did all the talking himself, mostly: 'I concede and recognize fully the property of a slave owner in his slaves. If I earn a thousand dollars and invest it in land, and another man earns a thousand dollars and invests it in a negro man, he has as indefeasible a right to his slave as I have to my land.' Well now, sir, that is the only sanction of property that we have ever claimed in relation to slaves; and we contend that we have precisely the same constitutional and legal right to slave property that we have to land or horses or any other property. No man has refuted that proposition, and no man can do it—not even the learned and able lawyer and former judge from Illinois."

Mr. Ten Eyck, of New Jersey, expressed his opinion in these words: "I am willing, without taking up more of the time of the Senate, to say that I am in favor of giving aid to all the States that shall ask for it to compensate them in establishing a system of gradual emancipation; but I do not see my way clear in undertaking to pay for all the slaves in Missouri, and for every slave within the several border Slave States, and for every slave in any other State that may be restored to this Union either by force of arms or by the return of its citizens to their former allegiance. It cannot be done; the Treasury cannot stand it. The country cannot sustain the burden. We may assist, we may do a part, to gain the end in view; we cannot do it all. With these explanations and these remarks, I shall vote in favor of the bill, if it shall be so amended as to appropriate a sum of money for gradual abolition; but against it, if it involves the principle of immediate abolition and the payment of the full value of every slave so emancipated."

Mr. Powell, of Kentucky, urged that the question should be submitted to a vote of the people, thus: "Sir, from what is known to the country, and from what we have heard to-day from the senator from Missouri and others, we know that at the present time the people of Missouri cannot, unless this question should be committed to them directly, have an opportunity of expressing the popular will upon this great measure. It is well known that a minority, and a small minority, of the people of the State of Missouri alone elected the Legislature that is now convened in the capital of that State. It is known, too, that the military interfered in some instances with the elections in that State. It is believed by a majority of the members of Congress from that State, that if there had been no military interference, there would not have been an emancipation Legisla-

ture in Missouri. With all these facts before us, is it not just and proper, before we pass a law giving \$20,000,000 of the public money to the State of Missouri for the purpose of emancipating the slaves in that State, that it should be accompanied by some condition to take the sense of the people of that State as to whether they desired this institution to be abolished or not?"

Mr. Sumner, of Massachusetts, urged that the emancipation should be made immediate, saying: "Mr. President, I assume that senators are in earnest in their desire to do something to put down this rebellion. Our country, I know, is rich in its resources. It can vote millions of money for almost any purpose that it sees fit to vote them for; but still I doubt if the senator from Missouri would now come before Congress and ask for an appropriation of millions of money, unless he thought, through that appropriation, he could do something in order to bring this rebellion to an end. I assume that that is his object. I assume that that is the object of senators in voting for this bill. Is there any object that will justify, at this moment, a vote for the bill? Is there any senator here who will say that he will toss ten or twenty millions of money to any State in this Union, unless he thinks that by doing it he can help to put an end to this rebellion? I assume that there can be no doubt on that question. We must all be agreed on that point. Therefore do I say that, in voting on the proposition now before you, you are to consider simply this question: How shall I best put an end to the rebellion? If that can be best accomplished through a proposition of immediate emancipation, then must you vote for immediate emancipation. If that can be best accomplished by allowing the subject to draggle along through ten years, through twenty years, with the possibility of reaction, with the certainty that the discussion and the controversy will continue all that time, then senators will vote that the question shall be allowed to draggle along ten or twenty years, or indefinitely, if they see fit. Sir, I am against any such thing. I wish this bill to be effective for the object which is proposed; and as I do not believe it can be really effective, except in one way, I shall vote for that amendment which shall give to it that effectiveness."

Mr. Davis, of Kentucky, in reply, said: "Mr. President, we have at length an avowal from the learned and able senator from Massachusetts that this measure of emancipation is under the war power. What is the war power of this Government, and where is it lodged? I take issue with him upon his proposition that one iota of the war power is vested in the President. The whole and entire war power of this Government, as it is organized by the Constitution, is vested in Congress, and in Congress alone. I do not mean the power to manage and control armies; but I mean the power to declare war, to raise men and money

to carry on that war, whether it is a war against a foreign power or to put down insurrection. The power to adopt every measure, every line of policy upon which and by which the war is to be prosecuted, centres in Congress, and in Congress alone; and the President has no more right to wield any portion of this war power, or adopt measures of policy for the mode of conducting the war, than any colonel in the army.

"Some gentlemen adopt the policy that this insurrection is to be put down by proclamations. I thought we had a surfeit of such nonsense. It is not by proclamations, by words, by high-sounding manifestoes, that this rebellion is to be put down. It is to be put down, as was said by the senator from Illinois (Mr. Richardson) by the power of the bayonet and the cannon; and you must have that power in the hands of a willing, a united, and an enthusiastic people. When you divide the people and carry questions of policy into the camps, and the soldiers take sides for and against a particular line of policy, you destroy the vigor, the unity, and the efficiency of your arms; and as that honorable senator invoked gentlemen, so I say the only way now to regain that unity is to come back to the constitutional basis upon which you declared at the extra session of Congress that you intended to carry on this war. Yes, sir, you must let the negro alone; you must drop him; you must revoke your proclamations of the 22d and 24th of September, and you must revoke your proclamation of the 1st of January."

Mr. Powell, of Kentucky, thus presented the constitutional question: "Senators, have you the power under the Constitution of the United States to give \$20,000,000 to establish slavery in the State of Massachusetts? I put that question to you. Perhaps you would all answer no. You have just as much right to establish slavery in Massachusetts by giving \$20,000,000 to aid in that scheme, as you have to abolish slavery in Missouri by giving \$20,000,000 to effect that purpose. If you have the one power you have the other. If you have the power to give money for the purpose of abolishing this institution in one State, you have the power to give money for the purpose of establishing it in another. You have no power to do either."

Mr. Saulsbury, of Delaware, argued fully against the constitutionality of the bill: "Mr. President, even were it constitutional, there are grave considerations of policy and expediency which would render the adoption of the measure now before the Senate unwise. Before I consider those questions, however, let me invite the attention of the Senate for a moment to its unconstitutionality. What is the first provision of this bill which renders it unconstitutional? In my judgment, it is unconstitutional because it attempts to do that which is solemnly prohibited by the Federal Constitution in direct and express terms. It proposes to create a compact between the State of Missouri and

the United States of America, which, in the language of the act, shall be 'irrepealable without the consent of the United States.' The provision of the bill in this behalf is:

The Government of the United States will, upon the passage by said State of a good and valid act of emancipation of all the slaves therein, to take effect within the period hereinafter named, and to be irrepealable unless with the consent of the United States, apply the sum of \$10,000,000, &c.

"Now, Mr. President, what is the provision of the Constitution in reference to this matter, which renders this bill manifestly, palpably on its face obnoxious to constitutional objection? We find that in section ten of the first article of the Constitution are these words:

No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, &c.

"This is a prohibition not only upon the power of one State to enter into a compact, alliance, confederation, or agreement with another State, but it is a prohibition upon the part of any State from entering into any alliance, compact, or agreement with the General Government of the United States. If a State is prohibited from entering into such a compact with another State, the same words which make that prohibition make it also a prohibition upon the power of the State to enter into any agreement or compact with the United States.

"But, Mr. President, let us look, in another aspect of the case, at the question of the unconstitutionality of this measure. It would be a total destruction of the form of government under which we live. If the State of Missouri can enter into an agreement or compact irrepealable with the United States that slavery shall not therein exist after the acceptance on the part of Missouri of this act, then it is an agreement on the part of the State of Missouri to surrender the sovereignty of that State, and make the State of Missouri unequal in its rights of sovereignty with the other States of this Union; and the anomaly would be presented in that case of a union of States, not with equal rights under the Federal Constitution, but States of unequal rights. The State of Maryland, the State of Kentucky, and the other States might then have the complete right of sovereignty over their own domestic institutions, while the State of Missouri, if this act be adopted, would cease to have that right; and instead of a Government of coequal States, you would have a Government of States of unequal power, not equal under the Constitution; and the whole framework and system of government under which we live would be entirely abrogated by this species of legislation.

"Carry it out a little farther to its ultimate consequences, and what would be the result? If the State of Missouri can surrender her sovereignty in reference to the absolute control of her own domestic institutions, she may by compact with the United States for a money consideration also surrender her right of repre-

sentation upon this floor, and her representation in the other House of Congress. She may also stipulate, if she can do this act, to surrender every other right which she enjoys under the Federal Constitution, and may even consent to become a province of the other States, and thus work the total destruction of our Federal system of Government.

"Mr. President, carry it still farther; if Missouri may do this, some other State which may wish to run its hand into the Federal treasury may be bribed to surrender some other right which it has under the Federal Constitution; and thus, instead of the form of Government under which we live being changed or modified according to the provisions of the Constitution by a convention of all the States, in general convention assembled, you would have each State separately and by itself surrendering up its rights, until you find one great consolidated central Government at the Federal capital, with no such thing as State rights or State sovereignty in it. I submit, Mr. President, therefore, that this is the most dangerous act, the most dangerous species of legislation, when viewed in its elements and principles, that has ever been introduced into the Federal Congress.

"But, sir, am I mistaken in the view which I have presented, that the State of Missouri has no such right as to enter into a compact with the United States irrepealable in its character? Why, Mr. President, suppose this act shall be passed, and suppose the State of Missouri, by her Legislature, shall assent to it, as is contemplated in the bill; suppose that she shall agree that it shall be irrepealable; and carry it farther: suppose that the people of Missouri shall meet in solemn convention, and there declare and make it a provision of their constitution that, in consideration of the passage of this act, slavery shall never thereafter be one of the domestic institutions of that State, but shall cease thenceforth and forever to exist in that State, what binding force would there be in such a decree, in such a constitutional provision by the people of Missouri? Is it not a cardinal principle in our system of government that the people, in their sovereign capacity, may, from time to time, change and alter their organic law? Can a provision incorporated, if you please, into the constitution of the State of Missouri, that slavery shall never thereafter exist in that State, preclude and prevent a future sovereign convention of the people of Missouri from reëstablishing slavery within their limits? If that is not so, then all the lessons of the past have been illusory; then we have been taught wrong in reference to the principles of free government. A sovereign convention of the people of Missouri, at any subsequent period, may treat as nought this provision of this act, and may reëstablish the system of domestic slavery in that State.

"But, sir, I am not without high authority to

support the view which I here present. It is no new question. Fortunately for us, however much disregarded the teachings of the fathers may be at the present hour, they live and shine upon the pages of history and in the public records of the country. In 1822, a bill was passed by the Congress of the United States making an appropriation of money to complete the Cumberland road. Mr. Monroe was then President of the United States, and he sent to Congress a special message stating his objections at length to the bill, in which he considered fully the nature and character of the system of government under which we live, and the powers of the Federal Congress to appropriate money out of the public treasury for special and particular objects. He vetoed that bill, and in his veto message of the 4th of May, 1822, in reference to this power of a State to surrender its sovereignty, he held this language :

I am of opinion that Congress does not possess this power—that the States, individually, cannot grant it; for although they may assent to the appropriation of money within their limits for such purposes, they can grant no power of jurisdiction or sovereignty by special compacts with the United States. This power can be granted only by an amendment to the Constitution, and in the mode prescribed by it.”

Mr. Sumner, of Massachusetts, moved to amend by making the amount for each slave \$200 instead of \$300, which was adopted, and also another amendment that the emancipation should be immediate, which was rejected. He then urged the passage of the bill. “I have already voted to give \$20,000,000 to Missouri, in order to secure freedom at once to her slaves and to make her at once a free State. I am ready to vote more, if more be needed for this purpose; but I will not vote money to be sunk and lost in an uncertain scheme of prospective emancipation, where freedom is a jack-o'-lantern, and the only certainty is to be found in the congressional appropriation. For money paid down, freedom, too, must be paid down at once.

“With all differences of opinion on this important question, there is much occasion for congratulation in the progress that has been made.

“There is one point on which the Senate is substantially united. A large majority will vote for emancipation. This is much, both as a sign of the present and a prophecy of the future. A large majority, in the name of Congress, will offer pecuniary aid to this object. This is a further sign and prophecy. Such a vote and such an appropriation will constitute an epoch. Only a few short years ago the very mention of slavery in Congress was forbidden, and all discussion of it was stifled. Now, emancipation is an accepted watchword, while slavery is openly denounced as a guilty thing worthy of death.

“It is admitted that now, under the exigency of war, the United States ought to coöperate with any State in the abolition of slavery,

giving to it pecuniary aid; and it is proposed to apply this principle practically in Missouri. It was fit that emancipation, destined to end the rebellion, should first begin in South Carolina, where the rebellion first began. It is also fit that the action of Congress in behalf of emancipation should first begin in Missouri, which, through the faint-hearted remissness of Congress, as late as 1820, was opened to slavery. Had Congress at that time firmly insisted that Missouri, on entering the Union, should be a free State, the vast appropriation now proposed would have been saved; and, better still, this vaster civil war would have been prevented. The whole country is now paying with treasure and blood for that fatal surrender. Alas! that men should forget that God is bound by no compromise, and that, sooner or later, He will insist that justice shall be done. There is not a dollar spent, and not a life sacrificed in this calamitous war, which does not plead against any repetition of that wicked folly. Blasted be the tongue which speaks of compromise with slavery!

“But, though happily compromise is no longer openly proposed, yet it insinuates itself in this debate. In former times it took the form of barefaced concession to slavery, as in the admission of Missouri as a Slave State; the annexation of Texas as a Slave State; the waiver of the prohibition of slavery in the Territories; the atrocious bill for the reënslavement of fugitives; and the opening of Kansas to slavery, first by the Kansas bill, and then by the Lecompton constitution. In each of these cases there was a concession to slavery which history now records with shame; but it was by this that your wicked slaveholding conspiracy waxed confident and strong, till at last it was ripe for war.

“And now it is proposed, as an agency in the suppression of the rebellion, to put an end to slavery. By proclamation of the President, all the slaves in certain States, and designated parts of States, are declared to be free. Of course this proclamation is a war measure, rendered just and necessary by the exigencies of war. As such it is summary and instant in its operation; not prospective or procrastinating. A proclamation of prospective emancipation would have been an absurdity; like a proclamation of prospective battle, where not a blow was to be struck or a cannon pointed before 1876, unless, meanwhile, the enemy desired it. What is done in war must be done promptly, except, perhaps, under the policy of defence. Gradualism is delay; and delay is the betrayal of victory. If you would be triumphant, strike quickly. Let your blows be felt at once, without notice or premonition; and especially without time for resistance or debate. Time always deserts those who do not appreciate its value. Strike promptly, and time becomes your invaluable ally. Strike slowly, gradually, prospectively, and time goes over to the enemy.

"But every argument for the instant operation of the proclamation; every consideration in favor of despatch in war, is especially applicable to all that is done by Congress as a war measure. In a period of peace, Congress might fitly consider whether emancipation should be immediate or prospective, and we might listen with patience to the instances adduced by the senator from Wisconsin (Mr. Doolittle) in favor of delay; to the case of Pennsylvania and to the case of New York, where slaves were tardily admitted to their birthright. Such arguments, though to my judgment of little value at any time, would then be legitimate. But now, when we are considering how to put down the rebellion, they are not even legitimate. There is but one way to put down the rebellion, and that is by instant action; and all that is done, whether in the field, in the cabinet, or in Congress, must partake of this character. Whatever is postponed for twenty years or ten years, may seem to be abstractly politic or wise; but it is in no sense a war measure, nor can it contribute essentially to the suppression of the rebellion.

"Now, I think that I may assume, without contradiction, that the proposed tender of money to Missouri for the sake of emancipation is a war measure, to be vindicated as such under the Constitution of the United States. It is also an act of justice to an oppressed race; but it is not in this unquestionable character that it is now commended to Congress. If it were urged on no other ground, even if every consideration of philanthropy and of religion pleaded for it with rarest eloquence, I fear that it would stand but little chance in either House of Congress. Let us not disguise the truth. Except as a war measure, in order to aid in putting down the rebellion, this proposition would find little hospitality here. Senators are ready to vote money—as the British parliament voted subsidies—in order to supply the place of soldiers, or to remove a stronghold of the rebellion; all of which is done by emancipation. I do not overstate the case. Slavery is a stronghold of the rebellion, which, through emancipation, will be removed, while every slave and every slavemaster will become an ally of the Government. Therefore emancipation is a war measure, as constitutional as the raising of armies or the occupation of a hostile territory.

"But in vindicating emancipation as a war measure, we must see that it is made under such conditions as to exercise a present, instant influence against the rebellion. It must be immediate, not prospective. In proposing prospective emancipation, you propose a measure which can have little or no influence on the war. Senators abstractly may prefer that emancipation should be prospective rather than immediate; but this is not the time for the exercise of any such abstract preference. Whatever is done as a war measure must be immediate, or it will cease to have this character.

If made prospective, it will not be a war measure, whatever you may call it.

"If I am correct in this statement—and I do not see how it can be questioned—then is the appropriation for immediate emancipation just and proper under the Constitution, while that for prospective emancipation is without any sanction, except what it may find in the sentiments of justice and humanity."

The bill then passed as follows:

YEAS—Messrs. Anthony, Arnold, Chandler, Clark, Collamer, Doolittle, Foot, Foster, Harlan, Harris, Henderson, Howard, Howe, King, Lane of Kansas, Morrill, Pomeroy, Sumner, Trumbull, Wade, Wilkinson, Wilmot, and Wilson of Massachusetts—23.

NAYS—Messrs. Carlile, Cowan, Davis, Fessenden, Grimes, Harding, Kennedy, Lane of Indiana, Latham, McDougall, Nesmith, Powell, Richardson, Saulsbury, Ten Eyck, Turpie, Wall, and Wilson of Missouri—18.

This bill failed to pass in the House.

In the House, on the 9th of February, the Committee on Elections reported the following resolutions:

Resolved, That Benjamin F. Flanders is entitled to a seat in this House as a Representative from the first congressional district in Louisiana.

Resolved, That Michael Hahn is entitled to a seat in this House as a Representative from the second district in Louisiana.

Mr. Dawes: "I ask the attention of the House, for a few moments, to a statement of what the committee has submitted in detail in a report in support of these resolutions. I believe the House is aware, without any suggestion from me, that more than ordinary importance is attached to the consideration of this subject. It is not simply whether these two gentlemen shall be permitted to occupy seats in the House for the remainder of the session now so near its close. The question whether they shall be admitted involves the principles touching the present state of the country, to which the Committee of Elections has had occasion, more than once, to call the attention of the House.

"Certain principles were adopted by this committee early in this Congress in other cases, involving to a great extent the same questions that are involved in this case. They were submitted to the House in reports and in remarks more fully explaining them, and they have been adopted by the House hitherto without any exception, I believe. In conformity with those principles, the committee has felt bound to report these resolutions to the House, and the question now comes up whether any reason exists, either in the intrinsic unsoundness of the positions thus assumed or in any change in the condition of public affairs, that requires of the House any departure from those rules and principles. It is because it has appeared to the committee that an adherence to these principles is vitally important in settling the question how there is to be a restoration of this Union when this war shall be drawn to a close, that the committee has adhered with earnestness

to these principles, and now desires that the House will fully consider and deliberate before it comes to the conclusion to depart from them.

"The facts of this case are briefly these: The elections in these two districts of Louisiana are embraced in the one report, because the same facts and the same principles apply to both. There is no reason for making any distinction between the two cases. The districts are composed each of about half of the city of New Orleans and of a portion of the surrounding counties, or parishes, as they are called there. The city of New Orleans, as is well known, was, up to May last, in the occupation of rebel forces, and was in a state almost of revolution, certainly of rebellion. When the army of the Union took possession of New Orleans and expelled the rebel usurpation, it drove out, as early as May last, from those entire districts, the rebel power. They left whatever of Union sentiment there was there the opportunity to develop itself, and left a love for the Union, if any existed there, to grow and to strengthen its hold upon the people.

"On an invitation to the people to renew their allegiance to the Government of the United States, in the course of last summer, more than sixty thousand of the citizens enrolled themselves and took the oath of allegiance. In order to preserve peace, and to enforce good order and such laws and regulations of society as were absolutely necessary while the State authority was held in abeyance, the President clothed one of his brigadier-generals with the authority of military governor of the whole State of Louisiana early in the summer. From that time to this he has been discharging all the functions which would ordinarily be discharged by the Governor of the State of Louisiana under the same circumstances. He has issued writs. He has appointed such officers of the law as the real Governor of the State would appoint. He has enforced order in like manner as the Governor of the State would enforce it. He has regulated the municipal affairs of the State after the manner and in the form required by the constitution and laws of Louisiana. Governing himself by the requirements of that instrument and of those laws, he has gone on, to all intents and purposes, as the Governor of Louisiana. There was no evidence before the committee, and the committee believes that none exists, that any Union man in Louisiana resists in any manner this exercise by the military governor of the civil functions of the Governor of Louisiana.

"The constitution of Louisiana requires that when any vacancy shall occur in the office of representative in Congress, from death or otherwise, the Governor shall by proclamation call a special election. In obedience to that requirement of the constitution of Louisiana, and on the earnest solicitation of large numbers of voters in those two congressional districts, the military governor called an election

by proclamation in those two congressional districts, to be held on the 3d of December last. The result of that election was: in the first district, a vote of 2,643; of which Mr. Flanders received 2,370, and all others 273. In the election in the second district, Mr. Hahn received 2,799 votes, and all others 2,318, a total of 5,117.

"It is on the strength of these elections that these gentlemen present themselves and ask for seats in this House. The requirements of the law of Louisiana were all observed, with the exception of the matter of the military governor. The appointment of commissioners of election, the manner of polling the vote, the precincts at which the votes were polled, the police regulations insuring peace and good order at the election, the means of preventing illegal voting and fraud, all of the details, down to the minutest municipal regulations, were observed at the polls on that day. So that this had every essential of a regular election in a time of most profound peace, with the exception of the fact that the proclamation was issued by the military instead of the civil governor of Louisiana.

"A military governor is not entirely unknown to the law, even in this country. The Supreme Court of the United States has recognized not only the power of the President of the United States to appoint a military governor, but has recognized both his military and civil functions as binding in law. They have not undertaken, it is true, to say how far, as a military man, he may discharge the functions of the civil governor. So far as they have had occasion to pass, they have limited them as near as may be to the line of necessity. They have, however, given full force and effect to the acts of a military governor, when acting in a civil capacity. So that, to some extent, certainly we have the highest authority for the validity of the civil functions of a military government.

"The question comes, what is the limit; or, rather, the practical question is at this moment, whether these particular functions, exercised under these circumstances, are of such a character as to deserve to be recognized by this House at this time?"

Mr. Voorhees, of Indiana, opposed the resolutions, saying: "I regard this question as one of exceeding and paramount importance. I regard it as setting a precedent for future action which will be exceedingly important in its bearing on the destiny of this Government. In other words, I regard it as surrendering to the executive the branch of the Government to which we belong. In my judgment, the executive has already usurped the judicial department of this Government by the suspension of the writ of *habeas corpus*. It lacks but the sanction of such a report as the committee has made in this case to surrender up the legislative department also to the executive.

"Now, in support of these observations

which I have made in regard to the surrender of the legislative department to the executive, by the principle sought to be enforced by this report, allow me to submit to the House what I conceive the law in such cases to be. The law as laid down in England, in a report before me, in the case of *Hall vs. Campbell* (1 Cowper's Reports), and which has the sanction of the highest courts of our own country, is this: if you make conquest of territory from a foreign enemy with whom you are at war, you may in that territory in which you have made conquest and planted your power, establish municipal regulations and civil laws, set aside the laws which there prevail, and substitute a system of laws made by the legislative authority of this country. This, however, is not true in the case of an insurrectionary district belonging to this Government. If you reduce a revolted State to obedience, you cannot supersede her laws and her domestic institutions. She is protected in them by that very Constitution whose supremacy you claim it is the mission of our arms to restore. All such States must be taken back, if taken back at all, with all the laws unimpaired which they themselves have made for their own government, pursuant to the guarantees of the Federal Constitution.

"Understand this principle. If the Southern confederacy is a foreign power, an independent nationality to-day, and you have conquered back the territory of Louisiana, you may then substitute a new system of laws in the place of the laws of that State. You may then supplant her civil institutions by institutions made anew for her by the proper authority of this Government—not by the executive, but by the legislative branch of the Government, assisted by the executive simply to the extent of signing his name to the bills of legislation. If the chairman of the Committee of Ways and Means (Mr. Stevens) is correct; if the gentleman from Kansas (Mr. Conway) is correct, and this assumed power in the South is a power of the earth, and stands to-day upon equal terms of nationality with ourselves, and we conquer back State by State its territory by the power of arms, then we may govern them independently of their local laws. But if the theory that we have been proceeding upon here, that this Union is unbroken; that no States have sundered the bonds that bind us together; that no successful disunion has yet taken place—if that theory is still to prevail in these halls, then this thing cannot be done. You are as much bound to uphold the laws of Louisiana in all their extent and in all their parts as you are to uphold the laws of Pennsylvania or New York, or any other State whose civil policy has not been disturbed."

Mr. Harrison, of Ohio, presented the following view of the subject: "The congressional delegation from that State was not chosen in 1861, in consequence of rebellion; and the office of governor became vacant by reason

of the treason of the governor and of his uniting in the rebellion. In view of these facts and of the other circumstances in which the people of Louisiana had been placed by the rebellion, might not the loyal electors of the several districts in that State, when the military power of the rebellion was suppressed by the arms of the National Government, have themselves, by their own voluntary action, assembled in convention and appointed a time for the holding of an election for members of Congress, and would not Congress have been authorized to receive as members representatives thus chosen? Now, then, the people of these two districts, having assented to the time appointed by the military governor (whether his action was legal or not) for the holding of an election, and that election having been actually held by the loyal electors of the districts, are not the representatives of their choice entitled to seats here?"

Mr. Voorhees, of Indiana, replied: "Will the gentleman from Ohio tell me how many voters cast their votes on the day of that election because they desired to be represented in this Congress, and how many because they wanted to save their slaves under the proclamation of the President? If he can give me this information, I can tell him how much the ratification of which he speaks was worth. Both inducements were held out; and if the gentleman can inform me how many persons voted because they desired to prevent their property being taken from them, and how many because they desired to send these claimants here, I can answer how far this act of the military governor was ratified by the people. The inducement in regard to their slaves was deemed as of sufficient importance to insert in the body of the proclamation, and I have no doubt it brought many citizens to the polls."

Mr. Maynard, of Tennessee, said: "What is the test by which an election is to be determined? Unquestionably the ballot box. It is the action of the electors there that must decide. Sweep away all your sophistries, your cobwebs, your fine-spun theories and technical arguments. You must go to the ballot box and count out the honest votes of the honest and qualified electors. That is the voice to which we must listen, and that is the only voice that we may properly listen to—the autocratic voice of the people speaking as sovereigns."

"Now, it is asserted here, on the one side, and is not denied on the other, that the elections in the first and second districts in Louisiana were fairly conducted; that the ballot boxes were left undisturbed; that there was no interposition; that several candidates canvassed the districts, and presented their respective claims to the electors as best they might, and that neither the military nor anybody else interposed to prevent a free exercise of the elective franchise. That is asserted on the one side, and it is not seriously controvert-

ed on the other, as I understand the argument. What else do we want? What but the most carping, captious, and cavilling disposition could ask more? The Constitution provides that 'the times, places, and manner for holding elections for senators and representatives shall be prescribed in each State by the Legislature thereof.' That has all been done by the Legislature of Louisiana. I understand that all those forms have been observed."

Mr. Eliot, of Massachusetts, expressed his views of the question as follows: "I have read with a great deal of attention and care the report of the Committee of Elections, which my colleague has presented to the House. But I fail to see how they have removed the doubts as to the power of Gov. Shepley to act in issuing his writs of election. They say truly that the powers of a military governor have their origin in and are limited by necessity. They say truly that his powers are, to some extent, civil as well as military. And I admit cheerfully the authority of the case cited by them, as reported in 16 Howard's Reports. But suppose Gen. Halleck had issued a writ of election for a member of Congress. There is nothing in the reasoning of the court in the case of *Cross vs. Harrison* which would have sustained that action.

"Mr. Speaker, the situation of these rebel States is wholly anomalous. At this time we are waging war against them. The power of the Government is exerted to subdue rebellion within their borders. If in any State the rebellion shall be subdued and the loyal men shall reorganize their State and elect their governor, who shall enforce the laws, and the people shall then act under the laws, and shall return to this House their representatives, they will be cheerfully and gladly received; or if Congress shall pass fit enactments under which elections shall be held, we may safely act. But at this moment the State of Louisiana is a State in rebellion against the Government. That rebellion must be subdued and a loyal State created. How this shall be done we know. It can be effected but in one way. Our arms must conquer a peace, and the loyal men, protected by the Government and aided by its legislation, must reform their State, and take their place again as our friends and companions and brethren. So shall the Constitution be upheld and tranquillity be restored."

Mr. Noell, of Missouri, was in favor of the resolutions for these reasons: "Mr. Speaker, I have remarked that the military governor appointed for the State of Louisiana was not sent there for military purposes, but to exercise certain civil powers necessary for the protection of the people. The civil authorities there, having abdicated, became a treasonable body, and omitting to perform their functions, it was necessary that the United States should substitute some authority there for the purpose of supplying the performance of those functions absolutely necessary for the people.

"Now, sir, it has been admitted on all sides of the House that a military governor can appoint civil officers. The functions of a governor of a State are various. Some are of a national and some are of a State character. Thus the governor necessarily becomes mixed up with national affairs. The duties which the governor has in this instance exercised are of that class. He is required by the laws of the State of Louisiana to order elections in cases where vacancies may occur. It was necessary for the people of Louisiana that this should be done in order to keep up their intercourse, under the Constitution of the United States, with the Federal Government. The Governor of Louisiana, before treason and secession took place, was invested with authority by the local law to order elections. Now, sir, what have our armies been sent there for? To subjugate the rebels and to restore the Union; and for that purpose the military governor, necessarily appointed by the President, is clothed with all the proper power. According to my idea, the best means to bring the States in rebellion back into the Union will be to permit the introduction of representatives from those States into this House."

Mr. Bingham, of Ohio, was of opinion that the election was illegal. He thus stated his views: "If the people of Louisiana had, under an act of their own Legislature, and by duly constituted officers of an existing State government, organized under the Federal Constitution, held this election, I could not doubt that such election was the lawful act of the loyal people. But, sir, there is no organized constitutional State government in Louisiana, nor was this election held under the law or by the officers of such government of Louisiana, nor under a law of Congress. I therefore repeat my proposition: representatives can be elected to the Federal Legislature only in pursuance of an act of the State Legislature, or of an act of the Federal Congress. I wish to inquire when there has been any decision under the Government of the United States, legislative or executive or judicial, to the contrary?"

Mr. Thomas, of Massachusetts, expressed his views as follows: "I do not mean to say that this question is free from difficulty. It certainly is not. But it has been, I think, quite too summarily disposed of by gentlemen opposed to the resolutions of the committee. It seems to me, Mr. Speaker, that much, very much of the difficulty we have in the discussion of this and similar questions, results from the attempt to apply to the condition of things in which we are placed, principles and rules from writers upon international law that really throw no light upon and have no just application to that condition, in many respects *sui generis*, and for our guide in which history and public law furnish no precedents or even strong analogies. No just or reasonable conclusion can be drawn from the powers of a military governor, in a territory conquered

from a foreign enemy, as to the nature and extent of the powers to be exercised in States or parts of States rescued from the possession of rebels in arms against us. This is a military occupation of our own territory; an occupation which has become necessary by reason of the fact that the Constitution and laws of the United States cannot otherwise be enforced, and that it is our duty to enforce them, and the right of the loyal citizens of Louisiana to have them enforced, not merely for our benefit, but their protection.

"Now, Mr. Speaker, what is the object of this vast movement of ours? For what are we carrying on this war? For the purpose of enforcing the laws of the United States. Your war has no other just or legitimate object but the enforcement of your laws. If these laws are obstructed by armed force in the State of Louisiana, you have the right to take and to maintain military occupation of that State to remove such obstruction. You have the right to see that the laws of the United States are executed in the State of Louisiana.

"Do gentlemen say that because of the existence of armed rebellion in the State of Louisiana we have no right to enforce the laws of the United States there? Have we not the right to collect taxes? Have we not the right to enforce the revenue laws, and the right to conscript soldiers from the citizens of that State? Have we not the right, by military power, to protect the courts of the United States in the district of Louisiana in the exercise of their jurisdiction? I take this position—and I fail to see how it can be controverted—that if you are in the military occupation of this, your own territory, you hold it for the purpose for which the war is waged, for the purpose of upholding the jurisdiction and enforcing obedience to the laws of the United States.

"The analogies sought to be drawn from Vattel, and other writers on public law, as to the military occupation of a conquered territory from a foreign state have very imperfect application to the case before us. The Constitution and laws of the United States are the supreme law of Louisiana, and you are to enforce the execution of those laws. And I see no valid distinction between enforcing those laws which impose duties and burdens upon the people, and the enforcement of those laws which guarantee and protect the rights of the loyal people of the State, rights springing from us, and to be protected by us."

Mr. Conway: "Was the law under which these men were elected a law of the United States?"

Mr. Thomas, of Massachusetts: "The law from which the right to elect was derived, and to be elected, was a law of the United States and the supreme law of Louisiana. Mr. Speaker, I wish to make matters clear as I go. I want gentlemen who believe that we should enforce the laws of the United States for the collection

of taxes and the collection of the revenue in Louisiana, to point out the distinction between enforcing the laws of the United States which impose these burdens and duties upon the people, and the enforcing of the laws which secure to them the enjoyment of their rights and privileges under the Constitution, and especially this great and invaluable right of representation, of helping to make the laws which they are bound to obey. Our duty to protect is as clear as their duty to obey. They are reciprocal and interdependent.

"We may meet this question of the issue of writs of election in another manner. The question whether these writs were properly issued or not is a technical question, and we can meet it by a technical answer. We may meet the objection that the writs were not issued by the executive authority of the State, by saying that they were issued by the only executive authority of that State which the Government of the United States or the people in these districts in any way recognize, and which, in matters of highest concern, they have recognized and obeyed. The writs of election were, in fact, issued upon the earnest request of the loyal citizens of these districts, and were responded to and confirmed by them.

"But I do not consider the strict legality of these writs vital to the issue before us. I go one step farther. I contend, whether these writs were issued by the executive authority of the State or not, this may be a valid election. I contend that this provision of the Constitution, as other provisions of statute in relation to this subject, is within the well-settled distinction between provisions which are directory and those which are essential. I say, under the law of elections, practised upon from the beginning of the Government to this hour, you have gone behind the mere form to get at the substance and truth of the thing; and that these safeguards provided by the laws to secure to the citizens the orderly exercise of the right of election were never intended to be used as barriers to exclude them from their enjoyment.

"The point to which I was endeavoring to lead the House is the distinction between those provisions, formal and directory, and those that I deem essential; and that the House, in the exercise of its power to judge of the elections and the returns of its members, has always felt itself enabled to go behind the 'letter which killeth, to the spirit which maketh alive,' and to ascertain whether, in point of fact, there has been a fair election by the people of the district, having full opportunity to vote, and without violence or fraud. And therefore if gentlemen differ as to the authority of a military governor—or, as I would call him, the provisional governor—of a State, they may still be satisfied that that was a full and fair notice to the people of the election, and that the loyal people of those districts, having had such full and fair notice, did meet and freely exercise their elective franchise."

After a further debate the resolutions were adopted. Yeas, 92; nays, 44.

In the Senate, on the 3d of March, the following resolutions, offered by Mr. Sumner, of Massachusetts, came up for consideration:

Whereas, it appears from the diplomatic correspondence submitted to Congress, that a proposition, friendly in form, looking to pacification through foreign mediation, has been made to the United States by the Emperor of the French, and promptly declined by the President; and whereas the idea of mediation or intervention in some shape may be regarded by foreign Governments as practicable, and such Governments, through this misunderstanding, may be led to proceedings tending to embarrass the friendly relations which now exist between them and the United States; and whereas, in order to remove for the future all chance of misunderstanding on this subject, and to secure for the United States the full enjoyment of that freedom from foreign interference, which is one of the highest rights of independent States, it seems fit that Congress should declare its convictions thereon: Therefore,

Resolved (the House of Representatives concurring), That while, in times past, the United States have sought and accepted the friendly mediation or arbitration of foreign powers for the pacific adjustment of international questions, where the United States were the party of the one part and some other sovereign power the party of the other part; and while they are not disposed to misconstrue the natural and humane desire of foreign powers to aid in arresting domestic troubles, which, widening in their influence, have afflicted other countries; especially in view of the circumstance, deeply regretted by the American people, that the blow aimed by the rebellion at the national life has fallen heavily upon the laboring population of Europe; yet, notwithstanding these things, Congress cannot hesitate to regard every proposition of foreign interference in the present contest as so far unreasonable and inadmissible, that its only explanation will be found in a misunderstanding of the true state of the question, and of the real character of the war in which the republic is engaged.

Resolved, That the United States are now grappling with an unprovoked and wicked rebellion, which is seeking the destruction of the republic that it may build a new power, whose corner stone, according to the confession of its chiefs, shall be slavery; that for the suppression of this rebellion, and thus to save the republic and prevent the establishment of such a power, the National Government is now employing armies and fleets, in full faith that through these efforts all the purposes of conspirators and rebels will be crushed; that while engaged in this struggle, on which so much depends, any proposition from a foreign power, whatever form it may take, having for its object the arrest of these efforts, is, just in proportion to its influence, an encouragement to the rebellion and to its declared pretensions, and, on this account, is calculated to prolong and embitter the conflict, to cause increased expenditure of blood and treasure, and to postpone the much-desired day of peace; that, with these convictions, and not doubting that every such proposition, although made with good intent, is injurious to the national interests, Congress will be obliged to look upon any further attempt in the same direction as an unfriendly act, which it earnestly deprecates, to the end that nothing may occur abroad to strengthen the rebellion or to weaken those relations of good will with foreign powers which the United States are happy to cultivate.

Resolved, That the rebellion from its beginning, and far back even in the conspiracy which preceded its outbreak, was encouraged by the hope of support from foreign powers; that its chiefs frequently boasted that the people of Europe were so far dependent upon regular supplies of the great Southern staple, that sooner

or later their Governments would be constrained to take side with the rebellion in some effective form, even to the extent of forcible intervention, if the milder form did not prevail; that the rebellion is now sustained by this hope, which every proposition of foreign interference quickens anew, and that without this life-giving support it must soon yield to the just and paternal authority of the National Government; that, considering these things, which are aggravated by the motive of the resistance thus encouraged, the United States regret that foreign powers have not frankly told the chiefs of the rebellion that the work in which they are engaged is hateful, and that a new Government, such as they seek to found, with slavery as its acknowledged corner stone, and with no other declared object of separate existence, is so far shocking to civilization and the moral sense of mankind, that it must not expect welcome or recognition in the commonwealth of nations.

Resolved, That the United States, confident in the justice of their cause, which is the cause also of good government and of human rights everywhere among men; anxious for the speedy restoration of peace, which shall secure tranquillity at home, and remove all occasion of complaint abroad; and awaiting with well-assured trust the final suppression of the rebellion, through which all these things, rescued from present danger, will be secured for ever, and the republic, one and indivisible, triumphant over its enemies, will continue to stand an example to mankind, hereby announce, as their unalterable purpose, that the war will be vigorously prosecuted, according to the humane principles of Christian states, until the rebellion shall be overcome; and they reverently invoke upon their cause the blessing of Almighty God.

Resolved, That the President be requested to transmit a copy of these resolutions, through the Secretary of State, to the ministers of the United States in foreign countries, that the declaration and protest herein set forth may be communicated by them to the Governments to which they are accredited.

They were adopted, without debate, by the following vote:

YEAS—Messrs. Anthony, Arnold, Chandler, Clark, Collamer, Davis, Dixon, Doolittle, Fessenden, Foot, Foster, Grimes, Harding, Harlan, Harris, Henderson, Hicks, Howard, Howe, King, Lane of Indiana, Morrill, Nesmith, Pomeroy, Sumner, Ten Eyck, Trumbull, Wade, Willey, Wilmot, and Wilson of Massachusetts—31.

NAYS—Messrs. Carlile, Latham, Powell, Saulsbury, and Wall—5.

The resolutions were adopted by the following vote in the House:

YEAS—Messrs. Aldrich, Alley, Arnold, Ashley, Babbitt, Bailey, Baxter, Bingham, Jacob B. Blair, Samuel S. Blair, Blake, Bridges, William G. Brown, Buffinton, Campbell, Casey, Chamberlain, Clark, Clements, Colfax, Frederick A. Conkling, Roscoe Conkling, Conway, Covode, Cutler, Dawes, Dunn, Edgerton, Eliot, Ely, Fenton, Samuel C. Fessenden, Thomas A. D. Fessenden, Fisher, Flanders, Franchot, Frank, Gooch, Goodwin, Granger, Gurley, Haight, Hale, Harrison, Horton, Hutchins, Julian, Kelley, Francis W. Kellogg, William Kellogg, Leary, Lehman, Loomis, Law, McIndoe, McKean, McKnight, McPherson, Marston, Maynard, Mitchell, Moorhead, Anson P. Morrill, Justin S. Morrill, Nixon, Olin, Patton, Timothy G. Phelps, Pike, Pomeroy, Porter, Alexander H. Rice, John H. Rice, Edward H. Rollins, Sargeant, Sedgwick, Shanks, Sheffield, Shellabarger, Sloan, Smith, Spaulding, Stevens, Stratton, Benjamin F. Thomas, Francis Thomas, Train, Trimble, Trowbridge, Van Valkenburgh, Van Wyck, Verree, Walker, Wallace, Washburne, Webster, Wheeler, Albert S. White, Wilson, Windom, Worcester, and Wright—103.

NAYS—Messrs. William Allen, Ancona, Calvert, Crittenden, Dunlap, Grider, Johnson, Kerrigan, Knapp, Lazear, Mallory, May, Noble, Norton, Nugen, Pendle-

ton, Perry, Price, Robinson, Shiel, Stiles, Vallandigham, Voorhees, Wadsworth, Ward, Chilton A. White, Wickliffe, and Yeaman—28.

An act was also passed to prevent correspondence with citizens of the confederate States. It provides "that if any person, being a resident of the United States, or being a citizen thereof, and residing in any foreign country, shall, without the permission or authority of the Government of the United States, and with the intent to defeat its measures, or to weaken in any way their efficacy, hold or commence, directly or indirectly, any correspondence or intercourse, written or verbal, with the present pretended rebel government, or with any officer or agent thereof, or with any other individual acting or sympathizing therewith; or if any such person not duly authorized shall counsel or assist in any such correspondence or intercourse with such intent, he shall be deemed guilty of a high misdemeanor, and, on conviction before any court of the United States having jurisdiction, shall be punished by a fine not exceeding \$10,000, and by imprisonment not less than six months, nor exceeding five years. Where the offence is committed in any foreign country, the district court of the United States for the district where the offender shall be first arrested is to have jurisdiction."

An amendment to the act for the collection of direct taxes in insurrectionary districts was passed in the following form:

An Act to amend an Act entitled "An Act for the Collection of Direct Taxes in Insurrectionary Districts within the United States, and for other purposes," approved June seven, eighteen hundred and sixty-two.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the seventh section of an act entitled "An act for the collection of direct taxes in insurrectionary districts within the United States, and for other purposes," approved June seven, eighteen hundred and sixty-two, be amended so as to read as follows: Section 7. *And be it further enacted,* That the said board of commissioners shall be required, in case the taxes charged upon the said lots and parcels of land shall not be paid, as provided for in the third section of this act, to cause the same to be advertised for sale in a newspaper published in the town, parish, district, or county where situate; and if there be no such newspaper published in said town, parish, district, or county, or if the publisher thereof refuse to publish the same, then in any other newspaper to be selected by said commissioners in said district, or in the city of Washington, for at least four weeks, and by posting notices of said sale in three public places in the town, parish, district, or county within which said lands are situate, at least four weeks previous to the day of sale; and at the time and place of sale to cause the same to be severally sold to the highest bidder for a sum not less than the taxes, penalty, and costs, and ten per centum per annum interest on said tax, pursuant to said notice; in all cases where the owner of said lots or parcels of ground shall not, on or before the day of sale, appear in person before the said board of commissioners and pay the amount of said tax, with ten per centum interest thereon, with the cost of advertising the same, or request the same to be struck off to a purchaser for a less sum than two thirds of the assessed value of said several lots or parcels of ground, the

said commissioners shall be authorized at said sale to bid off the same for the United States at a sum not exceeding two thirds of the assessed value thereof, unless some person shall bid a larger sum; and in that case the same shall be struck off to the highest bidder, who shall, upon paying the purchase money in gold and silver coin, or in the Treasury notes of the United States, or in United States notes, or in certificates of indebtedness against the United States, be entitled to receive from said commissioners their certificate of sale, which said certificate shall be received in all courts and places as *prima facie* evidence of the regularity and validity of said sale, and of the title of said purchaser or purchasers under the same: *Provided,* That the owner of said lots of ground, or any loyal person of the United States having any valid lien upon or interest in the same, may at any time within sixty days after said sale appear before the said board of tax commissioners in his or her own proper person, and, if a citizen, upon taking an oath to support the Constitution of the United States, and paying the amount of said tax and penalty, with interest thereon from the date of the said proclamation of the President mentioned in the second section of this act, at the rate of fifteen per centum per annum, together with the expenses of sale and subsequent proceedings, to be determined by said commissioners, may redeem said lots of land from said sale; and any purchaser under the same having paid moneys, Treasury notes, or other certificates of indebtedness of the United States, shall, upon such redemption being made, be entitled to have the same, with the interest accruing after said sale, returned to him by the said commissioners, upon surrendering up the certificates of sale: *And provided further,* That if the owner of said lots of ground shall be a minor, a non-resident alien, or loyal citizen beyond the seas, a person of unsound mind or under a legal disability, the guardian, trustee, or other person having charge of the person or estate of such person may redeem the same at any time within two years after the sale thereof, and in the manner above provided, and with like effect: *And provided further,* That at such sale any tracts, parcels, or lots of land which may be selected under the direction of the President for Government use, for war, military, naval, revenue, charitable, educational, or police purposes, may, at said sale, be bid in by said commissioners, under the direction of the President, for, and struck off to, the United States: *And provided further,* That the certificate of said commissioners shall only be affected as evidence of the regularity and validity of sale by establishing the fact that said property was not subject to taxes, or that the taxes had been paid previous to sale, or that the property had been redeemed according to the provisions of this act.

APPROVED, February 6, 1863.

An act was also passed to facilitate the taking of depositions within the United States, to be used in the courts of other countries. It is as follows:

An Act to facilitate the taking of Depositions within the United States, to be used in the Courts of other Countries, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the testimony of any witness residing within the United States, to be used in any suit for the recovery of money or property depending in any court in any foreign country with which the United States are at peace, and in which the Government of such foreign country shall be a party or shall have an interest, may be obtained, to be used in such suit. If a commission or letters rogatory to take such testimony shall have been issued from the court in which said suit is pending, on producing the same before the district judge of any district where said witness resides or shall be found, and on due proof being made to such judge that the testimony of any witness is material to the party desiring the same, such judge shall issue a

summons to such witness requiring him to appear before the officer or commissioner named in such commission or letters rogatory, to testify in such suit. Such summons shall specify the time and place at which such witness is required to attend, which place shall be within one hundred miles of the place where said witness resides or shall be served with said summons.

SEC. 2. *And be it further enacted*, That if any person shall refuse or neglect to appear at the time and place mentioned in the summons issued, in accordance with this act, or if, upon his appearance, he shall refuse to testify, he shall be liable to the same penalties as would be incurred for a like offence on the trial of a suit in the district court of the United States.

SEC. 3. *And be it further enacted*, That every witness who shall appear and testify, in manner aforesaid, shall be allowed and shall receive from the party, at whose instance he shall have been summoned, the same fees and mileage as are allowed to witnesses in suits depending in the district courts of the United States.

SEC. 4. *And be it further enacted*, That whenever any commission or letters rogatory, issued to take the testimony of any witness in a foreign country, in any suit in which the United States are parties or have an interest, shall have been executed by the court or the commissioner to whom the same shall have been directed, the same shall be returned by such court or commissioner to the minister or consul of the United States nearest the place where said letters or commission shall have been executed, who, on receiving the same, shall indorse thereon a certificate, stating the time and place when and where the same was received; and that the said deposition is in the same condition as when he received the same; and he shall thereupon transmit the said letters or commission, so executed and certified, by mail, to the clerk of the court from which the same issued, in the manner in which his official despatches are transmitted to the Government. And the testimony of witnesses so as aforesaid taken and returned shall be read as evidence on the trial of the suit in which the same shall have been taken, without objection as to the method of returning the same.

APPROVED, *March 3, 1863.*

The following act concerning letters of marque, &c., was also passed :

An Act concerning Letters of Marque, Prizes, and Prize Goods.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in all domestic and foreign wars, the President of the United States is authorized to issue to private armed vessels of the United States, commissions or letters of marque and general reprisal, in such form as he shall think proper, and under the seal of the United States, and make all needful rules and regulations for the government and conduct thereof, and for the adjudication and disposal of the prizes and salvages made by such vessels: *Provided*, That the authority conferred by this act shall cease and terminate at the end of three years from the passage of this act.

APPROVED, *March 3, 1863.*

The passage of this act was urged by Mr. Grimes, of Iowa, who said: "I frankly own that my purpose is to declare a principle which shall have a general as well as a special application. I wish to say to the world that, however much other nations have changed or may change their policy on this subject, we will adhere to ours. If the President shall find himself environed with new difficulties, involved in new complications, I wish him to have the power to 'let slip the dogs of war' against any new enemy that may declare against us."

Mr. Sumner, of Massachusetts, in opposition,

spoke as follows: "This bill is entitled, 'concerning letters of marque, prizes, and prize goods.' The title is borrowed from the two statutes of 1812 and 1813. It is, in plain terms, a bill to authorize privateers; that is, private armed vessels licensed to cruise against the commerce of an enemy, and looking to booty for support, compensation, and salary. It is by booty that the owners, officers, and crews are to be paid. Booty is the motive power and lifespring. Such is this bill on its face, without going into details. Surely a bill of this character ought not to be passed without strong reason.

"Looking at the bill more closely, it will be found to have two distinct features: first, as a new agency against the rebellion; and secondly, as a provision for privateers in any future war. I have called these two features distinct. They may be regarded separately. One may be right and the other wrong. One may be adopted and the other rejected.

"So far as the bill promises any substantial help in putting down the rebellion without more than countervailing mischief, it may properly be entertained. But what can it do against the rebellion? And where is the policy or necessity on which it is founded? If senators think that the bill can do any good now, I am sure that they listen to their hopes rather than to the testimony. Why, sir, the rebels against whom you propose to cruise are absolutely without commerce. Pirate ships they have, equipped in England, armed to the teeth, and unleashed upon the sea to prey upon us; but there is not a single bottom of theirs which can afford that booty which is the pay and incentive of the privateer. It would be hardly more irrational to try to enlist private armed ships against the king of Dahomey.

"But, while I see no probable good from the launching of privateers on the ocean to cruise against a commerce which does not exist, and to be paid by a booty which cannot be found, I see certain evils which I am anxious to avoid for the sake of my country, especially at this moment. I think that I cannot be mistaken in this anxiety.

"It is well known that, according to ancient usage and the law of nations, every privateer is entitled to belligerent rights, one of which is that most difficult, delicate, and dangerous right, the much-disputed right of search. There is no right of war with regard to which nations are more sensitive, and no nation has been more sensitive than our own, while none has suffered more from its exercise. By virtue of this right, every licensed sea-rover will be entitled to stop and overhaul on the ocean all merchant vessels under whatever flag. If he cannot capture, he can at least annoy. If he cannot make prize, he can at least make trouble, and leave behind a sting. I know not what course the great neutral powers may adopt; nor do I see how they can undertake to set aside this ancient right, even if they smart un-

ter its exercise. But when I consider that these powers have already by solemn convention renounced the whole system of privateers among themselves, I confess my fears that they will not witness with perfect calmness the annoyance to which their commerce will be exposed. And now, sir, mark my prediction. Every exercise upon neutral commerce of this terrible right of search by a privateer will be the fruitful occasion of misunderstanding, bickering, and controversy, at a moment when, if I could have my way, there should be nothing to interfere with that accord, harmony, and sympathy which are due from civilized states to our republic in its great battle with barbarism. Even if we are not encouraged to expect these things from Europe, I hope that nothing will be done by us that will put impediments in their way. Justly sensitive with regard to our own rights, let us respect the sensibilities of others.

"It is not enough to say that we have an unquestioned right to issue letters of marque. Rights, when exercised out of season or imprudently, may be changed into wrongs. It was a maxim of ancient jurisprudence, *Sic utere tuo, ut alienum non ledas*; and I think that this maxim, at least in its spirit, is applicable to the present occasion. Our right may be clear; but if its exercise would injure or annoy others, without corresponding advantage to ourselves, we shall do well if we forbear to exercise it."

The measure was adopted in the Senate by the following vote:

YEAS—Messrs. Anthony, Arnold, Chandler, Clark, Collamer, Cowan, Doolittle, Fessenden, Foot, Foster, Grimes, Harding, Harlan, Harris, Hicks, Howe, King, Lane of Kansas, Latham, McDougall, Morrill, Nesmith, Rice, Sherman, Turpie, Wade, and Wilson of Massachusetts—27.

NAYS—Messrs. Davis, Dixon, Henderson, Howard, Lane of Indiana, Pomeroy, Sumner, Trumbull, and Wilson of Missouri—9.

For a statement of the financial measures adopted at this session of Congress, see FINANCES OF THE UNITED STATES. The liberality of these measures was supposed to be such as to furnish the Government with ample funds to conduct public affairs to the close of its existing term of office. The measures relative to the army in like manner placed the whole military power at the service of the Government, and removed all distinctions between the militia and the regular army.

On the 4th of March the session closed. The term of office of the members of the Thirty-seventh Congress expired at that time, excepting a portion of the Senate.

CONNECTICUT. The Legislature of Connecticut assembled on May 4th. The receipts and disbursements of the State for the year ending March 30th, 1863, were as follows:

On hand, April 1st, 1862.....	\$298,459.42
Public revenue.....	4,158,934.56
Total.....	\$4,457,423.98
Disbursements.....	\$4,201,171.94
Paid interest.....	150,082.00—4,351,253.94
Balance, April, 1863.....	\$106,170.04

On the 1st of January, 1863, the State owed \$1,349,800 of temporary loans, which, with some increased expenditures, was met by the sale of \$2,000,000 State bonds. The first million sold at a range of from 9½ to 12 per cent. premium, netting \$102,535.50.

Of the direct tax of 1861, the quota of the State was \$261,981.90. It was paid by a surrender of United States certificates held by the State. The gross annual receipts for four years were as follows:

1860.....	\$1,010,594	1862.....	\$4,341,147.95
1861.....	805,971	1863.....	5,101,874.74

The taxes and taxable property were as follows:

Grand List.....	\$247,065,811
Two mill tax.....	\$486,120.74
Commutation tax, \$1.....	19,937.75—\$506,058.49

Some sources of revenue were as follows:

Bank dividends owned by State.....	\$34,887.00
Tax on railroads.....	46,669.72
“ turnpike stock of non-residents..	88.62
“ insurance stock.....	7,277.15
“ bank “.....	10,031.68
Avails of courts.....	9,700.40
Tax on savings banks.....	110,576.67
“ mutual insurance co.....	15,694.31

The school fund of the State amounted, on May 1st, to \$2,049,426; the income from which during the year had been \$137,993, which was a gain of \$6,909 over the previous year. The number of children returned between the ages of four and sixteen, was 110,496. A dividend of one dollar and twenty cents for each child was paid for the support of public schools, leaving \$26,934 in the treasury. The amount raised by tax on property for schools exceeded that paid by the State. The State Reform School contains 198 inmates. The receipts of the State prison over its expenditures were \$961. In the Insane Retreat the number of beneficiaries of the State were 133: also 38 beneficiaries in the Deaf and Dumb Asylum; 164 patients in the Hospital; 15 imbeciles who were beneficiaries. The capital of the several railroads, in whole or in part within the State, is \$22,665,490. The length of roads under charters granted in whole or in part by the State, is 782 miles, of which 600 are within the State. Total expenditure, exclusive of interest, \$2,033,924; receipts, \$3,673,291; net earnings, \$1,146,461; miles run, 2,449,706; passengers carried, 2,968,076. There are seventy-five banks in the State. Capital, \$21,849,148; deposits, \$9,573,074; circulation, \$12,850,358; specie, \$1,466,857. Since the commencement of the war to May 1st, 28,219 soldiers had enlisted in the several Connecticut regiments. This number was reduced 7,637, by deaths and discharges, including those who entered the service for three months. The number of volunteers in the field who had families in the State, was 8,330, to whom \$70,636 were paid monthly in bounties. The drafts on the treasury for the equipment and support of volunteers, amounted to \$2,101,566. Besides the bounty of \$402 offered by the United States in July to volunteers, the State also offered

\$30 per year, of which one third was payable every four months; also, if the volunteer had a family, \$6 per month were paid to his wife, and \$2 per month to each child under fourteen years of age. If the volunteer was disabled in service, the payment to his family was continued during such disability. Bounties were also paid by the several cities and towns, usually about \$300.

The quota of the State, under the draft, was 7,691, of which only 2,508 had been obtained by the 17th of October, making a deficiency of 5,183. The quota under the call for volunteers, made October 17th, was 5,432. The deficiency of the State on former calls was at that time 1,748, according to the estimate of the War Department; but, according to the State accounts, it had a surplus of 531. Under the call of February 1st, 1864, the quota was increased 3,631—total, 9,053. At that date, 4,477 had enlisted and about 2,850 veterans had reenlisted, leaving 1,726 men to be raised by March 10th, 1864. At an extra session of the Legislature, convened Nov. 3d, the returns from the first district (Hartford) showed the number of conscripts obtained under the draft to be 50; substitutes, 642; paid commutation, 528; conscripts who never reported, 343; do. deserted, 11; substitutes deserted, 8. In the second district (New Haven) conscripts secured, 34; substitutes, 564; paid commutation, 296; never reported, 171; deserted, 71; substitutes deserted, 6. In the third district (New London) conscripts secured, 45; substitutes, 343; paid, 232; never reported, 269; conscripts deserted, none; substitutes deserted, 4. The final returns showed:

Conscripts and substitutes.....	2,276
Paid \$800.....	1,252
Cash paid.....	\$375,600

At the extra session of the Legislature, in November, an act was passed, giving to each colored volunteer, out of the State Treasury, such sum as should make his monthly pay equal to the amount received from the United States by the other volunteers from Connecticut, and an allowance of three dollars and fifty cents per month for his clothing in addition.

Ten dollars were paid to the person procuring volunteers, for each man. No volunteer under the act was to be discharged except in the county in which he enlisted. Two hundred thousand dollars were appropriated for this purpose. Another act provided for the payment of three hundred dollars bounty to each volunteer, in addition to all previous sums ordered. The sum of eighteen hundred thousand dollars was appropriated for this purpose.

The returns relative to the various jails in the State showed the whole number of commitments during the year to be 1,500, a decrease of nearly 500 compared with the previous year. Of those, 492 were for common drunkenness; 260 for assault; 190 for larceny; 74 for lewd conduct; 65 for a breach of the peace—

650 were born in the United States; 850 of foreign birth, and 20 unknown.

The election for State officers took place on the first Monday in April. The candidates for governor were, Wm. A. Buckingham, Administration, and Thomas H. Seymour, Opposition. The vote was as follows: Buckingham, 41,032; Seymour, 38,395; Scattering, 36. Total vote, 79,463.

The Legislature was as follows:

	Senate.	House.
Administration.....	13	142
Opposition.....	8	95

The vote for members of Congress was as follows:

	1st dist.	2d dist.	3d dist.	4th dist.
Admin.....	10,493	10,420	8,873	11,248
Opposition....	10,158	11,450	6,381	10,892

A large number of soldiers belonging to the State, in the army, received a furlough about the time of election, and returned home. The number was between 1,000 and 3,000. At the previous session of the Legislature a law was passed to enable persons absent from the State and enlisted in the armies to vote. This law was decided by the Supreme Court of the State to be unconstitutional.

CONNOR, HON. SKEFFINGTON, LL.D., a Puisne judge of the Court of Queen's Bench, Upper Canada. George Skeffington Connor was born in Dublin, Ireland, in 1810. He entered Trinity College at the age of fourteen, and graduated there in 1830. In the same year he married Eliza Hume, of Humewood, county Wicklow (whose grandfather, uncle, and cousin-german have successively, since 1784, represented that county in the House of Commons), and niece of the last Lord Hartland. In 1832, he came to Canada with Mrs. Connor and the families of ex-Chancellor Blake, the Bishop of Huron, Archdeacon Brough, and other gentlemen who, like himself, emigrated in that year from Ireland to Canada.

On his arrival in Canada, Mr. Connor took up his residence in the township of Ovilvia, which was then a wilderness, where he lived for two years; but becoming tired of a life in the back woods of Canada, he returned to Ireland, whence, after a short stay, he went to the continent of Europe, where he resided for some years.

During his absence, Mr. Connor was called to the Irish bar, in 1833; and, on his return to Canada, was called to the bar, at Osgoode Hall, in 1842. He entered into partnership with ex-Chancellor Blake and Mr. Justice Morrison. In 1846 he again visited Ireland, and upon that occasion took the degree of LL.D. in the University of Dublin.

In 1850 he was appointed Queen's counsel and a bencher of the Law Society; and, in 1858, he held the office of solicitor-general for Upper Canada. A few days before the general election of 1847-'8, he began to take an interest in Canadian politics; and on one occasion he unsuccessfully contested the county of

Simcoe. At the general election of 1856, he was elected for South Oxford, which constituency he continued to represent till his elevation to the Queen's Bench, as a puisne judge, 1st Feb., 1863. While a partner in the firm of Blake, Morrison & Co., he enjoyed for many years an extensive and lucrative practice at *nisi prius*, and was more than ordinarily successful as an advocate. During the last few years, his attention was chiefly devoted to the discharge of his parliamentary duties. During the whole of his parliamentary career he adhered to the liberal party. He conciliated the esteem of his associates at the bar. An affectionate husband, an ardent friend, a cheerful companion, generous and hospitable, he will long be deeply regretted by a large circle of friends who deeply lament that he should have been so soon removed from the honorable position to which, as a judge and as a chancellor of the University, he was so recently elevated.

CORCORAN, MICHAEL, a brigadier-general of U. S. volunteers, born in Carrowkeel, county Sligo, Ireland, Sept. 21st, 1827, died Dec. 22d, 1863, near Fairfax Court-House, of injuries received by a fall from his horse. His father, Thomas Corcoran, was an officer in the British army, and saw service in the West Indies. On the mother's side, he was a descendant of the Earl of Lucan, the title and estates of whose family were confiscated after the noble defence of Limerick, during the seventeenth century, and were conferred on the Bingham family for services rendered the British crown. Young Corcoran received the benefits of a good English education until his nineteenth year, when, through some influential friends, he received an appointment in the Irish Constabulary force; but the love of his country burned so strongly within him that he could not brook the oppression of British rule, and, fearing that some occasion might tempt him to break through all restraint, he resigned his commission in 1849, emigrated to this country and settled in New York city. There he made many friends, and through their influence was appointed to an official situation in the post-office, and subsequently was clerk in the register's office. He commenced his military career as a private in Company I, 69th New York State militia. Displaying some amount of military talent, he rose successively from one grade to another, and, in August, 1859, was elected colonel of the 69th. While holding this position, he attracted much public notice by his refusal to parade his regiment at the reception accorded to the Prince of Wales, upon his visit to New York city during the fall of 1860. He had not forgotten how England had persecuted and oppressed his countrymen, and declined to do homage to the son of a sovereign under whose rule some of the most worthy sons of Ireland had been banished. In this he was consistent with the spirit and principles of those heroes of Limerick from whom

he had descended, and was fully sustained by the corps he commanded. By command of Major-General Sandford he was subjected to a trial by court-martial, which was long, and contested upon his part with true Irish spirit and independence, and which was still pending when the war broke out. The President's call to arms fired all the patriotism of his soul; he called upon his men to stand by the flag of the Union and the sacred principles it involved. The court-martial was quashed. The Irish flocked to the ranks with all the enthusiasm of native-born citizens, and the 69th left New York for the seat of war, attended by a vast concourse of admiring people. The regiment was speedily sent to Virginia, where the men comprising it built, upon Arlington Heights, the famous "Fort Corcoran." At the disastrous battle of Bull Run, July 21st, 1861, the 69th won itself much honor. Their gallant Colonel was taken prisoner, first sent to Richmond, and afterward to Charleston, S. C., where he was closely confined for nearly a whole year, being held most of the time as a hostage for some privateersmen who had been condemned as pirates. An exchange being finally effected, he was released, and was commissioned brigadier-general dating from July 21, 1861. He next organized the Corcoran Legion which took part in the battles of the Nansemond river and Suffolk, during April, 1863, and held the advance of the enemy upon Norfolk in check. In August, 1863, the Legion was added to the army of the Potomac. On the 22d of December, Gen. Meagher, who had been paying a visit to Gen. Corcoran, was returning to Washington, when the latter, with some members of his staff, concluded to accompany him. Gen. Corcoran mounted upon Gen. Meagher's horse, and was somewhat in advance of the party. When near his headquarters, his companions found him lying senseless, his horse having fallen upon him. He was placed at once under medical treatment, but died without waking to consciousness.

COUCH, RICHARD QUILLAR, Esq., an English surgeon and physiologist, born at Polperro, Cornwall, March 14th, 1816, died at Penzance, Cornwall, May 8th, 1863. After receiving a thorough education he commenced the study of medicine under his father, and subsequently at Guy's Hospital, where he obtained many honors, and a silver medal for ophthalmic surgery. From his father he inherited a taste for marine zoology, and was accustomed to devote his leisure to the examination of the structure and habits of the creatures which the ocean abundantly supplied him. The time intervening between the completion of his medical studies and his settlement at Penzance was passed at Polperro, where he carried on a series of observations on the development of the frog from the worm, on the metamorphoses of the Decapod Crustaceans, and on many other obscure points of natural history. He added, also, a third part

to the "Cornish Fauna," which arranged and described the Zoophytes and Calcareous Corallines of the Cornish coast. The first and second parts of this work were by his father, and treat of the vertebrated, radiated, and testaceous molluscs of the county. In 1843 Mr. Couch settled down to the practice of his profession, which soon became very extensive, at Penzance. He paid particular attention to the diseases and mortality of the miners of Cornwall, and embodied his observations and deductions in papers, which were published by the Polytechnic Society of Cornwall, and were subsequently translated into French. In the Penzance Natural History and Antiquarian Reports he contributed papers "On the Morphology of the different Organs of Zoophytes," "On the Reproduction of Amputated Parts in the lower Animals," and many other important subjects. He also contributed to the Reports of the Royal Institution of Cornwall. His researches in geology were quite extensive, and many valuable and important documents from his pen are preserved in the transactions of the Geological Society of his town; also an elaborate report made by him every year upon the progress made in examining the geology of the country.

CRITTENDEN, JOHN JAY (according to some authorities his middle name was Jordan), an American statesman, born in Woodford county, Ky., about 1785, died at his residence in Frankfort, Ky., July 26th, 1863. Early in the present century he commenced the practice of the law in Frankfort, and by his ability and eloquence was soon recognized as one of the leaders of the Kentucky bar. In 1816 he represented Franklin county in the Lower House of the Kentucky Legislature, and in the succeeding year took his seat in the U. S. Senate to fill an unexpired term of two years. Coming into the latter body as one of its youngest members, and scarcely known beyond the limits of his native State, he almost immediately brought himself into notice by a generous and pathetic appeal in behalf of the unfortunate Gen. St. Clair, who had petitioned Congress for arrearages of pay; and during the remainder of his term he participated frequently in important debates as a supporter of President Monroe. For many years subsequently to 1819 Mr. Crittenden was chiefly occupied with professional duties, occasionally however representing his county in the Kentucky House of Representatives, of which he was for several years speaker. In 1828 he was nominated by President J. Q. Adams a judge of the U. S. Supreme Court, but the Senate refused to confirm him.

He reentered public life in 1835 as a U. S. senator for a full term of six years, at the conclusion of which he entered the cabinet of President Harrison as attorney general. Retiring with his colleagues, except Mr. Webster, in the succeeding September, in consequence of Mr. Tyler's bank vetoes, he was elected to the U. S. Senate in 1842 for the residue of Mr. Clay's term, and was subsequently reelected

for a full term from March 4th, 1843. He resigned in 1848 to accept the office of governor of Kentucky, to which he had been elected by the Whig party by a large majority, and in July, 1850, he was appointed U. S. attorney general by President Fillmore, which office he held until the accession of President Pierce in 1852. In 1855 he again entered the Senate for a full term of six years.

At the outset of his career a Republican (a term then used) and subsequently a Whig, Mr. Crittenden was, during the better part of Mr. Clay's life, his devoted friend and supporter; and when, after the dissolution of the Whig party in 1855-'56, its members in the Southern States were absorbed by the Democratic party and the newly formed American party, he became a prominent leader of the latter organization. The protective system and national bank found in him a warm supporter, and in common with his party he opposed the sub-treasury and other fiscal measures of the Democrats. In international disputes, as the Oregon boundary question, the Mexican war, and the alleged illegal right of search exercised by Great Britain in 1858, he invariably counselled conciliatory measures, whenever consistent with the honor of the country; and his course on the vexed question of slavery was moderate and conservative for one representing a large slaveholding constituency. He opposed the annexation of Texas as unconstitutional, unwise, and unnecessary; also the admission of Kansas under the Topeka (anti-slavery) constitution in 1856, on the ground principally of informality in the preparation and adoption of that instrument. With no less emphasis he opposed her admission under the Lecompton constitution, which he denounced as a fraud upon the people; and he offered a substitute for the bill, providing for the submission of the Lecompton instrument to a popular vote, which failed to pass both houses of Congress. Throughout the exciting and embittered debates on the Kansas question he spoke often and with effect, and from his experience of parliamentary rules and political history, and his conciliatory views, was more than once enabled to become the arbiter of disputes between others. He was also opposed, though not in Congress at the time, to the repeal, in 1854, of the Missouri compromise.

During the memorable second session of the Thirty-sixth Congress, Mr. Crittenden, true to the conciliatory policy which was the marked feature of his public career, laid before the Senate the plan of adjustment known as the "Crittenden Propositions" or "Compromise," hoping thereby to avert the threatened storm of secession. He proposed to renew the Missouri line of 36° 30'; to prohibit slavery north, and to permit it south of that line; to admit new States with or without slavery as their constitutions might provide; to prohibit Congress from abolishing slavery in the District of Columbia so long as it exists in Virginia or

Maryland; to permit free transmission of slaves by land or water in any State; to pay for fugitive slaves rescued after arrest; to ask the repeal of personal liberty laws in the States; and he advocated the incorporation of these concessions into the Constitution, as unalterable clauses of that instrument, with an earnestness and eloquence characteristic of his early legislative career. But in the opinion of a majority of Congress the time for concession had passed, and the resolutions were accordingly defeated.

Hostilities having commenced, Mr. Crittenden at once avowed himself in favor of maintaining at all hazards the integrity of the Union and the supremacy of the laws. He took his seat in the U. S. House of Representatives as a member from the Seventh Congressional District of Kentucky, at the extra session of July, 1861, and throughout that Congress participated in the chief debates, if not as an avowed partisan of the administration in all its measures, yet as an earnest and patriotic legislator, superior to party claims or political prejudices. The sole survivor of a past generation of statesmen, and representing a State whose territory in the first year of the war was at least debatable ground, he could not conform to the new radical opinions which the crisis evolved, and opposed the Confiscation Act, the Emancipation Proclamation, and the enlistment of negroes into the army, as measures fraught with danger to the country, and, some of them, unconstitutional. But these he claimed were minor considerations in comparison with the importance of crushing out every vestige of armed resistance to the Government. "Here is the rebellion," he said, "with the hand uplifted; is it not our duty to save our country first, and then turn round and save the Constitution? The measures to which I have alluded are obnoxious, but the rebellion is more so." And in an address to his constituents, by whom he had been renominated for Congress, delivered but a few weeks before his death, he reiterated his purpose in these words: "In defeat or victory my determination is to stand by and maintain the Government, and to do all I can to promote a vigorous prosecution of the war."

CUMBERLAND VALLEY may be regarded as an extension, north of the Potomac, of the Shenandoah valley. It extends to the north and east from the Potomac river to the Lebanon valley, and contains the towns of Ha-

gerstown, Maryland; Chambersburg, Carlisle, Harrisburg, &c., in Pennsylvania. It is bounded on the north and west by the Blue mountain range, and on the southeast by the South Mountain, which extends northeasterly and terminates south of Carlisle. The soil is calcareous, exceedingly fertile, and in a high state of cultivation. It was invaded by the Confederate troops in June, 1863.
